Report of Independent Auditors

Board of Directors
Lockheed Martin Global, Inc.

Opinion

We have audited the consolidated financial statements of Lockheed Martin Global, Inc. (the Company), which comprise the consolidated balance sheets as of December 31, 2023 and 2022, and the related consolidated statements of earnings, comprehensive income, changes in stockholder's equity, and cash flows for the years then ended, and the related notes (collectively referred to as the financial statements).

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2023 and 2022, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free of material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal-control-related matters that we identified during the audit.

Lockheed Martin Global, Inc.

Notes to Consolidated Financial Statements

December 31, 2023

1. Nature of the Organization

Lockheed Martin Global, Inc. (LMGI, we, or the Company), a wholly owned subsidiary of Lockheed Martin Corporation (LMC), is a company incorporated in Delaware, United States. We are a global security and aerospace company principally engaged in the research, design, development, manufacture, integration, and sustainment of advanced technology systems, products, and services. We also provide a broad range of management, engineering, technical, scientific, logistics, system integration, and cybersecurity services. We provide liaison services through overseas offices to support in-country operations of LMC.

2. Significant Accounting Policies

Basis of Presentation

Our consolidated financial statements include the accounts of subsidiaries we control and variable interest entities if we are the primary beneficiary. We eliminate intercompany balances and transactions in consolidation. Our receivables, contract assets, inventories, contract liabilities, and certain amounts in other current liabilities primarily are attributable to long-term contracts or programs in progress for which the related operating cycles are longer than one year. In accordance with industry practice, we include these items in current assets and current liabilities. Accounts receivable from affiliates, net is the result of over-time netting of cash transactions with LMC and net cash sweeps to LMC. As the balance is payable to LMGI on demand, we include the balance in current assets.

Use of Estimates

We prepare our consolidated financial statements in conformity with U.S. generally accepted accounting principles (U.S. GAAP). In doing so, we are required to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. We base these estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying amounts of assets and liabilities that are not readily apparent from other sources. Our actual results may differ materially from these estimates. Significant estimates inherent in the preparation of our consolidated financial statements include, but are not limited to, accounting for sales and cost recognition and accounting for income taxes, including deferred tax assets.

Lockheed Martin Global, Inc.

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

Revenue Recognition

The majority of our net sales are generated from long-term contracts with international customers (including foreign military sales (FMS) contracted through the U.S. Government) for the research; design; development; manufacture; integration; and sustainment of advanced technology systems, products, and services as well as through sales to our parent entity, LMC. We provide our products and services under fixed-price and cost-reimbursable contracts. Under fixed-price contracts, we agree to perform the specified work for a predetermined price. To the extent our actual costs vary from the estimates upon which the price was negotiated, we will generate more or less profit or could incur a loss. Some fixed-price contracts have a performance-based component under which we may earn incentive payments or incur financial penalties based on our performance.

Cost-reimbursable contracts provide for the payment of allowable costs incurred during performance of the contract plus a fee up to a ceiling based on the amount that has been funded. Typically, we enter into three types of cost-reimbursable contracts: cost-plus-award-fee, cost-plus-incentive-fee, and cost-plus-fixed-fee. Cost-plus-award-fee contracts provide for an award fee that varies within specified limits based on the customer's assessment of our performance against a predetermined set of criteria, such as targets based on cost, quality, technical, and schedule criteria. Cost-plus-incentive-fee contracts provide for reimbursement of costs plus a fee, which is adjusted by a formula based on the relationship of total allowable costs to total target costs (i.e., incentive based on cost) or reimbursement of costs plus an incentive to exceed stated performance targets (i.e., incentive based on performance). The fixed fee in a cost-plus-fixed-fee contract is negotiated at the inception of the contract and does not vary with actual costs. The majority of our contracts with LMC are on a cost-reimbursable basis.

We account for a contract after it has been approved by all parties to the arrangement, the rights of the parties are identified, payment terms are identified, the contract has commercial substance, and collectability of consideration is probable.

We assess each contract at its inception to determine whether it should be combined with other contracts. When making this determination, we consider factors such as whether two or more contracts were negotiated and executed at or near the same time or were negotiated with an overall profit objective. If combined, we treat the combined contracts as a single contract for revenue recognition purposes.

Lockheed Martin Global, Inc.

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

We evaluate the products or services promised in each contract at inception to determine whether the contract should be accounted for as having one or more performance obligations. The products and services in our contracts are typically not distinct from one another due to their complex relationships and the significant contract management functions required to perform under the contract. Accordingly, our contracts are typically accounted for as one performance obligation. In limited cases, our contracts have more than one distinct performance obligation, which occurs when we perform activities that are not highly complex or interrelated or involve different product life cycles. Significant judgment is required in determining performance obligations, and these decisions could change the amount of revenue and profit recorded in a given period.

We determine the transaction price for each contract based on the consideration we expect to receive for the products or services being provided under the contract. We exclude from the transaction price the taxes assessed by governmental authorities that are both imposed on and concurrent with its specific revenue-producing transactions, where such taxes are collected from our customers. For contracts where a portion of the price may vary, we estimate variable consideration at the most likely amount, which is included in the transaction price to the extent it is probable that a significant reversal of cumulative revenue recognized will not occur. We analyze the risk of a significant revenue reversal and, if necessary, constrain the amount of variable consideration recognized in order to mitigate this risk.

At the inception of a contract, we estimate the transaction price based on our current rights and do not contemplate future modifications (including unexercised options) or follow-on contracts until they become legally enforceable. Contracts are often subsequently modified to include changes in specifications, requirements or price, which may create new or change existing enforceable rights and obligations. Depending on the nature of the modification, we consider whether to account for the modification as an adjustment to the existing contract or as a separate contract. Generally, modifications to our contracts are not distinct from the existing contract due to the significant integration and interrelated tasks provided in the context of the contract. Therefore, such modifications are accounted for as if they were part of the existing contract and recognized as a cumulative adjustment to revenue.

Our contracts with the U.S. Government, including FMS contracts, are subject to the Federal Acquisition Regulations and the price is typically based on estimated or actual costs plus a reasonable profit margin. As a result of these regulations, the stand-alone selling price of products or services in our contracts with the U.S. Government and FMS contracts are typically equal to the selling price stated in the contract. Therefore, we typically do not need to allocate (or reallocate) the transaction price to multiple performance obligations.

Lockheed Martin Global, Inc.

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

We recognize revenue as performance obligations are satisfied and the customer obtains control of the products and services. In determining when performance obligations are satisfied, we consider factors such as contract terms, payment terms and whether there is an alternative future use of the product or service. Substantially all our revenue is recognized over a period of time as we perform under the contract because control of the work-in-process transfers continuously to the customer. For contracts with the U.S. Government and FMS contracts, this continuous transfer of control of the work-in-process to the customer is supported by clauses in the contract that allow the customer to unilaterally terminate the contract for convenience, pay us for costs incurred plus a reasonable profit, and take control of any work-in-process. Our contracts, primarily international direct commercial contracts, typically do not include termination for convenience provisions. However, continuous transfer of control to our customer is supported as, if our customer were to terminate the contract for reasons other than our nonperformance, we have the right to recover damages which would include, among other potential damages, the right to payment for our work performed to date plus a reasonable profit to deliver products or services that do not have an alternative use to us.

For performance obligations to deliver products with continuous transfer of control to the customer, revenue is recognized based on the extent of progress toward completion of the performance obligation, generally using the percentage-of-completion cost-to-cost measure of progress for our contracts because it best depicts the transfer of control to the customer as we incur costs on our contracts. Under the percentage-of-completion cost-to-cost measure of progress, the extent of progress toward completion is measured based on the ratio of costs incurred to date to the total estimated costs to complete the performance obligation(s). For performance obligations to provide services to the customer, revenue is recognized over a period of time based on costs incurred or the right to invoice method (in situations where the value transferred matches our billing rights) as our customer receives and consumes the benefits. Substantially all net sales from goods or services are transferred to customers over time.

For the majority of our international direct commercial contracts to deliver complex systems, we typically receive advance payments prior to commencement of work, as well as milestone payments that are paid in accordance with the terms of our contract as we perform. We recognize a liability for payments in excess of revenue recognized, which is presented as a contract liability on the consolidated balance sheet. The portion of payments retained by the customer until final contract settlement is not considered a significant financing component because the intent is to protect the customer from our failure to adequately complete some or all of the obligations under

Lockheed Martin Global, Inc.

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

the contract. Payments received from customers in advance of revenue recognition are not considered to be significant financing components because they are used to meet working capital demands that can be higher in the early stages of a contract.

For FMS and U.S. Government contracts, we generally do not begin work on contracts until funding is appropriated by the customer. Billing timetables and payment terms on our contracts vary based on a number of factors, including the contract type. Typical payment terms under fixed-price contracts with the U.S. Government provide that the customer pays either performance-based payments based on the achievement of contract milestones or progress payments based on a percentage of costs we incur.

For fixed-price and cost-reimbursable contracts, we present revenues recognized in excess of billings as contract assets on the consolidated balance sheets. Amounts billed and due from our customers under both contract types are classified as receivables on the consolidated balance sheets.

Significant estimates and assumptions are made in estimating contract sales and costs, including the profit booking rate. At the outset of a long-term contract, we identify and monitor risks to the achievement of the technical, schedule, and cost aspects of the contract, as well as variable consideration, and assess the effects of those risks on our estimates of sales and total costs to complete the contract. The estimates consider the technical requirements (e.g., a newly developed product versus a mature product), the schedule and associated tasks (e.g., the number and type of milestone events) and costs (e.g., material, labor, subcontractor, overhead, general and administrative, and the estimated costs to fulfill our industrial cooperation agreements, sometimes referred to as offset or localization agreements, required under certain contracts with international customers). The initial profit booking rate of each contract considers risks surrounding the ability to achieve the technical requirements, schedule and costs in the initial estimated total costs to complete the contract. Profit booking rates may increase during the performance of the contract if we successfully retire risks surrounding the technical, schedule and cost aspects of the contract, which decreases the estimated total costs to complete the contract or may increase the variable consideration we expect to receive on the contract. Conversely, our profit booking rates may decrease if the estimated total costs to complete the contract increase or our estimates of variable consideration we expect to receive decrease. All of the estimates are subject to change during the performance of the contract and may affect the profit booking rate. When estimates of total costs to be incurred on a contract exceed total estimates of the transaction price, a provision for the entire loss is determined at the contract level and is recorded in the period in which the loss is determined.

Lockheed Martin Global, Inc.

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

Income Taxes

The provision for income taxes is calculated as if LMGI completed a separate tax return apart from LMC, although LMGI was included in the LMC U.S. federal and state income tax returns. Deferred tax assets and liabilities are recognized principally for the expected tax consequences of temporary differences between the tax basis of assets and liabilities and their reported amounts, using currently enacted tax rates. Tax attributes utilized by LMC are treated as transactions between LMGI and LMC.

We calculate our provision for income taxes using the asset and liability method, under which deferred tax assets and liabilities are recognized based on the future tax consequences attributable to temporary differences that exist between the financial statement carrying amount of assets and liabilities and their respective tax bases, as well as from operating loss and tax credit carryforwards. We measure deferred tax assets and liabilities using enacted tax rates that will apply in the years in which we expect the temporary differences to be recovered or paid. A valuation allowance is provided against a deferred tax asset when it is more likely than not that some or all of the deferred tax assets will not be realized. All available evidence, both positive and negative, is considered to determine whether a valuation allowance for deferred tax assets is needed.

We periodically assess our tax exposures related to periods that are open to examination. Based on the latest available information, we evaluate our tax positions to determine whether the position will more likely than not be sustained upon examination by the Internal Revenue Service or other taxing authorities. If we cannot reach a more-likely-than-not determination, no benefit is recorded. If we determine that the tax position is more likely than not to be sustained, we record the largest amount of benefit that is more likely than not to be realized when the tax position is settled. We record interest and penalties related to income taxes as a component of income tax expense on our consolidated statements of earnings. Interest and penalties were not material.

Foreign Currencies

Our consolidated financial statements are presented in United States dollars, which is also LMC's functional currency. Transactions in foreign currencies are initially recorded by the entities at their respective functional currency spot rates at the date the transaction first qualifies for recognition.

Lockheed Martin Global, Inc.

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

Cash and Cash Equivalents

Cash equivalents include highly liquid instruments with original maturities of 90 days or less.

Receivables

Receivables represent our unconditional right to consideration under the contract and include amounts billed and currently due from customers. The amounts are stated at their net estimated realizable value which approximates fair value. There was no provision made for doubtful accounts related to our receivables in 2023.

Inventories

We record inventories at the lower of cost or estimated net realizable value. If events or changes in circumstances indicate that the utility of our inventories has diminished through damage, deterioration, obsolescence, changes in price, or other causes, a loss is recognized in the period in which it occurs. We capitalize labor, material, subcontractor, and overhead costs as work-in-process for contracts where control has not yet passed to the customer. In addition, we capitalize costs incurred to fulfill a contract in advance of contract award in inventories as work-in-process if we determine that contract award is probable. We determine the costs of other product and supply inventories by using the first-in, first-out or average cost methods.

Property, Plant, and Equipment

We record property, plant, and equipment at cost. We provide for depreciation and amortization on plant and equipment generally using accelerated methods during the first half of the estimated useful lives of the assets and the straight-line method thereafter. The estimated useful lives of our plant and equipment generally range from 10 to 40 years for buildings and 5 to 15 years for machinery and equipment. No depreciation expense is recorded on construction-in-progress until such assets are placed into operation. Depreciation expense related to plant and equipment was \$1.3 million and \$1.4 million in 2023 and 2022, respectively.

Lockheed Martin Global, Inc.

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

We review the carrying amounts of long-lived assets for impairment if events or changes in the facts and circumstances indicate that their carrying amounts may not be recoverable. We assess impairment by comparing the estimated undiscounted future cash flows of the related asset grouping with its carrying amount. If an asset is determined to be impaired, we recognize an impairment charge in the current period for the difference between the fair value of the asset and its carrying amount. There were no significant impairment charges in 2023 or 2022.

Investments

We make investments in companies that we believe are advancing or developing new technologies applicable to our business. These investments are primarily in early-stage companies and may be in the form of common or preferred stock, warrants, convertible debt securities, investments in funds or equity method investments. Most of these investments are in equity securities without readily determinable fair values (privately held securities), which are measured initially at cost and are then adjusted to fair value only if there is an observable price change or reduced for impairment, if applicable. The carrying amounts of the investments were \$26.4 million and \$16.9 million at December 31, 2023 and December 31, 2022 and are included on our consolidated balance sheets within other noncurrent assets. Changes in fair value and/or sales of investments are reflected in the other non-operating income, net account on our consolidated statements of earnings. During 2023 and 2022, gains and losses on these investments were not significant.

Derivative Financial Instruments

We use derivative instruments principally to reduce our exposure to market risks from changes in foreign currency exchange rates. We do not enter into or hold derivative instruments for speculative trading purposes. We transact business globally and are subject to risks associated with changing foreign currency exchange rates. We enter into foreign currency hedges such as forward and option contracts that change in value as foreign currency exchange rates change. Our most significant foreign currency exposures relate to the British pound sterling, the euro, and the Australian dollar. These contracts hedge forecasted foreign currency transactions in order to mitigate fluctuations in our earnings and cash flows associated with changes in foreign currency exchange rates. We designate foreign currency hedges as cash flow hedges. We also may enter into derivative instruments that are not designated as hedges and do not qualify for hedge accounting, which are intended to mitigate certain economic exposures.

Lockheed Martin Global, Inc.

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

We record derivatives at their fair value. The classification of gains and losses resulting from changes in the fair values of derivatives is dependent on our intended use of the derivative and its resulting designation. Adjustments to reflect changes in fair values of derivatives attributable to highly effective hedges are either reflected in earnings and largely offset by corresponding adjustments to the hedged items or reflected net of income taxes in accumulated other comprehensive loss until the hedged transaction is recognized in earnings. Changes in the fair value of the derivatives that are not highly effective, if any, are immediately recognized in earnings. The aggregate notional amount of our outstanding foreign currency hedges at December 31, 2023 and 2022, was \$788.8 million and \$986.0 million and the fair value was \$1.9 million and less than \$1.0 million, respectively, at each balance sheet date. Recognized gains and losses on cash flow hedges recognized on the income statement were not material. Substantially all of our derivatives are designated for hedge accounting.

3. Income Taxes

Our provision for federal and foreign income tax expense consisted of the following:

	Year Ended December 31	
	2023	2022
	<i>(In Thousands)</i>	
Federal income tax expense (benefit):		
Current	\$ 18,213	\$ 49,916
Deferred	12,706	(26,751)
Total federal income tax expense	30,919	23,165
Foreign income tax expense:		
Current	23,392	12,419
Deferred	—	—
Total foreign income tax expense	23,392	12,419
Total income tax expense	\$ 54,311	\$ 35,584

Lockheed Martin Global, Inc.

Notes to Consolidated Financial Statements (continued)

3. Income Taxes (continued)

Our reconciliation of the U.S. federal statutory income tax rate of 21% to actual income tax expense for continuing operations is as follows:

	2023		2022	
	Amount <i>(In Thousands)</i>	Rate	Amount <i>(In Thousands)</i>	Rate
Income tax expense at the U.S. federal statutory tax rate	\$ 39,322	21.0%	\$ 32,844	21.0%
Increases (decreases) to the statutory tax rate:				
Foreign tax provision	23,392	12.5	12,419	7.9
Foreign tax credit generated	(23,392)	(12.5)	(12,419)	(7.9)
Other – net	265	0.1	165	0.1
Valuation allowance	14,724	7.9	2,575	1.6

Deferred tax liabilities related to:		
Other	(3,159)	(2,716)
Deferred tax liabilities	(3,159)	(2,716)
Net deferred tax assets	\$ 42,668	\$ 55,374

Lockheed Martin Global, Inc.

Notes to Consolidated Financial Statements (continued)

3. Income Taxes (continued)

LMGI's operating results are included in LMC's consolidated U.S. federal and state income tax returns. The provisions for income taxes in the accompanying consolidated financial statements have been determined on a separate return basis as if LMGI filed its own tax returns. Management considered and weighed the available evidence, both positive and negative, to determine whether it is more likely than not that some portion, or all, of LMGI's deferred tax assets will not be realized and concluded that future earnings would not indicate it would be able to utilize the excess foreign tax credits. A valuation allowance in the amount of \$109.0 million and \$94.2 million in 2023 and 2022, respectively, was recorded for the foreign tax credit.

LMGI does not have any material unrecognized tax benefits as of December 31, 2023 or 2022.

LMC files income tax returns, including LMGI, in the U.S. federal jurisdiction and LMGI files income tax returns in various foreign jurisdictions. With few exceptions, the statute of limitations is no longer open for U.S. federal or non-U.S. income tax examinations for the years before 2017 other than with respect to refunds. LMGI's foreign income tax payments, net of refunds received of \$2.1 million and \$6.7 million, were \$20.0 million and \$45.8 million in 2023 and 2022, respectively.

4. Related Parties

LMGI is a wholly owned subsidiary of LMC, which is also the Company's ultimate holding company. Related companies in these consolidated financial statements refer to members of LMC's group of companies. In the ordinary course of business, we are involved in transactions with other wholly owned or otherwise consolidated entities of LMC, including Lockheed Martin Overseas Corporation; Lockheed Martin Canada, Inc.; and Lockheed Martin Australia, Ltd. The balances are unsecured, interest free, and repayable on demand unless otherwise stated.

LMGI entered into the following trading transactions with related parties:

	2023	2022
	<i>(In Thousands)</i>	
Sales of goods and services for the year ended December 31	\$ 501,945	\$ 489,536
Accounts receivable from affiliates, net as of December 31	1,220,517	1,010,289
Shared costs of employee benefit plans for the year ended December 31	15,712	13,237
Administrative costs for the year ended December 31	7,367	5,134

Lockheed Martin Global, Inc.

Notes to Consolidated Financial Statements (continued)

4. Related Parties (continued)

Terms and Conditions of Transactions With Related Parties

The sales to related parties are made on terms such as cost plus a percentage markup or in fixed-price subcontracts detailing the scope of work and financial risk discretely by contract. Outstanding balances at year-end are unsecured and interest free, and settlement occurs in cash multiple times per year. No expense has been recognized in the period for bad debts in respect of the amounts owed by related parties.

5. Commitments and Contingencies

The Company can be involved in various claims and other legal proceedings incidental to the normal course of business. These matters relate to such issues as litigation, government investigations, claims, and contractual disputes. The Company is not always aware of such investigations or its status in them. The Company accrues its best estimates of required provisions for any such known matters when the loss is probable and the amount of loss can be reasonably estimated. Litigation and the outcomes of investigations are inherently unpredictable. However, management believes that the Company has valid defenses with respect to legal matters pending against it, and no material adverse legal outcomes are considered probable or reasonably possible at December 31, 2023. Legal costs are expensed as incurred.

6. Subsequent Events

The Company has evaluated subsequent events through April 23, 2024, which was the date the accompanying consolidated financial statements were issued. No events have occurred that would require disclosure in the consolidated financial statements.

EY | Building a better working world

EY exists to build a better working world, helping to create long-term value for clients, people and society and build trust in the capital markets.

Enabled by data and technology, diverse EY teams in over 150 countries provide trust through assurance and help clients grow, transform and operate.

Working across assurance, consulting, law, strategy, tax and transactions, EY teams ask better questions to find new answers for the complex issues facing our world today.

EY refers to the global organization, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients.
