Statement by the Executive Board and Board of Directors on the annual report

We have on this day presented the annual report for the financial year 01.01.25 - 31.12.25 for The Footprint Firm Capital ApS.

The annual report is presented in accordance with the Danish Financial Statements Act.

The financial statements have not been audited, and we declare that the relevant conditions have been met.

In our opinion, the financial statements give a true and fair view of the company's assets, liabilities and financial position as at 31.12.25 and of the results of the company's activities for the financial year 01.01.25 - 31.12.25.

The annual report is submitted for adoption by the general meeting.

To the management of The Footprint Firm Capital ApS

Based on the company's accounting material and other information provided by management, we have compiled the financial statements of The Footprint Firm Capital ApS for the financial year 01.01.25 - 31.12.25.

The financial statements comprise income statement, balance sheet, statement of changes in equity and notes to the financial statements, including material accounting policy information.

We performed this compilation engagement in accordance with ISRS 4410, Engagements to Compile Financial Statements.

We have applied our professional expertise to assist management with the preparation and presentation of the financial statements in accordance with the Danish Financial Statements Act. We have complied with relevant provisions of the Danish Act on Approved Auditors and Audit Firms and the code of ethics of International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code), including principles of integrity, professional competence and due care.

The financial statements and the accuracy and completeness of the information used to compile them are management's responsibility.

Since a compilation engagement is not an assurance engagement, we are not required to verify the accuracy or completeness of the information provided by management for the compilation of the financial statements. Accordingly, we do not express an audit opinion or a review conclusion on whether the financial statements are prepared in accordance with the Danish Financial Statements Act.

For the valuation of the portfolio companies in The Footprint Firm Capital the IPEV principles (International Private Equity and Venture Capital Valuation Guidelines) have been utilized. Following the guidelines, the following method have been used on the portfolio:

For the first 12 month of an investment no increase in valuation is made, i.e. the companies are valued cost.

After 12 months, the portfolio companies - where a meaningful capital raise have been conducted with participation of external investor – are valued at the value of the capital raise. Four companies in the portfolio have been written up using this method.

After 12 months portfolio companies are evaluated and written down if considered appropriate. Two companies in the portfolio have been written down to zero using this method.

6. Accounting policies

GENERAL

The annual report is presented in accordance with the provisions of the Danish Financial Statements Act (*Årsregnskabsloven*) for enterprises in reporting class B with application of provisions for a higher reporting class.

The accounting policies have been applied consistently with previous years.

Basis of recognition and measurement

Income is recognised in the income statement as earned, including value adjustments of financial assets and liabilities. All expenses, including depreciation, amortisation, impairment losses and write-downs, are also recognised in the income statement.

Assets are recognised in the balance sheet when it is probable that future economic benefits will flow to the company, and the value of such assets can be measured reliably. Liabilities are recognised in the balance sheet when it is probable that future economic benefits will flow from the company, and the value of such liabilities can be measured reliably. On initial recognition, assets and liabilities are measured at cost. Subsequently, assets and liabilities are measured as described for each item below.

On recognition and measurement, account is taken of foreseeable losses and risks arising before the date at which the annual report is presented and proving or disproving matters arising on or before the balance sheet date.

INCOME STATEMENT

Gross loss

Gross loss comprises revenue, other operating income and cost of sales and other external expenses.

Revenue

Income from the sale of services is recognised in the income statement as delivery takes place (delivery method). Revenue is measured at the selling value of the agreed consideration exclusive of VAT and other taxes collected on behalf of third parties and less discounts.

6. Accounting policies - continued -**Other operating income**

Other operating income comprises income of a secondary nature in relation to the enterprise's activities, including rental income, negative goodwill and gains on the sale of intangible assets and property, plant and equipment.

Cost of sales

Cost of sales comprises cost of sales for the year measured at cost plus any changes in inventories, including write-downs to the extent that these do not exceed normal write-downs.

Other external expenses

Other external expenses comprise costs relating to distribution, sales and advertising and administration, premises and bad debts to the extent that these do not exceed normal write-downs.

Income from equity investments in group enterprises and associates as well as participating interests

Dividends from equity investments measured at cost are recognised as income in the financial year in which the dividend is declared.

Income from equity investments in equity investments in subsidiaries and associates as well as participating interests also comprises gains and losses on the sale of equity investments.

Other net financials

Interest income and interest expenses etc. are recognised in other net financials.

Tax on profit/loss for the year

The current and deferred tax for the year is recognised in the income statement as tax on the profit/loss for the year with the portion attributable to the profit/loss for the year, and directly in equity with the portion attributable to amounts recognised directly in equity.

The company is jointly taxed with Danish consolidated enterprises.

In connection with the settlement of joint taxation contributions, the current Danish income tax is allocated between the jointly taxed enterprises in proportion to their taxable incomes.

6. Accounting policies - continued -

This means that enterprises with a tax loss receive joint taxation contributions from enterprises which have been able to use this loss to reduce their own taxable profit.

BALANCE SHEET

Equity investments in group enterprises and associates

Equity investments in group enterprises

Equity investments in subsidiaries are measured in the balance sheet at cost less any impairment losses. Transaction costs directly attributable to the acquisition are recognised in the cost of equity investments.

Equity investments in associates

Equity investments in associates are measured in the balance sheet at cost less any impairment losses. Transaction costs directly attributable to the acquisition are recognised in the cost of equity investments.

Gains or losses on disposal of equity investments are determined as the difference between the disposal consideration and the carrying amount of net assets at the time of sale, including non-amortised goodwill, as well as the expected costs of divestment or discontinuation. Gains and losses are recognised in the income statement under income from equity investments.

Impairment losses on fixed assets

The carrying amount of fixed assets which are not measured at fair value is assessed annually for indications of impairment over and above what is reflected in depreciation and amortisation.

If the company's realised return on an asset or a group of assets is lower than expected, this is considered an indication of impairment.

If there are indications of impairment, an impairment test is conducted of individual assets or groups of assets.

If dividends are distributed on equity investments in subsidiaries and associates exceeding the year earnings from the enterprise in question, this is considered an indication of impairment.

6. Accounting policies - continued -

The assets or groups of assets are impaired to the lower of recoverable amount and carrying amount.

The higher of net selling price and value in use is used as the recoverable amount. The value in use is determined as the present value of expected net cash flows from the use of the asset or group of assets as well as expected net cash flows from the sale of the asset or group of assets after the expiry of their useful lives.

Impairment losses are reversed when the reasons for the impairment no longer exist.

Receivables

Receivables are measured at amortised cost, which usually corresponds to the nominal value, less write-downs for bad debts.

Write-downs for bad debts are determined based on an individual assessment of each receivable if there is no objective evidence of individual impairment of a receivable.

Other investments

Other equity investments are measured at fair value in the balance sheet. For equity investments that are traded in an active market, fair value is equivalent to the market value at the balance sheet date. Other equity investments for which fair value cannot be determined reliably are measured at cost.

Cash

Cash includes deposits in bank account.

Equity

Grants received from the parent are recognised directly in equity under retained earnings, as the grants are treated as capital contributions.

Current and deferred tax

Current tax payable and receivable is recognised in the balance sheet as tax computed on the basis of the taxable income for the year, adjusted for tax paid on account.

6. Accounting policies - continued -

Joint taxation contributions payable and receivable are recognised as income tax under receivables or payables in the balance sheet.

Deferred tax liabilities and tax assets are recognised on the basis of all temporary differences between the carrying amounts and tax bases of assets and liabilities. However, deferred tax is not recognised on temporary differences relating to goodwill which is non-amortisable for tax purposes and other items where temporary differences, except for acquisitions, have arisen at the date of acquisition without affecting the net profit or loss for the year or the taxable income. In cases where the tax value can be determined according to different taxation rules, deferred tax is measured on the basis of management's intended use of the asset or settlement of the liability.

Deferred tax assets are recognised, following an assessment, at the expected realisable value through offsetting against deferred tax liabilities or elimination in tax on future earnings.

Deferred tax is measured on the basis of the tax rules and at the tax rates which, according to the legislation in force at the balance sheet date, will be applicable when the deferred tax is expected to crystallise as current tax.

Payables

Short-term financial payables are measured at amortised cost, normally corresponding to the nominal value of such payables. Other short-term payables are measured at net realisable value.
