## **Statement by the Executive Board and Board of Directors on the annual report**

---

We have on this day presented the annual report for the financial year 01.01.24 - 31.12.24 for NRT - Nordisk Røntgen Teknik A/S.

The annual report is presented in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the company's assets, liabilities and financial position as at 31.12.24 and of the results of the company's activities for the financial year 01.01.24 - 31.12.24.

We believe that the management's review includes a fair review of the matters dealt with in the management's review.

The annual report is submitted for adoption by the general meeting.

Hasselager, May 20, 2025

**To the Shareholder of NRT - Nordisk Røntgen Teknik A/S****Opinion**

We have audited the financial statements of NRT - Nordisk Røntgen Teknik A/S for the financial year 01.01.24 - 31.12.24, which comprise income statement, balance sheet, statement of changes in equity and notes to the financial statements, including material accounting policy information. The financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion the financial statements give a true and fair view of the company's financial position at 31.12.24 and of the results of the company's operations for the financial year 01.01.24 - 31.12.24 in accordance with the Danish Financial Statements Act.

**Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We are independent of the company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

**Other matter**

Development costs have been capitalized in the annual report, and these assets are associated with uncertainty about their valuation. We agree with the accounting practices used by management and the accounting estimates exercised by the management. We refer to note 1, where the mention of this uncertainty is described.

**Statement on the management's review**

Management is responsible for the management's review.

Our opinion on the financial statements does not cover the management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, it is our responsibility is to read management's review and, in doing so, consider whether management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether management's review provides the information required by law and regulations.

Based on the work we have performed, we conclude that the management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of Danish Financial Statements Act. We did not identify any material misstatement of the management's review.

### **Management's responsibilities for the financial statements**

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless management either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

### **Auditor's responsibilities for the audit of the financial statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

MNE-no. mne32849

### Primary activities

The company's activities consist of development, production and sale of equipment for the healthcare sector as well as any activity that, according to the board's discretion, is connected hereto.

### Changed ownership

Per March 1, 2022 the company became part of Canon Medical Systems Corporation, Japan, as a 100% owned subsidiary. Product development and sales activity synergies have started to impact company performance. This development is expected to continue in the coming years.

### Uncertainty concerning recognition and measurement

In the financial statements for the financial year 01.01.24 - 31.12.24, it is important to note the following uncertainty with regard to recognition and measurement, as it has had a significant influence on the assets and liabilities recognised in the financial statements:

In the annual report, the company has capitalized significant costs for development projects in the most recent financial year. The book value of the capitalized costs for development projects amounts to DKK 21,021,133 per 31 December 2024, which is a minor increase compared to 31 December 2023. The value of the capitalized development projects is associated with uncertainty as it depends on the realization of the economic benefits through sales results of the developed products. It is the management's expectation that the financial benefits will clearly exceed the capitalized development costs. Introduction to the market of a newly developed product, that started shipments from middle 2024, has shown satisfactory sales results during second half of 2024 and is expected to significantly contribute to sales in 2025.

### Development in activities and financial affairs

The income statement for the period 01.01.24 - 31.12.24 shows a profit/loss of DKK -8,923,439 against DKK -2,223,991 for the period 01.01.23 - 31.12.23. The balance sheet shows equity of DKK -11,968,303.

In 2024, the company has continued to invest in and develop its capabilities to comply with revised and new regulatory requirements applicable for products and processes, product management and R&D processes, as well as product registrations and clearances in new markets.

While the 2024 financial result is unsatisfactory, the company has continued to strengthen its competence and position for improved market coverage in the coming years.

**Research and development activities**

In the course of the period 01.01.24 - 31.12.24, the company has continued to have significant product development activity. The development has mainly been connected with the Adora B1 systems. DKK 6,099,000 has been capitalized in the period 01.01.24 - 31.12.24 related with development projects against DKK 7,844,000 in the period 01.01.23 - 31.12.23.

**Equity**

By 31.12.24 the company's equity is negative by DKK 11,968,303. The plan is to reestablish the equity during the company's operations. Sales channels expansion is taking place by the owner, Canon Medical Systems Corporation, incorporating NRT's products in its sales organization in additional geographical territories. While this sales channels expansion has required additional efforts to take effect, further sales contribution is from these new channels are expected in 2025. Further, cost optimization efforts have been carried out in cooperation with Canon Medical Systems Corporation during 2024. These will continue to improve production costs during 2025.

**Subsequent events**

No important events have occurred after the end of the financial year.

## 1. Uncertainty concerning recognition and measurement

In the financial statements for 2024, it is important to note the following uncertainty as regards recognition and measurement as it has had a significant influence on the assets and liabilities recognised in the financial statements:

In the annual report, the company has capitalized significant costs for development projects in the most recent financial year. The book value of the capitalized costs for development projects amounts to DKK 21,021,133 per 31 December 2024, which is a minor increase compared to 31 December 2023. The value of the capitalized development projects is associated with uncertainty as it depends on the realization of the economic benefits through sales results of the developed products. It is the management's expectation that the financial benefits will clearly exceed the capitalized development costs. Introduction to the market of a newly developed product, that started shipments from middle 2024, indicates significant sales opportunities, both in existing and in new markets.

## 2. Staff costs

Wages and salaries	22,612,934	21,363,369
Pensions	3,036,363	2,650,664
Other social security costs	446,330	406,627
Other staff costs	476,357	580,030
<b>Total</b>	<b>26,571,984</b>	<b>25,000,690</b>
Average number of employees during the year	42	38

## 3. Financial expenses

Interest, group enterprises	3,488,436	2,388,582
Other interest expenses	35,452	47,644
Foreign currency translation adjustments	0	329,152
Other financial expenses	35,452	376,796
<b>Total</b>	<b>3,523,888</b>	<b>2,765,378</b>

**4. Intangible assets**

Figures in DKK	Completed development projects	Goodwill	Development projects in progress
Cost as at 01.01.24	49,669,199	3,000,000	9,882,000
Additions during the year	0	0	6,099,000
Transfers during the year to/from other items	15,864,000	0	-15,864,000
Cost as at 31.12.24	65,533,199	3,000,000	117,000
Amortisation and impairment losses as at 01.01.24	-38,789,301	-3,000,000	0
Amortisation during the year	-5,839,765	0	0
Amortisation and impairment losses as at 31.12.24	-44,629,066	-3,000,000	0
Carrying amount as at 31.12.24	20,904,133	0	117,000

The recognized costs for development projects, which primarily consist of expenses for salaries, external testing consultancy and auxiliary materials, relate to the development of equipment for the hospital sector. The management has high expectations for these development projects, and the management has not identified any indications of a need for impairment in relation to the accounting book value.

The expected contribution margin on the sale of the new systems is expected to clearly exceed the capitalized development costs, and the expected lifetime of the systems is expected to be 5-10 years.

**5. Other provisions**

Other provisions are expected to be distributed as follows:

Current liabilities	155,000	190,000
Total	155,000	190,000

## 6. Long-term payables

Figures in DKK	Repayment first year	Outstanding debt after 5 years	Total payables at 31.12.24	Total payables at 31.12.23
Payables to group enterprises	79,394	0	84,079,394	70,090,261
Other payables	0	1,163,697	1,163,697	1,128,707
Deferred income	47,642	0	47,642	131,690
<b>Total</b>	<b>127,036</b>	<b>1,163,697</b>	<b>85,290,733</b>	<b>71,350,658</b>

## 7. Contingent liabilities

### *Lease commitments*

The company has concluded lease agreements with terms to maturity of 27-60 months and total lease payments of DKK 1.149.000. This includes lease agreements concluded with group enterprises, but the agreements are also specified separately below.

The company has concluded rental agreements with a notice period of 36 months and a total rent of DKK 3.090.000.

The company has concluded lease agreements with group enterprises with terms to maturity of 37-60 months and total lease payments of DKK 313.000.

### *Other contingent liabilities*

The company is taxed jointly with the other Danish companies in the group and has joint, several and unlimited liability for income taxes and any obligations to withhold tax at source on interest, royalties and dividends for the jointly taxed companies. The total tax liability for the jointly taxed companies at the balance sheet date has not yet been determined. For further information, please see the financial statements of the management company Canon Danmark A/S.

## 8. Accounting policies

### GENERAL

The annual report is presented in accordance with the provisions of the Danish Financial Statements Act (*Årsregnskabsloven*) for enterprises in reporting class B with application of provisions for a higher reporting class.

The accounting policies have been applied consistently with previous years.

### Basis of recognition and measurement

Income is recognised in the income statement as earned, including value adjustments of financial assets and liabilities. All expenses, including depreciation, amortisation, impairment losses and write-downs, are also recognised in the income statement.

Assets are recognised in the balance sheet when it is probable that future economic benefits will flow to the company, and the value of such assets can be measured reliably. Liabilities are recognised in the balance sheet when it is probable that future economic benefits will flow from the company, and the value of such liabilities can be measured reliably. On initial recognition, assets and liabilities are measured at cost. Subsequently, assets and liabilities are measured as described for each item below.

On recognition and measurement, account is taken of foreseeable losses and risks arising before the date at which the annual report is presented and proving or disproving matters arising on or before the balance sheet date.

### CURRENCY

The annual report is presented in Danish kroner (DKK).

On initial recognition, transactions denominated in foreign currencies are translated using the exchange rates applicable at the transaction date. Exchange rate differences between the exchange rate applicable at the transaction date and the exchange rate at the date of payment are recognised in the income statement as a financial item. Receivables, payables and other monetary items denominated in foreign currencies are translated using the exchange rates applicable at the balance sheet date. The difference between the exchange rate applicable at the balance sheet date and at the date at which the receivable or payable arose or was recognised in the latest annual report is recognised under financial income or expenses in the income statement. Fixed assets, inventories and other non-monetary assets acquired in foreign currencies are translated using historical exchange rates.

## 8. Accounting policies - continued -

### LEASES

Lease payments relating to operating leases are recognised in the income statement on a straight-line basis over the lease term.

### GRANTS

Grants are recognised when there is reasonable certainty that the grant conditions have been met and that the grant will be received.

Grants received for the production or construction of assets are recognised as deferred income under payables. For depreciable and amortisable assets, the grant is recognised as the asset is depreciated or amortised.

### INCOME STATEMENT

#### Gross profit

Gross profit comprises revenue, work performed for own account and capitalised, other operating income and raw materials and consumables and other external expenses.

#### Revenue

Income from the sale of goods is recognised in the income statement if delivery has taken place and the risk has passed to the buyer before the end of the financial year and where the selling price can be determined reliably and is expected to be paid. Revenue is measured at fair value and is determined exclusive of VAT and other taxes collected on behalf of third parties and less discounts.

#### Work performed for own account and capitalised

Work performed for own account and capitalised comprises cost of sales, wages and salaries and other internal expenses incurred during the year and included in the cost of self-constructed or self-produced intangible assets and property, plant and equipment.

#### Other operating income

Other operating income comprises income of a secondary nature in relation to the enterprise's activities, including rental income, negative goodwill and gains on the sale of intangible assets and property, plant and equipment.

**8. Accounting policies** - continued -**Costs of raw materials and consumables**

Costs of raw materials and consumables comprise raw materials and consumables used for the year as well as any changes in inventories, including any inventory wastage.

Write-downs of inventories of raw materials and consumables are also recognised under raw materials and consumables to the extent that these do not exceed normal write-downs.

**Other external expenses**

Other external expenses comprise costs relating to distribution, sales and advertising and administration, premises and bad debts to the extent that these do not exceed normal write-downs.

**Staff costs**

Staff costs comprise wages and salaries as well as other staff-related costs.

**Depreciation, amortisation and impairment losses**

The depreciation and amortisation of intangible assets and property, plant and equipment aim at systematic depreciation and amortisation over the expected useful lives of the assets. Assets are depreciated and amortised according to the straight-line method based on the following expected useful lives and residual values:

	Useful lives, years	Residual value, per cent
Completed development projects	5-8	0
Goodwill	5	0
Other plant, fixtures and fittings, tools and equipment	5	0

The basis of depreciation and amortisation is the cost of the asset less the expected residual value at the end of the useful life. Moreover, the basis of depreciation and amortisation is reduced by any impairment losses. The useful life and residual value are determined when the asset is ready for use and reassessed annually.

Intangible assets and property, plant and equipment are impaired in accordance with the accounting policies referred to in the 'Impairment losses on fixed assets' section.

## 8. Accounting policies - continued -

### Other net financials

Interest income and interest expenses, foreign exchange gains and losses on transactions denominated in foreign currencies etc. are recognised in other net financials.

### Tax on profit/loss for the year

The current and deferred tax for the year is recognised in the income statement as tax on the profit/loss for the year with the portion attributable to the profit/loss for the year, and directly in equity with the portion attributable to amounts recognised directly in equity.

The company is jointly taxed with Danish consolidated enterprises.

In connection with the settlement of joint taxation contributions, the current Danish income tax is allocated between the jointly taxed enterprises in proportion to their taxable incomes. This means that enterprises with a tax loss receive joint taxation contributions from enterprises which have been able to use this loss to reduce their own taxable profit.

## BALANCE SHEET

### Intangible assets

#### *Completed development projects and development projects in progress*

Development projects are recognised in the balance sheet where the project aims at developing a specific product or a specific process, intended to be produced or used, respectively, by the company in its production process. On initial recognition, development projects are measured at cost. Cost comprises the purchase price plus expenses resulting directly from the purchase, including wages and salaries directly attributable to the development projects until the asset is ready for use. Interest on loans arranged to finance development projects in the development period is not included in the cost. Other development projects and development costs are recognised in the income statement in the year in which they are incurred.

Development projects in progress are transferred to completed development projects when the asset is ready for use.

Development projects are subsequently measured in the balance sheet at cost less accumulated amortisation and impairment losses.

## 8. Accounting policies - continued -

Completed development projects are amortised using the straight-line method based on useful lives, which are stated in the 'Depreciation, amortisation and impairment losses' section.

### *Goodwill*

Goodwill is measured in the balance sheet at cost less accumulated amortisation and impairment losses.

Goodwill is amortised using the straight-line method based on useful lives, which are stated in the 'Depreciation, amortisation and impairment losses' section.

### *Gains and losses on the disposal of intangible assets*

Gains and losses on the disposal of intangible assets are determined as the difference between the selling price, if any, less selling costs and the carrying amount at the date of disposal.

## **Property, plant and equipment**

Property, plant and equipment comprise other fixtures and fittings, tools and equipment.

Property, plant and equipment are measured in the balance sheet at cost less accumulated depreciation and impairment losses.

Cost comprises the purchase price and expenses resulting directly from the purchase until the asset is ready for use. Interest on loans arranged to finance production is not included in the cost.

Property, plant and equipment are depreciated using the straight-line method based on useful lives and residual values, which are stated in the 'Depreciation, amortisation and impairment losses' section.

Gains and losses on the disposal of property, plant and equipment are determined as the difference between the selling price, if any, less selling costs and the carrying amount at the date of disposal less any costs of disposal.

## **Impairment losses on fixed assets**

The carrying amount of fixed assets which are not measured at fair value is assessed annually for indications of impairment over and above what is reflected in depreciation and amortisation.

## 8. Accounting policies - continued -

If the company's realised return on an asset or a group of assets is lower than expected, this is considered an indication of impairment.

If there are indications of impairment, an impairment test is conducted of individual assets or groups of assets.

The assets or groups of assets are impaired to the lower of recoverable amount and carrying amount.

The higher of net selling price and value in use is used as the recoverable amount. The value in use is determined as the present value of expected net cash flows from the use of the asset or group of assets as well as expected net cash flows from the sale of the asset or group of assets after the expiry of their useful lives.

Impairment losses are reversed when the reasons for the impairment no longer exist.

### Inventories

Inventories are measured at cost calculated according to the FIFO-method. Inventories are written down to the lower of cost and net realisable value.

The cost of raw materials and consumables as well as goods for resale is determined as purchase prices plus expenses resulting directly from the purchase.

The cost of manufactured finished goods and work in progress is determined as the value of direct material and labour costs. Interest on loans arranged to finance production is not included in the cost.

The net realisable value of inventories is determined as the selling price less costs of completion and costs necessary to make the sale and is determined taking into account marketability, obsolescence and the expected development in the selling price.

### Receivables

Receivables are measured at amortised cost, which usually corresponds to the nominal value, less write-downs for bad debts.

Write-downs for bad debts are determined based on an individual assessment of each receivable if there is no objective evidence of individual impairment of a receivable.

Deposits recognised under assets comprise deposits paid to the lessor under leases entered into by the company.

### Prepayments

Prepayments recognised under assets comprise costs incurred in respect of subsequent financial years.

### Cash

Cash includes deposits in bank accounts as well as operating cash.

### Equity

An amount equivalent to internally generated development costs in the balance sheet is recognised in equity under reserve for development costs. The reserve is measured less deferred tax and reduced by amortisation and impairment losses on the asset. If impairment losses on development costs are subsequently reversed, the reserve will be restored with a corresponding amount. The reserve is dissolved when the development costs are no longer recognized in the balance sheet, and the remaining amount will be transferred to retained earnings.

### Provisions

Other provisions comprise expected expenses incidental to warranty commitments, restructuring etc. and are recognised when the company has a legal or constructive obligation at the balance sheet date and it is probable that such obligation will draw on the financial resources of the company. Provisions are measured at net realisable value or fair value if the provision is expected to be settled over the longer term.

Warranty commitments comprise the obligation to repair defective work within the warranty period of 1-5 years. Warranty commitments are measured at net realisable value and recognised based on previous years' experience with warranty work.

### Current and deferred tax

Current tax payable and receivable is recognised in the balance sheet as tax computed on the basis of the taxable income for the year, adjusted for tax paid on account.

Joint taxation contributions payable and receivable are recognised as income tax under receivables or payables in the balance sheet.

Deferred tax liabilities and tax assets are recognised on the basis of all temporary differences between the carrying amounts and tax bases of assets and liabilities. However, deferred tax is not recognised on temporary differences relating to goodwill which is non-amortisable for tax purposes and other items where temporary differences, except for acquisitions, have arisen at the date of acquisition without affecting the net profit or loss for the year or the taxable income. In cases where the tax value can be determined according to different taxation rules, deferred tax is measured on the basis of management's intended use of the asset or settlement of the liability.

Deferred tax assets are recognised, following an assessment, at the expected realisable value through offsetting against deferred tax liabilities or elimination in tax on future earnings.

Deferred tax is measured on the basis of the tax rules and at the tax rates which, according to the legislation in force at the balance sheet date, will be applicable when the deferred tax is expected to crystallise as current tax.

### Payables

Long-term payables are measured at cost at the time of contracting such liabilities (raising of the loan). The payables are subsequently measured at amortised cost where capital losses and loan expenses are recognised in the income statement as a financial expense over the term of the payable on the basis of the calculated effective interest rate in force at the time of contracting the liability.

Short-term financial payables are measured at amortised cost, normally corresponding to the nominal value of such payables. Other short-term payables are measured at net realisable value.

### Prepayments received from customers

Prepayments received from customers comprise amounts received from customers prior to the time and date of delivery of the agreed product or completion of the agreed service.

**8. Accounting policies** - continued -

**Deferred income**

Deferred income under liabilities comprises payments received in respect of income in subsequent financial years.
