

ÅRSREGNSKAPET FOR REGNSKAPSÅRET 2024 - GENERELL INFORMASJON

Enheten

Organisasjonsnummer:	922 182 795
Organisasjonsform:	Aksjeselskap
Foretaksnavn:	HAWK INFINITY SOFTWARE AS
Forretningsadresse:	Øvre Slottsgate 5 0157 OSLO

Regnskapsår

Årsregnskapets periode:	01.01.2024 - 31.12.2024
-------------------------	-------------------------

Konsern

Mørselskap i konsern:	Ja
Konsernregnskap lagt ved:	Ja

Regnskapsregler

Regler for små foretak benyttet:	Nei
Benyttet ved utarbeidelsen av årsregnskapet til selskapet:	Regnskapslovens alminnelige regler
Benyttet ved utarbeidelsen av årsregnskapet til konsernet:	IFRS

Årsregnskapet fastsatt av kompetent organ

Bekreftet av representant for selskapet:	Joakim Karlsen
Dato for fastsettelse av årsregnskapet:	29.04.2025

Grunnlag for avgivelse

År 2024: Årsregnskapet er elektronisk innlevert
År 2023: Tall er hentet fra elektronisk innlevert årsregnskap fra 2024

Det er ikke krav til at årsregnskapet m.v. som sendes til Regnskapsregisteret er undertegnet. Kontrollen på at dette er utført ligger hos revisor/enhetens øverste organ. Sikkerheten ivaretas ved at innsender har rolle/rettighet for innsending av årsregnskapet via Altinn, og ved at det bekreftes at årsregnskapet er fastsatt av kompetent organ.

The board of directors' report 2024 for Hawk Infinity Software AS

Operations and locations

Hawk Infinity Software (HIS) is a Nordic cloud software group with companies located in Norway, Sweden, Denmark, Greenland, Iceland, Croatia and Estonia. The main office is in Oslo, Norway. See note 1 in the consolidated financial statement for a complete list of entities included in the Group.

The businesses in HIS operate in niche B2B software markets, offering various mission-critical cloud-based solutions and services for administration, storage, transfer, documentation, IT infrastructure, operations, marketing, CRM, ERP/logistics, and tendering to their end-customers. The end-customers are spread across large enterprise clients, platform partners and SMBs within the private and public domain, operating in segments such as health, public administration, retail, telco, real estate, legal, maritime and automotive. We are pleased with the robustness of the group, and we view the long-term growth drivers and outlook as supportive.

Comments related to the financial statements

Group

The Group's revenues increased from 290,0 MNOK last year to 774,9 MNOK in 2024. Profit (loss) after tax in 2024 was (70,1) MNOK, compared to (57,4) MNOK last year. The loss is largely related to the increased net interest of the Group, and financing costs related to the increased debt financing.

The Revenue increase is related to both organic growth in existing companies, and purchases of new companies. The revenue per segment and country is presented in the note number 5 to the Group's financial statements. The 3 largest categories are Managed services (32 % of total), Cloud Storage & Transfer (22 %), and Niche business services (20 %). The Group's revenue from Norway has decreased from 70 % in 2023 to 65% in 2024, because of the investment in several subsidiaries in other countries in the Nordics.

The operating profit of the group has increased from 50 MNOK in 2023 to 121 MNOK in 2024.

Profits and loss figures from purchased entities are presented from the Group has obtained control, as presented in the accounting principles of the financial statements.

During 2024, the Group has invested substantial amounts in research and development, of which 52 MNOK was capitalized development projects. In addition development projects with a fair value of 140 MNOK was capitalized as part of business combinations.

Total cash flow from operating activities on a Group level was 273,5 MNOK in 2024, and the operating profit constituted 120,9 MNOK. The difference mainly concerns ordinary depreciation, amortization, and impairment. The Group's net payments for acquisition of subsidiaries during 2024 amounted to 1885,2 MNOK. This was primarily financed through bond issues of net 1,575 MNOK. The Group has had capital investments in property plant and equipment, and intangible assets during 2024 of 13,2 MNOK and 52,0 MNOK, respectively.

Annual Report 2024 | The board of directors' report 2024 for Hawk Infinity Software AS

The Group's liquidity reserve as of 31.12.2024 amounted to 380.0 MNOK. The Board considers the Group's ability to self finance investments to be satisfactory.

The Group's short-term debt as of 31.12.2024 constituted 18 % of the Group's total debt, compared to 20 % as of 31.12.2023. The Group's financial position is sound and adequate to settle short-term debt as of 31.12.2024 with the Group's most liquid assets.

Total assets at year-end amounted to 4056,2 MNOK, compared to 1130,6 MNOK last year. The equity ratio was 15 % as of 31.12.2024, compared to 10 % the year before.

The Group's assets are largely non-current in nature, and a large share of the assets are Intangible assets and goodwill (3 382 MNOK), approximately 84% of the total assets of the Group. The treatment of intangible assets and goodwill are presented in the notes to the financial statements.

Parent company

The parent company had no operating revenue in 2024 and 2023. Profit (loss) after tax in 2024 was (21,8) MNOK, compared to 33,7 MNOK last year.

Total cash flow from operating activities on a company level was (4,7) MNOK in 2024, and the operating profit (loss) constituted (5,6) MNOK. The difference between operating profits and the cash flow from operating activities is explained by change in trade creditors and other provisions. The company's net payments on receivables to/from group companies during 2024 amounted to 427 MNOK paid. Furthermore, the net cash pool receivable to subsidiaries increased from 20,2 MNOK on 31 December 2023 to 1,670 MNOK at 31.12.2024, net change of 1 649 MNOK, resulting in a net cash flow from investments of (2 076) MNOK. Cash Pool receivables and liabilities are presented as gross figures in the statutory Parent company Cash Flow statement as investing activities and financing activities, respectively. The company refinanced its bond loan in 2024, leading to a net proceed from borrowing activities of 1 642 MNOK, including financing costs. Furthermore, the Parent entity received group contributions of 37,7 MNOK in 2024. The change in Cash pool Liabilities amounted to 17,1 MNOK, and the net interest paid amounted to 90,3 MNOK. Additionally, the parent of Hawk Infinity Software AS, Hawk Infinity AS, has paid in 511 MNOK in equity financing during 2024. This results in a net cash flow from financing of 2 117 MNOK. The net change in cash and cash equivalent is thus calculated to 36,2 MNOK. The parent company's cash and cash equivalents amounted to 47 MNOK as of 31.12.2024, increased from 11 MNOK as of 2023.

The company's short-term debt as of 31.12.2024 constituted 9,4 % of the Group's total debt, compared to 12,6 % as of 2023.

Total assets at year-end amounted to 3 201 MNOK, compared to 1 001 MNOK last year. The equity ratio was 20 % as of 31.12.2024, compared to 15,4 % the year before.

Treasury stock

Refer to the [statement of changes in equity](#) and [note 21 Share capital and shareholder information](#) in the notes to the consolidated financial statements for further information on changes in the holdings of treasury stock.

Operational outlook

The Board believes it is challenging to make accurate forecasts many years ahead in our industry of continued changes within both technology, market conditions, and competitive landscape. However, the rapid development of new technology, including artificial intelligence, also gives significant opportunities for innovation. The Group has a general positive outlook with respect to our future market expectations and observe strong underlying drivers for cloud-based SaaS and PaaS, which are the material operational categories in the Group. Refer note 5 in the notes to the consolidated financial statements for presentation of the revenue categories and specification.

During 2024 the Group has obtained new financing through both equity and Senior Bond structures to finance investments in a number of new subsidiaries in the Group to add revenues and positive cash flows from these entities, and increase the Group's diversification across industries, and geographically. Including the acquisitions announced after year-end, the Group is now comprised of 28 software businesses. The efforts to increase scale and diversification have been key priorities to solidify the group and reduce single-company business risk. The businesses in HIS operate in niche B2B software markets, offering various mission-critical cloud-based solutions and services for administration, storage, transfer, documentation, IT infrastructure, operations, marketing, CRM, ERP/logistics, and tendering to their end-customers. The end-customers are spread across large enterprise clients, platform partners and SMBs within the private and public domain, operating in segments such as health, public administration, retail, telco, real estate, legal, maritime and automotive. We are pleased with the robustness of the group, and we view the long-term growth drivers and outlook as supportive.

The Group will continue to focus on recurring volume growth to ensure long-term financial success through development of products and services to ensure our offering are relevant for the customers. As we enter the new year, we are excited about the state of our portfolio of companies, and we remain committed to delivering value to our shareholders, employees, and customers.

Financial risk

Overall view on objectives and strategy

The Group is exposed to financial risk in different areas, especially interest rate risk. The goal is to reduce the financial risk as much as possible. The company's current strategy does not include the use of derivative financial instruments.

Annual Report 2024 | The board of directors' report 2024 for Hawk Infinity Software AS

Market risk

The Group is exposed to interest rate risk, as the company debt has a floating interest rate. Changes in the interest rate will impact the Group's cashflow and potentially future investment opportunities. Refer to note 2 Financial risk management for an estimate of the impact of a change in the interest rate.

The Group is also exposed to exchange rate risk, with investments in a number of foreign subsidiaries, materially in Sweden, Denmark, and Iceland, with some additional revenue in foreign currencies.

The Group operates internationally and is mainly exposed to foreign exchange risk, primarily to EUR, SEK, DKK and ISK. Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the functional currency of the relevant Group entity. The Group's currency risk exposure is limited as most of the sales are paid in cash, by credit card companies. In total approximately 7 % of the Group's revenues are in other currencies than the functional currency of the relevant Group entity. Refer to note 2 Financial risk management for an estimate of the impact of a change in the exchange rate. The Group has not entered into derivative or other agreements to reduce the exchange rate risk and the related market risk.

Credit risk

The Group's historical credit losses on trade receivables are considered insignificant. Expected credit loss is also insignificant, there is no forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. Booked expected credit loss is 2,6 MNOK, refer to note 19 for further information. Gross credit risk exposure per 31.12.2024 is 134,9 MNOK for the Group and NOK 0 for the parent company. This is an increase from 2023 when the exposure was MNOK 29,6 for the Group and NOK 0 for the parent company. The above figures do not include intercompany receivables. The Group has not made any set-off or other derivative agreements to reduce the credit risk.

Liquidity risk

The Group's liquidity is still considered satisfactory, but with the continuing higher level of interest rates liquidity management will remain crucial for the Group going forward. To improve liquidity management, the Group entered a cash pool agreement for most of the Norwegian companies in 2023. The Group's strategy for managing liquidity risk is to always have sufficient liquidity to meet its financial liabilities at maturity, both under normal and exceptional circumstances, without risking unacceptable losses or at the expense of the Group's reputation. The Group's forecasts indicate that this strategy will be achieved in 2025.

The Group has raised new debt financing through the bond market of 1 600 MNOK (gross) in 2024 through the issuance of a new Bond structure and increase of the structure existing on January 1st 2024, which was used to finance a total of 14 acquisitions in 2024. The maturity date of the bonds are in October 2028 and July 2029, respectively.

 H1Y1CEA1xe-rJckC4R1xe

Annual Report 2024 | The board of directors' report 2024 for Hawk Infinity Software AS

In Q1 2025 the Group has raised new debt financing through the bond market of 1 100 MNOK, through a tap issue of 500 MNOK and issuance of a new senior secured bond of 600 MNOK. See note 24 in the consolidated financial statements for further details.

Going concern

In accordance with the Accounting Act § 3-3a, we confirm that the financial statements have been prepared under the assumption of going concern. This assumption is based on profit forecasts for the year 2024 and the Group's long-term strategic forecasts. The Group's economic and financial position is sound.

Allocation of net income

The net loss for Hawk Infinity Software AS was MNOK 28,9 in 2024. The Board of Directors has proposed the net loss to be attributed to loss brought forward. The Group's net loss for the period was MNOK 70,1. The Board has proposed that there will be no payment of dividend for 2024.

The working environment and the employees

We recognize that employees are the primary strategic asset for most companies in our industry. As a result, we devote significant energy and resources to ensure our employees are satisfied, including regularly measuring their satisfaction and implementing improvements according to the measurement results.

The Group's working environment is considered to be good. Nevertheless, we strive to continuously improve our working environment and keep employee illness leave within or below industry average.

When employees are sick, we work diligently to find solutions that will enable a fast return to work, such as adjusting work time, tasks, furniture, or other relevant temporary and permanent changes. Leave of absence totaled approximately 2 476 days for the Group in 2024.

Hawk Infinity Group is exposed to an industry that carries minimal risk of physical work accidents, as our work primarily takes place in office environments and does not involve operating heavy machinery or factory work. In 2024, there were no incidents or work-related accidents resulting in significant material damage or personal injury reported within the group.

We offer our employees a range of benefits, such as pension programs, health insurance, travel insurance, and a selection of available welfare leave.

Equal opportunities and discrimination

The Group has 542 employees at year-end –146 women (27%) and 396 men (73%). The Board of Directors consists of four men.

Annual Report 2024 | The board of directors' report 2024 for Hawk Infinity Software AS

We always hire the best qualified candidate for any given position, regardless of gender, age, religious beliefs, ethnicity, sexual orientation or disabilities. All employees have a total compensation that is competitive and aligned with market conditions. Women and men have equal opportunities for parental leave in the Group.

There are very few employees in the Group working part-time, none of which is involuntarily.

The parent company has no employees.

Environmental report

The Group's operations are not regulated by licenses or impositions. The potential environmental impact from the Group's operations is mainly related to energy required to run servers in data centers. The data centers from our primary supplier are run with 100% renewable energy with green certification to reduce carbon dioxide emissions, which helps reduce the environmental impact from the Group's operations.

Insurance for board members and general manager

Insurance has been taken out for the board members and the general manager to cover their potential responsibilities to the company and third-parties.

The Group holds directors' and officers' liability insurance, covering claims against board members and executives, including reimbursement of the Group's indemnification obligations. The insurance excludes claims related to stock exchange regulations, intentional misconduct, and criminal acts. Coverage applies worldwide, except for the USA and Canada.

Shareholder information

The company is a private limited liability company (AS), and 98.93% of its shares are owned by Hawk Infinity AS. The share capital amounts to NOK 1,587,201.36, divided into 153,871,387 Class A shares and 4,848,749 Class B shares, all fully paid at NOK 0.01 per share.

Class A shares represent 100% of the voting rights in the company and are entirely held by Hawk Infinity AS. The company is incorporated as an ordinary private limited liability company under Norwegian law. The company's articles of association do not deviate from the standard provisions of the Norwegian Private Limited Liability Companies Act (Aksjeloven) regarding the transferability of shares. Accordingly, shares are, as a general rule, freely transferable, subject to the statutory provisions on board consent and pre-emption rights, as applicable.

Corporate Governance Statement

The corporate governance model is the Board of Directors' most important instrument for ensuring that the Group's resources are managed in an optimal manner and contribute to long-term value creation for all stakeholders. The principles apply for all companies within Hawk Infinity Software group and among other

Annual Report 2024 | The board of directors' report 2024 for Hawk Infinity Software AS

things describe suggested minimum requirements for ordinary board meetings, accounting and reporting, board composition and intercompany transactions.

Key governance objectives includes:

- Ensure accountability through effective internal control and risk management systems, with clear reporting lines and regular oversight by the board. The Group Finance function has facilitated this by monthly financial reporting and running meetings with finance functions in the operative companies in the Group. Furthermore, the Group has implemented and shared a Group Accounting manual to ensure alignment to the reporting requirements for Hawk Infinity Software.
- Ensure board composition reflects relevant competence, independence, and diversity, tailored to the company's sector, size, and strategic direction. Hawk Infinity AS partners are represented in all boards included in the Group financial statements.
- Promote ethical business conduct and compliance, including anti-corruption measures, fair competition, and sound labor practices.
- Ensure transparency in financial and non-financial reporting.

There are no significant deviations from standard articles of association under applicable law for any Group companies regarding change of control, board representation, or share capital increases of subsidiaries, or for Hawk Infinity Software AS.

Corporate Social Responsibility Statement

The Group and its employees strive to conduct business in an ethical and socially responsible way. The corporate governance and code of conduct constitute fundamental steering principles in the Group. The Group takes a zero-tolerance approach for any discrimination based on gender, religious beliefs, ethnicity, sexual orientation, or disabilities. We are committed to acting professionally and with integrity in all our relationships and business dealings.

The Group has not implemented specific guidelines for social responsibility.

The notes on the following pages are an integral part of these financial statements.

Notes to the consolidated financial statement

Corporate information

Hawk Infinity Software is a Nordic cloud software group founded in 2019 and has its headquarters and registered office at Øvre Slottsgate 5, 0157 Oslo, Norway. The ultimate parent company is Hawk Infinity AS.

Hawk Infinity Software AS has outstanding bonds under ISIN NO0013023226 which are listed on Oslo Stock Exchange and Frankfurt Open Market. The outstanding bonds under ISIN NO0013358069 (HAINS02) are listed on Frankfurt Open Market. Due to the listing on Oslo Stock Exchange the company is considered to be a Public Interest Entity under Norwegian and EU-regulations.

The most important accounting principles applied in the preparation of the annual financial statements are described below. These principles are applied in the same way for all periods presented, unless otherwise indicated in the description.

The financial statements were authorised for issue by the board on 29. April 2025.

Basis for preparation

The consolidated financial statements of Hawk Infinity Software AS have been prepared in accordance with the IFRS[®] Accounting Standards (IFRS) and interpretations by the IFRS Interpretation Committee (IFRIC), as adopted by the EU, as well as certain disclosure requirements pursuant to the Norwegian Accounting Act.

The consolidated financial statements have been prepared on the assumption of the business being a going concern. The consolidated financial statements have been prepared on an historical cost basis except for certain assets and liabilities, which are detailed in the accounting policies below.

Functional and presentation currency

Items included in the financial statements of each of the group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency').

The consolidated financial statements are presented in Norwegian kroner (NOK), which is both the functional and presentation currency of the parent.

Changes in accounting policies and disclosures

No significant changes in IFRS effective for the 2024 financial statements are relevant this financial year.

Annual Report 2024 | Notes to the consolidated financial statement

New standard and interpretations not yet effective

The Group has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective. Adopting the standards not yet effective is not expected to have any material impact on the Group's financial statements.

IFRS 18 Presentation and Disclosures in Financial Statements

This new standard will replace IAS 1 Presentation of Financial Statements. The objective of IFRS 18 is to increase comparability and improve communication in the annual financial statements.

The standard sets requirements for how information is aggregated in the financial statements, affecting both the primary financial statement and notes. Revenues and expenses must be classified in the income statement in one of five categories: operating, investing, financing, income taxes and discontinued operations. The first three categories represent new categories compared to IAS 1. IFRS 18 does not change how the group recognizes and measures revenues and expenses, but it does change the presentation of the income statement.

IFRS 18 also introduces the concept of management-defined performance measures, a set of financial measures that somewhat overlap with alternative performance measures currently used outside the financial statements.

IFRS 18 is awaiting endorsement from the EU and will be effective from 1 January 2027 or later. The Group does not plan to implement the standard at an earlier date.

Consolidation principles

Subsidiaries

The acquisition method of accounting is used to account for purchases of subsidiaries that constitute a business. The consideration given is measured at the fair value of the assets transferred, the equity instruments that have been issued, liabilities assumed on the transfer of control and direct costs relating to the actual purchase. The cost of acquisition also includes the fair value of all assets or liabilities that are the result of an agreement on contingent consideration.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The costs associated with the business combination are expensed when they are incurred.

Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value with changes in fair value recognised in profit or loss as a financial item.

Annual Report 2024 | Notes to the consolidated financial statement

Business combination and goodwill

Business combinations are accounted for using the acquisition method. For description of the measurement of non-controlling interest, see [note 16 Business combination](#).

The consideration paid in a business combination is measured at fair value at the acquisition, see [note 16 Business combination](#).

Provisions for any deferred consideration is classified as a liability in accordance with IFRS 9. Subsequent changes in the fair value are recognised in profit or loss. The assumptions for estimating these provisions are described in [note 24](#).

When acquiring a business all financial assets and liabilities assumed are classified and designated in accordance with contractual terms, economic circumstances, and pertinent conditions at the acquisition date.

Associates

Associates are all entities over which the group has significant influence but not control or joint control. Investments in associates are accounted for using the equity method, after initially being recognised at cost.

Foreign currency translation

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the date of the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end are generally recognised in profit or loss, within finance costs.

Group companies

The results and financial position of foreign operations that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Balance sheet items are translated at the closing rate at the date of that balance sheet
- Statement of profit or loss are translated at average exchange rates
- All resulting exchange differences are recognised in other comprehensive income

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

Annual Report 2024 | Notes to the consolidated financial statement

Revenue from contracts with customers

Subscription revenue

Subscription revenues are invoiced based on a subscription period.

Subscription revenues are recognised on a straight-line basis over the subscription period. The subscription is automatically renewed on the main invoice date.

Significant financing component

The Group receives short-term advances from its customers for subscription revenue. Using the practical expedient in IFRS 15, the Group does not adjust the promised amount of consideration for the effects of a financing component if it expects, at contract inception, that the period between the transfer of the promised good or service to the customer and when the customer pays for that good or service will be one year or less. Certain customers pay in advance for up to 3 years, but the extent is not significant.

Contract liabilities

The Group receives short-term advances from its customers for subscription revenue. A contract liability is recognised when the payment is made. Contract liabilities are recognised as revenue when the Group fulfils the performance obligation (s) under the contract.

Revenue from software consulting

Software consulting and implementation in SaaS Agreements on software consulting are usually based on hours incurred. The hourly based consulting is recognised when services have been provided. It is based on delivered hours and net hourly rates. At the balance sheet date, work performed but not yet invoiced is recognised and capitalised as a contract asset. The Group has concluded that there is no significant financing component for these contracts since these projects are short and agreed invoicing reflects the progression on the work performed.

Revenue from sale of hardware

Revenues from the sale of hardware equipment are recognised at a point in time when the equipment is delivered to the customer.

Annual Report 2024 | Notes to the consolidated financial statement

Intangible assets

Customer relations and contracts

Customer relations and contracts acquired in a business combination are recognised at fair value at the acquisition date. They have a finite useful life and are subsequently carried at cost less accumulated amortization and impairment losses.

Brand name

Brand names acquired in a business combination are recognised at fair value at the acquisition date. They have a finite useful life and are subsequently carried at cost less accumulated amortization and impairment losses.

Software development

Software development expenditures are capitalised to the extent that future economic benefits are expected to flow to the entity.

Costs relating to development are capitalised (Part of Intangible assets in the statement of financial position) if the following criteria are met in full:

- the product or process is clearly defined, and its cost can be identified and measured reliable
- the technical solution for the product has been demonstrated
- the product or process will be sold or used in the company's operations
- the asset will generate future economic benefit; and
- sufficient technical, financial and other resources for completing the project are present

The directly attributable costs that are capitalised as part of the software product include the software development employee costs and an appropriate portion of the relevant overheads. Employee costs are measured based on number of hours spent on relevant projects where the estimated hourly cost includes relevant overheads.

Capitalised software development is depreciated over the expected useful lives of 3-5 years, see note 12.

If the criteria listed above are not met, such costs are recognised as an expense as incurred.

Costs associated with maintaining computer software programs are recognised as an expense as incurred.

Government grants

Government grants are recognised when it is reasonably certain that the company will meet the conditions stipulated for the grants and that the grants will be received. Operating grants are recognized systematically during the grant period. Grants are deducted from the cost which the grant is meant to cover. Investment grants are capitalised and recognised systematically over the asset's useful life.

Investment grants are recognised either as deferred income or as a deduction of the asset's carrying amount.

Research and development grants, "SkatteFUNN", are included in the "other receivables" line item. There are no unfulfilled conditions or other contingencies attached to these grants. The group did not benefit directly from any other forms of government assistance.

Exchange rates used as of 31.12

Foreign currency for spot exchange rate between the functional currency and the foreign currency at the date of the business combinations used see [note 16](#).

Exchange rate used for transactions is the average rate for the period: SEK 1,0174 - DKK 1,5589 – EUR 11,7392 – ISK 0,0808

Exchange rate used statement of financial position 31.12: SEK 1,0293 – DKK 1,5816 – EUR 11,7950 – ISK 0,0820

Property, plant and equipment

Property, plant and equipment is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Property, plant and equipment acquired as part of a business combination is measured at fair value at the acquisition date.

The depreciation methods and periods used by the group are disclosed in note 12. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

Trade and other receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. Trade receivables are measured at the transaction price unless there is a significant

Annual Report 2024 | Notes to the consolidated financial statement

financing component. Subsequent measurement is done at amortised cost after deduction of provision for expected credit losses. Other receivables are measured at fair value upon initial recognition, and thereafter at amortised cost. Interest is ignored if it is insignificant. The group applies the IFRS 9 simplified approach in measuring expected credit losses and uses a lifetime expected loss allowance for all trade receivables, see [note 18](#).

Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs.

Employee benefits

Pensions

The group has a defined contribution plan. For defined contribution plans, the group pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The group has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expenses when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

Share based payments

The Group has share-based programs for employees and directors in the wholly owned subsidiaries of Hawk Infinity Software AS, see [note 9](#). The programs are measured at fair value. The share option program is settled in stocks.

Leases (Group as lessee)

Identifying a lease

At the inception of a contract, The Group assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Lease liabilities

The lease liability is recognised at the commencement date of the lease. The Group measures the lease liability at the present value of the lease payments for the right to use the underlying asset during the lease term that

Annual Report 2024 | Notes to the consolidated financial statement

are not paid at the commencement date. The lease term represents the non-cancellable period of the lease, together with periods covered by an option either to extend or to terminate the lease when the Group is reasonably certain to exercise this option.

Right-of-use assets

The Group measures the right-of-use asset at cost, less any accumulated depreciation and impairment losses, adjusted for any remeasurement of lease liabilities. See section "Impairment of non-financial assets" for further details.

The right-of-use asset is depreciated on a straight-line basis from the commencement date to the earlier of the lease term and the remaining useful life of the right-of-use asset.

Tax

The income tax expense consists of tax payable and deferred tax. The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Deferred tax assets are recognised only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

Statement of cash flows

The group reports cash flows from operating activities using the indirect method. Interest received and paid is presented within financing cash flows.

Significant management judgement in applying accounting policies

The management has used estimates and assumptions that have affected assets, liabilities, incomes, expenses and information on potential liabilities. This particularly applies to the evaluations related to acquisitions and impairment of goodwill and other intangible assets. Future events may lead to these estimates being changed. Estimates and their underlying assumptions are reviewed on a regular basis and are based on best estimates and historical experience. Changes in accounting estimates are recognised during the period when the changes take place. If the changes also apply to future periods, the effect is divided among the present and future periods.

Use of estimates and judgments

The management has, when preparing the financial statements; made certain significant assessments based on critical judgment when it comes to application of the accounting principles. The following areas of accounting includes estimates subject to significant estimation uncertainty

- Goodwill and impairment, [note 14](#)
- Business combinations, [note 16](#)
- Deferred and contingent consideration, [note 24](#)

Estimated impairment of goodwill

The Group tests for impairment of goodwill as necessary, or as a minimum annually, see note 14. The recoverable amount for each cash-generating unit is based on the value-in-use calculation and these calculations require the use of estimates. Future cash flows are based on board-approved budgets and projections, while the applied discount rates are based on weighted average cost of capital which reflect the required market return in the industry of the cash-generating unit. Sensitivity analyses are performed on various changes in assumptions in the impairment tests to consider if the impairment tests are sensitive for reasonable changes in key assumptions.

See note 14 for further details regarding assumptions applied and the sensitivity analyses.

Business combinations

The group has made fourteen acquisitions in 2024. For each of these acquisitions a purchase price allocation (PPA) has been performed. The PPAs are prepared based on available information and management expectations at the time of acquisition. See [note 16](#) for detailed information and a summary of the additions in the consolidated figures.

Deferred and contingent consideration

Some of the acquisitions include an element of deferred and contingent consideration. The deferred and contingent consideration is in certain cases dependent on the future performance of the acquired entities and the amount recognised thus require the use of estimates. See [note 24](#) for further details.

Hawk Infinity Software is a Nordic cloud software group.

Annual Report 2024 | Notes to the consolidated financial statement

Jotta AS

Jottacloud is the Group's cloud storage Software as a Service ("SaaS") solution for private customers and businesses. In addition, Jotta offers a cloud storage Platform as a Service ("PaaS") solution for selected blue-chip partners (such as Telia, Obos, Elkjøp and Mediamarkt), enabling them to offer cloud storage services under their own brand to their customers via Jotta's PaaS solution.

Filemail AS

Filemail is the Group's managed file transfer SaaS solution for private customers and businesses. Whether you are an individual, family or business, Jottacloud lets you store, share and be productive wherever you are.

Storegate AB

Storegate is an easy to use and trusted cloud storage service with a competitive price point aimed at business customers. The service is GDPR compliant with a broad range of functionalities tailor-made for business users.

Viscenario AS

Viscenario provides a cloud-based documentation and workflow software solution to manage and document the construction process of new buildings and management of operations in residential, office buildings and hotels.

Servebolt AS (associated company)

Servebolt provides high performance managed cloud hosting with a strong focus on scalability and security. This enables developers to focus entirely on development as Servebolt takes care of hosting software and hardware.

CuroTech AS

CuroTech provides cloud-based workflow and documentation SaaS for commercial real estate buildings. The customers get all relevant documentation related to a building in a one-stop solution which enables them to save time and easily access required documents e.g. for regulatory inspections.

Norbites AS

Norbites provides cloud workflow solutions for auto services and retail chains. This includes automation of stock control, labour hours and other logable procedures, in addition to software customisation and integration.

FDVhuset AS

FDVhuset provides B2B cloud-based facility management for commercial and municipal real-estate which enables customers to manage their properties accurately and efficiently in the cloud.

Annual Report 2024 | Notes to the consolidated financial statement

Marketplace (Byggstart AS and Marketplace AS)

Marketplace provides cloud-based PaaS tender platforms for B2B2C across multiple industry niches in Norway and Sweden.

Cars Software AS

Cars provides a B2B SaaS ERP solution for automotive businesses, digitising manual processes and increasing efficiency for its customers.

Unisoft AS

Unisoft is a software provider towards the B2B healthcare segment in Norway. The offering includes proprietary software and managed IT-services.

Rushfiles A/S

Rushfiles provides B2B cloud-based and on-premise storage solutions tailored for businesses of all sizes.

This year's acquisition of new companies in the Group:

Nytt Foretak AS

Nytt Foretak provides a B2B SaaS platform simplifying the registration and formation of limited liability companies in Norway. Offers value-added services to streamline business establishment processes

Sunnsoft Publishing AS

Sunnsoft provides digital solutions for the healthcare sector.

Digiflow AS

Digiflow provides managed services to the Norwegian SMB market, has its headquarters in Lysaker.

Comby

Comby is a managed services provider in Greenland and has also operations in Denmark. Comby is providing tailored IT-outsourcing solutions for both public and private customers.

Bazoom Group ApS

Bazoom is a digital platform provider of search engine optimization and online advertising software.

Annual Report 2024 | Notes to the consolidated financial statement

Infsoft

Infsoft has leveraged extensive media industry experience to develop the subscription management software INFO-Subscription. INFO-Subscription is a market leading platform for handling high-volume, complex revenue models like subscriptions and rentals.

Capnor

Capnor is a supplier of 3D scanning and digital twin data for the energy and construction industry.

Genera

Genera provides regulated and state-owned gaming operators with market optimized gaming platforms and unique game formats.

Andevis

Andevis is a supplier of human resource management software for some of Estonia's largest public and private enterprises.

MotionTech

MotionTech is a supplier of advanced motion technology and cyber-physical systems for a range of industrial applications.

Mikon

Mikon delivers best of breed software solutions for production and manufacturing reporting needs.

Barcontrol

Barcontrol is a supplier of checkout and logistics systems to the restaurant industry.

OsmiBit

OsmiBIT has its core expertise in ERP, Business intelligence, Human Resources and Document Management systems, and serves domestic and multinational companies especially within retail, wholesale and marina.

Regla

Regla is a leading SaaS accounting and sales system provider to small and medium sized businesses in the Icelandic market

Financial risk management

Financial risk

The Group uses bond loans and cash credits as financial instruments for financing. The purpose of these financial instruments is to ensure that the Group has financial flexibility for investments that are necessary for the Group's investment strategy and growth objectives. In addition, the Group has financial instruments such as trade receivables, trade payables etc. which are directly related to the business's daily operations.

The Group's objectives when managing capital are to

- safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders, and
- maintain an optimal capital structure to reduce the cost of capital.

The Group is exposed to financial risk linked to interest rate risk, liquidity risk, currency risk and credit risk. The Group's management has a continuous assessment to identify and evaluate financial risks, and sets guidelines for how to handle them

(i) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Group is mainly exposed to credit risk related to other current receivables. The majority of the Group's customers pay in advance, which helps to minimize accounts receivable risk.

The Group's historical credit losses on trade receivables are insignificant, in 2024, 2023 and 2022 booked credit losses were TNOK 1 363, TNOK 978 and TNOK 47. Expected credit loss is also insignificant, with less than 2 % of outstanding accounts receivable (TNOK 2 640 see [note 19](#)). There is no forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables.

(ii) Market risk – interest rate

The Group's main interest rate risk arises from long-term borrowings with variable rates, which expose the Group to cash flow interest rate risk.

The following table shows the Group's sensitivity to potential changes in interest rates. The calculation takes into account all interest-bearing financial instruments. The calculation in the table shows the annual effect based on interest-bearing financial instruments at the balance sheet date.

Annual Report 2024 | Notes to the consolidated financial statement

	Change in interest rate	Effect on profit before tax (NOK 1000)
2024	+ 0.50 %	12 475
	- 0.50 %	-12 475
2023	+ 0.50 %	4 025
	- 0.50 %	-4 025

(iii) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. The Group's strategy for managing liquidity risk is to have sufficient liquidity at all times in order to meet its financial liabilities at maturity, both under normal and exceptional circumstances, without risking unacceptable losses or at the expense of the Group's reputation. All financial liabilities are non-derivative. The senior secured bond loans include a financial covenant which states that the Group must always maintain a minimum liquidity of MNOK 50. This includes unutilized credit facilities. For unutilized credit facilities see [note 20](#).

The table below provides an overview of the maturity profile of all financial liabilities (undiscounted). In cases where the counterparty may claim earlier redemption, the amount is placed in the earliest period the payment may be required from the counterparty.

Amounts in NOK†	31.12.2024 Remaining term					Total
	Under 1 year	1-3 year	3-5 year	Later than 5 years		
Interest-bearing bond*	262 730	525 460	2 658 848			3 447 038
Revolving Credit Facility	148 147					148 147
Other liabilities**	174	2 306				2 480
Deferred consideration	107 012	21 000				128 012
Contingent consideration	68 500	233 252				301 752
Leasing liability***	22 029	25 381	7 110			54 519
Trade payable	221 516					221 516
Total	830 107	807 399	2 665 957	0		4 303 463

*Estimated interest payments have been included applying 3M NIBOR/3M CIBOR at the balance sheet date.

**Estimated interest payments have been included applying 3M CIBOR at the balance sheet date. Payments made in DKK have been converted to NOK applying the exchange rate at the balance sheet date.

***Leasing payments in SEK have been converted to NOK applying the exchange rate at the balance sheet date.

Annual Report 2024 | Notes to the consolidated financial statement

Amounts in NOK†	31.12.2023 Remaining term				Total
	Under 1 year	1-3 year	3-5 year	Later than 5 years	
Interest-bearing bond*	85 350	256 050	814 013		1 155 413
Interest-bearing bank loans*	495	1 178			1 673
Revolving Credit Facility	56 290				56 290
Other liabilities**	3 506	3 472

Trade payable	45 431				45 431
Total	230 160	306 404	819 530	0	1 349 116

(iv) Currency risk

The Group operates internationally and is mainly exposed to foreign exchange risk, primarily to EUR, SEK and DKK. Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the functional currency of the relevant Group entity.

Based on the Group's outstanding receivables in other currencies than the functional currency of the relevant Group entity, a calculation has been performed to estimate the effect on profit/loss given a change in the exchange rates. The calculation illustrates the effect on profit / loss given a parallel change in the functional currency relative to all exchange rates.

		Effect on profit before tax (NOK 1000)
2024	+ 10 %	-571
	- 10 %	571
2023	+ 10 %	-619
	- 10 %	619

The Group's exposure to foreign currency risk at the end of the reporting period, expressed in NOK, was as follows:

Amounts in NOK†	31.12.2024		31.12.2023	
	Trade receivables	Bank accounts	Trade receivables	Bank accounts
SEK	10 864	-34 881	1 735	10 075

USD	9 382	1 841	1 228	1 113
Net position	47 073	129 470	6 194	22 030

Annual Report 2024 | Notes to the consolidated financial statement

Information about financial instruments

Due to the short-term nature of the trade receivables, other current receivables and cash and cash equivalents, their carrying amount is considered to be the same as their fair value.

Interest bearing loans with variable interest rates are valued at amortised cost. The carrying amount of trade and other payables are considered to be the same as their fair values, due to their short-term nature.

The fair value of interest-bearing loans recognised at amortised cost is estimated to be equal to the nominal outstanding amount of NOKm 2.350.000. The estimate is based on transactions in the bond market and the completed tap issue at par close to the balance sheet date.

Total financial liabilities		20 400	906 533	926 933

Level 1

Fair values are based on prices quoted in an active market for identical assets or liabilities.

Level 2

Fair values are based on price inputs other than quoted prices derived from observable market transactions in an active market for identical assets or liabilities.

Level 2 includes interest derivatives which are computed as the sum of the value of a fixed leg and the value of a floating leg. The fixed leg is computed as a sum of cash flows, where each cash flow is computed as the notional x fixed rate x length of the period (in year) x discounting factor. The floating leg is computed as a sum of cash flows, where each cash flow is computed as the notional x the projected rate x length of the period (in year) x discounting factor. The discount factors and projected rate are computed from the interest rate curve. The notional is scaled according to the amortising structure of the deal.

Level 3

Fair values are based on unobservable inputs, mainly based on internal assumptions used in the absence of quoted prices from an active market or other observable price inputs.

Annual Report 2024 | Notes to the consolidated financial statement

Segment information

The Group's board, chief executive officer and the chief financial officer have previously examined the Group's performance from a product perspective with two main segments. Following the significant increase in number of Group companies and the overall service offering, this segment reporting is no longer applied by the Group. Internally the Group monitors performance for the different subsidiaries, and each subsidiary is considered an operating segment. Subsidiaries where the reported revenue, profit and loss and assets are less than 10 % of Group revenue, Group profit and loss and total asset for the Group, are combined and reported as "other".

The table below shows the contribution to the reported figures from the most significant CGUs in the Group, based on revenue in 2024. Note that some of these were acquired in 2024 and the figures reflect the contribution in the ownership period, including amortisation of identified intangible assets in the purchase price allocation, see note 16 Business Combinations.

See note 1 for a description of the products and services provided by each CGU. All revenues included in the table below are from external customers.

Revenue from contracts with customers

Hawk Infinity Software's revenues are split into four main revenue streams:

1. Subscription-based where the subscriptions are paid for either in advance for 1 year, or on a monthly basis. Sales via distributors are mainly credit sales with the distributors with advance payment of subscriptions up to 3 years. Revenue is recognized when services are rendered. For example, a prepaid two-year contract is recognized linearly over 24 months, regardless of upfront payment. In some cases the subscriptions are sold online with 2 months free of charge if the customers pay in advance and commit for 1 year. The contract value of online 1 year subscriptions sale is recognised on a straight-line basis over 12 months.
2. Consultant hours provided in relation to installation and maintenance of the software provided. Revenue related to consultancy services is recognised when the hours are provided and the Group is entitled to payment from the customer.
3. Hardware sales which is recognised at a point in time when the equipment has been delivered to the customer.
4. Data-driven queries: A menu-based service offering a predefined set of reports or data tailored with specific information for customers to choose from. Revenue is recognized when the service is provided and the Group is entitled to payment from the customer.

The distribution between the revenue streams is shown in the table below.

2024	Share %	Subscription-based	Consultant	Hardware	Data-driven queries	Sum

The Group companies provide software services within various categories as described below.

Cloud Storage & Transfer comprises SaaS solutions focused on secure cloud storage, reliable file transfer, and comprehensive data protection, along with specialized tools to manage a wide range of file types and formats for both B2B and B2C markets.

PropTech includes B2B SaaS Solutions designed to optimize workflows and document management for commercial and municipal real estate as well as ongoing operations of residential, office and hospitality properties by streamlining operations, ensuring compliance, and enhancing overall management capabilities.

Operations Automation includes B2B SaaS platforms that facilitate workflow automation. The solutions streamline processes such as sales, inventory, labor management, order handling and general operational tasks across various industries, driving increased efficiency and scalability.

eHealth platforms cater to the healthcare sector, providing B2B SaaS solutions that support patient management, communication and administrative operations. These platforms are tailored to improve operational efficiency and address the unique needs of healthcare providers, including integration with health records and health handbooks

Managed Service offerings comprises end-to-end IT solutions, including cloud service, cybersecurity, hosting, IT support and operational management. These services are designed to enhance organizational performance, security and technology infrastructure.

General Business Services consist of B2B SaaS platforms to general entities which include payroll and HR management, subscription management for the media industry, simplifying the registration and formation of limited liability companies, providing expertise in ERP, HR and document management solutions and providing accounting and sales systems.

Niche Business Services comprises specialized entities targeting specific markets. Offerings include SEO and digital advertising services, 3D scanning and advanced data analytics for global clients, production reporting tools for industrial sectors, and infotainment solutions tailored to the marine-, hospital-, and hotel industries. These B2B SaaS platforms deliver targeted, value-driven solutions that address complex, industry-specific challenges.

Contract liabilities at 31.12

The Group has liabilities related to contracts with customers. The following table shows contract liabilities at 31. December and how much of the revenue recognised in the current reporting period relates to carried-forward contract liabilities. Contract liabilities at 31 December primarily stem from the revenue streams subscription-based revenues and data-driven queries.

Amounts in NOKt	2024	2023		
Contract liabilities at 01.01	59 383	53 653		
New contracts entered into	620 674	264 633		
Contract liabilities from acquired companies	19 371	3 529		
Revenue recognised that was included in the contract entered into this year	-562 180	-217 750		
Revenue recognised that was included in the contract liability balance at the beginning of the period	-48 267	-44 682		
Contract liabilities at 31.12	88 981	59 383		
	2024	2025	2026	Sum
The Group's order backlog will be mainly recognised within 3 years	77 875	8 370	2 736	88 981

Revenue earned not invoiced at 31.12

Amounts in NOKt	2024	2023
Earned not invoiced at 01.01	4 625 116	0
Changes in the period	10 635 197	4 625 116
Earned not invoiced at 31.12	15 260 313	4 625 116

Annual Report 2024 | Notes to the consolidated financial statement

Revenue earned not invoiced is primarily related to data-driven queries where the relevant Group company provides a lead for a contractor and receives its payment when the project is finalised. All revenue earned not invoiced at 31.12 is expected to be paid within 1 year from the balance sheet date.

Personnel costs and remunerations

Amounts in NOKt	2024	2023
Wages and salaries	193 594	89 657
Social Security costs	24 420	14 351
Pension costs	8 746	3 367
Capitalised internal hours (Development)	-34 812	-33 385
Share-based payments	0	110
Other remuneration	11 656	3 325
Total personnel costs	203 603	77 425
Average number of FTEs at 31.12	245	114

The Group has defined contribution pension plans for its employees which satisfy the statutory requirements in the respective jurisdictions of the Group entities. For defined contribution plans, the Group pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The pension cost is expensed, and the Group has no further payment obligations once the contributions have been paid.

No loan or collateral has been granted to the CEO, the Chairman of the Board or other related parties.

The Group CEO and CFO are employed in the parent company, Hawk Infinity AS. An agreement has been entered into with Hawk Infinity for the services of Joakim Karlsen as Group CEO and Lars Revling as Group CFO, with agreed annual fees of TNOK 900 and TNOK 600 respectively.

Board remuneration received in 2024 is shown in the table below.

Amounts in NOKt	2024
Johan Bemt Michelsen (chairman of the board, from 2 August 2024)	0
Nils Arne Bakke (chairman of the board, until 2 August 2024)	180
Joakim Karlsen	0
Roland Rabben	90
Reulf Johansen	90

The modification loss is related to the modification of the Company's 5-year senior secured bond issue due October 3, 2028 with ISIN NO 0013023226. The purpose of the modification to the bond terms was to allow for further new bond issues with later maturity than the existing Bonds. As this cost is not directly related to the issue of new bonds, the fee has been expensed in full in 2024.

Annual Report 2024 | Notes to the consolidated financial statement

Share-based payments

Outstanding period

A share purchase programme under which shares may be issued by the Company to employees for cash consideration was approved by shareholders at an extraordinary general meeting on 13th of January 2023. Employees and directors in Hawk Infinity Software AS (HIS) and wholly owned subsidiaries are deemed to be eligible purchasers under the share purchase programme. An eligible purchaser ("Purchaser") can acquire shares in HIS one time per year.

The number of shares available for purchase by each Purchaser will be determined by the Board of Directors. The shares available for purchase under the share purchase programme in HIS are B shares. The B shares will have the same economic rights as ordinary shares but will have no voting rights.

The purchase price per share under the share purchase programme shall be equal to the estimated fair market value per share in HIS which shall reflect restrictions on liquidity and voting rights. The Board of Directors will determine the fair market value of per share on an annual basis by using generally accepted valuation methodologies such as discounted cash flow and trading multiple analysis.

Transfer of shares upon purchaser's exit

The shares purchased under the share purchase programme shall be subject to a lock-up period of 2 years. If the Purchaser's employment with the Group company is terminated prior to expiry of the lock-up period, then HIS has the right to repurchase such shares at a price equal to the lower of the original purchase price and the estimated fair market value of the shares at the time of employment termination.

If the Purchaser's employment with the Group company is terminated after expiry of the lock-up period, then HIS has the right to repurchase such shares at a price equal to the estimated fair market value of the shares at the time of employment termination.

Transfer of shares

The shares purchased under the share purchase programme are not freely transferable. If a Purchaser wants to sell shares after the lock-up period has expired, then the Purchaser can offer the shares to HIS at a price equal to the estimated fair market value of the shares at such time. If HIS declines to purchase such shares, the Purchaser has no right to transfer or sell the shares to any other shareholder or third-party.

Intangible assets and other property, plant and equipment

Software and technology

The Group companies have development projects related to the various service offerings they provide. Development of software solutions which fulfil the relevant criteria is capitalised in full. Capitalised amounts primarily consist of internal development, in addition to some use of external services. The cost of intangible

Annual Report 2024 | Notes to the consolidated financial statement

assets acquired in a business combination is the fair value at the date of acquisition. Following that initial recognition, intangible assets are carried at cost less accumulated amortisation and any impairment losses. The straight-line amortisation method is used for most intangible assets as this best reflects the consumption of the assets.

Costs associated with maintaining computer software programs are recognised as an expense as incurred. No material research or development costs have been expensed in 2024.

Some minor development projects are still in progress and depreciation has thus not started as of 31.12.2024. These are not significant in size or character.

Customer relations

Book values related to customer relations stem from acquisitions made in 2024 and previous years. As part of the Purchase Price Allocations following business combinations significant values are allocated to customer relations. The value estimates are based on expected future cash flow from existing customer relationships at the acquisition date. The amortisation period is the expected lifetime of the customer relationship, and the amortisation method is based on historical experience of churn (customers ending their relationship) for the different businesses.

See note 16 for further details regarding the acquisitions made in 2024.

Brand name

Book values related to brand name stem from acquisitions made in 2024 and previous years. As part of the Purchase Price Allocations following business combinations a fair value estimate of the acquired company's brand name is calculated. The value estimates are based on expected future excess earnings due to the existing brand name at the acquisition date. See note 16 for further details regarding the acquisitions made in 2024.

Goodwill

Goodwill is not amortised and amounts to NOKm 2 504. See [note 14](#) for specification of goodwill per acquired company. For additions related to the business combinations in 2024 see [note 16](#). Brand name and customer relations are amortised on a straightline basis.

The impairment charge of NOKm 18.5 in 2023 is related to the investment in Viscenario AS. See note 14 for impairment test of goodwill.

Goodwill and impairment

Impairment test of goodwill

Goodwill arises in business combinations as the difference between the consideration and the acquired business' identifiable assets and assumed liabilities at the acquisition date

Goodwill as of 31 December 2024 is MNOK 2.504,6. The goodwill relates to the historical acquisitions in the group. See split below for allocation per acquired entity. See note 16 Business combination for further details regarding acquisitions in 2024. Management monitors goodwill at the level of the operating-segment, seen in note 4. Impairment-testing of goodwill is done at CGU level.

Impairment testing is performed if any impairment indicators are identified, and at least on an annual basis for goodwill and intangible assets with indefinite useful life. For the 2024 and 2023 reporting periods, the recoverable amount of the group of cash generating units (CGUs) was determined based on value-in-use calculations which require the use of significant management assumptions and estimates. The calculations use cash flow projections covering a five-year period based on financial budgets and forecasts approved by management. The budgets and forecasts are prepared with a basis in historical results, and future expectations following strategic, operational and financial decisions made by management. Industry and company-specific risk factors are also considered when the forecasts are prepared. The value-in-use calculations are mainly based on internal assumptions, including, but not limited to, determining a weighted

Annual Report 2024 | Notes to the consolidated financial statement

average cost of capital (WACC) as a discount rate after tax, estimating future performance, revenue, margins and capex requirements.

Cash flows beyond the five-year period are extrapolated using the estimated growth rates stated below. These growth rates are consistent with forecasts included in industry reports specific to the industry in which the group of CGUs operates.

Present value of estimated future cash flows for the group of CGUs is calculated using a weighted average cost of capital (WACC) as a discount rate after tax.

A segment-level summary of the goodwill allocation is presented below:

2024

Marketplace	138 176
Cars Software AS	34 224
Unisoft AS	72 111
Total	700 908

Management has calculated value in use and performed impairment tests for all CGUs in the Group.

Key assumptions for significant CGUs

CGUs which comprise c 10% or more of the total goodwill in the Group are described as significant CGUs in the table above. The assumptions are based on budgets for 2025 and management inputs for the remaining forecast period, in addition to industry- and company-specific risk factors. These include, but are not limited to strategic, operational, financial and climate factors. Growth in the terminal period is set to 2 % based on the long-term inflation target.

Discount rate is based on weighted average capital cost (WACC). The discount rates reflect the market return requirement at the time of testing in the industry in which the cash-generating unit is located. Risk-free interest rate based on government bonds in the respective countries, the local tax rate and a market risk premium of 5,0% are applied.

Significant CGUs - applied assumptions

	Discount rate (post-tax)	Revenue growth in the budget period	EBITDA-margin in the budget and terminal period	CF-yield (post-tax)
Digiflow	10,7 %	12-15%	14 %	11 %
Bazoom	10,7 %	15-22%	9 %	8 %
Comby	11,2 %	3-6%	38 %	27 %
Capnor	10,7 %	5-11%	30 %	17 %

Sensitivity analysis for key assumptions:

Sensitivity analyses were performed of various changes in assumptions in the impairment tests, including a reduction in long-term growth assumptions, an increase in the discount rate, reduction in the EBITDA-margin and a reduction in the revenue growth in 2025.

For Digiflow a reduction of EBITDA-margin to 11 %, a decrease in revenue growth in 2025 to 10 % or an increase in the discount rate to 13 % would have resulted in an impairment write-down for goodwill.

Annual Report 2024 | Notes to the consolidated financial statement

For Bazoom a reduction of EBITDA-margin to 5,5 % or an increase in the discount rate to 14 % would have resulted in an impairment write-down for goodwill.

For Comby a reduction of EBITDA-margin to 22 % or an increase in the discount rate to 19 % would have resulted in an impairment write-down for goodwill.

For Capnor a reduction of EBITDA-margin to 22,5 % or an increase in the discount rate to 15 % would have resulted in an impairment write-down for goodwill.

For Viscenario AS an impairment of MNOK 18,5 was done in 2023. Changes in key assumptions would have resulted in additional impairment write-down of goodwill related to this company.

For the acquisitions closed in the final quarter of 2024, there have in general been limited changes since the acquisition date, and thus changes in key assumptions could have resulted in impairment writedown for goodwill.

OsmiBit	8 November 2024	100 %
Barcontrol	13 November 2024	100 %
Regla	5 December 2024	82.5 %

The Group is focused on acquiring niche B2B software businesses. The businesses acquired in 2024 provide mission-critical software solutions to B2B customers. Following the acquisitions the group has been able to diversify its operations both geographically and in terms of services offered.

A total acquisition cost of c. NOKm 15 has been incurred in 2024.

Preliminary PPAs are shown below. A large proportion of the transactions were completed close to year-end and there is still an ongoing process related to onboarding the entities and valuation of the intangible assets. The finalization of these valuations is expected to be presented in the quarterly report in Q3 2025. The

Annual Report 2024 | Notes to the consolidated financial statement

transactions considered to be most significant, based on enterprise value and revenue- and EBITDA-contribution, are specified per entity while the remaining transactions are collated in one table. All figures are in NOKt.

Digiflow

Digiflow is one of the fastest-growing IT companies in Norway. Digiflow provides managed services to the Norwegian SMB market, has its headquarters in Lysaker, and employs 85 people. Digiflow has strong organic growth, a dedicated workforce of employees, and aims to have the most satisfied customers in the industry.

Cash paid (incl. Non-controlling interests)	434 750
Fair value of non-controlling interests	140 250
Subordinated earn-out and seller credits	45 000
Total purchase consideration	620 000

The subordinated earn-out will be granted if certain relatively ambitious free cash flow growth targets are met in 2024 and 2025. The value included in the table above is a probability-weighted and discounted estimate. The maximum undiscounted earn-out amount is NOKm 50.

The assets and liabilities recognised as a result of the acquisition are as follows:

Amounts in NOKt

	Fair value
Cash	43 741
Intangible assets: software and technology	22 368
Intangible assets: Customer relationships and contracts	96 099
Intangible assets: Trade name	9 575
Fixed assets	1 329
Inventory	1 709
Trade receivables	16 381
Other current receivables	12 135
Trade payables	-21 369
Other current liabilities	-30 796
Tax payable	-6 392
Deferred tax liabilities	-28 048
Net identifiable assets acquired	116 733
Goodwill	503 267
Net equity acquired	620 000
Less: non-controlling interests, at fair value	-140 250
Parent company interests	479 750

The goodwill is attributable to the workforce and the high profitability of the acquired business. It will not be deductible for tax purposes.

Annual Report 2024 | Notes to the consolidated financial statement

Revenue and profit contribution for the period from 09.07.2024 to 31.12.2024.

Revenue and profit contribution for the period from 09.07.2024 to 31.12.2024.

Revenues	172 152
Net profit to the Group	16 624

These amounts have been calculated using the subsidiary's results. There are no significant differences in accounting policies between the Group and the subsidiary. The net profit has been adjusted for depreciation and amortisation that would have been charged assuming the fair value adjustments to property, plant and equipment and intangible assets had been applied from the time of acquisition, together with the consequential tax effects

Purchase consideration – cash outflow

Outflow of cash to acquire subsidiary, net of cash acquired

Cash consideration	434 750
Less: Balances acquired	-43 741
Net outflow of cash – investing activities	391 009

Comby

Comby is a leading managed services provider in Greenland and has also operations in Denmark. Comby is providing tailored IT-outsourcing solutions for both public and private customers with a particularly strong position within the public sector in Greenland.

Purchase consideration Comby

All amounts are in NOK1 with an exchange rate of 1.5742 at the acquisition date.

Cash paid	306 297
Subordinated earn-out and seller credits	108 030
Total purchase consideration	414 328

The subordinated earn-out will be granted if certain relatively ambitious free cash flow growth targets are met in 2024, 2025 and 2026. The value included in the table above is a probability-weighted and discounted estimate. The maximum undiscounted earn-out amount is DKKm 100.

The assets and liabilities recognised as a result of the acquisition are as follows:

Regla

Regla is based in Iceland and is a leading SaaS accounting and sales system provider to small and medium sized businesses in the Icelandic market. The business was established in 2008 and has grown its license revenue base steadily over many years with increasing margins. The software offering of Regla is industry-agnostic, serving customers across a range of industries and end-markets. Prior to the acquisition, Regla has been owned by the founders who will retain a minority stake in the company and continue to run the business.

Pro-forma financials

If the acquisitions had occurred on 1 January 2024, consolidated pro-forma revenue and profit for the year ended 31 December 2024 would have been:

Pro-forma financials

Revenues	1 583 513
Profit after tax	18 327

These amounts have been calculated using the subsidiary's results. There are no significant differences in accounting policies between the Group and the subsidiaries. The net profit has been adjusted for depreciation and amortisation that would have been charged assuming the fair value adjustments to property, plant and equipment and intangible assets had applied from 1 January 2024, together with the consequential tax effects.

Accounting policy choice for non-controlling interests

The Group recognises non-controlling interests in an acquired entity either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets. This decision is made on an acquisition-by-acquisition basis.

For the acquisitions of Nytt Foretak AS and MotionTech AS the Group has elected to recognise the non-controlling interests at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets.

For the acquisitions of Digiflow and Comby the Group has elected to recognise the non-controlling interests at fair value.

Annual Report 2024 | Notes to the consolidated financial statement

Measurement period

The initial accounting for a business combination can be changed if new information about the fair value at the acquisition date is presented within 12 months of the acquisition date

Annual Report 2024 | Notes to the consolidated financial statement

Interests in associates

Servebolt AS is an associate of the Group as at 31 December 2024 which, in the opinion of the directors, is material to the Group. The Group has an ownership and voting share of 36 % consisting solely of ordinary shares. The country of incorporation or registration is also their principal place of business, and the proportion of ownership interest is the same as the proportion of voting rights held.

Leasing liabilities

Leases

This note provides information for leases where the Group is a lessee.

Amounts recognised in the balance sheet

The balance sheet shows the following amounts relating to leases (amounts in NOKt):

Right of use assets	2024	2023
Buildings	19 725	8 117
Server cabinet	2 931	5 915
Equipment	23 752	25 924
Other	0	0
Total	46 408	39 955
Additions		
Additions to the right-of-use assets	27 047	27 432
Lease liabilities	2024	2023
Current	21 695	15 984
Non-Current	28 286	25 478
Total	49 981	41 462

Amounts recognised in the statement of profit or loss

The statement of profit or loss shows the following amounts relating to leases (amounts in NOKt):

Depreciation charge of right-of-use assets	2024	2023
Buildings	8 754	4 588
Server cabinet	2 983	3 456
Equipment	8 857	9 720
Total	20 594	17 764
Expenses relating to short-term leases		
Expenses relating to leases of low-value and short-term leases	5 932	2 724
Interest expense financial lease	2 892	2 535
Expenses relating to variable lease payments not included in lease liabilities		0
Income from subleasing right of use assets		0
The total cash outflow for leases	28 002	18 689

The Group's leasing activities and how these are accounted for:

Hawk Infinity Software AS (HIS) agreements consists of buildings, server cabinets and equipment used in the operating activities and office machines. Servers and equipment usually have a lease period of 3- 5 years, while the building has a longer time frame. The office machines are leased in a 3-5 year period. Some of the building leases have extension options and this has been taken into account.

Annual Report 2024 | Notes to the consolidated financial statement

Right of use assets and lease liabilities are defined into classes of underlying assets:

Buildings, property as a rental of premises

Equipment, that is servers

Server Cabinets, servers that rent server cabinets and space (rooms). These contracts contain both lease and non-lease components.

Contracts may contain both lease and non-lease components

The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of Server Cabinet for which the Group is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

Assets and liabilities arising from a lease are initially measured on a present value basis.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made and remeasuring the carrying amount to reflect any reassessment or lease modifications, or to reflect adjustments in lease payments due to an adjustment in an index or rate.

When applicable, the Group determines the incremental borrowing rate by:

- using a build-up approach that starts with a risk-free interest rate adjusted for credit risk for leases held by Jotta AS, which does not have recent third party financing, and
- making adjustments specific to the lease, e.g. term, country, currency and security.

The Group is exposed to potential future increases in variable lease payments based on an index or rate, which are not included in the lease liability until they take effect. When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the right-of-use asset. Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Recognition of leases and exemptions

Payments associated with short-term leases of equipment and vehicles and all leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise IT equipment and small items of office furniture. However,

Annual Report 2024 | Notes to the consolidated financial statement

for leases of Server Cabinet for which the Group is a lessee, it has elected to not use the exemption and has recognised a lease liability and a corresponding right-of-use assets.

Extension and termination options

Extension and termination options are included in some of the leases across the Group. These are used to maximise operational flexibility in terms of managing the assets used in the Group's operations. Most of the extension and termination options held are exercisable only by the Group and not by the respective Lessor.

Accounts receivable

Amounts in NOK†	2024	2023
Accounts receivable, gross	139 829	34 848
Less invoiced prepayments, not due	-4 973	-5 225
Expected credit loss	-2 640	-473
Net trade receivables	132 216	29 150

Accounts receivable are amounts due from customers for subscriptions, products and services sold in the ordinary course of business. They are generally due for settlement within 30-60 days and therefore are all classified as current. Accounts receivable are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, in which case they are recognised at fair value. Details regarding the Group's impairment policies and the calculation of the loss allowance are provided in [note 2](#).

Provisions for loss allowance on trade receivables are included in sales and administrative expenses in the statement of profit or loss.

Cash and equivalents

Amounts in NOK†	2024	2023
Restricted bank deposits	1 322	1 305
Withholding tax account	5 094	3 497
Total restricted bank deposits	6 416	4 801

Restricted bank deposits relate to the withholding tax account. These deposits are subject to regulatory restrictions and are therefore not available for general use by the entities within the Group. The Group has entered a bank guarantee agreement which covers employee tax deductions for Jotta AS (NOK 3 million), Curotech AS (NOK 0,7 million), Norbits AS (NOK 0,9 million) and FDVhuset AS (NOK 1,4 million).

Amounts in NOK†	2024	2023
Revolving Facility Commitment (maturity date 03.10.2028)	235 000	75 000
Drawn amount	145 000	55 000

The Group has an active cash pool arrangement with Nordea. Hawk Infinity Software AS holds the master account in the cash pooling arrangement.

Annual Report 2024 | Notes to the consolidated financial statement

Share capital and shareholder information

Hawk Infinity Software AS has established an incentive program, a share purchase programme to give the employees an opportunity to participate in the long-term value creation in the Company and to align the interests of the employees and the shareholders. Acquisition of treasury shares is due to repurchase of shares bought under the share purchase programme following end of employment or a desire to sell the shares after the lock-up period. See note 9 Share-based payments for further information. In 2024 the Company acquired 30 300 treasury shares and sold 40 400 treasury shares under the share purchase programme.

Number of shares from 01.01.2024 to 31.12.2024

	01.01.2024	Capital increase	Non-registered capital increase	31.12.2024
A shares	117 004 382	36 867 005	23 437 400	153 871 387

Annual Report 2024 | Notes to the consolidated financial statement

Contingent consideration

Contingent considerations booked

In several of the acquisitions the Group has conducted in 2024, part of the consideration is contingent and to be paid out if the companies achieve certain relatively ambitious free cash flow growth targets in the coming years, mainly in 2025 to 2027.

Contingent consideration is measured at fair value at the time of acquisition and is a probability-weighted and discounted estimate. Subsequent changes in the fair value are recognised in the income statement.

The contingent consideration booked at 31.12.2023 following the acquisition of Marketplace was paid in full in 2024.

Amounts in NOK†	Fair value 01.01.	Fair value 31.12

Contingent liability	20 400	295 163

Events after the balance sheet date

Successful placement of senior secured bond tap issue

On January 27th Hawk Infinity Software AS successfully placed a senior secured bond tap issue of NOK 500 million under the Company's existing senior secured bonds with maturity in October 2029 (ISIN NO0013358069). The tap issue was priced at par. The net proceeds from the contemplated tap issue will be used for acquisitions and for general corporate purposes. ABG Sundal Collier, Arctic Securities, and Pareto Securities acted as Joint Bookrunners in connection with the bond tap issue.

10 February 2025 - Announcement of acquisition of Symplicity

On February 10th, Hawk Infinity Software announced agreement for the acquisition of 100% of Symplicity Technologies AB ("Symplicity").

Symplicity is providing a market leading software for Customer Engagement, a comprehensive CRM with omni-channel marketing automation, CRO- and AI-capabilities. The software is used by more than 200 SME and Enterprise customers globally, mainly within the verticals FinTech, Retail, NGO, Education and Sports-betting. The company was founded in 2000 and has since grown with offices in Canada, Denmark and Spain.

Annual Report 2024 | Notes to the consolidated financial statement

Symplify has an LTM pro forma revenue of NOK 224m and EBITDA of NOK 35.1m as of December 2024. The acquisition is closed at an upfront enterprise value of NOK 250m. Additional contingent consideration will be granted if certain relatively ambitious free cash flow growth targets are met over the coming years.

The acquisition was funded by available liquidity, release from the escrow account and an equity issue in HIS towards Hawk Infinity AS.

19 February 2025 - Announcement of acquisition of Baze

On February 19th Hawk Infinity Software AS ("HIS") announced agreement for the acquisition of 100% of Baze Technology AS ("Baze").

Baze is a software company providing BazePort, a specialized advanced infotainment solution to the maritime-, hotel- and hospitality industries. BazePort is the leading infotainment system in the maritime sector with more than 1275 installations installed globally. Founded in 2007, the company is based in Porsgrunn, Norway, with an organisation that has proven scalability and a unique business culture.

Baze has a solid financial track-record with more than a decade of profitable growth and LTM revenues of NOK 153.4 million and LTM EBITDA of NOK 42.6 million. The acquisition is closed at an upfront Enterprise Value of NOK 360 million. Additional contingent consideration will be granted if certain relatively ambitious free cash flow growth targets are met over the coming years.

The acquisition was funded by available liquidity, release from the escrow account and an equity issue in HIS towards Hawk Infinity AS.

28 February 2025 - Announcement of acquisition of ROQC

On February 28th Hawk Infinity Software AS ("HIS") announced agreement for the acquisition of 100% of ROQC Data Management AS ("ROQC").

ROQC is a software company providing proprietary subsurface data management tools alongside specialised enhancements to subsurface software technology platforms. Founded in 2003, the company is based in Sandnes, Norway, with an organisation that has long tenure and solid track-record in the data management domain. ROQC has successfully developed the company's recurring revenue SaaS business model and commercialisation of R&D and has a solid foundation for future long-term growth.

ROQC has balanced strong top line growth with improving profitability and cash flow, currently trading at LTM revenues of NOK 53 million and LTM EBITDA of NOK 28 million.

The acquisition was closed at an Enterprise Value of NOK 250 million and funded by available liquidity, release of remaining escrow amount and an equity issue in HIS towards Hawk Infinity AS

Annual Report 2024 | Notes to the consolidated financial statement

20 March 2025 - Agreement on sale of Jotta AS and strategic joint venture with Telenor forming a leading player within cloud storage

On March 20th Hawk Infinity Software AS ("HIS") entered into an agreement for the sale of 100% of Jotta AS ("Jotta"), and the establishment of a strategic joint venture ("SJV") with HIS and Telenor within cloud storage services (the "Transaction"). The new SJV will consist of Jotta and Telenor Software Lab AS ("TSL") and will be owned 50%/50% by HIS and Telenor.

The combined company will offer its cloud storage services with all data being stored safely in Norway. The combination of Jotta and TSL gives a robust foundation to develop attractive and forward-looking cloud storage services, strengthening the combined business in terms of competence, safe data handling, product development, artificial intelligence and infrastructure. The SJV will have over 2 million active users and expects revenue of over 200 MNOK in 2025.

The SJV is acquiring Jotta for an enterprise value of 930 MNOK, implying an EV/EBITDA (FY 2024) multiple of 16.6x. The SJV will have a combined enterprise value of 1,500 MNOK. As part of the Transaction, HIS will receive a cash settlement of approximately 360 MNOK from the SJV and a 50% ownership stake in the SJV. The Transaction will have an accretive effect on the leverage ratio in the group. In 2024, Jotta delivered 101 MNOK in revenue, 56 MNOK in EBITDA, and 27 MNOK in free cash flow before tax.

As part of the Transaction, Jotta will cease to be a Material Group Company (as defined under the HIS's respective Bond Terms) and hence cease to be an obligor and guarantor in respect of the outstanding bonds issued by HIS. The SJV will not be consolidated into HIS' financial accounts. HIS has established a new subsidiary, SH Int AS, that will replace Jotta's role as "OpCo" (as defined under the HIS's respective Bond Terms) and acquire all direct and indirect subsidiaries currently owned by Jotta prior to closing of the Transaction.

The net cash proceeds from the Transaction are expected to be used for identified M&A opportunities and general corporate purposes.

The Transaction is subject to approval from the competition authorities in Norway and is expected to close during Q2 2025. The Transaction will result in a realization of the subsidiary Jotta AS and a gain from the sale. Estimated gain from the sale is not readily available prior to closing of the Transaction. The 50% ownership in the SJV will be accounted for using the equity method.

Successful placement of senior secured bond tap issue

On March 27th Hawk Infinity Software AS successfully placed a senior secured bond issue of NOK 600 million with maturity in July 2030 (ISIN NO0013358069). The bonds will pay a coupon of 3 months NIBOR + 6.50% per annum, and the net proceeds from the bond issue will be used for acquisitions. The transaction attracted broad investor interest and was significantly oversubscribed.

ABG Sundal Collier, Arctic Securities, Nordea and Pareto Securities acted as Joint Lead Managers in connection with the successful placement of the new bond issue. An application will be made for the bonds to be listed on Oslo Stock Exchange.

Annual Report 2024 | Notes to the financial statements

Notes to the financial statements

Notes to the financial statements

Accounting principles

The annual accounts have been prepared in compliance with the Norwegian Accounting Act and Norwegian generally accepted accounting principles (NGAAP) in effect at December 31, 2024.

Consolidation

The consolidated financial statements of Hawk Infinity Software AS have been prepared in a separate statement. Please see further description of the consolidated financial statements in the accounting principles note to the consolidated financial statements.

Use of estimates

The preparation of financial statements in compliance with the Accounting Act requires the use of estimates.

The application of the company's accounting principles also require management to apply assessments.

Areas which to a great extent contain such assessments, a high degree of complexity, or areas in which assumptions and estimates are significant for the financial statements, are described in the notes.

Foreign currency

Foreign currency transactions are translated at the exchange rate on the date of the transaction. Monetary foreign currency items are translated to NOK at the exchange rate on the balance sheet date. Non-monetary items that are measured at historical cost in a foreign currency are translated to NOK using the exchange rate on the transaction date. Non-monetary items that are measured at fair value in a foreign currency are translated to NOK using the exchange rate on the measurement date. Exchange rate fluctuations are posted to the profit and loss account as they arise under other financial items.

Taxes

The tax charge in the income statement includes both payable taxes for the period and changes in deferred tax. Deferred tax is calculated at 22 % on the basis of the temporary differences which exist between accounting and tax values, and any carryforward losses for tax purposes at the year-end. Tax enhancing or tax reducing temporary differences, which are reversed or may be reversed in the same period, have been eliminated. The disclosure of deferred tax benefits on net tax reducing differences which have not been eliminated, and carryforward losses, is based on estimated future earnings. Deferred tax and tax benefits which may be shown in the balance sheet are presented net.

Annual Report 2024 | Notes to the financial statements

Classification of balance sheet items

Assets intended for long term ownership or use have been classified as fixed assets. Assets relating to the trading cycle have been classified as current assets. Other receivables are classified as current assets if they are to be repaid within one year after the transaction date. Similar criteria apply to liabilities. First year's instalment on long term liabilities and long term receivables are, however, not classified as short term liabilities and current assets.

Land is not depreciated. Other fixed assets are reflected in the balance sheet and depreciated to residual value over the asset's expected useful life on a straight-line basis. If changes in the depreciation plan occur the effect is distributed over the remaining depreciation period. Direct maintenance of an asset is expensed under operating expenses as and when it is incurred. Additions or improvements are added to the asset's cost price and depreciated together with the asset. The split between maintenance and additions/improvements is calculated in proportion to the asset's condition at the acquisition date.

Leased assets are reflected in the balances sheet as assets if the leasing contract is considered a financial lease.

Subsidiaries and associated companies

Subsidiaries and associated companies are valued using the cost method in the company accounts. The investment is valued at acquisition cost for the shares unless a write-down has been necessary. A writedown to fair value is made when a fall in value is due to reasons that cannot be expected to be temporary and such write-down must be considered as necessary in accordance with good accounting practice.

Writedowns are reversed when the basis for the write-down is no longer present.

Dividends, group contributions and other distributions from subsidiaries are posted to income in the same year as provided for in the distributor's accounts. To the extent that dividends/ group contributions exceed the share of profits earned after the date of acquisition, the excess amounts represents a repayment of invested capital, and distributions are deducted from the investment's value in the balance sheet of the parent company.

Receivables

Receivables from customers and other receivables are entered at par value after deducting a provision for expected losses. The provision for losses is made on the basis of an individual assessment of the respective receivables. In addition an unspecified provision is made to cover expected losses on claims in respect of customer receivables.

Cash flow statement

The cash flow statement has been prepared according to the indirect method. Cash and cash equivalents include cash, bank deposits, and other short term investments which immediately and with minimal exchange risk can be converted into known cash amounts.

Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any noncash assets transferred or liabilities assumed, is recognised in profit or loss as other income or finance costs.

Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

Cash pool

The Group has an active cash pool arrangement with Nordea. Hawk Infinity Software AS holds the master account in the cash pooling arrangement and classifies the account itself as a bank deposit in the balance sheet. Hawk Infinity Software will have receivables or liabilities towards other companies in the arrangement. Receivables and liabilities towards different companies is presented gross in the balance sheet

Personnel costs

The company has not had any employees during the year.

The company is not obliged to have an occupational pension scheme under the Act on Mandatory Occupational Pensions.

Management remuneration

No loan or collateral has been granted to the CEO, the Chairman of the Board or other related parties. A total board remuneration of NOK 360 has been paid in 2024. An agreement has been entered into with Hawk Infinity AS for the services of Joakim Karlsen as Group CEO. The agreed fee is TNOK 400 per year. The CEO is employed by the parent company Hawk Infinity AS and he receives his salary and remuneration from the parent company

Events after the balance sheet date

Successful placement of senior secured bond tap issue

On January 27th Hawk Infinity Software AS successfully placed a senior secured bond tap issue of NOK 500 million under the Company's existing senior secured bonds with maturity in October 2029 (ISIN NO0013358069). The tap issue was priced at par. The net proceeds from the contemplated tap issue will be used for acquisitions and for general corporate purposes. ABG Sundal Collier, Arctic Securities, and Pareto Securities acted as Joint Bookrunners in connection with the bond tap issue.

Annual Report 2024 | Notes to the financial statements

Successful placement of senior secured bond tap issue

On March 27th Hawk Infinity Software AS successfully placed a senior secured bond issue of NOK 600 million with maturity in July 2030 (ISIN NO0013358069). The bonds will pay a coupon of 3 months NIBOR + 6.50% per annum, and the net proceeds from the bond issue will be used for acquisitions. The transaction attracted broad investor interest and was significantly oversubscribed.

ABG Sundal Collier, Arctic Securities, Nordea and Pareto Securities acted as Joint Lead Managers in connection with the successful placement of the new bond issue. An application will be made for the bonds to be listed on Oslo Stock Exchange.

Annual Report 2024 | Alternative performance measures (APMs)

Alternative performance measures (APMs)

The Group's financial information in this report is prepared under International Financial Reporting Standards (IFRS), as adopted by the EU. To enhance the understanding of the Group's performance, the Company has presented alternative performance measures (APMs) that are regularly reviewed by management.

An APM is defined by ESMA guidelines as a financial measure of historical or future financial performance, financial position, or cash flows, other than a financial measure defined or specified in the relevant financial reporting framework (IFRS).

The Group applies the following APMs:

EBITDA

Earnings before interest expense, other financial items, income tax and depreciations and amortization.)
EBITDA is used to provide consistent information on the Group's operating performance.

EBITDA-margin

The EBITDA margin presented is defined as EBITDA before other income and other expenses divided by total revenues.

To the General meeting of Hawk Infinity Software AS

Independent Auditor's Report Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Hawk Infinity Software AS.

The financial statements comprise:

- The financial statements of the parent Company, which comprise the balance sheet as at 31 December 2024, income statement, statement of comprehensive income, statement of changes in equity and cash flows for the year then ended, and notes to the financial statements, including material accounting policy information, and
- The financial statements of the Group, which comprise the balance sheet as at 31 December 2024, and income statement, statement of comprehensive income, statement of changes in equity and cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion:

- The financial statements comply with applicable statutory requirements,
- The accompanying financial statements give a true and fair view of the financial position of the Company as at 31 December 2024, and its financial performance and its cash flows for the year then ended in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway.
- The accompanying financial statements give a true and fair view of the financial position of the Group as at 31 December 2024, and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards as adopted by the EU.

Our opinion is consistent with our additional report to the Board of Directors.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company and the Group as required by relevant laws and regulations in Norway and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

To the best of our knowledge and belief, no prohibited non-audit services referred to in the Audit Regulation (537/2014) Article 5.1 have been provided.

We have been the auditor of Hawk Infinity Software AS for 1 year from the election by the general meeting of the shareholders on 2 December 2024 for the accounting year 2024.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Description of the key audit matter

How the key audit matter was addressed in the audit

Valuation of intangible assets and goodwill

Hawk Infinity Software AS had intangible assets and goodwill with a carrying amount of NOK 3,382 million at 31 December 2024, which represents approximately 83 % of total assets in the consolidated financial statements.

Management performs an annual impairment test by estimating the recoverable amount of intangible assets including goodwill. The determination of recoverable amount requires application of significant judgments by management, in particular with respect to cash flow forecast and the applied discount rate.

No impairments have been recognized during 2024 related to these assets.

We consider this area as a key audit matter because intangible assets and goodwill constitute a significant share of total assets in the balance sheet, and because the assessment of recoverable amount is complex and involves significant management judgments which may have a direct impact on net profit.

Please refer to notes 13 and 14 in the consolidated financial statements.

We have obtained and reviewed the Group's impairment test for each cash generating unit (CGU) to which intangible assets including goodwill are allocated.

We have assessed key assumptions, including revenue growth rates and margins. Our audit procedures also included an evaluation of the accuracy of management's historical forecasts.

We evaluated the discount rates for each CGU and obtained management's sensitivity analyses for changes in assumptions.

We have also tested the mathematical accuracy of management's forecasts and the impairment model.

We involved our internal valuation specialists to assist us in our assessments.

We have also assessed the adequacy of the disclosures provided in notes 13 and 14.

Other information

The Board of Directors and the Managing Director (management) are responsible for the other information. The other information comprises the Board of Directors' report and other information

in the Annual Report, but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Opinion on the Board of Directors' report

Based on our knowledge obtained in the audit, in our opinion the Board of Directors' report

- is consistent with the financial statements and
- contains the information required by applicable statutory requirements.

Responsibilities of the Board of Directors and the Managing Director for the Financial Statements

Management is responsible for the preparation of financial statements of the Company that give a true and fair view in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and for the preparation of the financial statements of the Group that give a true and fair view in accordance with IFRS Accounting Standards as adopted by the EU. Management is responsible for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's and the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern. The financial statements of the Company use the going concern basis of accounting insofar as it is not likely that the enterprise will cease operations. The financial statements of the Group use the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Report on compliance with requirement on European Single Electronic Format (ESEF)

Opinion

As part of the audit of the financial statements of Hawk Infinity Software AS we have performed an assurance engagement to obtain reasonable assurance about whether the financial statements included in the annual report, with the file name Hawk Infinity Software AS-2024-12-31-en.zip, have been prepared, in all material respects, in compliance with the requirements of the Commission Delegated Regulation (EU) 2019/815 on the European Single Electronic Format (ESEF Regulation) and regulation pursuant to Section 5-5 of the Norwegian Securities Trading Act, which includes requirements related to the preparation of the annual report in XHTML format and iXBRL tagging of the consolidated financial statements.

In our opinion, the financial statements, included in the annual report, have been prepared, in all material respects, in compliance with the ESEF Regulation.

Management's responsibilities

Management is responsible for the preparation of the annual report in compliance with the ESEF Regulation. This responsibility comprises an adequate process and such internal control as management determines is necessary.

Auditor's responsibilities

For a description of the auditor's responsibilities when performing an assurance engagement of the ESEF reporting, see: <https://revisorforeningen.no/revisjonsberetninger>

Tillatelse til å utarbeide årsregnskap og årsberetning på engelsk for Jotta Group AS, org.nr. 922 182 795

Vi viser til deres henvendelse av 15.03.2022 der det søkes om dispensasjon fra kravet til å utarbeide årsregnskap og årsberetning på norsk for Jotta Group AS.

Skattekontoret gir på bakgrunn av en konkret helhetsvurdering Jotta Group AS dispensasjon fra kravet til å utarbeide årsregnskap og årsberetning på norsk, jf. regnskapsloven § 3-4 tredje ledd. Dispensasjonen gjelder så lenge opplysningene som danner grunnlaget for vedtaket ikke endres vesentlig.

Kopi av dette brevet må sendes til Regnskapsregisteret i Brønnøysund sammen med årsregnskapet. Den regnskapspliktige må selv dokumentere ved dette brev at tillatelse er gitt.

Bakgrunn

Jotta Group AS har profesjonelle eiere.

Selskapets formål er:

"Rådgivningstjenester samt investering i, og underhold av, forretningsdrift og driftsfremmede midler, samt alt hva hermed står i forbindelse. Selskapet kan interessere seg økonomisk og/eller styrelsesmessig i andre nasjonale og internasjonale foretak med samme eller liknende formål."

Selskapet tok opp et obligasjonslån i mai 2021. Lånet skal noteres på Oslo Børs våren 2022. I henhold til låneavtalen skal selskapet rapportere årsregnskap for 2021 til investorene på engelsk.

Skattekontorets vurdering

Etter regnskapsloven § 3-4 tredje ledd skal "årsregnskapet og årsberetningen [...] være på norsk. Departementet kan ved [...] enkeltvedtak bestemme at årsregnskapet og/eller årsberetningen kan være på et annet språk."

I Ot. prp. nr. 42 (1997-1998) Om lov om årsregnskap mv., er det uttalt følgende om regnskapslovens formål, jf. pkt. 1.1:

"Regjeringen har som siktemål at regnskapsloven skal bidra til informative regnskaper for ulike grupper av regnskapsbrukere. Regnskapsbrukerne er dels investorer og kreditorer som tilfører kapital til foretakene, og dels andre grupper som har interesse av å vite hvordan foretaket drives, f.eks. de ansatte og lokalsamfunnet. Informasjonen til kapitalmarkedet skal gi grunnlag for riktig prising av finansielle objekter. Riktig prisdannelse på aksjer er en forutsetning for at ressursbruken i samfunnsøkonomien skal bli best mulig. Gode regnskaper vil også gjøre det vanskeligere for markedsdeltakere å ta ut spekulasjonsgevinster med basis i skjevt fordelt informasjon."

Det fremgår således at et av hovedformålene med regnskapsloven er å bidra til "informative regnskaper for ulike grupper av regnskapsbrukere". Regnskapsbrukere vil omfatte, jf. uttalelsen i proposisjonen, blant andre investorer, kreditorer, ansatte og lokalsamfunnet.

Det er etter skattekontorets vurdering derfor avgjørende ved vurdering av om dispensasjon fra kravet til å utarbeide årsregnskap og/eller årsberetning på norsk kan gis, at det ikke foreligger mulige brukere av regnskapsinformasjon som blir vesentlig berørt negativt ved en eventuell dispensasjon.

Det er særlig hensynet til brukerne av regnskapsinformasjon som skal vurderes ved en dispensasjonssøknad. I denne vurderingen har skattekontoret lagt særlig vekt på at selskapet har profesjonelle eiere. Videre er det vektlagt at selskapet driver virksomhet i en bransje der alle sentrale aktører behersker og benytter engelsk.

Vennligst oppgi vår referanse ved henvendelse i saken.
