ÅRSREGNSKAPET FOR REGNSKAPSÅRET 2022 - GENERELL INFORMASJON

Enheten

Organisasjonsnummer:	928 613 941
Organisasjonsform:	Allmennaksjeselskap
Foretaksnavn:	SCANA ASA
Forretningsadresse:	Wernersholmvegen 49 5232 PARADIS

Regnskapsår

Årsregnskapets periode:	01.01.2022 - 31.12.2022

Konsern

Morselskap i konsern:	Ja
Konsernregnskap lagt ved:	Ja

Regnskapsregler

Regler for små foretak benyttet:	Nei
Benyttet ved utarbeidelsen av årsregnskapet til selskapet:	Regnskapslovens alminnelige regler
Benyttet ved utarbeidelsen av årsregnskapet til konsernet:	IFRS

Årsregnskapet fastsatt av kompetent organ

Bekreftet av representant for selskapet:	Oddbjørn Haukøy
Dato for fastsettelse av årsregnskapet:	08.06.2023

Grunnlag for avgivelse

År 2022: Årsregnskapet er elektronisk innlevert

År 2021: Tall er hentet fra elektronisk innlevert årsregnskap fra 2022

Det er ikke krav til at årsregnskapet m.v. som sendes til Regnskapsregisteret er undertegnet. Kontrollen på at dette er utført ligger hos revisor/enhetens øverste organ. Sikkerheten ivaretas ved at innsender har rolle/rettighet for innsending av årsregnskapet via Altinn, og ved at det bekreftes at årsregnskapet er fastsatt av kompetent organ.

Greetings from CEO

Looking back at 2022 I would say the year was characterized by high activity in all our business areas and good progress on our strategic goals.

By January 2022 Scana increased its portfolio from three to six companies over night by acquiring PSW and their three companies PSW Technology, PSW Solutions and PSW Power & Automation. A key milestone in our strategy of *"powering the ocean industries"*. By the end of January also another energy-company was added; Trans Construction – now seven companies onboard and ready to grow!

Each portfolio company has its own organization, management, and board with full responsibility for its own operation and development. Scana aims to be an active owner by guiding and assisting wherever needed in our organization exploiting our Group synergies. Scana consists of a small, efficient, and motivated team, aiming for results across the group.

Our companies are spread in three business areas: ENERGY, OFFSHORE and MARITIME. Let's dig into each business area.

Our business area OFFSHORE signed several important riser-contracts last year. Our negative result can be explained with postponement of larger projects and a challenge to fill the available capacity at our facilities. Maintaining competence and capacity to meet expected growth has been prioritized, and with the recent contract awards we are pleased with the prospects for 2023.

For PSW, the "Equinor-contract" at Mongstad is a game changer. After seven lean years in the drilling industry, PSW Technology has secured an important foundation for the activity in the coming years. The contract doubles the company's turnover and provides a welcomed long-term perspective.

Demand for ENERGY is increasing globally. Scana will continue adapting to new market situations to secure our position as a market leader in our industry. Our business area energy experienced great demand for sustainable energy solutions in Norway and the rest of Europe. Our companies have positioned itself well in the market and had several breakthroughs in 2022; mobile battery containers have recently been delivered to Germany, and the company has also demonstrated that ships at quay can get shore power produced from hydrogen! Our employees work hard to create sustainable and innovative solutions for customers and has succeeded.

Our business area MARITIME has market exposure to all the important marine industries, and we see several interesting opportunities to be pursued in the next year. Tendering activities have increased within segments such as FSRU and FPSO. In the medium term, the energy crisis seems to accelerate the offshore wind project, where we are well positioned with our mooring solutions.
Among other things, we can look back on a successful delivery of mooring equipment to the floating wind farm Hywind Tampen.

Scana CEO CORNER

// With our leading expertise, our purpose is to solve global energy challenges for both today's customers and for future generations!

Oddbjørn Haukøy

Last year's underlying financial results ended revenue of NOK 912 million and an EBITDA of NOK 71 million. In 2022 we have strengthened our capital structure following conversion of seller credit and we ended the year with strong and growing order intake that has improved earnings visibility.

We will continue the good work within all our business areas and aim to create value for all our shareholders. I am looking forward to what we will achieve together in 2023!

Best regards,

Oddbjørn Haukøy
Interim CEO of Scana ASA

Report from the board of directors

Scana ASA is the parent company of an industrial Group supporting the electrification and decarbonization of maritime and energy sectors through the business areas OFFSHORE, ENERGY and MARITIME. The company is run by seven employees from its headquarter in Bergen, with operational businesses in Norway and Sweden, supported by external resources adding competence and capacity.

In 2022 the acquisition of PSW was completed in January and the new strategy of *"powering the ocean industries"* was released. Within ENERGY a strong position in the Norwegian shore power market has been exported to several Nordic countries, and customer near product development has opened a large market for mobile battery solutions for land based industry where strategically important contracts was entered into in the German and Dutch market. For OFFSHORE an improved market sentiment has led to high bidding activities while contract awards has been postponed. Maintaining capacity and competence to deliver on expected growth has been prioritized and has impacted the results in this area negatively in 2022. Significant contract awards in December and first quarter of 2023 gives a strong foundation for profitable growth in 2023. The MARITIME business area has benefited from its diversified market offering where mooring solutions for FPSO's has driven the order intake while tendering activities within LNG, aquaculture and offshore wind remain high. The valve control business has delivered weaker results within new projects while the aftermarket continues to deliver strong results.

The restrictions related to the covid-19 pandemic continued in 2022 but were eased significantly in most countries during the year and has had limited impact on Scana. However supply chain issues especially from Asian countries have caused delays and price increases on certain components delaying project progress and impacting margins to a certain extent.

Russia's invasion of Ukraine has significantly influenced market dynamics, primarily through the impact on energy prices and for a period significant volatility in steel prices. With a few exemptions the increased volatility in steel prices and subsequently hardware cost has been delt with through price increases on our deliveries while a few projects were negatively impacted. At the outbreak, Scana did not have any employees in Ukraine or Russia and these countries accounted for a very limited part of our revenue. Scana continuously monitor and comply with all sanctions on Russia relevant to our operations.

BUSINESS AREAS

- **OFFSHORE**
- **ENERGY**
- **MARITIME**

HIGHLIGHTS

- Transformative acquisition of PSW and ATC has lifted revenue and other operating income from NOK 305 million to NOK 912 million
- Scana raised gross proceeds of NOK 452 million through private placements in January 6th and December 19th 2022
- Order intake increased from NOK 167 million to NOK 1 087 million
  - Commercial breakthrough for mobile battery systems for industrial use in Germany and Holland
  - European expansion of shore power and fast charging solutions through contracts in Sweden and Iceland
  - Mooring solutions for 2 FPSO's destined to Brazil from undisclosed repeat customer
  - Sale and recertification of deep-water riser system to Northern Ocean Operations Ltd

SUBSEQUENT EVENTS

- Game-changing contract award from Equinor of NOK 1.8 billion including options
- Scana company with Letter of intent (LOI) for FSRU mooring system to a floating LNG terminal in Germany.
- Oddbjørn Haukøy constituted as new CEO following the resignation of Styrk Bekkenes.
- New BoD for Scana consisting of chair Pål Selvik, Vidar Rabben, Ida Ianssen Lundh and Birgitte Feginn Angelil.
- Scana strengthens its management team with Baste Tveito as EVP Operations and Espen Thomassen as CCO.
- Scana company awarded a substantial contract for an offshore development project.

INCOME STATEMENT

Scana is positioned towards the electrification megatrend and to deliver cost effective solutions at a low carbon footprint to the ENERGY sector through a highly skilled workforce and from state of the art facilities at Mongstad and Ågotnes.

With strong demand for the services and products of the Group maintaining capacity to deliver on future growth has been prioritized and has also impacted the results for 2022. Furthermore geographic and product range expansion has been prioritized within the ENERGY business area where short term cost is expected to generate longer term profits in the future.

Scana reported revenue and other operating income in 2022 of NOK 912 million, up 199 % from NOK 305 million in 2021. The growth is driven by the acquired business area ENERGY with NOK 355 million, and OFFSHORE increasing from NOK 74 million to 367 million where NOK 317 million relates to acquired companies. MARITIME had a decrease in revenue from NOK 230 million to NOK 201 million. While delivering significant growth in 2022 revenue has been negatively impacted by postponements of project sanctioning within the OFFSHORE area specifically related to the drilling-companies.

On the back of a significant increase in revenue the operating expenses has increased from NOK 288 million to NOK 841 million resulting in an EBITDA of NOK 71 million. Depreciations have increased from NOK 8 million to NOK 90 million and is mainly driven by the acquisition of PSW.

Finance cost has increased from NOK 10 million to NOK 42 million where the increase relates to interest expense. Interest expenses increased through the financing the acquisition of PSW and from the significant increase in right of use assets mainly related to long term property leases.

The Group recognized a tax income of NOK 11 million compared to NOK 24 million in 2021 which relates to increased deferred tax asset. See further information in disclosure 11.

The Group loss was NOK 45 million compared to a profit of NOK 27 million in 2021. The earnings per share was negative NOK 0.12 compared to NOK 0.25 in 2021.

Order intake in 2022 was NOK 1 087 million compared to NOK 167 million in 2021 where all business areas contribute to the growth. OFFSHORE increased with NOK 466 million (acquired companies), ENERGY with NOK 362 million and MARITIME with 103 million. Bidding activities has remained high throughout 2022 with several larger contracts first being awarded in Q1 2023. An increased focus on electrification across industries and a recurring offshore market are the two main drivers behind the order intake. The increased order intake contributed to a record high order backlog of NOK 533 million year end 2022. The majority of the order backlog is for delivery in 2023.

BALANCE

Total assets as of 31.12.22 was NOK 1 378 million compared to NOK 223 million last year. The increase is related to the acquisition of PSW, see disclosure 3 related to business combinations. Gross interest bearing debt was NOK 152 million as of 31.12.2022 compared to NOK 38 million last year. As of 31.12.22 intangible assets was NOK 398 million of which NOK 274 million was goodwill and NOK 72 million intangible assets where the majority is related to the acquisition of PSW. Right of use assets increased to NOK 403 million compared to NOK 8 million last year which lead to an increase in lease liabilities to NOK 412 million from NOK 8 million last year.

CASHFLOW

Net cashflow from operating activities was NOK 70 million. The deviation from operating profit is mainly related to depreciation, amortizations and changes in working capital.

In 2022 net cash from investing activities was NOK 205 million where the majority is related to the net cash outflow from the acquisition of PSW and ATC.

Net financing activities was NOK 109 million. To finance the acquisition net cash proceed from issuing of new share capital contributed with NOK 176 million and bank borrowings with NOK 165 million of which NOK 125 million was used to repay short term debt and NOK 15 million in installments of long term debt. Payments of leasing liabilities was NOK 54 million and NOK 36 million has been paid in interest.

SCANA ASA ACCOUNTS

The parent company Scana ASA had a loss of NOK 15 million in 2022 compared to a profit of NOK 56 million in 2021. The major deviations relate to income from subsidiaries and tax cost.

Total assets as of 31.12.22 was NOK 1 096 million, compared to NOK 433 million last year. This is mainly derived from the acquisition of PSW.

Equity amounted to NOK 681 million at the end of 2022, compared to NOK 260 million last year. The increase in equity is driven by the capital increases in January and December with reference to disclosure 9 in the Scana ASA accounts.

Scana ASA had no research and development activities in 2022. The R&D activities of the Group are presented in the annual reports of the respective operational portfolio companies.

The loss of NOK 15 million in 2022 was allocated to other equity.

BUSINESS AREAS

OFFSHORE
OFFSHORE consist of the subsidiaries PSW Technology and PSW Solutions located at Mongstad, Norway and Subseatec located in Kristinehamn, Sweden. The business area provide products, services and life-time extensions to critical equipment within several segments of the offshore industries.

The business area delivered NOK 367 million in revenue in 2022 compared to NOK 74 million in 2021 where the growth is related to the acquisition of PSW. Throughout 2022 there has been a strong market sentiment due to increased energy prices but contract awards and commencements has been delayed. Maintaining capacity to deliver on expected growth has been prioritized over short term cost cuts which has impacted profitability negatively in 2022. EBITDA increased from NOK 10 million to NOK 50 million where the surface treatment business delivered strong margins. With NOK 64 million in depreciations related to long term property leases on the Mongstad facilities and depreciations on tangible and intabible assets, EBIT was negative with NOK 14 million compared to NOK 9 million last year.

With significant contract awards in Q4 and the game changing contract award from Equinor in January 2023 the outlook for the business area is strong for 2023. A strong topline growth is expected to lead to improved operating margins.

ENERGY
ENERGY consist of PSW Power & Automation and ATC (Trans Construction) located at Ågotnes and Gardermoen respectively. The business area provides complete solutions within electrification and renewable energy to offshore, marine and shore-based activities.

The business area was new for Scana in 2022 and delivered NOK 355 million in revenue with the majority of the revenue being related to electrification of land based and ocean industries. EBITDA for 2022 was NOK 28 million where margins were negatively impacted by challenges in a few projects and challenges within supply chain. With NOK 18 million in depreciations related to facilities on Ågotnes and tangible and intangible assets EBIT in 2022 became NOK 10 million.

The continuous focus on electrification is expected to drive demand within this business area. The order backlog of NOK 193 million as of 31.12.2022 and several contract awards in Q1 2023 provides a foundation for growth in 2023.

MARITIME
MARITIME consist of Seasystems and Skarpenord located at Vestby and Rjukan/Husnes respectively. The business area provides mooring solutions and valve remote control systems across the ocean industries.

The business area delivered NOK 201 million in revenue compared to NOK 230 million last year. The decline in revenue was mainly related reduced project activity while aftersales activities remained consistent to last year. EBITDA was NOK 20 million compared to NOK 29 million where the mooring business was the main contributor. The business area has an asset light business model with NOK 3 million in depreciations resulting in an EBIT of NOK 11 million compared to NOK 17 million last year.

High tendering activities resulted to in an LOI for mooring of a large FSRU-project in Germany which is expected to result in a substantial contract award in Q1 2023. The outlook for the business area is strong with LNG and offshore expected to be the short term driver and offshore wind a large potential for the medium term.

STRATEGY

Scana has a strategy of *"powering the ocean industries"* through a Group of strong service- and equipment suppliers and become a partner for our customers in reducing the climate footprint.

Scana shall create long term value for its shareholder through professional and active ownership in its portfolio companies.

CORPORATE GOVERNANCE

Scana follows Norwegian Code of Practice for Corporate Governance. The companies practices are largely in accordance with these recommendations. Reference is made to the Corporate Governance report on page 45.

RISK MANAGEMENT

The Groups main risk is the macroeconomic environment and the development of global markets. The companies have implemented a series of measures to adopt to changing market conditions. This includes but is not limited to increased market- and sales effort, supplychain optimalisation and focused product development.

Furthermore the companies are exposed to risk within project execution and availability and pricing of key input factors and components. The risk is handled through balancing contract risk between customer and suppliers.

The directors and officers of Scana ASA are covered under an Scana Group Director & Officer's Liability Insurance (D&O). The insurance covers personal legal liabilities including defence- and legal costs. The officers and directors of the parent company and all subsidiaries globally (owned more than 50 percent) are covered by the insurance.

The company is exposed to financial risk:

MARKET RISK

Market risk is the risk that fluctuations in market prices, e.g. exchange rates and interest rates, will affect future cash flows or the value of financial instruments. Market risk management aims to ensure that risk exposure stays within the defined limits, while optimising the risk-adjusted return.

Scana has a centralized finance function. Hedging of currency and interest rate exposure is done in accordance with the Group's policy and routines. Scana seeks to reduce the risk associated with currency and interest rates by using hedging instruments. This is done centrally by the finance department on the basis of the exposure reported by the operational units.

CURRENCY RISK

The Group is exposed to transactional foreign currency risk to the extent that there is a mismatch between the currencies in which sales, purchases, receivables and borrowings are denominated and the respective functional currencies of Group companies. The Group's management continuously monitors and reports on the Group's currency positions. The Group's risk management policy is to hedge material estimated foreign currency exposure in respect of forecast sales and purchases over the following 12 months at any point in time. The Group uses forward exchange contracts to hedge its currency risk, most with a maturity of less than one year from the reporting date.

INTEREST RATE RISK

The Group's interest rate risk relates to the Group's debt portfolio and is managed at Group level. The Group's objective is to secure and counteract major effects from changes in the market interest rate. Scana has no interest rate hedges on the balance sheet date.

LIQUIDITY RISK
An important goal for the Group is to secure financial flexibility to make optimal business decisions. The Group works continuously with reducing financial risk through close cooperation with the subsidiaries monitoring short- and long term cashflow prognosis. Strong focus on reducing working capital requirements in close cooperation with customers and suppliers. On larger contracts liquidity risk is managed through balanced milestone structures with our customers and suppliers.

As of December 31st 2022 the Group had a liquidity reserve of NOK 113 consisting of NOK 3 million in cash and NOK 110 million in undrawn creditfacility. The main financing agreements for the Group are with DNB and consist of termloans of NOK 150 million, workingcapital facility of NOK 110 million and a trade finance facility of NOK 60 million. As of December 31st 2022 Scana is compliant with all financial covenants.

CREDIT RISK
The Group has policies to ensure orders are not entered into with financial distressed customers. Credit assessments are considered prior to entering into contracts while accounts receivables are continuously monitored on both subsidiary and Group level.

The Group considers it largest exposure to credit risk to be book value of accounts receivables and contract asset and other receivables.

The credit risk on larger customer contracts is mainly handled through prepayments and milestone-invoicing throughout the project period. Credit insurance is considered on a case to case basis. The majority of the customers are to international solid customers or customers with a long track record. Historically, losses on accounts receivables has been low.

CORPORATE SOCIAL RESPONSIBILITY
As a listed industrial owner to companies powering the ocean industries, Scana believes strongly in growing our businesses to the point where we can give back to society. Closely connected to our prioritized SDG's, we commit to being accountable to ourselves and our stakeholders through corporate responsibility programs and initiatives.

Scana ASA is responsible for the overall guidelines applicable for the company's subsidiaries. Each subsidiary is responsible for implementing guidelines suited for the activities and the market the company operates in. Scana ASAs subsidiaries shall be governed in an economic, social and environmentally responsible manner. Corporate social responsibility shall have a core part in planning and performing the company's services. Companies shall comply with international conventions and protocols for corporate governance, ethical guidelines and security procedures.

Scana ASA's corporate social responsibility guidelines have five main priority target areas:

- Human rights
- Corruption
- Employee rights
- Social conditions
- The external environment

HUMAN RIGHTS
Scana ASA and the subsidiaries must actively ensure that the activities carried out do not violate basic human rights. Human values such as integrity, honesty, justice and respect must form the basis for how social responsibility is exercised. For 2022 we have prepared a report on the work on fundamental human rights and decent working conditions according to the Transparency Act, which is published on Scana ASAs webpage within 30 June 2023. In this report we have assessed and identified possible Human Rights issues in our supply chain, and will work closely with our stakeholders to prevent, act upon, or influence negative impacts.

Scana ASA and its subsidiaries have not had any incidents in 2022 that indicate that these values have been violated and will continue to work in 2023 to always promote the safeguarding of human rights, including assessing our supply chain.

CORRUPTION
Scana ASA and its subsidiaries must always follow the laws, guidelines and regulations that apply in each country and region where the companies and associated subsidiaries are located and operate the companies must pay taxes and fees, as well as implement measures to prevent corruption and mismanagement. Scana ASA has zero tolerance for corruption and encourages employees to report the slightest suspicion of violations.

EMPLOYEE RIGHTS
Scana ASA has a stated goal to ensure safe working conditions and to facilitate a good working environment where employees thrive and develop their skills. The working environment is considered good. Young workers are the future of the Scana companies, and we aim to play an active role in the facilitation of traineeships and internships in our companies. Scana ASA supports the employees' right to organize in trade unions and trade organizations. Procedures have been drawn up and implemented for the personal data legislation that was introduced in 2018 (GDPR).

The Group is exposed to risks related to health, safety, and security in the workplace and while travelling. In 2022 the coronavirus had consequences of increased sick leave in the Group in 2022, especially in the first part of the year. The virus had no other material consequences for our operations in 2022.

SOCIAL CONDITIONS
Scana ASA and its subsidiaries work actively to promote the objectives of the Discrimination Act. We believe in fair treatment in our recruitment, promotion, development opportunities and protection against harassment. We believe strongly in an inclusive working environment.

The companies aim to be a workplace where there is no discrimination across all types of stakeholders regardless of age, gender, religion, race, national or ethnic origin, cultural background, social affiliation, disability, sexual orientation, marital status or political opinion.

All Scana companies have ethical guidelines, and it clearly states how to secure fair employment, equal pay and equal rights. These guidelines include how we work and are described further in our Sustainability report where we have chosen Sustainable Development Goal 5: Gender equality as one of our goals.

EQUALITY
Scana ASA had 7 full-time employees at the end of 2022, 2 were women. The company works to promote equal development opportunities and to ensure that there is no discrimination of any kind. This work is described in the company's ethical guidelines and the order also applies to all Scana ASA's portfolio companies.

Scana ASA and the portfolio companies had 345 employees as of 31 December 2022, an increase from 91 employees at the end of 2021, but this is due to the acquisition of the PSW Group and ATC. 14 percent of the employees are women and 86 percent are men.

THE OVERALL GENDER BALANCE IN THE GROUP

Number of women and men, per company and in total:

	Scana HQ	SEASYSTEMS	SKARPENORD	SUBSEATEC	PSW Technology	PSW Solutions	PSW Power & Automation incl ATC	Total
Women	2	4	9	3	17	5	7	47
Men	5	25	27	8	106	43	84	298
Total	**7**	**29**	**36**	**11**	**123**	**48**	**91**	**345**

There is no involuntary part-time work at Scana. The part-time positions are few, and these are voluntary and linked to specific projects. From 2023, voluntary part-time will also be reduced due to the EU's temporary agency directive, which comes into force from 1 April 2023. Temporary employment occurs to a small extent, but when these are in use, this is especially with regard to projects. When it comes to parental leave, we see that women still take most of the flexible weeks, although men also take some here.

Number of temporary employees, part time positions and average number of parental leave per gender:

	WOMEN	MEN	Total
Temporary employees (gender difference in number or percentage)	2 %	98 %	82
Employees in part-time positions (gender difference in number or percentage)	6 %	94 %	17
Number of employees working involuntarily part-time	0	0	0
Average number of weeks of parental leave	11.5	8.5	

Salary level based at position/level, with distribution by gender:
In the operating companies there is a predominance of men, which can be attributed to historical and industrial traditions. However, women are represented in all the subsidiaries' management Groups. Scana ASA also meets the Public Limited Liability Companies Act's requirement for gender representation in that two out of four board members are women.

In our recruitment processes, we work actively to find female candidates to increase the proportion of women in the Group, in line with the Sustainable Development Goal 5, gender equality. When it comes to recruiting processes, we see more men than women applying for these technical/operational positions, while when it comes to apprentices/trainees within the same type of position, both sexes apply. For administrative positions, the pool of applicants is probably equally distributed. We actively work towards the market to find female and male candidates for our positions because we believe that the workplace achieves better results with increased equality and increased diversity.

The table below shows an overview per position level (set based on similarities and salary level) for average women's salary at a set level relative to the average salary for men. It shows an average level where women's pay in total for the Group amounts to 88 % of a man's level. The difference does not show differences such as seniority, differences in type of positions in position level, number of years and responsibility/risk linked to the different employees.

POSITION/LEVEL	WOMEN	MEN	Average salary for women relative in % of average salary for men
Executive management	10 %	90 %	-48 %
Management subsidiaries/middle managers/department managers	18 %	82 %	-13 %
Bas/Foreman/Project management	4 %	96 %	-18 %
Operators/Engineers/Technical staff	8 %	92 %	-28 %
Administrative personell	40 %	60 %	-20 %
Total	14 %	86 %	-12 %

We have routines to ensure that pay adjustment processes do not discriminate based on gender and work continuously to further develop these processes to ensure equal pay for equal work.

See Guidelines for Senior executives and other remuneration and the 2022 Report of remuneration for senior executives included in the Annual report for information regarding remuneration at executive level and per gender.

Injuries and sickness leave, per company and in total:
There was an increase in sickness absence in Scana ASA in 2022 of 2% compared to 0.3 % in 2021. This is mainly due to the corona pandemic. For the Scana ASA and subsidiaries in total, sickness absence in 2022 was 5 % (2021: 5 %). There were no fatal accidents in the companies in 2022, equal to in 2021.

	Scana HQ	Seasystems	Skarpenord	Subseatec	PSW Technology	PSW Solutions	PSW Power & Automation incl ATC	Total
Number of injuries with leave	0	0	0	0	0	0	1	1
Number of first aid injuries	0	0	0	0	2	2	1	5
Number of medical treatment injuries	0	0	1	0	0	0	3	4
Fatal accidents	0	0	0	0	0	0	0	0
Total sick leave	2 %	3 %	10 %	2 %	6 %	4 %	5 %	5 %
Short time sick leave	2 %	1 %	2 %	1 %	1 %	1 %	2 %	1 %
Long time sick leave	0 %	2 %	8 %	1 %	5 %	2 %	4 %	4 %

There is no information on specification per individual case as this would be considered a breach of GDPR guidelines.

THE EXTERNAL ENVIRONMENT

Scana ASA's portfolio companies have licenses for their operations and do not affect the external environment beyond the allocated emission permits. Through measures such as the use of renewable energy sources, recycling, waste reduction and the development of sustainable solutions for the ocean industries, the Scana companies improve the environmental sustainability of their operations as well as for their stakeholders. We assess our supply chains, and we eliminate reliance on stakeholders with a risk for unethical labor practices.

ENVIRONMENTAL RESPONSIBILITY

- We commit to reducing pollution, waste and emissions in our businesses and for our stakeholders. We focus on responsible consumption and production.
- We commit to a "zero" strategy, meaning that we base our sustainability strategy on the vision of reaching zero CO_2 emissions by 2050.
- By planning and strategic placement, we aim to support our stakeholders in consciously choosing sustainable methods for maintenance and production.
- We create product lines that enhance our CSR values, and aim for the mindset of "reduce, recycle, re-use" in all that we do.

See the Sustainability Report Included in the Annual report for additional information including the assessment related to environmental factors.

GOING CONCERN

In accordance with the Accounting Act § 3–3c, we confirm that the financial statements have been prepared under the assumption of going concern. This assumption is based on a strong order backlog and subsequent order intake in 2023 and the estimated working capital requirements for the 12 months following the balance sheet date. Reference is made to disclosure 5 on page 74.

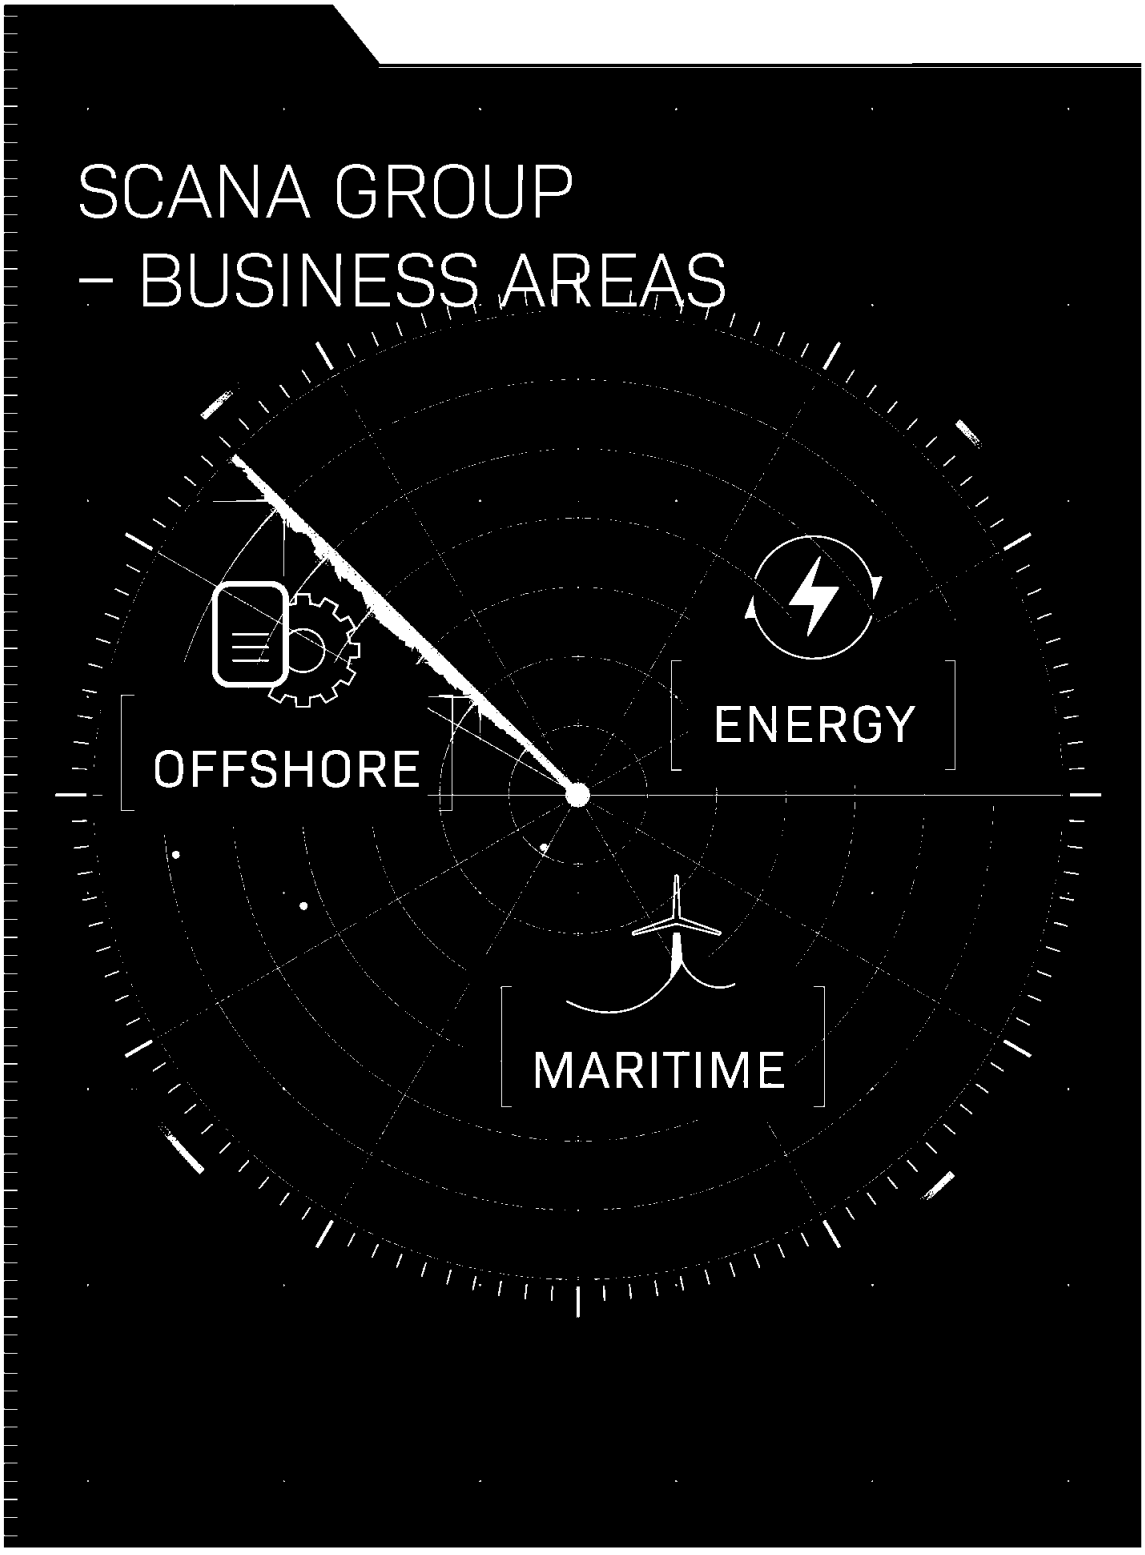
Scana



Scana and portfolio companies

Scana is a listed industrial owner company in the ocean industries creating value through active ownership in market-leading portfolio companies. Our vision is to accelerate decarbonisation of the maritime and offshore sector by being a driving force in electrification and emission reduction solutions.

Scana's portfolio companies have a solid innovation and commercialisation history based on core competence in selected niches. Scana is headquartered in Bergen and has around 350 employees. Scana's portfolio companies are divided into three business areas:

OFFSHORE

Throughout the entire lifetime of offshore assets, we provide products, services and life-time extensions to critical equipment within several segments of the offshore industries.

- PSW Technology
- PSW Solutions
- Subseatec

ENERGY

All the way from shoreline to seabed, we power the ocean industry with sustainable energy solutions – providing complete solutions within electrification and renewable energy to offshore, marine and shore-based activities.

- PSW Power & Automation
- Trans Construction – ATC

MARITIME

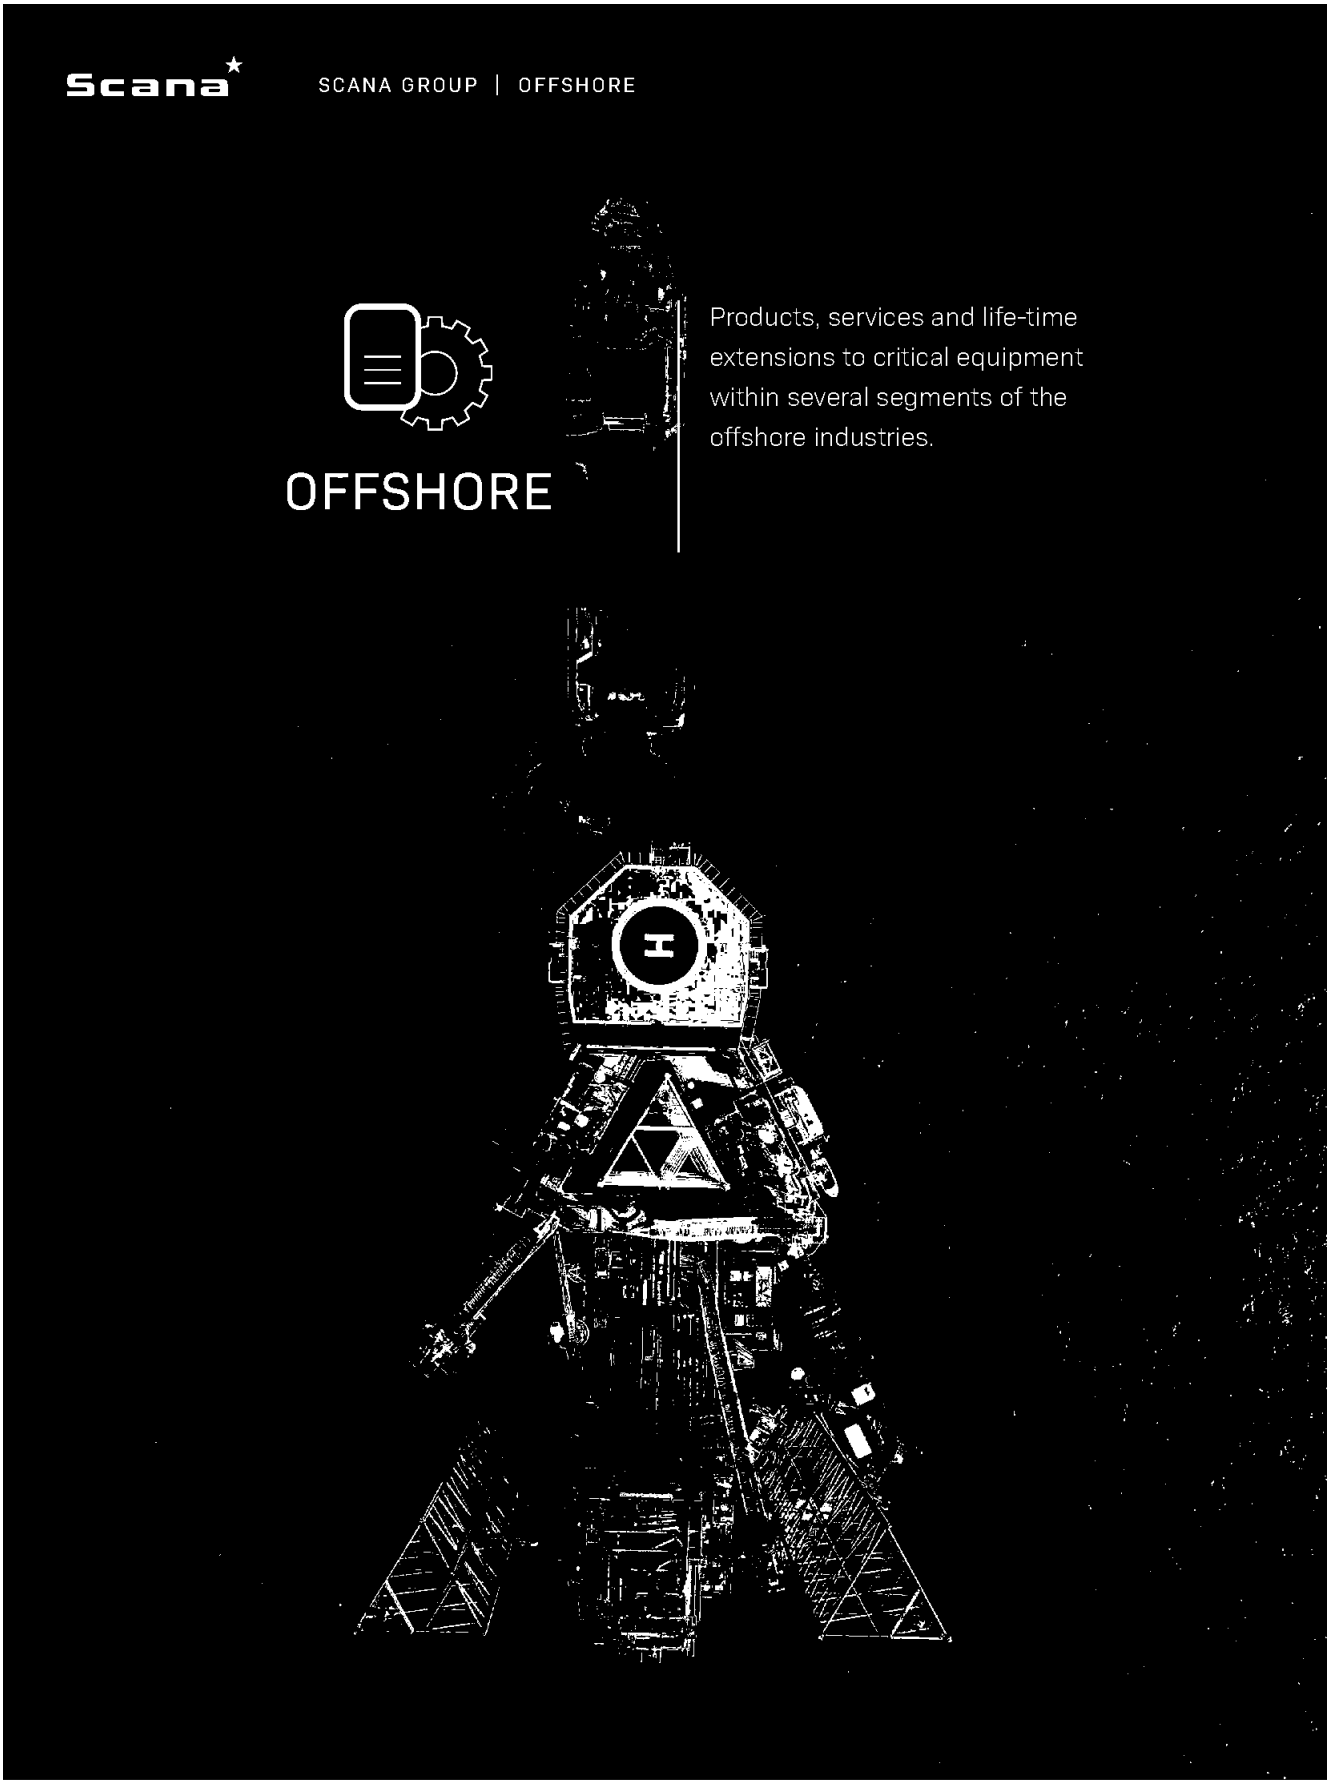
We supply sophisticated and dependable valve remote control systems and mooring solutions to vessels, rigs, and floating structures serving the shipping, oil and gas, aquaculture, and energy industries.

- Seasystems
- Skarpenord

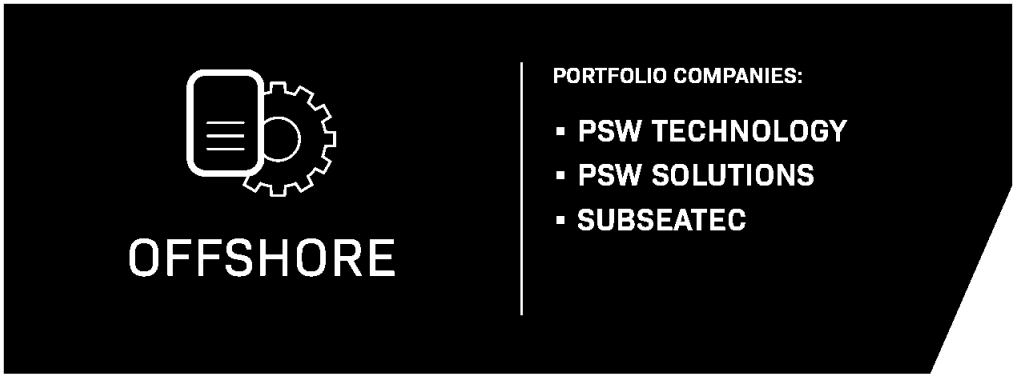
VISION AND MISSION

VISION Contributing to a smarter world of marine products and services through our Group of quality suppliers.

MISSION Through active and experienced ownership, Scana ASA shall guide and develop our Group of companies to achieve their respective targets in a profitable, sustainable and safe way.



Scana
SCANA GROUP | OFFSHORE
OFFSHORE
Products, services and life-time extensions to critical equipment within several segments of the offshore industries.



Throughout the entire lifetime of offshore assets, we provide products, services and life-time extensions to critical equipment within several segments of the offshore industries. In 2022 this business area accounted for 40 % of the turnover.

SHORT ABOUT OUR OFFSHORE COMPANIES

PSW Technology offers a wide range of services and solutions to the global drilling industry. The company has all the expertise our customers require in one place. Our facilities at Mongstad are ideally situated to provide IMR services to both the Norwegian and British sectors of the North Sea.
The company works within subsea and well control, lifecycle services and has unique yard facilities available. Our proximity to Sløvåg and PSW Offshore Wind & Yard makes us a full-service provider for your rig or vessel maintenance needs.

PSW Solutions has extensive experience from on/offshore installations and provides a unique expertise in the planning and execution of ISS (Insulation, Scaffolding and Surface treatment) services. The company also performs NDT services and control of lifting equipment both onshore and offshore.

Subseatec is one of the world's most experienced specialist companies in the world regarding for riser applications to the oil and gas industry. Subseatec handles product development, sales, and contract management. Product range consists of risers, pipe and flow lines, bodies and other subsea accessories.

STATUS

The offshore market is recovering with increased demand driven by energy security, at the same time the supply side has been reduced resulting in favorable market conditions. The offshore business area is well positioned to fill up its facilities and seize an even larger market. The key drivers are rising demand for service and products with low carbon footprint, growing maintenance lag.

Our companies within the offshore area are well-positioned for strong offshore project pipeline through unique infrastructure and carbon reducing solutions.

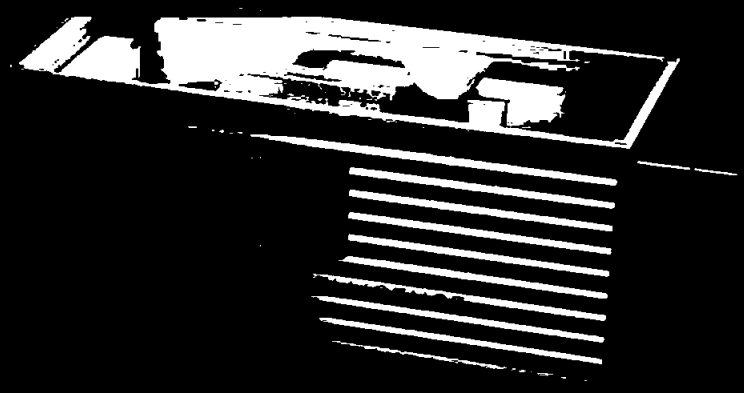
Scana

SCANA GROUP | ENERGY

ENERGY

Sustainable energy solutions – providing complete solutions within electrification and renewable energy to offshore, marine and shore-based activities.



All the way from shoreline to seabed, we power the ocean industry with sustainable energy solutions – providing complete solutions within electrification and renewable energy to offshore, marine and shore-based activities.

Our business area Energy is a leading player within electrification with shore power systems, energy storage systems and e-house modules as key offerings.
This business area accounted for 38 % of the turnover in 2022.

SHORT ABOUT OUR ENERGY-COMPANIES

PSW Power & Automation delivers complete solutions within electrification and renewable energy. The company specializes in the design and integration of electrical power systems, electrical infrastructure, energy storage systems and control systems.

Trans Construction is a leading engineering company with extensive track record and which has specialized itself on design and production of E-house modules to the maritime-, offshore and onshore based industry.

STATUS

The continuous focus on energy prices and decarbonisation attracts interest, both for current product offerings and for spinoff products where mobile battery systems were added to the product portfolio this year. The electrification of European shores will continue to drive demand for Scana's services, and there is also a strong demand for e-house modules to support offshore decarbonisation.

Our companies within the energy area offer complete solutions for electrification in fast-growing markets with powerful underlying drivers.

Scana
SCANA GROUP | MARITIME
MARITIME
Reliable and sophisticated valve control systems and mooring solutions to vessels, rigs and floating structures.
seasystems.no

We supply sophisticated and dependable valve remote control systems and mooring solutions to vessels, rigs, and floating structures serving the shipping, oil and gas, aquaculture, and energy industries.

MARITIME consists of Seasystems AS, delivering mooring solutions to floating structures across ocean industries, and Skarpenord AS, supplying valve remote control systems for the shipping and oil & gas industry. This business area accounted for 22 % of the turnover in 2022.

SHORT ABOUT OUR MARITIME COMPANIES

Seasystems has high internal competence within project management, engineering, fabrication, and installation, we offer sophisticated and reliable mooring solutions to floating structures.
Through a continuous focus on quality and functional design, we always strive to find the optimal solution for each project. Seasystems operates in several segments, such as floating wind, oil & gas and fish farming.

Skarpenord is our second company within MARITIME – a leading supplier of valve remote control systems for shipping and the oil and gas industry. More than 40 years in the business makes us an experienced supplier. The company delivers actuators, solenoid valve cabinets, hydraulic power units and computerized valve control.

STATUS

Our companies within MARITIME are leading provider of innovative mooring solutions and valve remote control systems for vessels, rigs and floating structures. Since 2015 diversifying into offshore aquaculture and wind with milestone contracts, in addition to historical maritime services. The energy crisis accelerates offshore wind projects, where we are well positioned. Continued growth in LNG (FSRU) as a catalyst for long-term energy transition.

MARITIME is a niche leader with strong track record in growing market segments.

Scana
HIGHLIGHTS 2022

Highlights for Scana 2022

2022 has been characterized by a strong operational focus. Several large projects were delivered and completed. Here is an overview of the most important events of the past year.

JANUARY

Acquisition of PSW completed. Scana increased its portfolio from three to six daughter companies by acquiring PSW and its three Bergen-based companies.

PSW Power & Automation awarded contract by Havnekraft AS The contract includes delivery of a high-voltage shore power solution. PSW Power & Automation will design, assemble, and test the complete system in their facilities at Ågotnes before it is shipped to Haugesund for installation and commissioning.

Scana expanded its Group management by hiring Oddbjørn Haukøy in the position as Chief Commercial Officer, he came from the position as CEO of PSW.

PSW Power & Automation acquires Trans Construction AS – hoping to take a larger position in the market. As part of the strategy to strengthen the position within modular based power systems, PSW Power & Automation entered into an agreement to acquire the leading engineering company Trans Construction AS.

FEBRUARY

PSW Technology entered a strategic agreement with Cameron. PSW Technology signed an exclusive licence agreement with global oil service provider Cameron, a Schlumberger company. The agreement allows PSW to carry out recertifications of risers produced by Cameron in accordance with OEM (Original Equipment Manufacturer) standards.

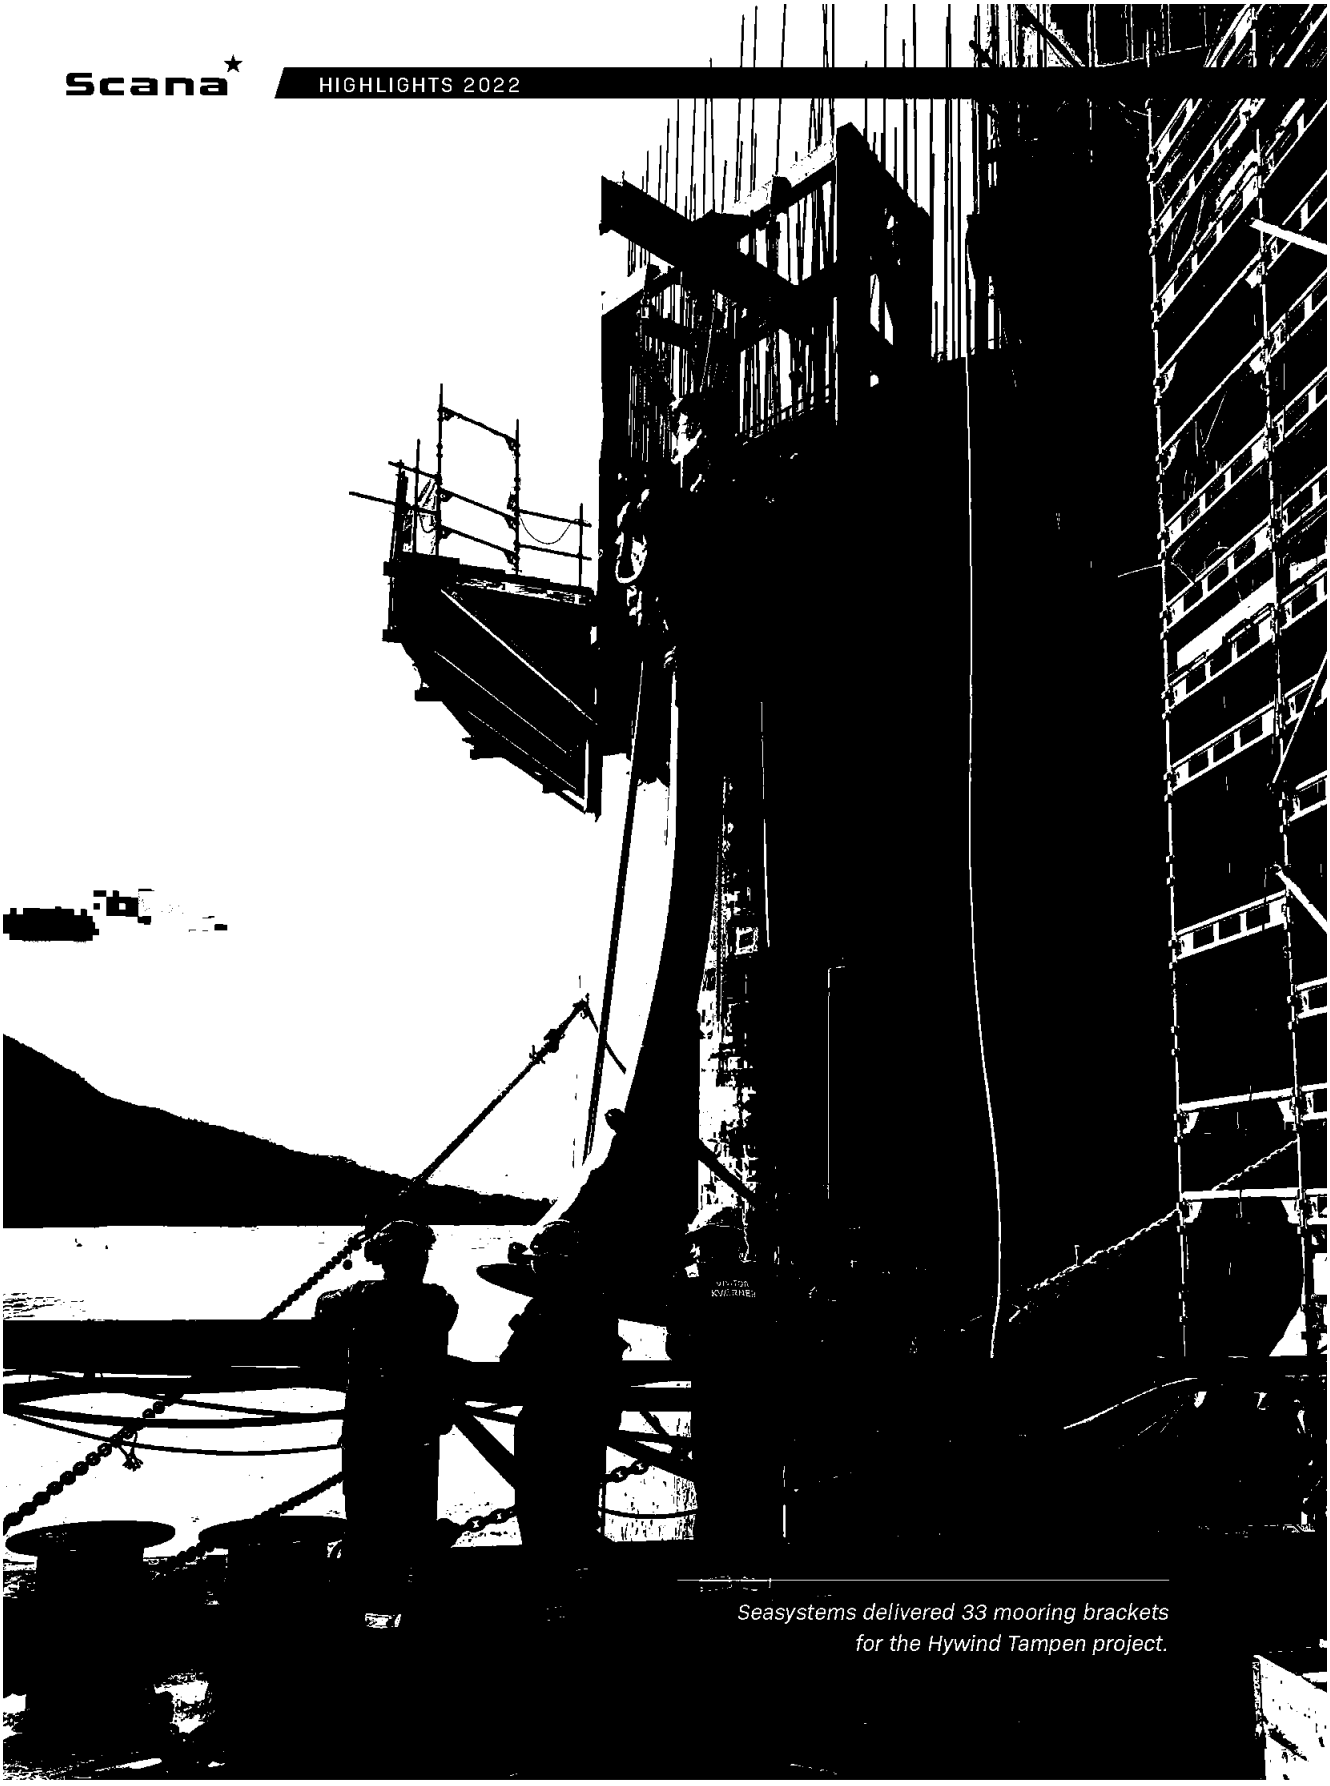
Skarpenord wins another important contract in the LNG market. Skarpenord secured the delivery of valve remote control system for 12 x LNG - driven container vessels.

MARCH

More mooring within aquaculture. Seasystems won another important contract within aquaculture, this time to the Hydra project. Hydra is a result of the government's development concessions, which facilitate the use of new technology to create growth in the fish farming industry.

Seasystems delivers anchoring system for Brazilian FPSO,signed another contract for the delivery of anchoring equipment such as chain stops, jacks, and winches.

Seasystems had its important breakthrough as a supplier of mooring to the first floating tidal energy array.



Seasystems delivered 33 mooring brackets for the Hywind Tampen project.

APRIL

PSW Power & Automation signed another sizeable contract for a shore power solution to Iceland.

PSW Power & Automation and Westgass Hydrogen entered a strategic collaboration aimed towards deployment of container-based hydrogen fuel cell systems for power applications. The story continues in September 2022.

MAY

Seasystems has signed a contract for the delivery of anchoring system to an FPSO project in Brazil.

JUNE

PSW Technology has signed an important agreement with an unnamed rig company for the delivery of marine risers to operations in West Africa.

PSW Power & Automation signed a contract with Västtrafik for the delivery of fast charging system to electric ferries in Strömstad in Sweden.

PSW Technology signed a one-year extension of its frame agreement with Odfjell Drilling for maintenance and recertification of marine riser and subsea equipment for alle the drilling units of the company.

JULY

PSW Power & Automation signed a contract with Zeppelin Rental GmbH in Germany for the delivery of multiple mobile battery systems. The battery solution can replace or optimize the operation of traditional diesel generators and will be a significant contributor to the environmental decarbonization.

Actuators manufactured at Skarpenord, Rjukan.

PSW Power & Automation signed a contract for the design, assembly, and testing of a topside E-House module for an international subsea company.

PSW Power & Automation signed another contract for the delivery of mobile battery systems, with Energyst Rental Solutions.

AUGUST

More riser joints in the market. Subseatec signed a contract with an international energy company for the delivery of riser joints.

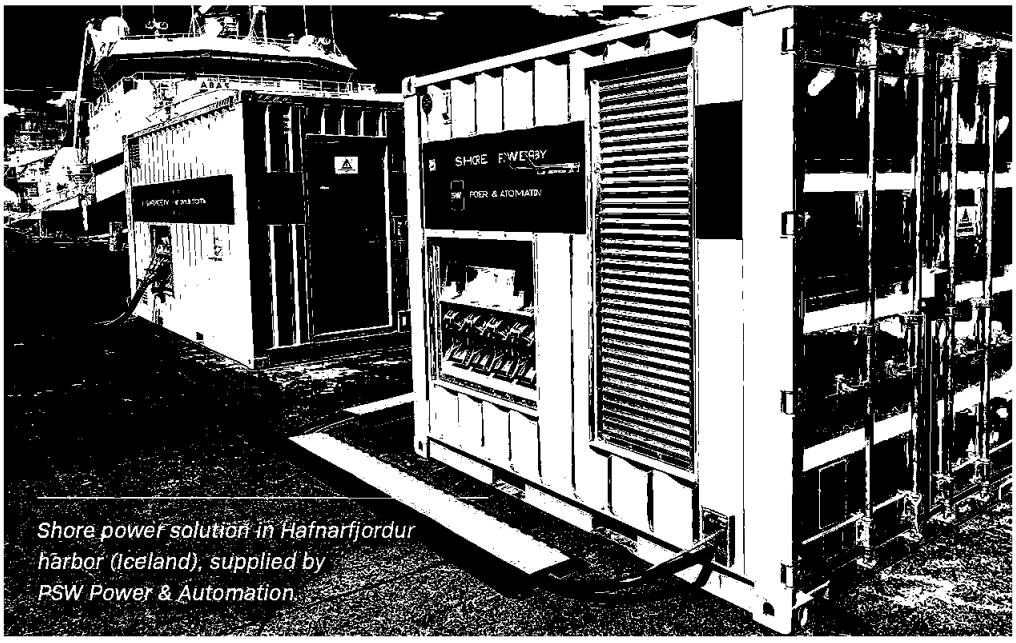
SEPTEMBER

PSW Technology signed an important agreement with Odfjell Drilling for the delivery of marine risers to operations in West Africa.

PSW Power & Automation demonstrated a hydrogen-based shore power solution. A Norwegian consortium comprised by four local players, PSW Power & Automation, Westgass Hydrogen, CCB and H2 Production, was established to provide a high-capacity hydrogen-based shore power solution to the maritime sector.

The groundbreaking system, which has been designed by PSW and piloted last autumn at CCB's shipyard in Ågotnes, was demonstrated to the maritime industry at on 19 September 2022.

Shore power fuelled by clean hydrogen – another milestone!



Shore power solution in Hafnarfjordur harbor (Iceland), supplied by PSW Power & Automation.

OCTOBER

PSW Power & Automation has entered into an agreement with Kongsberg Maritime for the design, production, assembly, and testing of a series of energy storage deck-house modules.

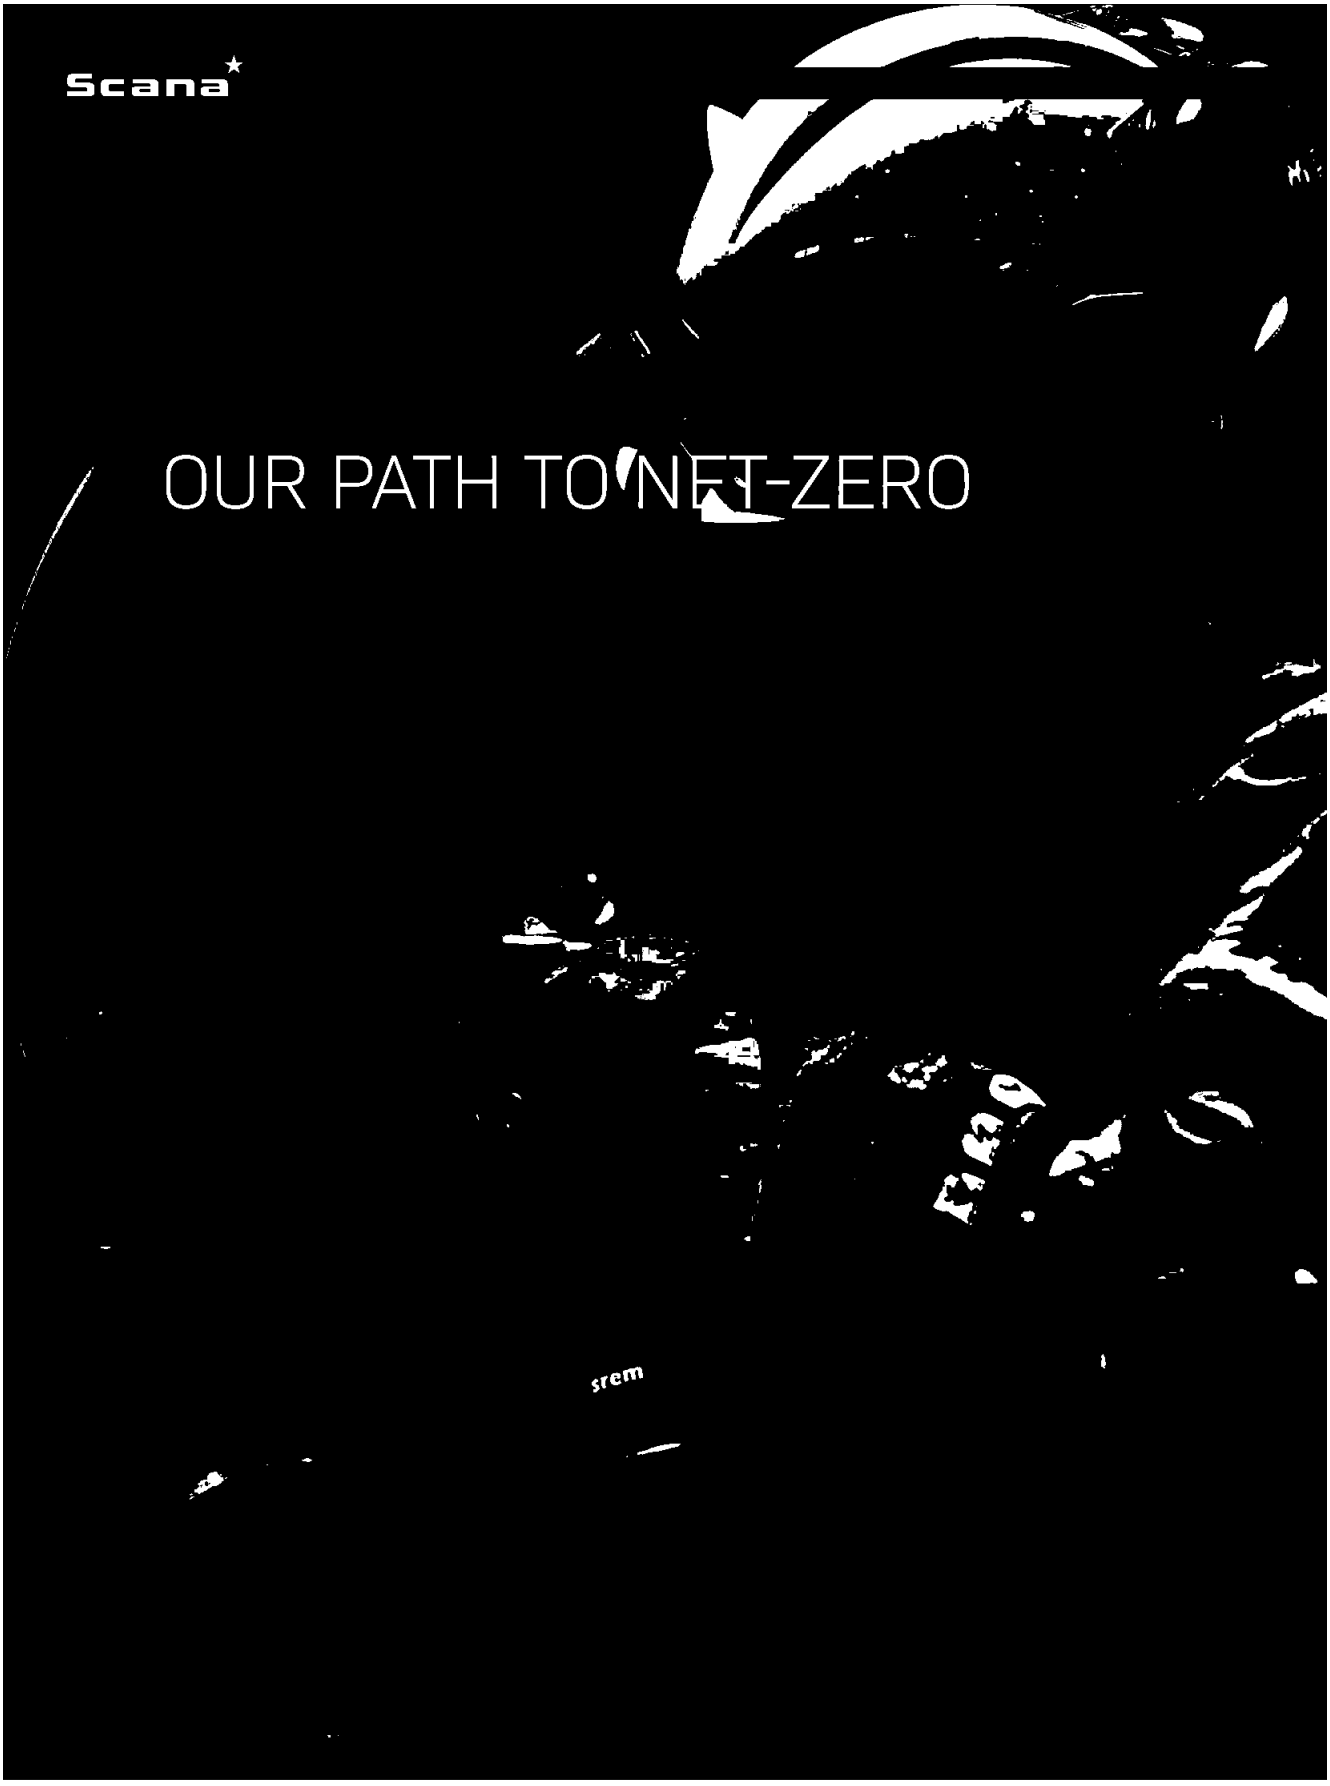
NOVEMBER

Trans Construction (ATC) has secured a contract with Pon Power AS for delivery of 3 x modules for generator sets. The delivery includes design and fabrication, as well as installation of client supplied equipment.

DECEMBER

Awarded contract for deep-water riser system. PSW Technology has signed an important agreement with Northern Ocean Operations Ltd. ("Northern Ocean") for a deep-water riser system.

Shore power fuelled by clean hydrogen. Demonstrated at Ågotnes, 19 September 2022.



Scana
OUR PATH TO NET-ZERO

Scana's sustainability journey – our path to net-zero

In Scana we work together for a sustainable future by accelerating the decarbonization of the MARITIME and OFFSHORE sector by being a driving force in Sustainable electrification- and emission reducing solutions.

Scana's policy for sustainability is part of our management system. The system describes ambitions, direction, and more detailed requirements on the topics of ESG. Our formal ESG journey started in 2021, and continued in 2022 by appointing a Sustainability & HSEQ Manager. Implementation initiatives will continue in 2023 and onward.

In 2022, Scana and portfolio companies came together to establish the "Scana QHSE group". This group consist of key QHSE resources from Scana and all the portfolio companies. Together we take meaningful steps towards sustainable business conduct, through initiatives implemented within the respective companies. Resources and responsibility are appointed in the portfolio companies and on group level.

Our Sustainability strategy is based on the vision of "reaching zero". The goal is to cut greenhouse gas emissions (GHG) to as close to zero as possible. We aim to achieve a "net-zero" emission target within 2050 for Scana and our portfolio companies, with a 50 % reduction of scope 1 and 2 emissions within 2030.

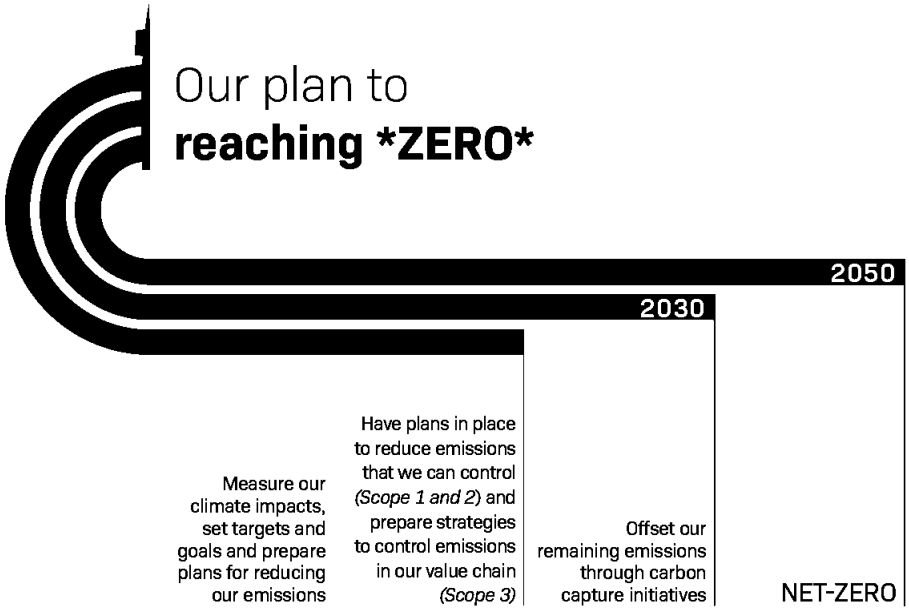
STEP 1: Knowledge is key: We start by understanding our base-line overview, measuring our greenhouse gas emissions Scope 1 and 2 (CO_2). Some scope 3 emissions are added.

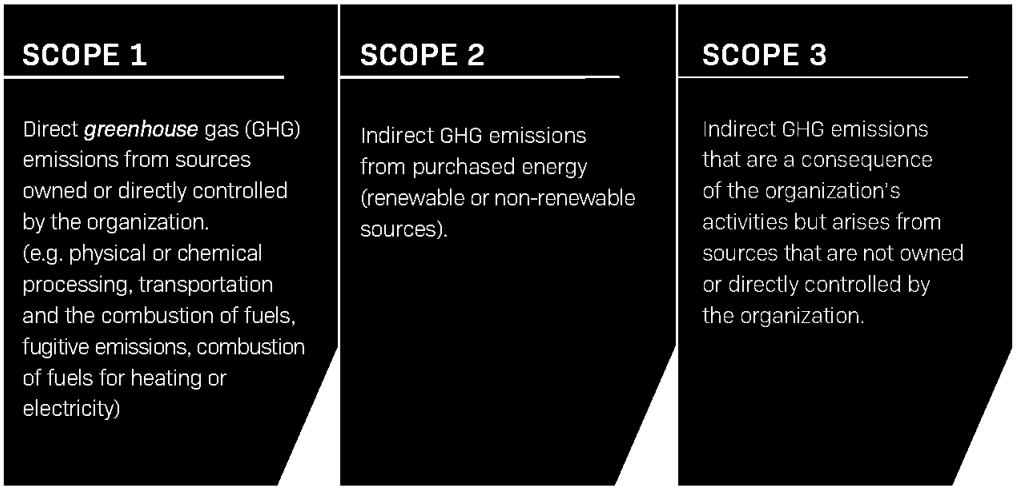
STEP 2: We establish effective emission reduction initiatives, through targeted actions such as green energy, solar panels, electric vehicles etc. Further initiatives are implemented: waste management, "reduce, reuse, recycle" initiatives and digitalization projects are some of the examples that are implemented in our portfolio companies.

STEP 3: Any emissions that remain, we aim to offset by co-operation with emission compensation initiatives ("carbon offsets") on land and in the oceans by replenishing natural resources or supporting causes that can help neutralize the company's impact.

Our vision:
reaching *ZERO*

- ZERO injuries, and workrelated illness
- ZERO incidents of discrimination
- ZERO security incidents
- Net-ZERO emissions*





[SOURCE: GHG Protocol Corporate Accounting and Reporting Standard, IWA 42:2022(E)]

OUR COMMITMENT TO THE UN SDG'S

In 2021 we defined four of the UN's Sustainable Development goals (SDGs) as our primary goals, and together with our portfolio companies, we have implemented processes for working towards these goals. Scana has implemented ethical guidelines that specify how our companies should behave and comply, also including requirements for ethical business conduct.
Our updated ethical guidelines can be found at: ***www.scana.no***

We started gathering information on the performance towards the SDGs in 2021 and 2023, and in 2023 we will continue to work towards KPIs, and strategic goals related to the SDGs.

OUR PRIORITIZED SDGS ARE:

5 – Gender equality
8 – Decent work and economic growth
12 – Responsible consumption and production
13 – Climate action

In addition to our primary goals, several of our companies have identified other key SDGs to contribute towards sustainable business conduct. In 2022 we have performed a materiality assessment, aiming to identify the most critical Environmental, Social and Governance issues for the Scana companies and our stakeholders. We see that these issues evolve around gender equality, safe working environments, responsible production and taking urgent climate actions.

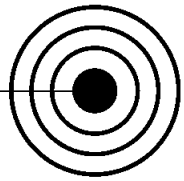
STRATEGIES IN PLACE
TO REDUCE EMISSIONS RELATED TO INTERNAL TRANSPORT & LOGISTICS

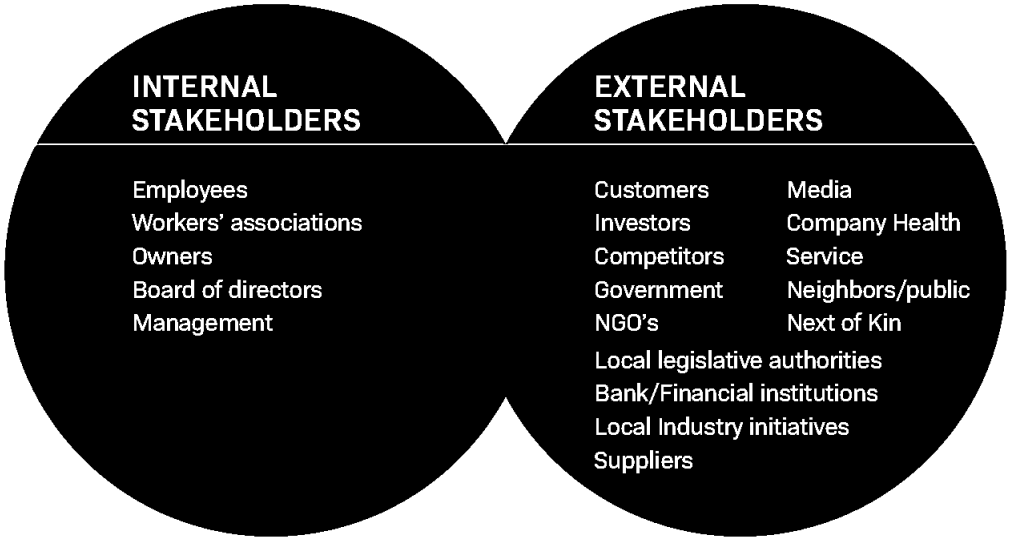


STAKEHOLDERS AND MATERIALITY

In Scana, our aim is to understand the importance of specific ESG- and sustainability topics. We do this by performing a "Materiality Assessment" .

"Materiality Assessment" is a tool to help identify and prioritize which ESG issues are the most urgent. It helps us to determine which environmental, social, and governance (ESG) issues matter most, not only to our internal-, but also to our external stakeholders. With this knowledge, we determine what strategic actions must be put in place to meet the expectations of our stakeholders.

Through a process of involving all Scana companies, we have gathered input identifying our most relevant stakeholders and their material issues. Through this process, we've asked ourselves "what is the most important issue of interest for this interested party, and how does it compare to other issues?"



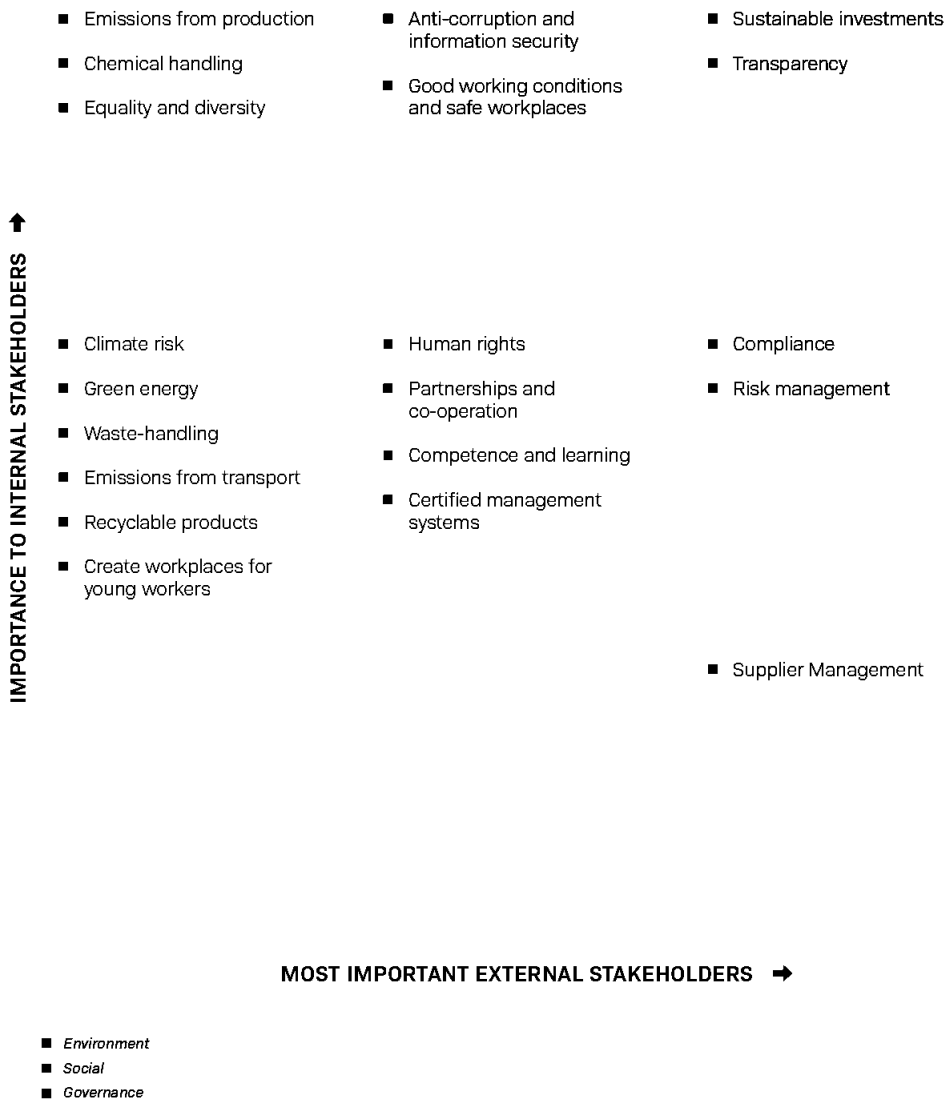
The information in this report covers Scana and all its portfolio companies, unless otherwise specified.

Based on the materiality analysis, we prioritized the ESG issues and ranked them in order of importance. Points of action have been defined, outlining our ESG strategy.

In the upcoming year, a more detailed action plan will be developed outlining the specific actions we will take to manage and address our ESG risks and opportunities, and to achieve our ESG goals and targets. Based on the prioritized ESG issues, we will set specific, measurable, and time-bound goals and targets that we aim to achieve: our KPI's.

We will monitor progress regularly to ensure that we are on track to meet our ESG goals and targets.

MATERIALITY MATRIX

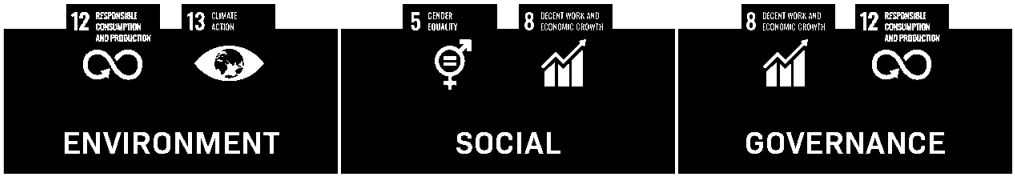


MATERIAL TOPICS, KEY STRATEGIES AND POINTS OF ACTION

The identified ESG issues in the materiality analysis are seen in close relation with our prioritized SDG's. The material topics of addressing and aiming to prevent climate risk, reducing emissions from our own energy consumption and transport, as well as chemical handling and waste management are important for working towards SDG 13; climate action and 12; responsible consumption and production.

We aim for zero injuries and illnesses and will increase our focus to work actively towards increased equality and diversity in cooperation with our stakeholders, providing safe, inclusive working environments for all workers, with special focus on young workers and female workers. This corresponds with the SDGs 5; gender equality and 8; decent work and economic growth.

On the topic of governance, we commit to taking an active role in preventing corruption and focus on compliance in all aspects of our business. Risk management is an important tool to prevent hazards and unwanted incidents with respect to our business, corresponding with the SDGs 8; decent work and economic growth and 12; responsible consumption and production.



CLIMATE RISK

We seek to invest in companies that support the transition to a low-carbon economy, and those that are resilient to climate change. Climate risks will be a part of the risk assessment in all portfolio companies, and we will actively work to reduce the negative environmental aspects of the portfolio companies while increasing the positive environmental aspects.

EMISSIONS

We aim to reduce our carbon footprint by actively taking steps toward reducing emissions resulting from the production of our services and products.

CHEMICAL HANDLING

We respect the environmental impact of the chemicals that we use and will work actively to substitute chemicals that may cause harm to the environment.

WORKING ENVIRONMENT

Providing a safe working environment for our workers has been a part of our key strategies. A "zero-mindset" for work related incidents and illness is implemented in Scana and the portfolio companies. We will provide training and perform risk assessments for all activities in our companies.

EQUALITY AND DIVERSITY

We actively promote and practice diversity in the workplace through inclusion of all, irrespective of age, sex, disability, race, ethnicity, origin, religion or economic or other status. We actively participate in the education of young workers, by employing trainees, apprentices and by taking an active part in presenting our portfolio companies to schools and universities. Our goal is equal pay for work of equal value.

CO-OPERATION

We aim for active cooperation between the companies in Scana and their stakeholders, including customers, suppliers, and partners is a strategic operational goal.

Clear communication and working together to reach mutual goals are focus areas that we will work towards in the years to come.

TRANSPARENCY

We commit to taking an active role in preventing corruption and the abuse of power for private gain. We have routines in place ensuring our business conduct and compliance. All Scana companies are ISO 9001 certified and three of our portfolio companies are ISO 14001 and ISO 45001 certified. We aim for compliance with these standards for the rest of the portfolio companies.

COMPLIANCE AND RISK MANAGEMENT

Risk management is an integral part of our business, including HSE, Financial, Environmental and Human Rights risk. We commit to pro-actively seek mitigating actions, and to keep a continuous overview of the regulatory and other requirements for Scana and the portfolio companies. of our services and products.

ANTI-CORRUPTION

We actively communicate our zero tolerance for bribery and corruption in our code of conduct. We will implement training initiatives for our workers, to increase awareness. Our employees and business partners are expected to follow these rules of conduct and in the years to come we will work towards supplier code of conduct and active supplier follow-up and development.

Our contribution to the UN SDG's

ACHIEVE GENDER EQUALITY AND EMPOWER ALL WOMEN AND GIRLS THROUGH EDUCATION AND PARTICIPATION – BRINGING GOOD HEALTH AND WELL-BEING.

While the offshore-, energy-, and maritime industry still are represented by a predominately male workforce, more women are finding their way into maritime professions. We actively contribute and have incorporated Target 5.1 "End all forms of discrimination against all women and girls everywhere" and Target 5.5 "Ensure women's full and effective participation and equal opportunities for leadership at all levels of decision-making in political, economic and public life" in the Scana targets.

We envision that the achievement of this target will positively influence the results towards good health and well-being (SDG 3). Scana and its companies actively support and promote training and education initiatives (SDG 4 – quality education) by promoting a career in the industry in schools, and by being an approved trainee company.

Key KPI's:	2022	Target
Increase the % of women in the workplace	13 %	> 30 %
ZERO cases of discrimination	0	0
Code of ethics training for all [2)]		100 %

DID YOU KNOW:

In the Scana group, 13 % of our employees are female. We actively promote female participation in the industry through our cooperation with schools and local job-match initiatives.

[2)] Baseline data available from 2023

ACHIEVE DECENT WORK AND ECONOMIC GROWTH SUPPORTING INDUSTRY AND INNOVATION THROUGH QUALITY EDUCATION AND TRAINING.

Scana promotes lasting, inclusive, and sustainable economic growth through full employment and decent work for all our workers.
Being able to grow and develop knowledge and skills is an important factor for the development of employees, and for them to thrive. We have implemented an on-line training portal that will be implemented in all Scana companies in 2023.

Scana and its companies actively work towards Target 8.5 – we aim to contribute to achieve full and productive employment and decent work for all women and men, including for young people and persons with disabilities. Our goal is to provide equal pay for work of equal value, and annual reports are prepared to evaluate non-discriminatory practices.

To support target 8.6 – substantially reduce the proportion of youth not in employment, education or training, several of our portfolio companies provide training for apprentices and "try a job" stations for students.

We participate in protecting labor rights and promote safe and secure working environments for all workers.

Key KPI's:	2022	Target
ZERO Loss Time Incidents	0	0
Number of trainees Scana companies	3	10
Training portal implemented in all Scana portfolio companies	50 %	100 %
Percentage of sick leave	5 %	< 3 %

DID YOU KNOW:

PSW Technology, PSW Solutions and PSW Power & Automation are approved apprentice companies.
In 2022, we assisted 14 young workers in their goal of achieving their certificate of apprenticeship in 2022.

AIM FOR RESPONSIBLE CONSUMPTION AND PRODUCTION SUPPORTING INDUSTRY AND INNOVATION SUPPLYING AND USING AFFORDABLE, CLEAN ENERGY FOR GOOD HEALTH AND WELLBEING.

Innovation is at the core of our being. Scana's portfolio companies are actively involved in the green transition. PSW Power and Automation and Trans Construction (ATC) actively contribute to this with complete solutions within electrification and renewable energy.

We work actively to achieve sustainable management- and efficient use of natural resources. All portfolio companies work towards substitution of hazardous chemicals and aim to achieve the environmentally sound management of chemicals and wastes throughout their life cycle. Our goal is to prevent emissions to air, water and soil in order to minimize their adverse impacts on human health and the environment.

By 2030 we aim to have substantially reduced our waste through reduction, recycling, and reuse of resources. Our vision is to see process outputs that curremtly are viewed as waste as a resource for new processes.

Our portfolio companies will implement procurement practices that are sustainable, working together with suppliers towards the goal of zero waste. Several of the portfolio companies use renewable energy in production, some even generated by own solar panels.

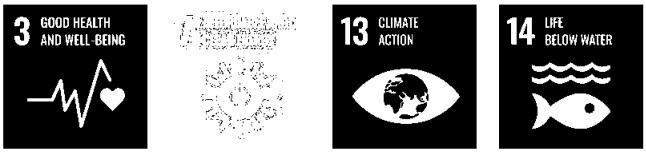
Key KPI's:	2022	Target
Net-ZERO Emissions [3)]		0
Sustainable procurement practices in all Scana companies [4)]		100 %
% of energy from own procurement or production from renewable sources	73 %	100 %

DID YOU KNOW:

PSW Solutions has technologically advanced cleaning systems in place that make it possible to sort, clean and re-use sandblasting sand up to 150 times!

[3)] Baseline data available from 2023

[4)] Baseline data available from 2023



TAKE URGENT CLIMATE ACTION SUPPLYING AND USING AFFORDABLE, CLEAN ENERGY FOR GOOD HEALTH AND WELLBEING FOR PEOPLE AND PLANET, INCLUDING LIFE BELOW WATER.

The products and services of the Scana Portfolio companies aim to contribute to the supply of affordable, clean energy. Initiatives have been taken towards providing services to the wind energy market by several of the portfolio companies. 5 out of 6 scana companies have directly contributed to the green shift with services or products. Skarpenord is to deliver valve remote control systems to two CO_2 carriers that will transport liquid carbon dioxide to the new Northern Lights CO_2 storage facility. PSW Power & Automations contributes to clean energy by providing state of the art shore power solutions and by installing solar plants for industrial sites and private homes. PSW Solutions and PSW Technology both have provided services to the offshore wind industry, Seasystems has provided mooring solutions to the world's first floating tidal energy array. We are aware of our own environmental footprint: the environmental impact of the companies in Scana consists mainly of our own energy consumption, the generation of waste and the use of chemicals. We aim to reduce our total greenhouse gas emissions per year, using renewable energy resources.

Key KPI's:	2022	Target
% of energy from own procurement or production from renewable sources	73 %	100 %
% of Scana companies with services contributing to the green shift	100 %	100 %
Zero waste (all waste to be recycled or re-used) [5)]		100 %

DID YOU KNOW:

By installing an energy storage system on board of supply ships, fuel consumption can be reduced by up to 20 %.

If you combine this with the use of shore power at the quay, a ship can save up to 360 m^3 of fuel a year, which corresponds to around 1.000 tons of CO_2.

[5)] *Baseline data available from 2023, as some Scana companies have waste handling included in rental contracts*

GOING FORWARD

We are highly committed to continue on our mission towards "reaching ZERO" with meaningful actions aimed for achieving our KPI's, and supporting the Sustainable Development Goals.
Working actively towards our prioritized SDG's, in 2023 we aim to present our complete ESG report where we publish our climate impacts, set targets and goals, and communicate our plans for reducing our emissions.

We will work towards communicating our ESG information using The Global Reporting Initiative (GRI) Standards, which are the world's most widely used sustainability reporting framework, providing a comprehensive and flexible guide for organizations to report on their environmental, social, and governance (ESG) performance.

Scana
CORPORATE GOVERNANCE REPORT

CORPORATE GOVERNANCE REPORT

BASIS FOR THE REPORT

This report is prepared by the board of directors of Scana ASA and presents the corporate governance of the company. It is structured to cover all sections of the Norwegian Code of Practice for Corporate Governance ("Code of Practice") – available at *www.nues.no*.

The purpose of the Code of Practice is to clarify the respective roles of shareholders, board of directors and executive officers beyond the requirements of legislation. Scana ASA aims to comply with the recommendation to strengthen the confidence held in the company and contribute to the highest possible added value in the long term, for the benefit of shareholders, employees, and other interested parties.

BUSINESS

The overall business scope of Scana is included in the company's articles of association and defined as follows: "Ownership and management of businesses within ocean- and energy industry, and activities related to this." The articles are available at ***www.scana.no***.

The board of directors sets the direction of the company by determining the objectives, strategy and risk profile of the business within the parameters of the articles of association. As part of this work, various sustainability elements are taken into account and the company has a board approved Sustainability Policy for how it integrates the interests of the society at large into its value creation. A separate Sustainability report that addresses environmental, social and governance issues is available on the company website. The board evaluates targets, strategies and its risk profile on an annual basis, at a minimum.

EQUITY AND DIVIDENDS

CAPITAL STRUCTURE

The board of directors and the management regularly monitor that the capital structure of Scana ASA, including the level of equity and liquidity, are appropriate for the company's objectives, strategy and risk profile. Scana ASA had NOK 493 million in book equity as of 31 December 2022, corresponding to an equity ratio of 36 percent.

DIVIDEND POLICY

The company's overall objective is to create long term value for its owners in the form of dividend payments and/or increase in the value of the company's shares over time. The dividend policy is based on the company's financial position and re-investment opportunities applying strict principles for allocation of capital. The dividend policy supports the company in balancing the target of annual dividends over time while building financial robustness and maintaining a strong balance sheet with adequate liquidity reserves. The company has adopted a dividend policy targeting annual dividend distributions of 30–40 percent of net profit over time. Any dividend proposed by the board of directors will be presented to the annual general meeting for approval.

AUTHORIZATIONS FOR THE BOARD OF DIRECTORS

Authorization to acquire own shares
The company's general meeting held on June 22, 2022, mandated the board of directors to purchase own shares up to an aggregate nominal value of NOK 39.341.098. The resolution specified the purpose for utilization: transaction currency in connection with acquisitions, mergers, demergers and other transfers of business. The board's authorization to purchase own shares is valid for the period until the date of the annual general meeting in 2023, however, in no circumstances beyond June 30, 2023.

Authorization to increase the share capital
The company's general meeting held on June 22, 2022, mandated the board of directors to issue new shares up to an aggregate nominal value of NOK 50.320.080. The resolution specified three purposes for utilization: (i) transaction currency in connection with acquisitions, (ii) strengthening the company's capital structure and (iii) issue towards the company's senior employees. The board's authorization to increase the share capital is valid for the period until the date of the annual general meeting in 2023, however, in no circumstances beyond June 30, 2023.

EQUAL TREATMENT OF SHAREHOLDERS

Each share in the company carries one vote, and all shares carry equal rights, including the right to participate in general meetings.

The company emphasizes that the interests of the shareholders is advanced and that all shareholders, in accordance with the requirements of the Norwegian Securities Trading Act, is treated on an equal basis. Existing shareholders have pre-emptive rights to subscribe for shares in the event of share capital increases. The general meeting may by a qualified majority resolve to set aside the pre-emptive rights of existing shareholders. Any proposal by the board of directors of such resolution shall be explained.

Transactions in own shares are done via the Oslo Stock Exchange and in compliance with applicable stock exchange regulations.

Special care must be exercised in transactions where Scana ASA's shareholders, board members, management or close relatives have financial or personal interests. If the transaction is not insignificant in nature or size, there must be an assessment from an independent third party.

The company has implemented guidelines to ensure that the members of the board of directors and executive personnel shall obtain prior approval and notify the board of directors if they trade Scana shares.

FREELY TRANFERABLE SHARES

The shares of Scana ASA are listed on the Oslo Stock Exchange. The company's articles of association do not contain any limitations on voting or restrictions on the transferability of shares, and the shares are consequently freely transferable.

GENERAL MEETINGS

The general meeting is the highest authority of the company, and an important forum for cooperation between the company's shareholders, the board and management. The company encourages its shareholders to exercise their rights by participating in general meetings.

Scana ASA has established routines and procedures in connection with general meetings which are in accordance with guidelines given in the Norwegian Code of Practice for Corporate Governance.

Notice and minutes are available on the company's website www.scana.no under "Investor information".

Notices convening general meetings are submitted and announced in accordance with applicable law and stock exchange regulations. Comprehensive documentation relating to the items on the agenda are prepared and made available on the company's website no later than 21 days prior to the general meeting.

The registration deadline for attendance is set as close to the date of the general meeting as possible. Shareholders who are unable to attend may vote by proxy. A proxy form is included in the notice convening the general meeting. Information about the procedure for proxy form and information about the person appointed who can vote for the shareholders as proxy, accompanies the notice.

At Scana ASA's general meeting, at least the chairman of the board, the chairman of the election committee and the auditor attends. The management is represented by the CEO and CFO. The general meeting is opened by the chairman of the board.

When electing the board or other bodies in the company, shareholders can vote separately on each candidate nominated for election to the company's corporate bodies. The outcome of the voting at the general meeting is made public immediately after the general meeting has been held.

NOMINATION COMMITTEE

The articles of association stipulate that the company shall have a nomination committee. The committee must comprise of no less than three members. The Nomination Committee shall prepare the annual General Meeting's election of board members and propose the remuneration to be given to the board members. The shareholders have the opportunity to make proposals to the nomination committee about candidates for board positions and other positions, for example by contacting the chairman of the nomination committee, the chairman of the board or the company's administration.

The current members of the nomination committee are Carl Christian Krefting (chairman), Dag Magne Vedvik and Harald Mowinckel Troye. The positions are up for election at the annual general meeting in 2024. No members of the nomination committee are directors of the board or employed by the company.

COMPOSITION AND INDEPENDENCE OF THE BOARD OF DIRECTORS

COMPOSITION

The articles of association stipulate that the board of directors shall comprise three to seven persons. Elected directors will serve for a period of two years. The board has no employee representatives, and no members of the company's management are board members. Scana ASA does not have a corporate assembly. The composition of the board must reflect the competence needs that are relevant to the company's operations. Current board instructions set requirements for, among other things, industry knowledge, industry relations, technological understanding, international experience, market knowledge, as well as experience from economics, finance, and the capital market.

The board currently consists of 4 people. A more detailed presentation of the board members can be found on page 145 of the annual report.

INDEPENDENCE

The composition of the board aims to ensure that the interests of all shareholders are attended to, and that the company has the competence, resources, and diversity it needs at its disposal.

The board instructions contain requirements that at least two of the shareholder-elected board members must be independent of the company's main shareholders.

A majority of the shareholder elected members are considered independent of executive management and important business associates. None of the directors are part of the company's executive management

team. The board carries out a self-evaluation of its activities and expertise, as well as whether the board is properly composed and how it functions as a unit and individually in relation to the board's goals.

THE WORK OF THE BOARD OF DIRECTORS

MEETINGS

The board of directors will hold board meetings whenever needed, but normally six to eight times a year. The chairman of the board can call extraordinary board meetings when deemed necessary. The CEO can call an extraordinary board meeting by agreement with the chairman of the board. In 2022, 19 board meetings were held. The CEO must attend the board meetings. The CFO also normally attends the meetings. The board is otherwise free to summon other members of the company's management or others to the board meetings. It is the chairman's responsibility to lead the board meetings. If he or she is absent, the meeting is chaired by the deputy chairman of the board. If both are absent, a chairman is elected at the board meeting.

THE BOARDS RESPONSIBILITY

The company's board has overall responsibility for management and control of the company. The board must adopt the company's strategy, budgets and business plans and at all times keep informed about the company's operations and financial development. The board is responsible for ensuring that the company's operations, financial accounts and liquidity are subject to satisfactory control. The board must monitor the company's management and ensure that the CEO carries out his duties in accordance with current instructions. The board can, at its own discretion, draw up additional guidelines for the company's operations.

The CEO prepares cases for deliberation by the board of directors. It is a priority to have matters prepared and presented in such a way that the board is provided an adequate basis for its deliberations. Minutes must be made for each board meeting, where a description of each case that has been dealt with, which decision the board has made and the basis on which the decisions in each individual case have been made is included.

AUDIT COMMITTEE

Scana ASA has an audit committee comprising of two of the members of the board of directors: Pål Selvik (chairperson) and Vidar Rabben (member).

The audit committee is independent from the management of the company. At least one of the members shall have either formal qualifications within accounting or auditing, or relevant experience and skills within the same. Pål Selvik have such experience and technical competence. The committee held 1 meeting in 2022, prior to December 2022 the whole board of directors were acting as audit committee.

The audit committee participates in the quality assurance of guidelines, policies, and other governing instruments pertaining to the company. The audit committee performs a qualitative review of the quarterly and annual reports of the company.

RISK MANAGEMENT AND INTERNAL CONTROL

The board of directors ensures that the company has internal control and appropriate systems for risk management in relation to the nature and scope of the business. In addition, the board conducts an annual review of the internal control system and the most significant risk areas. The aim is to maintain a comprehensive risk management process for the investment company Scana ASA, which also includes the risk areas in the individual portfolio companies. Risk management is thus followed up by both the CEO and the board of directors of Scana ASA and by the board of directors and management of the portfolio companies.

The board of directors and management of each portfolio company have independent responsibility for internal control and risk management in their respective companies. The operational risk management is thus delegated to the portfolio companies. In the annual review by the board of Scana ASA, the overall

risk and the risk management system for each individual portfolio company are reviewed, as well as the aggregated operational risk.

The board of directors and management of Scana ASA mainly focus on risk management and control linked to their role as owner of the portfolio companies and the factors that may affect the value of the investments or otherwise give exposure to the company's balance sheet, liquidity and reputation. This includes liquidity development, guarantee exposure, risk in major customer contracts in the portfolio companies, interest rate and currency risk, quality of reporting from the portfolio companies, processes related to the purchase and sale of companies, as well as reputational risk.

Scana ASA and the portfolio companies has a joint financing solution. This means that the main responsibility for financial risk management lies with the parent company. A system has also been established whereby each portfolio company is allocated a certain proportion of the total available liquidity limits, adapted to its expected capital needs. In addition, Scana ASA retains a share of the liquidity that is used for the company's own purposes, as well as available liquidity that can be added to the portfolio companies under given criteria. Liquidity development and liquidity forecasts are regularly reported from the portfolio companies to Scana ASA and reviewed by the board of directors at the ordinary board meetings.

The portfolio companies are exposed to currency risk. With portfolio companies in Norway and Sweden, the various companies have different currency positions and some of these can offset or reinforce each other. A joint system has therefore been established for hedging currency risk at group level. Responsibility for interest hedging lies with Scana ASA as part of the joint financing solution. For further details, reference is made to the annual report.

The portfolio companies have their own finance departments. The finance department in Scana ASA is responsible for consolidating the group's accounts and reports, as well as reporting to the board, banks, owners and the capital market. In addition, the department provides professional assistance to the portfolio companies and performs tasks related to control and risk management that are within Scana ASA's area of responsibility.

It is the board's opinion that Scana ASA's overall strategy, management principles, organizational structure and ethical guidelines contribute to a satisfactory control environment.

REMUNERATION OF THE BOARD OF DIRECTORS

The remuneration of the board of directors is decided by the general meeting, following a recommendation from the nomination committee. The remuneration is not performance-related, and no options are issued to board members. All forms of remuneration to the members of the board appear in disclosure 10 to the annual accounts.

More detailed information about the reward of individual board members is provided in disclosure 9 in the consolidated financial statements of the company, included in the annual report for 2022.

REMUNERATION OF EXECUTIVE PERSONNEL

The board of directors has adopted guidelines for the remuneration of executive management. These set out the main principles for the company's executive remuneration policy and are presented to the company's general meeting. Determining the salary and other remuneration for executive personnel is carried out by the board in a meeting, and presented as information to the general meeting. See disclosure 9 for further information regarding remuneration to executive personnel.

INFORMATION AND COMMUNICATION

Scana ASA must provide the stock market with relevant and complementary information as a basis for a balanced and correct valuation of the share. The company emphasizes an open dialogue with the stock market and the media.

The information is communicated through stock exchange announcements, press releases, quarterly reports and presentations for analysts and investors. The company's website (*www.scana.no*) has information for investors. This includes, among other things, annual reports and quarterly reports.

TAKE-OVERS

The board of directors has not deemed it appropriate to adopt specific guidelines for takeover situations. There are also no other obstacles that should limit the purchase of the company's shares.

No main principles have been established for how Scana ASA will act in the event of a takeover offer, except that the Norwegian Code of Practice will have a normative function. Scana's financing agreement with DNB has a normal change of control clause which means a continuation of the finance agreement is subject to approval from the bank.

AUDITORS

Scana ASA's policy is to use the same audit firm in all portfolio companies. The board of directors each year arranges for the auditor to submit to the audit committee a plan for the audit work to be conducted such year. The auditor prepares an annual statement to the board confirming fulfilment of the independence requirement applicable to auditors. All meetings of the audit committee are attended by the auditor who also attends the part of the board meeting approving the annual financial statements. The audit committee set guidelines on the scope for using the auditor for services other than auditing and makes recommendations to the board of directors concerning the appointment of the auditor and the approval of the auditor's fees. Fees payable to the auditor split on auditing and other services are specified in the Auditor Fees note to the consolidated financial statements of the company. The auditor fees are subject to approval by the annual general meeting. Scana ASA does not have its own internal audit department, but uses resources from an external audit firm should the need for such an audit arise.

DISCLOSURE 1 | SIGNIFICANT ACCOUNTING PRINCIPLES

CORPORATE INFORMATION

Scana ASA is headquartered at Wernersholmvegen 49, Bergen, in Norway. Scana is a public limited company listed on the Oslo Stock Exchange. The Group's activities are described in disclosure 6. The consolidated financial statements of Scana ASA for the fiscal year 2022 were approved in the board meeting on 28 April 2023.

The financial statements are presented in Norwegian kroner (NOK), and all numbers are rounded and given to the nearest thousand ('000) except when otherwise stated.

BASIS FOR PREPARATION

The Scana ASA's consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU and are mandatory for financial years beginning on or after 1 January 2022, and Norwegian disclosure requirements listed in the Norwegian Accounting Act as of 31 December 2022.

The financial statements have been prepared under the assumption of going concern, see disclosure 5. Annual accounts consist of income statement, comprehensive income, the statement of financial position, cash flow statement, statement of changes in equity and disclosures to the accounts.

The consolidated financial statements are based on historical cost, with the exception of the following:

- Financial instruments (derivatives) at fair value through profit or loss.
- Obligations linked to share-based schemes and schemes with cash settlement are measured at fair value through profit or loss.

The consolidated financial statements have been prepared on the basis of uniform accounting principles for similar transactions and events under otherwise similar circumstances.

FUNCTIONAL CURRENCY AND PRESENTATION CURRENCY

The presentation currency for the Group is NOK which is also the functional currency for the parent company Scana ASA. The functional currencies for the subsidiaries have been assessed to be their local currencies.

BASIS OF CONSOLIDATION

The Group's consolidated financial statements comprise the parent company Scana ASA and its subsidiaries as of 31 December 2022.

An entity has been assessed as being controlled by the Group when the Group is exposed for or have the rights to variable returns from its involvement with the entity and can use its power over the entity to affect the amount of the Group's returns.

The identifiable assets acquired, and the liabilities assumed, including contingent liabilities, are measured at fair value at the time of takeover.

Transferred consideration is measured at fair value. Excess of the total sum of transferred consideration, amount recognized for minority interests and fair value of any previously held equity interests in the acquired company in relation to the net value of identifiable acquired assets and assumed liabilities, is recognized as goodwill. Expenses incurred in connection with the takeover, beyond those related to debt and equity, are expensed. Companies that are bought or sold during the year are included in the consolidated accounts from the date when significant influence or joint control is achieved until such influence ceases.

Intercompany transactions, balances and unrealized gains or losses on transactions between Group companies are eliminated. Unrealized gains related to transactions with affiliated companies and joint ventures are eliminated with the Group's share in the business. Correspondingly, unrealized losses are eliminated, but only to the extent that there are no indications of a decrease in value of the asset that has been sold internally. When necessary, amounts reported by subsidiaries have been adjusted to conform to the Group's accounting policies.

REVENUE

REVENUE FROM CONTRACTS WITH CUSTOMER

IFRS 15 Revenue from Contracts with customers establishes a five-step method that applies to all customer contracts. Under the standard, only approved customer contracts with a firm commitment are basis for revenue recognition. The deliveries in the contracts are reviewed to identify distinct performance obligations, and revenue is recognized in line with how the entity satisfies these performance obligations – either over time or at a point in time. This assessment may involve significant judgement. For contracts with customers for which the performance obligations are satisfied over time, revenue is recognized over time using a cost progress method or as time and material are delivered to the customer. For contracts with customers for which the performance obligations are satisfied at a point in time, revenue is recognized at the point in time when the customer obtains control of the product or the service. Details of the accounting policies and the nature of performance obligations for each of the major types of customer contracts are set out in disclosure 6.

CONTRACT BALANCES

Contract assets: A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognized for the earned consideration that is conditional.

Trade receivables: A receivable represents the Group's right to an amount of consideration that is unconditional.

Contract liabilities: A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognized when the payment is made. Contract liabilities are recognized as revenue when the Group fulfils the performance obligation(s) under the contract.

GOVERMENT GRANTS

Government grants are recognized when there is reasonable assurance that the company will meet the conditions stipulated for the grants and that the grants will be received. The Group received support related to covid-19 in 2021 which was recognized as other revenue. Operating grants are recognized systematically during the grant period.

FOREIGN CURRENCIES

TRANSACTONS AND BALANCES

Transactions in foreign currency are translated to functional currency using the exchange rate at the date of the transaction. At the end of each reporting period foreign currency monetary items are translated using the closing rate, non-monetary items that are measured in terms of historical cost are translated using the exchange rate at the date of the transaction and non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. Any currency differences are recognized in profit or loss as financial items.

CONSOLIDATION AND CONVERSION
Balance sheet items for foreign subsidiaries are converted to NOK using the exchange rates as of 31 December. All items in the income statement are converted to NOK via the weighted average exchange rate per month which is obtained from Norges Bank for the individual month. Consolidation leads to translation differences which is presented in other revenue and expenses and is included in the total result. Currency loss or -gains relating to debt in foreign currency, which for accounting purposes is considered to be a hedge investment in foreign subsidiaries, is entered as other revenue and expenses included in the total result. Exchange-rate differences in monetary amounts (liabilities or receivables) which are in reality a part of a company's net investment in a foreign entity are also included as translation differences.

INTANGIBLE ASSETS
Intangible assets with a definite economic life are amortized over their economic life and tested for impairment if there are any indications. The amortization method and period are assessed at least once a year. Changes to the amortization method and/or period are accounted for as a change in estimate.

GOODWILL
Goodwill is initially measured at cost, and is the excess of the aggregate of the consideration transferred and the amount recognised in the net identifiable assets acquired and liabilities assumed through a business combination.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units (CGU) that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.
Goodwill is not depreciated but is tested at least annually for impairment. In connection with this, goodwill is allocated to cash-generating units which as balanced goodwill and are expected to benefit from synergies from the business combination. Goodwill recognized in the balance sheet will be re-assessed against the recoverable amount. The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs of disposal and its value in use.

RESEARCH AND DEVELOPMENT
Expenses relating to research and development are recognized in the statement of comprehensive income as they incur. Development expenses relating to a single project are capitalized as intangible assets when the following can be documented:

- The product or process is technically and commercially viable so that it becomes available for use or sale.
- The Group intends to finalize the intangible asset and make it available for use or sale.
- The Group has the ability to make the intangible asset available for use or sale.
- The asset will generate future economic benefits.
- The Group has sufficient resources to complete the development work.
- Expenses can be reliably measured.

All development expenses that are recognized in the balance sheet are reviewed by the board of the subsidiaries. It is documented how it is expected that the intangible asset will create future cash flow for the Group.

Capitalized development costs are recognized at their cost minus accumulated amortization and impairment losses. Capitalized development costs are amortized on a straight-line basis over the estimated useful life of the asset. Impairment tests are performed annually or more frequently if found necessary based on impairment indicator.
Losses or gains on the disposal of an intangible asset, calculated as the difference between the net sales amounts and balance amount, are recognized in the income statement.

RIGHT OF USE ASSETS

The Group measures the right of use asset at cost, less any accumulated depreciation and impairment losses, adjusted for any remeasurement of lease liabilities. The costs of the right of use asset comprise:

- The amount of the initial measurement of the lease liability recognized.
- Any lease payments made at or before the commencement date, less any incentives received
- Any initial direct costs incurred by the Group.
- An estimate of the costs to be incurred by the Group in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

The Group applies the depreciation requirements in IAS 16 Property, Plant and Equipment in depreciating the right of use asset, except that the right of use asset is depreciated from the commencement date to the earlier of the lease term and the remaining useful life of the right of use asset. The Group applies IAS 36 Impairment of Assets to determine whether the right of use asset is impaired and to account for any impairment loss identified.

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are valued at their cost less accumulated depreciation and impairment losses. When assets are sold or disposed of, the carrying amount is derecognized and any gain or loss is recognized in the statement of comprehensive income. Acquisition cost for tangible assets is the purchase price, including taxes/duties and direct costs directly linked to preparing the asset ready for its intended use. Expenses incurred after the asset is in use, such as regular maintenance expenses, are recognized in the statement of comprehensive income, while other expenses that are expected to provide future financial benefits are capitalized.

Buildings and land are assets that are either used by the Group's companies or owned to achieve rental revenue. Buildings and land are recognized at acquisition cost. Costs incurred after the asset is in use, such as regular maintenance costs, are recognized in the statement of comprehensive income, while other costs that are expected to provide future financial benefits are capitalized.
Depreciation is calculated on a straight-line basis over the estimated useful life of the assets, except for land. The period of use, the residual value and the depreciation method for the fixed assets are assessed each year.

The Group capitalizes larger periodic maintenance and depreciates it according to the maintenance interval.

IMPAIRMENT OF NON-CURRENT ASSETS

Impairment of non-current assets (including right-of-use assets) is considered yearly and when there are indications of impairment. If, and only if, the recoverable amount of an asset is less than carrying amount, the carrying amount of the asset shall be reduced to its recoverable amount. That reduction is an impairment loss. An impairment loss shall be recognized immediately in profit or loss. Recoverable amount is the higher of fair value less cost of disposal and value in use (the discounted cash flow given continued use).
Fair value less cost of disposal is the value that can be obtained by selling to a third-party less the cost of disposal.

Recoverable amount is determined separately for all operating assets, but if this is not possible, it is determined together with the cash-flow generating unit the tangible asset is linked to.
Previously recognized impairment will be reversed when available information confirms that there is no longer indication of impairment. The reversal is recognized in the statement of comprehensive income. Reversal of impairment is constrained, so the value of the asset will not be higher than the asset value and planned recognized depreciations.

INVESTMENT IN ASSOCIATED COMPANIES

Associates are entities over which the Group has significant influence, but not control or joint control over the financial and operating management. (Normally ownership between 20 % and 50 %). Associates are accounted for using the equity method from the date when significant influence or joint control is achieved until such influence ceases. Investments in associates are initially recognized at cost. If the Group's share of the loss surpasses the carrying amount of the associate, the carrying amount is set to zero and further loss is not recognized unless the Group has an obligation to make up for the loss.

FINANCIAL ASSETS

The Group's financial assets are derivatives, non-listed equity instruments, quoted debt instruments, trade receivables and cash and cash equivalents. The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, and fair value through other comprehensive income and transaction costs.

The Group classified its financial assets in two categories:

- Financial assets at amortized cost
- Derivatives at fair value designated as hedging instruments

FINANCIAL ASSETS AT AMORTIZED COST

The Group measures financial assets at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows and,
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified, or impaired.

The Group's financial assets at amortized cost includes trade receivables and other short-term deposit. Trade receivables that do not contain a significant financing component are measured at the transaction price determined under IFRS 15 Revenue from contracts with customers.

DERECOGNITION OF FINANCIAL ASSETS

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognized (i.e., removed from the Group's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired, or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either
  - *a)* the Group has transferred substantially all the risks and rewards of the asset, or
  - *b)* the Group has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

IMPAIRMENT OF FINANCIAL ASSETS

The measurement of allowance for expected credit losses (ECL) in the general model depends on whether the credit risk has increased significantly since the initial recognition. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are

provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). The 12-month expected loss is the proportion of the loss that is expected to occur over the lifetime of the asset the instrument, which can be linked to events occurring in the first 12 months. For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For trade receivables and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The general model means that on every reporting date the Group evaluates whether there has been one significant increase in the credit risk for the relevant assets after initial recognition. It is the change in risk of default that is assessed. When assessing whether the risk of default has increased significantly, the company must evaluate relevant information, both about historical, current, and future conditions. Conditions that are evaluated include:

- Change in the instrument's external credit rating since initial recognition
- Change in external market indications relating to credit risk
- Existing or expected changes in the borrower's business, or circumstances in general, which can negatively affect the ability to fulfil its obligations
- Significant changes in the borrower's results, working capital or similar
- Regulatory conditions implemented or expected to be implemented that can affect the instrument

If there has been a significant increase in the credit risk after initial recognition, the financial asset is transferred to step 2 or 3, and the loss provision then constitutes the expected loss over the lifetime of the instrument. Instruments are classified at stage 3 when the instruments are credit impaired, i.e., when external evidence can confirm that a loss has occurred.
Loss provisions must be expected losses, based on the best available information on the time of estimation relating to historical, current and future conditions.

FINANCIAL LIABILITIES
Derivatives are recognized initially at fair value. Loans, borrowings, and payables are recognized at fair value net of directly attributable transaction costs. Derivatives are financial liabilities when the fair value is negative, accounted for similarly as derivatives as assets.

LOAN, BORROWINGS AND PAYABLES
After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process.
Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the income statement.
Payables are measured at their nominal amount when the effect of discounting is not material.

DERECOGNITION OF FINANCIAL LIABILITIES
A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the income statement.

INVENTORIES
Inventories, which consist of purchased goods and in-house produced products, are valued at the lowest of purchase/production cost and expected net selling price. The net selling price is the estimated selling price in the case of ordinary operations minus the estimated completion, marketing, and distribution costs. The acquisition cost is arrived at using the FIFO method and includes the costs incurred in acquiring the goods and the costs of bringing the goods to their current state and location. In-house produced goods include raw materials, energy, direct labour, and a share of the indirect costs that can be allocated based on normal capacity utilization, including maintenance and depreciation.

TRADE RECEIVABLE
Trade receivable is recognized at amortized cost. Provision for losses is made after a concrete assessment of each individual receivable.

CASH AND CASH EQUIVALENTS
Cash includes cash in hand and at bank. Cash equivalents are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes. For an investment to qualify as a cash equivalent it must be readily convertible to a known amount of cash, be subject to an insignificant risk of changes in value and have a maximum term to maturity of three months.
Bank deposits may also include restricted funds that may have a lock-in period of more than three months, but less than twelve months. Reference is made to disclosure 22 for further information of bank deposits and overdrafts. Included in liquidity in the cash flow statement overdraft.

In the Group's cash flow analysis cash and cash equivalents consist as defined above. The cash flow analysis has been prepared according to the indirect method.

NON-CURRENT ASSETS HELD FOR SALE AND DISCONTINUED OPERATIONS
Non-current assets and Groups of non-current assets and liabilities are classified as held for sale if their carrying amount will be recovered through a sales transaction instead of through continued use. This is only regarded as having been fulfilled when a sale is highly probable, and the non-current asset (or Groups of non-current assets and liabilities) is available for immediate sale in its present form. The management must be committed to a sale and the sale must be expected to be carried out within one year after the classification date.

Non-current assets and Groups of non-current assets and liabilities which are classified as held for sale are valued at the lower of their former carrying amount or fair value minus sales costs. Assets are presented separately in the balance sheet as "Assets classified as held for sale" and liabilities are presented as "Liabilities classified as held for sale".

Discontinued operations are defined as a company or part of a company that has either been disposed of or classified held for sale and:

- Which represents a separate and significant business or a separate and significant geographical operating area, where materiality is assessed both in relation to the size of the business and whether the business is different from other businesses in the Group or segment in general
- Is part of a single coordinated plan to dispose of a separate and significant business or a separate and significant geographic operating area; or
- Is a subsidiary acquired exclusively for resale.

Discontinued operations are presented separately from the result from continued operations in the income statement in the account "Annual result of discontinued operations (after tax)". Profit after tax from discontinued operations as well as gains or losses for assets or disposal Groups are included in the account. Additional specifications are given in disclosures. Comparative figures for the discontinued operations are changed accordingly.

LEASING
The Group has entered into lease agreements relating to assets mentioned in disclosure 24. IFRS 16 sets out principles for recognition, measurement, presentation, and information about leasing. The Group as lessee recognizes assets and liabilities for all leases. At the time of implementation of a lease agreement, the company recognizes the associated lease liability to future lease payments and an asset that represents the right of use of the underlying asset during the lease period (right of use asset).

IDENTIFYING A LEASE
At the inception of a contract, The Group assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

RECOGNITION OF LEASES AND EXEMPTIONS
At the lease commencement date, the Group recognizes a lease liability and corresponding right of use asset for all lease agreements in which it is the lessee, except for the following exemptions applied:

- Short-term leases (defined as 12 months or less)
- Low value assets

For these leases, the Group recognizes the lease payments as other operating expenses in the income statement when they incur.

LEASE LIABILITIES
The Group measures the lease liability at the present value of the lease payments for the right to use the underlying asset during the lease term that are not paid at the commencement date. The lease term represents the non-cancellable period of the lease, together with periods covered by an option either to extend or to terminate the lease when the Group is reasonably certain to exercise this option.

The lease payments included in the measurement comprise of:

- Fixed lease payments (including in-substance fixed payments), less any lease incentives receivable.
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date.
- Amount expected to be payable by the Group under residual value guarantees.
- The exercise price of a purchase option, if the Group is reasonably certain to exercise that option.
- Payments of penalties for terminating the lease, if the lease term reflects the Group exercising an option to terminate the lease.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (see disclosure 24), reducing the carrying amount to reflect the lease payments made and remeasuring the carrying amount to reflect any reassessment or lease modifications, or to reflect adjustments in lease payments due to an adjustment in an index or rate. The Group does not include variable lease payments that depend on an index or a rate in the lease liability. Instead, the Group recognizes these variable lease expenses in profit or loss. The Group presents its lease liabilities as separate line items in the statement of financial position.

The company classifies lease payments as follows in the cash flow statement:

- Lease payments linked to the principal amount of the contract are classified as financing activity on a separate line "repayment of lease obligations".
- Interest paid includes interest related to leases, classified as financing activity.
- Short-term leases (less than twelve months), payments related to low-value leases and leases with variable payments are classified as operational activity.

PENSION COST AND LIABILITIES
The Group's pension plans consist of defined contribution pension and AFP plans for the Group's Norwegian employees and benefit plans ("multi-employer plans") for the Group's Swedish employees. The pension plans which are administered separately (contribution-based pension plan) the annual payments/subsidies are included in personnel expenses.

Pension liabilities are valued at the present value of future pension rights earned at the balance sheet date on the basis of linear accrual and expected final salary. The pension plan's funds are valued at assumed market value. Net pension liabilities (pension liabilities minus the pension plan's funds) are classified in the balance sheet as long-term liabilities. The net liability includes employer's tax.

The AFP plan for the Group's Norwegian employees and the benefit plan for the Group's Swedish employees are considered as so-called "multi-employer plans". These pension plans are treated as defined contribution pension plans in the accounts because the necessary information to treat the plan as defined benefit plans are not yet available from the life insurance company that administers the pension plan. When the necessary information is available, and the pension plan are accounted for as defined benefit arrangements in accordance with IAS 19, this could have an effect on the consolidated accounts.

TAXES

INCOME TAXES
Income taxes comprise taxes on the taxable profit for the year, changes in deferred taxes and any adjustments in prior years' taxes. Taxes on transactions that are recorded in other comprehensive income or directly in equity do not form part of the tax expense in profit or loss.
Tax payable is calculated using the nominal tax rate for the relevant tax jurisdiction at the end of the reporting period.

DEFERRED TAX ASSETS
Deferred tax assets are recognized when it is probable that the company will have a sufficient profit for tax purposes in subsequent periods to utilize the tax asset. The assessment of whether deferred tax assets can be recognized in the balance sheet, including deferred tax assets linked to losses carried forward, is made separately within each individual tax regime. The companies recognize previously unrecognized deferred tax assets to the extent it has become probable that the company can utilize the deferred tax asset. Similarly, the company will reduce a deferred tax asset to the extent that the company no longer regards it as probable that it can utilize the deferred tax asset.

Deferred tax and deferred tax assets in the balance sheet is entered at nominal value and is calculated on the basis of temporary differences between tax and accounting values for assets and liabilities on the balance sheet date, adjusted for tax loss carry forwards.

Deferred tax and deferred tax assets are measured based on the expected future tax rates applicable to the companies in the Group where temporary differences have arisen. It is based on tax rates and tax rules that have are adopted on the balance sheet date.

Taxes payable and deferred taxes are recognized directly in equity to the extent that they relate to equity transactions.

PAYABLE TAX
Receivables and liabilities regarding payable tax for the current period and previous periods is recognized in the balance sheet at the amount that is expected to be paid from or paid into the tax authorities.

PROVISIONS
A provision is recognized when the Group has an obligation (legal or self-imposed) as a result of a previous event, it is probable (more likely than not) that a financial settlement will take place as a result of this

obligation and the size of the amount can be measured reliably. If the effect is considerable, the provision is calculated by discounting estimated future cash flows using a discount rate before tax that reflects the market's pricing of the time value of money and, if relevant, risks specifically linked to the obligation. In the case of discounting, profit and loss is recognized the interest rate effect as a financial expense.

Warranty provisions are recognized when the product is sold, or the service is provided to the customer. Initial recognition is based on historical experience. The initial estimate of warranty-related costs is revised annually.

Restructuring provisions are recognized when the Group has approved a detailed, formal restructuring plan and the restructuring has either started or been publicly announced.

Provisions for loss-making contracts are recognized when the Group's expected revenue from a contract is lower than costs incurred to fulfill the obligations in the contract.

SHARE BASED PAYMENT
An option program has been entered into for the management of Scana ASA and the general manager of the subsidiaries that are being made up by issuing shares. See further comments in disclosure 9.

The value of granted options is accrued over the agreed period the employee gains the right to receive the options, or when purchasing services from external parties over the service period of the share consideration agreed to cover.

CONTINGENT LIABILITIES AND ASSETS
Contingent liabilities are not recognized in the annual accounts. Significant contingent liabilities are disclosed, with the exception of contingent liabilities that are unlikely to be incurred.

Contingent assets are not recognized in the annual accounts but are disclosed if there is a certain probability that a benefit will be added to the Group.

FAIR VALUE MEASUREMENT
The Group measures certain financial instruments at fair value. This applies to currency contracts. The fair value of financial liabilities is also disclosed measured at amortized cost.

Fair value is the price that would have been used to sell an asset or paid to transfer one obligation in the primary market at the measurement time under the prevailing market conditions, regardless of whether the price is directly observable or estimated using another valuation technique.

Scana uses the following hierarchy when assessing and presenting the fair value of the financial instruments.

Level 1: Listed prices (unadjusted) in active markets for identical assets and liabilities.

Level 2: Input other than quoted prices from active markets included in level 1, which are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices). To calculate the value of open foreign exchange contracts, it is obtained from Norges Bank on the closing date.

Level 3: Input for the asset or liability that is not based on observable market data.

GOING CONCERN
The annual report is prepared under the assumption of going concern. See comments in disclosure 5.

SUBSEQUENT EVENTS
New information on the company's financial position on the end of the reporting period which becomes known after the reporting period is recorded in the annual accounts. Events after the reporting period

that do not affect the company's financial position on the end of the reporting period, but which will affect the company's financial position in the future are disclosed if significant.

CHANGES IN ACCOUNTING POLCITIES AND DISCLOSURES APPLICABLE FROM 2022:
The accounting principles used are consistent with the principles used in the previous accounting period, with the exception of the changes in IFRS that have been implemented by the Group in the current accounting period together with the aforementioned changes in the general information section.
The changes are listed below in IFRS that has been relevant for the Group with effect for the 2022 accounts, as well as the effect this has on the Group's annual accounts.

The accounting policies adopted are consistent with those of the previous financial year, except for the amendments to IFRS which have been implemented by the Group during the current financial year. Below we have listed the amendments in IFRS which have been applicable for the Group's 2022 financial statements, as well as the effect of the amendments.
The following new and amended standards and interpretations have been implemented for the first time in 2022:

AMENDMENTS TO IFRS 3 – REFERENCE TO THE CONCEPTUAL FRAMEWORK
The Group has not identified any impact connected to the amendments.

AMENDMENTS TO IAS 16 – PROCEEDS BEFORE INTENDED USE
Adoption of the IAS 16 amendments has no significant effect on the Group account during 2022.

AMENDMENTS TO IAS 37 – ONEROUS CONTRACTS, COST OF FULFILLING A CONTRACT
An onerous contract is a contract under which the unavoidable cost of meeting the obligations under the contract costs exceed the economic benefits expected to be received under that contract.
The amendments clarify that for the purpose of assessing whether a contract is onerous, the cost of fulfilling the contract includes both the incremental costs (e.g., the costs of direct labor and materials) of fulfilling that contract and an allocation of other costs that relate directly to fulfilling contract activities (e.g., depreciation of equipment used to fulfil the contract, as well as costs of contract management and supervision). Costs that do not relate directly to a contract (e.g., general and administration costs) shall not be included unless they are explicitly chargeable to the counterparty under the contract.

The amendments must be applied prospectively to contracts for which the entity has not yet fulfilled all of its obligations at the beginning of the annual reporting period in which it first applies the amendments.

Adoption of the IAS 37 amendments has no significant impact on the Group account.

IFRS 9 FINANCIAL INSTRUMENTS – FEES IN THE '10 PERCENT' TEST FOR DERECOGNITION OF FINANCIAL LIABILITITES
The adoption of amendments according to IAS 37 has no significant effect.

CHANGES WITH EFFECT FOR FINANCIAL YEARS STARTING ON 1 JANUARY 2023 OR LATER:

AMENDMENTS TO IAS 1 – CLASSIFICATION OF LIABILITIES AS CURRENT OR NON-CURRENT
The International Accounting Standards Board has issued amendments to IAS 1 Presentation of Financial Statements to clarify how to classify debt and other liabilities as current or non-current.

The amendments aim to promote consistency in applying the requirements by helping companies determine whether, in the statement of financial position, debt and other liabilities with an uncertain settlement date should be classified as current (due or potentially due to be settled within one year) or non-current. The amendments include clarifying the classification requirements for debt a company might settle by converting it into equity.

The amendments must be applied retrospectively and are effective for annual periods beginning on or after 1 January 2023. The Group does not intend to early adopt the amendments.
It is expected that the amendments may have no significant effects.

AMENDMENTS TO IAS 8 – DEFINITION OF ACCOUNTING ESTIMATES
IASB has issued amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors. The amendments clarify how companies should distinguish changes in accounting policies from changes in accounting estimates. That distinction is important because changes in accounting estimates are applied prospectively only to future transactions and other future events, but changes in accounting policies are generally also applied retrospectively to past transactions and other past events.

The amendments are effective for annual periods beginning on or after 1 January 2023, but earlier application is permitted. The Group does not intend to early adopt the amendments.
It is expected that the amendments do not have a significant effect.

AMENDMENTS TO IAS 1 AND IFRS PRACTICE STATEMENT 2 – DISCLOSURE OF ACCOUNTING POLICIES
Following feedback that more guidance was needed to help companies decide what accounting policy information should be disclosed, IASB has issued amendments to IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 Making Materiality Judgements. The amendments to IAS 1 require companies to disclose their material accounting policy information rather than their significant accounting policies. The amendments to IFRS Practice Statement 2 provide guidance on how to apply the concept of materiality to accounting policy disclosures.
The amendments are effective for annual periods beginning on or after 1 January 2023, but earlier application is permitted as long as this fact is disclosed. The Group does not intend to early adopt the amendments.
It is expected that the amendments do not have a significant effect.

AMENDMENTS TO IAS 12 – DEFERRED TAX RELATED TO ASSETS AND LIABILITIES ARISING FROM A SINGLE TRANSACTION
The amendments narrowed the scope of the recognition exemption in paragraphs 15 and 24 of IAS 12 (recognition exemption) so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. The aim of the amendments is to reduce diversity in the reporting of deferred tax on leases and decommissioning obligations.

IAS 12 Income Taxes specifies how a company accounts for income tax, including deferred tax, which represents tax payable or recoverable in the future. In specified circumstances, regulated in IAS 12.15 and IAS 12.24, companies are exempt from recognizing deferred tax when they recognize assets or liabilities for the first time. Previously, there had been some uncertainty about whether the exemption applied to transactions such as leases and decommissioning obligations - transactions for which companies recognize both an asset and a liability.
The amendments clarify that the exemption does not apply and that companies are required to recognize deferred tax on such transactions. The aim of the amendments is to reduce diversity in the reporting of deferred tax on leases and decommissioning obligations.

The amendments are effective for annual periods beginning on or after 1 January 2023.

It is expected that the amendments do not have a significant effect.

DISCLOSURE 2 | CRITICAL ACCOUNTING JUDGEMENT AND KEY SOURCES OF ESTIMATION UNCERTAINTIES

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires the Management to exercise its judgment in the process of applying the Group's accounting policies. Estimates and critical accounting judgement are evaluated on an ongoing basis and are based on historical experience and other factors including expectations about future events which are probable given present circumstances.

The Group prepares estimates and makes assumptions related to the future. The accounting estimates which follow from this are, by definition, associated with a degree of uncertainties and will give deviation relative to actual outcome. Furthermore, the choice of accounting principles and degree of uncertainty could affect the accounts.

The areas involving higher degree and judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are presented in the table below. See descriptions linked to the various accounting items below:

			ACCOUNTING JUDGEMENTS	***ESTIMATE UNCERTAINTY***
Accounting item	*Disclosure*	**Estimate/Assumptions**	**Carrying amount**	**Carrying amount**
Deferred tax assets	*11*	Assessment of the ability to utilize tax positions in the future		52 373
Goodwill and intangible assets	*12*	Estimation of value in use		345 768
Right of use assets	*13*	Incremental borrowing rate and the exercise of options	402 584	
Contract assets	*16*	Revenue over time		125 304
Leasing liabilities	*24*	Assessment of the obligation related to interest and the exercise of options	412 143	

DEFERRED TAX ASSETS – ESTIMATE UNCERTAINTY

Deferred tax assets are recognized for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgement is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits, together with future tax planning strategies.

If the Group was able to recognize all unrecognized deferred tax assets, profit and equity would have increased by NOK 20.2 million. Further details on taxes are disclosed in disclosure 11.

GOODWILL AND OTHER INTANGIBLE ASSETS – ESTIMATE UNCERTAINTY

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to goodwill and other intangibles with indefinite useful lives recognized by the Group. The key assumptions used to determine the recoverable amount for the different CGUs, including a sensitivity analysis, are disclosed and further explained in disclosure 12.

CONTRACT ASSETS/CONTRACT LIABILITIES – ESTIMATE UNCERTAINTY

Contract assets are linked to larger projects where income is recognized over time. Assumptions are

made in relation to estimated costs and profits connected to the projects. Each contract is reviewed and identified according to the delivery obligations. Assessments and assumptions are also made relating to measurement of completion. Changes in the assumptions can lead to the recognition of income and profits deviates from the underlying value creation, relative to the project's total revenue and profit. Profit can thus be accounted for too early or too late in the project.

LEASE LIABLITIES/RIGHT OF USE – ACCOUNTING JUDGEMENT/ESTIMATE UNCERTAINTY

ESTIMATING THE INCREMENTAL BORROWING RATE

The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate to measure lease liabilities. This is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right of use asset in a similar economic environment. The incremental borrowing rate therefore reflects what the Group 'would have to pay', which requires estimation when no observable rates are available. The Group estimates the incremental borrowing rate using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates (such as the subsidiary's stand-alone credit rating).

DETERMINING THE LEASE TERM OF CONTRACTS WITH RENEWAL OPTIONS

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised. The Group has several lease contracts that include extension and termination options. The Group applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise the renewal. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew.

DISCLOSURE 3 | BUSINESS COMBINATION

ACQUISITION OF PSW

On 11 January 2022, Scana acquired 100 % of the shares in PSW. PSW is a leading player in electrification and shore power, as well as a major supplier of products and services to the offshore and maritime industry. PSW will take a unique position as a leading supplier to the maritime industry with a special focus on supporting the industry's transition to sustainable operations. The transaction will support Scana's strategy to lead the way in the transition to a more sustainable operation in the global maritime industry. Scana will be a total partner for the green shift to players in shipping, offshore, energy and aquaculture. The PSW's revenues in 2021 were NOK 623 million. At the time of the transaction, PSW had 250 employees.

If the acquisition had occurred on 1 January 2022, management estimates that consolidated revenue and loss for the year would not have changed significantly.

CONSIDERATION TRANSFERRED

The following table summarizes the acquisition date fair value of each major class of consideration transferred.

	11.01.2022
Cash	234 085
Seller credit	47 000
Shares in Scana ASA (124 224 737 shares)	173 915
Total consideration transferred	**455 000**

The fair value of the ordinary shares issued was based on the listed share price of the company at 11 January 2022.

IDENTIFIED ASSETS ACQUIRED AND LIABILITIES ASSUMED

The fair value of identifiable assets and liabilities is based on a purchase price allocation. The following table summarizes the recognized amounts of assets acquired and liabilities assumed at the date of acquisition.

	11.01.2022
Deferred tax assets	222
Customer contracts and relationships	46 911
Research and development	17 119
Licences and patents	3 489
Property, plant and equipment	145 358
Right of use assets	430 910
Net working capital	39 936
Deferred tax liability	-22 220
Lease liabilities	-430 910
Net debt	-45 081
Total identifiable net assets acquired	**185 734**

The fair value of the trade receivables amounts to NOK 133.4 million. The gross amount of trade receivables is NOK 143.8 million of which NOK 10.4 million was expected to be uncollectable at the date of acquisition.

GOODWILL

Goodwill arising from the acquisition has been recognised as follows.

	11.01.2022
Total consideration transferred	455 00
– Fair value of identifiable net assets acquired	-185 734
Goodwill	**269 266**

The goodwill-value can be explained by synergies, economies of scale, expectations of future profitability and growth and expectations of better market conditions.

The purchase price allocation and the accounting for the acquisition is final. Therefor there will be no adjustments to the above amounts in subsequent accounting periods.

ACQUISITION OF TRANS CONSTRUCTION

Through PSW Power & Automations AS, Scana ASA signed an agreement to purchase 100 % of the shares in Trans Construction AS based on an equity value of NOK 25 million. The transaction was completed 31 January 2022. The company had 11 employees. By incorporating Trans Construction AS into PSW Power & Automation AS, Scana see potential for synergies and opportunities to step into new markets. The acquisition also forms the basis for increased market shares within modular units for battery systems, hydrogen power systems, shore power systems and E-house modules for offshore wind.

If the acquisition had occurred on 1 January 2022, management estimates that consolidated revenue for the year would have been NOK 916 million, and consolidated loss for the year would have been NOK -43.6 million.

CONSIDERATION TRANSFERRED
The following table summarizes the acquisition date fair value of each major class of consideration transferred.

	31.01.2022
Cash	12 458
Seller credit	12 500
Total consideration transferred	**24 958**

The fair value of the ordinary shares issued was based on the listed share price of the company at 11 January 2022.

IDENTIFIED ASSETS ACQUIRED AND LIABILITIES ASSUMED
The fair value of identifiable assets and liabilities is based on a purchase price allocation. The following table summarizes the recognized amounts of assets acquired and liabilities assumed at the date of acquisition.

	31.01.2022
Deferred tax assets	-27
Property, plant and equipment	600
Right of use assets	6 200
Net working capital	-2 000
Lease liabilities	-6 200
Net debt	21 500
Total identifiable net assets acquired	**20 073**

The fair value of the trade receivables amounts to NOK 7.4 million. The gross amount of trade receivables is NOK 7.4 million and it is expected that the full contractual amounts can be collected.

GOODWILL
Goodwill arising from the acquisition has been recognised as follows.

	31.01.2022
Total consideration transferred	24 973
– Fair value of identifiable net assets acquired	-20 073
Goodwill	**4 900**

The goodwill-value can be explained by synergies, economies of scale, expectations of future profitability and growth and expectations of better market conditions.

The purchase price allocation and the accounting for the acquisition is final. Therefor there will be no adjustments to the above amounts in subsequent accounting periods.

DISCLOSURE 4 | SUBSEQUENT EVENTS

BOARD AND CEO
On 12 January 2023 the board decided to appoint Oddbjørn Haukøy as interim CEO, and that a recruitment process shall be initiated with the aim to identify a permanent replacement as CEO. Chairman of the board Dag Schjerven and the board members Rune Magnus Lundetræ and Marianne Lie have at the same time informed the board that they resign from their positions with immediate effect. The board will, in dialogue with the nomination committee, consider whether an extraordinary general meeting shall be convened to elect new board members.

EQUINOR CONTRACT
On 25 January 2023, Equinor has awarded PSW Technology a three-year contract for maintenance services to the Mongstad refinery. The substantial contract has an annual value of approx. NOK 200 million, or a total of approx. NOK 1.8 billion if the options are fulfilled and the Group has the assignment for the next nine years.

OFFSHORE DEVELOPMENT PROJECT
On 30 March PSW Power & Automation and Trans Construction (ATC) secured a new contract for the design, manufacture, and preassembly of a major e-house module for an Oil & Gas customer. The e-house module will be a part of an offshore development project on the UK sector.

LOI – MOORING SYSTEM
On 30 January 2023, Seasystems was awarded a letter of intent (LOI) for the delivery of a mooring system to a floating LNG terminal in Germany. The letter of intent is entered into with the intension to secure good cooperation in conjunction with a potential contract for a FSRU mooring system. The Group' scope consists of a complete mooring solution including design, analysis, model testing and mooring equipment such as chain, chain stoppers, jacks and winches. The project has been in an engineering phase for the past six months.

DISCLOSURE 5 | GOING CONCERN

The financial statementis prepared based on going concern. The board confirms the going concern assumption is present in accordance with Section 3–3c of the Accounting Act.

The Group achieved a positive EBITDA amounting to NOK 70.6 million compared to NOK 16.7 million last year. Adjusted EBITDA in 2022 was NOK 76.5 million versus NOK 23.7 million last year. See alternative performance measures. The Group's equity amounts to NOK 492.6 million and the liquidity reserve amounts to NOK 112.6 million as of 31 December 2022. The share issue in 2022 related to the PSW transaction and conversion of seller credit were the main factors for the increased equity.

The company is working on several possible projects and has won significant contracts during fourth quarter in 2022 and first quarter in 2023. See disclosure 4. The order backlog is NOK 533 million. The oil price is noted at high level and supply activity has increased at the end of 2022 and into 2023.

The assumption of going concern is based on a strong pipeline into 2023 and a strengthened foundation for further growth.

DISCLOSURE 6 | SEGMENT INFORMATION & REVENUE

SEGMENT INFORMATION
Scana has three business areas being OFFSHORE, ENERGY and MARITIME.
OFFSHORE delivers products, services, and lifetime extensions to several segments of the offshore industries.
ENERGY delivers shore power and energy storage solutions to the ocean industries.
MARITIME delivers mooring solutions to floating structures across the ocean industries and valve control systems to the shipping and offshore industry.
"Scana HQ" includes Scana ASA, some holding companies and Scana Property AS.
The column «Eliminations» applies to eliminations between the segments.

OFFSHORE consists of:	PSW Technology AS, PSW Solutions AS and Subseatec S AB. PSW Technology AS owns 100 % of the shares at PSW Solutions AS and PSW Power & Automation AS.

ENERGY consists of:	PSW Power & Automation AS and Trans Construction AS. PSW Power & Automation AS owns 100 % of the shares at Trans Constructions AS.
MARITIME consists of:	Seasystems AS, Skarpenord AS and Scana Valve Control AS. Scana Valve Control AS owns 100 % of the shares at Skarpenord AS, 49 % of the shares at Scana Korea Hydraulic Ltd., and 49 % of the shares at Scana do Brasil Ltd.
Scana HQ consists of:	Scana ASA, Scana Trading AS, Scana Property AS, Scana Energy Holding AB, PSW Holding I AS and Scana do Brasil Ltd. Scana ASA owns 100 % of the shares at Scana Trading AS, Scana Property AS and Seasystems AS and PSW Holding I AS. Scana Trading AS owns 100 % of the shares at Scana Energy Holding AB, Scana Valve Control AS and 51 % of the shares at Scana do Brasil Ltd. Scana Energy Holding AB owns 100 % of the shares at Subseatec S AB. PSW Holding I AS owns 100 % of the shares at PSW Technology AS.

The presentation coincides with the internal reporting to the board. Revenue from sales to external customers and transactions with other segments are reported for each business areas and inter-segment pricing is determined on an arm's length basis. The following summary describes the operations of each reportable segment.

2022 *(NOK million)*	OFFSHORE	ENERGY	MARITIME	Scana HQ	Elimination	Total
External revenue	357.7	353.0	200.9	0.0	0.0	911.7

PERFORMANCE OBLIGATIONS

Information about the Group's performance obligations are summarised below:

SERVICE- AND MAINTENANCE CONTRACTS

Service and maintenance contracts are time and materials contracts and fixed-price contracts. Each individual contract is normally considered as a separate performance obligation and revenue is recognised over time to depict the delivered time and materials. For contracts with significant fixed-price elements an input method is used to measure the progress of the project, which is the basis for recognizing revenue over time. Invoices are issued according to contractual terms and are usually payable within 30 days.

POWER SYSTEMS

Shore power systems and energy storage systems. For Power systems, the customer controls all of the work in progress as the products are being manufactured. This is because under those contracts the systems are made to a customer's specification and if a contract is terminated by the customer, then the Group is entitled to reimbursement of the costs incurred to date, including a reasonable margin.
Invoices are issued according to contractual terms and are usually payable within 30 days.
Revenue is recognised over time based on the cost-to-cost method. The related costs are recognised in profit or loss when they are incurred. Advances received are included in contract liabilities.

FORGED GOODS
Forged goods to the oil and gas industry. The goods are customized based on customers' requirements and are sold as bundled goods. The goods are considered as a single performance obligation as the components are not separately identifiable.
Revenue for these performance obligations is recognized over time based on the progress towards complete satisfaction of the performance obligation. Progress in the projects is measured according to the input method.

VALVE CONTROL SYSTEMS
Valve control systems to the marine and offshore industry, which consists of several components but can only be used by the customer as a complete unit. The revenue is recognized over time where the transaction price is allocated to a performance obligation based on the input method and when control is transferred to the customer. Contracts do normally have fixed prices. Variation orders is included in the project when it is signed. The customers pay advances based on milestones defined in the contract.

SEASYSTEM-SOLUTIONS
Innovative system solutions within anchoring and turrets for floating production and storage ships, aquaculture units and offshore wind. The systems linked to offloading are customized based on hose reels requirement specification from the customer who has no alternative use. The same assessments are made in relation to anchorage and turret. The revenue is recognized over time where control is transferred to the buyer which coincides with the progress of the projects measured according to the input method. In the contracts with the customers the company has the right to be compensated for incurred costs and margin if the customer cancels the contracts.
Contract deliveries where the revenue is recognized over time are often entered into with milestone invoicing such as due after 30 to 90 days.

SALE OF EQUIPMENT AND SPARE-PARTS
This revenue type involves sale of products or equipment that are of a standard nature, not made according to the customer's specifications. Customers usually obtain control of these products when the goods are delivered to the customers in accordance with the contract terms. The Group has assessed that the performance obligations for such products are satisfied at a point in time, and revenue from these performance obligations is recognised at that point in time.

DISCLOSURE 7 | INVESTMENT IN ASSOCIATED COMPANY/ INVESTMENT IN SHARES

SCANA KOREA HYDRAULIC LTD.
The Group owns 49 % of the shares in Scana Korea Hydraulic Ltd through Scana Valve Control AS. Scana Korea Hydraulic Ltd is involved in the sale and production of hydraulic valve control systems. The company is located in Busan in South Korea and is part of the MARITIME segment.

Income from interests in associated is presented on separate row in income statement for current and last year. It is representing a reclassification from previous year due to the Group consider the profit is not a part of financial income and expenses in the income statement.
The reclassification has been made in order to improve the user's understanding of the Group's financial performance. The change has no impact on net result or equity, and the change has been implemented retrospectively.

The options can be exercised in connection with the reporting of the quarterly reports indicated in the table above. The exercise period is two weeks after the quarterly report is published at Oslo Børs.
The options linked to plan 1a are earned in the period from the award date to the vesting date, which is 21.06.2019–30.06.2020.
The options linked to plan 1b are earned in the period from the award date to the vesting date, which is 21.06.2019–30.06.2021.
The options linked to plan 1c are earned in the period from the award date to the vesting date, which is 21.06.2019–30.06.2022.

Options that have not been exercised (cf. plan 1a, 1b and 1c) can be exercised through plan 1d on 30 June 2023 at a strike price of 1.464. The exercise can take place after the publication of the second quarter report of 2023 and the following two weeks.
The CFO entered into an option agreement a year later and can exercise the options on the same terms a year later than the other participants.

Resigned CFO Kjetil Flesjå left the company with effect from 30 November 2020. He has retained his allocated options with associated rights.

No shares or other instruments have been allocated in connection with remuneration to leading persons.
No options have been exercised in 2022.

The options can be exercised in connection with the reporting of the quarterly reports indicated in the table above. The exercise period is two weeks after the quarterly report is published at Oslo Børs.

The options linked to plan 1a are earned in the period from the award date to the vesting date, which is 24.01.2022–30.06.2023.
The options linked to plan 1b are earned in the period from the award date to the vesting date, which is 24.01.2022–30.06.2024.

Options that have not been exercised (cf. plan 1a) can be exercised through plan 1c on 30 June 2024 at a strike price of 1.47. The exercise can take place after the publication of the second quarter report of 2024 and the following two weeks.
The options linked to plan 1d are earned in the period from the award date to the vesting date, which is 24.01.2022–30.06.2025.

Options that have not been exercised (cf. 1a and 1b) can be exercised through plan 1e until 30 June 2025 at a strike price of 1.544. The exercise can take place after the publication of the second quarter report of 2025 and the following two weeks.

No shares or other instruments have been allocated in connection with remuneration to leading persons. No options have been exercised in 2022.

BOARD REMUNERATION

The board of Scana ASA was paid TNOK 1,125 in fees in 2022 and TNOK 31 to the election committee. Board remunerations are paid annually in arrears and apply for the period from the ordinary general meeting 2021 to the ordinary general meeting 2022. Fees in arrears for the board elected in May 2021 with a term of office until May 2022 are specified below. A new board was elected at an extraordinary general meeting in December 2022. In addition, three board members stepped down from the board in January 2023.

Name	Position	Active period	Remuneration paid out in 2021	Remuneration paid out in 2022
Dag Schjerven	Chairman of the board	May 2018 – Jan 2023	300	300
Morten Blix	Deputy chair of the board	Jan 2022 – Dec 2022	–	90
Espen S. Berge	Deputy chair of the board	May 2020 – Jan 2022	225	135
Marianne Lie	Board member	May 2016 – Jan 2023	200	200
Margaret Elin Hystad	Board member	May 2018 – Dec 2022	200	200
Rune Magnus Lundetræ	Board member	May 2021 – Jan 2023		200
	Former board member	May 2020 – Dec 2021	200	
Total remuneration			**1 125**	**1 125**

VALUATION METHOD

In connection with determining the value of the option program, a binomial option pricing model has been used. It is assumed that a "geometric Brownian motion" model as a price model, which is the most widely used price model in financial mathematics, can be used to generate future share prices.
The risk-free interest rate is in accordance with Norges Bank's interest rate at the time of the award. Risk-free interest is interpolated over the accrual period. The volatility is based on trades made in the share in the past five years, which is 97 %. Dividend is not considered.

Based on simulations, this gives an indicative option value of NOK 5.2 million according to option program from 2019. The same method is used for an option program announced January 2022 which gives NOK 10.5 million.
In both option programs, it is assumed that no one who has been granted options will end the vesting period and that everyone will redeem the options after 36 months.

The value of granted options is accrued over the period in which the employees acquire the right to receive the options. In 2022, NOK 3.8 million was recognized as a cost the option program in accordance with the vesting period.

DISCLOSURE 10 | PENSION

According to Section 7–30a of the Accounts Act, companies in Norway are obliged to have an occupational pension scheme according to the Mandatory Occupational Pensions Act and the companies have a pension scheme that meets the requirements.

PERFORMANCE PLAN IN NORWAY

The Norwegian companies within the Group are covered by an AFP scheme. The number of employees covered by the scheme is 368 people as of 31 December 2022 (2021: 83 people).

From an accounting point of view, the scheme is to be regarded as a benefit-based multi-enterprise scheme. The Group is unable to identify its share of the scheme's underlying financial position and result with a sufficient degree of reliability, and on this basis the scheme is accounted for as a deposit scheme. This means that obligations from the AFP scheme are not entered in the balance sheet. Premiums for the scheme are expensed when they accrues.

DEPOSIT PLAN IN NORWAY

Companies in Norway have deposit plans. The contribution plans cover all employees over the age of 20 in more than 20 % positions. The deposits amount to 4.5–5 % of annual salary between 0–7. 1G and 8 % between 6G–12G. The pension funds are invested in funds administered by an insurance company and managed by the employee. As of 31 December 2022, there were 361 members of the schemes (2021: 75 members).

Prepaid pension cost is entered in the statement of financial position as a long-term receivable and the liability is entered in the balance sheet as a long-term liability.

	2022	2021
Prepaid pension cost 31.12.	1 883	2 025
Balance sheet pension obligation 31.12.	1 883	2 025

PENSION SCHEMES IN SWEDEN

There are two pension schemes in Sweden, an ordinary defined contribution scheme and a multi-company benefit scheme which is accounted for as a defined contribution scheme.
The benefit plans are organized as joint plans for several employers (multi-employer plans) and are insured in Alecta. Necessary information to be able to account for the benefit schemes as benefit plans is not available. For that reason, the Group has accounted for the scheme as a deposit scheme.

The reason why there is insufficient information to be able to account for the scheme as a defined benefit scheme is that Alecta does not have information about the distribution of the accrual of pension rights between the various employers and therefore does not have the opportunity to make an accurate and reliable distribution of assets and liabilities to the respective employers. Furthermore, Alecta does not have a set of regulations for how any surplus or deficit that arises is to be handled. For that reason, the Group has accounted for the scheme as a deposit scheme.

The Group's expected contribution to the benefit scheme in 2022 in Alecta is estimated by Alecta at NOK 0.7 million (estimate for 2021 was NOK 1.2 million). The multi-company benefit scheme covers 9 out of 9 employees (2021: 9 out of 9 employees).

The collective funding ratio measures the distribution of assets in relation to the insurance commitment. The insurance commitment consists of guaranteed commitment and distributed bonus to insured and policyholders, calculations based on Alectas insurance technical methods and expectations, which differs from the methods and expectations used in the valuation of defined benefit pensions in accordance with IAS 19.

According to Alecta's funding policy for defined benefit pensions, the level of the collective funding ratio can vary between 125 and 155 percent. If the level deviates from the normal level, measures must be taken to bring the funding ratio back to the normal level. In the case of a low degree of financing, one measure could be to increase the agreed price for new subscriptions and extend the existing benefits. In the event of a high degree of financing, one measure may be to introduce premium reductions. Alecta's funding ratio at the end of 2022 was 172 % (2021: 172 %).

THE OVERVIEW BELOW SHOWS SCANA'S PARTICIPATION SHARE PER	31.12.2022	31.12.2021
The Group's share of the total savings premium for ITP 2 in Alecta *	0.00153 %	0.00269 %
The Group's share of the total number of assets insured in ITP 2 **	0.00235 %	0.00227 %

** Refers to average for the whole year*
*** Refer to the average for the last month*

To the extent that the necessary information becomes available, and the arrangements must be accounted for as performance plans in accordance with According to IAS 19, this could have an effect on the consolidated accounts.

Deferred tax assets capital expansion	5 747	0
Closing balance, net deferred tax assets	**52 373**	**57 394**

Deferred tax assets not recognized in the balance sheet was NOK 20.2 million, and NOK 19.9 million was linked to segment Scana HQ.
As of 31 December 2022, the tax loss to be carried forward in Norway is NOK 364.3 million (2021: NOK 270.7 million). In Sweden, the tax loss carried forward is MNOK 9.1 as of December 2022 (2021: MNOK 9.8). There are no restrictions on the right to carry forward tax losses.

The business in Sweden delivers positive results, while the Norwegian businesses in total deliver negative results before tax. Management considers it likely that tax losses will be used in connection with companies in Norwegian operations. This is based on expected future cash flows and builds on the same assumptions used in the impairment tests. This is also supported by several new contracts won in fourth quarter 2022 and I first quarter 2023 which are expected to contribute with increased future taxable income. The taxable loss is recognized in the statement of financial position as a deferred tax assets in the operating businesses and a part of it in Scana ASA.

In this connection, the company considers that there is sufficient taxable income in future periods, adjusted for net temporary differences with future taxable income. Taxable amounts arising from tax-reducing temporary differences expected to arise in future periods are disregarded. See also mention in disclosures 2 and 12 relating to impairment test.

In 2022, deferred tax assets were recognized in the statement of financial position, which positively affects the income statement of NOK 11.3 million.

IMPAIRMENT TESTS – DESCRIPTION OF METHOD

The Group tests assets, per cash-flow-generating unit ("CGU"), for impairment annually or more frequently if there are indicators of impairment. Scana assesses various impairment indicators, including the ratio between market value on the Oslo stock exchange and book value of equity, market development, lower than expected earnings and changes in market interest rates.

As of 31 December 2022, the market value of the company is higher than the book value of the equity, which does not indicate a possible need for impairment of assets, including goodwill, intangible assets, right-of-use assets, fixed assets and other assets in the various CGUs. Two of the cash flow-generating units has booked goodwill based on the acquisition of PSW and Trans Construction. There is no need to make an impairment.

Some of the CGU has experienced better growth in the market than predicted in previous impairment tests, but offshore has experienced weaker turnover than expected.

In the impairment tests, the value in use is calculated based on the discounting of expected future cash flows by a discount rate shown in an overview on next page. The discount rate is based on risk free interest and external source Damodaran. The cash flows are based on the budget and business plans established by the management for the period 2023–2027. The estimates are based on an approach for budgeting the various cash-generating units. For the following period, the model is based on a terminal connected with a growth rate that reflects long-term inflation expectations. The income is based on concluded contracts, information about the potential for new agreements and an assumption about the development of the price in the market. The estimated operating margin in the period increases based on expectations of a positive market development and that the cost measures have an effect. The cash flows linked to the lease agreements are included as part of the investments. The total investments linked to all operating assets are maintained at the same level as the current depreciation in the future cash flows. In assessment of climate related costs, the Group has not incorporated any significant costs in the future cash flow

according to value in use connected to intangible assets, equipment, plant and machinery or right of use assets. The Group will monitor new regulations according to climate related costs and take this into account when it has been approved. The Group recognizes impairment in the result if the value in use is lower than the book assets for the cash flow generating unit. Impairment indicators have been identified for CGU.

The impairment tests have been prepared based on the method and principles discussed above.

CGU-OFFSHORE
CGU-OFFSHORE consists of PSW Technology and PSW Solutions. The CGU has performed lower activity and profit in current year than expected. There is identified an impairment indicator for this CGU on the balance sheet date.
The impairment test of goodwill and other intangible assets are carried out in accordance with requirements in IAS 36.
The value in use has been used to determine recoverable amount. The calculations are based upon estimated future cash flows for the cash generating unit, OFFSHORE. The estimated future cash flows are based upon budgets and long-term profit goals covering a five-year period. In assessing future cash flow for next five years current tender activities and short-term prognosis has been supplemented with the long-term business plan. There has been a delay in revenue generating in 2022 that is expected to catch up in the next few years as the oil service market is expected to be strong. A strong order backlog going into 2023 further backed significant contract award described in disclosure 4 provides support for strong revenue growth. With the expected increase in revenue the operating margins will increase significantly due to economies of scale from the CGU's facilities which have surplus capacity. The key uncertainty is the timing and extent of contract awards. The cash flows are based on the management and the board's best estimate.

Per end of December 2022 estimated cash flow supports the book values in the CGU, and there is no need for an impairment.

CGU-ENERGY
PSW Power & Automation together with Trans Construction is defined as a cash generating unit (CGU-ENERGY). These companies were purchased in 2022 and the Group has booked a corresponding goodwill in the statement of financial position. Scana Group measures the goodwill once a year unless there are impairment indicators.

The Group performed an impairment test of goodwill and other intangible assets in accordance with requirements in IAS 36. The value in use has been used to determine recoverable amount. The calculations are based upon estimated future cash flows for the cash generating unit, ENERGY. The estimated future cash flows are based upon budgets and long-term profit goals covering a five-year period.

Continuing high energy prices are expected to keep demand strong for service offering and new projects. Based on this Scana considers the market outlook for the CGU as strong. Operating margins has been negatively impacted by disturbance in supply chain in 2022 and challenges in a few projects. During fourth quarter ENERGY has won several contracts and has improved the order backlog which is NOK 193 million end of December 2022. It confirms the strong position ENERGY has in the market. ENERGY assumes an expected growth in activities and future revenues. The operating margin is also expected to increase the next five years. The cash flows are based on the management and the board's best estimate. Per end of December 2022 estimated cash flow supports the book values in the CGU, and there is no need for an impairment.

KEY ASSUMPTIONS	ENERGY	OFFSHORE
Average operating margin for the next five years	10.4 %	5.9 %
Discount rate (nominal before tax)	9.7 %	10.8 %
Average growth rate per year 2023–2027	9.1 %	29.6 %
Growth rate per year after 2027 (nominal)	2.0 %	2.0 %
Functional currency	NOK	NOK
Value in use	361 840	235 119
Headroom	121 648	106 893

SENSITIVITY ANALYSIS

Sensitivity analysis related to the impairment test, test for reasonable changes in the key assumptions. For example, a decrease in the operating margin (other assumptions unchanged) at ENERGY by 1.0 % points the recoverable amount will reduce by NOK 53.8 million. If the operating margin increases by 1.0 % points (other assumptions unchanged), the recoverable amount will increase by NOK 53.8 million. An increase in the discount rate before tax by 1.0 % points will reduce the recoverable amount by NOK 68.4 million, correspondingly a reduction by 1.0 % points will increase amounting to NOK 90.1 million. No reasonable possible changes will lead to an impairment based on this sensitivities.

SENSITIVITY	CHANGE	ENERGY	OFFSHORE
Operating margin for the next five years	+1.0 %	53 802	95 461
Operating margin for the next five years	-1.0 %	-53 802	-95 461
Growth rate per year 2023–2027	+1.0%	37 470	15 112
Growth rate in terminal	+1.0 %	59 567	24 006
Discount rate (nominal before tax)	+1.0 %	-49 438	-50 880
Discount rate (nominal before tax)	-1.0 %	61 986	61 970

DISCLOSURE 13 | RIGHT OF USE ASSETS

RIGHT OF USE ASSETS

All right of use assets presented in the table below relate to premises, machines and cars. The right of use assets are depreciated on a linear basis over the fixed lease period, with the exception of a machine which is depreciated over its economic life. As of 31 December 2022, the Group has assessed that it is certain that the options relating to the extension of lease agreements will not be exercised. In connection to right of use, read disclosure 2 for critical accounting judgement.

Depreciation period for machines, fixtures and similar:

- *3–5 years are used for office equipment and IT equipment*
- *10–15 years are used for production equipment and production machines*

Fixed assets are pledged so there are restrictions on disposal. This applies to companies in Norway and Sweden. Book value of pledged operating assets is NOK 143.7 million as of 31 December 2022 (31.12.21: NOK 11.8 million). See disclosure 24 relating to the mention of lease agreements and disclosure 13 right of use assets.

The calculation of the recoverable amount for the write-down is assessed at level 3 according to the valuation hierarchy.
At the end of December 2021, NOK 6.0 million has been transferred to machinery which has been classified as a right of use past years.

DISCLOSURE 15 | INVENTORIES

	2022	2021
Raw materials	25 341	21 218
Semi-finished products and work in progress	37 509	-12 125
Finished goods	3 110	4 262
Total	**65 960**	**13 355**
Provision for obsolescence as of 31.12.	6 811	3 766
This year's change in provision for obsolescence	3 045	441
Total pledged inventories	65 960	13 355

A continuous assessment of specific obsolescence is made. The inventory is provided as security for borrowings.

DISCLOSURE 16 | TRADE RECEIVABLES

	2022	2021
Trade receivables – denomination	159 405	38 584
Trade receivables associated companies	1 843	1 193
Provision for losses on trade receivables	-427	-43
Total	**160 821**	**39 734**
Loss recognized in profit and loss on receivables	0	337
Loss recognized in profit and loss on receivables, including changes in provisions	382	337

AGING SUMMARY	***2022***	***2021***
Trade receivables not due	123 607	31 565
0–30 days	14 557	7 148
31–60 days	6 415	572
61–90 days	559	378
More than 90 days	16 110	115
Total trade receivables	161 248	39 777

Provision for potential losses on receivables is based on individual assessments of each individual item. See disclosure 20 related to changes in loss provisions.

CONTRACTS
The table below shows revenue and costs that are recognized over time related to contracts that have not been completed and delivered at the time of the statement of financial position. Several of the contracts have a completion time of more than a year.

	2022	2021
Revenue recognized over time related to contracts	421 040	258 821

	2022	2021
Invoiced revenue related to contracts (milestones)	418 876	257 193
Contract assets	125 304	18 818
Contract liabilities	111 997	15 700

Remaining revenue connected to contract assets and contractual obligations are NOK 532.9 million as of 31 December 2022 (2021: NOK 77.6 million) and are expected to be delivered during 2023. Ongoing projects portion of order backlog is 82 % and 18 % has not yet been started on balance date.
All ongoing projects in beginning of 2022 have been delivered.

Contract assets and contract liabilities have been reduced in 2022 and are linked to projects that have been completed and that customers have paid advances in connection with milestone invoicing. Contract assets are offset against contract liabilities based on progress in the projects linked to each individual contract.

DISCLOSURE 20 | FINANCIAL RISK

The Group is exposed to the following financial risks:

- Market risk
- Credit risk
- Liquidity risk

This disclosure provides information about exposure to each of the above-mentioned risks as well as goals, principles and processes for measuring and managing risk, and the Group's capital management. More quantitative information is included elsewhere in the consolidated accounts.

The board of directors has overall responsibility for establishing and monitoring the Group's risk management framework.
Risk management principles have been established in order to identify and analysis the risks to which the Group is exposed, to stipulate limits on risk and pertaining control procedures, and to monitor risk and compliance with the limits. Risk management principles and systems are reviewed regularly to reflect changes in activities and market conditions.

MARKET RISK

Market risk is the risk that fluctuations in market prices, e.g. exchange rates and interest rates, will affect future cash flows or the value of financial instruments. Market risk management aims to ensure that risk exposure stays within the defined limits, while optimising the risk-adjusted return.

Scana has a centralized finance function. Hedging of currency and interest rate exposure is done in accordance with the Group's policy and routines. Scana seeks to reduce the risk associated with currency and interest rates by using hedging instruments. This is done centrally by the finance department on the basis of the exposure reported by the operational units.

CURRENCY RISK
The Group is exposed to transactional foreign currency risk to the extent that there is a mismatch between the currencies in which sales, purchases, receivables and borrowings are denominated and the respective functional currencies of Group companies. The Group's management continuously monitors and reports on the Group's currency positions. The Group's risk management policy is to hedge material estimated foreign currency exposure in respect of forecast sales and purchases over the following 12 months at any point in time. The Group uses forward exchange contracts to hedge its currency risk, most with a maturity of less than one year from the reporting date.

SENSITIVITY ANALYSIS – CURRENCY
The table below shows the sensitivity analysis related to currency risk. Tax effects are not considered in the calculations. A reasonably possible strengthening (weakening) of NOK against all other currencies on 31 December would have affected equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant. EUR currency has a portion of 82 % in the sensitivity analysis. In addition the Group has USD, GBP and SEK currencies at balance date.

	Changes in currency NOK	Impact resultat before tax	Impact other comprehensive income
2022	5 %	10 399	(3 050)
	-5 %	(10 399)	3 050
2021	5 %	2 228	(3 139)
	-5 %	(2 228)	3 139

INTEREST RATE RISK
Scana has no interest rate hedges on the balance sheet date.
The Group's interest rate risk relates to the Group's debt portfolio and cash equivalents is managed at Group level. The Group's objective is to secure and counteract major effects from changes in the market interest rate.

SENSITIVITY ANALYSIS – INTEREST RATE
The table below shows the sensitivity analysis related to interest risk. A reasonably possible change of 100 basis points in interest rates at the reporting date would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency exchange rates, remain constant.

	Change in interest rate	Impact result before tax	Impact other comprehensive income
2022	1 %	(1 483)	(1 483)
	-1 %	1 483	1 483

LIQUIDITY RISK
Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities under normal and conditions.
The Group works continuously to reduce liquidity risk through monitoring and active dialogue with the subsidiaries.

See disclosure 23 for more information on the Group's bank loans as of 31.12.2022.
For more information read disclosure 22 according to Group's cash and cash equivalents as of 31.12.2022.

The Group has a bank balance as of 31.12.22 of NOK 2.6 million and unused drawing facilities amounting to NOK 110 million.

EXPOSURE TO LIQUIDITY RISK
The following are the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted and include contractual interest payments.

	As of 31.12.22	2023.Q1	2023.Q2	2023.Q3	2023.Q4	2023	2024	2025

Total outflow (payments)		-22 448	-2 018	-2 010	-39 648	-7 190	-6 814	-4 582

CREDIT RISK
Credit risk is the risk of financial losses in the event that a customer or counterparty in a financial instrument is unable to meet its contractual obligations. Credit risk relates usually to the Group's trade receivables, contract assets and cash and cash equivalents. The Group's exposure to credit risk is mainly the result of individual factors relating to each individual customer. The demographics of the customer base, including the risk of default of payment in the industry and the country in which the customers operate, have less influence on the credit risk.
The Group has guide lines to ensure that orders are not entered into with customers who have significant problems with payment and that outstanding amounts do not exceed established credit limits. In practice, this is done with credit assessments before contracts are entered into.
In addition, Scana enters into larger customer contracts with advance payments (20 %–30 %) or milestone invoicing throughout the entire project progress.

The Group regards its maximum credit risk exposure to the carrying amount of trade receivables and contract assets.

Historically, losses on trade receivables and contract assets have been limited.

AS OF 31.12.22	Disclosure	Gross assets	Expected loss within 12 months	Expected loss portfolio	Expected loss individual	Provision for loss on receivables	Net assets
Trade receivable	*16*	161 248	-427	-427		-427	160 821

DISCLOSURE 21 | FINANCIAL INSTRUMENTS

HEDGING CURRENCY RISK

As a proportion of the Group's sales take place in foreign currency, Scana is exposed to fluctuations in exchange rates in the period from the conclusion of the sales contract until the final payment from the customer. In addition, there are risks associated with future payments in foreign currency. When Group's hedging the net cash flow based on the individual currencies, forward contracts are entered which correspond to a proportion of the expected future payments.

CURRENCY DIFFERENCES	2022	2021
Changes in currency differences carried over other comprehensive income	0	0
Relassified from other comprehensive income	0	-566
Effect on profit as a result of reclassification from other comprehensive income	0	566

Listed below is a summary of all open currency contracts as of 31.12.22:

CURRENCY	Net	Denomination	Maturity period	Unrealized gain/loss (–)
USD	sale	-5 010	2023	-1 971
SEK	sale	-49 380	2023	1 647
SEK	sale	-17 550	2024	615
Total				**291**

Listed below is a summary of all open currency contracts as of 31.12.21:

CURRENCY	Net	Denomination	Maturity period	Unrealized gain/loss (–)
USD	sale	-2 000	2022	84
EUR	sale	-500	2022	-967
Total				**-883**

CLASSIFICATION OF FINANCIAL ASSETS

In accordance with IFRS 9, the Group classifies financial assets based on the business model where they are managed based on contractual cash flows. The main categories of financial assets according to IFRS 9 are amortized cost, fair value classified as other comprehensive income and expenses and fair value presented in profit and loss.

In accordance with the loss model, the Group recognizes expected losses over the lifetime of financial assets that are measured at amortized cost, debt instruments that are measured at fair value over other income and costs and contract assets. The Group assesses expected losses related to financial assets over their lifetime.

DETERMINATION OF FAIR VALUE

The fair value of forward currency contracts is determined by using the closing rate on the balance sheet date adjusted for an interest addition or deduction based on the interest rate difference between the respective currencies. For forward exchange contracts, the present value of the cash flow is taken as a starting point. The fair value of cash, overdrafts and other interest-bearing debt is considered to be approximately equal to the value on the statement of financial position, as these have a short maturity and thus provide a floating interest rate that is adjusted in line with changes in the general interest rate level. Similarly, the fair value of trade receivables and trade payables is assumed to be equal to the book value as both items have a short maturity and are entered into under normal conditions.

The table below shows how the various financial instruments are categorized cf. IFRS 7 as of 31 December 2022.

						2022	2021
	Disclosure	**Fair value hierarchy**	**Fair value profit & loss**	**Fair value – other comprehensive income**	**Amortized cost**	**Total**	**Total**

FAIR VALUE – VALUE HIERARCHY

Scana uses the following hierarchy when assessing and presenting the fair value of the financial instruments.

Level 1: Listed prices (unadjusted) in active markets for identical assets and liabilities.

Level 2: Input other than quoted prices from active markets included in level 1, which are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices). To calculate the value of open foreign exchange contracts, it is obtained from Norges Bank on the closing date. Valuations also include valuations based on market-confirmed inputs. Market-confirmed input data is input data determined through mathematical or statistical methods, such as correlation or regression analysis, where input data in the analysis and/or results can be confirmed against observable market data. If such an analysis is to be used for the purpose of financial reporting, the statistical goodness of the analysis should be assessed based on usual statistical criteria and predictive ability.

Level 3: Input for the asset or liability that is not based on observable market data.

The table above shows the valuation hierarchy for fair value disclosures for assets and liabilities. In 2022, there has been no transfer between level 1 and level 2 in the assessment of fair value, and no transfers into or out of level 3 in the assessment of fair value.

CAPITAL STRUCTURE AND EQUITY

The main purpose of the Group's composition and management of debt and equity is to ensure headroom to the tasks the Group and subsidiaries face in the short and long term. The Group should have a reasonable credit rating, and thus competitive loan conditions with lenders to Scana business. Through good capital management of equity and debt, the Group will support the business that is run, and thus contribute to increasing shareholder value.

The Group must have sufficient liquid funds and drawing options for financing operational activities. This takes place through targets for ongoing operations and capital management. The Group manages the capital structure and make necessary changes based on an ongoing assessment of market and financial risk and those financial prospects seen in the short and medium term refer to disclosure 23. Reference is made to the section liquidity risk in disclosure 20 related to the company's financial position.

DISCLOSURE 22 | CASH AND CASH EQUIVALENTS

BANK DEPOSISTS	2022	2021
Ordinary bank deposits	2 647	28 992
Total	**2 647**	**28 992**

RECONCILIATION BETWEEN BANK DEPOSITS AND LIQUIDITY IN THE CASH FLOW STATEMENT	2022	2021
Bank overdraft	0	-101
Ordinary bank deposits	2 647	28 992
Cash and cash equiv. at end of period	2 647	28 891

The Group has a bank deposit as of 31 December 2022 which amounts to NOK 2.6 million. In the table above relating to liquidity, cash withdrawals are included as discussed in disclosure 23. The Group has an unused overdraft limit of NOK 110 million per 31 December 2022. The total liquidity reserve that can be used by the Group was as of 31 December 2022 NOK 112.6 million (31 December 2021: NOK 68.8 million). The Group has a cash pool arrangement.

The Group has no restricted funds as of December 2022 and all disclosed cash and cash equivalents are available.

Bank guarantees have been issued according to tax deductions, which as of 31 December 2022 was NOK 14.6 million.

DISCLOSURE 23 | LOANS AND BORROWINGS

2022	Nominal interest rate	Current	Non-current	Maturity date
Bank loan	NOWA + 3.5 %	20 000	129 709	
Accrued interests		2 214		
Total interest bearing debt		22 214	129 709	

2021	Nominal interest rate	Current	Non-current	Maturity date
Bankoverdraft	NIBOR + 3.25 %	101		09.10.2022
Shareholder loans	12 % (PIK)	37 638		10.10.2022
Accrued interests		514		
Total interest bearing debt		38 253	0	

BANK OVERDRAFT

The financing is linked to an overdraft facility of NOK 110 million and a bank guarantee facility of NOK 60 million. It is a rolling draft facility with annual renewal for the next time on 09.10.2023.

There are certain financial covenants to the loan agreement shown in the overview below:

COVENANT	2022.Q4	2023.Q1	2023.Q2	2023.Q3	2023.Q4 -->
Covenant EBITDA	**11 400**	**22 300**	**37 900**	**66 100**	**NA**
Covenant NIBD/EBITDA	NA	NA	NA	NA	2.5x
Covenant equity ratio	30 %	30 %	30 %	30 %	30 %
Borrowing base	70%	70 %	70 %	70 %	70 %

Capital expenditure should not exceed NOK 29 million, measured annually from 2023. In addition to financial covenants mentioned above, the contract contains other covenants considered common for similar contractual relationships. This includes limitations on acquisitions, disposals, change of control and conditions related to continued listing. The Group was in compliance with the loan terms as of 31 December 2022.

SHAREHOLDERS LOAN

In connection with the refinancing in 2021, a new agreement was entered where the maturity date is set to 1 day after maturity overdraft. In 2021, accrued interest has been added to the principal and amounts. In January 2022 connected to PSW transaction the shareholders loan was partly repaid to the shareholders and the remaining part was converted to equity. End of December 2022 there is no shareholder's loan.

COST OF LOAN

When the new facilities were established, DNB charged the company for establishment costs of the facilities and constitute actual costs for each of the facilities. The method used is amortized cost when the cost is expensed in the result during the borrowing period. The borrowing cost is presented on the row for accrued interest costs.

CHANGE IN LIABILITIES RELATED TO FINANCING ACTIVITIES

The overview below shows the change in liabilities due to financing activities in 2022 and where the changes take effect.

	CASH FLOW STATEMENT										
	31.12.21	Proceeds from LT and ST borrowings	Payments of borrowings	Interests	Payments of leasing liabilities	Changes in cash and bank	Profit and loss	Proceeds from issue of new share capital	Net New leasing liabilities and disposals	Currency differences	31.12.22

Paid interest leases apply to statement of financial position leases. Interest payments include costs associated with establishing the financing. Increased liability is linked to new lease agreements and interests added to the principal of the shareholders loan.

DISCLOSURE 24 | LEASE LIABILITIES

The Group rents premises at all businesses. These leases have a lease period of one to eight years. There are opportunities to extend some of these leases by up to five years. Fixed rental period covers the company's needs and provides the necessary flexibility. The rental period is based on best judgment and best estimate with regard to probable length.

A major part of the lease agreements has a fixed length. The lease is based on the company's strategy and the desire for flexibility regarding future leases.

Leased machines are mainly smaller machines and equipment. Examples of machinery and equipment

are the hire of trucks and copiers, which represent greater value. Lease agreements relating to the trucks are for up to eight years.

Cars are rented normally over a period of three years and are returned to the lessor at expiry date. The leases can be extended by two years, but this is not practiced. Options are therefore not included in the lease liabilities.

Total lease liabilities are measured at the present value of future rental payments with the exception of common services and costs. The Group has used a weighted average linked to the marginal interest rate for each of Group's at the time of recognition. The following marginal interest rate is used; for machinery and equipment 5–6 %, for cars 5 % and premises 5 %. The interest rate is connected to the marginal interest rate reflects the level linked to loan conditions when financing similar assets. The company has used common marginal interest for each portfolio of leases relating to usufruct assets with matching properties.

Lease agreements with a remaining period less than twelve months and agreements with a low value are not recognised as lease liabilities. Direct costs such as services linked to operating assets with right of use are excluded when the present value of right of use assets is calculated. See disclosure 1 regarding lease liabilities for further discussion.

LEASE LIABILITIES

The Group has entered into lease agreements connected to buildings, properties, machines, premises and other facilities with a remaining lease period of one to ten years. The agreements do not contain restrictions on the company's dividend policy or financing options. The table below shows rental obligations entered in the balance sheet as of 31 December.

CHANGES IN LEASING LIABILITIES	2022	2021
Opening balance leasing liabilities 01.01.	7 964	10 402
New leasing liabilities	458 102	1 348
Disposal of leasing liabilities	-109	0
Currency differences	-27	-55
Interests	24 723	590
Payments	-78 510	-4 321
Ending balance leasing liabilities 31.12.	412 143	7 964

PROFIT AND LOSS ITEMS RELATED TO LEASE AGREEMENTS	2022	2021
Depreciation for the year continued operations	62 922	3 300
Interests costs	24 723	587
Short-term leases – not accounted for as liabilities	398	918
Lease of low value assets – not accounted for as liabilities	546	39
Variable part related to leasing liabilties	72	0
Total profit items	**88 661**	**4 844**

LEASING LIABILITIES CASH FLOW	2022	2021
Payments related to leasing liabilities - installments	-53 787	-3 731
Payments related to leasing liabilities - interests	-24 724	-590
Short-term leases – not accounted for as liabilities	-398	-918
Lease of low value assets – not accounted for as liabilities	-546	-39
Variable part related to leasing liabilties	72	0
Total outflow cash for all leasing liabilties	**-79 383**	**-5 278**

Rental expensed during 2022 is NOK 28.2 million. The table below shows the company's future non-discounted payment flows linked to the lease liabilities in the balance sheet as of 31 December 2022.

MATURITY ANALYSIS COMMENCED LEASES	2022	2021
Within one year	76 167	3 541
Between one and two years	70 358	2 670
Between two and three years	66 780	2 294
Between three and four years	65 610	62
Between four and five years	62 642	39
More than five years	167 770	0
Total payments leasing liabilities	**509 327**	**8 606**

The payments linked to the lease agreements are fixed. The variable part is considered as insignificant.

The overview below shows the company's exposure related to future payments not discounted related to options and terminations that are not included in the lease liabilities as of 31 December 2022.

LEASE PAYMENTS IN 2022	Fixed payments	Variable payments	Total
Fixed rent	1 249		1 249
Total rental payments	**1 249**	**0**	**1 249**

	Within five years	More than five years	Total
Extension of lease agreements (options) is not expected to be exercised	345 712	228 862	574 574
Total	**345 712**	**228 862**	**574 574**

The company is a lessor and subleases property. All these leases are classified as operating leases from a lessor perspective. Rental revenue is therefore classified other revenue in the income statement. Refer to disclosure 8.

DISCLOSURE 25 | GUARANTEES AND PLEDGE

MORTGAGE ENCUMBRANCES	2022	2021
Of the group's book debts, the following were secured by pledge	150 873	37 739

ALTERNATIVE PERFORMANCE MEASURES

Alternative performance measures, which means financial target figures that are not defined within the current financial reporting framework, is used by Scana to provide additional information. This is done by excluding elements which, in Scana's view, do not give an indication of periodic EBITDA or operating results. Alternative performance targets are intended to improve the comparability of the results from period to period. It is Scana's experience that these are often used by analysts, investors, and other parties. Management also uses these measurements internally.

Alternative performance measures are not a substitute for measuring results in accordance with IFRS.

Scana's financial alternative performance measures:

EBITDA	Operating profit before depreciation
Adjusted EBITDA	EBITDA less identified costs or revenues that are excluded to achieve real underlying operations
EBIT	Operating profit after depreciation and write-downs
Adjusted operating income	Operating profit after adjustments related to identified costs or revenues to produce real underlying operations

	FULL YEAR	
APM	**2022**	**2021**
EBITDA	**70 627**	**16 655**
[1] Gain from sale	-1 066	-422
[2] Strategy and M&A costs	3 532	5 757
[3] Option program/incentive scheme	2 974	1 305
[4] Restructuring costs	405	408
Total items excluded from EBITDA	**5 845**	**7 048**
Adjusted EBITDA	**76 473**	**23 703**
Depreciation/amortisation/impairment	89 600	8 211
Adjusted EBIT	**-13 128**	**15 492**

[1] Gain from sale is related to the sale of businesses
[2] Costs related to strategy development and M&A opportunities
[3] Costs related to the option program that accrue during the vesting period
[4] Restructuring costs related to final agreements and assistance

DEFINITIONS

Rolling EBITDA	EBITDA for the last twelve months
NIBD	Net interest bearing debt (Interest-bearing debt – cash)
Borrowing base	Consists of inventory, accounts receivable and contract assets
Order intake	Consists of the period's new orders as well as net changes to existing orders, including change orders, cancellations and changes related to exchange rates
Order backlog	Consists of remaining deliveries on contracts entered at the end of the period
Covenant EBITDA	Rolling EBITDA adjusted for financial lease and transaction cost related to 2022 acquisitions/PSW and ATC and normalization for one off effects + result from associated company.
Covenant equity ratio	Booked equity/(total assets – financial lease related to 2022 acquisitions of PSW and ATC)
Covenant NIBD/EBITDA	Covenant EBITDA/NIBD excluding financial lease

DISCLOSURE 1 | ACCOUNTING PRINCIPLES

The presented company accounts have been prepared in accordance with the provisions of the Accounting Act and good accounting practice. Going concern is the basis for the preparation of the annual accounts and the valuation of the company's assets. The annual accounts consist of profit and loss account, balance sheet, cash flow statement and disclosure information. It represents a complete annual accounts. All numbers in the annual accounts are in NOK thousand ('000) unless otherwise stated. The financial statements have been prepared in accordance with the Norwegian Accounting Act and generally accepted accounting principles in Norway.

1.1 REVENUE AND COSTS

Income is recognized in the income statement when it is earned. Expenses are recognized in the income statement in the same period as the associated income. Transaction costs linked to borrowing are accrued over the term of the loan according to the amortized cost method.

1.2 SHORT TERM RECEIVABLES AND SHORT TERM LIABILITIES

Receivables and liabilities are classified as current assets and short-term liabilities if they are due for payment within one year of the balance sheet date.

1.3 ASSETS AND LABILITETS IN FOREIGN CURRENCY

Transactions in foreign currency are accounted for at the rates at the time of the transaction. The company's cash and bank equivalents, receivables and liabilities in foreign currency are converted at the exchange rate on the balance sheet date.

1.4 TRADE RECEIVABLES

Accounts receivables are entered in the balance sheet after deductions for ascertained losses and provisions to cover losses.

1.5 SHARES IN SUBSIDIARIES

Investments in subsidiaries are assessed according to the cost method. An impairment is made based on fair value when the decline in value is due to reasons that cannot be assumed to be temporary and it must be considered necessary according to good accounting practice. Impairment is reversed when the basis for impairment is no longer present.
Distributions from subsidiaries that represent earned income are recognized as income in the year the distribution is accounted for in the subsidiary. Distribution in excess of earned income is considered repayment of invested capital and is accounted for as a reduction of the investment.

1.6 TANGIBLE ASSETS AND DEPRECIATION

Fixed assets are listed in the balance sheet at historical acquisition cost less depreciation and write-downs. Depreciation is calculated linearly from acquisition cost. When selling fixed assets, gains are included as operating income and losses as operating costs. If the recoverable amount of the operating asset is lower than the balance sheet value, a write-down is made to the recoverable amount. Recoverable amount is the higher of net sales value and value in use. Value in use is the present value of the future cash flows that the asset is expected to generate.

1.7 INCOME TAX

The tax expense consists of the tax payable and changes to deferred tax. Deferred tax/tax assets are calculated on all differences between the book value and tax value of assets and liabilities. Deferred tax is calculated as 22 percent of temporary differences and the tax effect of tax losses carried forward. Deferred tax assets are recorded in the balance sheet when it is more likely than not that the tax assets will be utilized. Taxes payable and deferred taxes are recognised directly in equity to the extent that they relate to equity transactions.

1.8 CASH FLOW STATEMENT

The cash flow statement is presented using the indirect method. Cash and cash equivalents includes cash, bank deposits and other short term, highly liquid investments with maturities of three months or less.

1.9 LEASING

Lease agreements are assessed as financial or operational leasing according to a concrete assessment of the individual agreement. The company only has operating assets that are defined as operational leasing.

1.10 FINANCIAL INSTRUMENTS

The company uses various financial instruments in the management of the Group's currency and interest rate exposure.
Currency forward contracts are entered in the balance sheet at fair value. Unrealized gain or losses related to these contracts are recognized in profit or loss on an ongoing basis.

DISCLOSURE 2 | SHARES

Stepwise AS Stavanger, Norway	*NOK*	2022	4 %	4 %	12 800 146

The company tests the value of the shares for impairment in case of indication of impairment. In assessment, the value in use is used, which is based on the budget and business plans determined by the management for the period 2023–2027. The estimates are based on the approved budget 2023 and forecasts for 2024–2027 for each individual cash-generating unit. For the following periods, the model is based on a growth rate of 2.0 %, which is long term expectations of inflation targets at Norges Bank and 2.0 % at the Riksbank in Sweden. The income is based on order backlog and management assessments and external information according to the potential for new agreements.

Estimated operating margin in the period increases based on expectations of a positive market development. The company recognizes impairment in profit and loss if the estimated value in use is less than the booked assets connected to the cash-generating units.

The shares in Scana Property AS are written down by NOK 1.8 million. Seasystems has shown a good performance the last years and a reversal of written down by NOK 11.8 million has been done. The company has a trade receivable towards Skarpenord of NOK 5.6 million in which a loss provision has been made due to lower expected future cash flows.

INDEPENDENT AUDITOR'S REPORT

To the Annual Shareholders' Meeting of Scana ASA

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Scana ASA (the Company) which comprise the financial statements of the Company and the consolidated financial statements of the Company and its subsidiaries (the Group). The financial statements of the Company comprise the balance sheet as at 31 December 2022 and the income statement and cash flow statement for the year then ended and notes to the financial statements, including a summary of significant accounting policies. The consolidated financial statements of the Group comprise the statement of financial position as at 31 December 2022, the income statement, statement of other comprehensive income, statement of cash flow and statement of changes in equity for the year then ended and notes to the financial statements, including a summary of significant accounting policies.

In our opinion

- the financial statements comply with applicable legal requirements,
- the financial statements give a true and fair view of the financial position of the Company as at 31 December 2022 and its financial performance and cash flows for the year then ended in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway,
- the consolidated financial statements give a true and fair view of the financial position of the Group as at 31 December 2022 and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the EU.

Our opinion is consistent with our additional report to the audit committee.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the Company and the Group in accordance with the requirements of the relevant laws and regulations in Norway and the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

To the best of our knowledge and belief, no prohibited non-audit services referred to in the Audit Regulation (537/2014) Article 5.1 have been provided.

We have been the auditor of the Company for 1 years from the election by the general meeting of the shareholders on 22 June 2022 for the accounting year 2022.

A member firm of Ernst & Young Global Limited

EY
Building a better working world

Other matters

The financial statements for the year ended 31 December 2021, were audited by another auditor who expressed an unmodified opinion on those statements on 8 April 2022.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements for 2022. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's responsibilities for the audit of the financial statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the financial statements.

Acquisition of PSW Group - Purchase price allocation

Basis for the key audit matter
On 11 January 2022, Scana ASA acquired 100% of the shares in PSW Holding I AS for a total consideration of NOK 455 million. Management made a purchase price allocation where the consideration was allocated to the identified assets and liabilities based on their evaluated fair values. The evaluation and identification of all assets and liabilities and the assumptions used in the allocation of the purchase price required significant judgement by management. Changes in these assumptions may have a material impact on the value of the identified assets and liabilities. Due to the size of the transaction and the judgement involved, we considered the purchase price allocation as a key audit matter in our audit.

Our audit response
We obtained an understanding of the purchase price allocation process. Our audit procedures included meetings with management, assessment of their valuation method and the assumptions used in the purchase price allocation. This included assessment of the valuation of acquired assets and liabilities. We evaluated the models applied in the purchase price allocation supported by internal specialists. We refer to note 3 in the consolidated financial statement.

A member firm of Ernst & Young Global Limited

EY
Building a better working world

Impairment assessment of goodwill and intangible assets

Basis for the key audit matter
The Group have five Cash Generating Units (CGUs). As per 31 December 2022 there were impairment indicators on two CGUs being loss making and having weaker turnover than expected. The Management prepared impairment assessments based on value in use calculation using cash flows from budgets and long-term strategic plans approved by the Board of Directors. Key assumptions for the value in use calculations were operating margin, discount rate and growth rate. Considering the complexity of the assumptions applied in the impairment evaluation, and management's judgement in establishing them, we assess impairment assessment as a key audit matter.

Our audit response
We evaluated the CGUs identified and compared the estimated value in use (VIU) to the carrying amount of each CGU. Our audit procedures related to value in use included discussions with group management, an evaluation of the cash flows compared to budget and strategic plans approved by the Board of Directors, as well as signed contracts. We further evaluated management's methods and models, the significant assumptions, mathematical accuracy and we performed sensitivity analysis. We involved an internal specialist in the evaluation of the methodology and the discount rate applied in the value in use model. We refer to note 2 for Accounting estimates and assessments and note 12 Intangible assets, in the consolidated financial statement.

Other information

Other information consists of the information included in the annual report other than the financial statements and our auditor's report thereon. Management (the board of directors and chief executive officer) is responsible for the other information. Our opinion on the financial statements does not cover the other information, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information, and, in doing so, consider whether the board of directors' report, the statement on corporate governance and the statement on corporate social responsibility contain the information required by applicable legal requirements and whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that the other information is materially inconsistent with the financial statements, there is a material misstatement in this other information or that the information required by applicable legal requirements is not included in the board of directors' report, the statement on corporate governance or the statement on corporate social responsibility, we are required to report that fact.

We have nothing to report in this regard, and in our opinion, the board of directors' report, the statement on corporate governance and the statement on corporate social responsibility are consistent with the financial statements and contain the information required by applicable legal requirements.

Responsibilities of management for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements of the Company in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway and of the consolidated financial statements of the Group in accordance with International Financial Reporting Standards as adopted by the EU, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's and the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern

A member firm of Ernst & Young Global Limited

EY
Building a better working world

and using the going concern basis of accounting unless management either intends to liquidate the Company or the Group, or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's and the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's and the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the audit committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the board of directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key

EY
Building a better working world

audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirement

Report on compliance with regulation on European Single Electronic Format (ESEF)

Opinion

As part of the audit of the financial statements of Scana ASA we have performed an assurance engagement to obtain reasonable assurance about whether the financial statements included in the annual report, with the file name scanaasa-2022-12-31-en, have been prepared, in all material respects, in compliance with the requirements of the Commission Delegated Regulation (EU) 2019/815 on the European Single Electronic Format (ESEF Regulation) and regulation pursuant to Section 5-5 of the Norwegian Securities Trading Act, which includes requirements related to the preparation of the annual report in XHTML format and iXBRL tagging of the consolidated financial statements.

In our opinion, the financial statements, included in the annual report, have been prepared, in all material respects, in compliance with the ESEF Regulation.

Management's responsibilities

Management is responsible for the preparation of the annual report in compliance with the ESEF Regulation. This responsibility comprises an adequate process and such internal control as management determines is necessary.

Auditor's responsibilities

Our responsibility, based on audit evidence obtained, is to express an opinion on whether, in all material respects, the financial statements included in the annual report have been prepared in accordance with the ESEF Regulation. We conduct our work in accordance with the International Standard for Assurance Engagements (ISAE) 3000 – "Assurance engagements other than audits or reviews of historical financial information". The standard requires us to plan and perform procedures to obtain reasonable assurance about whether the financial statements included in the annual report have been prepared in accordance with the ESEF Regulation.

As part of our work, we perform procedures to obtain an understanding of the company's processes for preparing the financial statements in accordance with the ESEF Regulation. We test whether the financial statements are presented in XHTML-format. We evaluate the completeness and accuracy of the iXBRL tagging of the consolidated financial statements and assess management's use of judgement. Our procedures include reconciliation of the iXBRL tagged data with the audited financial statements in human-readable format. We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

REPORT ON SALARY AND OTHER REMUNERATION TO LEADING PERSONNEL IN SCANA ASA FOR THE FINANCIAL YEAR 2022

1.1 INTRODUCTION

Report on salary and other remuneration to leading personnel is based on the requirements set out in the Norwegian Public Limited Liability Companies Act (the "Companies Act"), cf. § 6-16 b, and is further described in the regulations on guidelines and report on remuneration for leading personnel according to § 6. The general meeting will hold an advisory vote on the report.

Group management's remuneration in 2022 has followed the guidelines for remuneration adopted by the general meeting in 2021. The guidelines for remuneration are available on the company's website as part of disclosure 10 in the annual report for 2020 and the translated version in the next section of the 2022 Annual Report Guidelines for salary and other remuneration.

In 2022, the Group has invested considerable time and resources related to strategy and M&A activities to strengthen Scana's position within the electrification and decarbonization of maritime and offshore industries, as a consequence of the purchase agreement of PSW Group on 16 December 2021. The EBITDA for the Group was therefore increased to NOK 70.6 million in 2022 compared to last year.

1.2 TOTAL RENUMERATION FOR LEADING PERSONNEL

			Fixed remuneration			Extraordinary items	Pension expense	Total remuneration		Proportion of fixed and variable remuneration	
Name	Position	Year	Base salary	Fees	Fringe benefits	Variable	Fixed	Fixed	Variable	Fixed	Variable
Styrk Bekkenes	CEO*	2022	3 100		124		84	3 308		100 %	0 %
		2021	2 386		95	1 000	87	2 568	1 000	72 %	28 %
Torvald Ulland Reiestad	CFO	2022	1 622		15		85	1 722		100 %	0 %
		2021	1 461		20	250	87	1 568	250	86 %	14 %
Kjetil Flesjå	Former CFO	2022								0 %	0 %
		2021	175					175		100 %	0 %
Oddbjørn Haukøy	CCO*	2022	2 750		13		77	2 841		100 %	0 %
		2021								0 %	0 %
Anette Netteland Dybvik	Head of IR and Investments*	2022	400		5		24	429		100 %	0 %
		2021								0 %	0 %

The resignation period for key personnel is from 3-6 months. The CEO has a severance agreement which involves salary for 6 months beyond the notice period. Any wage income received from other work in the period where severance pay is paid must be deducted from severance pay. Refers to disclosure 10 for description of pensions. The pension scheme for senior employees is contribution-based.

No loans, advance payments or collateral have been given to leading persons during 2022. On the balance sheet date, no leading persons have loans.

** CCO was hired from February 2022, while Head of IR and Investments was hired from September 2022. CEO resigned in January 2023.*

FIXED REMUNERATION

Base salary includes the fixed salary paid or due to leading personnel.
Fees are agreed amounts for a time-limited period.
Fringe benefits relate to company car, telephone, broadband and travel.

VARIABLE REMUNERATION
There is no agreed variable remuneration for leading personnel. Leading personnel participate in the Group's share option program where the value is linked to the development of the Group's share price.

EXTRAORDINARY ITEMS
A bonus was paid out in 2021 which is linked to the transaction entered into in December 2021 as a one-off remuneration awarded to leading persons. No extraordinary items was paid out in 2022.

PENSION EXPENSES
This column includes the contributions that took place under the reported financial year to finance a fund for future pension pay-out for the director. It includes fixed pension contributions.

UNDERTAKINGS OF THE SAME GROUP
Leading persons have not received remuneration from subsidiaries in the Group.

VARIABLE PART
The Group does not have a variable part linked to agreed remuneration for leading personnel. Neither has the company the possibility through employment agreements to reclaim variable remuneration.

1.3 SHARE-BASED REMUNERATION
The Group had one established share-based remuneration program from 2019 ending in 2023 and a new program started in 2022. The report first presents the 2019 program and then the 2022 program.

The options can be exercised in connection with the reporting of the quarterly reports indicated in the table above. The exercise period is two weeks after the quarterly report is published at Oslo Børs.
The options linked to plan 1a are earned in the period from the award date to the vesting date, which is 21.06.2019–30.06.2020.
The options linked to plan 1b are earned in the period from the award date to the vesting date, which is 21.06.2019–30.06.2021.
The options linked to plan 1c are earned in the period from the award date to the vesting date, which is 21.06.2019–30.06.2022.

Options that have not been exercised (cf. plan 1a, 1b and 1c) can be exercised through plan 1d on 30 June 2023 at a strike price of 1.464. The exercise can take place after the publication of the second quarter report of 2023 and the following two weeks.
The CFO entered into an option agreement a year later and can exercise the options on the same terms a year later than the other participants.
Resigned CFO Kjetil Flesjå left the company with effect from 30 November 2020. He has retained his allocated options with associated rights.
No shares or other instruments have been allocated in connection with remuneration to leading persons.

The options can be exercised in connection with the reporting of the quarterly reports indicated in the table above. The exercise period is two weeks after the quarterly report is published at Oslo Børs.

The options linked to plan 1a are earned in the period from the award date to the vesting date, which is 24.01.2022–30.06.2023.
The options linked to plan 1b are earned in the period from the award date to the vesting date, which is 24.01.2022–30.06.2024.

Options that have not been exercised (cf. plan 1a) can be exercised through plan 1c on 30 June 2024 at a strike price of 1.47. The exercise can take place after the publication of the second quarter report of 2024 and the following two weeks.
The options linked to plan 1d are earned in the period from the award date to the vesting date, which is 24.01.2022–30.06.2025.

Options that have not been exercised (cf. 1a and 1b) can be exercised through plan 1e until 30 June 2025 at a strike price of 1.544. The exercise can take place after the publication of the second quarter report of 2025 and the following two weeks.

No shares or other instruments have been allocated in connection with remuneration to leading persons.

1.4 INFORMATION ON HOW THE REMUNERATION COMPLIES WITH THE REMUNERATION GUIDELINES AND HOW PERFORMANCE CRITERIA WERE APPLIED.

The Group does not have payment schemes that are based on performance criteria and the application of such criteria. Based on the employment agreements, such arrangements are not included in the conditions.

1.5 EXCEPTIONS AND DEVIATIONS FROM THE REMUNERATION POLICY AND THE PROCEDURE FOR IMPLEMENTATION

The Group did not deviate from the guidelines in 2022. In 2021 the Group did deviate from parts of the guidelines. The declaration relating to the remuneration of leading personnel allows the board to decide in some cases to deviate from the guidelines. One case is extraordinary circumstances where exceptions may be required to secure the company's long-term interests and sustainability. In 2021, a bonus was paid in connection with the transaction entered in December 2021 as a one-off remuneration awarded to leading personnel.

1.6 YEARLY CHANGES OF REMUNERATION AND THE GROUPS RESULTS

The report must contain information on the annual change in the remuneration of each individual executive, the company's results, as well as the average remuneration divided by the number of FTE's (full-time equivalents) excluding executive staff over a period covering at least the last five financial years. Scana ASA does not have salary agreements linked to the achievement of results and it is therefore not included in the table below. See the Groups Consolidated Statement of Profit or Loss for reference to the Groups results and the discussion in the board of directors' report.

The table below shows comparable remuneration and the company's performance over the 5 last reported financial years. Leading personnel who do not hold the same role today are anonymized in the table below. The average number of FTEs and total remuneration are linked to continued operations and the EBITDA.

Former CEO resigned in the summer of 2018 and received twelve months' severance pay. Former CFO resigned in November 2020 and received severance pay the same year.

1.7 INFORMATION REGARDING SHAREHOLDER VOTE

At the Ordinary General Meeting held on 7 May 2021, guidelines for remuneration to leading personnel were adopted. A total of 35,166,443 shares were represented, of which 638,668 share votes voted against. According to the guidelines for salary and remuneration must be approved by the company's ordinary General Meeting at least every fourth year guidelines can also be adjusted by decision in subsequent General Meetings. No such adjustments have been made since approval in 2021.

1.8 BOARD REMUNERATION

The board of Scana ASA was paid TNOK 1,125 in fees in 2022 and TNOK 31 to the election committee. Board remunerations are paid annually in arrears and apply for the period from the ordinary general

meeting 2021 to the ordinary general meeting 2022. Fees in arrears for the board elected in May 2021 with a term of office until May 2022 are specified below. A new board was elected at an extraordinary general meeting in December 2022. In addition, three board members stepped down from the board in January 2023.

Name	Position	Active period	Remuneration paid out in 2021	Remuneration paid out in 2022

INDEPENDENT AUDITOR'S ASSURANCE REPORT ON REMUNERATION REPORT

To the General Meeting of Scana ASA

Opinion

We have performed an assurance engagement to obtain reasonable assurance that Scana ASA's report on salary and other remuneration to directors (the remuneration report) for the financial year ended 31 December 2022 has been prepared in accordance with section 6-16 b of the Norwegian Public Limited Liability Companies Act and the accompanying regulation.

In our opinion, the remuneration report has been prepared, in all material respects, in accordance with section 6-16 b of the Norwegian Public Limited Liability Companies Act and the accompanying regulation.

Board of directors' responsibilities

The board of directors is responsible for the preparation of the remuneration report and that it contains the information required in section 6-16 b of the Norwegian Public Limited Liability Companies Act and the accompanying regulation and for such internal control as the board of directors determines is necessary for the preparation of a remuneration report that is free from material misstatements, whether due to fraud or error.

Our independence and quality control

We are independent of the company in accordance with the requirements of the relevant laws and regulations in Norway and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements. Our firm applies International Standard on Quality Control 1 (ISQC 1) and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Auditor's responsibilities

Our responsibility is to express an opinion on whether the remuneration report contains the information required in section 6-16 b of the Norwegian Public Limited Liability Companies Act and the accompanying regulation and that the information in the remuneration report is free from material misstatements. We conducted our work in accordance with the International Standard for Assurance Engagements (ISAE) 3000 – "Assurance engagements other than audits or reviews of historical financial information".

We obtained an understanding of the remuneration policy approved by the general meeting. Our procedures included obtaining an understanding of the internal control relevant to the preparation of the remuneration report in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. Further we performed procedures to ensure completeness and accuracy of the information provided in the remuneration report, including whether it contains the information required by the law and accompanying regulation. We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Bergen, 28 April 2023

GUIDELINES FOR SALARY AND OTHER REMUNERATION FOR LEADING PERSONNEL

1. INTRODUCTION

These guidelines have been approved by the board of Scana ASA ("Scana" or the "company"), in accordance with the Act on Public Limited Companies ("Public Limited Companies Act") Section 6-16a and associated regulations. The guidelines have been prepared for approval at the company's Ordinary General Meeting in 2021 and shall apply until the Group's Ordinary General Meeting in 2025, unless the guidelines are amended or replaced earlier.

2. PERSONNEL COVERED BY THE GUIDELINES

Scana defines leading personnel as the Managing director and members of the Group Management. The guidelines can also be applied to other key personnel in the Group. The Group does not have employee-elected board members.

3. THE PROCESS FOR THE PREPARATION OF THE GUIDELINES. CONFLICTS OF INTEREST

The board has had an active role in establishing, evaluating, and implementing these guidelines. The board must prepare proposals for guidelines that must be approved by the company's ordinary General Meeting at least every fourth year. The Ordinary General Meeting makes a final decision on such proposals. Adopted guidelines can also be adjusted by decision in subsequent General Meetings.

To minimize the risk of conflicts of interest, no leading personnel shall participate in the preparation of or make decisions related to salary or other remuneration that the person in question is directly affected by.

4. THE MAIN PRINCIPLES FOR THE COMPANY'S EXECUTIVE PAYMENT POLICY

These guidelines constitute a framework for the salary and other remuneration the company can award to leading personnel during the period the guidelines are active. The purpose is to contribute to the realization of the company's business strategy, long-term interests, and financial sustainability.

The main principle behind the Group's executive payment policy is that base pay should promote value creation in the company and contribute to overlapping interests between the owners and leading personnel. Basic salary must not be of such a nature or have an extent that could damage the company's reputation.

As a leading player in its industry, Scana is dependent on offering salaries that can recruit the most talented leaders. It is the board's policy that to ensure the best possible leadership, salaries must be offered at levels that the individual is satisfied with and that are competitive in an international market. Salary and other remuneration must be the same for male and female employees for equal work or work of equal value.

Salary and employment conditions for employees in the Group have been considered when preparing these guidelines, by including information on employees' total income, forms of remuneration and other salary components the board's basis for evaluating whether the Group's salary practices, guidelines and limitations set out in these guidelines are adequate and reasonable.

Basic salary for leading personnel consists of a fixed and a variable salary component which is determined on an individual basis.

GUIDELINES FOR SALARY AND OTHER REMUNERATION

ELEMENTS OF PAY
Salary includes all benefits a person receives as a result of his or her position as a leading person in the Group in accordance with §2 of the Regulations on guidelines and report on remuneration for leading personnel.

FIXED SALARY
The company's policy is that the management salaries should mainly be expressed in a fixed monthly salary that reflects the level of the person concerned' s position and practice, including ordinary benefits in kind.

For leading personnel, the basic salary must make up the most significant part of the total salary.

VARIABLE SALARY
Bonus schemes for the management team must be linked to the Group's value drivers to achieve the Group's business strategy, long-term interests and sustainable business operations. Account must be taken of achieved results and judgment relating to operating margin and order intake. The total value of variable payment must not normally exceed the value of fixed payment.

OTHER REMUNERATION
In addition to basic salary, other remuneration may be given to leading personnel, including the allocation of shares or other benefits linked to shares or developments in the share price in the Group or other companies in the Group.

NON-FINANCIAL BENEFITS
Leading personnel receive standard non-financial benefits such as coverage of mobile and broadband etc.

PENSION
Pension schemes shall basically be the same for leading personnel as established generally for employees in the Group. Pension schemes must be based on customary schemes and current legislation.

SHARE-BASED PROGRAM
On 24 June 2019, the Group announced that leading personnel have been awarded a share-based option program together with the General managers of the subsidiaries. The option program was approved by the general meeting on 8 May 2020. The board considers attractive share-based incentive schemes to be an important part of the total compensation.

The options can, according to the option agreements' detailed terms, be exercised with up to 1/3 after 12 months (following the company's reporting of the second quarter of 2020), 1/3 after 24 months and 1/3 after 36 months. All unused options can be exercised after 48 months. The exercise price is NOK 1.10 per share after 12 months, and then increases by 10 % for each year. There is a 6-month lock-in period for shares acquired under the share-based program.

In the share-based program decided in 2019, it is assumed that no one who has been awarded options ends the vesting period and that everyone redeems the options after the second quarter of 2022.

On 24 January 2022, the Group announced that leading personnel have been awarded a new share-based option program together with the General managers of the subsidiaries. The option program was approved by the general meeting on 22 June 2022. The board considers attractive share-based incentive schemes to be an important part of the total compensation.

The options can, according to the option agreements' detailed terms, be exercised with up to 1/3 after 12 months (following the company's reporting of the second quarter of 2023), 1/3 after 24 months and

1/3 after 36 months. All unused options can be exercised after 48 months. The exercise price is NOK 1.40 per share after 12 months, and then increases by 5 % for each year. There is a 6-month lock-in period for shares acquired under the share-based program.

In the share-based program decided in 2022, it is assumed that no one who has been awarded options ends the vesting period and that everyone redeems the options after the second quarter of 2025.

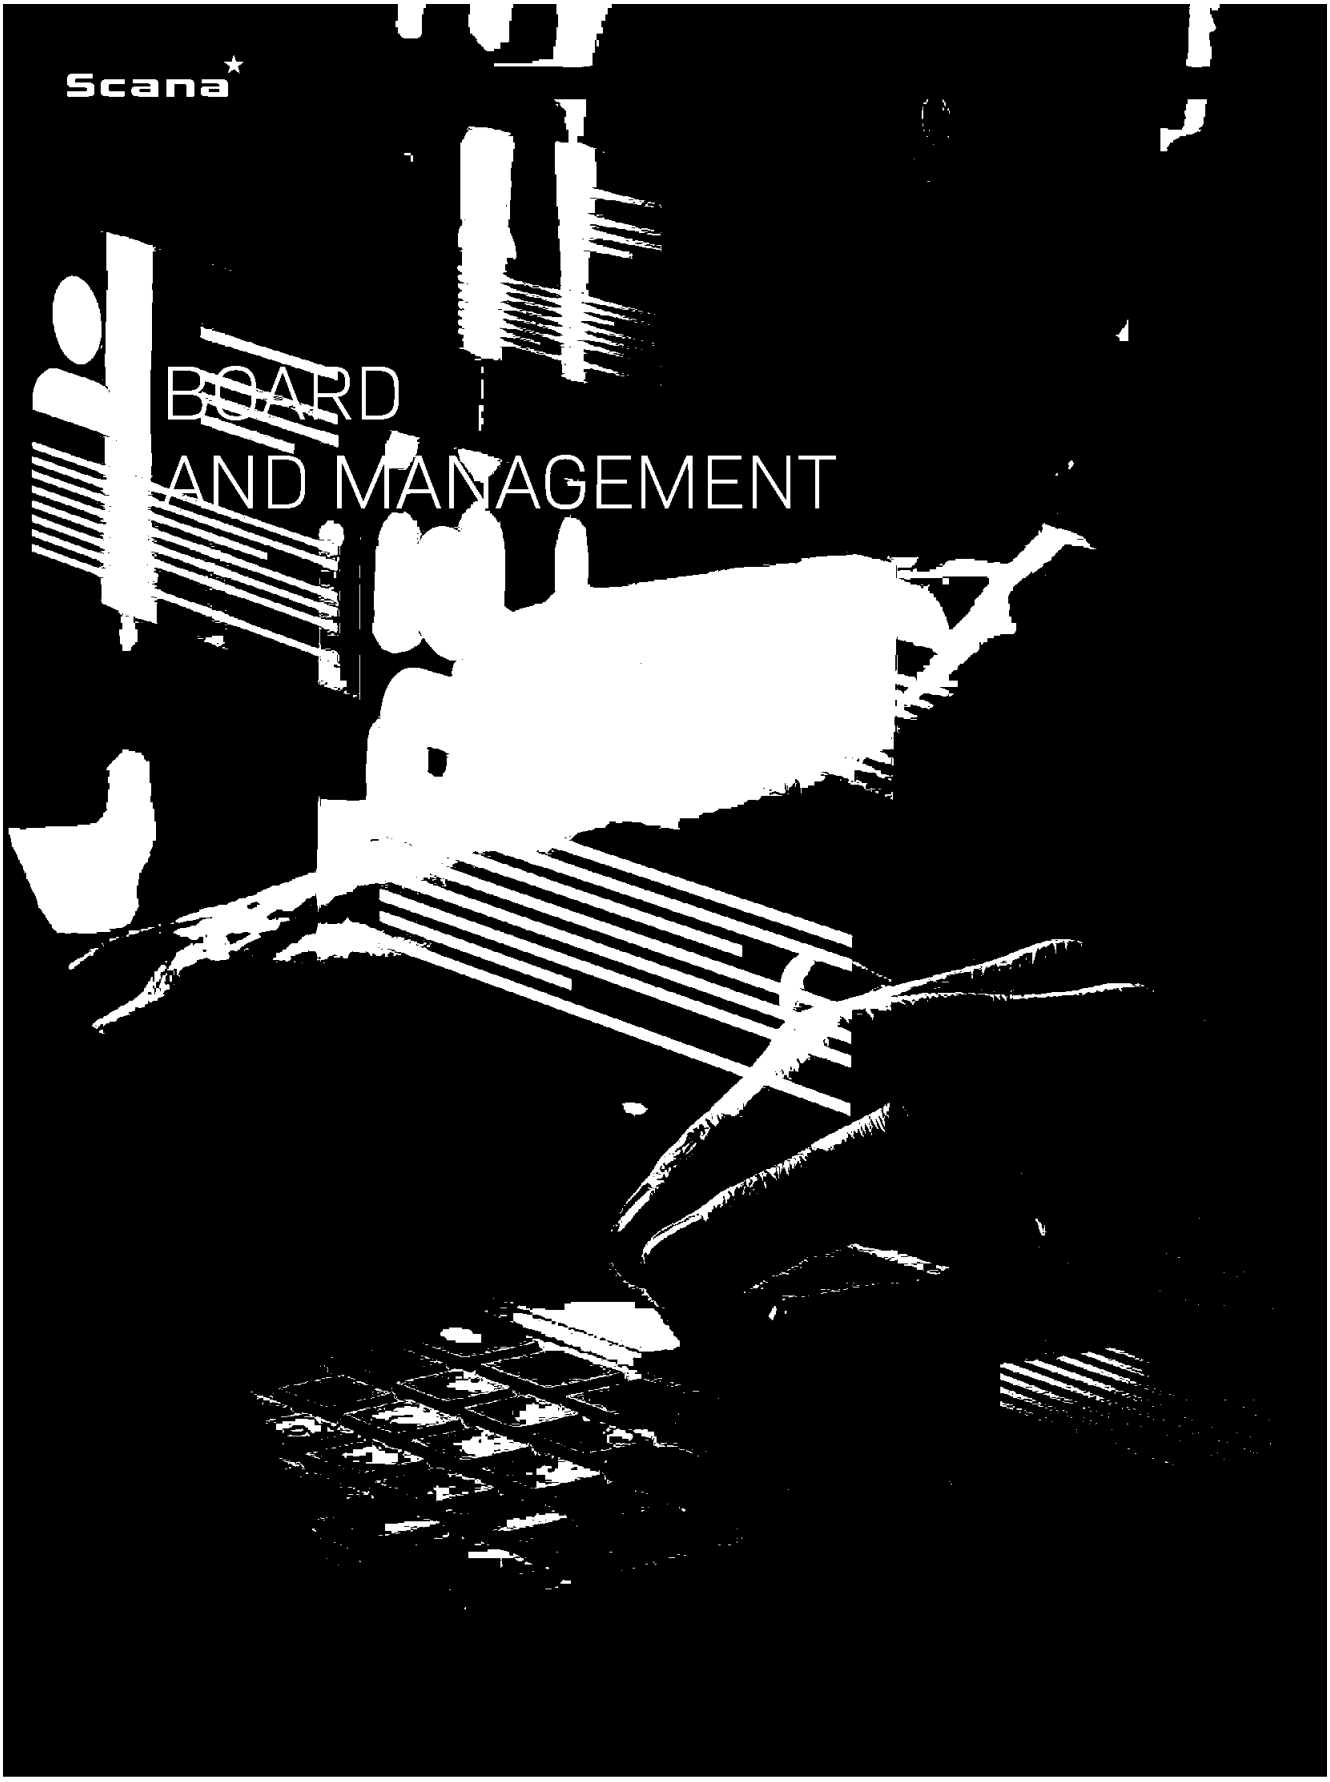
EMPLOYMENT AGREEMENTS
Retirement arrangements that are established upon resignation will be seen in connection with the mutual possibility of termination of the employment relationship and other limiting clauses in the individual's employment agreement. Post-retirement schemes must, as a starting point, have deductions for income from other sources. The CEO has an agreement for 6 months' severance pay.

DEVIATIONS FROM THESE GUIDELINES

In the following cases, the board may decide to deviate from these guidelines:

- in the event of a change of CEO;
- in the event of material changes in the Group's organization, ownership and/or operations;
- in the event of material changes in the Group's strategy.
- in the event of changes to or additions to relevant legislation, rules or regulations (for example for regulatory, stock market, tax or administrative purposes, or to take into account changes in legislation or corporate law obligations or guidelines);
- in the event of other extraordinary circumstances where exceptions may be required to secure the Group's long-term interests and sustainability as a whole, or to ensure the Group's viability.

Any deviation from these guidelines must be reported in the salary report for the individual year. The Board's statement on the determination of remuneration for leading personnel will be sent out or made available to shareholders on the Group's website, together with a notice of the Group's Ordinary General Meeting, as well as the Group's Annual Report.



Scana
BOARD
AND MANAGEMENT

Board

Pål Selvik
Chairman of the board

Pål Selvik (b.1972) has more than 20 years' experience from equity and capital markets. He has been CFO of the GC Rieber-Group since 2008, and is also CEO of GC Rieber Fortuna AS, an investment company within the GC Rieber Group. PROTOKOLL

FRA ORDINÆR GENERALFORSAMLING I

SCANA ASA

avholdt som videomøte 8. juni 2023 kl. 10:00.

1. Åpning av generalforsamlingen

Styrets leder åpnet generalforsamlingen.

2. Opprettelse av fortegnelse over fremmøtte aksjeeiere og fullmakter

Det ble opprettet fortegnelse over de fremmøtte aksjeelere som følger av vedlagte liste (inntatt som **Bilag 1** til protokollen som inkluderer voteringsresultat).

3. Valg av møteleder og person til å medundertegne protokollen sammen med møteleder

Rune Ulriksen Steinsland ble valgt som møteleder. Pål Selvik ble valgt til å medundertegne protokollen sammen med møteleder.

4. Godkjennelse av innkalling og dagsorden

Innkalling og dagsorden ble godkjent.

5. Godkjennelse av årsregnskap og årsberetning for regnskapsåret 2022, herunder utdeling av utbytte

Møteleder redegjorde for styrets forslag.

Styrets årsberetning og forslag til årsregnskap ble behandlet og godkjent av generalforsamlingen. I samsvar med styrets forslag ble det vedtatt å ikke utdele utbytte for 2022.

6. Fastsettelse av styrets og valgkomiteens honorar

Møteleder redegjorde for valgkomiteens forslag til styrets og valgkomiteens honorar. Generalforsamlingen sluttet seg til valgkomiteens forslag og fattet dermed følgende vedtak:

"Alminnelig godtgjørelse til styret for 2022/2023 skal være som følger:

Styreleder:	*NOK 300.000*
Styrets nestleder:	*NOK 225.000*
Øvrige styremedlemmer:	*NOK 200.000*

Kompensasjonen for valgkomitéens arbeid for 2022/2023 settes til:

For medlem:	*NOK 25.000*

7. Fastsettelse av revisors honorar

Møteleder redegjorde for styrets forslag. Generalforsamlingen sluttet seg til styrets forslag og fattet dermed følgende vedtak:

"Godtgjørelse til revisor for 2022 fastsettes som følger:

For revisjon: NOK 975 000."

PS

8. Valg av styre

Møteleder redegjorde for valgkomiteens forslag til nytt styremedlem.

Valgkomiteens forslag til nytt styremedlem: Øystein Matre

Opprinnelig forslag fra valgkomite fikk ikke flertall og falt.

Det ble deretter fremsatt et alternativt forslag til nytt styremedlem ved Rieber & Søn AS med fler om Morten Blix som nytt styremedlem:

«På vegne av Rieber & Søn AS samt 140 810 085 aksjer/stemmer som har gitt undertegnede fullmakt (totalt sett 41,7% av aksjene i Selskapet), ønsker vi å fremme benkeforslag med Morten Blix som motkandidat til Øystein Matre som nytt styremedlem i Scana ASA. Som redegjort til valgkomiteen i forkant av utsendelse av innkalling til generalforsamling synes vi det er problematisk å ha eieren og den daglige lederen av Westcon Yards, som er en av Scana sine konkurrenter og potensielle samarbeidspartnere innenfor offshore markedet, i styret i selskapet. Vi er enig med valgkomiteen i at Øystein Matre er en flott person med høy kompetanse, lang erfaring og god innsikt i offshore markedet, så dette motforslaget er ikke rettet mot Matre som person.

Ved Morten Blix (61) oppstår ikke den potensielle interessekonflikten, men selskapet får inn et svært erfarent og kompetent styremedlem som også tar med seg kontinuitet inn i styret da han har sittet i styret i PSW Group fra 2014 og frem til salget til Scana i 2022 og videre i styret i Scana frem til november 2022. Blix har erfaring fra en rekke styreverv både nasjonalt og internasjonalt, hvorav flere innenfor industri- og energisektoren. Blix er eier av 1,95 % av aksjene i Scana gjennom sitt selskap Spiralen Holding AS.»

Valgkomiteens leder ønsket protokollert at valgkomiteen hadde vurdert interessekonflikt og konklusjonen var at det ikke foreligger inhabilitet. Videre var det avklart at om det skulle komme opp saker som var utfordrende ville Matre melde seg inhabil. I tillegg påpekes det at det ikke er uvanlig at man har personer fra selskap i samme industri som styremedlem.

Krefting AS ønsker protokollert at man ser undrende på prosessen knyttet til benkeforslaget som for Krefting AS oppleves som en runddans.

Generalforsamlingen sluttet seg til det alternative forslag. Følgende styremedlemmer ble valgt med valgperiode frem til ordinær generalforsamling i 2025:

- *Morten Blix*

Etter valget består selskapets styre av følgende medlemmer:

- *Pål Selvik (2022- 2024)*
- *Birgitte Feginn Angelil (2022-2024)*
- *Vidar Rabben (2022-2024)*
- *Ida Ianssen Lundh (2022-2024)*
- *Morten Blix (2023-2025)*

PS

9. Fullmakt til styret til erverv av egne aksjer

Møteleder redegjorde for styrets forslag.

Generalforsamlingen sluttet seg til styrets forslag og fattet dermed følgende vedtak:

«I samsvar med styrets forslag er styret gitt fullmakt til å erverve egne aksjer i henhold til reglene i allmennaksjeselskapsloven §§ 9-2 – 9-4.

For den enkelte aksje som erverves etter denne fullmakt skal det ikke betales mindre enn NOK 0,10. Det skal ikke betales mer enn det som er ordinær børskurs til enhver tid.

Fullmakten kan kun benyttes til å anskaffe en aksjebeholdning til bruk som vederlag i forbindelse med oppkjøp og oppfyllelse av eventuelle forpliktelser under incentivstrukturer med selskapets ledende ansatte.

Denne fullmakt kan benyttes én eller flere ganger. Den høyeste pålydende verdi av de aksjer som i alt kan erverves i medhold av fullmakten fastsettes til NOK 44 058 290.

Erverv av egne aksjer etter denne fullmakt kan bare skje dersom det vederlaget som skal ytes for aksjene ligger innenfor rammen av de midler selskapet kan benytte til utdeling av utbytte. For øvrig fastsetter styret de nærmere vilkår for erverv og avhendelse av egne aksjer under hensyntagen til at det ikke i noe tilfelle kan erverves egne aksjer etter denne fullmakt ut over det som er forenlig med forsiktig og god forretningsskikk, under tilbørlig hensyn til tap som måtte være inntruffet etter balansedagen, eller som må forventes å ville inntreffe.

Fullmakten gis varighet frem til ordinær generalforsamling i 2024, men uansett begrenset til 30. juni 2024."

10. Forslag til vedtektsendring

Møteleder redegjorde for styrets forslag.

Generalforsamlingen sluttet seg til styrets forslag og fattet dermed følgende vedtak:

"Vedtektene § 6 B slettes."

11. Emisjonsfullmakt til styret

Møteleder redegjorde for styrets forslag med tilleggsforklaringer fra styreleder. Generalforsamlingen sluttet seg til styrets forslag og fattet dermed følgende vedtak:

"Styret gis fullmakt til å forhøye selskapets aksjekapital ved nytegning av aksjer med samlet pålydende inntil NOK 88 116 580.

Fullmakten kan bare benyttes i forbindelse med (i) gjennomføring av eventuelle oppkjøp, (ii) styrking av selskapets kapitalstruktur og (iii) rettet emisjon mot selskapets ledende ansatte.

Aksjekapitalforhøyelse i henhold til fullmakten gjennomføres for øvrig på den måte, og på det tidspunkt, styret til enhver tid finner mest hensiktsmessig ut fra hensynet til selskapet og aksjonærene. Fullmakten kan benyttes en eller flere ganger inntil det angitte beløp. Fullmakten gir styret rett til å fravike aksjonærenes fortrinnsrett til nye aksjer i medhold av allmennaksjelovens § 10-4. Oppgjør av aksjeinnskudd skal kunne skje med andre eiendeler enn penger og fullmakten omfatter rett til å pådra selskapet særlige plikter jfr. allmennaksjelovens § 10-2. Fullmakten omfatter kapitalforhøyelse i forbindelse med fusjon, jfr. allmennaksjelovens § 13-5. Styret fastsetter de nærmere tegningsvilkår, herunder tegningskursen, og foretar de vedtektsendringer som måtte bli nødvendige som følge av kapitalforhøyelser med hjemmel i fullmakten.

Styrets fullmakt gis varighet frem til ordinær generalforsamling i 2024, men uansett begrenset til 30. juni 2024."

12. Styrets rapport om lønn og annen godtgjørelse til ledende personer

Møteleder redegjorde for hovedinnholdet i styrets rapport om lønn og annen godtgjørelse til ledende personer, utarbeidet i samsvar med allmennaksjeloven § 6-16 b.

Styrets rapport om lønn og annen godtgjørelse til ledende personer ble godkjent av generalforsamlingen gjennom en rådgivende avstemning.

13. Redegjørelse for foretaksstyring etter regnskapsloven § 3-3b

Møteleder gjennomgikk redegjørelsens hovedinnhold jf. allmennaksjeloven § 5-6 (4). Det ble ikke avholdt avstemning på dette punktet.

* * *

Alle vedtak ble fattet enstemmig med mindre annet er angitt i Bilag 1.

Ingen flere saker forelå til behandling. Møteleder erklærte generalforsamlingen for hevet.

Dispensasjon fra kravet om å utarbeide årsregnskap og årsberetning på norsk

Vi viser til Scana ASA (org.nr. 928 613 941) sin søknad om dispensasjon fra kravet om å utarbeide årsregnskap og årsberetning på norsk.

Skattekontoret gir på bakgrunn av en konkret helhetsvurdering selskapet dispensasjon fra kravet om å utarbeide årsregnskap og årsberetning på norsk språk, jf. regnskapsloven § 3-4 tredje ledd. Dispensasjonen forutsetter at engelsk språk benyttes i stedet ved utarbeidelsen, og at øvrige opplysninger som vedtaket baserer seg på, heller ikke endres vesentlig.

Kopi av dette brevet må sendes Regnskapsregisteret i Brønnøysund sammen med årsregnskapet. Det påligger den regnskapspliktige å dokumentere ved dette brev at tillatelsen er gitt.

Bakgrunn
Fra søknaden siteres utdrag:

> *Vi søker herved om dispensasjon til å utarbeide årsregnskap og årsberetning på engelsk i henhold til regnskapsloven § 3-4. Det søkes om dispensasjon fra og med regnskapsåret som blir avsluttet 31. desember 2022.*
>
> *Scana ASA er et børsnotert selskap med hovedkontor i Bergen. Selskapet eier virksomheter i Norge og Sverige som opererer innenfor divisjonene energy, offshore og maritime. Alle sentrale aktører og samarbeidspartnere innen denne bransjen behersker og benytter engelsk. Selskapet benytter også engelsk som arbeidsspråk i ekstern kommunikasjon. For mer informasjon om selskapets bransje/virksomhet henvises til selskapets webside scana.no.*
>
> *Scana ASA er notert på Oslo Børs og har dispensasjon fra vphl § 5-13 vedrørende krav til språk ved informasjonspliktige opplysninger. Selskapet rapporterer således all informasjon på engelsk. Selskapets største aksjonær er norske, men selskapet ønsker å nå en større aksjonærbase hvor finansmarkedet etterspør rapportering på engelsk.*

Det er heller ingen forhold rundt selskapets finansiering som skulle tilsi behov for regnskap på norsk.

Skattekontorets vurdering
Etter regnskapsloven § 3-4 tredje ledd skal *"årsregnskapet og årsberetningen ... være på norsk. Departementet kan ved ... enkeltvedtak bestemme at årsregnskapet og/eller årsberetningen kan være på et annet språk."*

I Ot. prp. nr. 42 (1997-1998) Om lov om årsregnskap mv., er det uttalt følgende om regnskapslovens formål, jf. pkt. 1.1:

> Regjeringen har som siktemål at regnskapsloven skal bidra til informative regnskaper for ulike grupper av regnskapsbrukere. Regnskapsbrukerne er dels investorer og kreditorer som tilfører kapital til foretakene, og dels andre grupper som har interesse av å vite hvordan foretaket drives, f.eks. de ansatte og lokalsamfunnet. Informasjonen til kapitalmarkedet skal gi grunnlag for riktig prising av finansielle objekter. Riktig prisdannelse på aksjer er en forutsetning for at ressursbruken i samfunnsøkonomien skal bli best mulig. Gode regnskaper vil også gjøre det vanskeligere for markedsdeltakere å ta ut spekulasjonsgevinster med basis i skjevt fordelt informasjon.

Det fremgår således at et av hovedformålene med regnskapsloven er å bidra til *"informative regnskaper for ulike grupper av regnskapsbrukere"*. Regnskapsbrukere vil omfatte, jf. uttalelsen i proposisjonen, blant andre investorer, kreditorer, ansatte, kunder og lokalsamfunnet.

Det er etter skattekontorets vurdering derfor avgjørende ved vurdering av om dispensasjon fra kravet til å utarbeide årsregnskap og/eller årsberetning på norsk kan gis, at det ikke foreligger mulige brukere av regnskapsinformasjon som blir vesentlig berørt negativt ved en eventuell dispensasjon.

Som nevnt ovenfor er det særlig hensynet til brukerne av regnskapsinformasjon som skal vurderes ved en dispensasjonssøknad. I dette tilfellet er det blant annet opplyst at alle sentrale aktører og samarbeidspartnere innen bransjen behersker og benytter engelsk, selskapet benytter engelsk som arbeidsspråk i ekstern kommunikasjon, selskapet er notert på Oslo Børs og ønsker å nå en større aksjonærbase hvor finansmarkedet etterspør rapportering på engelsk, og selskapet har fått dispensasjon fra Oslo Børs etter verdipapirhandelloven § 5-13 vedrørende krav til språk. Skattekontoret finner at disse forholdene samlet tilsier at dispensasjon fra kravet om å utarbeide årsregnskap og årsberetning på norsk kan gis.

Vennligst oppgi vår referanse ved henvendelse i saken.

ANNUAL REPORT 2022
Greetings from CEO
Looking back at 2022 I would say the year was characterized by high activity in all our business areas
and good progress on our strategic goals.
By January 2022 Scana increased its portfolio from three to six companies over night by acquiring
PSW and their three companies PSW Technology, PSW Solutions and PSW Power & Automation.
A key milestone in our strategy of
“powering the ocean industries”
. By the end of January also another
energy-company was added; Trans Construction – now seven companies onboard and ready to grow!
Each portfolio company has its own organization, management, and board with full responsibility
for its own operation and development. Scana aims to be an active owner by guiding and assisting
wherever needed in our organization exploiting our Group synergies. Scana consists of a small, efficient, and motivated team, aiming for results across the group.

Our companies are spread in three business areas: ENERGY, OFFSHORE and MARITIME. Let's dig into
each business area.
Our business area OFFSHORE signed several important riser-contracts last year. Our negative result
can be explained with postponement of larger projects and a challenge to fill the available capacity at
our facilities. Maintaining competence and capacity to meet expected growth has been prioritized,
and with the recent contract awards we are pleased with the prospects for 2023.
For PSW, the "Equinor-contract" at Mongstad is a game changer. After seven lean years in the drilling
industry, PSW Technology has secured an important foundation for the activity in the coming years.
The contract doubles the company's turnover and provides a welcomed long-term perspective.
Demand for ENERGY is increasing globally. Scana will continue adapting to new market situations
to secure our position as a market leader in our industry. Our business area energy experienced
great demand for sustainable energy solutions in Norway and the rest of Europe. Our companies have
positioned itself well in the market and had several breakthroughs in 2022; mobile battery containers
have recently been delivered to Germany, and the company has also demonstrated that ships at quay
can get shore power produced from hydrogen! Our employees work hard to create sustainable and
innovative solutions for customers and has succeeded.
Our business area MARITIME has market exposure to all the important marine industries, and we see
several interesting opportunities to be pursued in the next year. Tendering activities have increased
within segments such as FSRU and FPSO. In the medium term, the energy crisis seems to accelerate
the offshore wind project, where we are well positioned with our mooring solutions.
Among other things, we can look back on a successful delivery of mooring equipment to the floating
wind farm Hywind Tampen.
CEO CORNER

Last year's underlying financial results ended
revenue of NOK 912 million and an EBITDA of NOK 71 million.
In 2022 we have strengthened our capital structure following conversion of seller credit and we ended
the year with strong and growing order intake that has improved earnings visibility.
We will continue the good work within all our business areas and aim to create value for all our
shareholders. I am looking forward to what we will achieve together in 2023!
Best regards,
Oddbjørn Haukøy

Interim CEO of Scana ASA
With our leading expertise, our purpose is to solve
global energy challenges for both today's customers
and for future generations!
Oddbjørn Haukøy
CEO CORNER
Oddbjørn Haukøy, interim CEO, Scana ASA

Report from the board
of directors
Scana ASA is the parent company of an industrial Group supporting the electrification and decarbonization
of maritime and energy sectors through the business areas OFFSHORE, ENERGY and MARITIME.
The company is run by seven employees from its headquarter in Bergen, with operational businesses
in Norway and Sweden, supported by external resources adding competence and capacity.
In 2022 the acquisition of PSW was completed in January and the new strategy of "powering the
ocean industries"
was released. Within ENERGY a strong position in the Norwegian shore power
market has been exported to several Nordic countries, and customer near product development has
opened a large market for mobile battery solutions for land based industry where strategically important
contracts was entered into in the German and Dutch market. For OFFSHORE an improved market
sentiment has led to high bidding activities while contract awards has been postponed. Maintaining
capacity and competence to deliver on expected growth has been prioritized and has impacted the results
in this area negatively in 2022. Significant contract awards in December and first quarter of 2023 gives
a strong foundation for profitable growth in 2023. The MARITIME business area has benefited from its
diversified market offering where mooring solutions for FPSO's has driven the order intake while tendering
activities within LNG, aquaculture and offshore wind remain high. The valve control business has delivered
weaker results within new projects while the aftermarket continues to deliver strong results.
The restrictions related to the covid-19 pandemic continued in 2022 but were eased significantly in most
countries during the year and has had limited impact on Scana. However supply chain issues especially
from Asian countries have caused delays and price increases on certain components delaying project
progress and impacting margins to a certain extent.
Russia's invasion of Ukraine has significantly influenced market dynamics, primarily through the impact on

energy prices and for a period significant volatility in steel prices. With a few exemptions the increased
volatility in steel prices and subsequently hardware cost has been delt with through price increases on
our deliveries while a few projects were negatively impacted. At the outbreak, Scana did not have any
employees in Ukraine or Russia and these countries accounted for a very limited part of our revenue.
Scana continuously monitor and comply with all sanctions on Russia relevant to our operations.

OFFSHORE
ENERGY
MARITIME
THE BOARD'S REPORT

HIGHLIGHTS
Transformative acquisition of PSW and ATC has lifted revenue and other operating income from NOK 305 million to NOK 912 million
Scana raised gross proceeds of NOK 452 million through private placements in January 6
th
and December 19
th
2022
Order intake increased from NOK 167 million to NOK 1 087 million
–
Commercial breakthrough for mobile battery systems for industrial use in Germany and Holland
–
European expansion of shore power and fast charging solutions through contracts in Sweden and Iceland
–
Mooring solutions for 2 FPSO's destined to Brazil from undisclosed repeat customer
–
Sale and recertification of deep-water riser system to Northern Ocean Operations Ltd
SUBSEQUENT EVENTS
Game-changing contract award from Equinor of NOK 1.8 billion including options
Scana company with Letter of intent (LOI) for FSRU mooring system to a floating LNG terminal
in Germany.
Oddbjørn Haukøy constituted as new CEO following the resignation of Styrk Bekkenes.
New BoD for Scana consisting of chair Pål Selvik, Vidar Rabben, Ida Ianssen Lundh and Birgitte Feginn Angelil.
Scana strengthens its management team with Baste Tveito as EVP Operations
and
Espen Thomassen as CCO.
Scana company awarded a substantial contract for an offshore development project.
INCOME STATEMENT

Scana is positioned towards the electrification megatrend and to deliver cost effective solutions at
a low carbon footprint to the ENERGY sector through a highly skilled workforce and from state of the art
facilities at Mongstad and Ågotnes.
With strong demand for the services and products of the Group maintaining capacity to deliver on
future growth has been prioritized and has also impacted the results for 2022. Furthermore geographic
and product range expansion has been prioritized within the ENERGY business area where short term
cost is expected to generate longer term profits in the future.
Scana reported revenue and other operating income in 2022 of NOK 912 million, up 199 % from
NOK 305 million in 2021. The growth is driven by the acquired business area ENERGY with
NOK 355 million, and OFFSHORE increasing from NOK 74 million to 367 million where NOK 317 million
relates to acquired companies. MARITIME had a decrease in revenue from NOK 230 million to NOK 201 million.
While delivering significant growth in 2022 revenue has been negatively impacted by postponements of
project sanctioning within the OFFSHORE area specifically related to the drilling-companies.
On the back of a significant increase in revenue the operating expenses has increased from NOK 288 million
to NOK 841 million resulting in an EBITDA of NOK 71 million. Depreciations have increased from
NOK 8 million to NOK 90 million and is mainly driven by the acquisition of PSW.
Finance cost has increased from NOK 10 million to NOK 42 million where the increase relates to interest
expense. Interest expenses increased through the financing the acquisition of PSW and from the significant
increase in right of use assets mainly related to long term property leases.
THE BOARD'S REPORT

The Group recognized a tax income of NOK 11 million compared to NOK 24 million in 2021 which relates
to increased deferred tax asset. See further information in disclosure 11.
The Group loss was NOK 45 million compared to a profit of NOK 27 million in 2021. The earnings per
share was negative NOK 0.12 compared to NOK 0.25 in 2021.
Order intake in 2022 was NOK 1 087 million compared to NOK 167 million in 2021 where all business
areas contribute to the growth. OFFSHORE increased with NOK 466 million (acquired companies),
ENERGY with NOK 362 million and MARITIME with 103 million. Bidding activities has remained high
throughout 2022 with several larger contracts first being awarded in Q1 2023. An increased focus on

electrification across industries and a recurring offshore market are the two main drivers behind the
order intake. The increased order intake contributed to a record high order backlog of NOK 533 million
year end 2022. The majority of the order backlog is for delivery in 2023.
BALANCE
Total assets as of 31.12.22 was NOK 1 378 million compared to NOK 223 million last year. The increase
is related to the acquisition of PSW, see disclosure 3 related to business combinations. Gross interest
bearing debt was NOK 152 million as of 31.12.2022 compared to NOK 38 million last year. As of
31.12.22 intangible assets was NOK 398 million of which NOK 274 million was goodwill and NOK 72 million intangible assets where the majority is related to the acquisition of PSW. Right of use
assets increased to NOK 403 million compared to NOK 8 million last year which lead to an increase in
lease liabilities to NOK 412 million from NOK 8 million last year.
CASHFLOW
Net cashflow from operating activities was NOK 70 million. The deviation from operating profit is mainly
related to depreciation, amortizations and changes in working capital.
In 2022 net cash from investing activities was NOK 205 million where the majority is related to the net
cash outflow from the acquisition of PSW and ATC.
Net financing activities was NOK 109 million. To finance the acquisition net cash proceed from issuing
of new share capital contributed with NOK 176 million and bank borrowings with NOK 165 million of
which NOK 125 million was used to repay short term debt and NOK 15 million in installments of long
term debt. Payments of leasing liabilities was NOK 54 million and NOK 36 million has been paid in interest.
SCANA ASA ACCOUNTS
The parent company Scana ASA had a loss of NOK 15 million in 2022 compared to a profit of NOK 56 million in 2021. The major deviations relate to income from subsidiaries and tax cost.
Total assets as of 31.12.22 was NOK 1 096 million, compared to NOK 433 million last year. This is
mainly derived from the acquisition of PSW.
Equity amounted to NOK 681 million at the end of 2022, compared to NOK 260 million last year.
The increase in equity is driven by the capital increases in January and December with reference to
disclosure 9 in the Scana ASA accounts.
THE BOARD'S REPORT

Scana ASA had no research and development activities in 2022. The R&D activities of the Group are
presented in the annual reports of the respective operational portfolio companies.

The loss of NOK 15 million in 2022 was allocated to other equity.
BUSINESS AREAS
OFFSHORE
OFFSHORE consist of the subsidiaries PSW Technology and PSW Solutions located at Mongstad,
Norway and Subseatec located in Kristinehamn, Sweden. The business area provide products, services
and life-time extensions to critical equipment within several segments of the offshore industries.
The business area delivered NOK 367 million in revenue in 2022 compared to NOK 74 million in 2021
where the growth is related to the acquisition of PSW. Throughout 2022 there has been a strong market
sentiment due to increased energy prices but contract awards and commencements has been delayed.
Maintaining capacity to deliver on expected growth has been prioritized over short term cost cuts which
has impacted profitability negatively in 2022. EBITDA increased from NOK 10 million to NOK 50 million
where the surface treatment business delivered strong margins. With NOK 64 million in depreciations
related to long term property leases on the Mongstad facilities and depreciations on tangible and
intabible assets, EBIT was negative with NOK 14 million compared to NOK 9 million last year.
With significant contract awards in Q4 and the game changing contract award from Equinor in January
2023 the outlook for the business area is strong for 2023. A strong topline growth is expected to lead
to improved operating margins.
ENERGY
ENERGY consist of PSW Power & Automation and ATC (Trans Construction) located at Ågotnes and
Gardermoen respectively. The business area provides complete solutions within electrification and
renewable energy to offshore, marine and shore-based activities.
The business area was new for Scana in 2022 and delivered NOK 355 million in revenue with the majority
of the revenue being related to electrification of land based and ocean industries. EBITDA for 2022 was
NOK 28 million where margins were negatively impacted by challenges in a few projects and challenges
within supply chain. With NOK 18 million in depreciations related to facilities on Ågotnes and tangible
and intangible assets EBIT in 2022 became NOK 10 million.
The continuous focus on electrification is expected to drive demand within this business area. The order
backlog of NOK 193 million as of 31.12.2022 and several contract awards in Q1 2023 provides a foundation
for growth in 2023.
MARITIME
MARITIME consist of Seasystems and Skarpenord located at Vestby and Rjukan/Husnes respectively.
The business area provides mooring solutions and valve remote control systems across the ocean industries.
The business area delivered NOK 201 million in revenue compared to NOK 230 million last year. The decline
in revenue was mainly related reduced project activity while aftersales activities remained consistent to

last year. EBITDA was NOK 20 million compared to NOK 29 million where the mooring business was the main
contributor. The business area has an asset light business model with NOK 3 million in depreciations
resulting in an EBIT of NOK 11 million compared to NOK 17 million last year.
High tendering activities resulted to in an LOI for mooring of a large FSRU-project in Germany which
is expected to result in a substantial contract award in Q1 2023. The outlook for the business area is
strong with LNG and offshore expected to be the short term driver and offshore wind a large potential
for the medium term.
THE BOARD'S REPORT

STRATEGY
Scana has a strategy of
"powering the ocean industries"
through a Group of strong service- and
equipment suppliers and become a partner for our customers in reducing the climate footprint.
Scana shall create long term value for its shareholder through professional and active ownership in its
portfolio companies.
CORPORATE GOVERNANCE
Scana follows Norwegian Code of Practice for Corporate Governance. The companies practices are
largely in accordance with these recommendations. Reference is made to the Corporate Governance
report on page 45.
RISK MANAGEMENT
The Groups main risk is the macroeconomic environment and the development of global markets.
The companies have implemented a series of measures to adopt to changing market conditions.
This includes but is not limited to increased market- and sales effort, supplychain optimalisation and
focused product development.
Furthermore the companies are exposed to risk within project execution and availability and pricing
of key input factors and components. The risk is handled through balancing contract risk between
customer and suppliers.
The directors and officers of Scana ASA are covered under an Scana Group Director & Officer's Liability
Insurance (D&O). The insurance covers personal legal liabilities including defence- and legal costs.
The officers and directors of the parent company and all subsidiaries globally (owned more than 50 percent)
are covered by the insurance.
The company is exposed to financial risk:
MARKET RISK

Market risk is the risk that fluctuations in market prices, e.g. exchange rates and interest rates, will affect
future cash flows or the value of financial instruments. Market risk management aims to ensure that risk
exposure stays within the defined limits, while optimising the risk-adjusted return.
Scana has a centralized finance function. Hedging of currency and interest rate exposure is done in
accordance with the Group's policy and routines. Scana seeks to reduce the risk associated with currency
and interest rates by using hedging instruments. This is done centrally by the finance department on
the basis of the exposure reported by the operational units.
CURRENCY RISK
The Group is exposed to transactional foreign currency risk to the extent that there is a mismatch
between the currencies in which sales, purchases, receivables and borrowings are denominated and
the respective functional currencies of Group companies. The Group's management continuously monitors
and reports on the Group's currency positions. The Group's risk management policy is to hedge material
estimated foreign currency exposure in respect of forecast sales and purchases over the following
12 months at any point in time. The Group uses forward exchange contracts to hedge its currency risk,
most with a maturity of less than one year from the reporting date.
INTEREST RATE RISK
The Group's interest rate risk relates to the Group's debt portfolio and is managed at Group level.
The Group's objective is to secure and counteract major effects from changes in the market interest rate.
Scana has no interest rate hedges on the balance sheet date.
THE BOARD'S REPORT

LIQUIDITY RISK
An important goal for the Group is to secure financial flexibility to make optimal business decisions.
The Group works continuously with reducing financial risk through close cooperation with the subsidiaries
monitoring short- and long term cashflow prognosis. Strong focus on reducing working capital requirements
in close cooperation with customers and suppliers. On larger contracts liquidity risk is managed through
balanced milestone structures with our customers and suppliers.
As of December 31
st
2022 the Group had a liquidity reserve of NOK 113 consisting of NOK 3 million in cash
and NOK 110 million in undrawn creditfacility. The main financing agreements for the Group are with DNB

and consist of termloans of NOK 150 million, workingcapital facility of NOK 110 million and a trade finance
facility of NOK 60 million. As of December 31
st
2022 Scana is compliant with all financial covenants.

CREDIT RISK

The Group has policies to ensure orders are not entered into with financial distressed customers. Credit
assessments are considered prior to entering into contracts while accounts receivables are continuously
monitored on both subsidiary and Group level.

The Group considers it largest exposure to credit risk to be book value of accounts receivables and contract
asset and other receivables.

The credit risk on larger customer contracts is mainly handled through prepayments and milestone-invoicing
throughout the project period. Credit insurance is considered on a case to case basis. The majority of the
customers are to international solid customers or customers with a long track record. Historically, losses
on accounts receivables has been low.

FURTHER REFERENCES TO DISCLOSURE 20 FOR FURTHER
DESCRIPTION OF FINANCIAL RISK

CORPORATE SOCIAL RESPONSIBILITY

As a listed industrial owner to companies powering the ocean industries, Scana believes strongly in growing
our businesses to the point where we can give back to society. Closely connected to our prioritized
SDG's, we commit to being accountable to ourselves and our stakeholders through corporate responsibility
programs and initiatives.

Scana ASA is responsible for the overall guidelines applicable for the company's subsidiaries. Each subsidiary
is responsible for implementing guidelines suited for the activities and the market the company operates
in. Scana ASAs subsidiaries shall be governed in an economic, social and environmentally responsible
manner. Corporate social responsibility shall have a core part in planning and performing the company's
services. Companies shall comply with international conventions and protocols for corporate governance,
ethical guidelines and security procedures.

Scana ASA's corporate social responsibility guidelines have five main priority target areas:

Human rights
Corruption
Employee rights
Social conditions
The external environment

THE BOARD'S REPORT

ANNUAL REPORT 2022

HUMAN RIGHTS

Scana ASA and the subsidiaries must actively ensure that the activities carried out do not violate basic human rights. Human values such as integrity, honesty, justice and respect must form the basis for how social responsibility is exercised. For 2022 we have prepared a report on the work on fundamental human rights and decent working conditions according to the Transparency Act, which is published on Scana ASAs webpage within 30 June 2023. In this report we have assessed and identified possible Human Rights issues in our supply chain, and will work closely with our stakeholders to prevent, act upon, or influence negative impacts.

Scana ASA and its subsidiaries have not had any incidents in 2022 that indicate that these values have been violated and will continue to work in 2023 to always promote the safeguarding of human rights, including assessing our supply chain.

CORRUPTION

Scana ASA and its subsidiaries must always follow the laws, guidelines and regulations that apply in each country and region where the companies and associated subsidiaries are located and operate the companies must pay taxes and fees, as well as implement measures to prevent corruption and mismanagement. Scana ASA has zero tolerance for corruption and encourages employees to report the slightest suspicion of violations.

EMPLOYEE RIGHTS

Scana ASA has a stated goal to ensure safe working conditions and to facilitate a good working environment where employees thrive and develop their skills. The working environment is considered good. Young workers are the future of the Scana companies, and we aim to play an active role in the facilitation of traineeships and internships in our companies. Scana ASA supports the employees' right to organize in trade unions and trade organizations. Procedures have been drawn up and implemented for the personal data legislation that was introduced in 2018 (GDPR).

The Group is exposed to risks related to health, safety, and security in the workplace and while travelling.

In 2022 the coronavirus had consequences of increased sick leave in the Group in 2022, especially in the first part of the year. The virus had no other material consequences for our operations in 2022.

SOCIAL CONDITIONS

Scana ASA and its subsidiaries work actively to promote the objectives of the Discrimination Act. We believe in fair treatment in our recruitment, promotion, development opportunities and protection against harassment. We believe strongly in an inclusive working environment.

The companies aim to be a workplace where there is no discrimination across all types of stakeholders regardless of age, gender, religion, race, national or ethnic origin, cultural background, social affiliation, disability, sexual orientation, marital status or political opinion.

All Scana companies have ethical guidelines, and it clearly states how to secure fair employment, equal
pay and equal rights. These guidelines include how we work and are described further in our Sustainability
report where we have chosen Sustainable Development Goal 5: Gender equality as one of our goals.
EQUALITY
Scana ASA had 7 full-time employees at the end of 2022, 2 were women. The company works to promote equal
development opportunities and to ensure that there is no discrimination of any kind. This work is described in
the company's ethical guidelines and the order also applies to all Scana ASA's portfolio companies.
Scana ASA and the portfolio companies had 345 employees as of 31 December 2022, an increase from
91 employees at the end of 2021, but this is due to the acquisition of the PSW Group and ATC. 14 percent
of the employees are women and 86 percent are men.
THE BOARD'S REPORT

THE OVERALL GENDER BALANCE IN THE GROUP
Number of women and men, per company and in total:
There is no involuntary part-time work at Scana. The part-time positions are few, and these are voluntary
and linked to specific projects. From 2023, voluntary part-time will also be reduced due to the EU's
temporary agency directive, which comes into force from 1 April 2023. Temporary employment occurs to
a small extent, but when these are in use, this is especially with regard to projects. When it comes to
parental leave, we see that women still take most of the flexible weeks, although men also take some here.
Number of temporary employees, part time positions and average number of parental leave per gender:
Salary level based at position/level, with distribution by gender:
In the operating companies there is a predominance of men, which can be attributed to historical and
industrial traditions. However, women are represented in all the subsidiaries' management Groups.
Scana ASA also meets the Public Limited Liability Companies Act's requirement for gender representation
in that two out of four board members are women.
In our recruitment processes, we work actively to find female candidates to increase the proportion of
women in the Group, in line with the Sustainable Development Goal 5, gender equality. When it comes
to recruiting processes, we see more men than women applying for these technical/operational positions,

while when it comes to apprentices/trainees within the same type of position, both sexes apply. For
administrative positions, the pool of applicants is probably equally distributed. We actively work towards
the market to find female and male candidates for our positions because we believe that the workplace
achieves better results with increased equality and increased diversity.
The table below shows an overview per position level (set based on similarities and salary level) for
average women's salary at a set level relative to the average salary for men. It shows an average level
where women's pay in total for the Group amounts to 88 % of a man's level. The difference does not
show differences such as seniority, differences in type of positions in position level, number of years and
responsibility/risk linked to the different employees.

We have routines to ensure that pay adjustment processes do not discriminate based on gender and
work continuously to further develop these processes to ensure equal pay for equal work.
See Guidelines for Senior executives and other remuneration and the 2022 Report of remuneration for
senior executives included in the Annual report for information regarding remuneration at executive level
and per gender.
Injuries and sickness leave, per company and in total:
There was an increase in sickness absence in Scana ASA in 2022 of 2% compared to 0.3 % in 2021.
This is mainly due to the corona pandemic. For the Scana ASA and subsidiaries in total, sickness absence
in 2022 was 5 % (2021: 5 %). There were no fatal accidents in the companies in 2022, equal to in 2021.
There is no information on specification per individual case as this would be considered a breach of
GDPR guidelines.

THE EXTERNAL ENVIRONMENT
Scana ASA's portfolio companies have licenses for their operations and do not affect the external
environment beyond the allocated emission permits. Through measures such as the use of renewable
energy sources, recycling, waste reduction and the development of sustainable solutions for the ocean
industries, the Scana companies improve the environmental sustainability of their operations as well as
for their stakeholders. We assess our supply chains, and we eliminate reliance on stakeholders with a
risk for unethical labor practices.
ENVIRONMENTAL RESPONSIBILITY

We commit to reducing pollution, waste and emissions in our businesses and for our stakeholders.
We focus on responsible consumption and production.
We commit to a "zero" strategy, meaning that we base our sustainability strategy on the vision of reaching zero CO
2
emissions by 2050.
By planning and strategic placement, we aim to support our stakeholders in consciously choosing
sustainable methods for maintenance and production.
We create product lines that enhance our CSR values, and aim for the mindset of "reduce, recycle, re-use" in all that we do.
See the Sustainability Report Included in the Annual report for additional information including
the assessment related to environmental factors.
GOING CONCERN
In accordance with the Accounting Act § 3–3c, we confirm that the financial statements have been
prepared under the assumption of going concern. This assumption is based on a strong order backlog
and subsequent order intake in 2023 and the estimated working capital requirements for the 12 months
following the balance sheet date. Reference is made to disclosure 5 on page 74.

ANNUAL REPORT 2022
Scana and portfolio
companies
Scana is a listed industrial owner company in the ocean industries creating value through active
ownership in market-leading portfolio companies. Our vision is to accelerate decarbonisation of
the maritime and offshore sector by being a driving force in electrification and emission reduction
solutions.
Scana's portfolio companies have a solid innovation and commercialisation history based on core
competence in selected niches. Scana is headquartered in Bergen and has around 350 employees.
Scana's portfolio companies are divided into three business areas:
OFFSHORE
Throughout the entire lifetime of offshore assets, we provide products, services and life-time extensions to critical equipment within several segments of the offshore industries.
PSW Technology
PSW Solutions
Subseatec
ENERGY
All the way from shoreline to seabed, we power the ocean industry with sustainable energy solutions – providing complete solutions within electrification and renewable energy to offshore,
marine and shore-based activities.
PSW Power & Automation
Trans Construction – ATC
MARITIME
We supply sophisticated and dependable valve remote control systems and mooring solutions to
vessels, rigs, and floating structures serving the shipping, oil and gas, aquaculture, and energy in-
dustries.
Seasystems
Skarpenord
VISION AND MISSION
VISION
Contributing to a smarter world of marine products and services through
our Group of quality suppliers.
MISSION
Through active and experienced ownership, Scana ASA shall guide and develop
our Group of companies to achieve their respective targets in a profitable,
sustainable and safe way.

FULL YEAR
Throughout the entire lifetime of offshore assets, we provide products, services and life-time extensions
to critical equipment within several segments of the offshore industries. In 2022 this business area
accounted for 40 % of the turnover.
SHORT ABOUT OUR OFFSHORE COMPANIES
PSW Technology
offers a wide range of services and solutions to the global drilling industry. The company
has all the expertise our customers require in one place. Our facilities at Mongstad are ideally situated to
provide IMR services to both the Norwegian and British sectors of the North Sea.
The company works within subsea and well control, lifecycle services and
has unique yard facilities available.
Our proximity to Sløvåg and PSW Offshore Wind & Yard makes us a full-service provider for your rig or
vessel maintenance needs.
PSW Solutions

has extensive experience from on/offshore installations and provides a unique expertise in the planning and execution of ISS (Insulation, Scaffolding and Surface treatment) services. The company also performs NDT services and control of lifting equipment both onshore and offshore. Subseatec is one of the world's most experienced specialist companies in the world regarding for riser applications to the oil and gas industry. Subseatec handles product development, sales, and contract management. Product range consists of risers, pipe and flow lines, bodies and other subsea accessories.
STATUS
The offshore market is recovering with increased demand driven by energy security, at the same time the supply side has been reduced resulting in favorable market conditions. The offshore business area is well positioned to fill up its facilities and seize an even larger market. The key drivers are rising demand for service and products with low carbon footprint, growing maintenance lag.
Our companies within the offshore area are well-positioned for strong offshore project pipeline through unique infrastructure and carbon reducing solutions.

Sustainable energy solutions
– providing complete solutions within electrification and renewable energy to offshore, marine and shore-based activities.

All the way from shoreline to seabed, we power the ocean industry with sustainable energy solutions
– providing complete solutions within electrification and renewable energy to offshore, marine and shore-based activities.

Our business area Energy is a leading player within electrification with shore power systems, energy
storage systems and e-house modules as key offerings.
This business area accounted for 38 % of the turnover in 2022.
SHORT ABOUT OUR ENERGY-COMPANIES
PSW Power & Automation
delivers complete solutions within electrification and renewable energy.
The company specializes in the design and integration of electrical power systems, electrical infra-
structure, energy storage systems and control systems.
Trans Construction
is a leading engineering company with extensive track record and which has
specialized itself on design and production of E-house modules to the maritime-, offshore and onshore based industry.
STATUS
The continuous focus on energy prices and decarbonisation attracts interest, both for current product
offerings and for spinoff products where mobile battery systems were added to the product portfolio
this year. The electrification of European shores will continue to drive demand for Scana's services,
and there is also a strong demand for e-house modules to support offshore decarbonisation.
Our companies within the energy area offer complete solutions for electrification in fast-growing
markets with powerful underlying drivers.

FULL YEAR
We supply sophisticated and dependable valve remote control systems and mooring solutions to vessels,
rigs, and floating structures serving the shipping, oil and gas, aquaculture, and energy industries.
MARITIME consists of Seasystems AS, delivering mooring solutions to floating structures across ocean
industries, and Skarpenord AS, supplying valve remote control systems for the shipping and oil & gas
industry. This business area accounted for 22 % of the turnover in 2022.
SHORT ABOUT OUR MARITIME COMPANIES
Seasystems
has high internal competence within project management, engineering, fabrication, and installation, we offer sophisticated and reliable mooring solutions to floating structures. Through a continuous focus on quality and functional design, we always strive to find the optimal solution
for each project. Seasystems operates in several segments, such as floating wind, oil & gas and fish farming.
Skarpenord
is our second company within MARITIME – a leading supplier of valve remote control systems

for shipping and the oil and gas industry. More than 40 years in the business makes us an experienced supplier.
The company delivers actuators, solenoid valve cabinets, hydraulic power units and computerized valve control.
STATUS
Our companies within MARITIME are leading provider of innovative mooring solutions and valve remote
control systems for vessels, rigs and floating structures. Since 2015 diversifying into offshore aquaculture
and wind with milestone contracts, in addition to historical maritime services. The energy crisis accelerates
offshore wind projects, where we are well positioned. Continued growth in LNG (FSRU) as a catalyst for
long-term energy transition.
MARITIME is a niche leader with strong track record in growing market segments.

ANNUAL REPORT 2022
HIGHLIGHTS 2022

25
SCANA ASA
|
ANNUAL REPORT 2022
JANUARY
Acquisition of PSW completed. Scana increased its portfolio from three to six daughter companies by
acquiring PSW and its three Bergen-based companies.
PSW Power & Automation awarded contract by Havnekraft AS The contract includes delivery of a
high-voltage shore power solution. PSW Power & Automation will design, assemble, and test the
complete system in their facilities at Ågotnes before it is shipped to Haugesund for installation and
commissioning.
Scana expanded its Group management by hiring Oddbjørn Haukøy in the position as Chief Commercial
Officer, he came from the position as CEO of PSW.
PSW Power & Automation acquires Trans Construction AS – hoping to take a larger position in the market.
As part of the strategy to strengthen the position within modular based power systems,
PSW Power & Automation entered into an agreement to acquire the leading engineering company
Trans Construction AS.

FEBRUARY
PSW Technology entered a strategic agreement with Cameron. PSW Technology signed an exclusive
licence agreement with global oil service provider Cameron, a Schlumberger company. The agreement
allows PSW to carry out recertifications of risers produced by Cameron in accordance with OEM (Original
Equipment Manufacturer) standards.
Skarpenord wins another important contract in the LNG market. Skarpenord secured the delivery of valve
remote control system for 12 x LNG - driven container vessels.
MARCH
More mooring within aquaculture. Seasystems won another important contract within aquaculture, this
time to the Hydra project. Hydra is a result of the government's development concessions, which facilitate
the use of new technology to create growth in the fish farming industry.
Seasystems delivers anchoring system for Brazilian FPSO,signed another contract for the delivery of
anchoring equipment such as chain stops, jacks, and winches.
Seasystems had its important breakthrough as a supplier of mooring to the first floating tidal energy array.
Highlights for Scana 2022
2022 has been characterized by a strong operational focus. Several large projects were delivered and completed. Here is an overview of the most important events of the past year.
HIGHLIGHTS 2022

Seasystems delivered 33 mooring brackets
for the Hywind Tampen project.
HIGHLIGHTS 2022

APRIL
PSW Power & Automation signed another sizeable contract for a shore power solution to Iceland.
PSW Power & Automation and Westgass Hydrogen entered a strategic collaboration aimed towards
deployment of container-based hydrogen fuel cell systems for power applications. The story continues

in September 2022.
MAY
Seasystems has signed a contract for the delivery of anchoring system to an FPSO project in Brazil.
JUNE
PSW Technology has signed an important agreement with an unnamed rig company for the delivery
of marine risers to operations in West Africa.
PSW Power & Automation signed a contract with Västtrafik for the delivery of fast charging system to
electric ferries in Strömstad in Sweden.
PSW Technology signed a one-year extension of its frame agreement with Odfjell Drilling for maintenance
and recertification of marine riser and subsea equipment for alle the drilling units of the company.
JULY
PSW Power & Automation signed a contract with Zeppelin Rental GmbH in Germany for the delivery of
multiple mobile battery systems. The battery solution can replace or optimize the operation of traditional
diesel generators and will be a significant contributor to the environmental decarbonization.
HIGHLIGHTS 2022
Actuators manufactured at Skarpenord,
Rjukan.

PSW Power & Automation signed a contract for the design, assembly, and testing of a topside E-House module for an international subsea company.
PSW Power & Automation signed another contract for the delivery of mobile battery systems, with
Energyst Rental Solutions.
AUGUST
More riser joints in the market. Subseatec signed a contract with an international energy company for
the delivery of riser joints.
SEPTEMBER
PSW Technology signed an important agreement with Odfjell Drilling for the delivery of marine risers
to operations in West Africa.
PSW Power & Automation demonstrated a hydrogen-based shore power solution. A Norwegian consortium
comprised by four local players, PSW Power & Automation, Westgass Hydrogen, CCB and H2 Production,
was established to provide a high-capacity hydrogen-based shore power solution to the maritime sector.
The groundbreaking system, which has been designed by PSW and piloted last autumn at CCB's
shipyard in Ågotnes, was demonstrated to the maritime industry at on 19 September 2022.
Shore power fuelled by clean hydrogen – another milestone!
Shore power solution in Hafnarfjordur

harbor (Iceland), supplied by
PSW Power & Automation.

OUR PATH TO NET-ZERO

31
SCANA ASA
|
ANNUAL REPORT 2022
Scana's sustainability journey
– our path to net-zero

In Scana we work together for a sustainable future by accelerating the decarbonization of the MARITIME
and OFFSHORE sector by being a driving force in Sustainable electrification- and emission reducing solutions.
Scana's policy for sustainability is part of our management system. The system describes ambitions,
direction, and more detailed requirements on the topics of ESG. Our formal ESG journey started in 2021,
and continued in 2022 by appointing a Sustainability & HSEQ Manager. Implementation initiatives will
continue in 2023 and onward.
In 2022, Scana and portfolio companies came together to establish the "Scana QHSE group". This group
consist of key QHSE resources from Scana and all the portfolio companies. Together we take meaningful
steps towards sustainable business conduct, through initiatives implemented within the respective
companies. Resources and responsibility are appointed in the portfolio companies and on group level.
Our Sustainability strategy is based on the vision of "reaching zero". The goal is to cut greenhouse gas
emissions (GHG) to as close to zero as possible. We aim to achieve a "net-zero" emission target within 2050
for Scana and our portfolio companies, with a 50 % reduction of scope 1 and 2 emissions within 2030.
STEP 1:
Knowledge is key: We start by understanding our base-line overview, measuring our greenhouse
gas emissions Scope 1 and 2 (CO
2
). Some scope 3 emissions are added.
STEP 2:
We establish effective emission reduction initiatives, through targeted actions such as green energy, solar panels, electric vehicles etc. Further initiatives are implemented: waste management, "reduce, reuse, recycle" initiatives and digitalization projects are some of the examples that are implemented in our portfolio companies.
STEP 3:
Any emissions that remain, we aim to offset by co-operation with emission compensation initiatives ("carbon offsets") on land and in the oceans by replenishing natural resources or supporting causes that can help neutralize the company's impact.

OUR COMMITMENT TO THE UN SDG'S

In 2021 we defined four of the UN's Sustainable Development goals (SDGs) as our primary goals, and together with our portfolio companies, we have implemented processes for working towards these goals. Scana has implemented ethical guidelines that specify how our companies should behave and comply, also including requirements for ethical business conduct.

Our updated ethical guidelines can be found at:
www.scana.no

We started gathering information on the performance towards the SDGs in 2021 and 2023, and in 2023 we will continue to work towards KPIs, and strategic goals related to the SDGs.

OUR PRIORITIZED SDGS ARE:

5 – Gender equality
8 – Decent work and economic growth
12 – Responsible consumption and production
13 – Climate action

In addition to our primary goals, several of our companies have identified other key SDGs to contribute towards sustainable business conduct. In 2022 we have performed a materiality assessment, aiming to identify the most critical Environmental, Social and Governance issues for the Scana companies and our stakeholders. We see that these issues evolve around gender equality, safe working environments, responsible production and taking urgent climate actions.

STAKEHOLDERS AND MATERIALITY

In Scana, our aim is to understand the importance of specific ESG- and sustainability topics. We do this by performing a "Materiality Assessment" .

"Materiality Assessment" is a tool to help identify and prioritize which ESG issues are the most urgent.

It helps us to determine which environmental, social, and governance (ESG) issues matter most, not only
to our internal-, but also to our external stakeholders. With this knowledge, we determine what strategic
actions must be put in place to meet the expectations of our stakeholders.

Through a process of involving all Scana companies, we have gathered input identifying our most relevant
stakeholders and their material issues. Through this process, we've asked ourselves "what is the most
important issue of interest for this interested party, and how does it compare to other issues?"
The information in this report covers Scana and all its portfolio companies, unless otherwise specified.

MATERIAL TOPICS, KEY STRATEGIES AND POINTS OF ACTION

The identified ESG issues in the materiality analysis are seen in close relation with our prioritized SDG's.

The material topics of addressing and aiming to prevent climate risk, reducing emissions from our own energy consumption and transport, as well as chemical handling and waste management are important for working towards SDG 13; climate action and 12; responsible consumption and production.

We aim for zero injuries and illnesses and will increase our focus to work actively towards increased equality and diversity in cooperation with our stakeholders, providing safe, inclusive working environments for all workers, with special focus on young workers and female workers. This corresponds with the SDGs 5; gender equality and 8; decent work and economic growth.

On the topic of governance, we commit to taking an active role in preventing corruption and focus on compliance in all aspects of our business. Risk management is an important tool to prevent hazards

and unwanted incidents with respect to our business, corresponding with the SDGs 8; decent work
and economic growth and 12; responsible consumption and production.
ENVIRONMENT
SOCIAL
GOVERNANCE
CLIMATE RISK
We seek to invest in companies that support the transition to a low-carbon economy, and those that are resilient to climate change. Climate risks will be a part of the risk assessment in all portfolio companies, and we will actively work to reduce the negative environmental aspects of the portfolio companies while increasing the positive environmental aspects.
EMISSIONS
We aim to reduce our carbon footprint by actively taking steps toward reducing emissions resulting from the production of our services and products.
CHEMICAL HANDLING
We respect the environmental impact of the chemicals that we use and will work actively to substitute chemicals that may cause harm to the environment.
WORKING ENVIRONMENT
Providing a safe working environment for our workers has been a part of our key strategies. A “zero-mindset” for work related incidents and illness is implemented in Scana and the portfolio companies. We will provide training and perform risk assessments for all activities in our companies
.
EQUALITY AND DIVERSITY
We actively promote and practice diversity in the workplace through inclusion of all, irrespective of age, sex, disability, race, ethnicity, origin, religion or economic or other status. We actively participate in the education of young workers, by employing trainees, apprentices and by taking an active part in presenting our portfolio companies to schools and universities. Our goal is equal pay for work of equal value.
CO-OPERATION
We aim for active cooperation between the companies in Scana and their stakeholders, including customers, suppliers, and partners is a strategic operational goal.
Clear communication and working together to reach mutual goals are focus areas that we will work towards in the years to come.

TRANSPARENCY
We commit to taking an active role in preventing corruption and the abuse of power for private gain. We have routines in place ensuring our business conduct and compliance. All Scana companies are ISO 9001 certified and three of our portfolio companies are ISO 14001 and ISO 45001 certified. We aim for compliance with these standards for the rest of the portfolio companies.
COMPLIANCE AND RISK MANAGEMENT
Risk management is an integral part of our business, including HSE, Financial, Environmental and Human Rights risk. We commit to pro-actively seek mitigating actions, and to keep a continuous overview of the regulatory and other requirements for Scana and the portfolio companies. of our services and products.
ANTI-CORRUPTION
We actively communicate our zero tolerance for bribery and corruption in our code of conduct. We will implement training initiatives for our workers, to increase awareness. Our employees and business partners are expected to follow these rules of conduct and in the years to come we will work towards supplier code of conduct and active supplier follow-up and development.

ESG

ACHIEVE GENDER EQUALITY AND EMPOWER ALL WOMEN AND GIRLS THROUGH EDUCATION AND PARTICIPATION – BRINGING GOOD HEALTH AND WELL-BEING.
While the offshore-, energy-, and maritime industry still are represented by a predominately male workforce, more women are finding their way into maritime professions. We actively contribute and have incorporated Target 5.1 “End all forms of discrimination against all women and girls everywhere” and Target 5.5 “Ensure women’s full and effective participation and equal opportunities for leadership at all levels of decision-making in political, economic and public life” in the Scana targets.

We envision that the achievement of this target will positively influence the results towards good
health and well-being (SDG 3). Scana and its companies actively support and promote training and education initiatives (SDG 4 – quality education) by promoting a career in the industry in schools, and by being an approved trainee company.

ANNUAL REPORT 2022
ACHIEVE DECENT WORK AND ECONOMIC GROWTH
SUPPORTING INDUSTRY AND INNOVATION THROUGH
QUALITY EDUCATION AND TRAINING.
Scana promotes lasting, inclusive, and sustainable economic growth through full employment and decent work for all our workers.
Being able to grow and develop knowledge and skills is an important factor for the development
of employees, and for them to thrive. We have implemented an on-line training portal that will be
implemented in all Scana companies in 2023.
Scana and its companies actively work towards Target 8.5 – we aim to contribute to achieve full
and productive employment and decent work for all women and men, including for young people
and persons with disabilities. Our goal is to provide equal pay for work of equal value, and annual
reports are prepared to evaluate non-discriminatory practices.

To support target 8.6 – substantially reduce the proportion of youth not in employment, education
or training, several of our portfolio companies provide training for apprentices and “try a job” stations for students.
We participate in protecting labor rights and promote safe and secure working environments for
all workers.

ANNUAL REPORT 2022
AIM FOR RESPONSIBLE CONSUMPTION AND PRODUCTION
SUPPORTING INDUSTRY AND INNOVATION SUPPLYING AND
USING AFFORDABLE, CLEAN ENERGY FOR GOOD HEALTH
AND WELLBEING.
Innovation is at the core of our being. Scana’s portfolio companies are actively involved in the green transition. PSW Power and Automation and Trans Construction (ATC) actively contribute
to this with complete solutions within electrification and renewable energy.
We work actively to achieve sustainable management- and efficient use of natural resources.
All portfolio companies work towards substitution of hazardous chemicals and aim to achieve the environmentally sound management of chemicals and wastes throughout their life cycle.
Our goal is to prevent emissions to air, water and soil in order to minimize their adverse impacts
on human health and the environment.
By 2030 we aim to have substantially reduced our waste through reduction, recycling, and reuse of resources. Our vision is to see process outputs that curremtly are viewed as waste

as a resource for new processes.
Our portfolio companies will implement procurement practices that are sustainable, working together with suppliers towards the goal of zero waste. Several of the portfolio companies use renewable energy in production, some even generated by own solar panels.

ANNUAL REPORT 2022
SUSTAINABILITY
TAKE URGENT CLIMATE ACTION SUPPLYING AND USING AFFORDABLE, CLEAN ENERGY FOR GOOD HEALTH AND WELLBEING FOR PEOPLE AND PLANET, INCLUDING LIFE BELOW WATER.
The products and services of the Scana Portfolio companies aim to contribute to the supply of affordable, clean energy. Initiatives have been taken towards providing services to the wind energy market by several of the portfolio companies. 5 out of 6 scana companies have directly contributed to the green shift with services or products. Skarpenord is to deliver valve remote control systems to two CO_2 carriers that will transport liquid carbon dioxide to the new Northern Lights CO_2 storage facility. PSW Power & Automations contributes to clean energy by providing state of the art shore power solutions and by installing solar plants for industrial sites and private homes. PSW Solutions and PSW Technology both have provided services to the offshore wind industry, Seasystems has provided mooring solutions to the world's first floating tidal energy array. We are aware of our own environmental footprint: the environmental impact of the companies in Scana consists mainly of our own energy consumption, the generation

of waste and the use of chemicals. We aim to reduce our total greenhouse gas emissions per year, using renewable energy resources.
SUSTAINABILITY REPORT

GOING FORWARD
We are highly committed to continue on our mission towards "reaching ZERO" with meaningful actions
aimed for achieving our KPI's, and supporting the Sustainable Development Goals.
Working actively towards our prioritized SDG's, in 2023 we aim to present our complete ESG report
where we publish our climate impacts, set targets and goals, and communicate our plans for reducing
our emissions.
We will work towards communicating our ESG information using The Global Reporting Initiative (GRI)
Standards, which are the world's most widely used sustainability reporting framework, providing

a comprehensive and flexible guide for organizations to report on their environmental, social, and
governance (ESG) performance.

MEMBERS AND CEO

Statement by the board
of directors and CEO
We confirm that, to the best of our knowledge, the financial statements for the period from 1 January
to 31 December 2022 have been prepared in accordance with IFRS as adopted by EU, with such
additional information as required by the Accounting Act and give a true and fair view of the company's
and the Group's consolidated assets, liabilities, financial position and results of operations.
We confirm that the board of directors' report provides a true and fair view of the development and
performance of the business and the position of the company and the Group, together with a description
of the key risks and uncertainty factors that the company is facing.

THE BOARD

BASIS FOR THE REPORT

This report is prepared by the board of directors of Scana ASA and presents the corporate governance of the company. It is structured to cover all sections of the Norwegian Code of Practice for Corporate Governance ("Code of Practice") – available at www.nues.no.

The purpose of the Code of Practice is to clarify the respective roles of shareholders, board of directors and executive officers beyond the requirements of legislation. Scana ASA aims to comply with the recommendation to strengthen the confidence held in the company and contribute to the highest possible added value in the long term, for the benefit of shareholders, employees, and other interested parties.

BUSINESS

The overall business scope of Scana is included in the company's articles of association and defined as follows: "Ownership and management of businesses within ocean- and energy industry, and activities related to this." The articles are available at www.scana.no.

The board of directors sets the direction of the company by determining the objectives, strategy and risk profile of the business within the parameters of the articles of association. As part of this work, various sustainability elements are taken into account and the company has a board approved Sustainability Policy for how it integrates the interests of the society at large into its value creation. A separate Sustainability report that addresses environmental, social and governance issues is available on the company website.

The board evaluates targets, strategies and its risk profile on an annual basis, at a minimum.

EQUITY AND DIVIDENDS
CAPITAL STRUCTURE
The board of directors and the management regularly monitor that the capital structure of Scana ASA,
including the level of equity and liquidity, are appropriate for the company's objectives, strategy and risk
profile. Scana ASA had NOK 493 million in book equity as of 31 December 2022, corresponding to an
equity ratio of 36 percent.
DIVIDEND POLICY
The company's overall objective is to create long term value for its owners in the form of dividend
payments and/or increase in the value of the company's shares over time. The dividend policy is
based on the company's financial position and re-investment opportunities applying strict principles
for allocation of capital. The dividend policy supports the company in balancing the target of annual
dividends over time while building financial robustness and maintaining a strong balance sheet with
adequate liquidity reserves. The company has adopted a dividend policy targeting annual dividend
distributions of 30–40 percent of net profit over time. Any dividend proposed by the board of directors
will be presented to the annual general meeting for approval.
CORPORATE GOVERNANCE REPORT

AUTHORIZATIONS FOR THE BOARD OF DIRECTORS
Authorization to acquire own shares
The company's general meeting held on June 22, 2022, mandated the board of directors to purchase
own shares up to an aggregate nominal value of NOK 39.341.098. The resolution specified the purpose
for utilization: transaction currency in connection with acquisitions, mergers, demergers and other
transfers of business. The board's authorization to purchase own shares is valid for the period until
the date of the annual general meeting in 2023, however, in no circumstances beyond June 30, 2023.
Authorization to increase the share capital
The company's general meeting held on June 22, 2022, mandated the board of directors to issue new
shares up to an aggregate nominal value of NOK 50.320.080. The resolution specified three purposes
for utilization: (i) transaction currency in connection with acquisitions, (ii) strengthening the company's
capital structure and (iii) issue towards the company's senior employees. The board's authorization to

increase the share capital is valid for the period until the date of the annual general meeting in 2023,
however, in no circumstances beyond June 30, 2023.

EQUAL TREATMENT OF SHAREHOLDERS

Each share in the company carries one vote, and all shares carry equal rights, including the right to
participate in general meetings.

The company emphasizes that the interests of the shareholders is advanced and that all shareholders,
in accordance with the requirements of the Norwegian Securities Trading Act, is treated on an equal
basis. Existing shareholders have pre-emptive rights to subscribe for shares in the event of share capital
increases. The general meeting may by a qualified majority resolve to set aside the pre-emptive rights
of existing shareholders. Any proposal by the board of directors of such resolution shall be explained.

Transactions in own shares are done via the Oslo Stock Exchange and in compliance with applicable
stock exchange regulations.

Special care must be exercised in transactions where Scana ASA's shareholders, board members,
management or close relatives have financial or personal interests. If the transaction is not insignificant
in nature or size, there must be an assessment from an independent third party.

The company has implemented guidelines to ensure that the members of the board of directors and
executive personnel shall obtain prior approval and notify the board of directors if they trade Scana shares.

FREELY TRANFERABLE SHARES

The shares of Scana ASA are listed on the Oslo Stock Exchange. The company's articles of association
do not contain any limitations on voting or restrictions on the transferability of shares, and the shares
are consequently freely transferable.

GENERAL MEETINGS

The general meeting is the highest authority of the company, and an important forum for cooperation
between the company's shareholders, the board and management. The company encourages its
shareholders to exercise their rights by participating in general meetings.

Scana ASA has established routines and procedures in connection with general meetings which are in
accordance with guidelines given in the Norwegian Code of Practice for Corporate Governance.

Notice and minutes are available on the company's website www.scana.no under "Investor information".

CORPORATE GOVERNANCE REPORT

Notices convening general meetings are submitted and announced in accordance with applicable law
and stock exchange regulations. Comprehensive documentation relating to the items on the agenda are
prepared and made available on the company's website no later than 21 days prior to the general meeting.
The registration deadline for attendance is set as close to the date of the general meeting as possible.
Shareholders who are unable to attend may vote by proxy. A proxy form is included in the notice convening
the general meeting. Information about the procedure for proxy form and information about the person
appointed who can vote for the shareholders as proxy, accompanies the notice.
At Scana ASA's general meeting, at least the chairman of the board, the chairman of the election committee
and the auditor attends. The management is represented by the CEO and CFO. The general meeting is
opened by the chairman of the board.
When electing the board or other bodies in the company, shareholders can vote separately on each
candidate nominated for election to the company's corporate bodies. The outcome of the voting at the
general meeting is made public immediately after the general meeting has been held.
NOMINATION COMMITTEE
The articles of association stipulate that the company shall have a nomination committee. The committee
must comprise of no less than three members. The Nomination Committee shall prepare the annual
General Meeting's election of board members and propose the remuneration to be given to the board
members. The shareholders have the opportunity to make proposals to the nomination committee
about candidates for board positions and other positions, for example by contacting the chairman of
the nomination committee, the chairman of the board or the company's administration.
The current members of the nomination committee are Carl Christian Krefting (chairman), Dag Magne
Vedvik and Harald Mowinckel Troye. The positions are up for election at the annual general meeting in
2024. No members of the nomination committee are directors of the board or employed by the company.
COMPOSITION AND INDEPENDENCE OF THE BOARD OF DIRECTORS
COMPOSITION
The articles of association stipulate that the board of directors shall comprise three to seven persons.
Elected directors will serve for a period of two years. The board has no employee representatives, and
no members of the company's management are board members. Scana ASA does not have a corporate
assembly. The composition of the board must reflect the competence needs that are relevant to the
company's operations. Current board instructions set requirements for, among other things, industry
knowledge, industry relations, technological understanding, international experience, market knowledge,
as well as experience from economics, finance, and the capital market.
The board currently consists of 4 people. A more detailed presentation of the board members can be
found on page 145 of the annual report.
INDEPENDENCE

The composition of the board aims to ensure that the interests of all shareholders are attended to, and
that the company has the competence, resources, and diversity it needs at its disposal.
The board instructions contain requirements that at least two of the shareholder-elected board members
must be independent of the company's main shareholders.
A majority of the shareholder elected members are considered independent of executive management
and important business associates. None of the directors are part of the company's executive management
CORPORATE GOVERNANCE REPORT

team. The board carries out a self-evaluation of its activities and expertise, as well as whether the board
is properly composed and how it functions as a unit and individually in relation to the board's goals.
THE WORK OF THE BOARD OF DIRECTORS
MEETINGS
The board of directors will hold board meetings whenever needed, but normally six to eight times a year.
The chairman of the board can call extraordinary board meetings when deemed necessary. The CEO can
call an extraordinary board meeting by agreement with the chairman of the board. In 2022, 19 board
meetings were held. The CEO must attend the board meetings. The CFO also normally attends the meetings.
The board is otherwise free to summon other members of the company's management or others to the board
meetings. It is the chairman's responsibility to lead the board meetings. If he or she is absent, the meeting is
chaired by the deputy chairman of the board. If both are absent, a chairman is elected at the board meeting.
THE BOARDS RESPONSIBILITY
The company's board has overall responsibility for management and control of the company. The board
must adopt the company's strategy, budgets and business plans and at all times keep informed about the
company's operations and financial development. The board is responsible for ensuring that the company's
operations, financial accounts and liquidity are subject to satisfactory control. The board must monitor
the company's management and ensure that the CEO carries out his duties in accordance with current
instructions. The board can, at its own discretion, draw up additional guidelines for the company's operations.
The CEO prepares cases for deliberation by the board of directors. It is a priority to have matters prepared
and presented in such a way that the board is provided an adequate basis for its deliberations.
Minutes

must be made for each board meeting, where a description of each case that has been dealt with,
which decision the board has made and the basis on which the decisions in each individual case have
been made is included.
AUDIT COMMITTEE
Scana ASA has an audit committee comprising of two of the members of the board of directors:
Pål Selvik (chairperson) and Vidar Rabben (member).
The audit committee is independent from the management of the company. At least one of the members
shall have either formal qualifications within accounting or auditing, or relevant experience and skills
within the same. Pål Selvik have such experience and technical competence. The committee held
1 meeting in 2022, prior to December 2022 the whole board of directors were acting as audit committee.
The audit committee participates in the quality assurance of guidelines, policies, and other governing
instruments pertaining to the company. The audit committee performs a qualitative review of the quarterly and annual reports of the company.
RISK MANAGEMENT AND INTERNAL CONTROL
The board of directors ensures that the company has internal control and appropriate systems for risk
management in relation to the nature and scope of the business. In addition, the board conducts an
annual review of the internal control system and the most significant risk areas. The aim is to maintain
a comprehensive risk management process for the investment company Scana ASA, which also includes
the risk areas in the individual portfolio companies. Risk management is thus followed up by both
the CEO and the board of directors of Scana ASA and by the board of directors and management of
the portfolio companies.
The board of directors and management of each portfolio company have independent responsibility for
internal control and risk management in their respective companies. The operational risk management
is thus delegated to the portfolio companies. In the annual review by the board of Scana ASA, the overall
CORPORATE GOVERNANCE REPORT

risk and the risk management system for each individual portfolio company are reviewed, as well as
the aggregated operational risk.
The board of directors and management of Scana ASA mainly focus on risk management and control

linked to their role as owner of the portfolio companies and the factors that may affect the value of
the investments or otherwise give exposure to the company's balance sheet, liquidity and reputation.
This includes liquidity development, guarantee exposure, risk in major customer contracts in the portfolio
companies, interest rate and currency risk, quality of reporting from the portfolio companies, processes
related to the purchase and sale of companies, as well as reputational risk.
Scana ASA and the portfolio companies has a joint financing solution. This means that the main
responsibility for financial risk management lies with the parent company. A system has also been
established whereby each portfolio company is allocated a certain proportion of the total available
liquidity limits, adapted to its expected capital needs. In addition, Scana ASA retains a share of the
liquidity that is used for the company's own purposes, as well as available liquidity that can be added
to the portfolio companies under given criteria. Liquidity development and liquidity forecasts are
regularly reported from the portfolio companies to Scana ASA and reviewed by the board of directors
at the ordinary board meetings.
The portfolio companies are exposed to currency risk. With portfolio companies in Norway and Sweden,
the various companies have different currency positions and some of these can offset or reinforce each
other. A joint system has therefore been established for hedging currency risk at group level. Responsi-
bility for interest hedging lies with Scana ASA as part of the joint financing solution. For further details,
reference is made to the annual report.
The portfolio companies have their own finance departments. The finance department in Scana ASA
is responsible for consolidating the group's accounts and reports, as well as reporting to the board,
banks, owners and the capital market. In addition, the department provides professional assistance
to the portfolio companies and performs tasks related to control and risk management that are within
Scana ASA's area of responsibility.
It is the board's opinion that Scana ASA's overall strategy, management principles, organizational structure
and ethical guidelines contribute to a satisfactory control environment.

REMUNERATION OF THE BOARD OF DIRECTORS

The remuneration of the board of directors is decided by the general meeting, following a recommendation
from the nomination committee. The remuneration is not performance-related, and no options are is-
sued to board members. All forms of remuneration to the members of the board appear in disclosure 10
to the annual accounts.
More detailed information about the reward of individual board members is provided in disclosure 9 in
the consolidated financial statements of the company, included in the annual report for 2022.

REMUNERATION OF EXECUTIVE PERSONNEL

The board of directors has adopted guidelines for the remuneration of executive management. These

set out the main principles for the company's executive remuneration policy and are presented to the
company's general meeting. Determining the salary and other remuneration for executive personnel
is carried out by the board in a meeting, and presented as information to the general meeting. See
disclosure 9 for further information regarding remuneration to executive personnel.
CORPORATE GOVERNANCE REPORT

INFORMATION AND COMMUNICATION
Scana ASA must provide the stock market with relevant and complementary information as a basis for a
balanced and correct valuation of the share. The company emphasizes an open dialogue with the stock
market and the media.
The information is communicated through stock exchange announcements, press releases, quarterly
reports and presentations for analysts and investors. The company's website (www.scana.no) has
information for investors. This includes, among other things, annual reports and quarterly reports.
TAKE-OVERS
The board of directors has not deemed it appropriate to adopt specific guidelines for takeover situations.
There are also no other obstacles that should limit the purchase of the company's shares.
No main principles have been established for how Scana ASA will act in the event of a takeover offer,
except that the Norwegian Code of Practice will have a normative function. Scana's financing agreement
with DNB has a normal change of control clause which means a continuation of the finance agreement
is subject to approval from the bank.
AUDITORS
Scana ASA's policy is to use the same audit firm in all portfolio companies. The board of directors each
year arranges for the auditor to submit to the audit committee a plan for the audit work to be conducted
such year. The auditor prepares an annual statement to the board confirming fulfilment of the independence
requirement applicable to auditors. All meetings of the audit committee are attended by the auditor
who also attends the part of the board meeting approving the annual financial statements. The audit
committee set guidelines on the scope for using the auditor for services other than auditing and makes
recommendations to the board of directors concerning the appointment of the auditor and the approval

of the auditor's fees. Fees payable to the auditor split on auditing and other services are specified in the
Auditor Fees note to the consolidated financial statements of the company. The auditor fees are subject
to approval by the annual general meeting. Scana ASA does not have its own internal audit department,
but uses resources from an external audit firm should the need for such an audit arise.

SIGNIFICANT ACCOUNTING PRINCIPLES

CORPORATE INFORMATION

Scana ASA

is headquartered at

Wernersholmvegen 49, Bergen, in

Norway

. Scana is a
public limited

company listed on the Oslo Stock Exchange
. The Group's activities are described in disclosure 6.

The consolidated financial statements of Scana ASA for the fiscal year 2022 were approved in
the board meeting on 28 April 2023.

The financial statements are presented in Norwegian kroner (NOK), and all numbers are rounded and
given to the nearest thousand ('000) except when otherwise stated.

BASIS FOR PREPARATION

The Scana ASA's consolidated financial statements have been prepared in accordance with International
Financial Reporting Standards (IFRS) as adopted by the EU and are mandatory for financial years
beginning on or after 1 January 2022, and Norwegian disclosure requirements listed in the Norwegian
Accounting Act as of 31 December 2022.

The financial statements have been prepared under the assumption of going concern, see
disclosure 5. Annual accounts consist of income statement, comprehensive income, the statement of

financial position, cash flow statement, statement of changes in equity and disclosures to the accounts.

The consolidated financial statements are based on historical cost, with the exception
of the following:
Financial instruments (derivatives) at fair value through profit or loss.
Obligations linked to share-based schemes and schemes with cash settlement are measured
at fair value through profit or loss.
The consolidated financial statements have been prepared on the basis of uniform accounting
principles for similar transactions and events under otherwise similar circumstances.

FUNCTIONAL CURRENCY AND PRESENTATION CURRENCY
The presentation currency for the Group is NOK which is also the functional currency for the parent company
Scana ASA. The functional currencies for the subsidiaries have been assessed to be their local currencies.

BASIS OF CONSOLIDATION
The Group's consolidated financial statements comprise the parent company Scana ASA and its
subsidiaries as of 31 December 2022.

An entity has been assessed as being controlled by the Group when the Group is exposed for or have
the rights to variable returns from its involvement with the entity and can use its power over the entity
to affect the amount of the Group's returns.

The identifiable assets acquired, and the liabilities assumed, including contingent liabilities, are measured
at fair value at the time of takeover.
Transferred consideration is measured at fair value. Excess of the total sum of transferred consideration,
amount recognized for minority interests and fair value of any previously held equity interests in the acquired
company in relation to the net value of identifiable acquired assets and assumed liabilities, is recognized
as goodwill. Expenses incurred in connection with the takeover, beyond those related to debt and equity,

are expensed. Companies that are bought or sold during the year are included in the consolidated accounts from the date when significant influence or joint control is achieved until such influence ceases.

Intercompany transactions, balances and unrealized gains or losses on transactions between Group companies are eliminated. Unrealized gains related to transactions with affiliated companies and joint ventures are eliminated with the Group's share in the business. Correspondingly, unrealized losses are eliminated, but only to the extent that there are no indications of a decrease in value of the asset that has been sold internally. When necessary, amounts reported by subsidiaries have been adjusted to conform to the Group's accounting policies.

REVENUE

REVENUE FROM CONTRACTS WITH CUSTOMER

IFRS 15 Revenue from Contracts with customers establishes a five-step method that applies to all customer contracts. Under the standard, only approved customer contracts with a firm commitment are basis for revenue recognition. The deliveries in the contracts are reviewed to identify distinct performance obligations, and revenue is recognized in line with how the entity satisfies these performance obligations – either over time or at a point in time. This assessment may involve significant judgement. For contracts with customers for which the performance obligations are satisfied over time, revenue is recognized over time using a cost progress method or as time and material are delivered to the customer. For contracts with customers for which the performance obligations are satisfied at a point in time, revenue is recognized at the point in time when the customer obtains control of the product or the service. Details of the accounting policies and the nature of performance obligations for each of the major types of customer contracts are set out in disclosure 6.

CONTRACT BALANCES
Contract assets:
A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognized for the earned consideration that is conditional.

Trade receivables:
A receivable represents the Group's right to an amount of consideration that is unconditional.

Contract liabilities:
A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognized when the payment is made. Contract liabilities are recognized as revenue when the Group fulfils the performance obligation(s) under the contract.

GOVERMENT GRANTS
Government grants are recognized when there is reasonable assurance that the company will meet
the conditions stipulated for the grants and that the grants will be received. The Group received
support related to covid-19 in 2021 which was recognized as other revenue. Operating grants are
recognized systematically during the grant period.

FOREIGN CURRENCIES
TRANSACTONS AND BALANCES
Transactions in foreign currency are translated to functional currency using the exchange rate at the date
of the transaction. At the end of each reporting period foreign currency monetary items are translated using
the closing rate, non-monetary items that are measured in terms of historical cost are translated using
the exchange rate at the date of the transaction and non-monetary items that are measured at fair value
in a foreign currency are translated using the exchange rates at the date when the fair value was measured.
Any currency differences are recognized in profit or loss as financial items.

DISCLOSURES
|
SCANA GROUP

CONSOLIDATION AND CONVERSION
Balance sheet items for foreign subsidiaries are converted to NOK using the exchange rates as of
31 December. All items in the income statement are converted to NOK via the weighted average exchange
rate per month which is obtained from Norges Bank for the individual month. Consolidation leads to
translation differences which is presented in other revenue and expenses and is included in the total result.
Currency loss or -gains relating to debt in foreign currency, which for accounting purposes is considered to

be a hedge investment in foreign subsidiaries, is entered as other revenue and expenses included in
the total result. Exchange-rate differences in monetary amounts (liabilities or receivables) which are in
reality a part of a company's net investment in a foreign entity are also included as translation differences.

INTANGIBLE ASSETS
Intangible assets with a definite economic life are amortized over their economic life and tested for impairment if there are any indications. The amortization method and period are assessed at least once
a year. Changes to the amortization method and/or period are accounted for as a change in estimate.

GOODWILL
Goodwill is initially measured at cost, and is the excess of the aggregate of the consideration transferred
and the amount recognised in the net identifiable assets acquired and liabilities assumed through a
business combination.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units (CGU) that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.
Goodwill is not depreciated but is tested at least annually for impairment. In connection with this, goodwill is allocated to cash-generating units which as balanced goodwill and are expected to benefit from
synergies from the business combination. Goodwill recognized in the balance sheet will be re-assessed against the recoverable amount. The recoverable amount of an asset or a cash-generating unit is
the higher of its fair value less costs of disposal and its value in use.

RESEARCH AND DEVELOPMENT
Expenses relating to research and development are recognized in the statement of comprehensive income as they incur. Development expenses relating to a single project are capitalized as intangible assets when the following can be documented:
The product or process is technically and commercially viable so that it becomes available for use or sale.
The Group intends to finalize the intangible asset and make it available for use or sale.
The Group has the ability to make the intangible asset available for use or sale.
The asset will generate future economic benefits.
The Group has sufficient resources to complete the development work.
Expenses can be reliably measured.

All development expenses that are recognized in the balance sheet are reviewed by the board of the subsidiaries. It is documented how it is expected that the intangible asset will create future cash flow for the Group.

Capitalized development costs are recognized at their cost minus accumulated amortization and

impairment losses.
Capitalized development costs are amortized on a straight-line basis over

the estimated useful life of the asset.
Impairment tests are performed annually or more frequently

if found necessary based on impairment indicator.
Losses or gains on the disposal of an intangible asset, calculated as the difference between the net sales amounts and balance amount, are recognized in the income statement.

RIGHT OF USE ASSETS
The Group measures the right of use asset at cost, less any accumulated depreciation and impairment losses, adjusted for any remeasurement of lease liabilities. The costs of the right of use asset comprise:
The amount of the initial measurement of the lease liability recognized.
Any lease payments made at or before the commencement date, less any incentives received
Any initial direct costs incurred by the Group.
An estimate of the costs to be incurred by the Group in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

The Group applies the depreciation requirements in IAS 16 Property, Plant and Equipment in depreciating the right of use asset, except that the right of use asset is depreciated from the commencement date to the earlier of the lease term and the remaining useful life of the right of use asset. The Group applies IAS 36 Impairment of Assets to determine whether the right of use asset is impaired and to account for any impairment loss identified.

PROPERTY, PLANT AND EQUIPMENT
Property, plant and equipment are valued at their cost less accumulated depreciation and impairment losses. When assets are sold or disposed of, the carrying amount is derecognized and any gain or loss

is recognized in the statement of comprehensive income. Acquisition cost for tangible assets is the purchase price, including taxes/duties and direct costs directly linked to preparing the asset ready for its intended use. Expenses incurred after the asset is in use, such as regular maintenance expenses, are recognized in the statement of comprehensive income, while other expenses that are expected to provide future financial benefits are capitalized.

Buildings and land are assets that are either used by the Group's companies or owned to achieve rental revenue. Buildings and land are recognized at acquisition cost. Costs incurred after the asset is in use, such as regular maintenance costs, are recognized in the statement of comprehensive income, while other costs that are expected to provide future financial benefits are capitalized.
Depreciation is calculated on a straight-line basis over the estimated useful life of the assets, except for land. The period of use, the residual value and the depreciation method for the fixed assets are assessed each year.

The Group capitalizes larger periodic maintenance and depreciates it according to the maintenance interval.

IMPAIRMENT OF NON-CURRENT ASSETS
Impairment of non-current assets (including right-of-use assets) is considered yearly and when there are indications of impairment. If, and only if, the recoverable amount of an asset is less than carrying amount, the carrying amount of the asset shall be reduced to its recoverable amount. That reduction is an impairment loss. An impairment loss shall be recognized immediately in profit or loss. Recoverable amount is the higher of fair value less cost of disposal and value in use (the discounted cash flow given continued use).
Fair value less cost of disposal is the value that can be obtained by selling to a third-party less the cost of disposal.

Recoverable amount is determined separately for all operating assets, but if this is not possible, it is

determined together with the cash-flow generating unit the tangible asset is linked to.
Previously recognized impairment will be reversed when available information confirms that there is no longer indication of impairment. The reversal is recognized in the statement of comprehensive income. Reversal of impairment is constrained, so the value of the asset will not be higher than the asset value and planned recognized depreciations.

INVESTMENT IN ASSOCIATED COMPANIES
Associates are entities over which the Group has significant influence, but not control or joint control over the financial and operating management. (Normally ownership between 20 % and 50 %). Associates are accounted for using the equity method from the date when significant influence or joint control is achieved until such influence ceases. Investments in associates are initially recognized at cost. If the Group's share of the loss surpasses the carrying amount of the associate, the carrying amount is set to zero and further loss is not recognized unless the Group has an obligation to make up for the loss.

FINANCIAL ASSETS
The Group's financial assets are derivatives, non-listed equity instruments, quoted debt instruments, trade receivables and cash and cash equivalents. The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, and fair value through other comprehensive income and transaction costs.
The Group classified its financial assets in two categories:
Financial assets at amortized cost
Derivatives at fair value designated as hedging instruments

FINANCIAL ASSETS AT AMORTIZED COST
The Group measures financial assets at amortized cost if both of the following conditions are met:
The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows and,
The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified, or impaired.

The Group's financial assets at amortized cost includes trade receivables and other short-term deposit.
Trade receivables that do not contain a significant financing component are measured at the transaction price determined under IFRS 15 Revenue from contracts with customers.

DERECOGNITION OF FINANCIAL ASSETS
A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognized (i.e., removed from the Group's consolidated statement of financial position) when:

The rights to receive cash flows from the asset have expired, or
The Group has transferred its rights to receive cash flows from the asset or has assumed
an obligation to pay the received cash flows in full without material delay to a third party
under a 'pass-through' arrangement; and either
a)
the Group has transferred substantially all the risks and rewards of the asset, or
b)
the Group has neither transferred nor retained substantially all the risks and rewards of
the asset but has transferred control of the asset.

IMPAIRMENT OF FINANCIAL ASSETS
The measurement of allowance for expected credit losses (ECL) in the general model depends on
whether the credit risk has increased significantly since the initial recognition. For credit exposures
for which there has not been a significant increase in credit risk since initial recognition, ECLs are

provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). The 12-month expected loss is the proportion of the loss that is expected to occur over the lifetime of the asset the instrument, which can be linked to events occurring in the first 12 months. For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For trade receivables and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The general model means that on every reporting date the Group evaluates whether there has been one significant increase in the credit risk for the relevant assets after initial recognition. It is the change in risk of default that is assessed. When assessing whether the risk of default has increased significantly, the company must evaluate relevant information, both about historical, current, and future conditions. Conditions that are evaluated include:
Change in the instrument's external credit rating since initial recognition
Change in external market indications relating to credit risk
Existing or expected changes in the borrower's business, or circumstances in general, which can negatively affect the ability to fulfil its obligations
Significant changes in the borrower's results, working capital or similar
Regulatory conditions implemented or expected to be implemented that can affect the instrument

If there has been a significant increase in the credit risk after initial recognition, the financial asset is

transferred to step 2 or 3, and the loss provision then constitutes the expected loss over the lifetime of the instrument. Instruments are classified at stage 3 when the instruments are credit impaired, i.e., when external evidence can confirm that a loss has occurred.
Loss provisions must be expected losses, based on the best available information on the time of estimation relating to historical, current and future conditions.

FINANCIAL LIABILITIES
Derivatives are recognized initially at fair value. Loans, borrowings, and payables are recognized at fair value net of directly attributable transaction costs. Derivatives are financial liabilities when the fair value is negative, accounted for similarly as derivatives as assets.

LOAN, BORROWINGS AND PAYABLES
After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process.
Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the income statement.

Payables are measured at their nominal amount when the effect of discounting is not material.

DERECOGNITION OF FINANCIAL LIABILITIES
A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability.
The difference in the respective carrying amounts is recognized in the income statement.

INVENTORIES
Inventories, which consist of purchased goods and in-house produced products, are valued at the lowest
of purchase/production cost and expected net selling price. The net selling price is the estimated selling
price in the case of ordinary operations minus the estimated completion, marketing, and distribution
costs. The acquisition cost is arrived at using the FIFO method and includes the costs incurred in acquiring
the goods and the costs of bringing the goods to their current state and location. In-house produced
goods include raw materials, energy, direct labour, and a share of the indirect costs that can be allocated
based on normal capacity utilization, including maintenance and depreciation.

TRADE RECEIVABLE
Trade receivable is recognized at amortized cost. Provision for losses is made after a concrete assessment
of each individual receivable.

CASH AND CASH EQUIVALENTS

Cash includes cash in hand and at bank. Cash equivalents are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes. For an investment to qualify as a cash equivalent it must be readily convertible to a known amount of cash, be subject to an insignificant risk of changes in value and have a maximum term to maturity of three months.
Bank deposits may also include restricted funds that may have a lock-in period of more than three months, but less than twelve months. Reference is made to disclosure 22 for further information of bank deposits and overdrafts. Included in liquidity in the cash flow statement overdraft.

In the Group's cash flow analysis cash and cash equivalents consist as defined above. The cash flow analysis has been prepared according to the indirect method.

NON-CURRENT ASSETS HELD FOR SALE AND DISCONTINUED OPERATIONS
Non-current assets and Groups of non-current assets and liabilities are classified as held for sale if their carrying amount will be recovered through a sales transaction instead of through continued use.
This is only regarded as having been fulfilled when a sale is highly probable, and the non-current asset (or Groups of non-current assets and liabilities) is available for immediate sale in its present form.
The management must be committed to a sale and the sale must be expected to be carried out within one year after the classification date.

Non-current assets and Groups of non-current assets and liabilities which are classified as held for sale are valued at the lower of their former carrying amount or fair value minus sales costs. Assets are presented separately in the balance sheet as "Assets classified as held for sale" and liabilities are presented as "Liabilities classified as held for sale".

Discontinued operations are defined as a company or part of a company that has either been disposed of or classified held for sale and:

Which represents a separate and significant business or a separate and significant geographical
operating area, where materiality is assessed both in relation to the size of the business and
whether the business is different from other businesses in the Group or segment in general
Is part of a single coordinated plan to dispose of a separate and significant business or a separate
and significant geographic operating area; or
Is a subsidiary acquired exclusively for resale.

Discontinued operations are presented separately from the result from continued operations in the
income statement in the account "Annual result of discontinued operations (after tax)". Profit after tax
from discontinued operations as well as gains or losses for assets or disposal Groups are included in
the account. Additional specifications are given in disclosures. Comparative figures for the discontinued operations are changed accordingly.

LEASING
The Group has entered into lease agreements relating to assets mentioned in disclosure 24. IFRS 16 sets
out principles for recognition, measurement, presentation, and information about leasing. The Group as
lessee recognizes assets and liabilities for all leases. At the time of implementation of a lease agreement,
the company recognizes the associated lease liability to future lease payments and an asset that represents
the right of use of the underlying asset during the lease period (right of use asset).

IDENTIFYING A LEASE
At the inception of a contract, The Group assesses whether the contract is, or contains, a lease. A contract

is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a
period of time in exchange for consideration.

RECOGNITION OF LEASES AND EXEMPTIONS
At the lease commencement date, the Group recognizes a lease liability and corresponding right of use
asset for all lease agreements in which it is the lessee, except for the following exemptions applied:
Short-term leases (defined as 12 months or less)
Low value assets

For these leases, the Group recognizes the lease payments as other operating expenses in the income
statement when they incur.

LEASE LIABILITIES
The Group measures the lease liability at the present value of the lease payments for the right to use
the underlying asset during the lease term that are not paid at the commencement date. The lease term
represents the non-cancellable period of the lease, together with periods covered by an option either to
extend or to terminate the lease when the Group is reasonably certain to exercise this option.

The lease payments included in the measurement comprise of:
Fixed lease payments (including in-substance fixed payments), less any lease incentives receivable.
Variable lease payments that depend on an index or a rate, initially measured using the index or rate
as at the commencement date.
Amount expected to be payable by the Group under residual value guarantees.
The exercise price of a purchase option, if the Group is reasonably certain to exercise that option.
Payments of penalties for terminating the lease, if the lease term reflects the Group exercising an
option to terminate the lease.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on
the lease liability (see disclosure 24), reducing the carrying amount to reflect the lease payments made
and remeasuring the carrying amount to reflect any reassessment or lease modifications, or to reflect
adjustments in lease payments due to an adjustment in an index or rate. The Group does not include
variable lease payments that depend on an index or a rate in the lease liability. Instead, the Group
recognizes these variable lease expenses in profit or loss. The Group presents its lease liabilities as
separate line items in the statement of financial position.

The company classifies lease payments as follows in the cash flow statement:
Lease payments linked to the principal amount of the contract are classified as financing activity
on a separate line “repayment of lease obligations”.

Interest paid includes interest related to leases, classified as financing activity.
Short-term leases (less than twelve months), payments related to low-value leases and leases
with variable payments are classified as operational activity.

PENSION COST AND LIABILITIES
The Group's pension plans consist of defined contribution pension and AFP plans for the Group's
Norwegian employees and benefit plans ("multi-employer plans") for the Group's Swedish employees.
The pension plans which are administered separately (contribution-based pension plan) the annual
payments/subsidies are included in personnel expenses.

Pension liabilities are valued at the present value of future pension rights earned at the balance sheet
date on the basis of linear accrual and expected final salary. The pension plan's funds are valued at
assumed market value. Net pension liabilities (pension liabilities minus the pension plan's funds) are
classified in the balance sheet as long-term liabilities. The net liability includes employer's tax.

The AFP plan for the Group's Norwegian employees and the benefit plan for the Group's Swedish
employees are considered as so-called "multi-employer plans". These pension plans are treated as defined
contribution pension plans in the accounts because the necessary information to treat the plan as defined
benefit plans are not yet available from the life insurance company that administers the pension plan. When
the necessary information is available, and the pension plan are accounted for as defined benefit

arrangements in accordance with IAS 19, this could have an effect on the consolidated accounts.

TAXES

INCOME TAXES

Income taxes comprise taxes on the taxable profit for the year, changes in deferred taxes and any adjustments in prior years' taxes. Taxes on transactions that are recorded in other comprehensive income or directly in equity do not form part of the tax expense in profit or loss.

Tax payable is calculated using the nominal tax rate for the relevant tax jurisdiction at the end of the reporting period.

DEFERRED TAX ASSETS

Deferred tax assets are recognized when it is probable that the company will have a sufficient profit for tax purposes in subsequent periods to utilize the tax asset. The assessment of whether deferred tax assets can be recognized in the balance sheet, including deferred tax assets linked to losses carried forward, is made separately within each individual tax regime. The companies recognize previously unrecognized deferred tax assets to the extent it has become probable that the company can utilize the deferred tax asset. Similarly, the company will reduce a deferred tax asset to the extent that the company no longer regards it as probable that it can utilize the deferred tax asset.

Deferred tax and deferred tax assets in the balance sheet is entered at nominal value and is calculated on the basis of temporary differences between tax and accounting values for assets and liabilities on the balance sheet date, adjusted for tax loss carry forwards.

Deferred tax and deferred tax assets are measured based on the expected future tax rates applicable to the companies in the Group where temporary differences have arisen. It is based on tax rates and tax rules that have are adopted on the balance sheet date. Taxes payable and deferred taxes are recognized directly in equity to the extent that they relate to equity transactions.

PAYABLE TAX

Receivables and liabilities regarding payable tax for the current period and previous periods is recognized in the balance sheet at the amount that is expected to be paid from or paid into the tax authorities.

PROVISIONS
A provision is recognized when the Group has an obligation (legal or self-imposed) as a result of a previous
event, it is probable (more likely than not) that a financial settlement will take place as a result of this

DISCLOSURES
|
SCANA GROUP

obligation and the size of the amount can be measured reliably. If the effect is considerable, the provision
is calculated by discounting estimated future cash flows using a discount rate before tax that reflects
the market's pricing of the time value of money and, if relevant, risks specifically linked to the obligation.
In the case of discounting, profit and loss is recognized the interest rate effect as a financial expense.

Warranty provisions are recognized when the product is sold, or the service is provided to the customer.
Initial recognition is based on historical experience. The initial estimate of warranty-related costs is
revised annually.

Restructuring provisions are recognized when the Group has approved a detailed, formal restructuring
plan and the restructuring has either started or been publicly announced.

Provisions for loss-making contracts are recognized when the Group's expected revenue from a contract
is lower than costs incurred to fulfill the obligations in the contract.

SHARE BASED PAYMENT
An option program has been entered into for the management of Scana ASA and the general manager of the subsidiaries that are being made up by issuing shares. See further comments in disclosure 9.

The value of granted options is accrued over the agreed period the employee gains the right to receive the options, or when purchasing services from external parties over the service period of the share consideration agreed to cover.

CONTINGENT LIABILITIES AND ASSETS
Contingent liabilities are not recognized in the annual accounts. Significant contingent liabilities are disclosed, with the exception of contingent liabilities that are unlikely to be incurred.

Contingent assets are not recognized in the annual accounts but are disclosed if there is a certain probability that a benefit will be added to the Group.

FAIR VALUE MEASUREMENT
The Group measures certain financial instruments at fair value. This applies to currency contracts.
The fair value of financial liabilities is also disclosed measured at amortized cost.

Fair value is the price that would have been used to sell an asset or paid to transfer one obligation in
the primary market at the measurement time under the prevailing market conditions, regardless of
whether the price is directly observable or estimated using another valuation technique.

Scana uses the following hierarchy when assessing and presenting the fair value of
the financial instruments.
Level 1
:

Listed prices (unadjusted) in active markets for identical assets and liabilities.
Level 2:
Input other than quoted prices from active markets included in level 1, which are observable
for the asset or liability, either directly (as prices) or indirectly (derived from prices).
To calculate the value of open foreign exchange contracts, it is obtained from Norges Bank
on the closing date.
Level 3:
Input for the asset or liability that is not based on observable market data.

GOING CONCERN
The annual report is prepared under the assumption of going concern. See comments in disclosure 5.

SUBSEQUENT EVENTS
New information on the company's financial position on the end of the reporting period which becomes
known after the reporting period is recorded in the annual accounts. Events after the reporting period

DISCLOSURES
|
SCANA GROUP

that do not affect the company's financial position on the end of the reporting period, but which will
affect the company's financial position in the future are disclosed if significant.

CHANGES IN ACCOUNTING POLCITIES AND DISCLOSURES APPLICABLE FROM 2022:
The accounting principles used are consistent with the principles used in the previous accounting period,
with the exception of the changes in IFRS that have been implemented by the Group in the current

accounting period together with the aforementioned changes in the general information section.
The changes are listed below in IFRS that has been relevant for the Group with effect for the 2022
accounts, as well as the effect this has on the Group's annual accounts.
The accounting policies adopted are consistent with those of the previous financial year, except for
the amendments to IFRS which have been implemented by the Group during the current financial year.
Below we have listed the amendments in IFRS which have been applicable for the Group's 2022 financial
statements, as well as the effect of the amendments.
The following new and amended standards and interpretations have been implemented for the first
time in 2022:

AMENDMENTS TO IFRS 3 – REFERENCE TO THE CONCEPTUAL FRAMEWORK
The Group has not identified any impact connected to the amendments.

AMENDMENTS TO IAS 16 – PROCEEDS BEFORE INTENDED USE
Adoption of the IAS 16 amendments has no significant effect on the Group account during 2022.
AMENDMENTS TO IAS 37 – ONEROUS CONTRACTS, COST OF FULFILLING A CONTRACT
An onerous contract is a contract under which the unavoidable cost of meeting the obligations under
the contract costs exceed the economic benefits expected to be received under that contract.
The amendments clarify that for the purpose of assessing whether a contract is onerous, the cost of
fulfilling the contract includes both the incremental costs (e.g., the costs of direct labor and materials)
of fulfilling that contract and an allocation of other costs that relate directly to fulfilling contract activities
(e.g., depreciation of equipment used to fulfil the contract, as well as costs of contract management
and supervision). Costs that do not relate directly to a contract (e.g., general and administration costs)
shall not be included unless they are explicitly chargeable to the counterparty under the contract.

The amendments must be applied prospectively to contracts for which the entity has not yet fulfilled all
of its obligations at the beginning of the annual reporting period in which it first applies the amendments.

Adoption of the IAS 37 amendments has no significant impact on the Group account.

IFRS 9 FINANCIAL INSTRUMENTS – FEES IN THE '10 PERCENT' TEST FOR DERECOGNITION
OF FINANCIAL LIABILITITES
The adoption of amendments according to IAS 37 has no significant effect.

CHANGES WITH EFFECT FOR FINANCIAL YEARS STARTING ON 1 JANUARY 2023 OR LATER:
AMENDMENTS TO IAS 1 – CLASSIFICATION OF LIABILITIES AS CURRENT OR NON-CURRENT

The International Accounting Standards Board has issued amendments to IAS 1 Presentation of Financial
Statements to clarify how to classify debt and other liabilities as current or non-current.

The amendments aim to promote consistency in applying the requirements by helping companies
determine whether, in the statement of financial position, debt and other liabilities with an uncertain
settlement date should be classified as current (due or potentially due to be settled within one year)
or non-current. The amendments include clarifying the classification requirements for debt a company
might settle by converting it into equity.

DISCLOSURES
|
SCANA GROUP

The amendments must be applied retrospectively and are effective for annual periods beginning on
or after 1 January 2023. The Group does not intend to early adopt the amendments.
It is expected that the amendments may have no significant effects.
AMENDMENTS TO IAS 8 – DEFINITION OF ACCOUNTING ESTIMATES
IASB has issued amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and
Errors. The amendments clarify how companies should distinguish changes in accounting policies from
changes in accounting estimates. That distinction is important because changes in accounting estimates
are applied prospectively only to future transactions and other future events, but changes in accounting
policies are generally also applied retrospectively to past transactions and other past events.

The amendments are effective for annual periods beginning on or after 1 January 2023, but earlier
application is permitted. The Group does not intend to early adopt the amendments.
It is expected that the amendments do not have a significant effect.

AMENDMENTS TO IAS 1 AND IFRS PRACTICE STATEMENT 2 – DISCLOSURE OF ACCOUNTING
POLICIES
Following feedback that more guidance was needed to help companies decide what accounting policy
information should be disclosed, IASB has issued amendments to IAS 1 Presentation of Financial
Statements and IFRS Practice Statement 2 Making Materiality Judgements. The amendments to IAS 1
require companies to disclose their material accounting policy information rather than their significant
accounting policies. The amendments to IFRS Practice Statement 2 provide guidance on how to apply
the concept of materiality to accounting policy disclosures.
The amendments are effective for annual periods beginning on or after 1 January 2023, but earlier application
is permitted as long as this fact is disclosed. The Group does not intend to early adopt the amendments.
It is expected that the amendments do not have a significant effect.

AMENDMENTS TO IAS 12 – DEFERRED TAX RELATED TO ASSETS AND LIABILITIES ARISING
FROM A SINGLE TRANSACTION
The amendments narrowed the scope of the recognition exemption in paragraphs 15 and 24 of IAS 12
(recognition exemption) so that it no longer applies to transactions that, on initial recognition, give rise
to equal taxable and deductible temporary differences. The aim of the amendments is to reduce diversity
in the reporting of deferred tax on leases and decommissioning obligations.

IAS 12 Income Taxes specifies how a company accounts for income tax, including deferred tax, which
represents tax payable or recoverable in the future. In specified circumstances, regulated in IAS 12.15
and IAS 12.24, companies are exempt from recognizing deferred tax when they recognize assets or
liabilities for the first time. Previously, there had been some uncertainty about whether the exemption
applied to transactions such as leases and decommissioning obligations - transactions for which
companies recognize both an asset and a liability.
The amendments clarify that the exemption does not apply and that companies are required to recognize
deferred tax on such transactions. The aim of the amendments is to reduce diversity in the reporting of
deferred tax on leases and decommissioning obligations.

The amendments are effective for annual periods beginning on or after 1 January 2023.

It is expected that the amendments do not have a significant effect.

DISCLOSURE 2
|
CRITICAL ACCOUNTING JUDGEMENT AND
KEY SOURCES OF ESTIMATION UNCERTAINTIES

The preparation of financial statements in conformity with IFRS requires the use of certain critical
accounting estimates. It also requires the Management to exercise its judgment in the process of
applying the Group's accounting policies.
Estimates and critical accounting judgement are evaluated
on an ongoing basis and are based on historical experience and other factors including expectations
about future events which are probable given present circumstances.

The Group prepares estimates and makes assumptions related to the future. The accounting estimates
which follow from this are, by definition, associated with a degree of uncertainties and will give deviation
relative to actual outcome. Furthermore, the choice of accounting principles and degree of uncertainty
could affect the accounts.
The areas involving higher degree and judgment or complexity, or areas where assumptions and
estimates are significant to the consolidated financial statements are presented in the table below.
See descriptions linked to the various accounting items below:

DEFERRED TAX ASSETS – ESTIMATE UNCERTAINTY

Deferred tax assets are recognized for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgement is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits, together with future tax planning strategies.

If the Group was able to recognize all unrecognized deferred tax assets, profit and equity would have increased by NOK 20.2 million. Further details on taxes are disclosed in disclosure 11.

GOODWILL AND OTHER INTANGIBLE ASSETS – ESTIMATE UNCERTAINTY

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to goodwill and other intangibles with indefinite useful lives recognized by the Group. The key assumptions used to determine the recoverable amount for the different CGUs, including a sensitivity analysis, are disclosed and further explained in disclosure 12.

CONTRACT ASSETS/CONTRACT LIABILITIES – ESTIMATE UNCERTAINTY
Contract assets are linked to larger projects where income is recognized over time. Assumptions are

made in relation to estimated costs and profits connected to the projects. Each contract is reviewed and identified according to the delivery obligations. Assessments and assumptions are also made relating to measurement of completion. Changes in the assumptions can lead to the recognition of income and profits deviates from the underlying value creation, relative to the project's total revenue and profit. Profit can thus be accounted for too early or too late in the project.

LEASE LIABLITIES/RIGHT OF USE – ACCOUNTING JUDGEMENT/ESTIMATE UNCERTAINTY

ESTIMATING THE INCREMENTAL BORROWING RATE

The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate to measure lease liabilities. This is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right of use asset in a similar economic environment. The incremental borrowing rate therefore reflects what the Group 'would have to pay', which requires estimation when no observable rates are available. The Group estimates the incremental borrowing rate using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates (such as the subsidiary's stand-alone credit rating).

DETERMINING THE LEASE TERM OF CONTRACTS WITH RENEWAL OPTIONS

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised. The Group has several lease contracts that include extension and termination options. The Group applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise the renewal. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew.

DISCLOSURE 3
|
BUSINESS COMBINATION
ACQUISITION OF PSW
On 11 January 2022, Scana acquired 100 % of the shares in PSW. PSW is a leading player in
electrification and shore power, as well as a major supplier of products and services to the offshore
and maritime industry. PSW will take a unique position as a leading supplier to the maritime industry
with a special focus on supporting the industry's transition to sustainable operations. The transaction
will support Scana's strategy to lead the way in the transition to a more sustainable operation in the
global maritime industry. Scana will be a total partner for the green shift to players in shipping, offshore,
energy and aquaculture. The PSW's revenues in 2021 were NOK 623 million. At the time of the transaction,
PSW had 250 employees.
If the acquisition had occurred on 1 January 2022, management estimates that consolidated revenue
and loss for the year would not have changed significantly.
CONSIDERATION TRANSFERRED
The following table summarizes the acquisition date fair value of each major class of consideration
transferred.

11.01.2022
Cash
234 085
Seller credit
47 000
Shares in Scana ASA (124 224 737 shares)
173 915
Total consideration transferred
455 000

The fair value of the ordinary shares issued was based on the listed share price of the company at
11 January 2022.
IDENTIFIED ASSETS ACQUIRED AND LIABILITIES ASSUMED
The fair value of identifiable assets and liabilities is based on a purchase price allocation. The following
table summarizes the recognized amounts of assets acquired and liabilities assumed at the date of
acquisition.

The fair value of the trade receivables amounts to NOK 133.4 million. The gross amount of trade
receivables is NOK 143.8 million of which NOK 10.4 million was expected to be uncollectable at
the date of acquisition.

GOODWILL
Goodwill arising from the acquisition has been recognised as follows.

The goodwill-value can be explained by synergies, economies of scale, expectations of future profitability
and growth and expectations of better market conditions.
The purchase price allocation and the accounting for the acquisition is final. Therefor there will be no
adjustments to the above amounts in subsequent accounting periods.

ACQUISITION OF TRANS CONSTRUCTION
Through PSW Power & Automations AS, Scana ASA signed an agreement to purchase 100 % of the shares
in Trans Construction AS based on an equity value of NOK 25 million. The transaction was completed
31 January 2022. The company had 11 employees. By incorporating Trans Construction AS into
PSW Power & Automation AS, Scana see potential for synergies and opportunities to step into new markets.
The acquisition also forms the basis for increased market shares within modular units for battery systems,
hydrogen power systems, shore power systems and E-house modules for offshore wind.
If the acquisition had occurred on 1 January 2022, management estimates that consolidated revenue
for the year would have been NOK 916 million, and consolidated loss for the year would have been
NOK -43.6 million.

ANNUAL REPORT 2022

CONSIDERATION TRANSFERRED
The following table summarizes the acquisition date fair value of each major class of consideration transferred.

The fair value of the ordinary shares issued was based on the listed share price of the company at
11 January 2022.
IDENTIFIED ASSETS ACQUIRED AND LIABILITIES ASSUMED
The fair value of identifiable assets and liabilities is based on a purchase price allocation. The following
table summarizes the recognized amounts of assets acquired and liabilities assumed at the date of
acquisition.

The fair value of the trade receivables amounts to NOK 7.4 million. The gross amount of trade receivables
is NOK 7.4 million and it is expected that the full contractual amounts can be collected.

GOODWILL
Goodwill arising from the acquisition has been recognised as follows.

The goodwill-value can be explained by synergies, economies of scale, expectations of future profitability
and growth and expectations of better market conditions.
The purchase price allocation and the accounting for the acquisition is final. Therefor there will be no
adjustments to the above amounts in subsequent accounting periods.

|
SUBSEQUENT EVENTS
BOARD AND CEO
On 12 January 2023 the board decided to appoint Oddbjørn Haukøy as interim CEO, and that a recruitment
process shall be initiated with the aim to identify a permanent replacement as CEO.
Chairman of the board
Dag Schjerven and the board members Rune Magnus Lundetræ and Marianne Lie have at the same time
informed the board that they resign from their positions with immediate effect. The board will, in dialogue
with the nomination committee, consider whether an extraordinary general meeting shall be convened to
elect new board members.

EQUINOR CONTRACT

On 25 January 2023, Equinor has awarded PSW Technology a three-year contract for maintenance
services to the Mongstad refinery. The substantial contract has an annual value of approx. NOK 200 million,
or a total of approx. NOK 1.8 billion if the options are fulfilled and the Group has the assignment for
the next nine years.
OFFSHORE DEVELOPMENT PROJECT
On 30 March PSW Power & Automation and Trans Construction (ATC) secured a new contract for the
design, manufacture, and preassembly of a major e-house module for an Oil & Gas customer. The e-house
module will be a part of an offshore development project on the UK sector.
LOI – MOORING SYSTEM
On 30 January 2023, Seasystems was awarded a letter of intent (LOI) for the delivery of a mooring system
to a floating LNG terminal in Germany. The letter of intent is entered into with the intension to secure
good cooperation in conjunction with a potential contract for a FSRU mooring system. The Group' scope
consists of a complete mooring solution including design, analysis, model testing and mooring equipment
such as chain, chain stoppers, jacks and winches. The project has been in an engineering phase for the past
six months.

DISCLOSURE 5
|
GOING CONCERN
The financial statementis prepared based on going concern. The board confirms the going concern
assumption is present in accordance with Section 3–3c of the Accounting Act.
The Group achieved a positive EBITDA amounting to NOK 70.6 million compared to NOK 16.7 million
last year. Adjusted EBITDA in 2022 was NOK 76.5 million versus NOK 23.7 million last year. See
alternative performance measures. The Group's equity amounts to NOK 492.6 million and the liquidity
reserve amounts to NOK 112.6 million as of 31 December 2022. The share issue in 2022 related to
the PSW transaction and conversion of seller credit were the main factors for the increased equity.
The company is working on several possible projects and has won significant contracts during fourth
quarter in 2022 and first quarter in 2023. See disclosure 4. The order backlog is NOK 533 million.
The oil price is noted at high level and supply activity has increased at the end of 2022 and into 2023.
The assumption of going concern is based on a strong pipeline into 2023 and a strengthened
foundation for further growth.

DISCLOSURE 6

SEGMENT INFORMATION & REVENUE

SEGMENT INFORMATION

Scana has three business areas being OFFSHORE, ENERGY and MARITIME.
OFFSHORE delivers products, services, and lifetime extensions to several segments of the offshore
industries.
ENERGY delivers shore power and energy storage solutions to the ocean industries.
MARITIME delivers mooring solutions to floating structures across the ocean industries and valve
control systems to the shipping and offshore industry.

"Scana HQ" includes Scana ASA, some holding companies and Scana Property AS.
The column «Eliminations» applies to eliminations between the segments.
OFFSHORE consists of:
PSW Technology AS, PSW Solutions AS and Subseatec S AB.
PSW Technology AS owns 100 % of the shares at PSW Solutions AS
and PSW Power & Automation AS.

DISCLOSURES
|
SCANA GROUP

ENERGY consists of:
PSW Power & Automation AS and Trans Construction AS.
PSW Power & Automation AS owns 100 % of the shares at
Trans Constructions AS.
MARITIME consists of:
Seasystems AS, Skarpenord AS and Scana Valve Control AS.
Scana Valve Control AS owns 100 % of the shares at Skarpenord AS,
49 % of the shares at Scana Korea Hydraulic Ltd.,
and 49 % of the shares at Scana do Brasil Ltd.
Scana HQ consists of:
Scana ASA, Scana Trading AS, Scana Property AS,
Scana Energy Holding AB, PSW Holding I AS and Scana do Brasil Ltd.
Scana ASA owns 100 % of the shares at Scana Trading AS,
Scana Property AS and Seasystems AS and PSW Holding I AS.
Scana Trading AS owns 100 % of the shares at Scana Energy Holding AB,
Scana Valve Control AS and 51 % of the shares at Scana do Brasil Ltd.
Scana Energy Holding AB owns 100 % of the shares at Subseatec S AB.
PSW Holding I AS owns 100 % of the shares at PSW Technology AS.
The presentation coincides with the internal reporting to the board. Revenue from sales to external

customers and transactions with other segments are reported for each business areas and inter-segment
pricing is determined on an arm's length basis. The following summary describes the operations of each
reportable segment.

PERFORMANCE OBLIGATIONS

Information about the Group's performance obligations are summarised below:

SERVICE- AND MAINTENANCE CONTRACTS

Service and maintenance contracts are time and materials contracts and fixed-price contracts. Each individual contract is normally considered as a separate performance obligation and revenue is recognised over time to depict the delivered time and materials. For contracts with significant fixed-price elements an input method is used to measure the progress of the project, which is the basis for recognizing revenue over time.

Invoices are issued according to contractual terms and are usually payable within 30 days.

POWER SYSTEMS

Shore power systems and energy storage systems. For Power systems, the customer controls all of the work in progress as the products are being manufactured. This is because under those contracts the systems are made to a customer's specification and if a contract is terminated by the customer, then the Group is entitled to reimbursement of the costs incurred to date, including a reasonable margin.

Invoices are issued according to contractual terms and are usually payable within 30 days.

Revenue is recognised over time based on the cost-to-cost method. The related costs are recognised in profit or loss when they are incurred. Advances received are included in contract liabilities.

FORGED GOODS

Forged goods to the oil and gas industry. The goods are customized based on customers' requirements and are sold as bundled goods. The goods are considered as a single performance obligation as the components are not separately identifiable.

Revenue for these performance obligations is recognized over time based on the progress towards
complete satisfaction of the performance obligation. Progress in the projects is measured according
to the input method.
VALVE CONTROL SYSTEMS
Valve control systems to the marine and offshore industry, which consists of several components but
can only be used by the customer as a complete unit. The revenue is recognized over time where
the transaction price is allocated to a performance obligation based on the input method and when
control is transferred to the customer. Contracts do normally have fixed prices. Variation orders is included
in the project when it is signed. The customers pay advances based on milestones defined in the contract.
SEASYSTEM-SOLUTIONS
Innovative system solutions within anchoring and turrets for floating production and storage ships,
aquaculture units and offshore wind. The systems linked to offloading are customized based on hose
reels requirement specification from the customer who has no alternative use. The same assessments
are made in relation to anchorage and turret. The revenue is recognized over time where control is
transferred to the buyer which coincides with the progress of the projects measured according to
the input method. In the contracts with the customers the company has the right to be compensated
for incurred costs and margin if the customer cancels the contracts.
Contract deliveries where the revenue is recognized over time are often entered into with milestone invoicing
such as due after 30 to 90 days.
SALE OF EQUIPMENT AND SPARE-PARTS
This revenue type involves sale of products or equipment that are of a standard nature, not made
according to the customer's specifications. Customers usually obtain control of these products when
the goods are delivered to the customers in accordance with the contract terms. The Group has assessed
that the performance obligations for such products are satisfied at a point in time, and revenue from
these performance obligations is recognised at that point in time.

DISCLOSURE 7
|
INVESTMENT IN ASSOCIATED COMPANY/
INVESTMENT IN SHARES
SCANA KOREA HYDRAULIC LTD.
The Group owns 49 % of the shares in Scana Korea Hydraulic Ltd through Scana Valve Control AS.
Scana Korea Hydraulic Ltd is involved in the sale and production of hydraulic valve control systems.
The company is located in Busan in South Korea and is part of the MARITIME segment.

Income from interests in associated is presented on separate row in income statement for current and
last year. It is representing a reclassification from previous year due to the Group consider the profit is
not a part of financial income and expenses in the income statement.
The reclassification has been made in order to improve the user's understanding of the Group's financial
performance. The change has no impact on net result or equity, and the change has been implemented
retrospectively.

ANNUAL REPORT 2022
DISCLOSURES
|
SCANA GROUP

The Group had 371 employees on 31 December 2022 (2021: 84 employees). The increase is driven

by the acquisition of PSW and Trans Construction.
For further information relating to salaries and remuneration to senior executives, see "Report on
remuneration to senior executives". You will also find the report on Scana's website.

The resignation period for key personnel is from 3–6 months. The CEO has a severance agreement which
involves salary for 6 months beyond the notice period. Any wage income received from other work in the
period where severance pay is paid must be deducted from severance pay.
Refers to disclosure 11 for
description of pensions. The pension scheme for senior employees is contribution-based.
No loans, advance payments or collateral have been given to leading persons during 2022. On the balance
sheet date, no leading persons have loans. See disclosure 29 for further discussion according to related
parties.
*
CCO was hired from February 2022, while Head of IR and Investments was hired from September 2022. CEO resigned in January 2023.

SHARE-BASED REMUNERATION (EQUITY-SETTLED)
On 24 June 2019, the company announced that senior employees have been awarded an option
program together with the general manager of the subsidiaries. The option program was approved at
the ordinary general meeting on 8 May 2020. On 24 January 2022, the company announced that senior
employees have been awarded an option program together with the general manager of the subsidiaries.
The option program was approved at the ordinary general meeting on 22 June 2022.
The report first presents the 2019 program and then the 2022 program.

ANNUAL REPORT 2022

The options can be exercised in connection with the reporting of the quarterly reports indicated in
the table above. The exercise period is two weeks after the quarterly report is published at Oslo Børs.
The options linked to plan 1a are earned in the period from the award date to the vesting date, which is
21.06.2019–30.06.2020.
The options linked to plan 1b are earned in the period from the award date to the vesting date, which is
21.06.2019–30.06.2021.
The options linked to plan 1c are earned in the period from the award date to the vesting date, which is
21.06.2019–30.06.2022.
Options that have not been exercised (cf. plan 1a, 1b and 1c) can be exercised through plan 1d on 30
June 2023 at a strike price of 1.464. The exercise can take place after the publication of the second
quarter report of 2023 and the following two weeks.

The CFO entered into an option agreement a year later and can exercise the options on the same terms
a year later than the other participants.
Resigned CFO Kjetil Flesjå left the company with effect from 30 November 2020. He has retained his
allocated options with associated rights.
No shares or other instruments have been allocated in connection with remuneration to leading persons.
No options have been exercised in 2022.

Information regarding the reported financial year
The main conditions of share option plans
Opening balance
During the year

Closing balance

The options can be exercised in connection with the reporting of the quarterly reports indicated in
the table above. The exercise period is two weeks after the quarterly report is published at Oslo Børs.
The options linked to plan 1a are earned in the period from the award date to the vesting date, which is
24.01.2022–30.06.2023.
The options linked to plan 1b are earned in the period from the award date to the vesting date, which is
24.01.2022–30.06.2024.
Options that have not been exercised (cf. plan 1a) can be exercised through plan 1c on 30 June 2024
at a strike price of 1.47. The exercise can take place after the publication of the second quarter report of
2024 and the following two weeks.
The options linked to plan 1d are earned in the period from the award date to the vesting date, which is
24.01.2022–30.06.2025.
Options that have not been exercised (cf. 1a and 1b) can be exercised through plan 1e until 30 June 2025
at a strike price of 1.544. The exercise can take place after the publication of the second quarter report of
2025 and the following two weeks.
No shares or other instruments have been allocated in connection with remuneration to leading persons.
No options have been exercised in 2022.

BOARD REMUNERATION
The board of Scana ASA was paid TNOK 1,125 in fees in 2022 and TNOK 31 to the election committee.
Board remunerations are paid annually in arrears and apply for the period from the ordinary general meeting
2021 to the ordinary general meeting 2022. Fees in arrears for the board elected in May 2021 with a term
of office until May 2022 are specified below. A new board was elected at an extraordinary general meeting
in December 2022. In addition, three board members stepped down from the board in January 2023.

Total remuneration			1 125	1 125

VALUATION METHOD
In connection with determining the value of the option program, a binomial option pricing model has been
used. It is assumed that a "geometric Brownian motion" model as a price model, which is the most
widely used price model in financial mathematics, can be used to generate future share prices.
The risk-free interest rate is in accordance with Norges Bank's interest rate at the time of the award.
Risk-free interest is interpolated over the accrual period. The volatility is based on trades made in the
share in the past five years, which is 97 %. Dividend is not considered.
Based on simulations, this gives an indicative option value of NOK 5.2 million according to option
program from 2019. The same method is used for an option program announced January 2022 which
gives NOK 10.5 million.
In both option programs, it is assumed that no one who has been granted options will end the vesting
period and that everyone will redeem the options after 36 months.
The value of granted options is accrued over the period in which the employees acquire the right to
receive the options. In 2022, NOK 3.8 million was recognized as a cost the option program in accordance
with the vesting period.

DISCLOSURE 10
|
PENSION
According to Section 7–30a of the Accounts Act, companies in Norway are obliged to have an
occupational pension scheme according to the Mandatory Occupational Pensions Act and the companies
have a pension scheme that meets the requirements.
PERFORMANCE PLAN IN NORWAY
The Norwegian companies within the Group are covered by an AFP scheme. The number of employees
covered by the scheme is 368 people as of 31 December 2022 (2021: 83 people).
From an accounting point of view, the scheme is to be regarded as a benefit-based multi-enterprise
scheme. The Group is unable to identify its share of the scheme's underlying financial position and result
with a sufficient degree of reliability, and on this basis the scheme is accounted for as a deposit scheme.

This means that obligations from the AFP scheme are not entered in the balance sheet. Premiums for
the scheme are expensed when they accrues.
DEPOSIT PLAN IN NORWAY
Companies in Norway have deposit plans. The contribution plans cover all employees over the age of 20
in more than 20 % positions. The deposits amount to 4.5–5 % of annual salary between 0–7. 1G and
8 % between 6G–12G. The pension funds are invested in funds administered by an insurance company
and managed by the employee. As of 31 December 2022, there were 361 members of the schemes
(2021: 75 members).
Prepaid pension cost is entered in the statement of financial position as a long-term receivable and the
liability is entered in the balance sheet as a long-term liability.
2022
2021
Prepaid pension cost 31.12.
1 883
2 025
Balance sheet pension obligation 31.12.

DISCLOSURES
|
SCANA GROUP

DISCLOSURES
|
SCANA GROUP

PENSION SCHEMES IN SWEDEN
There are two pension schemes in Sweden, an ordinary defined contribution scheme and a multi-company
benefit scheme which is accounted for as a defined contribution scheme.
The benefit plans are organized as joint plans for several employers (multi-employer plans) and are
insured in Alecta. Necessary information to be able to account for the benefit schemes as benefit plans
is not available. For that reason, the Group has accounted for the scheme as a deposit scheme.
The reason why there is insufficient information to be able to account for the scheme as a defined
benefit scheme is that Alecta does not have information about the distribution of the accrual of pension

rights between the various employers and therefore does not have the opportunity to make an accurate
and reliable distribution of assets and liabilities to the respective employers. Furthermore, Alecta does
not have a set of regulations for how any surplus or deficit that arises is to be handled. For that reason,
the Group has accounted for the scheme as a deposit scheme.
The Group's expected contribution to the benefit scheme in 2022 in Alecta is estimated by Alecta at
NOK 0.7 million (estimate for 2021 was NOK 1.2 million). The multi-company benefit scheme covers
9 out of 9 employees (2021: 9 out of 9 employees).
The collective funding ratio measures the distribution of assets in relation to the insurance commitment.
The insurance commitment consists of guaranteed commitment and distributed bonus to insured and
policyholders, calculations based on Alectas insurance technical methods and expectations, which
differs from the methods and expectations used in the valuation of defined benefit pensions in
accordance with IAS 19.
According to Alecta's funding policy for defined benefit pensions, the level of the collective funding
ratio can vary between 125 and 155 percent. If the level deviates from the normal level, measures must
be taken to bring the funding ratio back to the normal level. In the case of a low degree of financing, one
measure could be to increase the agreed price for new subscriptions and extend the existing benefits.
In the event of a high degree of financing, one measure may be to introduce premium reductions.
Alecta's funding ratio at the end of 2022 was 172 % (2021: 172 %).
THE OVERVIEW BELOW SHOWS SCANA'S PARTICIPATION SHARE PER

	31.12.2022	31.12.2021
The Group's share of the total savings premium for ITP 2 in Alecta *	0.00153 %	0.00269 %
The Group's share of the total number of assets insured in ITP 2 **	0.00235 %	0.00227 %

	2022	2021
Pension costs related to defined contribution plans in Norway	13 381	4 260
Pension costs linked to defined contribution and multi-employee plans in Sweden:	1 235	1 577
Total pension cost	14 616	5 837

To the extent that the necessary information becomes available, and the arrangements must be
accounted for as performance plans in accordance with According to IAS 19, this could have an effect
on the consolidated accounts.

Closing balance, net deferred tax assets
52 373
57 394
Deferred tax assets not recognized in the balance sheet was NOK 20.2 million, and NOK 19.9 million
was linked to segment Scana HQ.
As of 31 December 2022, the tax loss to be carried forward in Norway is NOK 364.3 million
(2021: NOK 270.7 million). In Sweden, the tax loss carried forward is MNOK 9.1 as of December 2022
(2021: MNOK 9.8). There are no restrictions on the right to carry forward tax losses.
The business in Sweden delivers positive results, while the Norwegian businesses in total deliver negative
results before tax. Management considers it likely that tax losses will be used in connection with
companies in Norwegian operations. This is based on expected future cash flows and builds on
the same assumptions used in the impairment tests. This is also supported by several new contracts
won in fourth quarter 2022 and I first quarter 2023 which are expected to contribute with increased
future taxable income. The taxable loss is recognized in the statement of financial position as a deferred
tax assets in the operating businesses and a part of it in Scana ASA.
In this connection, the company considers that there is sufficient taxable income in future periods, adjusted
for net temporary differences with future taxable income. Taxable amounts arising from tax-reducing
temporary differences expected to arise in future periods are disregarded. See also mention in disclosures
2 and 12 relating to impairment test.
In 2022, deferred tax assets were recognized in the statement of financial position, which positively
affects the income statement of NOK 11.3 million.

IMPAIRMENT TESTS – DESCRIPTION OF METHOD
The Group tests assets, per cash-flow-generating unit ("CGU"), for impairment annually or more frequently if there are indicators of impairment. Scana assesses various impairment indicators, including the ratio between market value on the Oslo stock exchange and book value of equity, market development, lower than expected earnings and changes in market interest rates.

As of 31 December 2022, the market value of the company is higher than the book value of the equity, which does not indicate a possible need for impairment of assets, including goodwill, intangible assets, right-of-use assets, fixed assets and other assets in the various CGUs. Two of the cash flow-generating units has booked goodwill based on the acquisition of PSW and Trans Construction. There is no need to make an impairment.
Some of the CGU has experienced better growth in the market than predicted in previous impairment tests, but offshore has experienced weaker turnover than expected.
In the impairment tests, the value in use is calculated based on the discounting of expected future cash flows by a discount rate shown in an overview on next page. The discount rate is based on risk free interest and external source Damodaran. The cash flows are based on the budget and business plans established by the management for the period 2023–2027. The estimates are based on an approach for budgeting the various cash-generating units. For the following period, the model is based on a terminal connected with a growth rate that reflects long-term inflation expectations. The income is based on concluded contracts, information about the potential for new agreements and an assumption about the development of the price in the market. The estimated operating margin in the period increases based on expectations of a positive market development and that the cost measures have an effect. The cash flows linked to the lease agreements are included as part of the investments. The total investments linked to all operating assets are maintained at the same level as the current depreciation in the future cash flows. In assessment of climate related costs, the Group has not incorporated any significant costs in the future cash flow

according to value in use connected to intangible assets, equipment, plant and machinery or right of use assets. The Group will monitor new regulations according to climate related costs and take this into account when it has been approved. The Group recognizes impairment in the result if the value in use is lower than the book assets for the cash flow generating unit. Impairment indicators have been identified for CGU.

The impairment tests have been prepared based on the method and principles discussed above.

CGU-OFFSHORE

CGU-OFFSHORE consists of PSW Technology and PSW Solutions. The CGU has performed lower activity and profit in current year than expected. There is identified an impairment indicator for this CGU on the balance sheet date.

The impairment test of goodwill and other intangible assets are carried out in accordance with requirements in IAS 36.

The value in use has been used to determine recoverable amount. The calculations are based upon estimated future cash flows for the cash generating unit, OFFSHORE. The estimated future cash flows are based upon budgets and long-term profit goals covering a five-year period. In assessing future cash flow for next five years current tender activities and short-term prognosis has been supplemented with the long-term business plan. There has been a delay in revenue generating in 2022 that is expected to catch up in the next few years as the oil service market is expected to be strong. A strong order backlog going into 2023 further backed significant contract award described in disclosure 4 provides support for strong revenue growth. With the expected increase in revenue the operating margins will increase significantly due to economies of scale from the CGU's facilities which have surplus capacity. The key uncertainty is the timing and extent of contract awards. The cash flows are based on the management and the board's best estimate.

Per end of December 2022 estimated cash flow supports the book values in the CGU, and there is no need for an impairment.

CGU-ENERGY

PSW Power & Automation together with Trans Construction is defined as a cash generating unit (CGU-ENERGY). These companies were purchased in 2022 and the Group has booked a corresponding goodwill in the statement of financial position. Scana Group measures the goodwill once a year unless there are impairment indicators.

The Group performed an impairment test of goodwill and other intangible assets in accordance with requirements in IAS 36. The value in use has been used to determine recoverable amount. The calculations

are based upon estimated future cash flows for the cash generating unit, ENERGY. The estimated future cash flows are based upon budgets and long-term profit goals covering a five-year period.
Continuing high energy prices are expected to keep demand strong for service offering and new projects. Based on this Scana considers the market outlook for the CGU as strong. Operating margins has been negatively impacted by disturbance in supply chain in 2022 and challenges in a few projects. During fourth quarter ENERGY has won several contracts and has improved the order backlog which is NOK 193 million end of December 2022. It confirms the strong position ENERGY has in the market.
ENERGY assumes an expected growth in activities and future revenues. The operating margin is also expected to increase the next five years. The cash flows are based on the management and the board's best estimate. Per end of December 2022 estimated cash flow supports the book values in the CGU, and there is no need for an impairment.

SENSITIVITY ANALYSIS
Sensitivity analysis related to the impairment test, test for reasonable changes in the key assumptions.
For example, a decrease in the operating margin (other assumptions unchanged) at ENERGY by 1.0 % points the recoverable amount will reduce by NOK 53.8 million. If the operating margin increases by 1.0 % points (other assumptions unchanged), the recoverable amount will increase by NOK 53.8 million.
An increase in the discount rate before tax by 1.0 % points will reduce the recoverable amount by NOK

68.4 million, correspondingly a reduction by 1.0 % points will increase amounting to NOK 90.1 million.
No reasonable possible changes will lead to an impairment based on this sensitivities.

SENSITIVITY	CHANGE	ENERGY	OFFSHORE

RIGHT OF USE ASSETS
RIGHT OF USE ASSETS
All right of use assets presented in the table below relate to premises, machines and cars. The right of use
assets are depreciated on a linear basis over the fixed lease period, with the exception of a machine which
is depreciated over its economic life. As of 31 December 2022, the Group has assessed that it is certain
that the options relating to the extension of lease agreements will not be exercised. In connection to right
of use, read disclosure 2 for critical accounting judgement.

Depreciation period for machines, fixtures and similar:
3–5 years are used for office equipment and IT equipment
10–15 years are used for production equipment and production machines
Fixed assets are pledged so there are restrictions on disposal. This applies to companies in Norway
and Sweden. Book value of pledged operating assets is NOK 143.7 million as of 31 December 2022
(31.12.21: NOK 11.8 million). See disclosure 24 relating to the mention of lease agreements and
disclosure 13 right of use assets.
The calculation of the recoverable amount for the write-down is assessed at level 3 according to
the valuation hierarchy.
At the end of December 2021, NOK 6.0 million has been transferred to machinery which has been
classified as a right of use past years.

CONTRACTS
The table below shows revenue and costs that are recognized over time related to contracts that
have not been completed and delivered at the time of the statement of financial position. Several of
the contracts have a completion time of more than a year.

Remaining revenue connected to contract assets and contractual obligations are NOK 532.9 million as
of 31 December 2022 (2021: NOK 77.6 million) and are expected to be delivered during 2023. Ongoing
projects portion of order backlog is 82 % and 18 % has not yet been started on balance date.
All ongoing projects in beginning of 2022 have been delivered.
Contract assets and contract liabilities have been reduced in 2022 and are linked to projects that
have been completed and that customers have paid advances in connection with milestone invoicing.

Contract assets are offset against contract liabilities based on progress in the projects linked to each
individual contract.

DISCLOSURE 20
|
FINANCIAL RISK
The Group is exposed to the following financial risks:
Market risk
Credit risk
Liquidity risk
This disclosure provides information about exposure to each of the above-mentioned risks as well as
goals, principles and processes for measuring and managing risk, and the Group's capital management.
More quantitative information is included elsewhere in the consolidated accounts.
The board of directors has overall responsibility for establishing and monitoring the Group's risk management
framework.
Risk management principles have been established in order to identify and analysis the risks to which
the Group is exposed, to stipulate limits on risk and pertaining control procedures, and to monitor risk
and compliance with the limits. Risk management principles and systems are reviewed regularly to
reflect changes in activities and market conditions.

MARKET RISK
Market risk is the risk that fluctuations in market prices, e.g. exchange rates and interest rates, will
affect future cash flows or the value of financial instruments. Market risk management aims to ensure
that risk exposure stays within the defined limits, while optimising the risk-adjusted return.

Scana has a centralized finance function. Hedging of currency and interest rate exposure is done in
accordance with the Group's policy and routines. Scana seeks to reduce the risk associated with currency
and interest rates by using hedging instruments. This is done centrally by the finance department on
the basis of the exposure reported by the operational units.
CURRENCY RISK
The Group is exposed to transactional foreign currency risk to the extent that there is a mismatch
between the currencies in which sales, purchases, receivables and borrowings are denominated and
the respective functional currencies of Group companies. The Group's management continuously monitors
and reports on the Group's currency positions. The Group's risk management policy is to hedge material
estimated foreign currency exposure in respect of forecast sales and purchases over the following
12 months at any point in time. The Group uses forward exchange contracts to hedge its currency risk,
most with a maturity of less than one year from the reporting date.

SENSITIVITY ANALYSIS – CURRENCY
The table below shows the sensitivity analysis related to currency risk. Tax effects are not considered in
the calculations. A reasonably possible strengthening (weakening) of NOK against all other currencies
on 31 December would have affected equity and profit or loss by the amounts shown below. This analysis
assumes that all other variables, in particular interest rates, remain constant. EUR currency has a portion
of 82 % in the sensitivity analysis. In addition the Group has USD, GBP and SEK currencies at balance date.

INTEREST RATE RISK
Scana has no interest rate hedges on the balance sheet date.
The Group's interest rate risk relates to the Group's debt portfolio and cash equivalents is managed at
Group level. The Group's objective is to secure and counteract major effects from changes in the market
interest rate.
SENSITIVITY ANALYSIS – INTEREST RATE
The table below shows the sensitivity analysis related to interest risk. A reasonably possible change of
100 basis points in interest rates at the reporting date would have increased (decreased) equity and
profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular
foreign currency exchange rates, remain constant.

Change in interest rate	Impact result before tax	Impact other comprehensive income
2022		
1 %	(1 483)	(1 483)
-1 %	1 483	1 483

LIQUIDITY RISK
Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due.
The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have
sufficient liquidity to meet its liabilities under normal and conditions.
The Group works continuously to reduce liquidity risk through monitoring and active dialogue with
the subsidiaries.

See disclosure 23 for more information on the Group's bank loans as of 31.12.2022.
For more information read disclosure 22 according to Group's cash and cash equivalents as of 31.12.2022.
The Group has a bank balance as of 31.12.22 of NOK 2.6 million and unused drawing facilities
amounting to NOK 110 million.
EXPOSURE TO LIQUIDITY RISK

The following are the remaining contractual maturities of financial liabilities at the reporting date.
The amounts are gross and undiscounted and include contractual interest payments.

Credit risk is the risk of financial losses in the event that a customer or counterparty in a financial
instrument is unable to meet its contractual obligations. Credit risk relates usually to the Group's trade
receivables, contract assets and cash and cash equivalents. The Group's exposure to credit risk is mainly
the result of individual factors relating to each individual customer. The demographics of the customer
base, including the risk of default of payment in the industry and the country in which the customers
operate, have less influence on the credit risk.
The Group has guide lines to ensure that orders are not entered into with customers who have
significant problems with payment and that outstanding amounts do not exceed established credit
limits. In practice, this is done with credit assessments before contracts are entered into.
In addition, Scana enters into larger customer contracts with advance payments (20 %–30 %) or
milestone invoicing throughout the entire project progress.
The Group regards its maximum credit risk exposure to the carrying amount of trade receivables and
contract assets.
Historically, losses on trade receivables and contract assets have been limited.

FINANCIAL INSTRUMENTS

HEDGING CURRENCY RISK
As a proportion of the Group's sales take place in foreign currency, Scana is exposed to fluctuations
in exchange rates in the period from the conclusion of the sales contract until the final payment from
the customer. In addition, there are risks associated with future payments in foreign currency. When
Group's hedging the net cash flow based on the individual currencies, forward contracts are entered
which correspond to a proportion of the expected future payments.

SCANA GROUP

CLASSIFICATION OF FINANCIAL ASSETS
In accordance with IFRS 9, the Group classifies financial assets based on the business model where they
are managed based on contractual cash flows. The main categories of financial assets according to IFRS 9
are amortized cost, fair value classified as other comprehensive income and expenses and fair value
presented in profit and loss.
In accordance with the loss model, the Group recognizes expected losses over the lifetime of financial
assets that are measured at amortized cost, debt instruments that are measured at fair value over other
income and costs and contract assets. The Group assesses expected losses related to financial assets
over their lifetime.

DETERMINATION OF FAIR VALUE
The fair value of forward currency contracts is determined by using the closing rate on the balance sheet
date adjusted for an interest addition or deduction based on the interest rate difference between
the respective currencies. For forward exchange contracts, the present value of the cash flow is taken
as a starting point. The fair value of cash, overdrafts and other interest-bearing debt is considered to be
approximately equal to the value on the statement of financial position, as these have a short maturity and
thus provide a floating interest rate that is adjusted in line with changes in the general interest rate level.
Similarly, the fair value of trade receivables and trade payables is assumed to be equal to the book value
as both items have a short maturity and are entered into under normal conditions.
The table below shows how the various financial instruments are categorized cf. IFRS 7 as of
31 December 2022.

SCANA GROUP

FAIR VALUE – VALUE HIERARCHY
Scana uses the following hierarchy when assessing and presenting the fair value of the financial
instruments.
Level 1:
Listed prices (unadjusted) in active markets for identical assets and liabilities.
Level 2:
Input other than quoted prices from active markets included in level 1, which are observable for
the asset or liability, either directly (as prices) or indirectly (derived from prices). To calculate
the value of open foreign exchange contracts, it is obtained from Norges Bank on the closing
date.
Valuations also include valuations based on market-confirmed inputs. Market-confirmed
input data is input data determined through mathematical or statistical methods, such as
correlation or regression analysis, where input data in the analysis and/or results can be

confirmed against observable market data. If such an analysis is to be used for the purpose of
financial reporting, the statistical goodness of the analysis should be assessed based on usual
statistical criteria and predictive ability.
Level 3:
Input for the asset or liability that is not based on observable market data.
The table above shows the valuation hierarchy for fair value disclosures for assets and liabilities. In 2022,
there has been no transfer between level 1 and level 2 in the assessment of fair value, and no transfers
into or out of level 3 in the assessment of fair value.

CAPITAL STRUCTURE AND EQUITY
The main purpose of the Group's composition and management of debt and equity is to ensure headroom
to the tasks the Group and subsidiaries face in the short and long term. The Group should have a
reasonable credit rating, and thus competitive loan conditions with lenders to Scana business. Through
good capital management of equity and debt, the Group will support the business that is run, and thus
contribute to increasing shareholder value.
The Group must have sufficient liquid funds and drawing options for financing operational activities.
This takes place through targets for ongoing operations and capital management. The Group manages
the capital structure and make necessary changes based on an ongoing assessment of market and financial
risk and those financial prospects seen in the short and medium term refer to disclosure 23. Reference is
made to the section liquidity risk in disclosure 20 related to the company's financial position.

DISCLOSURE 22
|
CASH AND CASH EQUIVALENTS
The Group has a bank deposit as of 31 December 2022 which amounts to NOK 2.6 million. In the table
above relating to liquidity, cash withdrawals are included as discussed in disclosure 23. The Group has
an unused overdraft limit of NOK 110 million per 31 December 2022. The total liquidity reserve that can be
used by the Group was as of 31 December 2022 NOK 112.6 million (31 December 2021: NOK 68.8 million).
The Group has a cash pool arrangement.

BANK OVERDRAFT
The financing is linked to an overdraft facility of NOK 110 million and a bank guarantee facility of
NOK 60 million. It is a rolling draft facility with annual renewal for the next time on 09.10.2023.
There are certain financial covenants to the loan agreement shown in the overview below:

Capital expenditure should not exceed NOK 29 million, measured annually from 2023. In addition to
financial covenants mentioned above, the contract contains other covenants considered common for
similar contractual relationships. This includes limitations on acquisitions, disposals, change of control
and conditions related to continued listing. The Group was in compliance with the loan terms as of
31 December 2022.
SHAREHOLDERS LOAN
In connection with the refinancing in 2021, a new agreement was entered where the maturity date is set
to 1 day after maturity overdraft. In 2021, accrued interest has been added to the principal and amounts.
In January 2022 connected to PSW transaction the shareholders loan was partly repaid to the shareholders
and the remaining part was converted to equity. End of December 2022 there is no shareholder's loan.

COST OF LOAN
When the new facilities were established, DNB charged the company for establishment costs of the facilities and constitute actual costs for each of the facilities. The method used is amortized cost when the cost is expensed in the result during the borrowing period. The borrowing cost is presented on the row for accrued interest costs.

ANNUAL REPORT 2022

CHANGE IN LIABILITIES RELATED TO FINANCING ACTIVITIES
The overview below shows the change in liabilities due to financing activities in 2022 and where
the changes take effect.

In addition the Group has repaid short term borrowings acquired through business combination of
NOK 99 million during 2022.
The overview below shows the change in liabilities due to financing activities in 2021 and where
the changes have an effect.

Paid interest leases apply to statement of financial position leases. Interest payments include costs
associated with establishing the financing. Increased liability is linked to new lease agreements and
interests added to the principal of the shareholders loan.

DISCLOSURE 24
|
LEASE LIABILITIES
The Group rents premises at all businesses. These leases have a lease period of one to eight years. There are
opportunities to extend some of these leases by up to five years. Fixed rental period covers the company's
needs and provides the necessary flexibility. The rental period is based on best judgment and best estimate
with regard to probable length.
A major part of the lease agreements has a fixed length. The lease is based on the company's strategy
and the desire for flexibility regarding future leases.
Leased machines are mainly smaller machines and equipment. Examples of machinery and equipment

CASH FLOW STATEMENT

are the hire of trucks and copiers, which represent greater value. Lease agreements relating to the trucks
are for up to eight years.
Cars are rented normally over a period of three years and are returned to the lessor at expiry date.
The leases can be extended by two years, but this is not practiced. Options are therefore not included
in the lease liabilities.

Total lease liabilities are measured at the present value of future rental payments with the exception
of common services and costs. The Group has used a weighted average linked to the marginal interest
rate for each of Group's at the time of recognition. The following marginal interest rate is used; for machinery
and equipment 5–6 %, for cars 5 % and premises 5 %. The interest rate is connected to the marginal
interest rate reflects the level linked to loan conditions when financing similar assets. The company has
used common marginal interest for each portfolio of leases relating to usufruct assets with matching
properties.
Lease agreements with a remaining period less than twelve months and agreements with a low value are
not recognised as lease liabilities. Direct costs such as services linked to operating assets with right of use
are excluded when the present value of right of use assets is calculated. See disclosure 1 regarding lease
liabilities for further discussion.
LEASE LIABILITIES
The Group has entered into lease agreements connected to buildings, properties, machines, premises
and other facilities with a remaining lease period of one to ten years. The agreements do not contain
restrictions on the company's dividend policy or financing options. The table below shows rental
obligations entered in the balance sheet as of 31 December.

Vidar Rabben — BOARD MEMBER
Birgitte Feginn Angelil — BOARD MEMBER
Oddbjørn Haukøy — INTERIM CEO
THE BOARD

1)
Gain from sale is related to the sale of businesses
2)
Costs related to strategy development and M&A opportunities
3)
Costs related to the option program that accrue during the vesting period
4)
Restructuring costs related to final agreements and assistance
DEFINITIONS
Rolling EBITDA
EBITDA for the last twelve months
NIBD
Net interest bearing debt (Interest-bearing debt – cash)
Borrowing base
Consists of inventory, accounts receivable and contract assets
Order intake
Consists of the period's new orders as well as net changes to existing orders, including change orders, cancellations and changes related to exchange rates
Order backlog
Consists of remaining deliveries on contracts entered at the end of the period
Covenant EBITDA
Rolling EBITDA adjusted for financial lease and transaction cost related to 2022 acquisitions/PSW and ATC and normalization for one off effects + result from associated company.
Covenant equity ratio
Booked equity/(total assets – financial lease related to 2022 acquisitions of PSW and ATC)
Covenant NIBD/EBITDA
Covenant EBITDA/NIBD excluding financial lease
ALTERNATIVE PERFORMANCE MEASURES
Alternative performance measures, which means financial target figures that are not defined within the current financial reporting framework, is used by Scana to provide additional information. This is done by excluding elements which, in Scana's view, do not give an indication of periodic EBITDA or operating results. Alternative performance targets are intended to improve the comparability of the results from period to period. It is Scana's experience that these are often used by analysts, investors, and other parties. Management also uses these measurements internally. Alternative performance measures are not a substitute for measuring results in accordance with IFRS.
Scana's financial alternative performance measures:
EBITDA
Operating profit before depreciation
Adjusted EBITDA
EBITDA less identified costs or revenues that are excluded to achieve real underlying operations
EBIT
Operating profit after depreciation and write-downs
Adjusted operating income
Operating profit after adjustments related to identified costs or revenues to produce real underlying operations

ANNUAL REPORT 2022
DISCLOSURE 1
|
ACCOUNTING PRINCIPLES
The presented company accounts have been prepared in accordance with the provisions of the Accounting
Act and good accounting practice. Going concern is the basis for the preparation of the annual accounts
and the valuation of the company's assets. The annual accounts consist of profit and loss account, balance
sheet, cash flow statement and disclosure information. It represents a complete annual accounts.
All numbers in the annual accounts are in NOK thousand ('000) unless otherwise stated. The financial
statements have been prepared in accordance with the Norwegian Accounting Act and generally
accepted accounting principles in Norway.
1.1 REVENUE AND COSTS
Income is recognized in the income statement when it is earned. Expenses are recognized in the income
statement in the same period as the associated income. Transaction costs linked to borrowing are
accrued over the term of the loan according to the amortized cost method.
1.2 SHORT TERM RECEIVABLES AND SHORT TERM LIABILITIES
Receivables and liabilities are classified as current assets and short-term liabilities if they are due for
payment within one year of the balance sheet date.
1.3 ASSETS AND LABILITETS IN FOREIGN CURRENCY
Transactions in foreign currency are accounted for at the rates at the time of the transaction. The company's
cash and bank equivalents, receivables and liabilities in foreign currency are converted at the exchange
rate on the balance sheet date.
1.4 TRADE RECEIVABLES
Accounts receivables are entered in the balance sheet after deductions for ascertained losses and provisions
to cover losses.
1.5 SHARES IN SUBSIDIARIES
Investments in subsidiaries are assessed according to the cost method. An impairment is made based
on fair value when the decline in value is due to reasons that cannot be assumed to be temporary and it
must be considered necessary according to good accounting practice. Impairment is reversed when the

basis for impairment is no longer present.
Distributions from subsidiaries that represent earned income are recognized as income in the year the
distribution is accounted for in the subsidiary. Distribution in excess of earned income is considered
repayment of invested capital and is accounted for as a reduction of the investment.
1.6 TANGIBLE ASSETS AND DEPRECIATION
Fixed assets are listed in the balance sheet at historical acquisition cost less depreciation and write-downs.
Depreciation is calculated linearly from acquisition cost. When selling fixed assets, gains are included
as operating income and losses as operating costs. If the recoverable amount of the operating asset
is lower than the balance sheet value, a write-down is made to the recoverable amount. Recoverable
amount is the higher of net sales value and value in use. Value in use is the present value of the future
cash flows that the asset is expected to generate.
1.7 INCOME TAX
The tax expense consists of the tax payable and changes to deferred tax. Deferred tax/tax assets are
calculated on all differences between the book value and tax value of assets and liabilities. Deferred tax
is calculated as 22 percent of temporary differences and the tax effect of tax losses carried forward.
Deferred tax assets are recorded in the balance sheet when it is more likely than not that the tax assets
will be utilized. Taxes payable and deferred taxes are recognised directly in equity to the extent that they
relate to equity transactions.
DISCLOSURES
|
SCANA ASA

1.8 CASH FLOW STATEMENT
The cash flow statement is presented using the indirect method. Cash and cash equivalents includes
cash, bank deposits and other short term, highly liquid investments with maturities of three months
or less.
1.9 LEASING
Lease agreements are assessed as financial or operational leasing according to a concrete assessment
of the individual agreement. The company only has operating assets that are defined as operational leasing.
1.10 FINANCIAL INSTRUMENTS
The company uses various financial instruments in the management of the Group's currency and interest
rate exposure.

Currency forward contracts are entered in the balance sheet at fair value. Unrealized gain or losses
related to these contracts are recognized in profit or loss on an ongoing basis.

SCANA ASA

The company tests the value of the shares for impairment in case of indication of impairment. In assessment, the value in use is used, which is based on the budget and business plans determined
by the management for the period 2023–2027. The estimates are based on the approved budget 2023
and forecasts for 2024–2027 for each individual cash-generating unit. For the following periods,
the model is based on a growth rate of 2.0 %, which is long term expectations of inflation targets at
Norges Bank and 2.0 % at the Riksbank in Sweden. The income is based on order backlog and management assessments and external information according to the potential for new agreements.
Estimated operating margin in the period increases based on expectations of a positive market development. The company recognizes impairment in profit and loss if the estimated value in use is
less than the booked assets connected to the cash-generating units.
The shares in Scana Property AS are written down by NOK 1.8 million. Seasystems has shown a good
performance the last years and a reversal of written down by NOK 11.8 million has been done.
The company has a trade receivable towards Skarpenord of NOK 5.6 million in which a loss provision has
been made due to lower expected future cash flows.

In January 2022
Scana ASA entered into a new financing agreement with bankloan of NOK 150 million.
In addition Scana entered into a bankoverdraft facility of NOK 110 million and a bank guarantee
framework of NOK 60 million. Refer to disclosure 23 in the financial statements for further discussion
of interest-bearing debt.
The shareholders loan was repaid and converted to equity in January 2022.

Oddbjørn Haukøy — INTERIM CEO
THE BOARD

1.1 INTRODUCTION

Report on salary and other remuneration to leading personnel is based on the requirements set out in
the Norwegian Public Limited Liability Companies Act (the "Companies Act"), cf. § 6–16 b, and is further
described in the regulations on guidelines and report on remuneration for leading personnel according
to § 6. The general meeting will hold an advisory vote on the report.
Group management's remuneration in 2022 has followed the guidelines for remuneration adopted by
the general meeting in 2021. The guidelines for remuneration are available on the company's website
as part of disclosure 10 in the annual report for 2020 and the translated version in the next section of
the 2022 Annual Report Guidelines for salary and other remuneration.
In 2022, the Group has invested considerable time and resources related to strategy and M&A activities
to strengthen Scana's position within the electrification and decarbonization of maritime and offshore
industries, as a consequence of the purchase agreement of PSW Group on 16 December 2021. The
EBITDA for the Group was therefore increased to NOK 70.6 million in 2022 compared to last year.
1.2 TOTAL RENUMERATION FOR LEADING PERSONNEL
The resignation period for key personnel is from 3–6 months. The CEO has a severance agreement which
involves salary for 6 months beyond the notice period. Any wage income received from other work in the
period where severance pay is paid must be deducted from severance pay. Refers to disclosure 10 for
description of pensions. The pension scheme for senior employees is contribution-based.
No loans, advance payments or collateral have been given to leading persons during 2022. On the balance
sheet date, no leading persons have loans.
FIXED REMUNERATION
Base salary includes the fixed salary paid or due to leading personnel.
Fees are agreed amounts for a time-limited period.
Fringe benefits relate to company car, telephone, broadband and travel.

* CCO was hired from February 2022, while Head of IR and Investments was hired from September 2022. CEO resigned
in January 2023.

VARIABLE REMUNERATION
There is no agreed variable remuneration for leading personnel. Leading personnel participate in the
Group's share option program where the value is linked to the development of the Group's share price.
EXTRAORDINARY ITEMS
A bonus was paid out in 2021 which is linked to the transaction entered into in December 2021 as a
one-off remuneration awarded to leading persons. No extraordinary items was paid out in 2022.
PENSION EXPENSES
This column includes the contributions that took place under the reported financial year to finance a
fund for future pension pay-out for the director. It includes fixed pension contributions.
UNDERTAKINGS OF THE SAME GROUP
Leading persons have not received remuneration from subsidiaries in the Group.
VARIABLE PART
The Group does not have a variable part linked to agreed remuneration for leading personnel. Neither
has the company the possibility through employment agreements to reclaim variable remuneration.
1.3 SHARE-BASED REMUNERATION
The Group had one established share-based remuneration program from 2019 ending in 2023 and a
new program started in 2022. The report first presents the 2019 program and then the 2022 program.

ANNUAL REPORT 2022
The options can be exercised in connection with the reporting of the quarterly reports indicated in
the table above. The exercise period is two weeks after the quarterly report is published at Oslo Børs.
The options linked to plan 1a are earned in the period from the award date to the vesting date, which is
21.06.2019–30.06.2020.
The options linked to plan 1b are earned in the period from the award date to the vesting date, which is
21.06.2019–30.06.2021.
The options linked to plan 1c are earned in the period from the award date to the vesting date, which is
21.06.2019–30.06.2022.
Options that have not been exercised (cf. plan 1a, 1b and 1c) can be exercised through plan 1d on

30 June 2023 at a strike price of 1.464. The exercise can take place after the publication of the second
quarter report of 2023 and the following two weeks.
The CFO entered into an option agreement a year later and can exercise the options on the same terms
a year later than the other participants.
Resigned CFO Kjetil Flesjå left the company with effect from 30 November 2020. He has retained his
allocated options with associated rights.
No shares or other instruments have been allocated in connection with remuneration to leading persons.

REPORT ON REMUNERATION FOR SENIOR EXECUTIVES

The options can be exercised in connection with the reporting of the quarterly reports indicated in
the table above. The exercise period is two weeks after the quarterly report is published at Oslo Børs.
The options linked to plan 1a are earned in the period from the award date to the vesting date, which is
24.01.2022–30.06.2023.
The options linked to plan 1b are earned in the period from the award date to the vesting date, which is
24.01.2022–30.06.2024.
Options that have not been exercised (cf. plan 1a) can be exercised through plan 1c on 30 June 2024 at
a strike price of 1.47. The exercise can take place after the publication of the second quarter report of
2024 and the following two weeks.
The options linked to plan 1d are earned in the period from the award date to the vesting date, which is
24.01.2022–30.06.2025.
Options that have not been exercised (cf. 1a and 1b) can be exercised through plan 1e until 30 June
2025 at a strike price of 1.544. The exercise can take place after the publication of the second quarter
report of 2025 and the following two weeks.
No shares or other instruments have been allocated in connection with remuneration to leading persons.

1.4 INFORMATION ON HOW THE REMUNERATION COMPLIES WITH THE REMUNERATION
GUIDELINES AND HOW PERFORMANCE CRITERIA WERE APPLIED.

The Group does not have payment schemes that are based on performance criteria and the application of
such criteria. Based on the employment agreements, such arrangements are not included in the conditions.

1.5 EXCEPTIONS AND DEVIATIONS FROM THE REMUNERATION POLICY AND THE PROCEDURE
FOR IMPLEMENTATION

The Group did not deviate from the guidelines in 2022. In 2021 the Group did deviate from parts of the
guidelines. The declaration relating to the remuneration of leading personnel allows the board to decide
in some cases to deviate from the guidelines. One case is extraordinary circumstances where exceptions
may be required to secure the company's long-term interests and sustainability. In 2021, a bonus was
paid in connection with the transaction entered in December 2021 as a one-off remuneration awarded
to leading personnel.

1.6 YEARLY CHANGES OF REMUNERATION AND THE GROUPS RESULTS

The report must contain information on the annual change in the remuneration of each individual executive,
the company's results, as well as the average remuneration divided by the number of FTE's (full-time
equivalents) excluding executive staff over a period covering at least the last five financial years. Scana ASA
does not have salary agreements linked to the achievement of results and it is therefore not included
in the table below. See the Groups Consolidated Statement of Profit or Loss for reference to the Groups
results and the discussion in the board of directors' report.
The table below shows comparable remuneration and the company's performance over the 5 last reported

financial years. Leading personnel who do not hold the same role today are anonymized in the table
below. The average number of FTEs and total remuneration are linked to continued operations and
the EBITDA.

ANNUAL REPORT 2022
REMUNERATION FOR LEADING PERSONNEL
YEARLY CHANGE- REMUNERATION FOR LEADING PERSONNEL
Former CEO resigned in the summer of 2018 and received twelve months' severance pay. Former CFO
resigned in November 2020 and received severance pay the same year.
1.7 INFORMATION REGARDING SHAREHOLDER VOTE
At the Ordinary General Meeting held on 7 May 2021, guidelines for remuneration to leading personnel
were adopted. A total of 35,166,443 shares were represented, of which 638,668 share votes voted
against. According to the guidelines for salary and remuneration must be approved by the company's
ordinary General Meeting at least every fourth year guidelines can also be adjusted by decision in
subsequent General Meetings. No such adjustments have been made since approval in 2021.
1.8 BOARD REMUNERATION
The board of Scana ASA was paid TNOK 1,125 in fees in 2022 and TNOK 31 to the election committee.
Board remunerations are paid annually in arrears and apply for the period from the ordinary general

ANNUAL REPORT 2022
meeting 2021 to the ordinary general meeting 2022. Fees in arrears for the board elected in May 2021 with
a term of office until May 2022 are specified below. A new board was elected at an extraordinary general
meeting in December 2022. In addition, three board members stepped down from the board in January 2023.
The table below shows comparable remuneration to the board over the last five reported financial years.
It is the various roles on the board that are used in the arrangement.
The board confirm that the report is prepared according to the Companies Act Section §6-16 b (3) and
related regulations.

ANNUAL REPORT 2022
REPORT ON REMUNERATION FOR SENIOR EXECUTIVES

142
SCANA ASA
|
ANNUAL REPORT 2022
GUIDELINES FOR SALARY AND OTHER REMUNERATION

FOR LEADING PERSONNEL

1. INTRODUCTION

These guidelines have been approved by the board of Scana ASA ("Scana" or the "company"), in accordance with the Act on Public Limited Companies ("Public Limited Companies Act") Section 6-16a and associated regulations. The guidelines have been prepared for approval at the company's Ordinary General Meeting in 2021 and shall apply until the Group's Ordinary General Meeting in 2025, unless the guidelines are amended or replaced earlier.

2. PERSONNEL COVERED BY THE GUIDELINES

Scana defines leading personnel as the Managing director and members of the Group Management.

The guidelines can also be applied to other key personnel in the Group. The Group does not have employee-elected board members.

3. THE PROCESS FOR THE PREPARATION OF THE GUIDELINES. CONFLICTS OF INTEREST

The board has had an active role in establishing, evaluating, and implementing these guidelines.

The board must prepare proposals for guidelines that must be approved by the company's ordinary General Meeting at least every fourth year. The Ordinary General Meeting makes a final decision on such proposals. Adopted guidelines can also be adjusted by decision in subsequent General Meetings.

To minimize the risk of conflicts of interest, no leading personnel shall participate in the preparation of or make decisions related to salary or other remuneration that the person in question is directly affected by.

4. THE MAIN PRINCIPLES FOR THE COMPANY'S EXECUTIVE PAYMENT POLICY

These guidelines constitute a framework for the salary and other remuneration the company can award to leading personnel during the period the guidelines are active. The purpose is to contribute to the realization of the company's business strategy, long-term interests, and financial sustainability.

The main principle behind the Group's executive payment policy is that base pay should promote value creation in the company and contribute to overlapping interests between the owners and leading personnel.

Basic salary must not be of such a nature or have an extent that could damage the company's reputation.

As a leading player in its industry, Scana is dependent on offering salaries that can recruit the most talented leaders. It is the board's policy that to ensure the best possible leadership, salaries must be offered at levels that the individual is satisfied with and that are competitive in an international market.

Salary and other remuneration must be the same for male and female employees for equal work or work of equal value.

Salary and employment conditions for employees in the Group have been considered when preparing these guidelines, by including information on employees' total income, forms of remuneration and other salary components the board's basis for evaluating whether the Group's salary practices, guidelines and limitations set out in these guidelines are adequate and reasonable.

Basic salary for leading personnel consists of a fixed and a variable salary component which is determined
on an individual basis.
GUIDELINES FOR SALARY AND OTHER REMUNERATION

GUIDELINES FOR SALARY AND OTHER REMUNERATION
ELEMENTS OF PAY
Salary includes all benefits a person receives as a result of his or her position as a leading person in
the Group in accordance with §2 of the Regulations on guidelines and report on remuneration for leading
personnel.
FIXED SALARY
The company's policy is that the management salaries should mainly be expressed in a fixed monthly salary
that reflects the level of the person concerned' s position and practice, including ordinary benefits in kind.
For leading personnel, the basic salary must make up the most significant part of the total salary.
VARIABLE SALARY
Bonus schemes for the management team must be linked to the Group's value drivers to achieve the
Group's business strategy, long-term interests and sustainable business operations. Account must be
taken of achieved results and judgment relating to operating margin and order intake. The total value
of variable payment must not normally exceed the value of fixed payment.
OTHER REMUNERATION
In addition to basic salary, other remuneration may be given to leading personnel, including the allocation
of shares or other benefits linked to shares or developments in the share price in the Group or other
companies in the Group.
NON-FINANCIAL BENEFITS
Leading personnel receive standard non-financial benefits such as coverage of mobile and broadband etc.
PENSION
Pension schemes shall basically be the same for leading personnel as established generally for employees
in the Group. Pension schemes must be based on customary schemes and current legislation.
SHARE-BASED PROGRAM
On 24 June 2019, the Group announced that leading personnel have been awarded a share-based
option program together with the General managers of the subsidiaries. The option program was
approved by the general meeting on 8 May 2020. The board considers attractive share-based incentive
schemes to be an important part of the total compensation.

The options can, according to the option agreements' detailed terms, be exercised with up to 1/3 after
12 months (following the company's reporting of the second quarter of 2020), 1/3 after 24 months
and 1/3 after 36 months. All unused options can be exercised after 48 months. The exercise price is
NOK 1.10 per share after 12 months, and then increases by 10 % for each year. There is a 6-month
lock-in period for shares acquired under the share-based program.
In the share-based program decided in 2019, it is assumed that no one who has been awarded options
ends the vesting period and that everyone redeems the options after the second quarter of 2022.
On 24 January 2022, the Group announced that leading personnel have been awarded a new share-based
option program together with the General managers of the subsidiaries. The option program was approved
by the general meeting on 22 June 2022. The board considers attractive share-based incentive schemes
to be an important part of the total compensation.
The options can, according to the option agreements' detailed terms, be exercised with up to 1/3 after
12 months (following the company's reporting of the second quarter of 2023), 1/3 after 24 months and
GUIDELINES FOR SALARY AND OTHER REMUNERATION

144
SCANA ASA
|
ANNUAL REPORT 2022
1/3 after 36 months. All unused options can be exercised after 48 months. The exercise price is
NOK 1.40 per share after 12 months, and then increases by 5 % for each year. There is a 6-month lock-in
period for shares acquired under the share-based program.
In the share-based program decided in 2022, it is assumed that no one who has been awarded options
ends the vesting period and that everyone redeems the options after the second quarter of 2025.
EMPLOYMENT AGREEMENTS
Retirement arrangements that are established upon resignation will be seen in connection with the mutual
possibility of termination of the employment relationship and other limiting clauses in the individual's
employment agreement. Post-retirement schemes must, as a starting point, have deductions for income
from other sources. The CEO has an agreement for 6 months' severance pay.
DEVIATIONS FROM THESE GUIDELINES
In the following cases, the board may decide to deviate from these guidelines:
– in the event of a change of CEO;
– in the event of material changes in the Group's organization, ownership and/or operations;
– in the event of material changes in the Group's strategy.
– in the event of changes to or additions to relevant legislation, rules or regulations
(for example for regulatory, stock market, tax or administrative purposes, or to take into account
changes in legislation or corporate law obligations or guidelines);

– in the event of other extraordinary circumstances where exceptions may be required to secure the Group's long-term interests and sustainability as a whole, or to ensure the Group's viability.
Any deviation from these guidelines must be reported in the salary report for the individual year.
The Board's statement on the determination of remuneration for leading personnel will be sent out or
made available to shareholders on the Group's website, together with a notice of the Group's Ordinary
General Meeting, as well as the Group's Annual Report.
GUIDELINES FOR SALARY AND OTHER REMUNERATION

Ida Lanssen Lundh
Board member
Ida Ianssen Lundh (b. 1987) currently works as VP Business Development in OKEA ASA, previously VP Drilling & Wells in OKEA ASA. She has also worked for Det norske oljeselskap, Norske Shell and Shell Global Solutions. With over 10 years of experience from the oil and gas industry, she holds extensive national and international experience and insight within company – and project management, technology, and M&A. She has previously had several board positions, and holds a master's degree in petroleum engineering from NTNU/Colorado School of Mines.

Pål Selvik
Chairman of the board
Pål Selvik (b.1972) has more than 20 years' experience from equity and capital markets.
