

## ÅRSREGNSKAPET FOR REGNSKAPSÅRET 2021 - GENERELL INFORMASJON

### Enheten

Organisasjonsnummer: 896 696 262  
Organisasjonsform: Aksjeselskap  
Foretaksnavn: DEEPOCEAN GROUP HOLDING AS  
Forretningsadresse: Ruseløkkveien 26  
0251 OSLO

### Regnskapsår

Årsregnskapets periode: 01.01.2021 - 31.12.2021

### Konsern

Mørselskap i konsern: Ja  
Konsernregnskap lagt ved: Ja

### Regnskapsregler

Regler for små foretak benyttet: Nei  
Benyttet ved utarbeidelsen av årsregnskapet til selskapet: Regnskapslovens alminnelige regler  
Benyttet ved utarbeidelsen av årsregnskapet til konsernet: IFRS

### Årsregnskapet fastsatt av kompetent organ

Bekreftet av representant for selskapet: Eirik Røkenes Vrålstad  
Dato for fastsettelse av årsregnskapet: 26.04.2022

### Grunnlag for avgivelse

År 2021: Årsregnskapet er elektronisk innlevert  
År 2020: Tall er hentet fra elektronisk innlevert årsregnskap fra 2021

*Det er ikke krav til at årsregnskapet m.v. som sendes til Regnskapsregisteret er undertegnet. Kontrollen på at dette er utført ligger hos revisor/enhetens øverste organ. Sikkerheten ivaretas ved at innsender har rolle/rettighet for innsending av årsregnskapet via Altinn, og ved at det bekreftes at årsregnskapet er fastsatt av kompetent organ.*

▼ FUND

A world-leading ocean services provider, enabling the energy transition and sustainable use of ocean resources.

We live by our guiding values of **Integrity** and **Teamwork**.

We ACT with a can-do Attitude, striving to achieve the best possible, long-term results for our people, our customers and our stakeholders.

We ACT with the Courage to embrace new challenges, to stop unsafe practices, always compliant and to shift boundaries with innovative solutions.

We ACT as one Team, promoting the continuous development of one another in a learning and evolving organization for the benefit of ourselves and our customers.

## Strategic objectives

- Strengthen DeepOcean's technology-based platform for growth, and thereby unlock value for customers.
- Continue strong focus on ESG and drive tangible initiatives towards more sustainable operations for our customers.
- Defend leading position in core markets (O&G, Recycling) and derive growth from emerging markets (Renewables, Ocean Minerals and other Ocean Solutions).
- Generate profitable growth, through operational excellence as well as a continued cost focus.
- Emphasize development of DeepOcean's core resources, its employees.

# Letter from the CEO

Annual Report 2021

Dear all,

I would like to take this opportunity to share my reflections on a good year for DeepOcean, and provide my views on the years to come.

Our vision is to be a world-leading ocean services provider, enabling the energy transition and sustainable use of ocean resources and I'm proud to say that we are delivering on the group's vision. There is obviously still much to do when it comes to the energy transition and sustainable use of the ocean space, but DeepOcean is certainly moving towards a greener future.

Following a critical period of transition in 2019 and 2020, we successfully completed the UK Cable Lay and Trench restructuring process in January 2021, which enabled the group to execute on its profitable growth strategy. However, a restructuring like the one we undertook in the UK is not something we undertake lightly despite its necessity, and I cannot stress enough the importance of the restructuring for the future financial health of the overall business. The restructuring affected a large number of our long serving and valued

employees. These are colleagues that I and many other DeepOcean employees had the pleasure of working alongside for many years, which made the decision to restructure a particularly difficult one. However, I'm pleased to see that a vast majority of these former colleagues have found new work.

Following the restructuring, we amended and restated our group financing agreement with our trusted banking partners. This agreement secured the group's financing needs for the years to come and improved the terms in DeepOcean's favor, enabling us to focus on our strategy for growth.

The pandemic continued to impact us in 2021, both in our onshore and offshore departments. Thankfully, our procedures have throughout the pandemic been of excellent quality and thus have seen limited impact on our business operationally. With the global vaccine roll-out and milder mutants of the original virus, I hope 2022 can be the year when pandemic is reduced to a thing of the past.

We have made significant steps towards a greener future during 2021.

Four of the vessels in our portfolio have been retrofitted with battery packs, two of those were completed in 2021, making them hybrid vessels, which has significantly reduced emissions on our offshore projects. I'm proud of our work here with the vessel owners to implement tangible actions towards a cleaner future. Our fleet of vessels is one of the greenest offshore fleets available, having the most battery hybrid vessels in our market segment, and we continue to effectively serve our clients while still maintaining lower emissions than our competitors.

In addition, our onshore remote capabilities, through our remote operations center, enable us to reduce our offshore carbon footprint, which I'm proud to say, is a capability that we are currently expanding on, and where more news is likely to come in the near future.

Furthermore, we made our first investment into ocean minerals with the acquisition of a stake in Adepph Minerals in the summer of 2021. The ocean minerals market is in the early stages of what could potentially be a significant future market for Norway and could prove to be an excellent complementary market for the resources,

*"The past year has seen many key milestones achieved for our regions."*

know-how and capabilities of DeepOcean and its workforce. As a stakeholder in Adepph Minerals we can contribute towards energy transition and sustainable use of ocean resources. Together.

DeepOcean is also proud of partnering with Aker Solutions and Solstad Offshore in Windstaller Alliance that was established during the autumn of 2021. Windstaller Alliance is combining the expertise of the three offshore industry leaders to deliver a highly flexible service offering for offshore renewables and marine operations. The alliance is currently working on exciting tenders that, if won, will provide the partners with great opportunities in the global shift towards a greener future for us all.

While periods of change pose a number of challenges, I personally view it as an opportunity for us and the entire industry to take sustainable steps towards a greener future, which in time will create good

business opportunities for DeepOcean and expand our service offering for the better. I relish the opportunity to lead our company in this direction, and believe we are well-positioned to take our part in but also full business advantage of the energy transition.

The past year has seen many key milestones for our regions.

Our largest region, Europe, has delivered strong operational and financial results. It is particularly important to me to see our Aberdeen office, which services the UK continental shelf, growing significantly and this growth is expected to continue

throughout 2022 on the back of some key order awards, particularly in the recycling segment. At the same time our team in Norway, which services the Norwegian continental shelf, continued to prove that it is the financial and operational backbone of our group through strong performances on their projects. In 2021 and early 2022, our Norway operations have also managed to secure key awards and frame agreement extensions with its core customers, such as AkerBP, Equinor and ConocoPhillips.

In our Africa region, headquartered in Frontignan, we have had two projects on a scale that was previously unattainable for us

DEEPOCEAN

Together.

DeepOcean and has been vital in delivering the great year that we now put behind us. DeepOcean is full of talented people that I am proud to call my colleagues. We have innovative specialists in our business that contribute to making the business greener, more profitable and better positioned in the global market to claim our share of what I believe is a very exciting and prosperous industry. They are a big inspiration to me, and a key asset for DeepOcean that I believe will be our most important asset when tackling the issues ahead of us and delivering on our strategy.

We continue to live by our guiding values of Attitude, Courage, and teamwork, and look forward to the year ahead of us!

Øyvind Mikkelsen  
Chief Executive Officer  
DeepOcean Group

NetSuite is a cloud-based ERP system and has many possibilities that a few years ago seemed unattainable, and really is driving our internal process improvements for the good of the company. During the first half of 2021 and on the back of the recent UK Cable Lay and Trench restructuring process, we have launched our new group-wide strategy Management as well as various working groups across the organization have spent a significant amount of time and effort in defining DeepOcean's way forward and the board of directors has signed off on this strategic direction. The key elements of our strategy are around becoming a technology enabled and ESG focused ocean services provider, servicing all ocean industries such as offshore renewables, ocean minerals, oil and gas and others. As I have laid out above, we have taken significant first steps on implementing this strategy (Adepth Minerals, Windstatter Alliance, hybrid vessels, remote capabilities, etc.) and the whole organization is working hard on pushing into this direction.

Just a few weeks ago, we launched a new group-wide branding profile and a new website to improve our internal and external communication, as well as to align this with our updated strategy.

Our dedicated employees have shown great resilience through a tough period for

in that region, and it goes to show, that our business there might well be a key source of future growth for DeepOcean. Furthermore, 2021 has been a year of customer diversification and the building of strong relationships with new and existing customers. This is evident for example through key work performed for Trident in Equatorial Guinea.

In our Americas region we have also seen good developments during 2021. Mexico, headquartered in Ciudad del Carmen, has delivered strong performance in 2021, driven by trenching work performed by DeepOcean's UT-1 jet trencher, and the team also signing an extension with a key client for leasing out the Arto of Grande vessel for projects in the Gulf of Mexico which secures the backlog for Mexico for a good time to come. Our US office, headquartered in Houston expanded its customer base in 2021, which is also reflected in a revenue step-up. The team has also managed to sign a key frame agreement with a long-standing customer and I remain confident in our team's ability to further expand our business in the US, Mexico and the wider region in the years to come.

We have had two exciting implementations for the group during the first quarter of 2021. We implemented Oracle NetSuite as the group-wide ERP system on 1 March 2021.

# Board of Directors' Report

Following the successful completion of the UK CL&T business restructuring in 2021, DeepOcean defined new ambitions for revenue growth, increased profitability and cash generation. The company delivered on these targets in 2021. The transition journey is on track towards a growing proportion of revenues deriving from renewables and low-carbon solutions for oil and gas.

Following the successful completion of the UK business restructuring in 2021, DeepOcean defined new ambitions for revenue growth, increased profitability and cash generation. The company delivered on these targets in 2021. The transition journey is on track towards a growing proportion of revenues deriving from renewables and low-carbon solutions for oil and gas. Building on over 20 years of operational excellence, DeepOcean is a world-leading ocean services provider, enabling the energy transition and sustainable use of ocean resources.

DeepOcean offers companies within the global industries of oil and gas, offshore renewables, ocean solutions, and ocean mining a full range of services:

- Survey (Monitor and prepare the seabed)
- Engineering, Project Management & Installation

- Maintain (inspect, maintain & repair)
- Recycle (reclaim original seabed conditions)

Our global team of experts is at the forefront of remote and unmanned operations and digitally enabled services. Supported by an extensive tool and technology pool, they drive cost-efficient, safe and sustainable operations.

DeepOcean has a CO GREEN attitude continuously looking to make our customers' operations more sustainable, through reducing both carbon footprint and costs.

This strong portfolio of services, coupled with a fleet of 18 owned and chartered vessels and an extensive mission equipment portfolio comprising of 50+ subsea assets, such as ROVs, trenchers, module handling systems as well as an extensive tool pool, enables DeepOcean to bundle its subsea

services to deliver cost-effective, tailored solutions to meet individual client needs.

DeepOcean Group Holding AS and its subsidiaries (commonly referred to as DeepOcean or the group) is independent of any equipment, technique or manufacturer and therefore can focus on the best solutions for its clients. With a global track record for safety, cost-efficiency, flawless operations, and innovation, DeepOcean is the preferred pure play subsea service provider for its oil and gas as well as renewable energy customers across the globe.

DeepOcean employs approximately 1,000 people in 10 countries. The corporate head office is in Oslo, Norway.

DEEPOCEAN

Board of Directors' Report

## Partnerships & collaboration

Annual Report 2021

Forming partnerships and collaborating with prospective customers and suppliers of technologies and solutions are central to DeepOcean's strategy. During 2021, DeepOcean formed a new offshore wind alliance and acquired a significant share in Aceph Minerals, a company operating in the ocean mineral space.

DeepOcean acquired a significant share in Aceph Minerals in July 2021. Aceph Minerals is a company focused on sustainable exploration and extraction of marine minerals. As a first subsea service provider to enter the ocean minerals space, DeepOcean is at the forefront of sustainable use of ocean resources and takes active steps towards the energy transition.

Aceph's stated mission is to power the low carbon transition.

DeepOcean expects to conduct a planned environmental research expedition in collaboration with DeepOcean, the University of Bergen and Seabeo Solutions by early 2023. This expedition has been positively received by its clients & the Norwegian Petroleum Directorate with confirmed funding awarded.

Winstaller Alliance was established in October 2021 and is part-owned by DeepOcean, Akor Solutions and Solitas Offshore. Winstaller Alliance is combining the expertise of these offshore industry leaders to deliver a highly flexible service offering for offshore renewables and marine operations.

Winstaller Alliance is aiming to provide a cost-efficient and comprehensive service offering within offshore renewables.

throughout the lifecycle of an offshore wind development and other offshore renewables segments. This is achieved by cutting the amount of supplier interfaces, thereby reducing technical and commercial project risk, as well as execution time through better integration of services, project management and maritime asset utilization.

DeepOcean uses extensive experience from offshore renewables, and leasing dedicated assets for the renewables markets, including tenders and cable repair sprays.

Furthermore, DeepOcean provides the alliance with specialized subsea installation and service solutions for offshore renewables through our employees, and more than 50 ROVs.

DEEPOCEAN

Reduce CO<sub>2</sub> emissions  
45%

The ESC Plan addresses the key areas addressed above and one of the key pillars of the ESC strategy is to reduce CO<sub>2</sub> emissions from our own operations as follows:

- 45 percent reduction by 2030, based on our 2020 emissions
- A net-zero company by 2040

To achieve the above targets, DeepOcean has taken immediate action and attained the targets for 2021. DeepOcean achieved a 12.3% reduction in carbon intensity (kg per hour in operation) versus a 2021 target of 10% reduction. This was partially achieved by retrofitting two vessels with battery packs – Ecca Flora and Ecca Fauna.

A secondary factor in achieving the carbon reduction was the increased use of eco speed for its vessels. The speed a vessel travels has a direct impact on carbon emissions and fuel efficiency. Eco speed (7 knots) reduces fuel consumption by 30% and is the default for all DeepOcean operated vessels, unless responding to an emergency. Since 2021, this is a standard in our contracts with clients.

The rationale and benefits, both in financial and carbon terms have been demonstrated to our clients. However, DeepOcean will further emphasize this in 2022, with the sharing of key data and capabilities to clients to illustrate the savings made in carbon costs and taxes.

In 2021, DeepOcean commissioned an assessment of its ESC maturity from a leasing management consultancy. This assessment has highlighted areas of high performance and areas where improvement is required. The areas of improvement will be a key focus for DeepOcean in 2022 and are captured in the aforementioned ESC plan and actions.

In 2021, DeepOcean commissioned a thorough and independent 3<sup>rd</sup> party materiality assessment. The assessment identified the ten key pillars of DeepOcean's ESC strategy which were then validated by the DeepOcean leadership team.

Sustainability at DeepOcean means being a supplier that accelerates the transition to sustainable energy production by making responsible business decisions that create value while protecting the environment and contributing to the good of society.

DeepOcean is guided by a sustainability mindset in everything it does. The company ensures safe operations for its people and the environment and has robust programs in the social and governance areas. In 2021, DeepOcean became a participant of the UN Global Compact (UNGC), committing ourselves to taking a principles-based approach to doing business and to operating in ways that meet fundamental responsibilities in the areas of human rights, labor rights, environment and anti-corruption.

At DeepOcean, we strive to be good stewards of the natural world. The environmental impacts of our operations and maintenance programs are our most material issue. With regard to the environment, DeepOcean has taken a leadership position in its sector, achieving ISO 50001 for its energy management system and ISO 14001 for its environmental management system – key to understanding the ecological impact of DeepOcean's operations and how to then address potential reductions and improvements.

DeepOcean's Business Strategy & ESC Plan provides a pathway to ensure that it meets emissions targets, support clients in reaching their goals, and further develop the company's low-carbon solutions.

DEEPOCEAN

## Corporate governance

Robust corporate governance at DeepOcean will ensure sustainable operations and value creation over time to the benefit of shareholders and other stakeholders. Corporate governance is a framework of processes, mechanisms, and responsibilities for managing the business and making sure the right objectives and strategies are set and implemented with results that can be measured and followed up.

Robust governance is the foundation of any successful business. DeepOcean sets high standards for the company and seeks to work and partner with those who share common values.

The management and the Board of Directors are responsible for ensuring that the company conducts business using sound corporate governance, and sets the standards for corporate governance, ensuring these reflect the Norwegian Code of Practice for Corporate Governance.

DeepOcean's policies, programs and day-to-day practices are designed to ensure that we comply with all legal and regulatory requirements in every territory in which we operate.

The key pillars to DeepOcean's governance strategy are as follows:

- Business Conduct and Ethics Policy
- Anti-bribery and corruption program
- Reporting of concerns – "speak up culture"
- Data privacy and cybersecurity
- Environmental policies

DeepOcean's Business Conduct and Ethics Policy sets out the key parameters for corporate responsibility in our business, globally. It describes the overarching principles of ethics, accountability and openness, and compliance with laws.

In particular, it details DeepOcean's commitment to gifts and hospitality, use of company assets, conflicts of interest, fair competition, accurate reporting, anti-money laundering, and confidential information. All DeepOcean personnel are trained on business conduct and ethics through a dedicated online training module.

DeepOcean is acutely aware that bribery and corruption are key risk factors in the industry. As such, DeepOcean operates to the highest level of integrity within all markets to protect against the risk of

corruption. This is fundamental to the Company's success as an innovative and sustainable market participant. DeepOcean safeguards against corruption by way of an anti-bribery and corruption program, which consists of mandatory online training and classroom seminars for all employees and hired in staff. DeepOcean has a zero-tolerance policy for any form of bribery or corruption.

DeepOcean expects and actively encourages our personnel to have the courage to openly raise, and without the fear of reprisal, concerns that they may have, whether this may pertain to unethical or illegal behavior, issues of health and safety, breaches of our Business Conduct and Ethics Policy or other policies.

DeepOcean maintains a third-party reporting channel, which directs reports to our Head of Compliance as well as our chairman. This channel provides an option for those who wish to raise such matters in strict privacy or anonymously. It also provides the opportunity for a moderated dialogue between our Compliance Department and the reporter.

DeepOcean's current Privacy Policy (Binding Corporate Rules) has been in place since 2018 and guides the processing of personal data in the group. In 2021, we experienced no breaches of data.

In addition, this year, DeepOcean commenced an audit of our cybersecurity systems, practices, and procedures, with a view to receiving the report and implementing measures to address any key gaps that are identified.

The directors and officers of DeepOcean Group Holding AS are covered under a DeepOcean Group Director & Officer's Liability Insurance (D&O). The insurance covers personal legal liabilities including defense- and legal costs. The officers and directors of the parent company and all subsidiaries globally (owned more than 50 percent) are covered by the insurance. The cover also includes employees in managerial positions or employees who become named in a claim or investigation.

## Risk

DeepOcean's global footprint, operations and exposure to energy markets and a volatile commodity price provides both opportunities and risks that may affect the company's operations, performance, finances, reputation and future.

It is evident that external risk factors such as pandemics, market risk, supply chain risks, cybercrime, compliance and integrity risks, political risks, risks related to civil or political unrest including war, and climate related risks may have a significant adverse impact on the company.

These risk factors are further described below.

### Market Risk

The fluctuating commodity price environment and the effects of the COVID-19 pandemic create significant uncertainty for both the activity and financial performance of DeepOcean. The principal market risk factors that contribute to the overall market outlook are outlined below.

Instability in the world economy as a result of COVID-19 pandemic or risks related to civil or political unrest including war, including impacts such as supply chain disruptions

Irregular oil and gas market, changes in supply, demand and storage having an

adverse impact on energy prices which is likely to impact activity levels significantly

Uncertainty regarding future contract awards and their impact on future revenue and profitability

Climate change and speed of the energy transition to renewables and lower carbon economy, including environmental requirements, impact upon oil company activities and the overall development of the market

These factors will influence oil price and oil companies' exploration, development, energy transition, production, investment,

### Operational Risk

DeepOcean executes both reimbursable and fixed-price contracts. Contracts that include fixed prices for all or parts of the contract deliverables are subject to risk of potential cost overruns.

DeepOcean is involved in projects that are both demanding and complex in nature, with projects delivered in harsh and remote offshore locations. This complexity and remote location of project execution can impact upon DeepOcean's ability to deliver on schedule and in accordance with the contract.

This can potentially harm DeepOcean's reputation and therefore impact future

performance and profitability. Operational risks that may have an adverse material impact on the business include, but are not limited to:

- The loss of business from a significant customer, the failure to deliver a significant project as agreed, or alterations to the order backlog
- Supply chain issues such as increased prices, longer lead times, and logistics
- DeepOcean's ability to compete effectively and maintain market positions and sales volumes
- Significant delays or quality issues impacting upon project delivery or performance

### The Situation in Russia and Ukraine

Russia's invasion of Ukraine is deeply concerning with severe humanitarian consequences. The war has significantly impacted the political and security situation, as well as energy and financial markets. At this stage it is impossible to estimate what impact the conflict could have on DeepOcean's markets or operations. DeepOcean has no direct business activity in Russia or Ukraine.

The executive management and board of directors are handling this ongoing event and its development proactively including sanctions and indirect impacts, and are taking actions to mitigate its effect on supply chain and other associated risks.

The safety and security of employees is always a primary focus for DeepOcean.

Board of Directors' Report

DEEPOCEAN

The objective of financial risk management is to manage exposure from financial risks to increase probability of earnings and minimize potential adverse effects on financial performance.

DeepOcean operates globally and is exposed to foreign exchange risk arising from various currency exposures, mainly with respect to USD towards NOK, EUR to USD and NOK to GBP, but is also exposed to PLN and YAF.

Foreign exchange risk arises from future commercial transactions, contractual obligations (assets) liability positions, liabilities and investments in foreign operations. DeepOcean aims to achieve a natural hedge between cash inflows and cash outflows based on different project forecasting to manage and potentially mitigate the remaining foreign exchange risk arising from the commercial decision to execute a certain project.

The foreign currency risk is evaluated at times, board meetings prior to any project award. The potential currency risk is then highlighted to the corporate finance team who will then assess the risk and mitigate a plan for the currency needs.

Currency variation clauses, escalation mechanisms and currency options are also used to mitigate contingent currency exposures in tenors.

Liquidity risk is the risk that the company is unable to meet the obligations associated with its financial liabilities. The corporate finance team assesses financial flexibility by forecasting short term cash flow needs and longer term needs while maintaining sufficient liquidity reserves and available credit lines.

Historically, liquidity risk has been a major concern for DeepOcean due to committed vessel charter obligations that were significantly higher than the current market rates – leading to weak and negative cash flow from projects. This risk has been mitigated by the aforementioned successful completion of the JRC&T business restructuring.

The successful completion of the JRC restructuring also led to a USD 15 million equity injection from the owners and an amendment of the facility agreement with the banks in early 2021. The liquidity requirements of the newly agreed facility are as follows: "Liquidity shall at all times exceed USD 7.5 million until 31 December 2023".

However, the strong financial performance in 2021 and robust cash generation has contributed to an improved balance sheet and visibility. The development in financial covenants is closely monitored, and management does not foresee any breach of covenants.

Credit risk is the risk of financial losses if a customer or counterparty to financial receivables and financial instruments fails to meet contractual obligations.

Financing is completed with reputable and highly rated banks and financial institutions, of which the credit risk is considered to be low. However, banks are becoming more reluctant to provide financing to the oil and gas sector due to the increased ESG requirements. Therefore, it is incumbent on DeepOcean to continue its journey of diversifying into a wider range of energy segments.

The credit risk related to clients' ability to pay is assessed in the tender phase and during execution of a project. The majority of the clients in traditional oil and gas projects are highly rated energy companies, where the credit risk is considered to be limited.

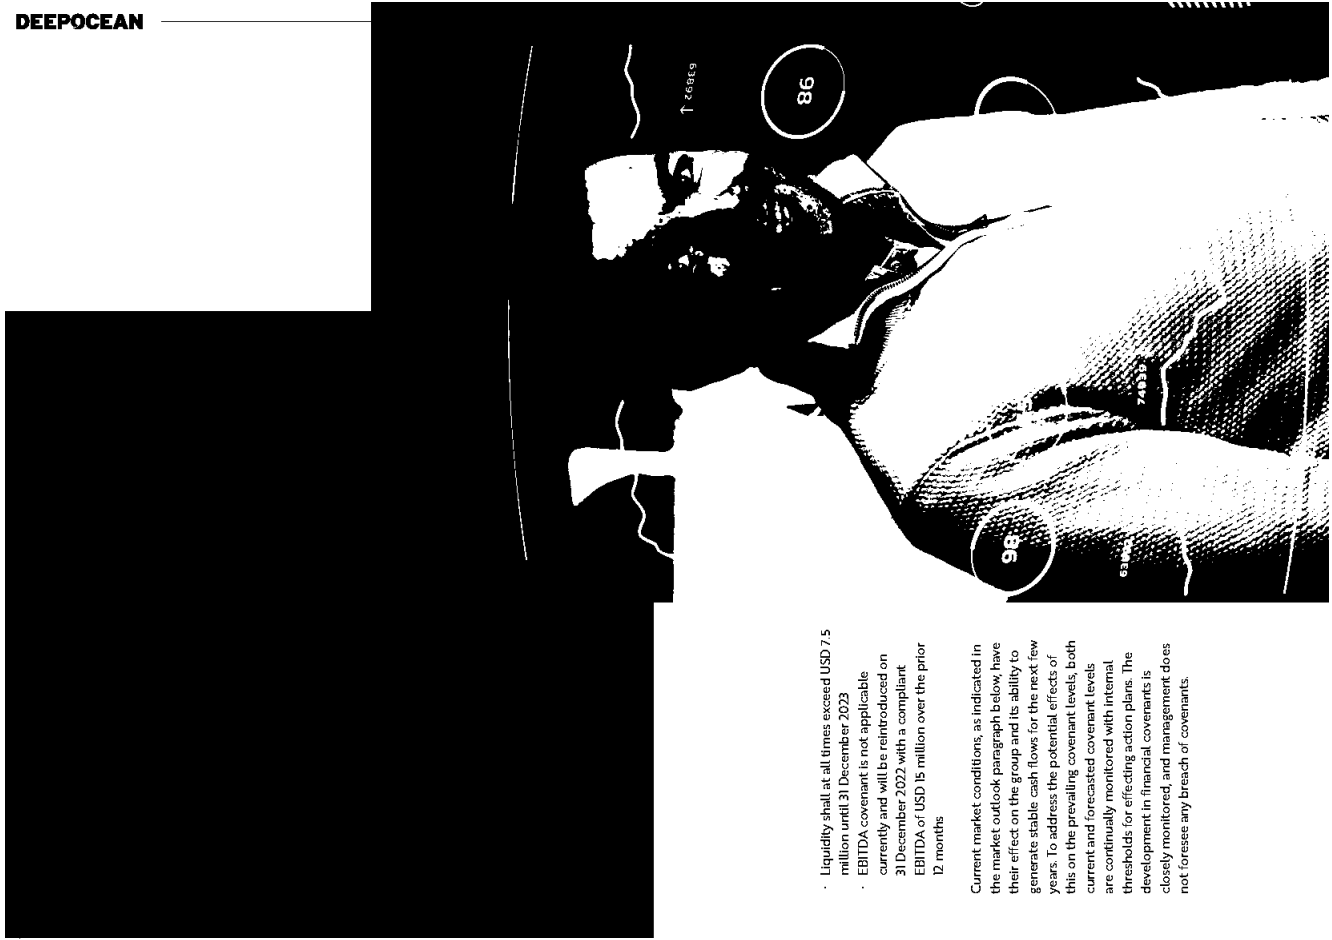

Historically, the portion of receivables not being collectible has been low. However, DeepOcean continues to monitor the credit risk closely, especially for lower rated clients as a result of the ongoing COVID-19 pandemic and general market uncertainties.

DeepOcean is exposed to cost increases due to fluctuation in market prices. However, the cost increase is assessed as part of the overall tender process and escalation clauses are sought with clients prior to contract agreement.

DeepOcean further attempts to reduce price risk by signing contracts with suppliers that have the necessary financial position to complete projects in accordance with the agreed project schedule.

DEEPOCEAN

INFORMASJON

Annual Report 2021

## Organization

The company has four external reporting segments: Europe, Americas, Africa, and Corporate for the purpose of reporting to owners, lenders and other key stakeholders.

## Group Financial Performance

DeepOcean presents its consolidated financial statements in accordance with the International Financial Reporting Standards (IFRS) as adopted by the European Union. All amounts below refer to the consolidated financial statements for the group, unless otherwise stated. The financial statements cover the period from 1 January 2021 to 31 December 2021.

### INCOME STATEMENT

In the period, the company's revenues increased from USD 352 million in 2020 to USD 499 million in 2021, driven by increased activity in all segments, including particularly strong revenue growth in the Europe segment. Operating profit was USD 50 million, compared to USD 14 million in 2020. The higher operating profit was primarily driven by strong project performance across the segments, as well as a reduction in depreciation burden. Profit for the period was USD 98 million, compared to a loss of USD 157 million in 2020.

The Board of Directors has resolved to propose to the annual general meeting that no dividend is distributed for 2021.

### ORDER BACKLOG

The full-year order intake increased to USD 542 million in 2021 from USD 419 million in the prior year. This represented a book-to-bill of 1.1 times. Tender activity remains very high with an estimated tender value of around USD 400 million at year-end.

Our accounting order backlog represents the aggregated value of signed contracts until the end of the relevant contract period (excluding extension options and letters of intent). The order backlog increased by 31 percent during 2021 to USD 272 million at the end of the year, versus USD 208 million a year earlier. DeepOcean expects to recognize USD 172 million of this confirmed backlog in 2022. In addition, DeepOcean has several frame agreements with customers that materialize into projects throughout the year. DeepOcean has internal targets

and high likely backlog expectations for the frame agreements based on historical rates and current market activity.

### FINANCIAL POSITION

Total assets for the group amounted to USD 342 million as of 31 December 2021, compared to USD 307 million in 2020. The company had a cash position of USD 103 million as of 31 December 2021 compared to USD 66 million as of 31 December 2020.

As of 31 December 2021, total interest-bearing debt amounted to USD 99 million (2020: USD 159 million). The group has the option to draw a further USD 4.3 million on its credit facility. For information about credit facility terms, see Note 19. DeepOcean signed a new facility agreement in January 2021 with our trusted banking partners. The key financial covenants as part of a new period loan agreement are as follows:

- Liquidity shall at all times exceed USD 7.5 million until 31 December 2023
- EBITDA covenant is not applicable currently and will be reintroduced on 31 December 2022 with a compliant EBITDA of USD 15 million over the prior 12 months

Current market conditions, as indicated in the market outlook paragraph below, have their effect on the group and its ability to generate stable cash flows for the next few years. To address the potential effects of this on the prevailing covenant levels, both current and forecasted covenant levels are continually monitored with internal thresholds for effecting action plans. The development in financial covenants is closely monitored, and management does not foresee any breach of covenants.

## DEEPOCEAN

— Board of Directors' Report

**AMERICAS**  
The Americas region is based in Houston, USA and Ciudad del Carmen, Mexico. As of 31 December 2021, the segment employed 140 staff. Americas has developed through both internal growth and DeepOcean's acquisition of Delta Subsea in 2017. The segment offers a full range of our services in the Gulf of Mexico and works with some of the most prominent clients in the region.

In the period, the company's external revenue increased from USD 51 million in 2020 to USD 75 million in 2021. This was primarily driven by a major trenching project in Mexico for a key client. Additionally, revenue has grown in the USA due to a growth in new clients and our continued strong performance with ongoing clients.

EBITDA ended at USD 15 million, compared to USD 1 million in 2020. The higher EBITDA was primarily driven by strong project execution on the trenching project in Mexico and improved margin fall through on projects executed in the USA. Operating profit for the period was USD 6 million, compared to negative USD 4 million in 2020.

The full-year order intake increased to USD 105 million in 2021 from USD 47 million in the prior year. This represented a book-to-bill of 1.4 times. Tender activity remains very high with an estimated sales value of around USD 100 million at year-end. The order backlog increased significantly during 2021 to USD 43 million at the end of the year, versus USD 13 million a year earlier. The increased backlog relates to the multi-year extension of the Arbol Grande vessel by our Mexican client, and a renewed frame agreement with a major US client.

**EUROPE**  
The Europe region is based in Haugesund and Stavanger, Norway and Aberdeen, UK. As of 31 December 2021, the segment employed 795 staff. It delivers the full range of our services and Haugesund is also providing services to other regions on commercial initiatives, ship management, procurement and other operational activities.

In the period, the company's external revenue increased from USD 254 million in 2020 to USD 350 million in 2021. This was primarily driven by an increase in project awards with new clients in the UK sector and stable growth in the Norwegian sector.

EBITDA ended at USD 116 million, compared to USD 99 million in 2020. The higher EBITDA was primarily driven by strong project performance across the portfolio, and achievement of key performance and schedule milestones with clients. Operating profit for the period was USD 59 million, compared to USD 31 million in 2020.

The full-year order intake increased to USD 401 million in 2021 from USD 281 million in the prior year. This represented a book-to-bill of 1.1 times. Tender activity remains very high with an estimated sales value of around USD 300 million at year-end. The order backlog increased by 47 percent during 2021 to USD 239 million at the end of the year, versus USD 156 million a year earlier. The increased backlog signifies some key areas of growth for DeepOcean:  
 • A significant portion of the backlog relates to key recycling projects for major clients  
 • A substantial portion of the backlog relates to the growth of the UK sector in the Europe segment

**PARENT COMPANY FINANCIAL STATEMENTS**  
DeepOcean Group Holding AS, the parent company of the DeepOcean group, owns and manages the group's subsidiaries.

DeepOcean Group Holding AS has outsourced all company functions to other companies in the group, mainly DeepOcean Management AS. Assets and liabilities related to the corporate treasury function are held by DeepOcean Group Holding AS.

DeepOcean Group Holding AS had a net profit of NOK 365 million in 2021 due to the reversal of impairment of investment in subsidiaries. The net loss was negative NOK 393 million in 2020, consisting mainly of an impairment of investment in subsidiaries, and in addition to corporate costs and net interest expenses.

More information on the allocation of profits can be found in the income statement of the parent company.

delays and increased costs for securing a replacement. Operating profit for the period was negative USD 7 million, compared to USD 0 million in 2020.

The full-year order intake decreased to USD 36 million in 2021 from USD 45 million in the prior year. This represented a book-to-bill of 0.5 times. Tender activity remains stable with an estimated sales value of around USD 40 million at year-end. The order backlog decreased significantly during 2021 to USD 0 million at the end of the year, versus USD 39 million a year earlier. The current lack of backlog is a major focus for DeepOcean management, and there is a strategy in place to achieve the budget of 2022. DeepOcean expects to sign two major contracts for the Africa segment in early Q2 2022.

**CORPORATE**  
The main aim of Corporate is to hold other group assets and liabilities, such as the corporate functions, legacy entities and our investment in Adeph Minerals AS. The Corporate segment has 25 personnel that are employed in other DeepOcean segments.

**AFRICA**  
The Africa region is based in Frontignan, France and Accra, Ghana. As of 31 December 2021, the segment employed 59 staff.

The segment offers a full range of our services primarily in West Africa and works with some of the most prominent clients in the region. Historically, the majority of the business was focused on Ghana and the joint venture that DeepOcean has with a local partner. However, DeepOcean has since acquired SeaRoar which opened up further opportunities.

In the period, the company's external revenue increased from USD 47 million in 2020 to USD 75 million in 2021. This was primarily driven by two major projects executed in Equatorial Guinea for an important client. This revenue helped to offset the loss of a key frame agreement in Ghana in 2021.

EBITDA ended at negative USD 1 million, compared to USD 19 million in 2020. The EBITDA in 2021 was negatively impacted by quality issues on a major item of equipment and this led to significant schedule

AMOUNTS IN USD THOUSAND	EUROPE		AMERICAS		AFRICA		CORPORATE		DEEPOCEAN

DEEPOCEAN

Aspeeth Minerals technology developments are building a core renewables team is central to the plan of parallel diversifying into a wider range of energy segments. Despite Oil & Gas being forecasted to be the major revenue contributor in the near term, DeepOcean is also gearing up and has proven capabilities to allow it to take a more significant stake in the energy transition. The target for DeepOcean's 5-year plan is that non-oil and gas activities will account for 50% of revenue in 2026. 10% of DeepOcean's revenue in 2021 was derived from non-oil and gas activities.

Unexploded Overwell surveys in 2021. These surveys need to be completed prior to the approval and installation of offshore wind farms. In North America it is expected that Offshore Wind will exceed Oil & Gas, measured by investment in 2022. This is driven by activity on the East Coast of USA. This will provide DeepOcean with many opportunities to diversify its revenue portfolio.

Also within ocean minerals, low-carbon solutions and renewables, DeepOcean is positioning for projects that are expected to pass key decision gates over the coming 24 months. DeepOcean's collaboration on the Winchester Alliance, ongoing investment in

revenue is generated in the market. DeepOcean is also seeing a major increase in the recycling activities in the UK sector. Decommissioning activities have been steady on the rise as more mature oil and gas fields begin to reach the end of their life span. DeepOcean is well placed to capture a significant share of the market and was awarded major projects in 2020 & 2021 for this sector.

In the USA, DeepOcean has seen a significant increase in activities in the Gulf of Mexico in 2021. This increased activity level is expected to remain while the current oil price supports it. There has also been a noticeable increase in activities on the east and west coast of the USA. DeepOcean was awarded a pre-buy survey scope on the west coast of the USA in 2021. Also, on the east coast DeepOcean has conducted JKO

DeepOcean's activity level is still primarily related to the global oil and gas markets, while the business is in parallel diversifying into a wider range of energy segments. Oil prices have strengthened significantly over the second half of 2021. Simultaneously, customers in several key segments have strong drivers to maintain progress for maturing and sanctioning of important prospects.

The Norwegian activity package for new petroleum projects is expected to lead to contract awards for several projects in 2022 and beyond. This will be particularly important for the Subsea Construction and IMA sectors over the next years. DeepOcean is positively exposed to the market as a leading company providing services to clients and as a significant proportion of its

Market Outlook

Investing in research, innovation and technology

DEEPOCEAN

The group is continually working to improve the current product/service portfolio and is developing several new products and services in order to stay competitive and reduce project costs, increased efficiencies, improved operational results in the markets serviced by DeepOcean. 2021 has been a significant year in the progress of DeepOcean's technology and innovation journey. The key areas of progress include:

- Fully operational Remote Operating Center in Haugesund
- Unmanned Surface Vessel (USV)
- Autonomous Inspector Drone (AID)
- Cloud based survey processing
- Research expedition – Adept Minerals

The Remote Operating Center (ROC) has been operational since 2020 and is providing key efficiencies for DeepOcean activities and for our clients. The Remote Operating Center allows enabling onshore

operators and topic experts to control ROVs that have gone offshore to complete various offshore operations. The key benefits include onshoring of offshore activities which leads to reduced cost, reduced emissions and improved safety.

The strong performance in 2021 has increased interest from clients and is leading to the further commercialization of the Remote Operating Center for DeepOcean.

The Unmanned Surface Vessel (USV) project is progressing as planned. DeepOcean's USV will provide an unmanned and remote (from ROC) operated launch platform for a work class ROV – delivering significant cost optimization while also reducing DeepOcean's carbon footprint. DeepOcean has secured significant funding for this project from clients and governmental organizations.

The Autonomous Inspector Drone (AID) project is continuing as planned. Significant progress has been achieved in 2021 and will continue into commercialization in 2022. The AID will increase automation and cost reduction for inspection work. This is ideal for offshore oil & gas fields and windfarm work.

The goal is to re-mobilize the AID to Edda Fauna in Q3 2022 and perform extensive testing and qualification of the system, such that it can be permanently mobilized on the vessel. This is being developed with AkerBP, Argus Remote Systems and Vaerst.

Major clients in the offshore renewables market are showing interest in the AID during tendering currently.

Project HawkEye is a project to improve the survey data processing and ensure it

is all cloud based. DeepOcean is establishing an onshore survey reporting team. This team will be allocated 100% to this project and following targets for 2022:

- User acceptance test of software infrastructure in AWS and Microsoft in Q4 2022
- The company will choose a provider of cloud services and build production-ready environment in Q3 2022
- Cloud processing to be integrated into commercial operations by Q4 2022

The end result of the testing is expected to validate that DeepOcean can work with the data in a cloud environment more efficiently than we do on the vessel today.

The above-mentioned projects show that DeepOcean is a technology-driven independent solution provider in the ocean space. Also, secured funding for these research and technology projects show that

DeepOcean is trusted technology partner by clients and governmental organizations. DeepOcean will continue to invest in research and technology developments as they underpin the growth and strategy plan for the company. As part of this investment, DeepOcean is growing its innovation team in Europe, Africa and Americas.

DEEPOCEAN

Board of Directors' Report

# Health and working environment

DeepOcean is committed to be the employer of choice in our sector. This can only be achieved by safeguarding employee's physical and mental health and achieving zero harm to employees. In 2021, the HSEQ team continued to focus on reducing exposure to health hazards by performing site-specific assessments.

Another priority in 2021 was to care for the mental health of employees during the pandemic. This included efforts to avoid negative effects of long-term use of home office and other precautions. This was done by promoting mental health awareness and coping skills through internal channels for mass communication as well as through face-to-face meetings and on digital platforms.

DeepOcean's global sick leave for 2021 was 5.31 percent. The sick leave in 2020 was 4.90 percent. The increased sick leave in 2021 reflects an increased negative impact of the COVID-19 pandemic.

### SAFETY

DeepOcean operates with a zero-harm mindset and the belief that all incidents can be prevented. DeepOcean utilizes the following key indicators to evaluate performance:

- Lost time incident frequency rate
- Total recordable incident frequency rate
- HIPO count and frequency rate

The lost time injury frequency (LTI) is limited to the number of fatalities and lost time injuries per million employees and does not include other types of injuries. The LTI rate is at a 5-year low of 0.18. DeepOcean incurred 3 lost time incidents in 2021 which all related to hand injuries. This is the same level as 2020.

The total recordable injury frequency rate (TRIF) is the number of fatalities, lost time injuries, alternate work, and other injuries requiring medical treatment per million hours worked. The TRIF is at a 5-year low of 0.53. There were 3 recordable injuries in 2021. In 2020, there was 5 recordable injuries in total, the TRIF being 0.79.

A HIPO is defined as an unplanned HSE incident or near-miss that has the potential severity to cause permanent disability or death. Current HIPO frequency rate

based on 12-month rolling average is 1.08 on 31 December 2021. The HIPO rate on 31 December 2020 was 0.75. The HIPO frequency is higher than the target line.

To further strengthen the safety performance based on current trends, management are emphasizing the need for continued performance of pre-work checks, continued Toolbox Talks to ensure on hands-free operations, correct use of hand tools/aids, using suitable PPE, barrier management and dropped object prevention.

### CYBERCRIME

The risks posed by cyber criminals continues to be a major threat to operations. This risk is managed by corporate IT. The threat landscape is continuously monitored, and necessary steps are taken to safeguard employees, systems, data and products.

Phishing emails remain the most important vector for cyber-attacks. Further measures have been taken to secure email, improve capabilities to identify ongoing malicious activities and increase employee awareness of cyber threats. With smarter products connected to the internet, there is an increased risk to these devices and the systems they are connected to.

### ENVIRONMENT

The oceans cover over 70% of the world, however only 20% of the seabed has been mapped. All life on Earth depends on the health of the planet – and that includes the oceans too. At DeepOcean, we strive to be good stewards of the natural world.

The environmental impact of our operations and maintenance programs is our most material issue. With regard to the environment, DeepOcean have taken a leadership position in our sector, achieving ISO 50001 for our energy management system and ISO 14001 for our environmental management system in 2021.

But we accept that, as stakeholder concerns about the climate crisis and biodiversity loss rise, DeepOcean, along with all businesses, will need to do more to meet expectations.

Emissions from DeepOcean offshore operations account for 95% of our Scope 1 and Scope 2 emissions. In 2020, we set a bold target to reduce our operations total CO2 emissions by 45% by 2030 and to reach

Net-Zero emissions by 2040. DeepOcean achieved a 12% reduction in carbon intensity (kg per hour in operation) versus a 2021 target of 10% reduction as previously mentioned in the ESG section.

DeepOcean believes that the technology it is developing can play an important role in supporting the decarbonization of the economy, delivering solutions and new ways of working that will lower emissions, improve safety and lower costs.

### SAFEGUARDING DIVERSITY AND EQUAL OPPORTUNITY

DeepOcean had 1 019 employees at the end of 2021. The company is strongly committed to the principles of non-discrimination and equal opportunity, regardless of gender, nationality or other factors.

Female participation has traditionally been lacking in the oil and gas industry. This continues to be reflected in the organization, where around 14 percent of the employees are women. The percentage of women in leadership roles was 21 percent in 2021.

DeepOcean strengthened its focus on promoting greater diversity in 2021 through recruiting more female candidates and promoting women to leadership roles. The board of directors and executive management team are not content with the speed of this development, increasing the share of female employees will remain a key priority in 2022.

DeepOcean's workforce represented 36 nationalities and a range of competencies

and insights, benefiting both its partners and the business.

DeepOcean seeks to promote inclusion and diversity in its workforce through clear recruitment requirements, development of individuals and programs supporting equal opportunity in accordance with its people policy and recruitment procedures.

# Declaration

by the Board of Directors and Chief Executive Officer

The Board and Chief Executive Officer have today considered and approved the Annual Report and financial statements for the DeepOcean group and its parent company DeepOcean Holding AS for the calendar year ended on 31 December 2021.

This declaration is based on reports and statements from the Chief Executive Officer, Chief Financial Officer and on the results of the group's business as well as other essential information provided to the Board to assess the position of the parent company and the group.

To the best of our knowledge:  
 • The 2021 financial statements for the parent company and the group have been prepared in accordance with all applicable accounting standards.  
 • The information provided in the financial statements gives a true and fair portrayal of the parent company's and the group's assets, liabilities, financial position and results as of 31 December 2021.  
 • The Board of Directors' Report of the parent company and the group provides a true and fair overview of the development, performance and financial

position of the parent company and the group taken as a whole, and the most significant risks and uncertainties facing the parent company and the group

## Note 1 - General information

The group is a world-leading ocean services provider, enabling the energy transition and sustainable use of ocean resources. Information on the group's structure is provided in Note 27 Group companies. Information on other related party relationships of the group is provided in Note 28 Related parties.

DeepOcean Group Holding AS is a limited liability company incorporated and domiciled in Norway and privately owned. The group's principal office is located at Henrik Ibsensgate 4, Oslo, Norway. The largest shareholder is Tricer Lux BidCo 1 S.a r.l., a company owned 100% by Tricer Holdco S.C.A, an entity controlled by Triton Fund IV, a private equity fund.

The consolidated financial statements of DeepOcean Group Holding AS and its subsidiaries (collectively referred as DeepOcean or the group, and separately as group companies) for the year ended 31 December 2021 were approved by Board of Directors and CEO on 26 April 2022. The consolidated financial statements will be authorized by the Annual General Meeting on 26 April 2022.

Notes to the

## Note 3 – Significant accounting policies

The principal accounting policies applied in the preparation of the consolidated financial statements are set out below. These policies have been applied consistently to all periods presented in these consolidated financial statements, unless otherwise stated.

### BASIS OF CONSOLIDATION

#### Subsidiaries

Subsidiaries are entities controlled by the group. The group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

#### Business combinations

The group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair value of the assets transferred, the liabilities incurred to the former owners of the acquired business, equity interests issued by the group, fair value of any asset or liability resulting from a contingent consideration arrangement, and fair value of any pre-existing equity interest in the subsidiary, identifiable intangible assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair value at the acquisition date. The group recognizes any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognized amounts of acquiree's identifiable net assets.

#### Loss of control

On the loss of control, the group derecognizes the assets and liabilities of the subsidiary, any non-controlling interest and the other components of equity related to the subsidiary. Any surplus or deficit arising on the loss of control is recognized in profit or loss. If the group retains any interest in the previous subsidiary, it is accounted for as investments accounted for using the equity method or as financial asset at fair value

through profit and loss depending on the level of influence retained.

#### Non-controlling interests

Non-controlling interests are measured initially at their fair value at the date of acquisition. Changes in the group's ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

#### Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealized gains and losses or income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealized gains arising from transactions with associates and joint ventures are eliminated to the extent of the group's interest in the entity. Unrealized losses are eliminated in the same way as unrealized gains, but only to the extent that there is no evidence of impairment.

#### DISCONTINUED OPERATIONS

A discontinued operation is a component of the group's business, the operation and cash flows of which can be clearly distinguished from the rest of the group and which: 

- represent a separate major line of business or geographical area of operations
- is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations; or
- is a subsidiary acquired exclusively with a view to resale

Classification as a discontinued operation occurs on disposal, abandonment, termination or when the operation meets the criteria to be classified as held for sale, if earlier. When an operation is classified as a discontinued operation, the comparative statement of comprehensive income has been re-presented as if the operation had

use for this transaction is the "pooling of interest method", and hence the assets and liabilities of all combining parties will be reflected at their pre-acquisition carrying amount. The comparatives in these financial statements are per the Tracer NL Bioco 3 BV 2020 consolidated financial statements.

The accounting policies adopted are consistent with those of the previous financial year. The following standards and interpretations were adopted with effect from 1 January 2021, with no implementation impact on the group's consolidated financial statements:

- COVID-19-Related Rent Concessions (Amendment to IFRS 16)
- Interest Rate Benchmark Reform – Phase 2: Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16

Several amendments standards and interpretations are effective for annual periods beginning after 1 January 2021. The group has not early adopted any new or amended standards and they are not expected to have a significant impact on the group's consolidated financial statements.

adjustments, amounts and percentages may not add up to the subtotal or total. When the functional currency in a reporting unit is changed, the effect of the change is accounted for prospectively.

The preparation of financial statements in compliance with IFRS requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Although management believes these assumptions to be reasonable, historical experience indicates that actual amounts and results could differ from these estimates.

The items involving a higher degree of judgement or complexity, and items where assumptions and estimates are material to the consolidated financial statements, are disclosed in Note 4 Significant accounting estimates and judgements. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised or in any future periods affected.

On 16 December 2021, DeepOcean Group Holding AS merge with Tracer NL Bioco 3 BV, DeepOcean Group Holding AS also beco the assets and liabilities of Tracer NL Bioco 3 BV. Prior to the merge, Tracer NL Bioco 3 BV had merge with Tracer NL Bioco 4 BV, 3 subsidiary of Tracer NL Bioco 3 BV) which in turn had merge with DeepOcean Group Holding BV, a subsidiary of Tracer NL Bioco 4 BV and parent of DeepOcean Group Holding AS).

Both DeepOcean Group Holding AS and Tracer NL Bioco 3 BV were controlled by Tracer Lux Holding S.C.A. at the time of the merge. The merge satisfies the description of a business combination since common control in IFRS 3. The accounting policy

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards as adopted by the European Union (IFRS), their interpretations adopted by the International Accounting Standards Board (IASB) and the additional requirements of the Norwegian Accounting Act and of 31 December 2021. References to IFRS hereafter, should be construed as references to IFRS as adopted by the EU.

#### Going concern basis of accounting

The consolidated financial statements have been prepared on a going concern basis, which assumes that the group will be able to meet the mandatory terms and conditions of its financing facilities as disclosed in Note 24 Capital management.

The consolidated financial statements have been prepared on the historical cost basis, except for the following material items, which are measured on an alternative basis or each reporting date:

- Derivative financial instruments are measured at fair value
- Non-exchange financial instruments at fair value through Profit or Loss (FVTPL) are measured at fair value
- Debt instruments at fair value through Other Comprehensive Income (FVOCI) are measured at fair value
- Net defined benefit (asset) liability is recognised at fair value of plan assets less the present value of the defined benefit obligation

The consolidated financial statements are presented in USD, which is the group's functional currency. All financial information presented in USD has been rounded to the nearest thousand USD (thousand), unless stated otherwise. As a result of rounding

been discontinued from the start of the comparative year.

#### FOREIGN CURRENCY

**Foreign currency transactions and balances**  
Transactions in foreign currencies are translated at the exchange rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the exchange rate on that date. Foreign exchange differences arising on translation are recognized in the income statement. Non-monetary assets and liabilities measured in terms of historical cost in a foreign currency are translated using the exchange rate on the date of the transaction. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to the functional currency at the exchange rates on the date the fair value is determined.

#### Group companies

Items included in the financial statements of each of the group's entities are measured using the currency of the primary economic environment in which the entity operates. The results and financial positions of all the group entities that have a functional currency different from the group's presentation currency are translated into the presentation currency as follows: 

- Assets and liabilities, including goodwill and fair value adjustments, are translated at the closing exchange rate at the reporting date.
- Income statements are translated at the average exchange rate for the year, calculated on the basis of 12 monthly end rates.

## DEEPOCEAN

### CURRENT / NON-CURRENT CLASSIFICATION

of day-rate projects is considered to be the day-to-day delivery of the required service by the vessel to the customer of the company. Promises made in the contract with the customer are assessed according to whether such promises are capable of being distinct, in other words distinct in the context of the contract, and the transaction price allocated accordingly. The group recognizes revenue from day-rate project contracts over time because the customer simultaneously receives and consumes the benefits provided by the group. The revenue is as such recognized linear on a day-by-day basis over the contract period, and the transaction price is estimated at the contract inception, including any variable considerations.

### Lump-sum projects

Lump-sum projects are projects where the group has agreed on a fixed fee for the services to be provided. This can be a mixture of the services as described above. The performance obligation of the group's lump-sum contracts is assessed on a contract-by-contract basis, and based on an evaluation of whether any commitments made in the contract are capable of being distinct in the context of the contract. If the promised goods or services are not distinct, the group combines the good or service with other promised goods or services until it identifies a bundle of goods or services that is distinct. In some cases, that would result in the entity accounting for all the goods or services promised in a contract as a single performance obligation. Hence, the group assesses that the bundle of services provided on lump-sum contracts to be one performance obligation.

The group recognizes revenue from lump-sum project contracts over time because the customer simultaneously receives and consumes the benefits provided. The transaction price is estimated at the contract inception, including any variable consideration.

The revenue is recognized in accordance with the stage of completion of a contract using a cost-to-cost input model to measure percentage of completion. The method relies on the group's ability to estimate

### Day-rate projects

Day-rate projects relate to the activity in which the group and its customer have agreed on a daily fee for the services to be provided by the group in relation to the project. The performance obligation

future costs in an accurate manner. The estimate to complete (ETC) is based on the schedule of the remaining work and its value, and is updated monthly. The reviews monitor actual cost of work performed project to date, the estimated cost to complete and the estimated cost at completion. This enables a reliable estimate for the likely outcome in terms of profitability of each project.

### Variation consideration

If the consideration in a contract includes a variable amount, the group estimates the amount of consideration to which it will be entitled in exchange for transferring the services to the customer. The variable consideration is estimated at contract inception and is constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognized will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

### Contract modifications

A contract modification occurs when the group and the customer approve a change in the contract scope, price or both. The accounting for a contract modification depends on whether distinct goods or services are added to the arrangement, and on the related pricing in the modified arrangement. The group recognizes revenue from contracts with customers arising from variation orders in the case the group concludes that rights and obligations created or changed by a modification are enforceable, considering all relevant facts and circumstances including the terms of the contract.

### Warranty obligations

The group provides warranties related to its performed services. In cases where the group has not met the required criteria in the contract, additional required works are generally for the account of the group. Such assurance-type warranties are accounted for as a provision under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

### Contract balances

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the group performs by transferring goods or services to a customer before payment is due, a contract asset is recognized for the earned consideration that is conditional.

### Trade receivables

A receivable represents the group's right to an amount of consideration that is unconditional.

### Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the group transfers goods or services to the customer, a contract liability is recognized when the payment is made. Contract liabilities are recognized as revenue when the group fulfils the performance obligation under the contract.

### LEASES

At the inception of a contract, the group assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

### Right-of-use assets

The group recognizes a right-of-use asset at the lease commencement date. The group measures the right-of-use asset at cost, less any accumulated depreciation and impairment losses, adjusted for any remeasurement of lease liabilities. The cost of the right-of-use asset comprises:

- The amount of the initial measurement of the lease liability recognized
- Any lease payments made at or before the commencement date, less any incentives received
- Any initial direct costs incurred by the group. An estimate of the costs to be incurred by the group in dismantling and removing the underlying asset, restoring

the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

Subsequently, the right-of-use asset is depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term.

The group applies IAS 36 Impairment of Assets to determine whether the right-of-use asset is impaired and to account for any impairment loss identified.

### Lease liabilities

The lease liability is recognized at the commencement date of the lease. The group measures the lease liability at the present value of the lease payments for the right to use the underlying asset during the lease term that are not paid at the commencement date. The lease term represents the non-cancellable period of the lease, together with periods covered by an option either to extend or to terminate the lease when the group is reasonably certain to exercise this option. The lease payments included in the measurement comprise the following:

- Fixed lease payments (including in-substance fixed payments), less any lease incentives receivable
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date
- The amount expected to be payable by the group under residual value guarantees
- The exercise price of a purchase option, if the group is reasonably certain to exercise that option
- Payments of penalties for terminating the lease, if the lease term reflects the group exercising an option to terminate the lease

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease

payments made and remeasuring the carrying amount to reflect any reassessment or lease modifications, or to reflect adjustments in lease payments due to an adjustment in an index or rate.

The group does not include variable lease payments in the lease liability. Instead, it recognizes these variable lease expenses in profit or loss.

The group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any period covered by an option to terminate the lease if it is reasonably certain not to be exercised. The group applies judgment in evaluating whether it is reasonably certain to exercise an extension option, considering all relevant factors that create an economic incentive to exercise the extension option.

### Short-term leases and leases of low-value assets

The group applies the recognition exemption to its leases that have a lease term of 12 months or less from the commencement date and which do not contain a purchase option (short-term leases). The group also applies recognition exemption to leases that are considered related to low-value assets, mainly IT equipment and office equipment. Lease payments associated with the short-term leases and leases of low-value assets are recognized as expenses on a straight-line basis over the lease term.

### EMPLOYEE BENEFITS

**Defined contribution plans**  
Obligations for contributions to defined contribution pension plans are recognized as an expense in the income statement as incurred.

### Defined benefit plans

The group's net obligation in respect of defined benefit pension plans is calculated

Our objective is to safeguard the Group's ability to continue as a strong partner in the ocean services arena.

are carried at cost, less impairment losses. Assets under construction are reclassified to the relevant asset category upon completion.

Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.

**Subsequent costs**

The group capitalizes the cost of a replacement part or a component of property, plant and equipment when that cost is incurred, provided that it is probable that the future economic benefits embodied with the item will flow to the group and the cost of the item can be measured reliably. All other costs are expensed as incurred.

**Depreciation**

Depreciation is normally recognized on a straight-line basis over the estimated useful lives of property, plant and equipment.

**INTANGIBLE ASSETS AND GOODWILL**

**Goodwill**

Goodwill from acquisitions of subsidiaries and joint ventures is recognized as intangible assets and measured at historical cost less accumulated impairment losses.

**Research and development**

Expenditure on research activities is recognized in profit or loss as incurred. Development expenditure is capitalized only if the expenditure can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable, and the group intends to and has sufficient resources to complete development and to use or sell the asset. Otherwise, it is recognized in profit or loss as incurred.

**Other intangible assets**

Other intangible assets, including customer relationships, backlog, patents, cloud computing assets and trademarks that are acquired by the group and have finite useful lives, are measured at historical cost less accumulated amortization and any accumulated impairment losses.

or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous years. Current tax payable also includes any tax liability arising from the declaration of dividends, recognized at the same time as the liability to pay the related dividend.

**Deferred tax**

Deferred tax is recognized in relation to temporary differences between the carrying amounts of assets and liabilities for financial reporting and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they are reversed, based on the tax rates that have been enacted or substantively enacted at the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realize the tax asset and settle the liabilities simultaneously. Deferred tax assets are recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. Measurement of deferred tax assets are reviewed at each reporting date.

**PROPERTY, PLANT & EQUIPMENT**

**Recognition and measurement**

Property, plant and equipment is measured at historical cost less accumulated depreciation and impairment losses. The cost of assets includes the costs of materials and direct labor, any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located, as well as capitalized borrowing costs. If the components of property, plant and equipment have different useful lives, they are accounted for as separate components.

Property, plant and equipment that are being constructed or developed for future use are classified as assets under construction. Assets under construction

separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. The discount rate is the yield at the reporting date on government bonds or high quality corporate bonds with maturities consistent with the terms of the obligations.

Remeasurement of the net defined benefit liability, which comprises actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income. The group determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognized in the income statement.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in the income statement. The group recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

**INCOME TAX**

Income tax recognized in the income statement comprises current and deferred tax. Income tax is recognized in the income statement except to the extent that it relates to items recognized directly in equity or other comprehensive income.

**Current tax**

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted

**Subsequent expenditure**

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognized in profit or loss as incurred.

**Amortization**

Amortization is calculated to write off the cost of intangible assets less their estimated residual values, using the straight-line method, over their estimated useful lives, and is recognized in profit or loss. Goodwill is not amortized but assessed for impairment annually.

**INTERESTS IN EQUITY-ACCOUNTED INVESTEEES**

Interests in equity-accounted investees comprise associates or joint ventures.

Associates are those entities in which the group has significant influence, but not control or joint control, over the financial and operating policies. Interests in associates are accounted for using the equity method. They are initially recognized at cost, which includes transaction costs. Subsequent to initial recognition, the consolidated financial statements include the group's share of the profit or loss and other comprehensive income of equity-accounted investees, until the date on which significant influence ceases.

**Joint arrangements**

Joint arrangements are classified as either joint operations or joint ventures, depending on the contractual rights and obligations of each investor. The group recognizes its direct right to the assets, liabilities, revenues and expenses of joint operations and its share of any jointly held or incurred assets, liabilities, revenues and expenses. These have been incorporated in the financial statements under the appropriate headings.

**Joint ventures**

Joint ventures are accounted for using the equity method, where interests in joint ventures are initially recognized at cost and adjusted thereafter to recognize

the group's share of the post-acquisition profits or losses and movements in other comprehensive income. When the group's share of losses in a joint venture equals or exceeds its interests in the joint ventures (which includes any long-term interests that, in substance, form part of the group's net investment), the group does not recognize further losses, unless it has incurred obligations or made payments on behalf of the joint venture.

The group determines at each reporting date whether there is any objective evidence that the investment, using the equity method, needs to be impaired. If this is the case, the group calculates the amount of impairment as the difference between the recoverable amount of the investments and its carrying value and recognizes the amount adjacent to share of profit/(loss) of an investee in the statement of profit or loss.

Profits and losses resulting from upstream and downstream transactions between the group and its investments are recognized in the group's financial statements only to the extent of unrelated investor's interests in the investments.

**Joint operations**

The group recognizes its direct right to the assets, liabilities, revenues and expenses of joint operations and its share of any jointly held or incurred assets, liabilities, revenues and expenses, and incorporates this in the financial statements under the appropriate headings.

When the group participates in, but does not have joint control of, a joint operation, it shall also account for its interest in the arrangement in accordance with the above obligations for the liabilities, relating to the joint operation.

**IMPAIRMENT OF NON-FINANCIAL ASSETS**

Non-financial assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the

amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and its fair value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are largely independent cash inflows (cash-generating units). Prior impairments of non-financial assets (other than goodwill) are reviewed for possible reversal at each reporting date.

**FINANCIAL ASSETS, FINANCIAL LIABILITIES AND EQUITY**

On initial recognition, a financial asset is classified as measured at amortized costs, FVOCI or FVTPL. The classification depends on the group's business model for managing the financial assets and the contractual terms of the cash flows.

- A financial asset is measured at amortized costs if the business model is to hold the asset to collect contractual cash flows, and the contractual cash flows are solely payments of principal and interests (SPPI criterion).
- A debt instrument is classified at FVOCI if the business model is both collecting contractual cash flows and selling the financial asset, and it meets the SPPI criterion.
- All financial assets not classified as measured at amortized cost or FVOCI are measured at FVTPL.

Financial assets are not reclassified subsequent to their initial recognition unless the group changes its business model for managing financial assets.

**Trade and other receivables**

Trade and other receivables are generally classified as financial assets measured at amortized costs. They are recognized at the original invoiced amount, less a loss allowance made for credit losses.

The interest rate element is disregarded if insignificant, which is the case for the majority of the group's trade receivables.

**Cash and cash equivalents**

Cash and cash equivalents include cash on hand, demand deposits held at banks and

other short-term highly liquid investments with original maturity of three months or less.

**Trade and other payables**

Trade payables are recognized at the original invoiced amount. Other payables are recognized initially at fair value. Trade and other payables are valued at amortized cost using the effective interest rate method. The interest rate element is disregarded if it is insignificant, which is the case for the majority of the group's trade payables.

**Interest-bearing borrowings**

Interest-bearing borrowings are recognized initially at fair value less attributable transaction costs. Subsequent to initial recognition, interest-bearing borrowings are measured at amortized cost with any differences between cost and redemption value being recognized in the income statement over the period of the borrowings on an effective interest basis.

**Share capital**

Issued shares are classified as equity.

**Impairment of financial assets:**

The group recognizes an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held, or other credit enhancements that are integral to the contractual terms.

For trade receivables and contract assets, the group applies a simplified approach in calculating ECLs. Therefore, the group does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date.

**FINANCE INCOME AND EXPENSE**

Finance income and expense include interest income and expense, foreign exchange gains and losses, dividend income,

be derived by the group from a contract, are lower than the unavoidable costs of meeting the obligations under the contract. The provision is measured at the lower of the expected cost of terminating the contract and the expected net cost of fulfilling the contract. Before a provision is recognized, the group recognizes any impairment loss on the assets associated with the contract.

**STATEMENT OF CASH FLOWS**

The consolidated statement of cash flows is prepared using the indirect method. The consolidated statement of cash flows distinguishes between operating, investing and financing activities. Cash flows in foreign currencies are converted at the exchange rate at the dates of the transactions. Currency exchange differences on cash held are separately shown. Payments and receipts of corporate taxes are included as cash flow from operating activities.

In the consolidated statement of cash flows, cash and cash equivalents include cash in hand, deposits held at call with banks and bank overdrafts. In the consolidated balance sheet, bank overdrafts are shown as borrowings in current liabilities.

gains and losses on derivatives, as well as changes in fair value of financial assets measured at FVTPL. Interest income and expense include calculated interest using the effective interest method. In addition to discounting effects from assets and liabilities measured at fair value, gains and losses on derivatives include effects from derivatives that do not qualify for hedge accounting and embedded derivatives, in addition to the ineffective portion of qualifying hedges.

**INVENTORIES**

Inventories consist of fuel, spare parts and other supplies to be consumed in the rendering of services. These supplies are measured at the lower of cost and net realizable value. The cost of inventories is based on the First-in-First-out (FIFO) principle, and includes expenditure incurred in acquiring the inventories and other costs incurred in bringing them to their existing location and condition. Within spare parts a distinction is to be made between 'immaterial' and material spare parts. Immaterial spare parts are to be carried as inventories and recognized as an expense in the income statement as they are consumed. Material spare parts will qualify for recognition as property, plant and equipment. For clarification purposes the useful life (and depreciation) of these material spare parts will commence when they are put into use rather than when it is acquired.

**PROVISIONS**

A provision is recognized when the group has a present obligation as a result of a past event that can be estimated reliably, and it is probable that the group will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a market based pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the liability-specific risks. The unwinding of the discount is recognized as finance expense.

**Onerous contracts**

Provision for onerous contracts is recognized when the expected benefits to

employees, tax authorities and others. In consultation with internal and external advisors, management will recognize a provision for related expenses and claims, if information available prior to issuance of the consolidated financial statements indicates a probable event and if the amount of the loss/cost can be reasonably estimated. Contingent liabilities for which a possible obligation exists are disclosed, but not recognized. Reference is made to Note 21 Provisions for further information.

minne. Any changes in these assumptions will affect the calculated provision obligations with immediate recognition in other comprehensive income. Further information about provision liabilities and the assumptions used are included in Note 20 Pension obligations.

The group, in the ordinary course of business, may be subject to various claims and lawsuits involving service providers,

## Note 5 - Revenue

Revenue in DeepOcean consists of various contracts within the oil and gas and renewable energy sectors. We refer to Note 3 for a description of the evaluations made when assessing revenue recognition on each contract.

### REVENUE FROM CUSTOMER CONTRACTS BY BUSINESS LINE

<b>Total revenue and other income</b>	<b>499 427</b>	<b>352 490</b>

exists an impairment test is performed to assess whether or not the assets should be impaired.

The valuations, often determined by value in use calculations, will often be performed based on estimates of future cash flows discounted by an appropriate discount rate. Significant estimates and judgments are made by management, including determining appropriate cash-generating units and discount rates, projections for future cash flows and assumptions of future market conditions. References are made to Note 12 Property, plant and equipment, Note 13 Intangible assets and Note 26 Leases.

Trade receivables are presented net of expected credit losses arising from identified credit risk. Receivables from customers that are impaired are measured using the credit-aging and loss ratio of the debtors, the days outstanding and the expected outcome of negotiations and legal proceedings against debtors.

The present value of pension obligations depends on factors that are determined on an actuarial basis using a number of assumptions. These assumptions include financial factors such as the discount rate, expected salary growth, inflation and return on assets as well as demographic factors concerning mortality, employee turnover, disability and early retirement. Assumptions about all these factors are based on the situation at the time the assessment is made.

based on an assessment of internal estimates and/or appropriate external advice, including decisions regarding whether to recognize deferred tax assets in respect of tax losses. Each year the group completes a detailed review of uncertain tax positions across the Group and makes provisions based on the probability of the liability arising. Where the final tax outcome of these matters differs from the amounts that were initially recorded, the difference will impact the tax charge in the period in which the outcome is determined.

The group also recognizes the increase in liability arising from the recognition of a statutory applied by tax authorities on intercompany transactions. As such, the group has evaluated its key transactions with affiliates and has reasonable grounds for concluding that the prices used are at arm's length. This is supported by internal transfer pricing documentation that is consistent with the OECD Guidelines (OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations). Further details about income taxes are included in Note 10 Income tax.

The group has significant non-current assets recognized in the consolidated statement of financial position related to property, plant and equipment, intangible assets and Right of Use assets. The value in use of some of these assets can be significantly impacted by changes of market conditions. The group considers whether there are indications of impairment on the carrying amounts of such non-current assets. If such indications exist, the group makes provisions for which the group is subject to taxation in some jurisdictions and different taxation regimes, including those covered by production sharing contracts of our customers and deemed profit regimes. Significant judgment is required in arriving at the tax provision. There are transactions for which the ultimate tax determination is uncertain at the time the group makes provisions

The preparation of the consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, the accompanying disclosures and, therefore, the effect of contingencies on the financial statements. Management's estimates and assumptions could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. Estimates and assumptions that have a significant risk of causing material adjustments to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Revenue from performance obligations satisfied over time, typically for long-term construction, engineering and project management contracts, is recognized using progress from an input method based on cost incurred-cost method, which is industry practice in the group's line of business.

The main uncertainty when assessing contract revenue is related to recoverable amounts from variation orders, claims and incentive payments which are recognized when, in the group's judgement, it is highly probable that they will not result in a significant reversal of revenue.

This assessment is adjusted based on management's evaluation of the indicated damages that will be imposed by customers, typically relating to contractual delivery terms. In many contracts, there are fixed-fee changes in scope of work, resulting in a number of variation orders. The contracts with customers normally include provisions for the issue and approval of a variation order.

The group is subject to taxation in some jurisdictions and different taxation regimes, including those covered by production sharing contracts of our customers and deemed profit regimes. Significant judgment is required in arriving at the tax provision. There are transactions for which the ultimate tax determination is uncertain at the time the group makes provisions

## Note 6 – Segments

DeepOcean as a global ocean services provider has three reporting segments, and a Corporate and other holdings segment. DeepOcean's reporting segments are based on regional operating segments. The Chief Executive Officer serves in the role of Chief Operating Decision Maker (CODM) in the group, and monitor the operating results of its business units separately for the purpose of decision making and performance assessment. The regions all have similar characteristics in terms of economic environment, nature of service, type of customer, methods of distribution and regulatory environment.

**UNSATISFIED PERFORMANCE OBLIGATIONS (ORDER BACKLOG)**  
The satisfaction of performance obligations in customer contracts vary for each contract. The order backlog as of 31 December 2021 was USD 272 000 thousand, compared to USD 207 900 thousand the year before. The table below shows the expected timing of future revenue for unsatisfied performance obligations and future operating income at year-end.

AMOUNTS IN USD THOUSAND	0-12 MONTHS	1-2 YEARS	2-3 YEARS	MORE THAN 3 YEARS	TOTAL BACKLOG
Unsatisfied performance obligations and future operating lease income as of 31 December 2021	172 000	73 000	27 000	-	272 000
Unsatisfied performance obligations and future operating lease income as of 31 December 2020	130 400	77 500	-	-	207 900
<b>Change year-over-year</b>	<b>41 600</b>	<b>(4 500)</b>	<b>27 000</b>	<b>-</b>	<b>64 100</b>

### CONTRACT BALANCES

AMOUNTS IN USD THOUSAND	2021	2020
Trade receivables	53 723	49 535
Contract assets	38 737	28 681
Contract liabilities	(5 882)	(9 591)
<b>Net receivables from contracts with customers</b>	<b>86 578</b>	<b>68 625</b>

Contract assets relate to the group's rights to consideration for performance obligations that have been fulfilled, but not yet invoiced at the reporting date. Contract assets are transferred to receivables when the rights to payment become unconditional, which usually occurs when invoices are issued to the customers. No impairment has been recognized on contract assets in 2021 or 2020.

Contract liabilities relate to advance consideration received from customers for work not yet performed.

### SEASONALITY OF OPERATIONS

The group's activities in all segments are subject to seasonal fluctuations due to weather conditions. During the winter months, the possibility of adverse weather conditions is significantly higher compared to the summer months. As a result, the group's revenues and results are typically lower in the first and fourth quarters of the year, particularly in relation to operations in the northern hemisphere.

AMOUNTS IN USD THOUSAND	2021	2020
Deductible temporary differences	-	1
Tax losses carried forward	-	-
Interest limitation	584	811
<b>Total</b>	<b>584</b>	<b>812</b>

Unrecognized deferred tax assets relate to temporary differences and tax losses carried forward in certain entities where it is currently not probable that future taxable profits will be generated to utilize these assets.

#### TAX CONTINGENCIES

Group companies receive enquiries from tax authorities and various tax audits are performed by said authorities with group companies, which may result in disputes related to filed tax returns. Tax liabilities are recognized when it is considered probable that there will be a future outflow of funds to a tax authority. In such cases, a provision is made for the amount that is expected to be settled, where this can be reasonably estimated. This requires the application of judgement as to the ultimate outcome, which may change over time depending on the facts in the case and circumstances. A change in estimate of the likelihood of a future outflow and/or of the expected amount to be settled would be recognized in income in the period in which the change occurs.

**DEPRECIATION**

Estimates of useful life, depreciation method and residual values are reviewed annually. Assets are depreciated mainly on a straight-line basis over their expected economic lives as follows:

CATEGORY	ASSET TYPE/COMPONENT	YEARS
Vessels	Vessel hull	30
Vessels	Other vessel components	15-20
Vessels	Dry docking	2,5 - 5
Mission equipment	Equipment (ROV, trenchers, etc.)	5-10
Other	Furniture and fittings, office equipment and vehicles	2 - 10

**IMPAIRMENT**

The group performed its annual impairment test in December 2020. When looking for indicators of impairment, it considered the relationship between its enterprise value and its book value, among other factors. External valuations of the owned vessels were also included in this assessment. In the reporting period, management assessed the fair value of these assets and concluded that impairment charges were necessary. This resulted in a 2020 impairment of USD 98.7 million, of which USD 94.2 million was related to discontinued operations.

In 2021, only minor items of equipment were impaired due to obsolescence.

**OTHER INTANGIBLE ASSETS**

USD 5 084 thousand has been capitalized in 2021 (2020: nil) for a cloud computing asset which is to be amortized over seven years. In 2020, the asset was classified as assets under construction.

No research and development costs were expensed during the year (2020: nil).

**GOODWILL AND CUSTOMER RELATIONSHIPS**

Goodwill and customer relationship assets were impaired and scrapped during the year. DeepOcean has reviewed the underlying business and concludes that the assets had no value to the group. It thus impaired the assets for USD 2 909 thousand during the year.

## DEEPOCEAN

### Note 14 - Equity-accounted investees

Equity-accounted investees include joint ventures and associates. Such investments are defined as related parties to DeepOcean. See Note 28 related parties for an overview of all transactions and balances with joint ventures and associates.

**TECHNIP-DEEPOCEAN PRS JV DA**  
In 2014, the group entered into a joint venture agreement with Technip Norge AS, resulting in the incorporation in Norway of Technip-DeepOcean PRS JV DA (PRS) in which both parties have a 50% interest. The main purpose of the joint venture is to execute the PRS Framework Agreement. The parties have joint control.

**LEVEL OFFSHORE AS**  
In 2018, the group entered into a joint venture with Level Personal AS, resulting in the incorporation in Norway of Level Offshore AS, in which

both parties hold 50% of the shares. The main purpose of the joint venture is to provide staffing services to the offshore industry and the marine market.

**ADEPTH MINERALS AS**  
In 2021, DeepOcean invested in Adepth Minerals AS. DeepOcean owns 24.7% of the company's shares and has committed to invest NOK 9 912 thousand in 2022, which will bring DeepOcean's ownership to 35.7% of the shares in the company. Adepth Minerals AS is a seabed minerals exploration company that is currently working

obtaining licenses for exploration campaigns on the Norwegian Continental Shelf.

During the year ended 31 December 2021, the group received a dividend from its equity-accounted investments amounting USD 479 thousand (2020: USD 486 thousand). None of these companies are publicly listed and consequently do not have published price quotations. There are no contingent liabilities relating to the group's interests in the investments accounted for using the equity method.

As of 31 December 2021, DeepOcean Group Holding AS does not hold treasury shares in any share class. The shares are all authorized, issued and fully paid.							
<b>Voting rights</b> All shares issued are entitled to one vote per share at General Meetings.							
<b>Economic rights</b> For all three classes of preference shares (B, C and D shares), dividends accrue at an amount equal to the effective preference amount per year, multiplied by the sum of a base amount and unpaid dividends from previous periods. The calculation period for each preference share class is annual and is determined by the initial investment date. We refer to the table below. The company							
is only permitted to pay a dividend if it has sufficient distributable reserves, determined in accordance with Chapter 8 of the Norwegian Private Limited Companies Act. The company has no obligation to contribute dividends even if such distributable reserves are available.							
On distribution to shareholders, all amounts shall be allocated in accordance with the following order of priority:							
1. The accrued and unpaid preference dividends in respect of each outstanding B share.							
2. The base amount in respect of each outstanding B share.							
3. The accrued and unpaid preference dividends in respect of each outstanding C share.							
4. The base amount in respect of each outstanding C share.							
5. The accrued and unpaid preference dividends in respect of each outstanding B share.							
6. The base amount in respect of each outstanding B share.							
No dividend may be declared or paid in respect of the A shares, unless and until the amount due to B, C and D shares have been paid in full.							
The Board of Directors has proposed no allocation of dividends for 2021 or 2020.

1) The interest costs are calculated using either the last fixing rate known by year end (plus applicable margin) or the contractual fixed rate (when fixed rate debt)

2) The cashflow is based on the assumption that the nominal drawn amount will remain constant until the maturity of the revolving credit facility.

Facility A is revolving credit facility which is rolled over every three months until maturity. Unless the facility agreement is breached, there are no obligations to repay prior to maturity, and the facility is thus presented as a non-current borrowings.

DeepOcean Group

Annual Report 2021

## Note 20 – Pension obligations

DeepOcean's pension costs represent the future pension entitlements accruing to employees during the financial year. In a defined contribution plan, the company is responsible for paying an agreed contribution to the employee's pension assets. In such a plan, this annual contribution also represents the cost. In a defined benefit plan, it is the company's responsibility to provide a given pension. The measurement of the cost and the pension liability for such an arrangement is subject to actuarial valuations. DeepOcean has for some time been gradually moving from a defined benefit arrangement to a

defined contribution plans in most regions. Consequently, the impact of the remaining defined benefit plans is gradually being reduced.

**PENSION PLANS IN NORWAY**  
The main pension arrangement in Norway consists of a general pension plan organized by the Norwegian Government. This arrangement provides the main general pension entitlement for all Norwegians. All pension arrangements offered by employers thus represent limited additional pension entitlements. Norwegian employers are obliged to provide an employment pension plan,

which can be organized either as a defined benefit plan or as a defined contribution plan.

**PENSION PLANS OUTSIDE NORWAY**  
Pension plans outside Norway are predominately defined contribution plans.

YEARS	2021	2020
Life expectancy of male pensioners	20.0	19.9
Life expectancy of female pensioners	23.2	23.1

	2021		2020	
	ACTIVE	PENSIONERS	ACTIVE	PENSIONERS
Number of participants	231	15	231	19
Average age	45	65	46	64

As of 31 December 2021, the weighted-average duration of the defined benefit obligation was 9.2 years.

**SENSITIVITY ANALYSIS**

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation as of 31 December 2021 by the amounts shown below.

AMOUNTS IN USD THOUSAND	INCREASE (+1%)	DECREASE (-1%)
Discount rate	(1 186)	1 467
Future salary growth	2 647	(2 323)
Future pension growth	48	-

A change in discount rate assumptions would affect plan assets in the income statement for the following period since it would change the estimated asset return. However, it would have no effect on pension assets at year-end.

Plan assets	2021	2020
<b>AMOUNTS IN USD THOUSAND</b>		
Equity instruments	1 276	820
Bonds	1 398	1 275
Hold to maturity bonds	6 834	5 648
Property	1 564	1 275
Other	22	91
<b>Total plan assets at fair value</b>	<b>11 095</b>	<b>9 110</b>

The equity portfolio is invested globally. The fair value of the equities is based on their quoted prices at the reporting date without any deduction for estimated future selling cost. The market value at year end is based on official prices provided by the Norwegian Securities Dealers Association. On average, the bond investments have a high credit rating. Most of the investments are in Norwegian municipalities with a credit rating of AA. The majority of investment in fund/private equity is

comprises funds that invest in listed securities where the fund value is based on quoted prices.

**DEFINED BENEFIT OBLIGATION – ACTUARIAL ASSUMPTIONS**

The group's most significant defined benefit plan is in Norway.

ACTUARIAL ASSUMPTION	2021	2020
Discount rate	1.90%	1.80%
Asset return	1.90%	1.80%
Salary progression	2.75%	2.25%
Pension indexation	0.00%	0.00%
Mortality table	K2019BE	K2019BE

The information below relates only to Norwegian plans since these represent the majority of the defined benefit plans.

The discount rates and other assumptions made in 2021 and 2020 are based on the Norwegian high quality corporate bond rate and recommendations from the Norwegian Accounting Standards Board. It should be expected that fluctuations in the discount rates would also lead to fluctuations in the pension indexations. The total effect of fluctuations in economic assumptions is consequently unlikely to be very significant. Assumptions regarding future mortality have been based on published statistics and mortality tables. The current life expectancy underlying the values of the defined benefit obligation at the reporting date is shown below, along with mortality table and number of employees in the defined benefit plan and their average age.

## Note 21 – Provisions and contingent liabilities

<b>Total as of 31 December 2021</b>	<b>507</b>	<b>-</b>	<b>507</b>

The provisions are related to property leases and realized losses on customer projects.

**Sensitivity analysis**

A strengthening of the currencies NOK, GBP, and EUR against USD as of 31 December would have affected the measurement of financial instruments denominated in a foreign currency and increased (decreased)

equity and income statement by the amounts shown below. The analysis assumes that all other variables, in particular interest rates, remain constant.

	AMOUNTS IN USD THOUSAND		EQUITY		PROFIT (LOSS) BEFORE TAX	
	STRENGTHENING	WEAKENING	STRENGTHENING	WEAKENING	STRENGTHENING	WEAKENING
	10%	-10%	10%	-10%	10%	-10%
<b>31 December 2020</b>						
EUR	5 894	(5 894)	5 894	(5 894)	(1 039)	1 039
GBP	(9 348)	9 348	(9 348)	9 348	(12 275)	12 275
NOK	48 670	(48 670)	48 670	(48 670)	952	(952)
<b>31 December 2021</b>						
EUR	(3 844)	3 844	(3 844)	3 844	(532)	532
GBP	1700	(1700)	1700	(1700)	2 220	(2 220)
NOK	48 214	(48 214)	48 214	(48 214)	20 367	(20 367)

The effect on profit and loss arises in connection with monetary balances denominated in currencies other than the relevant entity's functional currency. The effect on equity arises principally from the translation of assets and liabilities of entities that do not have USD as their functional currency.

cash balances and interest-bearing borrowings. Borrowings issued at variable rates, as well as cash, expose the group to cash flow interest rate risk. The Group is exposed to interest-rate risk related to borrowings and cash deposits. In particular, floating rate borrowings under the group's credit facility involve exposure for the group's cash flow. The terms of the group's borrowings are described in Note 19.

An increase of 100 basis points in interest rates during 2021 would have increased (decreased) equity and profit and loss by the amounts shown on the table below. This analysis assumes that all other variables, in particular foreign currency rates, remain constant. The analysis is performed on the same basis as for 2020.

**INTEREST RATE RISK**

The group's interest rate risk arises from

Effect of increase of 100 basis points in interest rates on profit (loss) before tax.

AMOUNTS IN USD THOUSAND	2021	2020

**Note 23 - Financial risk management and exposures**

**OVERVIEW**

The group's activities expose it to a variety of financial risks: currency risk, interest rate risk, credit risk, price risk, and liquidity risk. The objective of financial risk management is to manage and control financial risk exposures and thereby increase the predictability of earnings and minimize potential adverse effects on the group's financial performance. Management works with well-established principles for overall risk management with the aim of identifying, analysing and monitoring these risks, and for setting appropriate risk limits and controls. Financial risk management is

carried out in accordance with the Group Risk Management policy approved by the Executive Management. These principles and policies are reviewed periodically to reflect changes in market conditions, the activities of the business, and the laws and regulations affecting our business. There have not been any changes in these policies during the year.

**CURRENCY RISK**

The group operates globally and is exposed to currency risk in connection with transactions, assets and liabilities. Commercial transactions and recognized

assets and liabilities are subject to currency risk when payments are denominated in a currency other than the respective functional currency of the subsidiary. The group is primarily exposed to risk related to the currencies NOK, GBP and EUR. The group continuously assess its exposure and currency derivatives may be used to further reduce this risk.

The main currencies used throughout the group at the balance sheet date, compared to the USD, were as follows:

	NOK		GBP		EUR	
	CLOSING	AVERAGE	CLOSING	AVERAGE	CLOSING	AVERAGE
<b>2020</b>	0 11628	0 10646	1 36720	1 28400	1 22155	1 14142
<b>2021</b>	0 11367	0 11609	1 34860	1 37503	1 13480	1 18036

**INTEREST RISK**

A decrease of 100 basis points in interest rates during 2020 would have had the equal but opposite effect on the amounts above, due to the fact that all other variables remain constant. There are no effects on equity because there are no interest swaps.

**CREDIT RISK**

Credit risk is the risk of financial loss to the group if a customer or counterparty to financial investments/instruments fails to meet contractual obligations. Credit risk arises principally from receivables. The group's exposure to trade receivables is managed by establishing proper credit limits and continuous credit risk assessments for each individual customer. If customers are independently rated, these ratings are used. If there is no independent rating, the credit quality is based on past experience, the customer's financial position and other factors. The utilization of the credit limits is regularly monitored. Based on estimates of incurred losses in respect of trade receivables and contract

assets, the group establishes a provision for impairment losses. Provisions for loss on receivables were USD 1 577 thousand in 2021 (USD 368 thousand in 2020).

In the opinion of the group, significant credit risk concentrations are related to trade receivables from major corporate customers. The maximum exposure to credit risk at the reporting date equals the carrying amounts of financial assets (see Note 32: Financial instruments) and contract assets (see Note 7: Revenue and other income). The group does not hold collateral as security.

**PRICE RISK**

The group is exposed to fluctuations in market prices in its operational areas. These are related to contracts, including changes in market prices for raw materials, equipment and development in wages. These risks are managed as far as possible during bid processes by locking in prices from vendors as a basis for offers to

customers, or by escalation clauses with customers.

**LIQUIDITY RISK**

Liquidity risk is the risk that the group will be unable to fulfil its operational and financial obligations as they fall due. The group manages its liquidity to ensure that it will always have sufficient liquidity reserves to meet its liabilities when these become due. The group monitors liquidity risk by means of continued evaluations of its liquidity position combined with a rolling cash flow forecast of its operational activities, including the servicing of its financial obligations.

**FINANCIAL LIABILITIES AND THE PERIOD IN WHICH THEY MATURE**

The table below shows the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted and include contractual interest payments.

			6-12 MONTHS	1-2 YEARS	2-5 YEARS	MORE THAN 5 YEARS
<b>2021</b>						
Borrowings	19	99 108	1 039	2 078	10 152	-
Lease liabilities	26	63 046	28 194	4 624	6 055	467
Derivative financial instruments		-	-	-	-	-
Trade and other payables	22	125 715	-	-	-	-
<b>Total</b>		<b>287 870</b>	<b>29 233</b>	<b>6 702</b>	<b>107 576</b>	<b>467</b>
<b>2020</b>						
Borrowings	19	247 092	87 025	570	11 525	138 664
Lease liabilities	26	66 898	19 061	24 650	11 260	-
Derivative financial instruments		341	-	-	-	-
Trade and other payables	22	107 308	-	-	-	-
<b>Total</b>		<b>421 639</b>	<b>106 086</b>	<b>25 220</b>	<b>22 784</b>	<b>138 664</b>

The interest included in the table above is based on the current amounts borrowed with current interest rates and interest rate swaps. No assumptions are included for potential future changes in borrowings or interest payments.

**BANK GUARANTEE COMMITMENTS**  
The group has open bank guarantees for contractual guarantees and warranties:

<b>Bank guarantees</b>	<b>TOTAL</b>	<b>6 MONTHS AND LESS</b>	<b>6-12 MONTHS</b>	<b>1-2 YEARS</b>	<b>2-5 YEARS</b>	<b>MORE THAN 5 YEARS</b>
<b>AMOUNTS IN USD THOUSAND</b>

Bank guarantees as of 31 December 2020	20 465	9 077	4 09	2 080	8 899	-

**FUNDING POLICY AND EXTERNAL COVENANTS**  
**Liquidity monitoring**  
DeepOcean maintains a strong focus on liquidity management in order to meet its short-term working capital needs and to ensure solvency for its financial obligations. As of 31 December 2021, DeepOcean had a liquidity reserve of USD 107 236 thousand, consisting of an undrawn committed credit facility of USD 4 372 thousand, and cash and cash equivalents of USD 102 864 thousand. The current liquidity situation and short-term liquidity forecasts are reviewed on a weekly basis.

**Funding of operations**  
DeepOcean's group funding policy is that subsidiaries should finance their operations using the DeepOcean Corporate Treasury.

**Covenants**  
DeepOcean has two financial covenants in its credit facilities agreement, which are described in detail below.

<b>Liquidity</b>	<b>EBITDA shall exceed the following amounts for the periods stated below:</b>
<ul style="list-style-type: none"> <li>Liquidity shall at all times exceed USD 7 500 thousand until 31 December 2023</li> <li>Liquidity shall at all times exceed USD 10 000 thousand from 1 January 2024 until maturity</li> </ul>	<ul style="list-style-type: none"> <li>twelve months ending on 31 December 2022 USD 15 000 thousand</li> <li>twelve months ending on 31 March 2023 USD 15 076 thousand</li> <li>twelve months ending on 30 June 2023 USD 16 153 thousand</li> <li>twelve months ending on 30 September 2023 USD 17 230 thousand</li> <li>twelve months ending on 31 December 2023 USD 18 307 thousand</li> <li>twelve months ending on 31 March 2024 USD 18 384 thousand</li> <li>twelve months ending on 30 June 2024 USD 19 461 thousand</li> <li>twelve months ending on 30 September 2024 USD 20 538 thousand</li> <li>twelve months ending on 31 December 2024 USD 21 615 thousand</li> <li>any twelve-month period thereafter USD 21 700 thousand</li> </ul>

**Liquidity**  
Liquidity is defined as cash and cash equivalents plus undrawn committed credit facility less restricted cash. Restricted cash is defined as cash held in investment grade banks or cash held in currencies other than USD, NOK, GBP or EUR.

**EBITDA**  
EBITDA is defined as operating profit (loss) before amortization, depreciation and impairment, excluding restructuring cost.

## Note 24 - Capital management

### CAPITAL RISK

The group's objectives when managing capital are to maintain a capital structure that enables the group to achieve its strategic objectives and meet its day-to-day needs, and to safeguard its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders.

In order to maintain or adjust the capital structure, the group may issue new shares, adjust its dividend policy, return capital to shareholders or sell assets to reduce debt, after having taken into account relevant covenants of external borrowings.

The group monitors capital using two metrics: adjusted net debt and adjusted EBITDA ratio. This adjusted net debt is calculated as total borrowings plus finance lease liabilities (per NGAAP), less cash and cash equivalents (excluding cash and cash equivalents defined as restricted per the facilities agreement). Adjusted EBITDA is defined as EBITDA from continuing operations adjusted for IFRS 16 effects, one-off events, including restructuring costs, and other non-recurring events which are included in other expenses.

<b>AMOUNTS IN USD THOUSAND</b>	<b>2021</b>	<b>2020</b>

assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value. For financial instruments measured at fair value, the levels in the fair value hierarchy are as shown on the next page (see also below).

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial

**Level 3** – Fair values are based on unobservable inputs, mainly based on internal assumptions, used in the absence of quoted prices from an active market or other observable price inputs.

**Level 2** – fair values are based on price inputs other than quoted prices derived from observable market transactions in an active market for identical assets or liabilities. Level 2 includes currency or interest derivatives and interest rates, typically when the group uses forward prices on foreign exchange rates or interest rates as inputs to valuation models.

**Level 1** – fair values are based on prices quoted in an active market for identical assets or liabilities.

## Note 26 – Leases

The group leases several vessels, ROVs, office buildings and service sites, as well as vehicles. Contracts that contain a lease are recognized on the balance sheet as a right-of-use asset and lease liability unless the lease is short-term or of low value.

## Note 30 - Events after the reporting date

### LEASE CONTRACTS

On 1 January 2022, DeepOcean commenced a lease contract for the Dina Star vessel. The vessel is on a long-term charter party, and DeepOcean will measure the right-of-use asset and lease liability at the commencement date of the lease contract in May 2022.

On 22 April 2022, DeepOcean entered into a lease contract for the Sten Spearfish vessel. The vessel is on a long-term charter party, and DeepOcean will measure the right-of-use asset and lease liability at the commencement date of the lease contract in May 2022.

### TRANSACTIONS

On 1 March 2022, DeepOcean commenced a lease contract for the Normand Ocean vessel. The vessel is on a long-term charter party, and DeepOcean has recognized a right-of-use asset and lease liability of USD 34,189 thousand.

In project management, engineering, installation and operations, DeepOcean will acquire 100% ownership of Installit AS for an enterprise value of approximately USD 2 300 thousand. Completion of the transaction is subject to the customary conditions. Closure of the transaction is expected to take place in the second quarter of 2022. Following completion of the transaction, DeepOcean shall recognize the company as a consolidated subsidiary.

DEEPOCEAN

## Note 1 – Company information

DeepOcean Group Holding AS (the parent company) is a company domiciled in Norway. The financial statements are presented in accordance with the Norwegian Accounting Act and Norwegian Generally Accepted Accounting Principles (NGAAP).

include the financial performance and position of both companies as if the merger had occurred on 1 January 2021 based on the continuity method (book value), since this is deemed to provide the most accurate true and fair view of the transaction.

On 16 December 2021, DeepOcean Group Holding AS merged with Tricer NL Bidco 3 B.V. DeepOcean Group Holding AS absorbed the assets and liabilities of Tricer NL Bidco 3 B.V. Prior to the merger, Tricer NL Bidco 3 B.V. had merged with Tricer NL Bidco 4 B.V. which in turn had merged with DeepOcean Group Holding B.V.

Both companies were controlled by Tricer Lux Holdco S.C.A. at the time of the merger. The financial statements in this report

# Notes to the Statements

## Note 2 - Accounting principles

### USE OF ESTIMATES

The preparation of financial statements in compliance with the Accounting Act requires the use of accounting principles of the company's accounting principles also requires management to apply assessments. For areas that contain a number of such assessments, a high degree of complexity, or in areas in which assumptions and estimates are significant for the financial statements, descriptions are provided in the notes.

### REVENUE

Operating revenue is mainly comprised of management fee to entities within the group. The revenue is recognized when the services are delivered.

### INVESTMENTS IN SUBSIDIARIES

Investments in subsidiaries are measured at cost in the parent company accounts, less any impairment losses. The cost price is increased when funds are added through capital increases or when group contributions are made to subsidiaries. The investments are impaired to fair value if the impairment is not considered temporary. Impairment losses are reversed if the basis for the impairment loss is no longer present. Investments in subsidiaries and associates are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may exceed the fair value of the investment.

Dividends, group contributions and other distributions from subsidiaries are recognized as income in the same year as they are recognized in the financial statement of the provider. If the dividends or group contributions exceed withheld profits after the acquisition date, the excess amount represents repayment of invested capital, and is recognized as a reduction in carrying value of the investment.

### INTANGIBLE ASSETS

Intangible assets that are acquired by the company and have finite useful lives, are measured at cost, less accumulated amortization and any accumulated impairment losses. Subsequent expenditure is capitalized only when it increases the

future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognized in profit or loss as incurred. Amortization is calculated to write off the cost of intangible assets, less their estimated residual values, using the straight-line method, over their estimated useful lives, and is recognized in profit or loss.

### CLASSIFICATION

Current assets and current liabilities include items due within one year, or items that are part of the operating cycle. Other balance sheet items are classified as non-current assets/liabilities.

Non-current borrowings are presented as current if a loan covenant breach exists at balance date or the loan is due for repayment within the next twelve months. If a covenant waiver is approved subsequent to year-end and before the approval of the financial statements, the liability is presented as non-current debt to the extent that the maturity date is beyond one year.

### MEASUREMENT OF BORROWINGS AND RECEIVABLES

Financial assets and liabilities consist of investments in other companies, trade and other receivables, interest-bearing receivables, cash and cash equivalents, trade and other payables and interest-bearing borrowing.

Trade receivables and other receivables are recognized in the balance sheet at nominal value, less provision for expected losses. Interest-bearing borrowings are initially recorded at transaction value, less transaction costs. Subsequent to initial recognition, these borrowings are measured at amortized cost with any difference between cost and redemption value being recognized in the income statement over the period of the borrowings on an effective interest basis.

### FUNCTIONAL CURRENCY AND PRESENTATION CURRENCY

The parent company's financial statements are presented in NOK, which is DeepOcean

Group Holding AS' functional currency. All financial information presented in NOK (NOK thousand), unless stated otherwise. The subtotals and totals in some of the tables in these financial statements not being equal to the sum of the amounts shown.

### FOREIGN CURRENCY

Transactions in foreign currencies are translated at the exchange rate applicable at the date of the transaction. Monetary items in a foreign currency are translated to NOK using the exchange rate applicable on the balance sheet date. Foreign exchange differences arising on translation are recognized in the income statement as they occur.

### TAX

The tax income (expense) in the income statement consists of payable taxes for the period, withholding taxes and changes in deferred tax. Deferred tax is calculated as 22 percent of temporary differences between accounting and tax values, as well as any tax losses carry-forward at the year end. Net deferred tax assets are recognized only to the extent that it is probable that they will be utilized against future taxable profits.

### CASH FLOW STATEMENT

The cash flow statement has been prepared according to the indirect method. Cash and cash equivalents include cash, bank deposits, and other short-term investments that, immediately and with minimal exchange risk, can be converted into known cash amounts with due date less than three months from purchase date.

## Note 3 – Operating revenue and operating expenses

Operating revenue mainly comprises of management fee from subsidiaries, refer to Note 13 Related parties. Operating expenses were NOK 316 million in 2021 and NOK 111 million in 2020. The increase in expenses is mainly related to the restructuring of the UK operation. For more information about the restructuring see Note 11 Discontinued operations in DeepOcean's consolidated financial statements.

There are no employees in DeepOcean Group Holding AS and hence no salary or pension related costs and also no loan or guarantees related to the executive management team. Group management and corporate staff are employed by other DeepOcean companies and the costs for their services, as well as other parent company costs, are recharged to DeepOcean Group Holding AS.

FEES TO THE AUDITORS  
Refer to Note 8 Other operating expenses in DeepOcean's consolidated financial statements.

<b>2020</b>										
Facility B - Term loan (USD 16 244 thousand commitment)	USD	16 244	4 631	11 613	107 512	0.23%	4.75%	4.98%	Feb 2023	US 3M LIBOR + 4.75% fixed margin
<b>Total borrowings</b>					<b>107 512</b>					
Current borrowings					-					
Non-current borrowings					107 512					
<b>Total borrowings</b>					<b>107 512</b>					

The group's borrowings are provided by a bank syndicate consisting of high-quality Nordic and international banks. The terms and conditions include restrictions which are customary for such facilities, including inter alia negative pledge provisions, as well as

restrictions on acquisitions, disposals and mergers, dividend distribution and change of control provisions. For information about financial covenants, see Note 24 Capital management in the consolidated financial statements.

The fair value of the outstanding borrowings in 2021 is estimated to approximate their carrying amount because the impact of discounting is not significant.

MATURITY OF BORROWINGS

	AMOUNTS IN USD THOUSAND	CARRYING AMOUNT (NOK)	TOTAL CASHFLOW <sup>1)</sup>	6 MONTHS AND LESS	6-12 MONTHS	1-2 YEARS	2-5 YEARS	MORE THAN 5 YEARS
<b>2021</b>

<b>Total borrowings</b>		<b>871 895</b>	<b>966 242</b>	<b>9 140</b>	<b>9 140</b>	<b>18 280</b>	<b>929 681</b>	<b>-</b>
<b>2020</b>								
Facility B - Term loan (USD) 16 244 thousand commitment		107 512	129 804	2 679	2 679	5 357	119 090	-
<b>Total borrowings</b>		<b>107 512</b>	<b>129 804</b>	<b>2 679</b>	<b>2 679</b>	<b>5 357</b>	<b>119 090</b>	<b>-</b>

1) The interest costs are calculated using either the last-known fixing rate at year end (plus applicable margin), or the contractual fixed rate (when fixed rate debt).

2) The cashflow is based on the assumption that the nominal drawn amount will remain constant until the maturity of the revolving credit facility.

Facility A is revolving credit facility which is rolled over every three months until maturity. Unless the facility agreement is breached, there are no obligations to repay prior to maturity, and the facility is thus presented as a non-current borrowing.

## Note 11 - Guarantees

As of 31 December, DeepOcean Group Holding AS has provided the following guarantees on behalf of its wholly-owned subsidiaries.

AMOUNTS IN NOK THOUSAND	TOTAL	6 MONTHS AND LESS	6-12 MONTHS	1-2 YEARS	2-5 YEARS	MORE THAN 5 YEARS
<b>Bank guarantees and maturity</b>						
Bank guarantees as of 31 December 2021	169 011	8 948	76 575	30 018	53 470	-
Bank guarantees as of 31 December 2020	174 646	77 443	3 480	17 702	76 021	-

Although guarantees are financial instruments, they are regarded as contingent obligations and the notional amounts are not included in the financial statements.

## Note 12 – Financial risk management

### OVERVIEW

The company's activities expose it to a variety of financial risks: currency risk, interest rate risk, credit risk, and liquidity risk. The objective of financial risk management is to manage and control exposure to financial risk and thereby increase the predictability of earnings and minimize potential adverse effects on the company's financial performance. Management applies well-established risk management principles for the identification, analysis and monitoring of these risks, and for the setting of appropriate risk limits and controls. Financial risk management is carried out in accordance with the Group Risk Management policy approved by the Executive Management. These principles and policies are reviewed periodically to

reflect changes in market conditions, the activities of the business, and the laws and regulations affecting our business. There have not been any changes in these policies during the year.

### CURRENCY RISK

The company has interests in subsidiaries and is exposed to currency risk on transactions, assets and liabilities. Commercial transactions and recognized assets and liabilities are subject to currency risk, when payments are denominated in a currency other than the respective functional currency of the subsidiary. The company is primarily exposed to currency risk for USD, GBP, and EUR. The company continually assess its exposure and currency derivatives may be used to further reduce this risk.

### INTEREST RATE RISK

The company is exposed to changes in interest rates because of floating interest rates linked to loan receivables and loan payables. The company does not hedge transactions exposure in financial markets and has no fixed interest rate loan receivables nor loan payables. The company is therefore not exposed to fair value risk on its outstanding loan receivables or loan payables. Interest-bearing loan receivables and loan payables expose the company to income statement and cash flow interest risk. Interest-bearing borrowings to group companies reflect the cost of external borrowings, and thus reduce the company's exposure to interest risk.

### CREDIT RISK

Credit risk is the risk of financial losses to the company if a customer or counterparty to financial investments/instruments fails to meet its contractual obligations. Credit risk arises principally from receivables. Credit risk relates to loans to subsidiaries and associated companies, hedging contracts, guarantees to subsidiaries and associated companies, and deposits with external banks.

Loss provisions for interest-bearing receivables are made in situations where management considers that the company

is not expected to maintain the liquidity necessary to fulfill its obligations. See Note 13 for more information about receivables.

### LIQUIDITY RISK

Liquidity risk is the risk that the company will be unable to fulfil its operational and financial obligations when they become due. The company manages its liquidity to ensure that it will always have sufficient liquidity reserves to meet its liabilities when due. The company monitors liquidity risk by means of continued evaluations of its liquidity position, combined with a rolling cash flow

forecast of its operational activities, including the servicing of its financial obligations.

### INTEREST-BEARING RECEIVABLES ON AND

**BORROWINGS FROM GROUP COMPANIES**  
 DeepOcean Group Holding AS is the group's corporate treasury function and enters into borrowings and deposit agreements with subsidiaries. Deposits and borrowings are done at market terms and are dependent of the subsidiaries' credit rating and the duration of the borrowings.

### MANAGEMENT FEE

The corporate management team is employed in other subsidiaries and the cost related to these employees are charged to the company as a management fee. The company charges management fee to its subsidiaries for group-wide services and global IT cost.

## INDEPENDENT AUDITOR'S REPORT

To the Annual Shareholders' Meeting of Deepocean Group Holding AS

### Report on the audit of the financial statements

#### Opinion

We have audited the financial statements of Deepocean Group Holding AS (the Company) which comprise the financial statements of the Company and the consolidated financial statements of the Company and its subsidiaries (the Group). The financial statements of the Company comprise the statement of financial position as at 31 December 2021, the income statement and statement of cash flows for the year then ended and notes to the financial statements, including a summary of significant accounting policies. The consolidated financial statements of the Group comprise the statement of financial position as at 31 December 2021, the income statement, statement of comprehensive income, statement of cash flows and statement of changes in equity for the year then ended and notes to the financial statements, including a summary of significant accounting policies.

In our opinion

- the financial statements comply with applicable legal requirements,
- the financial statements give a true and fair view of the financial position of the Company as at 31 December 2021 and its financial performance and cash flows for the year then ended in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway,
- the consolidated financial statements give a true and fair view of the financial position of the Group as at 31 December 2021 and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the EU.

#### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the Company and the Group in accordance with the requirements of the relevant laws and regulations in Norway and the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (Including International Independence Standards)* (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Other information

Other information consists of the information included in the annual report other than the financial statements and our auditor's report thereon. Management (the board of directors and the managing director) is responsible for the other information. Our opinion on the financial statements does not cover the other information, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information, and, in doing so, consider whether the board of directors' report contains information required by applicable legal requirements and whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of

Building a better  
working world

this other information or that the information required by applicable legal requirements is not included, we are required to report that fact.

We have nothing to report in this regard, and in our opinion, the board of directors' report is consistent with the financial statements and contain the information required by applicable legal requirements.

### Responsibilities of management for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements of the Company in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway and of the consolidated financial statements of the Group in accordance with International Financial Reporting Standards as adopted by the EU, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's and the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or the Group, or to cease operations, or has no realistic alternative but to do so.

### Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's and the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's and the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and the Group to cease to continue as a going concern.

Independent auditor's report - Deepocean Group Holding AS 2021

A member firm of Ernst & Young Global Limited

3

Building a better  
working world

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

DEEPOCEAN

# Our Fleet

## DeepOcean operates a modern fleet of vessels.

### Owned vessels

Deep Vision is a modern and flexible Subsea IMR and Survey vessel with a well proven track record. The vessel is equipped with a DP II system and 3 ROV systems. This combined with the large deck area and the 60T AHC active heave compensated crane makes the vessel a versatile workstation for IMR, survey and construction support operations. The vessel was rebuilt in 2012, where the accommodation and superstructure capacity were increased, and ROV hangars were incorporated in the superstructure.

Arbol Canise is a general construction and subsea support DP II vessel, with a built-in accommodation for 199 persons and a 60T constant tension crane (Liebherr) in addition to a secondary 60T telescopic crane (TTS). She has a Super-puma Helideck, 960m<sup>2</sup> of free deck space. The vessel has been used as an accommodation and topdeck maintenance support vessel for several IMR contracts involving ROV, survey and diving activities.

### Long-term leased vessels

**EDDA FAUNA**  
The state-of-the-art IMR vessel Edda Fauna came into operation in 2008 as the flagship in the DeepOcean IMR fleet. Edda Fauna was designed with special emphasis on providing excellent safety and work conditions on deck with a closed deck hangar. Edda Fauna accommodation and office facilities are of very high standards, creating a good working environment for offshore crew and clients.

**EDDA FLORA**  
Edda Flora is designed for IMR and survey operations and came into operation in 2008. Edda Flora accommodation and office facilities are of very high standards, creating a good working environment for offshore crew and clients. Edda Flora has proven to be a very efficient vessel for IMR and survey operations. Edda Flora has been upgraded with battery solution enabling her as an environmental friendly hybrid vessel. The vessel is equipped with a unique high speed Survey/ROV from Hystad design in dedicated hangar.

**EDDA FREYA**  
The Edda Freya is a state of the art construction vessel suited for operations worldwide and utilizing an environmentally friendly, fuel saving diesel-electric hybrid propulsion system. Edda Freya was designed with a focus on cable laying operations, offshore constructions and inspection, and maintenance and repair (IMR) operations, and also with a focus on redundancy, excellent maneuverability and station keeping. The vessel has 2300m<sup>2</sup> of deck space and is equipped with a 400 T AHC offshore crane that can lift 600 T in double-fall mode, a 70 T AHC offshore crane which is bolted, and can easily be moved to secondary position, a Hulsman 15 T dual tensioner VLS located over the main moonpool, a system for quick mobilization of reels and reel drive systems, an integrated skidding system for modules, two moonpool launch and recovery system for WROVs and a 3000 T carousel is located below deck. In addition to the hybrid battery system Edda Freya's environmentally friendly credentials are enhanced by the adoption of Siemens BlueDrive PlusC concept, which was implemented by Siemens in co-operation with Østtjenstig Fretted. By using variable rotational speed with optimal operation of the diesel generators in combination with the battery system, the system will significantly reduce fuel consumption and the emissions of nitrogen oxides (NOx) and

greenhouse gases (CO<sub>2</sub> and methane). The use of selective catalytic reduction systems further reduces emissions.

**HOS BAYOU**  
The HOS Bayou is a U.S.-flagged Jones Act-compliant MPV. Equipped with two DeepOcean Schilling HD 150 HP work-class remotely operated vehicles (ROVs), The HOS Bayou is capable of performing inspection, maintenance and repair (IMR) of subsea oil installations and construction support in the Gulf of Mexico (GoM). In addition to IMR work, this vessel package is designed to perform a variety of deep-water services, such as SURF installation, decommissioning activities, drilling support and deep-water well intervention projects.

**NORMAND OCEAN**  
Normand Ocean is an MF6022 multipurpose construction vessel built and joined DeepOcean's fleet in 2014. The MF6022 design provides excellent stability and station keeping. The selection and design of spread, equipment and workspaces, are

all based on the objective to perform safe and efficient subsea operations. Normand Ocean's large deck, combined with high weather limitations on MHS and ROV's together with the 150 T offshore crane and De-Ice class, results in a vessel that is flexible and fit for offshore operations in harsh environments.

**VOLANTIS**  
Volantis is a dynamically positioned multi-role subsea construction vessel. Designed for operation in severe weather conditions, the vessel demonstrates high station keeping capability whilst remaining environmentally efficient. The vessel incorporates a 150t Active Heave Compensated subsea crane and is permanently mobilized with an Installer Work Class ROV and Seacore Panther XT III A Work Class ROV, which can be launched and recovered in High Sea States. Volantis has an extensive global track record for performing comprehensive construction, installation and trenching projects on a highly productive basis. The spread also includes a 2000t rated carousel to facilitate the installation and/or simultaneous burial of flexible products.

In addition to the above vessels, DeepOcean has access to a wider fleet of vessels through charter parties with vessel owners on a call-off basis.

# Board of

Jostein Lunde is an independent advisor, investor and Chairman. Mr. Lunde has 30 years of experience in senior executive positions, mainly as Chairman and CEO of large public and private owned companies. He serves as the Chairman of Elopak ASA. His last position was CEO of the Frettiliser Group. Mr. Lunde served before that as Chairman and CEO of Vimpacim (Veor). He has also held the position as President in Fero Capital, while serving as Executive Chairman of Alibel. Mr. Lunde has also held the position as CEO of Emontor (Atea). Mr. Lunde holds an MBA from Henley Business School. Mr. Lunde is a Norwegian citizen.

Mr. Askvig is an Operating Partner at Triton Partners. Prior to joining Triton in 2012, Mr. Askvig spent five years at Etizer Chemical ASA as President and CEO, a shipping company listed on Oslo Stock Exchange. Before that he was Executive Vice President with Inco, Orlen & Co. for seven years, including CEO for Fretz, Obay Renewables AS. Mr. Askvig has also been President and CEO of BT Shipping Ltd. Mr. Askvig is a board member of other Triton related companies, and he served as the Chairman of Norvic Tankers AS and Herning Shipping AS. Mr. Askvig has a B.A. in Business Administration from the University of San Francisco and he is a Norwegian citizen.

Mr. Diesen is an Investment Advisory Professional at Triton, where he focuses on the industrial, tech, and energy sectors. Mr. Diesen also sits on the board of Cubilly AS. ## Tillatelse til å utarbeide årsregnskap og årsberetning på engelsk språk

— Vi viser til deres brev av 5. januar 2016 der det søkes om dispensasjon fra kravet til å utarbeide årsregnskap og årsberetning på norsk språk for følgende selskaper;

<b>DeepOcean Norway AS</b>	<b>org. nr. 896 696 262</b>
<b>DeepOcean AS</b>	<b>org. nr. 980 722 805</b>
<b>DeepOcean Management AS</b>	<b>org. nr. 987 538 880</b>
<b>DeepOcean Maritime AS</b>	<b>org. nr. 948 230 798</b>
<b>Deep Ocean Shipping AS</b>	<b>org. nr. 979 456 107</b>
<b>DeepOcean Shipping II AS</b>	<b>org. nr. 992 035 870</b>
<b>DeepOcean Shipping III AS</b>	<b>org. nr. 977 289 483</b>
<b>DeepOcean Shipping IV AS</b>	<b>org. nr. 976 854 020</b>
<b>DeepOcean Shipping V AS</b>	<b>org. nr. 914 883 164</b>
<b>DeepOcean Shipping VI AS</b>	<b>org. nr. 914 937 590</b>
<b>Northwest Maritime AS</b>	<b>org. nr. 966 250 380</b>
<b>DeepOcean 1 UK Ltd (norsk NUF)</b>	<b>org. nr. 997 914 775</b>

Skattedirektoratet gir på bakgrunn av en konkret helhetsvurdering de overnevnte selskaper dispensasjon fra kravet til å utarbeide årsregnskap og årsberetning på norsk språk, jf. regnskapsloven § 3-4 tredje ledd. Dispensasjonen forutsetter at opplysningene som vedtaket baserer seg på ikke endres vesentlig.

Kopi av dette brevet må sendes Regnskapsregisteret i Brønnøysund sammen med årsregnskapet. Det påligger den regnskapspliktige å dokumentere ved dette brev at tillatelsen er gitt.

### Bakgrunn

DeepOcean Norway AS (tidligere DeepOcean Group Holding AS) er nå det norske morselskapet i DeepOcean gruppen og 100 % datterselskap av konsernspissen DeepOcean Group Holding BV. DeepOcean Group Holding BV er 100 % eid av amerikanske obligasjonsfond. Konsernet fikk i vedtak av 15. august 2012 tillatelse til å benytte engelsk språk. Konsernet er et integrert oljeservicekonsern som driver internasjonal virksomhet innen områdene Subsea Services, Subsea Trenching and Protection. Konsernet driver innen en bransje hvor engelsk benyttes i

all kommunikasjon med forretningsforbindelser. Det interne arbeidsspråket i selskapene er også engelsk og all intern rapportering skjer på dette språket. Alle selskapene har styreleder og/eller styremedlemmer som ikke er norskspråklige. Alle sentrale aktører og samarbeidspartnere innen denne bransjen behersker og benytter engelsk. En norsk oversettelse vil kun ha til formål å oppfylle regnskapslovens språkkrav.

#### **Skattedirektoratets vurdering**

Etter regnskapsloven § 3-4 tredje ledd skal *”årsregnskapet og årsberetningen ... være på norsk. Departementet kan ved ... enkeltvedtak bestemme at årsregnskapet og/eller årsberetningen kan være på et annet språk.”*

I Ot. prp. nr. 42 (1997-1998) Om lov om årsregnskap m.v., er det uttalt følgende om regnskapslovens formål, jf. pkt. 1.1:

*”Regjeringen har som siktemål at regnskapsloven skal bidra til informative regnskaper for ulike grupper av regnskapsbrukere. Regnskapsbrukerne er dels investorer og kreditorer som tilfører kapital til foretakene, og dels andre grupper som har interesse av å vite hvordan foretaket drives, f.eks. de ansatte og lokalsamfunnet. Informasjonen til kapitalmarkedet skal gi grunnlag for riktig prising av finansielle objekter. Riktig prisdannelse på aksjer er en forutsetning for at ressursbruken i samfunnsøkonomien skal bli best mulig. Gode regnskaper vil også gjøre det vanskeligere for markedsdeltakere å ta ut spekulasjonsgevinster med basis i skjevt fordelt informasjon.”*

Det fremgår således at et av hovedformålene med regnskapsloven er å bidra til *”informative regnskaper for ulike grupper av regnskapsbrukere”*. Regnskapsbrukere vil omfatte, jf. uttalelsen i proposisjonen, blant andre investorer, kreditorer, ansatte og lokalsamfunnet.

Det er etter Skattedirektoratets vurdering derfor avgjørende ved vurdering av om dispensasjon fra kravet til å utarbeide årsregnskap og/eller årsberetning på norsk kan gis, at det ikke foreligger mulige brukere av regnskapsinformasjon som blir vesentlig berørt negativt ved en eventuell dispensasjon.

Det er særlig hensynet til brukerne av regnskapsinformasjon som skal vurderes ved en dispensasjonssøknad. I denne vurderingen har Skattedirektoratet lagt særlig vekt på at selskapet er 100 % eid av amerikanske obligasjonsfond. Konsernet er tidligere innvilget dispensasjon. Det vesentlige av virksomheten foregår i utlandet. Selskapets arbeidsspråk er engelsk og all kommunikasjon skjer på engelsk. Videre er det vektlagt at selskapet driver virksomhet i en internasjonal bransje der alle aktører behersker og benytter engelsk språk.

Vennligst oppgi vår referanse ved henvendelser i saken.
