Glace HoldCo AS

org.nr. 919 505 184

Board of Directors Annual Report 2021

1. The company's business

The company was formed August 14, 2017 and registered in the Register of Business Enterprises, September 6, 2017.

The company's business is to own shares in GLX Holding AS. The business of GLX Holding AS is to own shares in Glamox AS. The operations of Glace HoldCo AS are run from the Oslo municipality. At December 11, 2017, GLX Holding AS became parent company of Glamox AS with a 75.16% ownership. During the owner period GLX Holding AS increased its ownership in Glamox AS to 76.17%. Glamox AS registered address is in Molde, Norway. Headquarter is located in Oslo. Glamox AS has subsidiaries in 16 countries in Europe, Asia, North- and South-America.

Glamox is a Norwegian industrial group that develops, manufactures and distributes professional lighting solutions for the global market. Our mission is to provide sustainable lighting solutions that improve the performance and well-being of people. Glamox has approximately 2,200 employees and the Group's operations are divided between three operational divisions in 2021: Professional Building Solutions (PBS), Global Marine & Offshore (GMO) and Sourcing Production Logistics (SPL). Glamox operates production units in nine different locations in Europe, Canada and China, and an extensive network of sales offices and agents in Europe as well as in Asia, USA, Canada and Brazil to ensure access to attractive markets.

The PBS business area provides total lighting solutions to the professional building market. The most important markets served by this division are Central- and Northern Europe. It is also operating in the other markets in collaboration with distributors. The level of activity in the new construction, restoration and modernisation within the professional building sectors drives developments in the individual markets. The GMO business area delivers professional lighting solutions to the global marine and offshore markets. The activity level within new-build, rebuilding and refurbishment of all types of maritime vessels and offshore installations controls market growth for this business.

For further information about Glamox AS's operations, see Glamox AS's annual report.

Glace HoldCo AS does not own shares in any other companies than GLX Holding AS, which only own shares in Glamox AS.

2. Continued operation

In accordance with Section 3-3a of the Norwegian Accounting Act, cf. § 4-5, it is confirmed that the assumption of continuation of operations has been used in the preparation of the accounts.

3. Statement of the financial statements

The company reports a loss for the year of NOK 79m. The company's equity capital per. December 31, 2021 was NOK 556m (34.2%) compared with NOK 635m (39.1%) per December 31, 2020.

The operating profit in 2021 for the consolidated accounts was NOK -86m compared to NOK 139m in 2020. The accounts in 2021 were charged with NOK 282m in net special items, compared to NOK 120m in net special items in 2020. The adjusted operating profit in 2021 was NOK 196m, down from NOK 259m in 2020. The decrease in adjusted operating result is mainly explained by lower volume, increased raw material and components prices, increase in logistic cost in addition to slightly higher operating cost due to ramp up of activities. Increased depreciations and amortisations also had a negative impact on adjusted operating profit compared to 2020.
The loss for the year in the consolidated accounts was NOK 325m compared to NOK 107m in 2020.

The consolidated equity capital per December 31, 2021 was NOK 646m (11.9%) compared to NOK 984 (18.4%) per December 31, 2020.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

The Group directly expensed NOK 32m related to research and development activities and capitalised NOK 6m related to development cost in 2021.

The consolidated cash flow of the Group in 2021 was NOK -163m, a decrease from NOK 194m in 2020. Net cash flows from operating activities amounts to NOK 170m in 2021 compared to NOK 409m in 2020. Profit before tax adjusted for depreciation and amortisation and the profit from sale of assets was NOK -54m (NOK 158m), taxes paid was NOK -36m (NOK -62m) while the effect of working capital and other operating changes was NOK 260m (NOK 313m). Net cash flow from investing activities was NOK -339m (NOK -81m) while net cash flow from financing activities amounts to NOK 6m (NOK -134m).

The Board believes the company`s equity and liquidity as of 31.12.2021 to be satisfactory.

In the opinion of the Board, the presented income statement and balance sheet and accompanying notes for the company and the consolidated accounts provide a satisfactory statement of earnings in 2021 and the financial position at year-end.

4. Financial risk management

The Group is exposed to credit risk, interest risk and exchange risk in its day-to-day business operations and aims to keep risk at an acceptable level in these areas. The underlying loan contracts are instrumental for managing interest risk. Currency risk is managed through internal invoicing rules, matching income against expenses in the same currency and loans against equity in the same currency, as well as the use of financial instruments. For more detailed information, see note 5.5 in the Annual Accounts.

5. Development by business areas

Professional Building Solutions (PBS) is a leading supplier of lighting solutions to the European non-residential building market. PBS develops and supplies complete lighting solutions for educational and healthcare institutions, commercial and industrial buildings. PBS achieved an order intake of NOK 2,944m in 2021, an increase of 7.8% from NOK 2,730m in 2020. In the same period, total revenue was NOK 2,638m, a decrease of 1.4% from NOK 2,676m in 2020. The business area achieved an adjusted EBITDA result in 2021 of NOK 340m (12.9%) compared to NOK 359m (13.4%) in 2020. The main explanation for the fall in adjusted EBITDA is lower total revenue partly offset by slightly higher sales margins.

The GMO division is responsible for lighting solutions for the maritime and offshore-related markets, plus onshore petrochemical industry. GMO achieved an order intake of NOK 814m in 2021, an increase of 8.0% from NOK 754m in 2020. In the same period, total revenue was NOK 737m, a decrease of 9.3 % from NOK 813m in 2020. The adjusted EBITDA result in 2021 was NOK 50m (6.7%) compared to NOK 78m (9.5%) in 2020. Lower revenue is the main explanation for the fall in EBITDA. Higher operating expense due to a ramp up activity levels also has a negative effect, while the product mix and a general increase in market prices has increased sales margins slightly.

6. Acquisitions

The Group has an ambitious growth strategy supported by both organic growth initiatives and acquisitions. The Group made three important value accretive acquisitions during 2021.

- LiteIP is located in the UK and designs, manufactures and supplies wireless lighting control systems. The acquisition of Lite IP will provide Glamox with a strong platform to strengthen its offering within the Lighting Control Systems market. The acquisition was closed on 2nd March 2021. LiteIP will operate as part of the PBS division.

- Luminell is a Norwegian company which has achieved a strong position as a high-quality developer and supplier of floodlights, searchlights, and lighting controls in the marine and offshore lighting market. Luminell is known for being user-focused and developing excellent lighting solutions for demanding applications. Glamox signed an agreement to acquire Luminell on 19th April 2021 and the transaction was closed on 29th April 2021. Luminell will be part of the GMO division.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

- Wasco is located in Lower Saxony, Germany and specializes in continuous line luminaires. The acquisition of Wasco will provide the Group with a leading lighting solution range for logistics buildings and warehouses. Wasco has attractive and proven lighting solutions that are in particular suitable for such warehouses and highly valued by its customers. The innovative solutions significantly reduce product cost and installation cost compared to conventional continuous lighting system. The growth in eCommerce has led to an increased demand for warehouses. The acquisition of Wasco was closed on 1st September 2021. Wasco will operate as part of the PBS division.

See note 8.2 Business combinations for more details on the acquisitions.

7. Proposal for allocation of profit
The Board of directors proposes that the year`s loss of Glace HoldCo AS of NOK 79.2m is allocated from other equity capital.

8. Environment, Social and Governance
ESG is increasingly important among our stakeholders and the Group has further strengthened its focus on ESG during 2021. The ambition is to be in the forefront in our industry.

The Group has an established ESG program with a target to secure focus on compliance and risk management as part of the value protection of our business and align to ESG market expectations to allow further value creation. We have a compliance management system in place which we are continuously developing. This system incorporates, amongst other things, our existing Group's values, our policy for corporate social responsibility, code of conduct and a range of other policies including a responsible business partner policy, anti-corruption policy, privacy policy, whistleblowing policy, crisis management policy, sanctions and export control procedure and a health safety and environmental (HSE) policy.

Glamox AS included subsidiaries carries Director & Officers Insurance provided by AIG. The Insurance covers any past, present or future members of the board of Directors and company Officers. The Insurance covers personal legal liability including defence costs.

9. Sustainability
The Group's sustainability strategy rests on four pillars to deliver on its own ambitions and stakeholder expectations; enabling sustainability for clients, environmental excellence in operations, responsible leadership, and light up people and society.

The Group's sustainability strategy is based upon a thorough materiality assessment and created together with sustainability experts and in dialogue with our key stakeholders. The aim is to build on the existing programs and expand it to create value both for our business as well as for our customers and other stakeholders, via operational efficiencies, sustainable products and solutions, and other targeted actions.

Key highlights in 2021 include environmental and energy efficiency progress such as circular design criteria for new products, LED luminaires now making up more than 95% of the luminaires delivered, 35% of our energy is sourced from renewable energy sources, and our Kirkenær factory achieved net zero emissions.

10. Responsible business partner
The Group is committed to responsible business practices and conducting business with the highest ethical standards. The ethical guidelines for the Group and our suppliers are set out in the Glamox Code of Conduct with supporting policies and instructions, such as our Responsible Business Partner Policy and our Anti-corruption policy.

We communicate our expectations regarding respect for human rights, decent working conditions and ethical business conduct to our suppliers, and qualify and monitor our suppliers in an open and transparent way by using digital tools. Through this work we can be transparent, while at the same

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

time contributing to change globally through our requirements and by sharing our knowledge with suppliers.

The Group wants all our business partners to view us as their preferred business partner. As such, we strive to achieve a positive reputation in all aspects of our business. We respect the laws, cultures, dignity, and rights of individuals in all countries where we operate. Compliance with national, regional, and international rules, laws and conventions is compulsory and business ethics extend beyond simple compliance. We conduct our business with integrity which makes our employees and business partners proud to work for and with us.

11. Environment, health and safety

The Group's goal is to produce energy-efficient products, manufactured through energy-efficient and environmentally friendly processes. The company supports a precautionary approach to environmental challenges, undertakes initiatives to promote greater environmental responsibility, and encourages the development of environmentally friendly technologies.

The environmental aspects are an important part of our product development. Through energy-efficient products and solutions we contribute to the green shift. The Group continuously works towards creating more energy efficient solutions. By replacing conventional luminaires with high-quality LED luminaires, we can reduce energy consumption by 40 to 50 %. By also adding a smart light management system the total energy reduction can be up to 90 %. More than 95 % of the luminaires we deliver are now LED, and more than 35 % of our turnover comes from connected lighting.

The Group's production unit in Poland (Wilkasy), Norway (Molde and Kirkenær), and the UK is certified in accordance with EN ISO 14001, while the production unit in Keila, Estonia is certified in accordance with EN ISO 50001.

The Group has a zero-accident ambition and focus on a safe working environment is a continuous process. The Group has an established reporting routine for lost time accidents and require all lost time accidents to be reported, investigated and mitigated. Nineteen lost time accidents were reported in 2021. This gave an accident ratio in the Group (H-value) of 5.1 accidents per 1 million worked hours, which is an increase from 4.5 in 2020.

Absenteeism due to illness in the Group was 2.2% in 2021, compared to 2.7% in 2020.

12. Equal opportunities and working environment

The company has no employees. The board consists of two people, all men. The number of full-time employee equivalents (FTEs) in the Group was 2,212 at the end of 2021, an increase from 2,174 at the end of 2020.

The Group is committed to an inclusive work culture and shall provide equal opportunities and treat all employees fairly. Glamox recognize that every individual is unique and valuable and should be appreciated based on his or her individual skills and abilities. Glamox does not accept any form of harassment or discrimination on the basis of race, colour, religion, gender, sexual orientation, national origin, age, disability, or veteran status. This is clearly stated in our code of conduct and supported by our whistle-blower policy.

Being an attractive workplace is a key part of our strategy. We truly believe that engaged employees deliver better results, and that being a great workplace for all who work for us is an important contribution to a brighter tomorrow. Feeling welcome, safe and respected at work is the right of every employee. Our employees are proud of working for the Group and our global employee engagement survey in 2021 showed that; i) 80% state that Glamox is a great place to work, ii) 88% state they have interesting and challenging tasks, and iii) 86% state that working in Glamox makes them want to do the best work they can.

The Group received one report from employees, safety representative or union representatives concerning discrimination in the work place. The report was handled in accordance with local legal

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

requirements, and adequate measures was implemented. We support the principles of freedom to association and protecting the right to organize, and we have a long and strong tradition for cooperation with representatives of our employees through formal forums. This will continue in 2021 with a specific focus on equality and discrimination.

The Group's policy is that the same skills and length of service are rewarded on an equal basis regardless of gender. Women and men in all job categories are given the same opportunities to qualify for all types of assignments and career prospects. Female employees made up 40.0% of the Group's workforce at the end of 2021.

13. Outlook
Glamox is the main asset of the group.

The Group's fundamental long-term growth prospects are positive. The growth is supported by increased global focus on energy efficiency and digitalization. The transfer to LED technology and the developments in Light Management Systems create new opportunities for the lighting industry.

Short term, we expect the instability and shortage in the components supply to continue affecting the product delivery times somewhat. However, as the pandemic recovery continues, we expect a gradual normalization. The positive market development is expected to continue in both business areas although the unfolding Ukraine crisis adds some uncertainty to the general market development. The Group expects to see increased positive effects in 2022 from actions to increase efficiencies in the value chain and the implementation of general market price increases. With an all-time high order book, good cost control and a positive market development in both our business areas the Group expects to see improved profitability in 2022.

The Group's fundamental long-term growth prospects remain strong and positive. The growth is supported by increased global focus on energy efficiency and digitalization. The transfer to LED technology and the developments in Light Management Systems create new opportunities for the lighting industry which the Group is well positioned to benefit from.

1.1 Corporate information

Glace HoldCo AS was established in 2017, with the purpose to own shares in GLX Holding AS. As of 31.12.2021 Glace HoldCo AS owns 100% of the shares of GLX Holding AS. Glace HoldCo AS is a holding company and have no other activities or investments, than the ownership of GLX Holding AS. Glace HoldCo AS is a Norwegian company and the registred address is c/o Triton Advisors (Norway) AS, Kronprinsesse Märthas plass 1, 0160 OSLO. The ultimate parent and beneficial owner of Glace HoldCo AS is Triton Fund IV, located at Jersey.

At 11 of December 2017, GLX Holding AS became the parent company of Glamox AS, with a 75.16% ownership. End of 2021 the ownership is 76.17%. GLX Holding AS is a holding company and have no other activities or investments, than the ownership of Glamox AS. GLX Holding AS is a Norwegian company and the registred adress is c/o Triton Advisors (Norway) AS, Kronprinsesse Märthas plass 1, 0160 OSLO.

Glamox AS is a leading lighting supplier to the world's marine and offshore markets, and a significant supplier to the professional building market in Europe. The registered office is located in Molde, Norway. Glamox is organised with three divisions: Professional Building Solutions (PBS), Global Marine & Offshore (GMO) and Sourcing, Production and Logistics (SPL). ES-System operated as an independent division in 2020 and has been integrated in PBS- and SPL division from January 1st, 2021. The PBS division has the responsibility of developing, marketing and sale of lighting solutions for the land-based lighting segment, with focus on the European market. The GMO division has the responsibility of developing, marketing and sale of lighting solutions to the global marine and offshore market. The SPL division consist of the production units in the Group and has the responsibility of procurement, manufacturing, warehousing and distribution. The prime objective of the SPL division is to serve the sales units (within PBS and GMO division) and their customers. The sale from the SPL division is only internal to business units within PBS and GMO.

The two sales divisions, PBS and GMO, have to a large extent different products and solutions they provide to their markets. Further they operate in strategically different markets and therefore have different sales channels, marketing strategies and risk. To be able to monitor and follow up the profitability of the complete value chain of these two business areas, Glamox has an operating segment reporting where PBS and GMO each represents a complete value chain. See note 2.1 for more information.

1.2 Basis of preparation

The consolidated financial statements of Glace HoldCo AS comprise of consolidated statements of profit and loss, other comprehensive income, financial position, cash flows, changes in equity, and related notes. The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by The European Union (EU).

The consolidated financial statements have been prepared on a historical cost basis, except for derivative financial instruments that have been measured at fair value. Further, the financial statements are prepared based on the going concern assumption.

The consolidated financial statements are presented in Norwegian kroner (NOK), which is also the functional currency of the parent company. All figures are rounded to the nearest thousand (000), except when otherwise indicated. For each entity, the Group determines the functional currency and items included in the financial statements of each entity are measured using that functional currency.

For presentation purposes, balance sheet items are translated from functional currency to presentation currency by using exchange rates at the reporting date. Items within total comprehensive income are translated from functional currency to presentation currency by applying monthly average exchange rates. If currency rates are fluctuating significantly, daily exchange rates are applied for significant transactions.

Basis of consolidation

The consolidated financial statements comprise the financial statements of Glace HoldCo AS and its subsidiaries as at 31 December 2021. See note 8.1 for subsidiaries included in the consolidation. The subsidiaries are consolidated when control is achieved, that is, when the Group is exposed, or has rights, to variable returns from its involvement with an investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee
- The ability to use its power over the investee to affect its returns

Generally, Glace HoldCo' presumption is that a majority of voting rights results in control. The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of Other Comprehensive Income (OCI) are attributed to the equity holders of the parent and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. Uniform accounting policies are applied to all group companies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

1.3 Estimation uncertainty, judgments and assumptions

The preparation of the consolidated financial statements in accordance with IFRS and applying the chosen accounting policies requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and the underlying assumptions are reviewed on an ongoing basis. The accounting policies applied by the Group in which judgments, estimates and assumptions may significantly differ from actual results are discussed below.

Sources of estimation uncertainty

Impairment of Goodwill
Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires management to estimate the future cash flows expected to arise from the cash-generating units using a suitable discount rate in order to calculate present value. Details of recognised goodwill are provided in note 3.2, including sensitivity disclosures.

Warranties
Provisions for warranty-related costs are recognised when the product is sold to the customer. Initial recognition is based on historical experience. The initial estimate of warranty-related costs is revised annually. Details related to warranty provisions are provided in note 4.1.

Deferred tax assets
Deferred tax assets are recognised when it is probable that the company will have a sufficient taxable profit in subsequent periods to utilise the tax asset. Assessment of future ability to utilise tax positions is based on judgements of the level of taxable profit, the expected timing of utilisation, expected temporary differences and strategies for tax planning.

Capitalised product development
Initial capitalisation of costs is based on management's judgement that technological and economic feasibility is confirmed, usually when a product development project has reached a defined milestone according to an established project management model. Further it is only cost related to development of products for a new application and/or with new technology that will be capitialized. In determining the amounts to be capitalised, management makes assumptions regarding the expected future cash generation of the project, discount rates to be applied and the expected period of benefits. The assessment of when product development are capitalised is highly subjective, as the outcome of these projects may be uncertain.

Economic life of property, plant and equipment and intangible assets
The useful life of each item, which is assessed at least annually, is determined as the period over which the asset is expected to be available for use.

Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The depreciation or amortisation expense on assets with finite lives is recognised in the statement of comprehensive income.

Inventory
A provision for obsolescence is included in the inventory when necessary. The criteria for assessing the needs and level of the provision are based on objective calculations and management judgements. Turnover of the goods is the base of the objective calculation. Depending on the turnover rate (3 months, 6 months or 12 months) the Group has set specific obsolesce rates to be used.

2.1 Segment information

Operating segments within the Group
In 2021, the group has the following operating segments (business areas):
- Professional Building Solutions (PBS)
- Global Marine & Offshore (GMO)

Each of these segments represents a complete value chain. For the two segment PBS ang GMO all cost of goods sold (COGS) and administration cost of the SPL division is distributed between the two operating segments, based on the products sold. Group functions are also distributed between the two operating segments, based on allocation keys. ES-System operated as an independent segment in 2020 and has been integrated in the PBS segment from January 1st, 2021.

The segments offer different products, operate in strategically different markets and therefore have different sales channels and marketing strategies, including risks. PBS offers products to office, industry, health, education, retail, hotels and resturants mainly in Europe. Their main sales channels are direct to installers and wholesalers. GMO offers its products in the global market within commercial marine, energy (offshore and onshore), navy, recreational, cruise and ferry. The customer base of GMO consist of vessel owners, yards, electrical installers, engineering companies and oil companies.

Segment performance is evaluated based on EBITDA (operating profit /loss before income taxes, net financial items, depreciation, amortisation and impairment charges)*. Management believes this information is the most relevant in evaluating the results of the respective segments. Reconciliation from EBITDA to operating profit according to the statement of total comprehensive income is shown below. The Group's financing activities (including finance costs and finance income) and income tax expense are managed on a Group basis and are not allocated to the operating segments.

The internal managment reporting of operating segments does not include any balance sheet items. Consequently, the overview of financial information per operating segment does not include assets and liabilites. None of the operating segments had sales to a single customer that exceeded 10 % of revenues in 2021.

Year ended 31 December 2021	Professional Building Solutions (PBS)	Global Marine & Offshore (GMO)	Other	Total
Revenues	2 637 919	736 973	2 492	**3 377 384**

2.2 Revenues from contracts with customers

The group derives revenue from sale of goods at a point in time, see note 2.1 for disaggregation of revenues by segments and geographical regions.

The group is a global provider of lighting solutions for a wide variety of applications, on land and offshore. All significant revenue streams relates to production and sales of goods. Glamox's main performance obligation is related to sale of goods where the performance obligations are the delivery of an agreed volume of products within the agreed specification. The accounting policies for the group's revenue from contracts with customers are explained in note 10.1.

Revenues from sales	2021	2020
Sale of goods	3 333 553	3 435 506
Total revenues from sales	**3 333 553**	**3 435 506**

Other operating income	2021	2020
Other operating income	43 831	54 042
Total other operating income	**43 831**	**54 042**

Other operating income mainly consist of freight invoiced to customers.

2.3 Inventories

Inventories	31.12.2021	31.12.2020
Raw materials	383 126	335 512
Work in progress	53 954	44 133
Finished goods	226 137	231 400
Total inventories	**663 217**	**611 045**

Provision for obsolete inventories	2021	2020
At January 1	**106 688**	**98 561**
Currency effect	-3 151	2 879
Provision used	-14 470	-23 128
Provision reversed	-6 630	-2 634
Addition through acquisition of subsidiary	663	-
Additonal provision	22 493	31 010
At December 31	**105 593**	**106 688**

The provision for obsolete inventories covers all inventory classifications (Raw material, Work in progress and Finished goods). The provision is primarily a consequence of the objective calculation based on stock turn at component level. Additional provision is mainly related to phase out of many product families produced in Germany and the closing of the factory in Germany. Provision used mainly relates to the closing of the factory in Sweden and moving of the warehouses for finished goods from Germany to Poland.

Note 5.2 shows that part of the Group's inventory is pledged as security for secured liabilities.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

2.4 Employee benefit expenses

Payroll and related costs	2021	2020
Salaries	1 005 638	893 869
National insurance	146 108	148 224
Pension costs	41 273	45 209
Other remuneration	33 841	36 873
Total payroll and related costs	**1 226 860**	**1 124 175**
Average number of Full Time Employee (FTE)	2 221	2 208

In 2021, salaries and national insurance include special items of NOK 143.8 million. Of this, NOK 127.7 million is related to restructuring, NOK 3.8 million is related to business integration, NOK 12.3 milion is related to ERP integration.

In 2020, salaries and national insurance include special items of NOK 43 million. Of this, NOK 23.0 million is related to restructuring, NOK 7.8 million is related to business integration, NOK 8.5 milion is related to ERP integration and NOK 3.7 million related to other items.

See note 7.1 for management remuneration.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

2.5 Other operating expenses

Other operating expenses	2021	2020

Total goodwill - carrying amount 31.12.2021	**1 840 265**

Impairment of Goodwill

The Group tests goodwill for impairment annually or more frequently if there are indications that goodwill is impaired. Recognised goodwill in the Group as of 31st of December 2021 is NOK 1 840 million and is derived from acquiring of Glamox AS in 2017, Glamox's acquisition of Küttel in 2018, Luxonic and ES-System in 2019, LiteIP, Wasco and Luminell in 2021. The recoverable amounts of the CGUs have been determined based on value-in-use calculations.

The Group perform its annual impairment test at reporting date. There are no impairment loss in 2021 or 2020.

For the 2021 impairment testing, the cash flows in the calculations are based on budgets for 2022 and assumption used in the strategy plan for the period 2023 to 2025, both approved by the Board of Directors of Glamox AS. Cash flows after year 2025 have been extrapolated using a long-term growth rate. The calculations of terminal value are based on Gordon's formula.

Key assumptions used in value-in-use calculations
Based on an overall assessment, Glamox has identified the following assumtions as most sensitive to the value in use calculations:

Growth rate
The historical sales growth rate in Glamox differ between the two segments, PBS and GMO. And within these two segments the growth rate differ between the sectors. In the strategy plan the growth rates are based on published industry research with management adjustments. In prediction of cash flow, management has utilized a conservative approach. The growth rate applied in the impairment test is equal to the rate utilized in the strategy plan.

Operating profit
Future operating profit is dependent on a number of factors, but primarily volume growth, cost of production and operating expenses. In the impairment test, Glamox has estimated operating profit using an operating profit rate that is based on managment's experience.

Discount rates
The discounts rates are based on the Weighted Average Cost of Capital (WACC) formula derived from the CAPM model. The discount rate is set individually for each CGU and is post-tax between 8.5% and 9.8%.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

Cash generating units and assessments made by management
Goodwill related to the acquisition of Glamox AS is allocated to the two operating segments;
- Proffesional building solutions ("PBS")
- Global Marine and Offshore ("GMO")

PBS
In the impairment test calculation, the terminal growth rate is assumed to be 2.0% and a WACC of 8.5% has been utilized. The sensitivity analysis show that an increase in WACC of 5.0 % would lead to an impairment loss. A decrease in EBITDA margin of 7.9 % in the 10 years of the analysis period would lead to an impairment loss.

GMO
In the impairment test calculation, the terminal growth rate is assumed to be 2.0% and a WACC of 8.5% has been utilized. The sensitivity analysis show that an increase in WACC of 5.8 % would lead to an impairment loss. A decrease in revenues of 10.3 % in the 10 years of the analysis period would lead to an impairment loss.

O. Küttel AG
O. Küttel AG was acquired in April 2018. The company is a leading Swiss provider of lighting for the professional building market in Switzerland. In the impairment test calculation, the terminal growth rate is assumed to be 2.0% and a WACC of 9.8% has been utilized. The sensitivity analysis show that an increase in WACC of 9.3 %-p would lead to an impairment loss. A decrease in revenues for the whole period of 25% combined with a decrease in profit margin og 4.0%-p would lead to an impairment loss.

Glamox Luxonic
Luxonic was aquired by Glamox in April 2019. The company was established in 1986 and is a UK based lighting company with a strong brand and its own manufacturing plant located in Basingstoke, UK. In the impairment test calculation, the terminal growth rate is assumed to be 2.0 % and a WACC of 8.5 % has been utilized. The sensitivity analysis show that an increase in WACC of 1.7 %-p would lead to an impairment loss. A decrease in revenues for the whole period of 21.5 % would lead to an impairment loss, or a decrease in revenue of 3% combined with a decrease of profit margin of 1.2 %-p would lead to an impairment loss.

Carrying amount 31.12.2021	**95 827**	**1 192 949**	**1 288 776**

Net Capitalised development costs as of the year ended December 31, 2021 were NOK 95 827 thousand. Of this amount, NOK 49 403 thousand relates to acquired product portfolio through the acquisition of Glamox AS, NOK 10 006 thousand relates to aqcuired product developement through the acquisition of Glamox Luxonic, NOK 10 657 thousand relates to acquired product developement through the acquisition of ES-System, NOK 15 337 thousand relates to acquired product developement through the acquisition of Luminell Group. The economic life of the product development is estimated to 3-7 years, and the amortisation plan is stright-line. The rest is capitalised product developement related to internal projects. Internal projects that results in products with a new application or new technology is capitalised given that the criteria in IAS 38 is fulfilled.

The Group directly expensed NOK 31 540 thousand related to research and development activities in 2021 (2020: NOK 31 842 thousand).

Carrying amount of other intangible assets per 31.12.2021 is NOK 1 193 million and consists of the brand name "Glamox" amounting to NOK 800 million, customer relations from the aquisition of Glamox AS in 2017 amounting to NOK 148 million, as well as other customer relations, brand names and IT-systems and rights.

The economic life of the brand name "Glamox" and "Küttel" are assumed to be indefinite. These trademarks are well incorporated in their respective markets and there are no plans of rebranding. Based on this, the trademark is assessed to be indefinite and therefore not amortised. The trademarks is tested for impairment annually, see note 3.2. Except for this, other intangible assets are amortised over 5-10 years based on the useful economic life.

*In 2021, the Group recorded an impairment of NOK 0.5 million related to one product in Luminell Norway that was not commercialised. No other indicators were identified in 2021 for intangible assets.

The seal is a guarantee for the authenticity of the document.

4.1 Provisions and other liabilities

Provisions and other liabilities	31.12.2021	31.12.2020
Non-current provisions and other liabilities		
Warranties	37 231	38 470
Other liabilities	7 732	9 318
Total non-current provisions and other liabilities	**44 964**	**47 788**

Provision for warranties	2021	2020
At January 1	**38 470**	**34 132**
Currency effect	-674	1 025
Addition through acquisition of subsidiary	764	-
Provision used	-8 879	-4 665
Provision reversed	-2 095	-2 721
Additional provision	9 645	10 699
At December 31	**37 231**	**38 470**

Current provisions and other liabilities		
Derivatives (currency forward contracts - note 5.1)	3 379	1 960
Derivatives (interest rate swap - note 5.1)	-	8 868
Prepayments from customers	9 438	20 246
Restructuring/Severence payment	92 006	5 276
Accruals for employee benefits	104 218	110 279
Product claim	10 625	25 659
Contingent liabilities	55 011	1 312
Pension liabilities	388	1 202
Accrued interest	9 853	10 287
Other liabilities	52 592	47 168
Total current provisions and other liabilities	**337 511**	**232 257**

Warranties relates to product warranty obligations to customers. Standard warranty time is between 2-5 years. The warranty time differs among the different markets that Glamox operates in, and between the different products sold.

Product claim relates to two product families sold to the energy area (GMO segment) over several years. The provision is expected to cover cost involved in rectifying received and potential claims.

The contingent liabilities relates to acquisition of LiteIP Ltd. and Wasco GmbH. The contingent consideration relates to future financial key figures, integration and development of technology during 2021-2024 for LiteIP and 2021-2023 for Wasco GmbH.

Other liabilities contains accrued fee and general accrued expenses.

5.1 Financial instruments

The Group has the following financial instruments:

Financial assets/liabilities at amortised cost:
Financial assets: Trade receivables, other current receivables (notes: 5.9) and cash and cash equivalents (note 5.8)
Financial liabilities: Includes most of the Group's financial liabilities including debt to credit institutions, trade payables and other current and non-current financial liabilities (notes: 5.2 and 5.10).

Financial assets/liabilities at fair value through profit and loss (FVTPL):
Derivative instruments – Currency forward contracts and interest rate swap (see below)

Derivates and hedging
The Group applies hedge accounting related to its hedges of net investments in foreign subsidiaries. Loans and bank overdrafts in the same currency as the underlying investments are designated as hedging instruments. As of 31 December 2021 NOK 646.0 million of the interest bearing liabilities have been designated as hedging instrument (2020: NOK 575.0 million). In the Group accounts, the underlying currency effects related to the hedging instruments are presented in the statement of OCI, to the extent that the hedging relationship is effective. At the end of the period, the hedging relationship is effective.

Furthermore, the Group holds currency forward contracts to secure its sales and purchases in foreign currency. Hedge accounting is not applied related to these arrangements, and the derivatives are measured at fair value through profit and loss (FVTPL).

In June 2018, GLX Holding AS entered into a 3-year floating-to-fixed interest rate swap with DNB and Danske Bank for the nominal amount of NOK 1,350 million. The floating-to-fixed interest rate swap expired in June 2021 and GLX Holding will from this point have a floating interest rate on the bond and be exposed to changes in NIBOR.

For further information, see note 5.5 and 10.1.

IFRS 9 contains three principal classification categories for financial assets: measured at amortised cost, FVTOCI and FVTPL. The classification of financial assets under IFRS 9 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics.The table below shows the various financial assets and liabilities, grouped in the different categories of financial instruments according

31.12.2021	Amortised cost	Fair value through profit or loss (FVTPL)	Total
Assets

Long-term loan
Glace HoldCo AS has received a long-term loan from related parties within the Triton Group.
The interest rate is fixed at 8% per annum. According to the agreement any accrued interest shall not be required to be paid out in cash. On each anniversary of the loan agreement, the accrued interest for the previous year , that is not paid out in cash, will be added to the principal amount of the loan and will bear interest at 8% per annum.

Glace HoldCo AS may repay the principal amount, in whole or in part together with all accrued but unpaid interest, before final maturity day. Final maturity day is 22.12.2037.

Bond
GLX Holding AS issued a Bond on the 8 December 2017. The initial issued amount is NOK 1 350 million and the maximum issued am ount of the bond is NOK 2 000 million. The initial nominal amount on each bond is NOK 0.5 million. The bond has an interest margin of 5.25%. The interest period is 8 March, 8 June, 8 September and 8 December. The maturity date is 08.12.2023. The Outstanding Bonds will mature in full on the Maturity Date and shall be redeemed by the Issuer on the Maturity Date at a price equal to 100 per cent of the Nominal Amount. The Bond has a Call Option that may be exercised by the Issuer by written notice to the Bond Trustee and the Bondholders at least 10 Business Days prior to the prop osed Call Option Repayment Date for the call.

An arrangement fee of NOK 7.2 millions related to the refinancing, is booked against the bond. The arrangement fee is expense d over the availability period of the facility.

The Bond was listed at Oslo Stock Exchange during second quarter 2018.

Callable Open Bond - Covenant requirement:
Financial covenants requirement for the bond is Net interest bearing debt (NIBD)/ EBITDA (Last Twelve Monts) less than 4.0.

Bond - assets pledged as security
The shares in both GLX Holding AS and Glamox AS is pledged as security for the Bond.

There have been no breaches of covenants in 2021 or 2020.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

Revolving facility
Glamox holds a multi-currency revolving facility. The multi-currency revolving facility has a credit limit of NOK 1,400 million.
In Q2-2021 the utilized amount was increased by NOK 135 million and in Q3-2021 the utilized amount was increased by NOK 103 million.

An arrangement fee related to the financing is booked against non-current interest bearing liablities and is expensed over the availability period of the facility.

Revolving facility - Covenant requirements:
Glamox' loan agreements includes the following financial covenants requirements:
- Equity ratio minimum 20%
- Net interest bearing debt (NIBD)/EBITDA (Last Twelve Months) less than 4.0.

There have been no breaches of covenants in 2021 or 2020.

Revolving facility - assets pledged as security and guarantee liabilities

5.4 Fair value measurement

The table below disclose information about all financial instruments that are either measured at fair value or where information about fair value is disclosed. The Bond was listed at Oslo Stock Exchange during second quarter of 2018 and transferred to level 1 in the fair value hierarchy. There were no transfers between levels in the fair value hierarchy in 2021.

For related accounting policies, reference is made to note 10.1.

	Carrying amount at	Date of valuation	Carrying amount	Fair value	Level 1	Level 2	Level 3
Liabilities measured/disclosed at fair value							
Long term loan	31.12.2021	31.12.2021	1 063 277	1 063 277		x	
Long term loan	31.12.2020	31.12.2020	984 515	984 515		x	
Interest-bearing liability	31.12.2021	31.12.2021	959 806	959 806		x	
Interest-bearing liability	31.12.2020	31.12.2020	762 453	762 453		x	
Callable Open Bond	31.12.2021	31.12.2021	1 350 000	1 333 125	x		
Callable Open Bond	31.12.2020	31.12.2020	1 350 000	1 333 125	x		
Derivative financial liabilities	31.12.2021	31.12.2021	3 379	3 379		x	
Derivative financial liabilities	31.12.2020	31.12.2020	10 828	10 828		x	

An arrangement fee of NOK 7.2 millions related to the Callable Open Bond, is booked against the bond. Interest-bearing liabilities also includes arrangement fees of NOK 2.7 million related to the revolver credit facility, which is booked against the liabilities. The arrangement fees are expensed over the availability period of the facility.

Fair value of financial instruments
Management assessed that the fair values of cash and short-term deposits, trade receivables, trade payables and other current liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

The Group enters into derivative financial instruments with various counterparties, principally financial institutions with investment grade credit ratings. Forward contracts are valued using valuation techniques, which employ the use of market observable inputs. The most frequently applied valuation techniques include forward pricing models using present value calculations (hierarchy level 2). The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the respective currencies and currency basis spreads between the respective currencies. All derivative contracts are fully cash collateralised, thereby eliminating both counterparty risk and the Group's own non-performance risk. As at 31 December 2021, the marked-to-market value of derivative asset positions is net of a debet valuation adjustment attributable to derivative counterparty default risk. The changes in counterparty credit risk had no material effect on measurement of financial instruments recognised at fair value. The Group applies input from its respective bank relations in performing the fair value calculations.

The fair value of the Group's interest-bearing liability are assessed to be in all material aspects similar to carrying amount.

Fair value of the Callable Open Bond is calculated by using the OSE trading price at year-end.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

5.5 Financial risk management

The Group is exposed to a range of risks affecting its financial performance, currency risk, interest rate risk, liquidity risk and credit risk. The Group seeks to minimise potential adverse effects of such risks through sound business practices, risk management and use of derivative financial instruments. Risk management is carried out by senior management under policies approved by the Board of Directors.

Interest rate risk
The Group aims to follow the general long term development in the money market interest levels. The effects of short term fluctuations in money market interest levels can be reduced by managing the loan portfolio's average interest and the timing of the interest payments. Underlying loan agreements is used to manage the interest risk.

The floating to fixed interest rate swap expired in June 2021 and GLX Holding AS have a floating interest rate on the bond and be exposed to changes in NIBOR.

The main part of the deposit is organised in a Multi Currency Cash pool. The interest bearing liability relates to a Callable Open Bond and a Revolving Credit Facility (RCF). As of 31.12.2021 it is utilised NOK 300.5 million, EUR 32.0 million and PLN 150.1 million of the RCF. The interest of the utilised amount of the RCF is payable at a rate of NIBOR/EURIBOR/WIBOR plus a margin, dependent on the Group's NIBD/EBITDA ratio.

The following table demonstrates the sensitivity to a possible change in interest rates, with all other variables held constant, on the Group's profit before tax:

Interest rate sensitivity	Increase / decrease in basis points	Effect on profit before tax
31.12.2021	+/ 100	19.9 mNOK / +13.9 mNOK
31.12.2020	+/ 100	2.4 mNOK / 0.1 mNOK

The long term loan of Glace HoldCo AS has a fixed interest rate of 8%, and will not be affected by changes in the interest rate.

Foreign currency risk
The Group is exposed to transaction risk by purchasing and selling in different currencies. Purchase and production expenses are mainly in NOK, SEK, EUR, GBP and PLN with sales mainly in NOK, EUR, SEK, DKK, GBP, SGD, CAD, CHF, PLN and USD. Glamox aims to minimise the risk of changes in the value of net cash flows arising from the short term fluctuations in exchange rates. Transaction risk is controlled by means of internal invoicing rules, matching of income and expenses in the same currency and by using financial instruments (forward contracts).

The Group uses forward contracts as an economic instrument to hedge cash flow. As of 31.12.2021, the Group hold forward contracts for both sale and purchase of currencies. Forward contracts as of 31.12.2021 amounts to NOK 151 million in currency sales and NOK 183 million in currency purchase based on 31.12.2021 exchanges rates. The Group's forward contracts had a market value of NOK 2.0 million as of 01.01.2021 and NOK 3.4 million as of 31.12.2021. The Group has not applied hedge accounting in accordance with IFRS 9 for cash flow hedging.

The Group is exposed to currency changes related to carrying amounts of equity in foreign subsidiaries. Changes in the value of equity of foreign subsidiaries are offset/hedged by loans and overdrafts in the same currency. The following tables demonstrates the Group's total exposure to foreign currency risk related to its net debt and equity in foreign subsidiaries:

	Equity in foreign subsidiaries		Net debt and overdraft in foreign currency	
Currency (in currency million)	31.12.2021	31.12.2020	31.12.2021	31.12.2020
EUR/DKK	34.5	36.8	30.0	34.7
SEK	59.8	118.0	55.0	127.7
GBP	19.5	12.2	19.7	11.7
CHF	10.3	15.9	10.7	16.3
PLN	132.5	149.4	143.3	155.3
SGD	5.3	4.9	5.7	5.0
CAD	5.8	4.0	5.1	4.4
USD	4.7	6.7	4.2	6.2

Without the hedge of the net investment in foreign subsidiaries, a 10 percent weakening/strengthening in the value of NOK would have increased/decreased equity by NOK 113.8 million as of 31.12.2021, where equity in EUR represents NOK 33.8 million of this increase/decrease. Such changes in value would have limited impact on P/L, as they are mainly booked as translation differences against equity. Because of the hedge, the impact on equity is also limited.

Liquidity risk
Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group has a limited exposure to liquidity risk on the basis of a strong cash flow in addition to a solid balance sheet, as of 31.12.2021 the equity rate is 11.9 %. The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts and bank loans.

See note 5.3 for an overview of maturity profile on the Group' financial liabilities and an overview about available credit lines, and note 5.8 for an overview of the liquidity reserve.

Credit risk
Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group trades only with recognised, creditworthy third parties. It is the Company's policy that all customers who wish to trade on credit terms are subject to credit verification procedures, which include an assessment of credit rating, short-term liquidity and financial position. The Company obtains sufficient collateral (where appropriate) from customers as a means of mitigating the risk of financial loss from defaults. In addition, receivable balances are monitored on an ongoing basis, with the result that the Company's exposure to bad debts is not significant.

Outstanding customer receivables are regularly monitored and any shipments to major customers are generally covered by letters of credit or other forms of credit insurance. See note 5.9 for comments regarding trade receivables ageing. With respect to credit risk arising from the other financial assets of the Company, which comprise cash and derivative financial assets, the Company's exposure to credit risk arises from default of the counterparty, with a maximum exposure equal to the carrying amount of these instruments. The Group limits its counterparty credit risk on these assets by dealing only with financial institutions with credit ratings of at least A or equivalent.

5.6 Capital management

For the purpose of the Group's capital management, capital includes issued capital and all other equity reserves attributable to the equity holders of the parent. The primary objective of the capital management is to ensure that it maintains a healthy capital ratios in order to support its business and maximise shareholder value.

The Group manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares.

In order to acheeve this overall objective, the Group's capital management, amongst other things, aims to ensure that it meets financial covenants related to the interest-bearing financial liabilities. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no breaches of the financial covenants of any interest bearing loans and borrowing in the current period. Reference is made to note 5.2 for disclosed information regarding interest bearing liabilities and financial covenants.

7.1 Management remuneration

Glace HoldCo AS
Glace HoldCo AS has no employees, and there has been no remuneration to board members during 2021.

GLX Holding AS
GLX Holding AS has no employees.
The Board of GLX Holding AS has proposed a remuneration of NOK 50 thousand to board member, Torfinn Kildal, for the twelve month period ending in June 2022 at the General meeting.

Glamox
The CEO is a member of a defined contribution pension scheme for salaries up to 12G (approx NOK 1.2 million). In addition, the CEO is entitled to a salary compensation of 23.95% of fixed salary for amounts exceeding 12G. The CEO also has a performance based bonus agreement.

For 2021, the CEO has a performance related bonus agreement, which can give up to seven months' additional salary. The financial statements of 2021 have been charged with NOK 542 thousands related to the performance related bonus agreement. For 2022, the CEO has a performance related bonus agreement, which can give up to ten and a half months' additional salary.

As announced 29 October 2021, CEO Rune Marthinussen will retire from the role as CEO of Glamox simultaneously with Astrid Sim onsen Joos starting as CEO 1 August 2022. Rune Marthinussen will continue as special advisor for the new CEO until 31 December 2022 and further be available during his notice period until 30 June 2023. In accordance with his employment contract, he will receive an 18 months' severance pay from 1 July 2023 until 31 December 2024.

Remuneration to CEO		Salary	Performance-related bonus	Pension	Other remuneration
Rune Marthinussen - CEO	2021	3 716	542	54	127
Rune Marthinussen - CEO	2020	3 601	1 764	52	126

7.2 Post-employment benefits

Glamox AS is legally obliged to have occupational pension arrangements under the Norwegian Mandatory Occupational Pension Act . The Norwegian pension arrangements satisfy the requirements of this act.

Defined contribution plan
The majority of the Group's employees are covered by defined contribution pension schemes. Contributions to these schemes are recognised as pension expense as they occur. Total costs related to the Groups contribution plans were NOK 38.1 million in 2021 (2020: NOK 37.2 million).

Defined benefit pension plan
The Group also has defined benefit pension plans in Glamox AS and in four subsidiaries of Glamox AS. The defined benefit plans in O. Küttel AG accounts for approximately 40% of the net liability in the Group, Glamox AS accounts for approximately 34% of the net liability in the Gro up and ES-System accounts for approximately 17% of the net liability in the Group. The remaining 9 % of the net liability consist of several minor defined benefit pension plans in other subsidiaries.

On Group level, total net pension liabilities were NOK 45.5 million (net of the pension liability of NOK 145.3 million and reserve of NOK 99.8 million) as at 31 December 2021. As of 31.12.2020 total net pension liabilities were NOK 75.4 million (net of the pension liability of NOK 162.8 million and reserve of NOK 87.4 million). Actuarial gains/losses recognised in the net pension liabilities amounted to NOK -25.9 million in 2021 (2020: NOK 3.5 million).

Risks related to defined benefit plans
The defined benefit plans expose the company to various demographic and economic risks, such as longevity, investment, curren cy and interest rate risks and in some cases, inflation risk.

O. Küttel AG

The net pension liabilities consists of a defined benefit plan for 53 employees. The pension plan are organized as "contribution-based" schemes as per Art. 15 of the Swiss Federal Law on Vesting in Pension Plans. Under these plan arrangements, retirement benefits of active participants accrue over a notional account as the sum of retirement credits (retirement credit rate multiplied with pensionable salary) and interests. Average age of the participants in the pension plan was 43.81 as of 31 December, 2021.

ES-System

The pension liability in ES-System consists of retirements benefits, disability benefits and death severance pay. Disability benefits and death severance pay make up approximately 20 % of the pension liability, while 80 % relates to retirement benefits. On the basis of IAS 19 the profitability of 10-year treasury bonds amounting to 3.6% was used to determine the discount rate. The long-term annual salary growth rate was assumed to be from 3.5% to 5.5% depending on site location in nominal terms. When determining the pension liability, the probability of obtaining additional benefit entitlements was taken into account. The probability of achieving rights to severance pay and death severance pay is understood as the probability of invalidity and death of an employee before reaching retirement age, provided that they remain in an employment relationship with their current employer. Retirement age means the age of 60 for women and 65 for men.

Luminell Group AS

On 29th of April 2021, Glamox AS aquired 100% of the shares in the Norwegian company Luminell Group AS. The company was established in 2010 and is a high-quality developer and supplier of floodlights, searchlights and lighting controls in the marine and offshore lighting market. Luminell reported total revenue of NOK 108.5 million and EBITDA of NOK 16.5 million in 2020. Luminell Group AS is the parent company of Luminell Norway AS, Luminell Drone Light AS, Luminell Sweden AB and Luminell US Inc.

The total purchase consideration was NOK 136.7 million, consisting of cash consideration paid of NOK 133.4 million and a Promissory note to Luminell Team AS of NOK 3.3 million.

The acquisition cost is allocated to identifiable assets and liabilities at fair value on the acquisition date. The excess amount is recognised as Goodwill. The below table illustrates the fair values of the identifiable assets and liabilities at acquisition.

All figures in tNOK	Book value	Fair value_Adj	Estimate FV	Adjustment	Fair value
Assets					
Goodwill		66 311	66 311	3 441	69 751

Wasco GmbH
On 1 of September 2021, the subsidiary of Glamox AS, Glamox GmbH, aquired 100% of the shares in Wasco GmbH, including Wasco Verwaltungs GmbH and Wasco International GmbH & Co. KG. Wasco is located in Lower Saxony, Germany and specializes in continuous line luminaires. Wasco will provide Glamox Group with a leading lighting solution range for logistics buildings and warehouses. Wasco had revenues of EUR 4.6 million (app. NOK 47.5 million) in 2020.

The total purchase consideration was NOK 128.2 million, consisting of cash consideration paid of NOK 110.8 million and contingent consideration of NOK 17.4 million. The contingent consideration relates to future financial key figures and development of technology.

9.1 Related party transactions

Related parties are Group companies, major shareholders, board and senior management in the parent company and the group subsidiaries. Note 8.1 provides information about the Group's structure, including details of the subsidiaries and the holding company. The agreements on remuneration for CEO appear in note 7.1

All transactions within the Group or with other related parties are based on the principle of arm's length.

Glace HoldCo AS has a long term loan agreement towards related parties within the Triton Group. See note 5.2 for more information.

GLX Holding AS has agreements with Triton Advisers Limited and Triton Investment Management Limited for counseling and success fee related to the acquisition of businesses respectively. Expenses during 2021 were NOK 3.5 million (2020: 3.6 million).

9.2 Covid-19

The Covid-19 pandemic has also in 2021 affected the demand in most of the Group's markets negatively. However, we have seen a gradual improvement of the market conditions following the easing of implemented infection-reducing measures by governments. Still the market conditions are not back to pre-Covid levels in most segments and geographies. In the PBS business area, the negative market impact has been largest in the geographies with the strictest government measures like the UK, Ireland, the Netherlands, and Poland. In the GMO business area, the cruise and ferry segment has particularly been hit hard. However, in second half of the year, the Group experienced a significant increase in order intake and an all-time high order book, due to an increase in activity levels and higher economic growth.

During 2021, the Group has taken action to offset the negative impact of reduced demand by further adjusting capacity and related cost both on a permanent and temporary basis. Travel restrictions in 2021 have led to reduced travel, sales and marketing cost compared to a normal year.

The Covid-19 pandemic situation has been challenging for Glamox's operations and employees. In this environment, the organization has performed well and safety and health of our employees and partners has been first priority. A high delivery capability from all our production facilities has been maintained, and the Group has managed to increase its market share in most of its target markets. However, indirect consequences such as supply chain disruptions due to shortage of and longer lead times related to components and raw materials have had an impact on the Group's operations and revenues. This has been the case in particular in the second half of the year. Further, we have experienced increased logistical, raw material and component costs and the impacts of these have been, and will further be, mitigated by higher sales prices.

Although we see an improved market situation in most geographies, there is still a high degree of uncertainty related to the effects of the development of the pandemic. Supply chain shortages for key components and materials continue to be a concern in 2022. We monitor the situation closely and will take further actions as needed. It is not expected that the pandemic will have a significant effect on the Group's operations or financial statements in the long term.

9.3 Events after the reporting period

The Ukraine war and the possible effects on the global economy, adds some uncertainty to the general market development. The Group has currently no business activities towards Russia and very limited business towards Ukraine. The Group is closely monitoring the situation and have currently seen limited impact on the demand of our products.

10.1 Significant accounting policies

Revenue recognition
IFRS 15 is based on the principle that revenue is recognised when control of goods or services is transfered to a customer. Recognition of revenues should represent the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

A five-step process must be applied before revenue can be recognised:
- identify contracts with customers
- identify the separate performance obligation
- determine the transaction price of the contract
- allocate the transaction price to each of the separate performance obligations, and
- recognise the revenue as each performance obligation is satisfied.

The Group is a global provider of lighting solutions for a wide variety of applications, on land and offshore. Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured, regardless of when the payment is received. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty.

All significant revenue streams relates to production and sales of goods. The group's main performance obligation is related to sale of goods where the performance obligations are the delivery of an agreed volume of products within the agreed specification. Linksrechts is the only company in the group that produces and delivers installations that are tailored through engineering and design. For each project, management assess if the projects consist of several distinct performance obligations and when the performance obligation(s) are satisfied. The company did not have any ongoing projects at year-end with material effect on the timing of the revenue recognition.

Sale of goods
Revenue are recognised when control of the products has transferred, being when the products are delivered to the customer and there is no unfulfilled obligation that could affect the customer's acceptance of the product. The products are mainly sold in relation to seperately identifiable contracts with customers. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the group has objective evidence that all criteria for acceptance have been satisfied. Standard delivery terms for customers within the PBS segment is Delivered Duty Paid (DDP). DDP delivery terms implies that delivery is completed when the goods are made available to the buyer at a specified location. Standard delivery terms to customers within the GMO segment is Ex Works (EXW). EXW delivery terms implies that delivery is completed when the goods are made available, suitably packaged at a specified loaction, often at Glamox factory or depot.

In some cases, Glamox offer to deliver freight as a service to the customer. In such cases, freight are considered to be a fullfilment of the delivery and not considered to be a distinct performance obligation. Freight and delivery of goods are therefore considered as a common performance obligation and recognised when control of the products has transferred to the customer.

No element of financing is deemed present as the sales are made with a credit term up to 60 days, which is consistent with market practice. A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates. The goods are normally sold with standard warrantes that the goods comply with the agreed-upon specifications. These standard warranties are accounted for using IAS 37 Provisions, see note 4.1 for more information. Glamox does not have any other significant obligations for returns or refunds.

Inventories
In conjunction with implementing a new ERP system in the group, the accounting principle for inventory was changed from standard cost to moving average unit cost (MAUC).

Inventories are valued at the moving average unit cost and net realizable value. Costs incurred in bringing each product to its present location and condition are accounted for, as follows:

- Raw materials: purchase cost on a moving average unit cost (MAUC) basis
- Finished goods and work in progress using MAUC : including cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs

Raw material mainly consist of metal parts, LED components, plastic modules, cables, electronic parts and packaging. The basic calculation of inventory is based on moving average unit cost (MAUC). The MAUC is the average value for each unit of the current inventory. Inventory is valued against the average receipt price. For each new receipt, the MAUC is updated.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

Current versus non-current classification
The Group presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle,
- Held primarily for the purpose of trading,
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in the normal operating cycle,
- It is held primarily for the purpose of trading,
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Group classifies all other liabilities as non-current. Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Property, plant and equipment
Tangible fixed assets such as plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. When significant parts of plant and equipment are required to be replaced at intervals, the Group depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

The group considers equipment used in operations to be a tangible fixed asset if it has an economic life of more than three years.

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets, reference is made to note 3.1 for further guidance related to useful lives.

Business combinations and goodwill
Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, which is measured at acquisition date fair value, and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included in administrative expenses.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date.

Any contingent consideration to be transferred by the acquirer will be recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of IFRS 9 Financial Instruments: Recognition and Measurement, is measured at fair value with the changes in fair value recognised in the statement of profit or loss.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests and any previous interest held over the net identifiable assets acquired and liabilities assumed). After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill is allocated to each of the CGU's that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units. Reference is made to note 3.2 for an overview over goodwill, allocation of goodwill per CGU and impairment testing.

Intangible assets
Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense related to the intangible assets is recognised in the statement of profit and loss.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

Research and development costs
Research costs are expensed as incurred. Development expenditures on an individual project, which represents new applications/technology, are recognised as an intangible asset when the Group can demonstrate:

- The technical feasibility of completing the intangible asset so that the asset will be available for use or sale
- Its intention to complete and its ability and intention to use or sell the asset
- How the asset will generate future economic benefits
- The availability of resources to complete the asset
- The ability to measure reliably the expenditure during development

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised over the period of expected future benefit. During the period of development, the asset is tested for impairment annually.

Impairment of non-financial assets
Further disclosures relating to impairment of non-financial assets are also provided in the following notes:

- Property, plant and equipment - Note 3.1
- Goodwill - Note 3.2
- Other intangible assets - Note 3.3

At each reporting date, the Group assesseswhether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. A long-term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations are recognised in the statement of profit or loss in expense categories consistent with the function of the impaired asset.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss.

Goodwill is tested for impairment annually and when circumstances indicate that the carrying value may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives are tested for impairment annually at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

Provisions

General
Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit or loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Warranty provisions
Provisions for warranty-related costs are recognised when the product is sold to the customer. Initial recognition of the warrenty provision is based on previous years turnover and management judgment. The length of the warrenty time may differ between the markets. The initial estimate of warranty-related costs is revised annually. Reference is also made to note 1.3 and 4.1 for further details.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

Restructuring provisions
Restructuring provisions are recognised only when the Group has a constructive obligation, which is when a detailed formal plan identifies the business or part of the business concerned, the location and number of employees affected, a detailed estimate of the associated costs, and an appropriate timeline, and the employees affected have been notified of the plan's main features. Reference is also made to note 4.1 for further details.

Leases
The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate.

The Group applies its incremental borrowing rate at the time of initial application. The group have used interest rates from the cash pool facility and intercompany loans for determining the incremental borrowing rate (IBR) for each subsidiary. The length of the agreement is an additional element that has been taken into consideration when calculating the IBR for a specific lease.

The Group has assessed the general guidance on portfolio accounting and the practical expedient upon transition as discussed above. Glamox has decided that we will not utilize the portfolio approach, and instead we will determine separate discount rate for each lease.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee.

The Group has not applied the practical expedient in IFRS 16.15 which allows lessees to combine non-lease and lease components in lease arrangements and account for the total arrangement as a lease. As such, non-lease components will be identified and accounted for separately from the lease components in all arrangements.

Options should be taken into account if management is reasonably certain to exercise the option. For the Group`s lease arrangements the vast majority of the options have exercise date many years down the line. As such, management has limited insight and they are not reasonable certain to exercise and no options have been taken into consideration.

Dividend distribution to shareholders
A group company recognises a liability to make distributions to equity holders of the parent when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws of Norway, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

Financial instruments
A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Classification of financial instruments
The Groups' financial instruments are grouped in the following categories:

- Fair value with changes in value through profit or loss (FVTPL)
- Amortised cost (AC)

The classification is dependent on the type of instrument and the purpose for which the investments were acquired or originated.

Fair value through profit or loss is the classification of instruments that are held for trading or for which the entity's business model is to manage the financial assets on a fair value basis i.e. to realise the asset through sales as opposed to holding the asset to collect contractual cash flows.

Amortised cost applied to instruments for which an entity has a business model to hold the financial asset to collect the contractual cash flows. The characteristics of the contractual cash flows are that of solely payments of the principal amount and interest.

Financial assets and liabilities measured at amortised cost is the category most relevant to the Group. This category generally applies to trade and other receivables, interest-bearing loans, trade payables and other financial liabilities.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

The Group has the following financial instruments:

FVTPL:	Derivative instruments – Forward contracts and interest rate swap (notes: 5.1)
Financial assets (AC):	Trade receivables and other current receivables (notes: 5.1 and 5.9)
Financial liabilities (AC):	Includes most of the Group's financial liabilities including debt to credit institutions, trade payables and other current and non-current financial liabilities. (notes: 5.1, 5.2 and 5.10)

Initial recognition and subsequent measurement

FVTPL: Financial derivatives that are not designated as hedging instruments are categorized as held for trading and initially meas ured at their fair value. Subsequent changes in the fair value are recognised in the profit or loss (financial income or expense).

Financial assets (AC): These assets are measured at the amount recognised at initial recognition minus principal repayments, plus or minus the cumulative amortisation of any difference between that initial amount and the maturity amount, and any loss allowance. Interest income is calculated using the effective interest method (EIR) and is recognised in profit and loss. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR.

Financial liabilities (AC): These liabilities are measured at the amount recognised at initial recognition minus principal repayments, plus or minus the cumulative amortisation of any difference between that initial amount and the maturity amount. Interest income is calculated using the effective interest method (EIR) and is recognised in profit and loss. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR.

Impairment of financial assets
Under IFRS 9, financial assets valued at amortised cost are impaired based on the "Expected credit losses (ECL)" model. Expected credit losses are calculated by (a) identifying scenarios in which a loan or receivable defaults; (b) estimating the cash shortfall that would be incurred in each scenario if a default were to happen; (c) multiplying that loss by the probability of the default happening; and (d) summing the results of all such possible default events.

The Group recognised loss allowances for ECLs on financial assets measured at amortised cost. Furthermore, the Group measures loss allowances at an amount equal to lifetime ECLs for all financial assets.

Credit- impaired financial assets
At each reporting date, the Group assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial assets have occured.

Evidence that a financial asses is credit-impaired includes the following observable data:
- significant financial difficulty of the customer; or
- it is probable that the customer will enter bankruptcy or other financial reorganisation
- the customer is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- the financial asset is more than 180 days past due.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write off
The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. The Group individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Group expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due.

Derecognition of financial instruments
A financial asset is derecognized when the rights to receive cash flows from the asset have expired; or the Group has transferred its rights to receive cash flows from the asset and either (i) the Group has transferred substantially all the risks and rewards relating to the instrument, or (ii) the Group has neither transferred nor retained substantially all the risks and rewards relating to the instrument, but has transferred control of the asset.

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, this is treated as derecognition of the original liability and recognition of a new liability. The difference in the respective carrying amounts is recognised in the income statement.

Offsetting of financial instruments
Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

This file is sealed with a digital signature.

Derivative financial instruments and hedge accounting
The Group uses derivative financial instruments, such as interest rate swap and forward currency contract to hedge its foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is enteredinto and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in the fair value of currency derivatives are recognised in the statement of profit or loss as financial income or financial expense. The Group does not apply hedge accounting related to its interest rate swap and forward currency contracts.

Hedge of net investment in foreign operations
The Group aims to hedge its net investments in foreign subsidiaries due to the risk of fluctuations in exchange rates. The net investments consist of equity and some group internal loans. The Group uses its overdraft facilities and long term debt in foreign currency as hedging instrument to hedge its exposure. Gains or losses on the hedging instrument relating to the effective portion of the hedge are recognised as OCI while any gains or losses relating to the ineffective portion are recognised in the statement of profit or loss. On disposal of the foreign operation, the cumulative value of any such gains or losses recorded in equity is transferred to the statement of profit or loss. Reference is made to note 5.1 and 5.5 for more details.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which it wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Cash and short-term deposits
Cash and short-term deposits in the statement of financial position comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value. For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

Fair value measurement
The Group measures financial instruments such as derivatives at fair value at each balance sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

External valuers are involved for valuation of derivate financial instruments. Involvement of external valuers is decided upon annually. For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities based on the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy, as explained above.

Fair-value related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed are summarised in note 5.3 Fair value measurement.

This file is sealed with a digital signature.

Taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in the countries where the Group operates and generates taxable income.

Current income tax relating to items recognised directly in equity is recognised in equity (OCI) and not in the statement of profit and loss.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit and loss
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit and loss
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Government Grants

Government grants, including the Norwegian Skattefunn tax incentive scheme, are recognized in the same year as the government grant are received. Grants are recognized as deductions against the cost that they are intended to compensate. Investment grants are capitalized and recognized systematically over the asset's useful life. Investment grants are recognized either as deferred income or as a deduction of the asset's carrying amount.

Pensions and other post-employment benefits

Remeasurements, comprising of actuarial gains and losses, are recognised immediately in the statement of financial position with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit and loss in subsequent periods.

Consolidated statements of cash flow

The consolidated statements of cash flows are prepared using the indirect method. Cash flows in foreign currencies have been translated into NOK using the exchange rate at the cash flow date.

The seal is a guarantee for the authenticity of the document.

10.2 Changes in accounting policies

The amendments listed below did not have any impact on the amounts in current period and are not expected to significantly affect future periods.

Effective for annual period beginning on or after 1 January 2021.

Interest Rate Benchmark Reform—Phase 2 —amendments to IFRS 4, IFRS 7 Financial Instruments:
The Phase 2 amendments address issues that might affect financial reporting during the reform of an interest rate benchmark, including the effects of changes to contractual cash flows or hedging relationships arising from the replacement of an interest rate benchmark with an alternative benchmark rate. The Interest Rate Benchmark Reform - Phase 2 have not affected the Group in 2021.

10.3 Standards issued but not yet effective

Standards and interpretations that are issued up to the date of issuance of the consolidated financial statements, but not yet effective, are disclosed below. The Group's intention is to adopt the relevant new and amended standards and interpretations when they become effective, subject to EU approval before the consolidated financial statements are issued.

No standards, interpretations or amendements published at the balance sheet date are expected to have significant effect on the group.

Total non-current interest bearing loans and borrowings			1 063 277	984 515

Long term loan
Glace HoldCo AS has received a long term loan from related parties within the Triton Group.
The interest rate is fixed at 8% per annum. According to the agreement any accrued interest shall not be required to be paid out in cash. On each anniversary of the loan agreement, the accrued interest for the previous year, that is not paid out in cash, will be added to the principal amount of the loan and will bear interest at 8% per annum. This year's change at carrying amount relates to this year's interest.

Glace HoldCo AS may repay the principal amount, in whole or in part together with all accrued but unpaid interest, before final maturity day.
Final maturity day is 22.12.2037.

13 Related party transactions

Related parties are Group companies, major shareholders, board and senior management in the parent company and the group subsidiaries. Note 11 provides information about the subsidiary of Glace HoldCo AS.

All transactions within the Group or with other related parties are based on the principle of arm's length.

Glace HoldCo AS has a long term loan agreement towards related parties within the Triton Group. See note 3 for more information.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

Note 14 - Significant accounting policies

Glace HoldCo AS is a company incorporated and domiciled in Norway. Glace HoldCo AS was established in 2017, with the purpose to own shares in GLX Holding AS. The registered adress is c/o Triton Advisors (Norway) AS, Kronprinsesse Märthas plass 1, 0160 Oslo. The parent company is Glace MidCo S.à.r.l. The ultimate parent of Glace HoldCo AS is Triton Fund IV, which is located at Jersey.

The financial statements of the company comprise of statements of profit and loss, other comprehensive income, financial position, cash flows, changes in equity, and related notes. The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by The European Union (EU). The financial statements have been prepared on a historical cost basis, and the financial statements are prepared based on the going concern assumption.

Subsidiaries in parent company
'Subsidiaries' refers to companies in which Glace HoldCo AS normally has a shareholding of more than 50%, and in which the company has a controlling interest. Investments in subsidiaries are accounted for using the cost method. The investments are valued at cost less impairment losses. Investments in subsidiaries are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may exceed the fair value of investment.

Current versus non-current classification
The Company presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle,
- Held primarily for the purpose of trading,
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in the normal operating cycle,
- It is held primarily for the purpose of trading,
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

Provisions
Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Dividend distribution to shareholders
Glace HoldCo AS recognises a liability to make distributions to equity holders when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws of Norway, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

Financial instruments
A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Classification of financial instruments
The Company's financial instruments are grouped in the following categories:

- Fair value with changes in value through profit or loss (FVTPL)
- Amortised cost (AC)

The classification is dependent on the type of instrument and the purpose for which the investments were acquired or originated.

Fair value through profit or loss is the classification of instruments that are held for trading or for which the entity's business model is to manage the financial assets on a fair value basis i.e. to realise the asset through sales as opposed to holding the asset to collect contractual cash flows.

Amortised cost applied to instruments for which an entity has a business model to hold the financial asset to collect the contractual cash flows. The characteristics of the contractual cash flows are that of solely payments of the principal amount and interest.

Financial assets and liabilities measured at amortised cost is the category most relevant to the company. This category generally applies to interest-bearing loans and other financial liabilities.

The company has the following financial instruments:

Financial liabilities (AC): Includes the company's other non-current interest bearing liabilities and current liabilities.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

Initial recognition and subsequent measurement

Financial liabilities (AC): These liabilities are measured at the amount recognised at initial recognition minus principal repayments, plus or minus the cumulative amortisation of any difference between that initial amount and the maturity amount. Interest income is calculated using the effective interest method (EIR) and is recognised in profit and loss. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR.

Derecognition of financial instruments
A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, this is treated as derecognition of the original liability and recognition of a new liability. The difference in the respective carrying amounts is recognised in the income statement.

Cash and short-term deposits
Cash and short-term deposits in the statement of financial position comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

Fair value measurement
The Company measures financial instruments such as derivatives at fair value at each balance sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:
- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:
Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

External valuers are involved for valuation of derivate financial instruments. Involvement of external valuers is decided upon annually. For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities based on the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy, as explained above.

Fair-value related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed are summarised in note 5 Fair value measurement.

Taxes

Current income tax
Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities.
Current income tax relating to items recognised directly in equity is recognised in equity (OCI) and not in the statement of profit and loss.

Deferred tax
Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognised for all taxable temporary differences.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Statements of cash flow
The consolidated statements of cash flows are prepared using the indirect method.

This file is sealed with a digital signature.

Note 15 - Changes in accounting policies

The amendments listed below did not have any impact on the amounts in current period and are not expected to significantly affect future periods.

Effective for annual period beginning on or after 1 January 2021:

Interest Rate Benchmark Reform—Phase 2 —amendments to IFRS 4, IFRS 7 Financial Instruments:
The Phase 2 amendments address issues that might affect financial reporting during the reform of an interest rate benchmark, including the effects of changes to contractual cash flows or hedging relationships arising from the replacement of an interest rate benchmark with an alternative benchmark rate. The Interest Rate Benchmark Reform - Phase 2 have not affected the company in 2021.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity of the document.

To the General Meeting of Glace Holdco AS

Independent Auditor's Report

Opinion

We have audited the financial statements of Glace Holdco AS, which comprise:

- The financial statements of the parent company Glace Holdco AS (the Company), which comprise the statement of financial position as at 31 December 2021, the statement of profit and loss, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and

- The consolidated financial statements of Glace Holdco AS and its subsidiaries (the Group), which comprise the consolidated statement of financial position as at 31 December 2021, the consolidated statement of profit and loss, statement of other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion:

- the financial statements comply with applicable statutory requirements,

- the financial statements give a true and fair view of the financial position of the Company as at 31 December 2021, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the EU, and

- the financial statements give a true and fair view of the financial position of the Group as at 31 December 2021, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the EU.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company and the Group as required by laws and regulations and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The Board of Directors (management) is responsible for the information in the Board of Directors' report. The other information comprises information in the annual report, but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the information in the Board of Directors' report.

In connection with our audit of the financial statements, our responsibility is to read the Board of Directors' report. The purpose is to consider if there is material inconsistency between the Board of Directors' report and the financial statements or our knowledge obtained in the audit, or whether the Board of Directors' report otherwise appears to be materially misstated. We are required to report if there is a material misstatement in the Board of Directors' report. We have nothing to report in this regard.

KPMG AS, a Norwegian limited liability company and member firm of the KPMG network of independent member firms affiliated with KPMG International Cooperative ("KPMG International"), a Swiss entity.

Bergen	Haugesund	Sandefjord	Trondheim
Bodø	Knarvik	Sandnessjøen	Tynset
Drammen	Kristiansand	Stavanger	Ålesund

Based on our knowledge obtained in the audit, it is our opinion that the Board of Directors' report

- is consistent with the financial statements and
- contains the information required by applicable legal requirements.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with International Financial Reporting Standards as adopted by the EU, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's and the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error. We design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's or the Group's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- conclude on the appropriateness of management's use of the going concern basis of accounting, and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company and the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and the Group to cease to continue as a going concern.
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves a true and fair view.
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial

statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Tillatelse til å utarbeide årsregnskap og årsberetning på engelsk språk for Glace HoldCo AS, org.nr. 919 505 184

Vi viser til deres brev av 7. mars 2018 der det søkes om dispensasjon fra kravet til å utarbeide årsregnskap og årsberetning på norsk språk for Glace HoldCo AS.

Skattedirektoratet gir på bakgrunn av en konkret vurdering Glace HoldCo AS dispensasjon fra kravet til å utarbeide årsregnskap og årsberetning på norsk språk, jf. regnskapsloven § 3-4 tredje ledd. Dispensasjonen gjelder så lenge opplysningene som vedtaket baserer seg på ikke endres vesentlig.

Kopi av dette brevet må sendes Regnskapsregisteret i Brønnøysund sammen med årsregnskapet. Det påligger den regnskapspliktige å dokumentere ved dette brev at tillatelsen er gitt.

Bakgrunn
Glace Holdco AS er heleid av det Luxemburgbaserte selskapet Glace MidCo S.á.r.l, og inngår i et internasjonalt investeringsfond (Triton fond IV). Selskapets virksomhet er å eie 100 % av aksjene i GLX Holding AS. Selskapene inngår i Glamox konsernet som er et norsk industrikonsern som utvikler, produserer og leverer belysningsløsninger globalt til profesjonelle aktører. Selskapet har ingen ansatte eller ekstern finansiering. Arbeidsspråket er engelsk.

Det er vurdert slik at det ikke finnes andre regnskapsbrukere som negativt vil påvirkes av at årsregnskap og årsberetning utarbeides på engelsk språk. En norsk oversettelse vil kun ha til formål å oppfylle regnskapslovens språkkrav.

Skattedirektoratets vurdering
Etter regnskapsloven § 3-4 tredje ledd skal *"årsregnskapet og årsberetningen ... være på norsk. Departementet kan ved ... enkeltvedtak bestemme at årsregnskapet og/eller årsberetningen kan være på et annet språk."*

I Ot. prp. nr. 42 (1997-1998) Om lov om årsregnskap m.v., er det uttalt følgende om regnskapslovens formål, jf. pkt. 1.1:

> *"Regjeringen har som siktemål at regnskapsloven skal bidra til informative regnskaper for ulike grupper av regnskapsbrukere. Regnskapsbrukerne er dels investorer og kreditorer som*

tilfører kapital til foretakene, og dels andre grupper som har interesse av å vite hvordan foretaket drives, f.eks. de ansatte og lokalsamfunnet. Informasjonen til kapitalmarkedet skal gi grunnlag for riktig prising av finansielle objekter. Riktig prisdannelse på aksjer er en forutsetning for at ressursbruken i samfunnsøkonomien skal bli best mulig. Gode regnskaper vil også gjøre det vanskeligere for markedsdeltakere å ta ut spekulasjonsgevinster med basis i skjevt fordelt informasjon."

Det fremgår således at et av hovedformålene med regnskapsloven er å bidra til *"informative regnskaper for ulike grupper av regnskapsbrukere"*. Regnskapsbrukere vil omfatte, jf. uttalelsen i proposisjonen, blant andre investorer, kreditorer, ansatte og lokalsamfunnet.

Det er etter Skattedirektoratets vurdering derfor avgjørende ved vurdering av om dispensasjon fra kravet til å utarbeide årsregnskap og/eller årsberetning på norsk kan gis, at det ikke foreligger mulige brukere av regnskapsinformasjon som blir vesentlig berørt negativt ved en eventuell dispensasjon.

Det er særlig hensynet til brukerne av regnskapsinformasjon som skal vurderes ved en dispensasjonssøknad. I denne vurderingen har Skattedirektoratet lagt vekt på at selskapet er heleid av et utenlandsk selskap. Selskapet inngår i et norsk konsern som inngår i porteføljen til et utenlandsk investeringsfond. Konsernet opererer internasjonalt mot profesjonelle aktører, og arbeidsspråket er engelsk.

Vennligst oppgi vår referanse ved henvendelser i saken.
