

## ÅRSREGNSKAPET FOR REGNSKAPSÅRET 2023 - GENERELL INFORMASJON

### Enheten

Organisasjonsnummer:	981 929 055
Organisasjonsform:	Aksjeselskap
Foretaksnavn:	TELIA NORGE AS
Forretningsadresse:	Lørenfaret 1A 0585 OSLO

### Regnskapsår

Årsregnskapets periode:	01.01.2023 - 31.12.2023
-------------------------	-------------------------

### Konsern

Mørselskap i konsern:	Ja
Konsernregnskap lagt ved:	Ja

### Regnskapsregler

Regler for små foretak benyttet:	Nei
Benyttet ved utarbeidelsen av årsregnskapet til selskapet:	Forenklet IFRS
Benyttet ved utarbeidelsen av årsregnskapet til konsernet:	-

### Årsregnskapet fastsatt av kompetent organ

Bekreftet av representant for selskapet:	Andreas Skancke Neegaard
Dato for fastsettelse av årsregnskapet:	18.03.2024

### Grunnlag for avgivelse

År 2023: Årsregnskapet er elektronisk innlevert
År 2022: Tall er hentet fra elektronisk innlevert årsregnskap fra 2023

*Det er ikke krav til at årsregnskapet m.v. som sendes til Regnskapsregisteret er undertegnet. Kontrollen på at dette er utført ligger hos revisor/enhetens øverste organ. Sikkerheten ivaretas ved at innsender har rolle/rettighet for innsending av årsregnskapet via Altinn, og ved at det bekreftes at årsregnskapet er fastsatt av kompetent organ.*

Brønnøysundregistrene, 13.08.2025

CEO

# It's all about execution

When I reflect on Telia's performance in 2023, the year before I joined the company, it makes me very excited about the future.

Having returned to revenue growth across its footprint in 2022, Telia converted this momentum into broad-based EBITDA growth in 2023, successfully mitigating macroeconomic challenges such as inflation through progressive pricing adjustments and focused cost reductions. The company also continued to invest in the transformation of its networks, innovation, processes and people, leading to good performance in mobile, fixed broadband, TV aggregation and enterprise services, while the Net Promoter Score increased in five of Telia's six markets.

At Telia, delivering sustainably isn't just about doing well in external sustainability benchmarks – it's about consistently delivering value for all of our stakeholders. To that end, in 2023 Telia also focused on improving capital allocation, and one of the ways the company did that was to initiate

the sale of its operations and networks in Denmark to Noriys, the country's largest energy and telecommunications group, the transaction to close shortly.

Telia's strategy is to focus on markets is a clear path to securing and defending number one or two positions. In April 2023, the decision was first announced, Telia third operator in Denmark by revenue, mobile services and fifth in fixed services sale made good strategic sense. The enable us to further reduce our leverage, capital allocation will remain a priority.

In our remaining markets, our focus is on our customers – who have a combined million mobile subscriptions, between the best 5G experience. We achieved population coverage across our footprint end of the year – 82% in Sweden, 100% in Finland, almost 95% in Norway, 100% in Lithuania and 77% in Estonia.

In addition to providing customers with such as significantly faster download speeds, lower latency for gaming and reliability and coverage – even in crowded – 5G holds tremendous promise for it. Therefore, in February 2023, Telia announced

announced the launch of the NorthStar program to give leading industrial companies in Sweden access to a 5G innovation network and the opportunity to explore the latest 5G technologies. In Finland, Telia and Nokia launched the Sirius 5G Standalone application innovation program, which should increase our ability to rapidly roll out and monetize 5G network services.

In September, Telia secured important spectrum for continued expansion of its mobile network in Sweden in the 900 MHz, 2.1 GHz and 2.6 GHz bands. The spectrum will be used to improve the coverage and capacity of Telia's 4G and 5G network, including in rural areas with insufficient coverage and along high-traffic railway lines. The licenses are valid for between 23 and 25 years, so in Sweden we have made a good investment in our future – and at a reasonable price.

As an operator, it goes without saying that our networks are our most important assets, so I was very happy to see that, for the fourth year in a row, the independent benchmarking organization uMlaut identified Telia's mobile network as the best in Sweden. In the extensive tests, Telia received a total of 968 points out of a possible 1,000 – one of the highest scores awarded by uMlaut globally.

Of course, we do have offerings that extend beyond our networks, in areas such as cloud, security and the Internet of Things (IoT). We have partnered with hyperscalers to create the Telia Cloud Academy to upskill our employees, and we offer a comprehensive portfolio of cloud connectivity, cloud security and data center solutions. Our IoT solutions are popular with public transportation operators, property owners and utility companies, and enterprise non-connectivity revenue increased by 11% year-over-year in 2023.

TV and Media proved to be a bit more challenging and, last year, declining revenue and a difficult advertising market prompted Telia to begin restructuring this business. As part of these efforts, the C More brand was retired and all TV4 and MTV content was made available from a single streaming service in Sweden and Finland respectively, with viewers being able to choose to watch content with or without advertising.

Across all of our businesses, our main objective is to inspire customers to choose Telia and simplify their connected living. At the beginning of this message, I wrote about how we are investing in our networks, innovation, processes and people – all of which will ultimately benefit our customers. You can read more about the details behind that elsewhere in this report, but one of the keys to

**»At Telia, delivering sustainably isn't just about doing well in external sustainability benchmarks – it's about consistently delivering value for all of our stakeholders.«**

sustainable. So, I'm proud that, for the first time in a row, Swedes who participated in the Brand Index survey recognized Telia as a sustainable company in its industry. Our sustainability targets were approved by the Science and Technology Targets initiative and Telia was also ranked as the most sustainable company in the global Technology & Telecommunications sector and second overall among all companies assessed in Global Child Forum's Child Benchmark.

Clearly, I have joined Telia at a very exciting time in business, as in sport, I believe it isn't just to have the best strategy – you also need to execute. Here's to many years of successful execution together.

Stockholm, March 19, 2024

**Patrik Hofbauer**  
President and CEO

# Telia Company in brief

## Who we are

We are technology pioneers who have been digitalizing society for the past 170 years. Today, Telia is a Nordic and Baltic telecommunications leader and Nordic media house, serving consumers, businesses and public sector customers with essential digital infrastructure, ICT services and entertainment. Our 19,000 talented colleagues serve millions of customers with services that are fundamental enablers of the digital societies we live in, including more than 25 million mobile, broadband and TV subscriptions.

## What we do

We are the hub in the digital ecosystem, connecting individuals, families, businesses, authorities and societies to the secure and reliable communication, ICT and entertainment services that enable and empower their lives. We have a deep social conscience that drives us to use our technology to be agents of improvement. We are constantly innovating to do better for our customers, ourselves, our owners and the societies of the Nordics and the Baltics.

## Why we do it

We believe a secure and sustainably connected life is a better life. Everything we do is driven by our purpose to reinvent better connected living so that people can live fuller lives, businesses can work smarter, and society and the planet can flourish together.

## We provide

Mobile voice and data      TV and streaming      Media advertising      Value added services

Fixed voice and data      ICT Services      Devices

## Selected events 2023

- 

**5G leadership continues**  
Telia continued to lead the 5G rollout in the Nordics and Baltics and achieved population coverage of 90%, compared to 70% at the end of last year.
- Fifth most valuable brand in Sweden**  
Telia was ranked fifth in the inaugural Kantar BrandZ Top 30 Most Valuable Swedish Brands 2023 ranking, with a brand value of USD 3.6 billion.
- NorthStar program launched**  
Telia and Ericsson launched the NorthStar program to help Sweden's leading industrial companies reinvent better connected business by accelerating the adoption of 5G.

- Telia Norway welcomes Fjordkraft on to its network**  
Fjordkraft customers were migrated to Telia Norway's award-winning network, strengthening Telia's position as the largest mobile wholesale provider in the country.
- Telia Lithuania supports NATO summit**  
Telia Lithuania was the sole provider of IT and connectivity services for the NATO summit in Vilnius and received formal recognition from the White House for its excellent delivery.

- Favorable outcome for Telia in Sweden's spectrum auction**  
Telia acquired spectrum in the 900MHz, 2.1GHz and 2.6GHz bands, securing the leading spectrum position in Sweden.

- Telia Finland receives awards for best network quality**  
In addition to rolling out 5G at a high pace, Telia Finland also made significant progress on its overall network quality. As a result, Telia Finland received awards for best network quality and came out almost on par with the market leader in a network perception study performed by Ipsos.
- Telia's mobile network remains the best in Sweden**  
For the fourth year in a row, Telia Sweden's mobile network was the winner in the benchmark conducted by umlaut, taking first place in all three categories: voice, data and crowdsourcing.
- Ranked first in Children's Rights Benchmark**  
Telia Company was ranked first in the global Technology & Telecommunications sector in Global Child Forum's Children's Rights Benchmark, which aims to track progress on how businesses address children's rights.

- Net-zero targets approved**  
Telia Company's targets set with the overall aim of achieving net-zero greenhouse gas emissions across its value chain by 2040 were approved by the Science Based Targets initiative (SBTi).
- Sustainability is an integral aspect of Telia's brand**  
For the thirteenth year in a row, Swedes ranked Telia as the most sustainable telco brand in the annual Sustainable Brand Index survey. Telia was also ranked second in the FT Europe's Climate Leaders 2023 list.

- Digitalizing TV4 & N**  
To better capitalize on growing digital consumption to ensure an improved experience for both viewers and advertisers, the C More brand was launched and its programming was available under the TV4 and N brands. Efficiency measures were also implemented.

- Patrik Hofbauer appointed new CEO**  
Allison Kirkby decided to leave the company and was replaced by Patrik Hofbauer as Telia's new CEO in February 2023.
- Sale of Telia Norge**  
An agreement to sell Telia Norge's network operations and infrastructure to Denmarks Netly was signed in November 2023. Closing is expected in early 2024.

## Trends

# A world of connected opportunities

We observe three megatrends: Digitalization, De-globalization and Decarbonization. Digitalization enables better customer experiences and efficiency, while triggering new customer needs. Deglobalization places an emphasis on resilience and has implications for how we operate. Decarbonization is an imperative and we aim to drive and enable this shift.

In the following pages, we will dig deeper into the six subtrends that are most relevant for Telia.

## 01. Generative AI is gathering momentum

Generative AI had a breakthrough year in 2023, although we have probably just scratched the surface of its full potential. While AI is already used in areas such as customer service automation and improvement initiatives by Telia and other operators, generative AI is expected to lead to advances in all areas of the telecom business, including chatbot automation, marketing, software coding and network and operations automation. In the coming years, rapid development will likely lead to generative AI having a broader impact on how we work, operate and interact with customers.

There is ample opportunity for Telia to automate and optimize processes, and a growing need for the company to ensure it has the competence required to capture future opportunities enabled by AI.

## 02. Digitalization of operational technology is accelerating

Digitalization continues at a rapid pace, with Telia's corporate customers connecting a growing share of their business-critical equipment so that they can optimize and intelligently automate their processes. In many cases, wireless network connections offer significant advantages over wired solutions, and 5G was designed to provide robust and secure networking for all industries.

This trend is part of the broader move towards modern operations incorporating IoT, secure cloud-based solutions and leverage of AI.

This is a growth opportunity that aligned with Telia's IoT assets and digitalization capabilities.

## 03. Sustainability is a business driver

The urgent need to take climate action is becoming more apparent every day, as worldwide experience increasing natural disasters, droughts, storms and wildfires from climate change. Everyone on the planet is responsible for taking action to limit warming to 1.5 degrees Celsius. The EU announced multiple related regulations including the Corporate Sustainability Directive (CSRD), which will require companies to be increasingly transparent about their plans and the progress they have made.

A growing number of Telia's customers ask for advice on decarbonization, eager to understand more about the net-zero targets. This is an opportunity to differentiate its business and grow, helping to create a better world.

#### 04. The need for trusted suppliers is increasing

Cyber threats are increasing in both number and sophistication, and governments, businesses and consumers frequently seek advice and solutions to counter these threats proactively. Potential solutions range from local autonomy on connectivity to intrusion protection and detection and network security. In each case, operators have an important role to play.

→ Telia has an opportunity to sustain and solidify its role as a trusted provider, thereby driving growth.

#### 05. Geopolitical and economic uncertainty persists

The world has changed a lot in recent years and geopolitical tensions have increased, most notably as a result of the Russian invasion of Ukraine and the dispute between Taiwan and China. Supply chain disruptions, increasingly stringent national security measures and uncertainty are all side effects of the broader trend of deglobalization. In the economies in which Telia operates, inflation has surged, raising interest rates and other costs. While inflation generally cooled in 2023, gross domestic product growth has slowed.

→ Telia needs to double down on commercial excellence and continue its cost transformation journey to offset inflation headwinds and hedge for variations in demand.

#### 06. Connectivity ecosystems are evolving

The telecom value chain is developing in several aspects. The InfraCo model – in which Telia has played an active role by bringing external minority investors into its TowerCo – is well established. Private mobile networks attract many non-telco players. Some players are also interested in offering low-Earth-orbit satellite services, addressing various niche communication needs.

→ Telia needs to maintain strategic control of its assets while leveraging partners and emerging business models to fund capital-intensive network expansion.

# Reinventing a better Telia

We are executing on our strategy and have made great progress, including returning to growth, building leading 5G networks, simplifying operations materially, and improving the world around us through our sustainability efforts. The trends we observe support the strategic choices we have made, which is why we remain committed to the same strategic priorities and are focused on accelerating execution.

Our ambition is to make Telia better for our customers, our employees, our owners and the societies of the Nordics and the Baltics. We reaffirm our four strategic priorities that explain how our strategy will create value and a better future for all our stakeholders.

**Inspiring customers**  
with brands and experiences that go beyond connectivity

**Connecting everyone**  
through the most trusted, reliable and efficient modern networks

**Transforming to digital**  
to be simpler, faster and data-driven with lower costs

**Delivering sustainably**  
through an accountable and empowered organization

## We reinvent better connected living

Through our...

Digital connectivity

Digital experiences

Digital infrastructure

By excelling at...

Inspiring customers

Connecting everyone

Transforming to digital

Delivering sustainably

So that we have the...

Most loyal customers

Most engaged employees

Most satisfied shareholders

Most empowered societies

Read more about the four strategic priorities →

# Inspiring customers

We work relentlessly to bring our customers better products and services to enable them to achieve, engage and experience more.

## Providing seamless customer interactions...

...through frictionless customer-personalized touch-points and experiences across platforms

## Catering for all household needs...

...with high-quality connectivity, user-centric devices and engaging media and entertainment offerings in the home and on the go

## Being the preferred digitalization partner for businesses...

...by orchestrating services beyond connectivity, including cloud, IoT and security solutions as well as private networks dedicated to customers' specific needs

## Innovating for the future...

...by putting sustainability at the center of product development to help businesses and societies solve pressing challenges such as climate change

### Selected progress 2023

- Telia launched the Smart Connect cloud-based communication and switchboard solution in Sweden, Estonia and Lithuania
- Net Promoter Scores increased in five of Telia's six markets and, at the end of the year, were at the highest levels to date in three of Telia's six markets
- In a sign of good progress on B2B convergence, non-connectivity B2B revenues increased by >10% during the year
- Telia Norway expanded its IT portfolio by adding cloud, security and local area network offerings
- Telia Sweden enabled HD-voice quality external calls from Teams, becoming one of the first operators to do so
- All TV4 and MTV content was made available from a single streaming service in Sweden and Finland respectively, making it easier for customers to access
- Telia's digital TV service was ranked the best in Sweden in two separate consumer surveys
- Telia received recognition from Frost and Sullivan for its innovative, growing Unified Communication as a Service portfolio

## Case: Inspiring customers

# Nobody does TV better in Sweden

TV viewers in Sweden come from a variety of backgrounds and their diverse interests translate into different viewing preferences, but in two independent surveys most agreed on one thing: Telja provides the best digital TV experience.

In the survey of 1,600 viewers by Nordic Bench, which was presented in August, Telja was not only selected as the best TV operator but also as the TV operator that had improved the most. In fact, Telja was the only TV operator whose Net Promoter Score (NPS) – a metric that measures how likely customers are to recommend a company, product or service – improved.

According to viewers, the areas in which Telja improved the most included the simplicity of its service, the purchase and registration experience, reliability and streaming. Areas in which Telja exceeded the performance of all other TV operators included the simplicity of its service, the purchase experience, broadcast quality and access via mobile devices.

The Swedish Quality Index (SKI) survey was published in October and ranked Telja first among seven digital TV operators, for the 8th time in the past 10 years. While other TV operators' scores decreased, Telja increased its score by an impressive 2.4 points to 61.4 out of 100, leaving it well ahead of its closest competitor.

As it does with all of its products and Telja works continuously to develop it to ensure it meets or even exceeds customer expectations. Recent improvements in a new program guide, the curation of a number of popular genres and an enhanced search function that makes it easier to find the content they are looking for. As well, because Telja Play gives viewers a vast content library that aggregates sports, news, sports, entertainment and films from providers such as Netflix, HBO and Telja's own TV4 media house.

Whether they're watching "Solsidan", soccer, Telja TV customers can choose it on their mobile devices – including are on the move – or they can use a Telja supports 4K/UltraHD resolution on TV a dynamic-range video, with no lag. Eitell Telja always strives to offer the best possible of bundled content at a variety of different price points, with the options to include services such as broadband internet subscriptions. Recent market share results of the Nordic Bench and SKI suggest customer comments such as "The best on the market!" suggest that viewers what they see.

# Connecting everyone

Connecting everyone over the most reliable and secure networks is imperative to deliver better and inclusive connected living.

## **Building and maintaining digital network leadership...**

...through expanded reach, capacity and quality in high-speed fixed and 4G/5G mobile networks

## **Modernizing our networks...**

...by retiring legacy and rolling out modern technology to introduce new functionality, improved reliability and operational efficiency

## **Driving digital inclusion...**

...by providing access to reliable connectivity for all and empowering users with digital skills

## **Expanding and crystalizing infrastructure value...**

...by partnering with strategic partners and investors who bring industry expertise and investment into our assets

### Selected progress 2023

- Across its footprint, Telia's 5G population coverage increased to 89%
- By the end of the year, Telia had signed contracts for more than 70 Enterprise Mobile Network sites and more than 40 of them were operational
- Telia Sweden secured important spectrum for continued expansion of the mobile networks in the 900 MHz, 2.1 GHz and 2.6 GHz bands
- Telia's Global IoT Connectivity solution helped Ponsse to enable sustainable forestry around the globe
- Telia and Ericsson announced the launch of the NorthStar program to give leading industrial companies in Sweden access to a 5G innovation network
- Telia and Nokia agreed to launch the Sirius 5G Standalone application innovation program in Finland
- By the end of the year, Telia's digital skills initiatives, which aim to reduce the exclusion of seniors, children, immigrants and small and medium-sized enterprises, had reached 1.3 million individuals
- By the end of the year, Telia had closed down its 3G networks in Norway, Lithuania, Denmark and Estonia
- For the fourth year in a row, Umlaut identified Telia's mobile network as the best in Sweden

## Case: Connecting everyone

# Securing communication at the NATO summit

Taking place against the backdrop of the ongoing Russian invasion of Ukraine, the 2023 NATO Summit hosted in Lithuania on July 11 and 12 was a high-stakes event that reaffirmed the enduring transatlantic bond between Europe and North America, emphasizing the alliance's collective commitment to security and defense. As a trusted provider of critical infrastructure in the region, Telia's role at the summit was to demonstrate that same commitment to security and defense at the Lithuanian Exhibition and Congress Centre, where the company was entrusted with providing secure Internet connectivity.

Telia's preparations for the summit began in earnest six months in advance, with specialists setting up a dedicated network consisting of 150 kilometers of cable and 10 kilometers of optical fibers at the venue. During the summit, a team of 50 employees worked to provide 2,000 workstations with fixed Internet connections and 24/7 security via a network operations center.

Ahead of the summit, Telia had noted calls on several Telegram channels to launch cyberattacks against various Lithuanian state institutions and companies. While some of these cyberattacks succeeded in disrupting media websites, delegations from 48 countries and thousands of media representatives from around the world working at the Lithuanian Exhibition and Congress Centre remained unaffected.

To counter the threat posed by cyberattacks, Telia had installed six physical firewalls at the summit venue as well as specialized anti-DDoS equipment on seven separate lines for the Internet connection. Communication network specialists analyzed everything from potentially vulnerable devices to other potential sources of external attacks. Satellite communication was also available as a backup.

In addition to cyberattacks, the network summit venue also had to withstand a significant load from its legitimate users. During the summit, about 5,000 users used communication services, and at peak times about 3,500 unique devices were connected to the network simultaneously. More than 1,000 journalists worked in the hall on July 12 after the speeches made by the presidents of the United States and Lithuania. Rushing to convey the news to the world was not possible. Nevertheless, the Internet service at the summit peaked at 3Gbps at the time.

The event's organizers received praise for the speed of the Internet connection and the fact that employees received communication services at the White House, but the company was not able to thwart all of the cyberattacks. While Telia Lithuania had previously provided communications support for other high-profile events and routinely provides services to the country's largest companies and the NATO summit was the most significant

The 2023 NATO Summit hosted in Vilnius, Lithuania, attracted global attention – including from hackers.

# Transforming to digital

We are transforming to digital to simplify operations, act faster and, ultimately, enable a better customer experience.

## **Simplifying and automating products and processes...**

...to reduce complexity, utilize scale, and enhance quality

## **Leveraging analytics and data driven operations...**

...in our decision making and in value proposition creating processes to improve customer personalization

## **Establishing business agile IT...**

...by modernizing and standardizing our IT systems across the organization

## **Maintaining a privacy and security focus...**

...at the core of all our work with our own and our customers' digitalization journeys

### Selected progress 2023

- During the year, Telia retired another 20% of its legacy products and, by the end of the year, the company had retired 60% of the products it plans to retire by 2025
- Telia provided employees with generative AI tools such as Microsoft CoPilot for Office
- Telia's use of technologies such as AI, robotic process automation and chatbots saved an estimated 300,000 hours, increasing efficiency and reducing costs
- Telia Sweden's B2B transformation reduced by the handling time for broadband activation by more than 99% (see the next page for details)
- By the end of the year, Telia had decommissioned 65% of its legacy IT systems to reduce complexity and costs and improve user experience
- During 2023, Telia increased the number of common products deployed in multiple countries by 43%
- By the end of the year, Telia had increased its use of common APIs across its markets by almost 30%, reducing complexity, increasing reusability and driving efficiency

By understanding its customers better, Telia is improving both the customer experience and operational efficiency.

## Case: Transforming to digital

# Reducing delivery times from days to minutes

Like any large company that has grown over a number of years as a result of numerous acquisitions, Telia has a complex set of IT solutions and processes. To ensure that it can efficiently produce, stock and deliver the products and services that its customers want to buy – in the right quantities – Telia Sweden took the decision to rebuild its B2B processes and IT solutions based on insights from customers and operational units. As a result, the company now has a model that it uses to describe customer and operational requirements and create a comprehensive map of the different paths that its customers take when they interact with it – from initial awareness to post-purchase support. This customer journey map helps Telia to understand its customers better and identify areas where it can improve both the customer experience and operational efficiency.

One of these pain points is that lead times are sometimes longer than customers would like. For example, in the past, it could take days for a customer that ordered a broadband connection to get online. Thanks to newly improved and automated processes, B2B customers that already have the requisite hardware can now get online in minutes. Those who need hardware to be delivered can usually get connected within 24 hours. The time it takes for Telia's agents to place orders on behalf of customers has been

reduced from 40-45 minutes to just 8 minutes. Customers can do it themselves, online.

Additional improvements have resulted from the introduction of the Telia Order & Care (TOCA). This is the platform that is now used by Telia Sweden sales agents, account managers, customer care agents, retail store agents and home sale agents to handle broadband orders, provide support and process payments. TOCA was built as a "single source of experience", which is a holistic approach to designing and delivering experiences that are personalized, immersive and intelligent.

Because it combines capabilities from multiple domains into one tool, TOCA increases productivity by removing the need to switch between various systems. Other benefits include reduced cost, increased business and easier maintainability, thanks to a common, reusable, standardized capability. Adaptation to any new system is challenging, but the migration of customers and agents from TOCA to the new system has been smooth, with many of them saying they want to learn.

# Delivering sustainably

Creating value for all stakeholders and society rests on being a financially, socially and environmentally resilient company – the essence of our commitment to deliver sustainably.

## Ensuring financial stability...

...through a return to growth, transformation of our cost base to improve productivity, improved structural cashflow, a strengthened balance sheet, and enabling a predictable and progressive shareholder remuneration policy

## Securing execution excellence...

...by empowering employees to deliver on our purpose within a culture that values diversity and inclusion while promoting accountability and development

## Integrating sustainability...

...into all material processes and strategies guided by a strong ethics and human rights agenda to reduce risks and maximize our positive impact on people and the planet

## Selected progress 2023

- For the 13th year in a row, Swedes recognized Telia as the most sustainable company in its industry, according to the Sustainable Brand Index survey
- Telia was ranked first in the global Technology & Telecommunications sector and second overall among all companies assessed in Global Child Forum's Children's Rights Benchmark
- Employee engagement was measured at 77/100, in line with top external benchmarks
- By the end of the year, 41% of Telia's extended leadership team were women
- Telia Estonia began rolling out 100 solar panel systems to power 100 of its mobile sites and feed excess energy to the national grid
- Telia's net-zero targets were approved by the Science Based Targets initiative
- In Sweden alone, Telia stopped approximately 30 million scam calls during 2023

Case: Delivering sustainably

# Sustainable heating and cooling in Helsinki

Located in the Pitiäjänmäki high-tech industrial area, the Telia Helsinki Data Center is a major hub for Telia Finland's network that also offers customers and partners access to carrier-neutral cloud platforms, a complete range of network and data services, and – perhaps most surprisingly – millions of hot showers each year.

With capacity for 200,000 servers, 5,000 racks and 24 MW of maximum IT power, the Telia Helsinki Data Center generates a tremendous amount of heat. Of course, with a mean yearly temperature of about 6°C, Helsinki isn't the worst place to generate heat, which is why many companies that aren't based in the Nordics also build data centers here. In fact, as a result of the cool climate, the Telia Helsinki Data Center benefits from free cooling for 95% of the year.

But rather than let all the heat it generates escape into the atmosphere, the Telia Helsinki Data Center was designed with a liquid-based cooling distribution process and a reuse system that allows excess heat to be transferred to the district heating network. Three heat pumps connected in series take water that has been heated to 30°C by the Telia Helsinki Data Center's servers and racks, transfer excess heat to the district heating network and then return the water to the data center's cooling system at a reduced temperature of approximately 20°C.

Helen, one of the largest energy companies in Finland, controls the transfer of heat from the Telia Helsinki Data Center to its production control system, adjusting power and water temperature according to ambient outdoor temperature.

As a tier III facility, the Telia Helsinki Data Center was designed with redundant cooling and its water chillers and dry coolers times. However, the transfer of excess district heating network absorbs the cooling load throughout the year. The heat began in April 2023 and, as of more than 22,000 MWh of heat had transferred to homes in Helsinki.

That's enough to heat 7,000 one-bedroom apartments but Telia projects that, as the center's capacity utilization increases, it will be capable of heating more than 20,000 bedroom apartments by 2030 in Finland. The center is a LEED/CEEEDA Gold and ISO 14001 certified facility powered by renewable electricity. Telia Helsinki Data Center is an excellent example of how data centers can be green that might otherwise have to be generated from fossil fuels.

Page 203 for 981929055

As of December, more than 22,000 MWh of heat had been transferred from Telia's data center to homes in Helsinki, Finland.

# Directors' report

# Group development in 2023

Telia Company's operating model is based on geographical areas except for the TV and Media segment. The group's operations are managed and reported by the following operating segments: Sweden, Finland, Norway, Lithuania, Estonia and TV and Media. Former segment Denmark is classified as held for sale and discontinued operations since September 15, 2023, see Note C34.

In addition to the reported operating segments, operations in Latvia, Telia Finance and Group functions are included in Other operations. Group functions include Group Strategy & Commercial, Corporate Affairs, Finance, Common Products and Services, Communications, Brand and Sustainability, and People and Culture.

## Financial highlights

SEK in millions, except key ratios, per share data and changes <sup>1</sup>	Jan-Dec 2023	Jan-Dec 2022
Revenue	88,785	85,580
Change (%) like for like <sup>2,4</sup>	1.8

1) Continuing operations if not otherwise stated.

2) See sections Alternative performance measures and Definitions.

3) See section Adjustment items.

4) Like for like excludes exchange rate effects and is based on the current group structure, i.e. including the impact of operations and excluding the impact of any disposed operations, both in the current and in the comparable period.

5) Refers to continuing and discontinued operations.

## Revenue

Revenue increased 3.7% to SEK 88,785 million (85,580) driven to some extent by increased sale of equipment, although mainly from service revenue increasing across all telco operations, which more than compensated for lower revenue generation in TV and Media.

Revenue like for like increased 1.8% as increased service revenue across all telco operations, although primarily for Sweden and Norway, more than offset lower service revenue in TV and Media.

Service revenue like for like increased 2.0% due to a positive development for both mobile and fixed service revenue across all telco operations, which more than compensated for lower service revenue attributable to advertising in TV and Media.

Revenue SEK in millions	Jan-Dec 2023	Jan-Dec 2022	Change (SEK million)	Change (%)
Sweden	35,869	35,112	757	2.2

Other operation	5,025	4,330	695	16.1
Of which Latvia	3,566	3,065	500	16.3
Eliminations	-1,814	-1,304	-510	39.1
<b>Total</b>	<b>88,785</b>	<b>85,580</b>	<b>3,204</b>	<b>3.7</b>

## Operating expenses

Operating expenses decreased by 11.7% to 84,663 (95,907) as 2023 was impacted by impairments of SEK 4,062 million mainly related to goodwill in Finland and TV and Media, whereas 2022 was impacted by impairments of SEK 19,276 million mainly related to goodwill in Finland, Norway, and Latvia. See Notes C12 and C13.

Goods and sub-contracting services purchased and change in inventories increased by 5.6% to SEK 29,732 million (28,150) driven by most markets as well as increased costs for film and program rights in TV and Media.

Operating expenses SEK in millions	Jan-Dec 2023	Jan-Dec 2022	Change (SEK million)
Goods and sub-contracting services purchased and change in inventories	-29,732	-28,150	-1,582
whereof amortization and impairment losses of film and program rights	-5,908	-5,557	-351

<b>Total</b>	<b>-84,663</b>	<b>-95,907</b>	<b>11,244</b>

## Adjustment items

Adjustment items affecting operating income amounted to SEK -5,882 million (-20,062) and were impacted by impairment charges of SEK -4,062 million mainly related to goodwill in Finland and TV and Media. In addition, 2023 was impacted by a VAT dispute provision in Norway,

see Note C30, and higher personnel redundancy costs. Adjustment items affecting operating income in 2022 were impacted by impairment charges of SEK -19,276 million mainly related to goodwill in Finland, Norway, and Latvia.

## Adjusted EBITDA

Adjusted EBITDA increased 4.5% to SEK 30,254 million (28,954) and the adjusted EBITDA margin increased to 34.1% (33.8).

Adjusted EBITDA like for like, increased 3.6% as a positive development for all telco operations, Sweden.

although mainly for Norway and Finland than compensated for a negative development for TV and Media. The latter driven by advertising revenue as a result from of the advertising market in predominantly Sweden.

Adjustment items <sup>1</sup> SEK in millions	Jan-Dec 2023	Jan-Dec 2022
<b>Within EBITDA</b>	<b>-1,861</b>	<b>-824</b>

## Operating income

Operating income amounted to SEK 4,980 million (-9,214) and was impacted by impairment charges of SEK -4,062 million mainly related to goodwill in Finland and TV and Media. Operating income in 2022 was impacted by impairment charges of SEK -19,276 million mainly related to goodwill in Finland, Norway, and Latvia.

Adjusted operating income increased to SEK 10,862 million (10,847) as improvement in Telco operations was largely offset by lower adjusted operating income for the TV and Media unit as well as for Other operations.

Operating income SEK in millions	Jan-Dec 2023	Jan-Dec 2022	Change (SEK million)	Change (%)
Sweden	6,226	5,891	335	5.7

1) See sections Alternative performance measures and Definitions.

## Financial items, taxes, net income and OCI

Financial items totaled SEK -3,876 million (-3,340) of which SEK -3,974 million (-2,976) related to net interest expenses. The increase in net interest expenses was mainly due to increased interest rates and foreign exchange rates.

Net income from continuing operations to SEK 6 million (-13,910) and Net income from discontinued operations amounted to SEK -255 million (-255).

Income taxes amounted to SEK -1,099 million (-1,355). The effective tax rate was 99.5% (-10.8). The increase in effective tax rate was mainly impacted by impairments, see note 13, and adjustment of taxes related to prior years. Adjusted for impairments the effective tax rate would have been 22.9% (22.8).

Other comprehensive income (OCI) SEK -3,280 million (7,022), mainly due to remeasurements of defined benefit liabilities and negative foreign translation differences.

## Financial position, credit facilities and cash flow

### Financial position

Goodwill and other intangible assets decreased to SEK 66,020 million (74,547), mainly due to impairments and by a reclassification of Denmark to Assets classified as held for sale, see Note C34.

Property, plant and equipment decreased to SEK 70,181 million (74,824), mainly impacted by the reclassification of Denmark to Assets classified as held for sale and by foreign exchange rate effects.

Investments in associates and joint ventures, pension obligation assets and other non-current assets decreased to SEK 6,742 million (8,171), mainly due to remeasurements of defined benefit pension plans.

Non-current interest-bearing receivables increased to SEK 8,998 million (7,629), mainly driven by market value changes on derivatives and net investments in investment bonds, partly offset by a reclassification to Current interest-bearing receivables.

Current interest-bearing receivables increased to SEK 13,896 million (9,676), mainly due to net investments in investment bonds and a reclassification from Non-current interest-bearing receivables, partly offset by a decrease in collaterals for derivatives driven by market value changes.

Assets classified as held for sale and Liabilities directly associated with assets classified as held for sale increased to SEK 8,310 million (-) and SEK 4,169 million (-), respectively, as Denmark is classified as discontinued operations. See Note C34.

Non-current borrowings increased to SEK 98,497 million (94,555), mainly impacted by issued bonds, partly offset by reclassifications to current borrowings.

Current borrowings increased to SEK 14,069 million (7,007), mainly due to reclassifications from non-current borrowings, partly offset by matured debt.

See Consolidated statements of financial position, Consolidated statements of changes in equity and related Notes to the consolidated financial statements for further details.

### CAPEX

CAPEX, excluding right-of-use assets, decreased to SEK 15,202 million (15,677) driven by a lower investment level in most units, partly offset by higher CAPEX related to licenses and spectrum in Sweden. CAPEX, excluding fees for licenses, spectrum and right-of-use assets decreased to SEK 13,628 million (15,266) driven by a lower investment level in most telco operations. Cash CAPEX decreased to SEK 14,666 million (15,146).

### CAPEX excluding fees for licenses, spectrum and right-of-use assets

Main CAPEX components were related to investments in the mobile and fixed networks, roll-out of fiber and 5G as well as customer cases. Furthermore, licenses and spectrum permits were acquired for a total amount of SEK 1,574 million, primarily in Sweden.

### Credit facilities

Telia Company deems its available bank credit facilities and updated open-market financing programs are sufficient for the present known

liquidity requirements. Telia Company's surplus liquidity (short-term investments, cash and bank, and certain securities with maturities exceeding 12 months but convertible to cash within 2 days) was in total SEK 23.2 billion (12.0) at year-end. In addition, the total available unutilized amount under committed bank credit facilities as well as overdraft and current credit facilities at year-end was SEK 14.8 billion (14.8). Available liquidity amounted to SEK 38.0 billion (26.8).

### Net debt and Net debt/EBITDA<sup>1,2</sup>

1) Refers to Adjusted EBITDA.  
2) Including continuing and discontinued operations and assets held for sale.

### Available liquidity and time to maturity<sup>1</sup>

1) Available liquidity includes cash balances, deposits, investment bonds and unutilized credit facilities.

Telia Company targets a solid, long-term investment grade credit rating, defining A- to BBB+. The credit rating of Telia remained unchanged during 2023. The rating of Telia Company for long-term is Baa1 with a stable outlook. Standard long-term credit rating is BBB+ and the term rating is A-2, both with a stable Company has a leverage target of 2.0 Debt/adjusted EBITDA.

Telia Company normally arranges its through the parent company Telia Company. Most issuances are executed under the existing EMTN (Euro Medium Term Note) framework of EUR 12 billion. The primary of external borrowing are described in and C27 to the consolidated financial

In February 2023, Telia Company issued a bond of EUR 500 million (SEK 5.6 billion) with a yield of 3.799% and with a coupon of maturing in February 2032. In March Company issued bonds with a total amount of SEK 4 billion. These bonds are separated into two tranches. The first tranche, SEK 2 billion maturing in March 2028, has a fixed and floating interest rate coupon of the 3-year bond was set at 4.39% for the fixed tranche and 4.39% + 73 basis points for the floating tranche. The coupon on the year bond was set at 4.375% per annum. The second tranche, SEK 2 billion, is a yield and Mid-swaps +110 basis points for the floating tranche. In November 2023, Telia Company issued two tranches of SEK 2 billion bonds in total of NOK 4 billion (SEK 3 billion). These bonds are separated into two tranches. The first tranche, SEK 1 billion maturing in March 2028, has a fixed and floating interest rate coupon of the 3-year bond was set at 4.39% for the fixed tranche and 4.39% + 73 basis points for the floating tranche. The coupon on the year bond was set at 4.375% per annum. The second tranche, SEK 1 billion, is a yield and Mid-swaps +110 basis points for the floating tranche.

a fixed and a floating rate tranche, and NOK 2 billion maturing in March 2034 with a fixed rate tranche. The coupon of the 5.25-year bond was set at 4.675% per annum for the fixed tranche, corresponding to a yield of 4.67%, and 3M Nibor +105 basis points for the floating tranche. The coupon of the 10.25-year bond was set at 4.790% per annum with the same yield. The proceeds from the issues will partly be used to refinance maturing, senior bonds.

During the year outstanding bonds with a nominal amount of SEK 3.4 billion (of which hybrid bonds EUR 100 million (SEK 1.2 billion)) were repaid.

The sustainability linked Revolving Credit Facility

of EUR 1,200 million (SEK 13.8 billion) signed in the third quarter of 2022 with a group of twelve relationship banks was extended for another year during the third quarter of 2023, utilizing one of the two extension options of one year each, subject to approval of the lenders. This means that the credit facility still has a tenor of 5 years and is fully eligible under the rating agencies' liquidity models. The loan facility has a clear connection to Telia's sustainability strategy, since the loan margin is linked to Telia's sustainability performance on climate, diversity and digital skills.

At year-end, the average time to maturity of Telia Company's overall debt portfolio was approximately 6.2 years (6.8).

### Debt portfolio maturity schedule – 2024 and onwards

### Cash flow, continuing and discontinued operations

Cash flow from operating activities increased to SEK 24,671 million (24,001).

Cash flow from investing activities amounted to SEK -22,058 million (-9,936). 2023 was mainly impacted by increased investments in non-current bonds and net investments in short-term investments.

Cash flow from financing activities amounted to SEK 2,653 million (-21,779). 2023 was impacted by received collateral while 2022 mainly was impacted by higher repayments of non-current borrowings, paid collateral and repurchased shares, partly offset by the partial disposal of the tower business in Sweden.

**Operational free cash flow, continuing operations**  
Structural part of Operational free cash flow increased to SEK 7,254 million (6,092) to increased adjusted EBITDA, lower excluding fees for licenses and spectrum offset by increased interest paid.

Operational free cash flow increased to million (5,124) mainly due to increased EBITDA, lower cash CAPEX excluding licenses and spectrum, partly offset by interest paid and a negative contribution working capital.

See Consolidated statements of cash and related Notes to the consolidated statements for further details.

## Significant events in 2023

- On January 16, 2023, Telia Company announced changes to its Group Executive Management team through the merger of the Communications, Brand and Sustainability functions, appointing Ola Rembe as Senior Vice President, Head of Communications, Brand and Sustainability.
- On February 10, 2023, Telia Company announced that Dan Strömberg, Senior Vice President, Head of LED (Lithuania, Estonia and Denmark) and CEO of Telia Lithuania, plans to retire from Telia Company during the summer of 2023.
- On February 16, 2023, Telia Company issued a bond of EUR 500 million under its existing EMTN (Euro Medium Term Note) program. See Note C21 and C27.
- On March 9, 2023, Telia Company issued bonds in four separate tranches with a total amount of SEK 4 billion, under its existing EMTN (Euro Medium Term Note) program. See Note C21 and C27.
- On March 24, 2023, Telia Company announced that Per Christian Mørland, Executive Vice President and Group Chief Financial Officer, has given notice of resignation due to family reasons and will be leaving Telia Company during H2 2023 to take on career opportunities closer to his home in Norway.
- On April 5, 2023, Telia Company announced the resolutions passed at the Annual General Meeting.
- On April 25, 2023, Telia Company announced the signing of a binding term sheet agreeing upon the key terms on which to sell 100% of its

Danish operations and network assets to Norlys, at an expected enterprise value of DKK 6.25 billion (approximately SEK 9.5 billion), equal to 8.9x Telia Denmark's 2022 reported EBITDA. See Note C34.

- On April 28, 2023, it was announced that the number of shares and votes in Telia Company AB (publ) during April had decreased to 3,932,109,286 due to cancellation of 157,522,416 own shares previously repurchased by the company in accordance with the resolution of the Annual General Meeting on April 5, 2023. See note C20.
- On June 27, 2023, Telia Company announced the appointment of Tim Pennington as interim Executive Vice President, Group Chief Financial Officer and a member of the Group Executive Management team, effective September 2023. Tim Pennington replaces Per Christian Mørland, who, as previously announced, will leave Telia Company at the end of September 2023.
- On July 31, 2023, Telia Company announced that the President and CEO Allison Kirkby has decided to leave the company to take on the position as Chief Executive of BT Group Plc. Allison Kirkby will remain in her role as Telia Company President and CEO until January 31, 2024, at the latest.
- On August 10, 2023, Telia Company announced the appointment of Eric Hageman as Executive Vice President, Group Chief Financial Officer and a member of the Group Executive Management team, effective September 15, 2023.
- On September 7, 2023, Telia Company announced that its targets set with the overall aim of achieving net-zero greenhouse gas (GHG) emissions across its value chain by 2040 have been approved by the Science Based Targets initiative (SBTi).

- On September 15, 2023, Telia Company announced that it has entered into a final and binding agreement to sell 100% of its operations and network assets in Denmark to Norlys a.m.b.a. (Norlys) at an enterprise value of DKK 6.25 billion, on a cash and debt-free basis. The transaction, first announced on April 25, 2023, is in line with Telia's strategy to focus on markets in which there is a clear path to securing and defending leading market positions. See Note C34.

- On September 21, 2023, Telia Company announced that Telia Sweden in a spectrum auction had secured 2x15MHz in the 900MHz band, 2x20MHz in the 2.1GHz band and 2x30MHz in the 2.6GHz band at a total cost of SEK 1.55 billion. The 900MHz band frequencies have a duration of 23 years, and the 2.1GHz and 2.6GHz frequencies have a duration of 25 years.
- On October 13, 2023 Telia Company announced that its Board of Directors had appointed Patrik Hofbauer as President and CEO, effective February 1, 2024.
- On November 23, 2023, Telia Company announced that it for the second consecutive year, had received a platinum rating from EcoVadis, the world's largest provider of business sustainability ratings.
- On November 29, 2023, Telia Company issued bonds in a total amount of NOK 4 billion, under its existing EUR 12 billion EMTN (Euro Medium Term Note) program. See Note C21 and C27.
- On December 18, 2023, Telia Company announced that it had received information from the Danish Competition Authority (DCCA) that the clearance process for the intended sale of Telia Denmark to Norlys was not yet finalized, and that the DCCA has decided to move the decision process into Phase 2. See Note C34.

## Significant events after 2023

- On January 24, 2024, Telia Company announced that the fourth quarter and full year financial results will be impacted by impairments of in total SEK 4.1 billion related to goodwill in Finland and T. See Note C12 and C13.
- On February 28, 2024, Telia Company announced that the sale of Telia Denmark received regulatory approval from the Competition Council. Telia Company expects the transaction to close in 2024. See Note C34.
- On March 4, 2024, Telia Company announced an invitation to holders of certain SEK and EUR notes for purchase subject to conditions and the restrictions described in the tender offer memorandum dated November 29, 2023. See Note C34.
- On March 12, 2024 Telia Company announced that Markus Messerer, Senior Vice President, Chief Strategy & Commercial Officer, has given notice of resignation and the Telia to pursue opportunities outside the company.
- On March 12, 2024, Telia Company announced the results of its tender offer in respect of outstanding SEK and EUR notes. See Note C34.
- On March 12, 2024, Telia Company announced the aggregate principal amount of million and EUR 350.0 million is expected to be repaid on March 13, 2024.

## Annual Report 2023 for 981929055

## Outlook for 2024

- Service revenue, like for like, is estimated to grow by low single digits.
- Adjusted EBITDA, like for like, is estimated to grow by low to mid-single digits.
- CAPEX, excluding fees for licenses, spectrum and right of use assets, is estimated to be around SEK 14 billion.
- The structural part of Operational free cash flow is estimated to be between SEK 7-8 billion.

## Leverage and credit rating target

Telia Company targets a leverage corresponding to Net debt/adjusted EBITDA in the range of 2.0-2.5x and a solid investment grade of A- to BBB+.

## Dividend policy

Telia Company intends to follow a progressive dividend policy, with a floor of SEK 2.00 per share and an ambition for low to mid-single digit percentage growth.

## Telia Company share

The Telia Company share is listed on Nasdaq Stockholm and Helsinki. In 2023 the share price in Stockholm decreased 3.5% and closed at year-end 2023, at SEK 25.73 (26.66). During the same period, the OMX Stockholm 30 Index increased 17.3%.

At year-end 2023, Telia Company's market capitalization was SEK 101 billion (109). Besides Nasdaq Stockholm and Helsinki, the share was also traded on other platforms.

As of December 31, 2023, Telia Company's issued share capital totalled SEK 13,856,271,299.20 distributed among 3,932,109,286 shares with a quotient value of SEK 3.52 per share. No shares were repurchased under the Long term Incentive Program (LTI) 2023. On April 5, 2023, the Annual General Meeting decided to make a cancellation of all held 157,522,416 treasury shares, reducing the share capital with SEK 533,709,021, and at the same time make a corresponding bonus issue of shares with SEK 533,709,021. The cancellation of shares and bonus issue was registered April 20, 2023. For further information, see sections "Share capital" and "Treasury shares" in Note C20 to the consolidated financial statements.

All issued shares have been paid in full and carry equal rights to vote and participate in the

assets of the company. At the general meeting of shareholders, each shareholder is entitled to vote for the total number of shares she or he owns or represents. Each share is entitled to one vote.

As of December 31, 2023, Telia Company's Finnish pension fund held 366,802 shares and its Finnish personnel fund 722,604 shares in the company, respectively, in total representing 0.03% of the outstanding shares.

There are no regulations in either the Swedish legislation or in Telia Company AB's Articles of Association that would limit the possibility to transfer Telia Company shares. Telia Company is not aware of any agreements between major shareholders of the company regarding the Telia Company shares.

The Board of Directors does not currently have any authorization by the general meeting of shareholders to issue new shares but has the authorization to repurchase a maximum of 10% of the company's total number of outstanding shares before the AGM 2024. In order to continue to provide the Board of Directors with an instrument to adapt and improve Telia Company's capital structure, the Board of Directors proposes that the AGM on April 10, 2024, resolves to authorize the

Board of Directors to acquire the company's shares. The authorization may be exercised one or more occasions before the AGM. The maximum number of treasury shares the company may not exceed 10% of all shares in the company.

In case of a change of control in Telia Company might have to repay certain notice, since some of Telia Company's agreements contain customary change clauses. These clauses generally also include conditions including, for example, that a change of control has to cause a negative change in the company's credit rating in order to be triggered.

For 2023, the Board of Directors proposes an ordinary dividend of SEK 2.00 (2.00), totalling SEK 79 billion (79). The dividend should be split and distributed in four SEK 0.50 per share.

The proposed dividend is based on the number of outstanding shares as of December 31, 2023, which amounted to 3,932,109,286. The proposed appropriation of each share is SEK 0.50.

# Innovation, Research and Development

At Telia all employees, regardless of their position, have a responsibility to drive innovation. Innovation cuts across businesses and operations, from the development of new products and services to process improvements and tweaks of the company's ways of working. To foster and support an innovative culture focused on customers and the company's businesses, a prototyping unit supports all operational units and enables them to experiment in their markets in the early stages of the innovation process.

New customer needs are explored by customer-driven innovation teams in each market. Common Product and Transformation management has the responsibility to further explore and drive the creation of new services or improve existing services linked to Telia's existing core business and to secure alignment with relevant international telco standards and regulations across five product areas: connectivity, communication, IT, pay-TV and financial services.

Division X has the responsibility to spearhead and accelerate activities in emerging business areas such as the IoT and data insights.

## 5G

The massive rollout of 5G radio networks is paving the way for the creation of new 5G services using internationally standardized 5G standalone (SA) technology. 5G SA technology enables 5G connectivity with certain service levels fulfilling various quality of service demands, more granular network-based positioning (including

indoor positioning), and exposure of globally standardized or industry-specific network API-based services. Industry-specific solutions combining 5G SA services with, for example, IoT/AI and cloud services is also an area of exploration.

Two new strategic innovation programs were launched during 2023 to drive the introduction of new 5G services: NorthStar with Ericsson in Sweden in February and Sirius with Nokia in Finland in December. These programs will help leading industrial companies and universities explore how 5G technology could be used in their own context, in their own development projects and in testing facilities.

While 5G development was initially driven by and focused on exploring needs from the mining and manufacturing industries, Telia now also sees transformative approaches and needs from industries such as transport, logistics, energy/utilities, health care and agriculture. As development is driven in ecosystems, across several industries and partnerships, a lot of effort has been put into public announcements about what Telia is doing to spread knowledge and awareness.

## IoT, data insights and AI

As digitalization continues and sustainability enablement becomes increasingly important for Telia's B2B customers, the company continues to scale its IoT and data insights solutions, helping its customers to increase efficiency and decrease carbon emissions.

Telia believes that the de-globalization and national autonomy trend is placing new requirements on its IoT and Data Insights solutions, and these requirements have been incorporated in the company's product development, as it explores current and future possibilities with AI services.

In 2023, Telia's IoT Connectivity solutions received three prestigious awards – the WCA B2B Service of the Year, the IoT Evolution Business Impact award and the IoT Enablement Enterprise award – in addition to being shortlisted for other awards such as the Giotel Awards Climate Action Initiative of the Year. Telia now connects more machines than people in Sweden and continues to build on its position as the largest M2M provider in the market.

Telia Crowd Insights, a service that uses anonymized and aggregated mobile network data to analyze movement patterns, and Telia's other data insight services are continuously developed to explore new application areas. Telia Travel Emission Insights was featured in a GSMA report: **The Mobile Industry and AI.**

In cooperation with Arthur D. Little, Telia produced the **Real estate industry challenges and digital solutions** report examining the current state of the industry and presenting digital solutions to help building owners reduce energy consumption, costs and CO<sub>2</sub> emissions. Telia also launched a **tool** that real estate customers, property owners and housing cooperatives can use to calculate their return on investments in smart building solutions

in terms of electrical energy consumption benefits and CO<sub>2</sub> reductions.

Telia's Smart Public Transport portfolio IoT and data insight capabilities, support customers with smarter and more sustainable public transport planning and operations. The company continues to develop these solutions to contribute to making society more accessible and sustainable.

## Patents and R&D expenses

In 2023, Telia Company continued to expand its patent portfolio by focusing on emerging and core technologies, such as 5G/4G/LTE, routing, terminal and device management, enterprise technologies and data center development. As of December 31, 2023, Telia Company had 181 patent families, a number of which are pending in several countries or patent applications, fewer than in the previous year due to the optimization of the patent portfolio.

Telia Company (continuing and discontinued operations) incurred R&D expenses of 927 million (927) in 2023.

## People

### Our people ambition

The re-invention of Telia starts with our people. We have an ambition to relentlessly continue to build a Telia designed for generations to come. We have solid ground to stand on – building on almost 200 years of successful re-inventions and of focusing on people, business, and society. We will continue to move forward with our passion to create something more and something better for our employees and our customers. Our people strategy is essential to our journey ahead and to accelerate the transformation. Our ambition is to create a Telia where our people can grow and develop and a culture that is inclusive, rights-respecting and empowering – with the opportunity for all Telia people to operate at their full potential.

### Culture and Leadership

Culture and Leadership is key to the success of Telia's transformation, and significant focus and investment have been made into culture and leadership this year.

We launched a new purpose, refreshed values and leadership framework and strategy in the past couple of years. Focus for 2023 has been to get all our people and leaders onboard on our refreshed culture and aware of the key cultural shifts going forward. Our key shifts have become even more customer focused, more aligned in goals, priorities, and ways of working, and lastly enable great collaboration across organization. In our company engagement survey this year we have moved up in perception of a strong Telia culture. We believe focusing on the key shifts going forward will take us even further on our ambition towards a stronger and more aligned culture.

In 2023 more than 8,000 employees have completed our culture workshop with our new refreshed values. More than 700 leaders have finished our leadership programs based on our key cultural shifts and refreshed values and leadership framework.

Bridging over to 2024, the cultural journey will continue with more people joining our culture workshops, an improved cultural onboarding for all our new joiners and leaders.

### YouFirst

YouFirst is our group-wide approach to employee performance evaluation and development, ensuring that we set clear expectations and priorities, coach our people to success, focus on growth and recognize and reward high performance. It is integrated in daily work through continuous dialogue between the employee and his/her leader, enabling regular performance coaching and feedback for all employees.

Performance excellence is key for us to successfully transform. During 2023 we have continued with improvements of the new framework that was introduced in 2022. For all employees and leaders the new framework optimize their impact on company results – focusing performance with greater strategic alignment, cultural shifts and personalized growth.

### Building a sustainable workforce

With a highly competitive talent market we continue to focus on attracting, retaining and nurturing diverse talent. We are actively and continuously working to future proof our workforce using strategic workforce planning and analytics in combination with targeted upskilling efforts to accelerate our

shift towards skilled profiles who are strong in automation, digital, and agile (among others).

Reskilling and upskilling initiatives are offered as equal opportunity, open for all employees on the payroll. Further, we have equitable measures to ensure we empower individuals who are underrepresented or vulnerable, by promoting these opportunities for them to benefit from.

During the year, we successfully managed to improve retention. Based on an analysis of our markets and units, we have set an ambition for Telia's workforce size, shape and composition over the coming years. Workforce changes will be a part of the broader shift towards digitalization and automation and will follow the migration away from legacy networks and products.

### Respecting labor rights

We are committed to respect the rights of our employees, confirmed by our People policy. As we are operating in a context characterized by strict labor laws and a high degree of unionization, many aspects are secured through legal compliance measures embedded in Telia's processes and through collective bargaining agreements.

### Freedom of association and the right to collective bargaining

All employees, regardless of location or employment type, have the right to choose to be represented by a trade union for the purposes of collective bargaining. No employee shall be discriminated for exercising this right. These principles are also included in the Supplier Code of Conduct, which means that we also expect all suppliers to recognize these rights. At year-end,

95% of employees were covered by collective bargaining agreements. Telia Company works with employee representatives and unions in accordance with both national and applicable collective bargaining agreements. Together with employees in the Nordic region, Telia Company has established European Works Council (EWC) that provides a representative forum for employee consultation with the Group Executive Management on transnational matters. Local companies regularly engage with unions. During the year, there has been no collective bargaining in the IC in Finland and a settlement was found in Sweden. Besides that, there has been no labor disputes or strikes or notices of strikes. The year, Telia Company carried out a reorganization that impacted employees in the group. In all cases, local companies with applicable legal obligations related to information and consultation.

### Diversity, Equity and Inclusion (DEI)

The primary focus area of 2023 for DEI is Equity and Inclusion involving the introduction of the EU's new legislation, CSDD, with how diversity is to be addressed by a material topic in the way forward. Similarly, we continued to gain momentum on our employer value proposition, our approach as an employer, taking into account the workforce we require to have to remain and thereby, sustainably profitable.

Beyond diversity, we continued to work ensuring an inclusive environment where individual within our own workforce for sense of belonging, free from prejudicial

discrimination. Various initiatives were introduced to ensure we accelerate towards this desired goal. We introduced Diversity Ambassadors and set up of a community of 3000 + Telians, engaged and informed on DE&I topics such as neurodiversity, disabilities, diversity of culture and faith, ageism and gender equality in tech and leadership. We also achieved 90% of our managers trained in Inclusive Leadership practices, by which we ensure the baseline for tackling of biased behaviour or decisioning among leaders, and of inclusive culture leadership culture.

In 2023 we introduced the word 'equity' into our

vocabulary, which allows us to acknowledge our efforts that result in fairness, taking into consideration that not all people have the same starting point. Our work to update company processes and policies to ensure our DE&I objectives and commitments are actively being worked towards is continuous, and is supported by our engagements to build awareness, and improved transparency.

Externally, we reached through events and engagements across our footprint, an audience of 160,000 people (20,000). We also increased the percentage of international talent within Telia

(in Sweden) to 10% (8), as we aspire to better reflect the market.

We were ranked as #1 on the Diversity Leaders list of Microsoft partner companies by the Gavriela Schutser analysis, and on the Statista Financial Times Europe' Diversity Leaders special report, we ranked 54 (346) on a list of 850 companies in Europe.

The focus for 2024 will continue to be Gender equality and Pay parity, and we will add on as well a greater focus on inclusion of people with disabilities, and increasing international talent so

that we continue to have the advantage by diversity to innovate and profit. We increase the number of partnerships so that we may contribute to gender the long term pipeline for tech and leadership by tackling biases and stemming stereotypes conditioning among children through intervention.

**Engagement, well-being and future working**

According to our employee engagement we have during the year continued to physical well-being while preserving and motivation. Read more in the Sustainability chapter, Diversity, inclusion and well-being.

During the year we have continued to according to our "Office first" model. is built on an office first approach that flexibility in the workplace, enabling employees to thrive together physically whilst level opportunities of working from home.

**Parental leave**

The benefit of parental leave is applicable in our markets, in accordance with local cases employees are subject to apply leave when a childbirth or adoption.

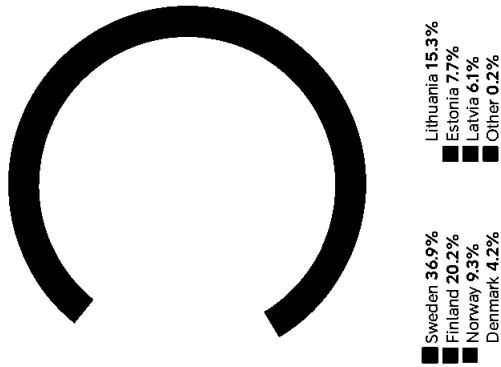

**Number of employees**

During 2023, the number of employees continuing operations decreased to 1 end, from 18,493 at year-end 2022. Employees in discontinued operations to 747 at year-end 2023, from 744 at 2022. The total average number of full employees (FTE) in 2023 was 18,963 which in continuing operations was 18,218.

**Employees, total (FTEs, %) by gender**

**Employees, total (FTEs, %) by country**

# Remuneration to executive management

## Remuneration principles for Group Executive Management 2024

The AGM on April 5, 2023, decided on guidelines for remuneration to Group Executive Management which have remained applicable during 2023. The Board of Directors has not seen the need to propose any changes to the guidelines to the Annual General Meeting on April 10, 2024, and the previously adopted guidelines are therefore still applicable.

Group Executive Management is defined as the Chief Executive Officer and the other members of the management team who report directly to the Chief Executive Officer. These guidelines are applicable to remuneration agreed, and amendments to remuneration already agreed, after adoption of the guidelines by the 2023 AGM. These guidelines do not apply to remuneration resolved by the General Meeting.

The purpose of the guidelines is to ensure that Telia Company can recruit and retain qualified employees, which is a prerequisite for the successful implementation of the Company's business strategy and safeguarding of its long-term interests, including its sustainability objectives.

Information regarding Telia Company's business strategy can be found on the Company's website.

## Total remuneration

The remuneration to the Group Executive Management shall be based on the principle that it is the total remuneration that shall be considered. The total remuneration shall be competitive, but not market leading and shall be evaluated against a set of peer group companies within the similar industry and of comparable size and complexity. It shall also create prerequisites for international recruitment and diversity within the Group Executive Management. The total remuneration may consist of fixed base salary, pension, other remuneration and other benefits. Telia Company shall not offer any variable remuneration to the Group Executive Management.

For employments governed by rules other than Swedish, pension and other benefits may be adjusted for compliance with local rules or established local practice. Such adjustments shall to the extent possible serve the overall objectives of these guidelines.

## Fixed base salary

The fixed base salary shall be based on competence, responsibility and performance. Market benchmarks should be made regularly. The individual performance shall be evaluated and be used as a basis for the annual review of fixed base salaries. The performance shall be evaluated in relation to the fulfilment of annual pre-determined targets which shall include financial, employee and sustainability targets.

## Pension, other remuneration and other benefits

Pensions and pension benefits shall be based on a defined contribution model, which means that a pension premium is paid amounting to a fixed percentage of all or part of the individual's

annual fixed base salary, unless legal requirements or collective agreements state otherwise. The pension premium may not exceed 30% of the annual fixed base salary. In addition, a cash allowance may be paid which together with the pension premium may not exceed 35% of the total remuneration.

The Company may provide other benefits in accordance with prevailing market practice from time to time. A member of the Group Executive Management may be entitled to, inter alia, car benefits as well as medical and healthcare benefits. The cost of such other benefits shall not exceed 10% of the annual fixed base salary.

Members of the Group Executive Management may for a limited period of time be offered certain benefits related to an international assignment or as a result of recruitment from another country. Such benefits may not in total exceed 25% of the annual fixed base salary.

## Conditions for termination and severance pay

The termination period for a member of the Group Executive Management may not be less than six months (twelve months for the Chief Executive Officer) upon termination by the employee and not more than twelve months upon termination by the Company. Upon termination by the Company, the individual may be entitled to a severance payment. Fixed base salary during the notice period and severance pay may together not exceed an amount equivalent to the fixed base salary for two years.

Severance pays shall not constitute basis for vacation pay or pension. Remuneration during the termination period and severance pay shall be

reduced if the individual is entitled to a new employment or if the individual conducting own business during the period or the period under which severance is paid. In addition, remuneration may not compensate for potential loss of employment. Remuneration may not be paid to the extent the employed executive is not entitled to pay. The remuneration shall be based on fixed base salary at the time of termination, amount to not more than the fixed base salary at the time of termination and be paid during the non-compete undertaking applies, for more than twelve months following the employment.

## Salary and employment conditions for employees outside of the Group Executive Management

In preparation of the Board of Directors for these remuneration guidelines, salaries for employees have been taken into account including information on the employee remuneration, the components of the remuneration and growth rates over time for the Remuneration Committee's annual review of Directors' decision when evaluating guidelines and the limitation to set out reasonable.

## Shareholding targets for the Group Management

The Board of Directors is of the opinion that considerable long-term shareholding in the Company is an important part of the alignment of interests of the Group Executive Management

the interests of the shareholders, and therefore recommends the Chief Executive Officer and other members of the Group Executive Management to build up a personal holding of Telia Company shares equivalent to 100% of the Chief Executive Officer's and 50% of other members of the Group Executive Management's annual fixed base salary (net after tax) within timeframes set by the Board of Directors.

**The decision-making process to determine, review and implement the guidelines**

The Board of Directors has an established Remuneration Committee. The Remuneration Committee's tasks include preparing the Board of Directors' resolutions in remuneration-related matters, and preparing the Board's proposal for guidelines for remuneration to the Group Executive Management. The Board of Directors shall prepare a proposal for new guidelines when there is a need for material amendments to the guidelines, but at least every fourth year, and submit it to the General Meeting. The guidelines shall be in force until new guidelines are adopted by the General Meeting. The Remuneration Committee shall also monitor the application of these guidelines as well as the current remuneration structures and compensation levels within the Company. The Board of Directors shall annually prepare a remuneration report which shall be submitted to the General Meeting for approval.

Decisions regarding remuneration shall be managed through a well-defined process that ensures that no individual is involved in the decision-making process related to their own remuneration. The Chief Executive Officer's total remuneration is decided by the Board of Directors based on the recommendation of its Remuneration Committee within the confine of these guidelines.

The total remuneration to the other members of the Group Executive Management is approved by the Remuneration Committee, based on the Chief Executive Officer's recommendations.

**Deviation from the guidelines**

The Board of Directors may temporarily resolve to derogate from the guidelines, in whole or in part, if in a specific case there is special cause for the derogation and a derogation is necessary to serve Telia Company's long-term interests, including its sustainability, or to ensure the group's financial viability. As set out above, the Remuneration Committee's tasks include preparing the Board of Directors' resolutions in the remuneration related matters. This includes any resolution to deviate from the guidelines.

**Long-term incentive program 2023/2026**

The AGM held on April 5, 2023, resolved to launch a long-term incentive program (LTI) comprising of approximately 250 key employees. This program is not available for the members of Group Executive Management due to this being a requirement of our largest owner (the Swedish state). The purpose of the program is to strengthen the company's ability to recruit and retain talented key employees, create a long-term confidence in and commitment to the group's long-term development, align key employees' interests with those of the shareholders, increase the part of the remuneration that is linked to the company's performance and encourage shareholding. The program rewards performance measured over a three-year period, is capped to a maximum value of 60% of the annual base salary and is equity based (delivered in Telia Company AB shares). A prerequisite for pay-out from the LTI program is the continuous employment during the length of the program.

The targets are Cash flow, Return on Capital Employed (ROCE), Total Shareholder Return (TSR) and Environmental, Social and Governance (ESG). The final allotment of Telia Company AB shares will be based 25% on Cash flow, 20% on a third-year final target for ROCE, 40% on TSR compared to a corresponding TSR development of a pre-defined peer group of companies and 15% on the ESG part. ESG is defined by three separate performance conditions based on Climate, Digital Inclusion and Privacy which have been set in line with targets in the Company's annual and sustainability reporting. The three ESG performance conditions entail 5% weight respectively.

The maximum number of Performance Shares a participant can receive is based on 30% of the participant's annual salary and related to the share price.

Cash flow represents 25% of the Performance Shares (or 7.5% of the participant's annual salary):

- If 100% (or above) of the Cash flow target is met, 100% of Performance Shares under the Cash flow part will be subject to allotment.
- If less than 90% of the Cash flow target is met, no Performance Shares under the Cash flow part will be subject to allotment.
- If 90% of the Cash flow target is met, 25% of Performance Shares under the Cash flow part will be subject to allotment.
- If between 90 to 100% of the Cash flow target is met, a proportionate amount of Performance Shares under the Cash flow part will be subject to allotment.

ROCE represents 20% of the Performance Shares (or 6% of the participant's annual salary):

- If 100% (or above) of the Company's ROCE

target is met, 100% of Performance Shares under the ROCE part will be subject to allotment.

- If less than 90% of the Company's ROCE is met, no Performance Shares under the ROCE part will be subject to allotment.
- If 90% of the ROCE target is met, 20% of Performance Shares under the ROCE part will be subject to allotment.
- If between 90 to 100% of the ROCE target is met, a proportionate amount of Performance Shares under the ROCE part will be subject to allotment.

The TSR part represents 40% of the Performance Shares (or 12% of the participant's annual salary):

- If the Company's TSR is ranked first compared to the defined peer group of companies, 100% of the Performance Shares under the TSR part will be subject to allotment.
- If the Company's TSR is ranked second, 75% of the Performance Shares under the TSR part will be subject to allotment.
- If the Company's TSR is ranked third, 50% of the Performance Shares under the TSR part will be subject to allotment.
- If the Company's TSR is ranked fourth, 25% of the Performance Shares under the TSR part will be subject to allotment.
- If the Company's TSR is ranked fifth or below, no Performance Shares under the TSR part will be subject to allotment.

The ESG part represents 15% of the Performance Shares (or 4.5% of the participant's annual salary) (or above) of the ESG target:

- If 100% (or above) of the ESG target is met, 100% of Performance Shares under the ESG part will be subject to allotment.
- If the minimum level is not reached, a proportionate amount of Performance Shares under the ESG part will be subject to allotment.

- If the minimum level is reached, 25% of Performance Shares under the ESG part will be subject to allotment
- If between the minimum level and 100% of the ESG target is met, a proportionate amount of Performance Shares under the ESG part will be subject to allotment.

The program may be repeated annually. Similar programs were launched in 2010-2022. The prevalence of an LTI program is subject to the approval of the AGM. For more information on Telia Company's LTI programs, see Note C32 to the consolidated financial statements.

## Legal and administrative proceedings

In its normal course of business, Telia Company is involved in a number of legal proceedings. These proceedings primarily involve claims arising out of commercial law issues and matters relating to telecommunications regulations and competition law. For further information regarding legal and administrative proceedings see Note C30.

## Parent company

The parent company Telia Company AB (Corporate Reg. No. 556103-4249), which is domiciled in Stockholm, comprises group executive management functions including the group's

internal banking operations. The parent company has no foreign branches.

Revenue and Goods and services purchased increased to SEK 2,024 million (1,713) and SEK -1,411 million (-1,107) respectively mainly due to increased Revenue and Goods and services purchased related to film and program rights.

Financial items, net 2023 increased to SEK 480 million (-5,572). 2023 was impacted by dividends from subsidiaries of SEK 6,641 million and positive foreign exchange rate gains partly offset by impairments of Telia Finland Oyj of SEK 2,450 million, Telia Norge AS of SEK 2,200 million and TV Media Holding AB of SEK 350 million. 2022 was negatively impacted by impairments of Telia Norge AS of SEK 8,600 million and Telia Finland Oyj of SEK 6,350 million, offset by the capital gain of SEK 11,055 million from the disposal of Telia Towers Sweden AB.

Non-current assets decreased to SEK 150,382 million (153,316) mainly due to decreased shares in subsidiaries and decreased non-current interest-bearing receivables from group companies.

Current assets increased to SEK 47,401 million (36,833) mainly due to increased cash and bank and short-term investments.

Untaxed reserves decreased to SEK 5,539 million (5,862) due to a net reversal of equalization reserves.

Non-current liabilities increased to SEK 83,127 million (79,871) mainly impacted by issued bonds and foreign exchange rate effects, partly offset by reclassifications to current liabilities.

Our Business

Our Strategy

Directors' Report

Sustainability

Financials

Current liabilities and current provisions increased to SEK 43,546 million (32,831) mainly due to increased interest-bearing liabilities, unpaid dividend liability and reclassifications from non-current liabilities.

The equity/assets ratio was 31.2% (35.7), assuming a dividend of SEK 2.00 per share.

The average number of full-time employees was 250 (271).

## Proposed appropriation of earnings

Proposed Appropriation of earnings:

	SEK
Non-restricted equity excluding net income	47,729,269,699
Net income	1,748,562,460
<b>Total</b>	<b>49,477,832,159</b>

The board proposes that this sum be appropriated as follows:

	SEK
SEK 2.00 per share dividend to the shareholders <sup>1)</sup>	7,864,218,572
To be carried forward	41,613,613,587
<b>Total</b>	<b>49,477,832,159</b>

<sup>1)</sup> Based on outstanding shares as per December 31, 2023.

The dividend should be split and distributed into four equal tranches of SEK 0.50 April 2024, August 2024, November 2024 and February 2025.

The Board of Directors is of the opinion that the proposed dividend, according to 18 Section 4 of the Swedish Companies Act, is justifiable. After distribution of the proposed dividend, the equity of the company will be sufficient with respect to the needs and risks of the operations. Also, the group are deemed to have a satisfactory liquidity, a consolidation need that is satisfactory general financial position and a satisfactory general financial position.

The full statement by the Board of Directors is included in the AGM documentation.

AGM related documents are available at [www.teliacompany.com/AGM](http://www.teliacompany.com/AGM)

# Country development in 2023

## Sweden

The build-out of 5G continued at a high pace and population coverage reached 82% at the end of the year. Also, the modernization of the 4G network continued with the aim of further strengthening the customer experience, something that also this year was underlined by Telia's mobile network again was ranked as the best in Sweden by the independent benchmarking company umlaut. Another important event was that Telia secured spectrum in the 900MHz, 2.1GHz and the 2.6GHz bands, allowing Telia to have the leading spectrum position in the market as of 2026. The spectrum will be used to improve and develop Telia's national 4G and 5G networks, including rural areas with insufficient coverage and along the railways.

During the year, Telia continued to make progress to further improve and strengthen the customer experience for both its consumer and enterprise customers. Something that for example became apparent from Telia coming out on top in SKI's yearly survey around TV customer satisfaction, as well as from the launch of a new and improved mobile portfolio containing more flexibility, optionality, and value-added services. For its enterprise customers, Telia further cemented the position as the natural digitalization partner of choice from for instance launching the cloud based and easy to use communication solution, Telia Smart Connect. Telia's strong position in the Enterprise segment was also confirmed by Telia

Cygate being awarded European service provider of the year by Hewlett Packard Enterprises.

Consumer segment service revenue increased by 0.8% as strong TV- and Broadband revenue development more than compensated for a continued decline in fixed Telephony revenue. In the Enterprise segment, service revenue increased 3.0% despite also seeing a continued decline in fixed Telephony revenue. This represents a substantial improvement compared to previous years and a great proof point of Telia's strong position, trusted brand and ability to provide high quality services and solutions to Swedish enterprise customers.

Revenue increased 2.2% to SEK 35,869 million (35,112) and like for like, revenue increased 2.1%, driven mainly by increased service revenue and partly also increased equipment sales.

Service revenue, like for like, increased 1.8% as growth in mobile-, TV-, Broadband- and Business solutions revenue more than compensated for continued pressure on fixed Telephony revenue.

Adjusted EBITDA increased 0.8% to SEK 13,615 million (13,508) and the adjusted EBITDA margin decreased to 38.0% (38.5). Adjusted EBITDA like for like increased 1.2%, supported by service revenue growth and cost efficiencies realized.

### SEK in millions, except margins, operational data and changes

	Jan–Dec 2023	Jan–Dec 2022

<sup>1)</sup> Restated, see Note C1.

CAPEX excluding fees for licenses, spectrum and right-of-use assets decreased to SEK 3,252 million (3,312), mainly driven by lower network investments.

The number of mobile subscriptions increased by ~833,000 during the year driven by post-paid subscriptions used for machine related services. Fixed broadband subscriptions increased by ~1,000 and subscriptions increased by ~92,000 of the year.

## Finland

Work to close-down the 3G network was initiated during the year and at the same time Telia continued to modernize its mobile network and roll-out 5G. As a result, 5G population coverage reached 90% by the end of the year, compared to 79% a year ago. The significant efforts put in to improving the network over the last few years was also visible from Telia winning several awards regarding network quality. Furthermore, Telia shared the top position in the Finnish Digital Successes 2023 survey which assesses the customer experience in digital services of the largest Finnish companies and Telia also saw a significant improvement in the Sustainable Brand Index ranking 2023.

Revenue increased 91% to SEK 16,545 million (15,171) and like for like, revenue increased 1.1%, driven by increased service revenue. The effect of exchange rate fluctuations was positive by 8.1%.

Service revenue, like for like, increased 2.1% mainly supported by a 2.7% growth in mobile service revenue, driven by higher ARPU, but also partly by fixed service revenue increasing 1.8% driven mainly by increased Business solutions revenue.

Adjusted EBITDA increased 14.6% to SEK 5,093 million (4,443) and the adjusted EBITDA margin increased to 30.8% (29.3). Adjusted EBITDA like for like increased 6.2%, driven by increased service revenue coupled with lower operational expenses. The latter related to resource and marketing efficiencies realized, as well as lower energy costs following lower energy prices compared to previous year.

Operating income amounted to SEK -1,574 million (-8,716). Both years were impacted by impairment charges of SEK -2,800 million and SEK -9,500 million, respectively. See Note C12.

CAPEX excluding fees for licenses, spectrum and right-of-use assets decreased to SEK 1,494 million (1,566).

The number of mobile subscriptions decreased by ~58,000 during the year driven by both post- and prepaid subscriptions. Fixed broadband subscriptions increased by ~12,000 and TV subscriptions decreased by ~14,000 during the year.

## Norway

In parallel with modernizing the mobile network, the 5G rollout continued to make good progress, and by year-end 5G population coverage reached 94% compared to 84% a year ago. Furthermore, Fjordkraft's mobile customers were migrated to Telia's award-winning mobile network, making Telia Norway the largest mobile wholesale provider in the country. In the Enterprise segment Telia Norway deepened its collaboration with Telia Sweden's subsidiary Telia Cygate, and both Telia as well as Phonero continued to be successful in the Public segment and signed agreements with for instance the municipalities of Oslo and Tromsø for connectivity services. In the Consumer segment, Telia continued to strengthen its position as the daring challenger and launched new and improved portfolios for both mobile telephony and wireless broadband connectivity.

Revenue increased 0.6% to SEK 15,114 million (15,022) and like for like, revenue increased 5.0% as increased service revenue more than compensated for lower equipment sales. The effect of exchange rate fluctuations was negative by 4.4%.

Service revenue, like for like, increased by 4.8%, driven predominantly by mobile service revenue increasing 6.5%, but partly also by a 1.7% increase for fixed service revenue. The latter primarily due to a positive development for revenue from TV and Business solutions.

Adjusted EBITDA increased 4.6% to SEK 7,062 million (6,750) and the adjusted EBITDA margin increased to 46.7% (44.9). Adjusted EBITDA like for like increased 9.2% driven predominately by the growth for service revenue.

CAPEX excluding fees for licenses, spectrum and right-of-use assets declined to SEK 2,381 million (2,932).

The number of mobile subscriptions decreased by ~39,000 during the year, of which ~15,000 attributable to post-paid subscriptions used for machine-to-machine related services. Fixed broadband subscriptions decreased by ~1,000 and TV subscriptions decreased by ~11,000 during the year.

## Lithuania

Telia finalized during the summer its mobile network upgrade and 5G roll-out, following which the radio access network was fully switched to the new provider Ericsson and a population coverage of 99% was shortly reached thereafter. Furthermore, Telia came out as the operator having the fastest mobile internet in the country in a benchmarking study performed by the regulator. Telia's network also displayed the largest improvement amongst all operators compared to the previous study. Telia's strong network capabilities and credentials was also demonstrated via Telia, on an exclusive basis, being selected as the sole provider of internet and communications solutions for the NATO summit in Vilnius, as well as high-speed internet and digital communication for the American embassy and President Joe Biden's delegation. Something that resulted in Telia receiving commendations from the White House.

Revenue increased by 15.3% to SEK 5,516 million (4,784) and like for like, revenue increased by 6.7%, driven by increased service revenue. The effect of exchange rate fluctuations was positive by 8.6%.

Service revenue, like for like, increased by 7.6%, fairly equally driven by growth for mobile and fixed service revenue. Mobile service revenue growth of 9.1% was the result of customer base expansion coupled with also a growing ARPU, whereas fixed service revenue increased by 6.2% due to strong growth in Broadband and Business solutions revenue.

Adjusted EBITDA increased by 19.7% to SEK 2,019 million (1,688) and the adjusted EBITDA margin increased to 36.6% (35.3). Adjusted EBITDA like for like increased by 10.7%, attributable to the growth in service revenue, which more than compensated for a somewhat higher cost level.

CAPEX excluding fees for licenses, spectrum and right-of-use assets decreased to SEK 455 million (597).

The number of mobile subscriptions increased by ~39,000 during the year. Fixed broadband subscriptions decreased by ~1,000 and TV subscriptions increased by ~4,000 during the year.

### SEK in millions, except margins, operational data and changes

## Estonia

Throughout the year Telia continued to roll-out 5G at a high pace, resulting in 5G population coverage increasing to 77% at year-end compared to 43% a year ago. Telia also closed its 3G network following a gradual countrywide dismantling and agreed with renewable energy solutions provider Sunly on the construction and operation of solar panel systems to power 100 of Telia's mobile sites for the next 15 years.

Revenue increased by 14.0% to SEK 4,145 million (3,637) and like for like, revenue increased by 5.5%, as increased service revenue more than offset somewhat lower equipment sales. The effect of exchange rate fluctuations was positive by 8.4%.

Service revenue, like for like, increased by 6.9%, driven by mobile- and fixed service revenue increasing 8.1% and 6.5%, respectively. Mobile service revenue growth was attributable to an expanding ARPU and subscriber base, whereas the fixed service revenue increase was predominantly driven by growth in Broadband, Business solutions and Other fixed revenue, which together more than offset a continued decline in fixed Telephony revenue.

Adjusted EBITDA increased by 21.6% to SEK 1,618 million (1,330) and the adjusted EBITDA margin increased to 39.0% (36.6). Adjusted EBITDA like for like increased by 12.6%, attributable to the growth in service revenue.

CAPEX excluding fees for licenses, spectrum and right-of-use assets increased to SEK 426 million (374).

The number of mobile subscriptions increased by ~34,000 during the year, of which ~32,000 attributable to post-paid subscriptions used for machine-to-machine related services. Fixed broadband subscriptions decreased by ~3,000 and TV subscriptions decreased by ~6,000.

### SEK in millions, except margins, operational data and changes

	Jan-Dec 2023	Jan-Dec 2022

TV	194	200
Employees	1,222	1,269

1) Restated, see Note C1.

## TV and Media

The advertising market weakened significantly during the year, especially in Sweden, resulting in that advertising revenue materially declined. To ensure efficiency, competitiveness, and relevance in an increasingly digital and competitive environment, a unit wide business transformation was launched. As part of this, C More was consolidated into TV4 and MTV, with new services launched as a result, including a Hybrid Video on Demand service (HVOD).

Revenue decreased by 5.0% to SEK 8,386 million (8,829) and like for like, revenue decreased by 6.7%. The effect of exchange rate fluctuations was positive by 1.7%.

Service revenue like for like decreased by 6.9% as a 3.6% increase for TV revenue was more than offset by a 12.6% decline for advertising revenue following a significant weakening of the advertising market in predominately Sweden.

Adjusted EBITDA decreased to SEK -225 million (276) and the adjusted EBITDA margin decreased to -2.7% (3.1). Adjusted EBITDA like for like decreased to SEK -221 million (276) mainly due to the pressure on advertising revenue.

Operating income amounted to SEK -2,149 million (-852). Both years were impacted by impairment charges of SEK -900 million and SEK -316 million, respectively. See Note C12.

CAPEX excluding fees for licenses, spectrum and right-of-use assets increased to SEK 185 million (182).

The number of direct subscription video on demand (SVOD) subscriptions increased by ~17,000 during the year.

### SEK in millions, except margins, operational data and changes

	Jan-Dec 2023	Jan-Dec 2022
Revenue	8,386	8,829
Change (%) like for like	-6.7

Employees <sup>1</sup>	1,253	1,264

<sup>1)</sup> Restated, see Note C1.

## Other operations

Other operations mainly include operations in Latvia, Telia Finance and Group functions. SIA Telia Latvija, a leading enterprise telecom services provider in Latvia, was divested on June 1, 2022.

Revenue increased by 16.1% to SEK 5,025 million (4,330) and like for like, revenue increased by 8.4% driven by Latvia and Telia Finance.

Service revenue, like for like, increased by 9.2%, mainly driven by increased service revenue in Latvia and Telia Finance.

Adjusted EBITDA increased 15.7% to SEK 1,072 million (959) and the adjusted EBITDA margin declined to 21.3% (22.1).

In Latvia, revenue increased by 16.3% to SEK 3,566 million (3,065) and like-for-like, revenue increased by 6.4%, driven both by increased service revenue and equipment sales. Adjusted EBITDA increased by 15.7% to SEK 1,029 million (890) and like-for-like adjusted EBITDA increased 6.9%, as increased service revenue and equipment sales more than enough compensated for a higher cost level. The number of mobile subscriptions increased by 46,000 during the year.

Income from associated companies increased to SEK 97 million (96).

CAPEX, excluding fees for licenses, spectrum and right-of-use assets, decreased to SEK 5,435 million (6,303), of which SEK 0.6 billion was related to Latvia, SEK 0.8 billion to Telia Finance and SEK 3.9 billion to the central CPS unit and referring to items such as IT systems, mobile networks, products and platforms for the other segments to benefit from.

### SEK in millions, except margins, operational data and changes

	Jan–Dec 2023	Jan–Dec 2022

## Discontinued operations (Denmark)

A final and binding agreement to sell Telia's operations and network assets in Denmark to Norlys was signed. The transaction, first announced on April 25, 2023, is in line with Telia's strategy to focus on markets in which there is a clear path to securing and defending leading market positions. Based on the signed sales agreement, the operations and network assets in Denmark to be sold are classified as held for sale and discontinued operations as of September 15, 2023. Danish units that will not be sold are included in Other operations within continuing operations. For more information on discontinued operations, see Note C34.

Revenue increased by 8.2% to SEK 5,679 million (5,247) and like for like, revenue increased by 0.3%. The effect of exchange rate fluctuations was positive by 7.9%.

Adjusted EBITDA increased by 7.2% to SEK 1,473 million (1,374) and the adjusted EBITDA margin decreased to 25.9% (26.2). Adjusted EBITDA like for like decreased by 5.9%.

CAPEX excluding fees for licenses, spectrum and right-of-use assets increased to SEK 734 million (692).

### SEK in millions, except margins, operational data and changes

Margin (%)	25.9	26.2
CAPEX excluding fees for licenses, spectrum and right-of-use assets	734	692

## Risks

# Telia Company's Risk Universe

Telia operates across seven geographical markets, offering a broad range of products and services spanning telecommunication, information technology and media. All markets are highly competitive and regulated. Telia has defined risk as anything that could have a material adverse effect on the achievement of its goals. Risks can be threats, uncertainties or lost opportunities relating to the company's current or future operations or activities.

Telia has an established Enterprise Risk Management Framework that it uses to regularly identify, analyze, assess and report strategic, business, financial, ethics and sustainability risks, and to manage such risks as appropriate. The Telia Risk Universe consists of a Principal Risk taxonomy based on Principal Risk areas and sub-risk areas that are identified and prioritized together with Group Executive Management, as the most material risks that impact the company's objectives and operations. The Principal Risks are assessed and aggregated across the whole company using the Enterprise Risk Management Framework. Risk management is an integrated part of Telia's business planning process and monitoring of business performance.

**On the next page the main risks that could impact Telia's operations are presented.**

## Commercial risks

Risk materiality: ●●●●○  
Risk trend: →

### Description

The macroeconomic situation is stabilizing, but there is a risk of setbacks. Higher interest rates and continued inflationary pressure are squeezing consumers and organizations. This situation has created a market trend of B2C customers migrating to low-fill brands and B2B customers scrutinizing their telecom and IT budgets.

The telecommunication, information technology and media industries are undergoing a historical transformation and there is an increasing need for innovation in how Telia conducts business and ensures growth to compete with existing and new types of competition. The company needs to continue to improve customer experiences and offerings, but also to explore new innovative propositions and value-accretive roles in evolving and emerging digital ecosystems that have a natural connection to its core telco assets.

### Potential impact

Failure to anticipate and respond to the current economic headwinds and industry dynamics, and to continue to drive a change agenda to meet developing demands in the market, may affect Telia's customer relationships, service offerings, position in the value chain and financial result.

### Mitigating activities

- Sustaining a premium or leadership position in network and trust is fundamental. This also supports pricing activities to offset inflationary pressure
- Increased focus on customer experience and leading, monitoring and reacting to changes in customer and market behavior
- Focused execution of digital transformation to ensure future business agility
- Focus on partner collaboration to drive value creation

Risk materiality: Low ● Medium ●● High ●●● Very high ●●●●

Risk trend: Stable → Increasing ↗ Decreasing ↘

## Corruption and unethical business practices risks

Risk materiality: ●●●●○  
Risk trend: →

### Description

Telia is exposed to the risk of corruption in its business operations despite a strong and prioritized anti-bribery and corruption (ABC) program. The risk of corruption – including conflicts of interest – is present in, for example, contracting with third parties and third-party management, the complexity and length of Telia's supply chains, and the geographical reach of Telia's global business. There is also the inevitable risk of wrongly motivated human factors in business operations, and all of this together leads to a risk of non-compliance with applicable regulations and Telia's internal rules. These risks are even more prevalent in the current macroeconomic landscape characterized by high inflation and living costs.

### Potential impact

Actual or perceived corruption or unethical business practices may damage Telia's reputation. Actual corruption may result in the loss of trust and customers, financial penalties and debarment from procurement and institutional investment processes.

### Mitigating activities

- Launch of the updated Telia Code of Conduct
- ABC program implemented in all parts of the organization. This includes conflict of interest disclosures
- Continuous development and testing of ABC-related controls, including implementation of measures to improve automatic controls
- Increased focus on ABC training and workshops in general during Q1/Q2 2023

See the chapter on **Anti-bribery and corruption**.

## Cybersecurity, network quality and resilience risks

Risk materiality: ●●●●○  
Risk trend: →

### Description

Telia's ability to deliver high-quality and secure services to its customers and critical for the company's commercial success. Maintaining this ability requires networks and systems that are secure.

Hybrid warfare is the new reality, and geopolitics and cyberspace are inextricably linked. Cyberattacks aimed directly at Telia's customers are increasing and becoming more sophisticated. Telia is also subject to a larger number of critical services, which are also subject to a larger number of security incidents, such as the Network and Information Security Act (NIS 1) and the Digital Operational Resilience Directive 2 (NIS 2).

### Potential impact

Successful cyberattacks may lead to loss of data and disruption in service delivery. Failure to meet customers' security and privacy requirements may lead to sanction costs, fines, contract damage to Telia's reputation and customer churn. New security and national security regulatory requirements may impact Telia's ability to build its infrastructure and ways of working, leading to cost increases. Failure to transform legacy technology platforms in Telia's value chains will result in decreased and increased cybersecurity vulnerabilities.

### Mitigating activities

- Business continuity planning, incident management and management
- A cybersecurity program is in place, ensuring Telia has the ability to protect itself against and recover from security threats
- The new security requirements are being reviewed and new dedicated compliance program
- An operational excellence program proactively assesses weaknesses in the operational capabilities of all business services and platforms

See the chapter on **Privacy and security**.

## Environment risks

 Risk materiality: ●●●○  
 Risk trend: ↗

### Description

Telia notes increasing requirements and expectations from customers, policymakers, investors and others to manage negative impacts on the climate and the environment. In 2022-2023, this has formalized into a legal trend whereby the Corporate Sustainability Reporting Directive (CSRD) and Corporate Sustainability Due Diligence Directive (CSDDD) are making work that was once voluntary mandatory. Due to climate change, increasing numbers of extreme weather events pose risks to Telia's infrastructure and services. The company therefore needs to focus on playing its part by achieving the environmental targets it has set for 2030 and 2040.

### Potential impact

Failure to deliver on Telia's commitments and goals and meet stakeholders' requirements and/or expectations may lead to a negative reputation, loss of revenues, inability to attract talent or limited access to capital. Increasing electricity prices, scarcity of renewable energy certificates or the introduction of carbon taxation will increase operational costs. Extreme weather may lead to operational disruptions and drive the need for additional investments.

### Mitigating activities

- Ambitious short-, mid- and long-term environmental goals, including those covering greenhouse gas (GHG) emissions and waste. This includes the Science Based Targets initiative and related programs
- Further integration of sustainability into the 2024-2026 strategy
- Continued work to get Telia's suppliers to set science-based targets
- Increased focus on reducing the environmental footprint of Telia's products and services

See the chapter on **Climate and circularity** and Telia's Task Force on Climate-related Financial Disclosures (TCFD) report in **Sustainability Note S4**.

## Execution and Transformation risks

 Risk materiality: ●●●○  
 Risk trend: ↗

### Description

To effectively execute its strategy, Telia invests in business transformation programs to improve agility and flexibility, reduce cost and complexity and increase competitiveness. The success of transformation and growth initiatives depends on managing the current inflationary headwinds, the company's ability to execute, the delivery of suppliers and partners, and the dynamics of fast-shifting customer behavior. AI is a prioritized technology for Telia as it has the potential to improve customer experience, optimize network performance and enable new business models. However, it is important that this technology is adopted in a responsible way.

### Potential impact

Failures in the execution of Telia's business transformation and growth initiatives could lead to delayed or reduced value creation. This would defer revenue upside, cost reductions and efficiency gains from transformed operations. Several risks and opportunities have been identified in relation to AI, covering areas such as commercial, talent attraction, security, privacy and sourcing.

### Mitigating activities

- Continued strengthening of the strategy-to-execution process by simplifying, digitalizing and improving ways of working
- Realignment of the transformation ambition to allow for a more focused approach and reduced investments
- Full focus on transformation initiatives with risk for delay. This includes internal reviews and following up with suppliers
- Coordinated approach with clear governance to manage the deployment of AI
- Continued focus on agile work transition

## Impairment losses and asset retirement obligations risks

 Risk materiality: ●●●○  
 Risk trend: ↗

### Description

Factors affecting the markets Telia operates in and changes in economic, regulatory, business or political and societal flows may negatively affect management's expectation of future flows. Telia may then be required to recognize asset impairment losses, including but not limited to goodwill.

Telia has made provisions for asset retirement obligations dismantling and handling of assets used in its operation impregnated telephone poles and restoration of mobile network sites.

### Potential impact

Significant adverse changes in the economic, regulatory political and societal environment, as well as in business flows, require Telia to recognize asset impairment losses with effect on operating income.

Costs associated with dismantling and handling of assets exceed the estimated asset retirement obligations, with impact on operating income and cash flow.

### Mitigating activities

- Management constantly reviews and refines business strategy to make exit decisions or take other actions to effect on business strategy
- Asset retirement provisions are reviewed and updated as best estimate of the obligations

## Macroeconomic and geopolitical risks

Risk materiality: ●●●○  
Risk trend: ↗

### Description

The macroeconomic environment continues to impose significant financial risks for Telia, although some events have stabilized, and the related effect has been easier to assess. Current key risk factors include a risk of continued high inflation, increasing interest rates and continued volatility in the energy market.

The length, impact and outcome of ongoing geopolitical conflicts such as the war in Ukraine and the Israel-Gaza crisis are highly unpredictable. Tensions between China and Taiwan contribute to increasing supply-chain uncertainties that may develop into a global semiconductor shortage.

### Potential impact

Challenges in the macroeconomic environment are impacting Telia in several ways. Examples include increased costs – particularly those related to funding, the supply chain and personnel – and changes in customer buying patterns, including a negative impact on the advertising business. Supply-chain disruptions will likely lead to further price increases and delivery challenges for Telia.

Increased geopolitical tension may increase the risk of cyberattacks that directly target the operations of Telia and its customers, or of cyberattacks that target other critical infrastructure in society, thereby having an indirect impact on the company.

### Mitigating activities

- Structural cost takeouts and a more systematic approach to pricing
- Further improved control of capital expenditure
- Risk management work relating to financial markets risks and funding
- Active monitoring of the geopolitical risk landscape (e.g., Ukraine and Taiwan) and assessing any impact on Telia's business
- Risk assessments and preparation of contingency plans
- Increased crisis coordination throughout the group to mitigate potential negative impacts

## Privacy risks

Risk materiality: ●●●○  
Risk trend: →

### Description

Vast amounts of data are generated in and through Telia's services and networks and Telia has a responsibility to ensure that it processes this data in accordance with laws and protects it from misuse, loss, unauthorized disclosure or damage. Data protection regulations are becoming increasingly strict, while technological developments are enabling new, efficient and cost-effective cloud-based solutions. A balance between these two trends needs to be achieved. Privacy is also linked to the increased use of AI, and it is important that Telia manages how personal data is used.

### Potential impact

Potential issues related to privacy compliance or personal data breaches may lead to violation of data subjects' privacy. Failing to comply with national and EU legislation may result in significant financial penalties and loss of trust.

### Mitigating activities

- Continuous compliance reviews of General Data Protection Regulation (GDPR) implementation
- Ongoing implementation of common tools and processes to further improve the quality and control of compliance with privacy requirements
- Mandatory training on data protection and privacy awareness for all employees
- Continuous tracking of legal and regulatory changes and technological and operational developments

See the chapter on **Privacy and security**.

## Regulation and licenses risks

Risk materiality: ●●●○  
Risk trend: ↘

### Description

Telia operates within a heavily regulated industry and in a landscape of evolving legislation and court precedent over the years, the regulatory focus in the EU has moved away from concentrating on network competition to place greater emphasis on sustainability, the digital economy and security. The regulatory framework encompasses various aspects, including competition-related challenges, potential litigations, compliance obligations and other legal compliance issues.

### Potential impact

Regulatory changes, fragmented local implementation and interpretation, as well as decisions by regulatory authorities including the granting or amending of telecom licenses, permits and increasing national security requirements, require Telia's strategy, ability to conduct business and financial performance. Furthermore, non-compliance with competition laws and regulations could lead to legal sanctions, financial penalties, reputational damage and disruption of business operations.

### Mitigating activities

- Proactive outreach to legislators and regulators when adopted and implemented, as well as when laws are amended
- Continuous legal and regulatory monitoring and assistance throughout the organization
- Working closely with the line organization to build capacity and ensure the integration of legal analysis and advice early in relevant processes

## Supply chain and third-party management risks

 Risk materiality: ●●●○  
 Risk trend: ↗

**Description**  
 Telia relies on a vast number of suppliers, partners, and customers. Despite efforts to conduct due diligence and audits, suppliers and business partners may be in violation of Telia's Supplier Code of Conduct, other requirements, laws and regulations. Third parties may also be in scope for national or international sanction programs, negatively affecting Telia's business. Even though the severe semiconductor shortage that started in 2020 is over, certain product categories still require additional focus to secure a stable supply chain.

**Potential impact**  
 The failure of Telia's suppliers and partners to adhere to relevant laws, regulations and supplier requirements may violate human and labor rights. Such failures or perceived failures may also damage the perception of Telia. There is also a related supply chain risk as suppliers that do not comply with laws and regulations may need to terminate their operations. Violation of national and international sanction programs may result in penalties and damage to Telia's brand and reputation.

**Mitigating activities**

- Telia's Supplier Code of Conduct is included in supplier contracts
- A project is ongoing to update the process for screening and due diligence associated with suppliers, customers and other business partners
- A risk-based supplier due diligence process is in place
- Screening and due diligence processes are performed for high-risk suppliers, partners and customers
- Ongoing work with the sourcing category strategies, in collaboration with stakeholders, to keep track of, and avoid, dependencies where possible

See the chapter on **Responsible sourcing**.

## Capabilities, skills, competence and leadership risks

 Risk materiality: ●●○○  
 Risk trend: →

**Description**  
 People are at the core of everything Telia does, and their engagement, effort and talents enable the company to execute its strategy. Key risks in this area include talent attraction and retention, developing capabilities and competencies, employee engagement and productivity, fostering a strong culture based on Telia's purpose and values, developing leaders and providing a working environment that is safe, both physically and psychologically.

**Potential impact**  
 A shortage of critical capabilities and competencies could lead to a shift in workforce composition and limit the progress on transformation. Disengaged employees are less productive, less loyal and more likely to leave. The high pace of change, cost pressures and ambiguity within the company could have a negative impact on employee health and well-being.

**Mitigating activities**

- Continue the work to drive strategic workforce planning, talent and skills mapping, and upskilling/reskilling of existing workforce
- Partnering and targeted recruitment efforts within specific competence areas
- Frequent employee surveys and following up
- Strengthening the culture journey by focusing on bringing Telia's values to life
- Continuing the rollout of the updated leadership development portfolio
- Establishing a framework with which to assess the psychosocial work environment and implementing strategies to enhance a positive workplace atmosphere

## Social and ethical risks

 Risk materiality: ●●○○  
 Risk trend: ↘

**Description**  
 Telia is committed to respecting human rights across its chain and works actively with human rights topics that include such as children's rights, digital inclusion, freedom of expression and government surveillance, media freedoms and labor and supply chain. Transparency requirements are increasing and reflected in new and upcoming laws such as the EU Corporate Sustainability Due Diligence Directive and Norway's Transparency Act. Telia's Code of Conduct serves as an ethical compass for all employees and the code is supported by measures such as the Speak-Up Line, which helps to identify potential instances of non-compliance.

**Potential impact**  
 Telia's operations, reputation, stakeholder relationships, compliance with ethical standards and social responsibility

**Mitigating activities**

- Telia applies continuous human rights due diligence assessments when there is a need for insight into the risk in question. This strategy is described in the Sustainability section chapter on Human rights
- Please refer to Supply chain and third-party management related work in that area
- An adapted responsible sourcing process has been developed based on TV and Media needs
- Updates to Telia's Code of Conduct, combined with targeted training and messaging from top management, and related training and education
- Ongoing monitoring of the upcoming Corporate Sustainability Due Diligence Directive

See the chapter on **Human rights**.

## Statement of Materiality and Significant Audiences

Telia Company AB is registered in Sweden and is bound by the Swedish Companies Act (2005:551). The Act requires the Board of Directors to govern the company in a way that is profitable and creates value for its shareholders. By integrating sustainability and responsible business practices in all aspects of business and strategy, Telia creates long-term value for shareholders and supports sustainable development.

Telia plays a vital role in dealing with current and future societal and environmental challenges, which in turn increasingly define the playing field for economies of all sizes. The company also has an obligation to manage risks, impacts and opportunities. Telia takes a double materiality approach by assessing both how the company is impacting people and the environment and how people and the environment are impacting the company. Engagement with key stakeholder groups is an important component of the company's efforts to identify, understand and manage the most material current and future impacts and ensure that Telia makes a substantial contribution towards the UN Sustainable Development Goals. The company regularly monitors and discloses progress through this combined Annual and Sustainability Report.

**Significant stakeholder groups are defined as:**

- Consumers
- Business customers
- Employees
- Investors
- Suppliers and partners
- Society

Telia is committed to a number of international standards and initiatives related to anti-corruption, environmental responsibility, human rights and labor rights, including:

- The UN Universal Declaration of Human Rights
- The core conventions of the International Labour Organization (ILO)
- The OECD Guidelines for Multinational Enterprises
- The UN Global Compact
- The UN Guiding Principles on Business and Human Rights
- The Children's Rights and Business Principles
- The 1.5°C ambition expressed in the Paris Agreement

The content of these standards and initiatives forms the foundation of Telia's Code of Conduct, which is approved by the Board and further elaborated through our policies and instructions.

# Corporate Governance Statement

## Corporate Governance

This Corporate Governance Statement has been adopted by the Board. It has been prepared according to the Swedish Corporate Governance Code and the Swedish Annual Reports Act and has been examined by the external auditors. The Statement presents an overview of Telia Company's corporate governance model and includes the Board's description of the internal control environment and risk management regarding financial reporting.

It is the opinion of the Board that Telia Company in all respects complied with the Swedish Corporate Governance Code during 2023.

*Updated information required by the Swedish Corporate Governance Code is available at [www.teliacompany.com/en/about-the-company/corporate-governance/](http://www.teliacompany.com/en/about-the-company/corporate-governance/) (Information on the Telia Company website does not form part of this Statement)*

## Governing Bodies

Telia Company's main governing bodies are:

- The Shareholders at the General Meeting (AGM)
- The Board of Directors
- The Chief Executive Officer (CEO), by Group Executive Management (GEM)

## Shareholders

Telia Company is a Swedish public limited liability company and is bound by the Swedish Companies Act, the Nordic Main Market Rulebook for Issuers of Shares, the Swedish Corporate Governance Code and the company's Articles of Association, as well as other relevant Swedish and foreign laws and regulations. The General Meeting is the company's highest decision-making forum, where owners exercise their power as shareholders.

*For further information, see the Swedish Companies Act (2005:551), the Annual Reports Act (1995:1554) and the Securities Market Act (2007:528) at [www.riksdagen.se/en](http://www.riksdagen.se/en) or [www.government.se](http://www.government.se), [www.nasdaq.com](http://www.nasdaq.com), [www.nasdaq.com/market-regulation/nordics/stockholm](http://www.nasdaq.com/market-regulation/nordics/stockholm) and the Swedish Corporate Governance Code and specific features of Swedish corporate governance at [www.corporategovernanceboard.se](http://www.corporategovernanceboard.se)*

Telia Company has one type of share. Each share represents one vote at the General Meeting. As of December 31, 2023, Telia Company had 462,350 shareholders. The Swedish state was the largest individual shareholder at year-end 2023, owning 41.1% of the total shares. For companies with state ownership, the Swedish government has issued an ownership policy, which sets forth requirements related to, inter alia, responsible business, diversity and gender balance. In companies where the state does not have majority ownership, the state acts in dialogue with other owners to promote the application of the policy.

The Telia Company share is listed on Nasdaq Stockholm and Nasdaq Helsinki. For more information on the Telia Company share and the shareholder structure, see the **Directors' Report**.

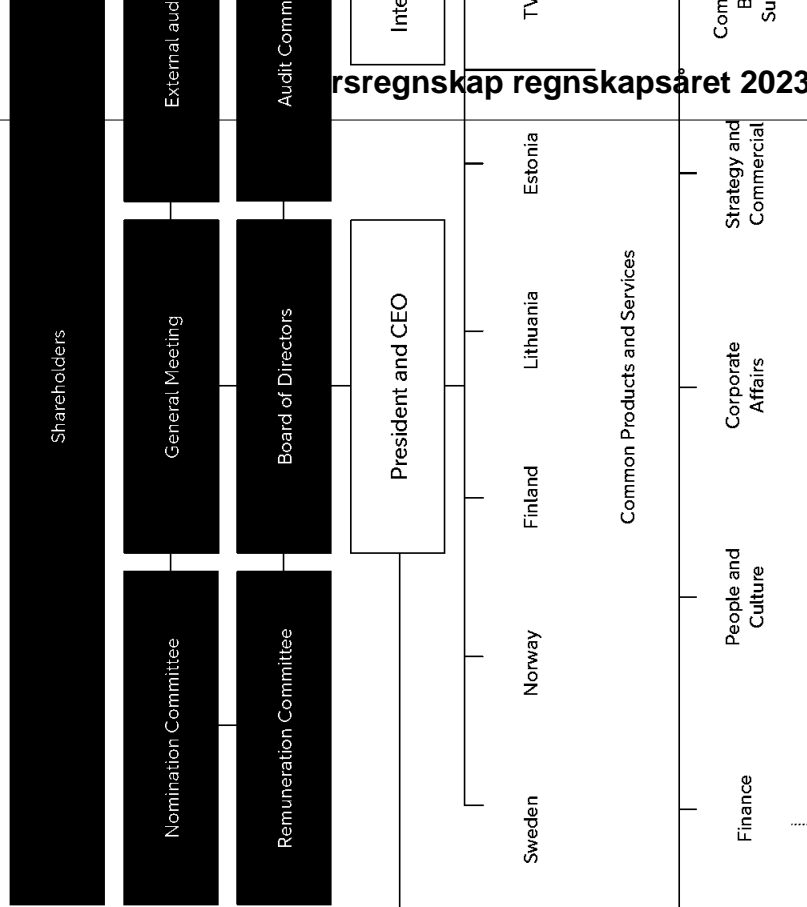

### Annual General Meeting 2023

The AGM 2023 was held in Solna on April 5, 2023. The AGM decided, among other things, on the following:

- Approval of the income statement and balance sheet
- Discharged the Board members and CEO from liability
- Election of Board members
- Election of auditors
- Appropriation of earnings guidelines for Group Executive Management remuneration
- Long-term incentive program for key employees and transfer of own shares
- Authorization for the Board to decide on repurchase of the company's own shares, within certain limits, and transfer of the same shares
- Reduction of the share capital by cancellation of own shares

*Telia Company's Articles of Association are available at [www.teliacompany.com/en/about-the-company/corporate-governance/articles-of-association](http://www.teliacompany.com/en/about-the-company/corporate-governance/articles-of-association) and AGM minutes and related documents at [www.teliacompany.com/en/annual-general-meeting](http://www.teliacompany.com/en/annual-general-meeting) (information on the Telia Company website does not form part of this Statement)*

## Telia Company's Governing Bodies 2023

## Nomination Committee

The Nomination Committee shall, in accordance with the relevant instruction, be nominated by the 4 largest shareholders in terms of votes at the end of July the year before the AGM, provided they are willing. Telia Company's Nomination Committee for AGM 2024 has been appointed based on the ownership structure as of July 31, 2023, and consists of:

- Magnus Johansson, Chair (the Swedish state)
- Johannes Wingborg (Länsförsäkringar Fondförvaltning)
- Sussi Kvarn (Handelsbanken Funderis)
- Emilie Westholm (Folksam)

In addition, Lars-Johan Jarnheimer (Chair of the Board of Directors), has been appointed as a co-opted member of the Committee.

The AGM 2023 adopted instructions for the work of the Nomination Committee, including to:

- Propose the number of board members elected by the AGM
- Nominate the Chair, the Vice-Chair and other Board members
- Propose the Board remuneration that is divided among the Chair, the Vice-Chair and other Board members and remuneration for serving on committees
- Nominate the Chair of the AGM
- Nominate the external auditors and propose remuneration payable to the auditors

The Nomination Committee performs interviews and receives information from the Chair of the Board, other Board members, including employee representatives, and the CEO on internal work of

the Board, Telia Company's position and strategic direction and other relevant circumstances and receives an internal evaluation of the Board. Based on this information, the Nomination Committee assesses the functioning of the Board and the competence required on the Board as a whole.

The Nomination Committee has concluded that competence is currently required from:

- The telecommunications industry and industries closely related to it
- Digitalization
- Relevant markets
- Consumer-oriented operations and markets
- Sustainability work
- Board work in listed companies
- Media
- Executive leadership
- Transformation and change processes
- Finance

Based on the needs identified, the Nomination Committee evaluates the competence of the current Board members and the aggregated composition of the Board. Considering future competence and experience needs, diversity – including gender – considerations and the professional backgrounds and competence of current Board members, the Nomination Committee nominates Board members to the AGM.

The Nomination Committee has reported that it complies with the provisions of the Swedish Corporate Governance Code and that it intends to report its activities on the company's website. In

its work, the Nomination Committee applies rule 4.1 of the Swedish Corporate Governance Code as its diversity policy. The Nomination Committee has considered the importance of composing a well-functioning Board that exhibits diversity and a breadth of qualifications, experience and backgrounds. The Nomination Committee has specifically discussed gender diversity as part of its efforts to compose a balanced and competent Board. The Board currently consists of 4 female and 5 male members, elected by the AGM.

The AGM 2023 resolved to appoint Board members in accordance with the Nomination Committee's proposals. The Nomination Committee reviews its instructions annually and proposes changes to them to the AGM, as necessary.

*Shareholders are welcome to send nomination proposals to the Nomination Committee. Proposals can be sent by e-mail to [forslagstillstyrelseledamot@teliacompany.com](mailto:forslagstillstyrelseledamot@teliacompany.com)*

## Board of Directors

### Responsibilities

The Board is responsible for the organization of the company and the administration of the company's affairs. The Board regularly assesses the financial position of the company and the group and ensures that the company is organized so that accounting, management of funds and the company's financial conditions, in general, are controlled in a satisfactory manner.

The tasks of the Board include, among other things, to:

- Establish business objectives and strategy
- Appoint, continuously evaluate and, if required, remove the CEO from office
- Ensure that there are effective systems in place for monitoring and controlling of the company's operations and financial position compared to its stated objectives
- Ensure that there is satisfactory control of the company's compliance with laws and other regulations applicable to the company's operations
- Ensure that policies to govern the company's ethical conduct are adopted
- Ensure that the company's external disclosure of information is marked by openness and is correct, relevant and reliable

Instructions for the work of the Board are set forth in its rules of procedure, which are reviewed and adopted annually. The rules of procedure set out the number of ordinary Board meetings, agenda items and matters to be addressed at ordinary Board meetings, the duties of the Chair of the Board and the allocation of responsibilities

between the Board and the CEO, including the CEO's reporting to the Board. It also includes instructions for the work in Board Committees, inter alia, stipulating the Committees' duties, the number of Committee meetings, matters to be addressed at the meetings, and reporting to the Board.

### Members and independence

The Board consists of nine members elected by the AGM, serving one-year terms, and three employee representatives (with three deputies) from the Swedish operations. Lars-Johan Jarnheimer is the Chair of the Board. The other Board members, elected by the AGM 2023, are Ingrid Bonde (Vice-Chair), Luisa Delgado, Rickard Gustafson, Jeanette Jäger, Jimmy Maymann, Johannes Ametsreiter, Tomas Eliasson and Sarah Eccleston. Nina Linander was not available for reelection at the AGM 2023.

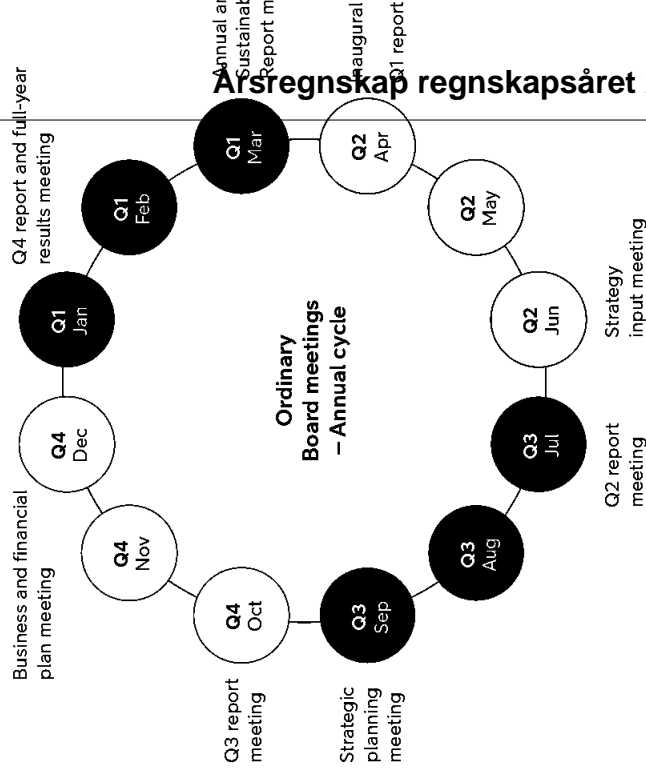

In accordance with the guidelines of the Swedish Corporate Governance Code, all Board members elected by the General Meeting are considered to be independent of the company, the company's Group Executive Management and major shareholders.

The Board members are presented in more detail, including their meeting attendance, remuneration and holdings of Telia Company shares, at the end of this Statement.

### Annual work cycle

The work of the Board follows an annual cycle, enabling the Board to appropriately address each of its duties and to keep strategic issues, risk assessment and value creation high on the agenda.

## The Board's Annual Work Cycle

Board meetings are normally held in Solna, Sweden, but the Board's ambition is to hold at least one meeting elsewhere to be able to discuss local issues more deeply, make specific site visits, etc.

#### Board meetings

The annual Board cycle starts and ends at the AGM. During the year approximately nine ordinary meetings are held, including the inaugural meeting and a two-day strategy meeting. The meetings address, among other things:

- Approval of financial reports and the Annual and Sustainability Report
- Review and assessment of financial forecasts, investments, business plans and progress towards sustainability goals
- Budget review and approval
- Strategy review and evaluation
- Review and approval of key policies as well as governance documents
- Dividend proposal
- Issues that shall be referred to the Board, in accordance with laws and governance documents, inter alia
- Self-assessment of Board work and Board members
- Target setting
- Risk reports
- Performance review of the CEO
- Organization and management issues
- Discussion with the auditor of the group without the presence of the CEO or Group Executive Management

#### Board work in 2023

In 2023, the Board held 9 ordinary meetings (whereof 1 inaugural meeting) and 3 extra

meetings. In addition to following up on the day-to-day business of the group, the Board paid special attention to:

- Strategic options, with specific review of the changing business environment in the telecom industry
- Follow-up of major strategic initiatives within the business operations
- Operating model and organizational issues
- Integration of sustainability in the company business strategy
- M&A activities, including the reaching of an agreement to sell the company's Danish business
- Review of efficiency initiatives and cost-reduction programs
- Regulatory developments in the telecom industry
- Potential acquisitions and joint ventures
- Investments in telecom licenses and spectrum permits
- Follow-up of capital expenditures
- Capital structure of the group
- Issues related to human resources, in particular succession planning and performance management

Further, the Board evaluated its internal work during 2023 and the result was reported to the Nomination Committee.

#### Board Committees

To improve Board work efficiency, the Board has appointed a Remuneration Committee and an Audit Committee. The Committees prepare recommendations for the Board and make proposals on matters that require the Board's approval. The Committees also continuously give reports to the Board in relation to its work.

#### Remuneration Committee

Among other things, the Remuneration Committee assists the Board by preparing proposals on remuneration and monitoring and evaluating, on a regular basis, remuneration structures and levels for the CEO, other members of Group Executive Management, and the rest of the company.

#### Audit Committee

Among other things, the Audit Committee assists the Board to fulfill its responsibilities in relation to financial reporting, internal control, internal and external audit, enterprise risk management (ERM) and the company's process for monitoring compliance with laws and regulations within financial reporting, accounting standards and other requirements for listed companies, as well as monitoring the company's risk and compliance work. In addition, the Committee approves the appointment and dismissal of the Head of Internal

Audit. The Audit Committee also reviews annual report and interim financial reports and oversees the external audit process.

**Remuneration Committee work in 2023**  
Lars-Johan Jarnheimer is the Chair of Remuneration Committee. In 2023, the Committee held 5 meetings. Its work included, among other things:

- Guidelines for remuneration and evaluation of remuneration policies and program
- Prepare a remuneration report
- Variable pay and long-term incentives
- Succession planning and talent management
- Performance management
- Remuneration to the CEO and Group Executive Management
- Approval of recruitments and management level

### Organization of the Board

#### Board of Directors

12 members (of which 3 employee representatives)

Lars-Johan Jarnheimer, Chair of the Board

#### Remuneration Committee

3 members

Lars-Johan Jarnheimer (Chair)  
Luisa Delgado  
Rickard Gustafson

#### Audit Committee

3 members

Tomas Eliasson (Chair)  
Ingrid Bonde  
Johannes Ametsreiter

### Audit Committee work in 2023

Tomas Eliasson is the Chair of the Audit Committee. In 2023, the Committee held 7 meetings. Its work included, among other things:

- Supervision and review of the company's financial reporting process and procedures for financial information and annual accounts
- Review and approval of accounting principles pertaining to financial reporting
- Review of annual accounts, the Board's Report, the Corporate Governance Statement and reporting within the sustainability area
- Review of assessments concerning asset valuation, treasury and operational risks (including assessment of, and actions taken in response to, whistleblower reports)
- Monitoring financial statements and interim reports and making recommendations and proposals to ensure accurate reporting
- Monitoring the efficiency of the internal control and risk management systems with respect to financial reporting
- Review of risks and risk management issues to be presented in the Annual and Sustainability Report and financial statements
- With regards to the external auditors: Monitoring and reviewing the audit of the financial statements and follow-up of recommended actions; review and approval of audit plans, review impartiality, independence and performance of the external auditors; submitting recommendations on the election of external auditors; as well as closed sessions with external auditors without management present
- With regards to the internal auditors: Review and approval of the internal audit charter and internal audit plan; review of audit reports and the follow-up process of monitoring the

implementation; review of the performance of Internal Audit; and closed sessions with Head of Internal Audit without management present

- With regards to risk and compliance: Review of the company's risk appetite and ERM system; the risk portfolio and its development; the Governance, Risk and Compliance function and related programs; reports on investigations – including speak-up cases; and reports on Risk and Compliance – including the company's risk control report (containing all prioritized risk areas) and top risk portfolio
- Monitoring the company's preparations for CSRD compliance, ensuring a plan for and progress in enhanced reporting capability and the changes needed in company processes to meet the new reporting standard. Reviewing the Double Materiality Assessment process

The Remuneration Committee and the Audit Committee evaluated their internal work during 2023 through self-assessment.

## CEO and Group Executive Management

The CEO is responsible for the company's business development and leads and coordinates the day-to-day operations in accordance with the Board's instructions for the CEO and other decisions made by the Board.

Headed by the CEO, Group Executive Management comprises the CEO, CFO, COO, General Counsel and Head of Corporate Affairs, Head of People & Culture, Chief Strategy & Commercial Officer, Head of Communication, Brand and Sustainability, CEO of Telia Sweden, CEO of Telia Norway, CEO of Telia Finland and Head of TV and Media.

Group Executive Management meets and its meetings are devoted to follow matters of strategic and business performance including sustainability, major changes and group-wide risks.

As of February 1, Patrik Hofbauer is the CEO and CEO of Telia Company. The members of Group Executive Management are presented in more detail, including their remuneration details, in the Telia Company shares, at this Statement.

# Group-wide Governance Framework

Sound principles for corporate governance are an important prerequisite for building trust between Telia and its stakeholders and securing shareholder value. Owners, investors, customers, employees and other key parties should always be confident that the company's business activities are characterized by reliability, control, transparency and high ethical standards. The aim of the Group-wide Governance Framework is to ensure that Telia's strategy, risk appetite, culture and values are aligned with its objectives and stakeholder interests, and that the company complies with relevant laws and regulations.

The framework is designed to:

- Ensure that the company possesses the understanding and capabilities to fulfil promises and commitments to its customers, shareholders and employees
- Ensure that operational results reflect established decisions, inspiring every employee to collaborate towards common goals within set guidelines
- Establish a common and clear understanding of the company's purpose, values, roles, responsibilities and authority to act

The Group-wide Governance Framework is approved by the Board.

## Group-wide governance framework

### Customer promises and key stakeholder obligations

- *Delivering sustainably*  
By delivering sustainably through a and empowered organization, Telia on creating long-lasting and sustainable for all of its stakeholders by being a socially and environmentally strong company.

For more information, see **Our Strategy**

**Operational, financial and sustainability**  
The Board sets the near-term strategic operational, financial and sustainability Targets are set for the group as a whole for each country and business unit. For information on Telia's sustainability work and governance, see the **Sustainability and the Director's Report**.

#### Setting boundaries

The Board and Group Executive Management set the boundaries for how employees

a clear direction for the strategy to create a Better Telia, grow the business and deliver sustainable value creation.

#### Strategic Priorities

Led by its purpose of reinventing better connected living, Telia aims to grow its business and deliver sustainable value creation for shareholders through four strategic priorities.

- *Inspiring customers*  
Inspiring customers with brands and experiences that go beyond connectivity is about ensuring that Telia delivers the best possible digital communications experiences to 24 million customers across its footprint.

#### Customer promises and key stakeholder obligations

Telia's customers are at the heart of all its actions. Commitments to customers, shareholders and other stakeholders guide the company's goals and shape the values it aims to uphold.

#### Deciding what to achieve

Telia's overall aim is to create a company that is better for its customers, employees, owners and the societies in the Nordics and the Baltics.

#### Purpose

To provide overall guidance for employees, the Board has approved a purpose statement: "We reinvent better connected living". The purpose is

Group policy		Description
Anti-Bribery and Corruption		To set the standards for ethical business practices throughout the operations.
Enterprise risk management		To describe the ERM framework.
Environment		To ensure that we proactively manage environmental impacts throughout the full lifecycle of delivering our products and services.
Financial management		To set the rules for managing financial risks and for counterparty credit ratings.
Freedom of expression and surveillance privacy		To define our commitments in relation to requests or demands with potentially serious impacts on freedom of expression and surveillance privacy.
Human rights		To respect human rights, to avoid causing or contributing to adverse human rights impacts in our operations and address impacts when they occur.
Inside information and Insider trading		To ensure a high standard of ethical behavior towards the capital markets by defining trading and reporting rules.
Media Owner Commitments		To define Telia's commitments in relation to a free flow of information, freedom of expression, freedom and independence of mass media and an open and democratic society. As media owner, we confirm that all mass media content shall be protected by traditional editorial integrity principles, established journalistic practices and the sovereignty of the responsible publisher pursuant to constitutional law regarding freedom of expression.
People		To provide our employees with an overview of our company values and expectations in relation to people, health, safety and well-being. It also gives employees at all levels the prerequisites to act in line with these values and expectations.
Privacy and data protection		To respect and safeguard privacy and data protection by setting high and consistent standards.
Quality		To define our commitment to consistently provide products and services of high quality that meet customer needs.
Remuneration		To set the strategic direction and clarify the approach on designing and implementing remuneration practices for employees at all levels.
Security		To describe the governance as well as control, facilitation and implementation of security measures.

boundaries are rooted in Telia's core values, corresponding steering documents, risk appetite, the Delegation of Obligations and Authority, and the Code of Conduct.

**Core values**

Telia's values – "Dare, Care and Simplify" – are at the very core of how its employees behave and provide a compass for how they act in their daily work.

**We dare** to make an impact and call things out, even when it is difficult

**We care** for everyone and look out for each other, both people and planet

**We simplify** the way we do things and focus on what matters most

**Establishing risk boundaries**

The Board approves the level and type of risk that Telia should take in pursuit of its strategic objectives. The company's risk appetite is defined by clear boundaries or thresholds, ensuring that its actions and decisions are in alignment with its corporate values, strategic goals and stakeholder expectations.

**Company governance**

- **Governing bodies** such as the Board of Directors and various committees make key decisions and oversee company operations (as described in the **Corporate Governance statement**, approved by the Board, and prepared according to the Swedish Corporate Governance Code). These bodies are responsible for setting company direction, making policies and ensuring accountability. They act as a system of checks and balances, ensuring that the company's

interests align with those of its stakeholders including shareholders, employees and public.

- **Delegation of Obligations and Authority** The Delegation of Obligations and Authority (DOA) is the governing document that sets out the governance principles that guide decision-making at Telia. The DOA is issued by the Telia Group CEO and sets out how the Group CEO delegates obligations and authority and sets expectations for Executive Management.

**Policy Framework**

To govern the company, the Board has approved a Policy Framework that consists of steering documents, group policies and group documents. These documents form the backbone of the company's approach to governance, risk management and compliance. The heads of group and executive owners of Telia's Principles ensure that necessary group policies

are issued with their instructions are issued with their areas of responsibility. Each group executive is accountable for annually reviewing the area's governance requirements, which are proposed for new or updated steering documents and instructions. All group policies and instructions are mandatory for all employees. Telia has management responsibility. CEOs are responsible for the implementation of the Policy Framework in their geographic location. The Board approves group policies at least once a year based on the endorsement from the Group Governance, Risk, Ethics and Compliance (GREC) Committee or Group

Management. The Board has entrusted the CEO to issue instructions for more detailed governance in areas of overall importance for operations. The CEO or the head of the relevant group function approves group instructions after they have been reviewed and approved at a Group GREC or Group Executive Management meeting. All group policies and group instructions are archived and published on a central platform accessible to all employees and certain categories of contingent workers. Group policies are listed on the previous page.

*Group policies are publicly available at: [www.teliacompany.com/en/about-the-company/public-policy](http://www.teliacompany.com/en/about-the-company/public-policy) (Information on the Telia Company website does not form part of this Statement)*

#### Code of Conduct

The Code of Conduct, issued by the Board, serves as Telia's ethical compass, setting clear standards and expectations on how to act and helps in recognizing that doing business with integrity is a shared responsibility. The Code reflects group policies and group instructions, encompassing 18 subject areas. Each area covers a description of The Telia way, a summary of what to keep in mind, resources and how to get help and advice. The code is designed to guide all employees, managers, and board members – as well as all staff working in Telia's operations such as contractors, consultants, and freelancers. It also influences Telia's third-party relationships and contractual agreements. The Code of Conduct is reviewed on an annual basis by Group Governance, Risk and Compliance in collaboration with appropriate subject matter experts.

#### Delivering on promises

Telia always strives to deliver what it says it will, at the right time and in the right way to build trust, ensure reliability and satisfy key stakeholders and customers.

#### Business processes

Processes are at the heart of how Telia creates and delivers value to its customers. The company's Business Process Management (BPM) Framework provides the foundation for its processes. The BPM consists of five main areas: culture and mindset, architecture, governance, performance, methods, and technologies. It allows Telia to systematically oversee and refine both automated and manual business activities, from their inception through to execution, ensuring outcomes that are consistent with the company's strategic objectives. The business processes set the foundation for a company that is effective overall and that meets business and customer expectations with agility.

#### Organization and resources

The group's operations are organized into the following operating segments: Sweden, Finland, Norway, Lithuania, Estonia and TV and Media. Group functions include Finance (including Sourcing and Real Estate), Common Products & Services (including Telia Finance), Group Strategy & Commercial (including Division X and Global Business), Corporate Affairs, People & Culture, and Communication, Brand & Sustainability. Group functions are responsible for driving developments within their respective areas to ensure efficiency and cross-border synergies. All countries and group functions work in close cooperation with each other, providing advice and guidance to maintain high technical and

commercial skills, ensure good management and regulatory compliance, use of economies of scale, and a business that is sustainable in the long term. Resources – in terms of financial and human capital, network assets, social and relationship capital as well as natural resources – are allocated to ensure successful execution. Business Area TV and Media operations are characterized as mass media operations and protected by the constitutional law on Freedom of Expression. In accordance with the Freedom of Expression law and the Group Policy on Media Owner Commitments, all editorial decisions are solely taken by personnel within the editorial operations and at the absolute discretion of the Editor-in-Chief. Editorial operations are separate from other parts of the company and Telia respects the editorial integrity of the mass media, including the confidentiality of sources and source material and the integrity and confidentiality of editorial work, decisions and necessary professional integrity. The group policy guarantees that independent publishing is upheld vis-à-vis, for example, the owners, governments, public authorities, political parties, the Board and management of Telia, external financial power spheres and other organized social interests.

#### Strategy to Execution

Strategy to Execution aims at ensuring effective strategy execution, strong accountability and enabling better decision-making. The Strategy to Execution Framework and process is deployed to redefine and allocate, measure and track the development of business objectives to realization/benefit.

**Following up performance**  
Following up and monitoring Telia's performance is crucial to identify potential for improvement and for future planning. Performance is conducted at both the organizational and individual levels.

#### Business reviews

The CEO sets goals for the operations in the direction of the Board. To ensure managers have annual targets for the operations. The plan for each unit is finalized in monthly business review meetings financial and operational reviews for a period. The review meeting also includes of scorecards, including operational, financial and people performance, as well as the tracking of business initiatives. Business reviews allow for frequent operational key performance indicators on the country and business unit level. Operational KPIs are a key part of the management a good overview of the and progress over time. The Balanced Scorecard (NPS®) framework is used to monitor the customer experience. Telia provides Business review meetings at a attended by CEO, CFO, COO, Head of Business Finance, Group Executive Management, and selected of Investor Relations and selected members of the respective country management. receives reports on operational performance monthly and, at each ordinary board group's operational and financial performance are presented in detail by the CEO and respectively. See the Board of Directors for more information.

### *Risk and compliance reviews*

The GREC Committee is the primary governing body for risk and compliance follow-up. For further information, see the Governance, Risk and Compliance section.

### *Individual performance management*

YouFirst is the group-wide approach to employee performance and development. It guarantees that expectations and priorities are connected to the strategy, that challenging goals are set and that personal accountability for results is maintained. YouFirst is integrated into daily work through regular conversations, coaching and feedback between leaders and employees. Individual performance management is also described in the Directors' Report section on **People**.

## Governance, Risk and Compliance (GRC)

A group Governance, Risk and Compliance (GRC) function has been established to ensure that Telia takes an integrated and strategic approach towards aligning governance and policies with company objectives, while effectively managing risks and promoting ethical and responsible decision-making through compliance with all relevant policies, laws and regulations.

The Head of the GRC function is also the Chief Risk Officer (CRO), reports to the Chief Financial Officer and acts as the owner of the group common GRC process.

Function responsibilities include to:

- Oversee the **Group-wide Governance Framework** and own the Group Policy Framework and the Group Framework for ERM, policies and instructions within his/her areas of responsibility and to monitor compliance and support group-wide implementation
- Oversee the operational effectiveness of the ERM processes across the group and propose actions for improvement
- Monitor the risk level as well as the nature of specific risk matters across the group. As part of that responsibility, the Head of the GRC collects and aggregates the respective reports from countries and group functions to provide the CEO and the Board with a consolidated and holistic overview of the group's risk level and individual, material risks
- Facilitate and organize the Governance, Risk, Ethics and Compliance (GREC) Committee on group level

- Promote a culture that encourages ethical conduct and commitment to compliance as well as to assist, advise and provide objective and reasonable assurance that the company manages compliance risks in an appropriate way

### **Risks and uncertainties**

Offering a broad range of products and services in multiple markets in the highly competitive and regulated telecommunications industry, Telia is subject to a wide variety of risks and uncertainties. The company has defined risk as anything that could have a material adverse effect on the achievement of its strategic and operational goals. Risks can be threats, uncertainties or lost opportunities relating to current or future operations or activities.

Risks and uncertainties related to the business, sustainability and shareholder issues are described in the Directors' Report section on **Risks** and financial risks in **Note C27** to the consolidated financial statements.

### **Risk management – Principal Risks and the three lines model**

Telia recognizes that successful risk management is fundamental to achieving business and growth opportunities by striving for the highest possible returns within acceptable risk and cost levels. Risk management is initiated on an enterprise level, with collaboration between the Strategy and ERM functions to identify key risks, threats and consequences to specific value drivers and strategic objectives. The identified risks are analyzed and prioritized together with the executive management team, which agrees on a portfolio of Principal Risks. An executive risk owner is assigned to each Principal Risk

and is accountable for defining the PRIs and Risk appetite, which is typically aligned with group policy. The Principal Risks consist of the foundation of Telia's Enterprise Risk Management Framework.

The management of risk within each Risk area is an integral part of Telia's strategy and operational activities, business process and monitoring of business performance. Risks are continuously identified and measures are implemented to monitor these risks.

Risk management roles and responsibilities are aligned via the three lines model:

- **First line:** The heads of countries and functions are accountable for risk in their respective units, and they are supported by Risk Management Coordinators who implement the Enterprise Risk Management Framework throughout the organization. The line organization and accountable for assessing, reporting, controlling, through internal risk control as well as reporting risks to local risk control.
- **Second line:** Comprises the group function, incorporating the ERM function, Group Compliance function, the Principal Risk area and assurance functions, the ir controls function within Group Finance and GREC meetings. Principal Risk area are appointed by the Chief Risk Officer responsible for maintaining a holistic view of the risk area by ensuring that the risks are cascaded throughout the organization monitoring and evaluating the risk capabilities, overseeing the operational effectiveness of the areas' risk process

the group and reporting risk posture to GREC

- Third line: The Group Internal Audit function provides independent and objective assurance and advisory services of governance, risk, and internal control

In addition, external parties, such as the external auditors and regulatory bodies, provide assurance related to specific statutory requirements, such as information presented in the consolidated financial statements or reported to the Swedish Financial Supervisory Authority.

The aim of the continuous risk management process is to ensure all risks that may help or hinder the achievement of Telia's objectives are regularly assessed, managed and monitored. The risk management process promotes transparency, feasibility and traceability, and Telia strives to fully integrate risk management into all business processes. Management ensures that a personal sense of responsibility and a common view on, and awareness of, risk is established among employees, as well as facilitating the accountability for risks in daily decision-making. Risk reporting is integrated into the business planning process and risks are reviewed at business reviews and escalated through the line organization.

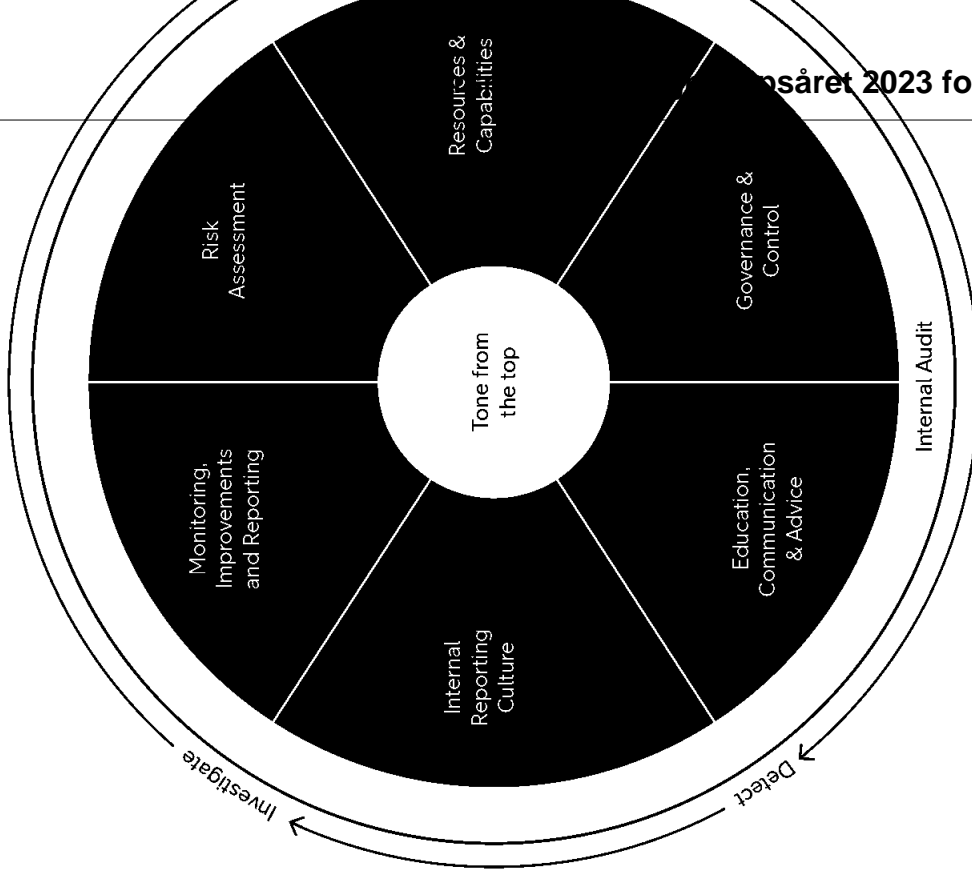

Management proactively conducts risk and compliance evaluations and assessments, on a regular basis and in a timely manner, to ensure that all employees are aware of and take steps to comply with the relevant requirements. Compliance indicates conformance to external as well as internal requirements, such as applicable legislation and regulations, international standards and norms, and group policies and instructions.

**Risk and compliance reporting**  
The Telia Risk and Compliance Report is delivered bi-annually to the Audit Committee and the Board, in alignment with the Board's annual work cycle. The overall status of each Principal Risk is based on detailed risk reports, interviews and workshops with Principal Risk owners and subject matter experts. Risks are presented as group-wide, country or group perspectives.

In addition, the Audit Committee receives a quarterly, consolidated litigation report with short-form details of ongoing, pending and threatened major legal and administrative proceedings. Each case description also includes nominal and estimated financial impact where possible, and a probability grading. The Board receives a summary of major litigations.

**Aligned assurance**  
Telia has adopted an aligned assurance way of working, whereby the ERM, Ethics & Compliance and Group Internal Audit communities align on the planning, execution and reporting of assurance activities. The fundamental objectives of aligned assurance are to ensure that risks are managed within the company's risk appetite, as well as to provide holistic visibility and assurance to the Board, management, regulators and customers.

Information gathered through the assurance activities is aligned and provided to GREC and the Audit Committee. The aligned approach from assurance functions supports management's decision-making with comprehensive overviews of the company's overall risks, current levels of control and the effectiveness of mitigation activities.

### Assurance Framework

A risk and compliance Assurance Framework has been developed to support an aligned and systematic approach to assurance. The Assurance Framework consists of six elements that are founded on a sound and clear tone from the top. It is designed to adhere to international standards and is based on the principles of prevent, detect and investigate. The framework is used to establish assurance of the appropriate management of key risks in our risk universe.

### GREC Committee

The purpose of the Group GREC Committee is to act as the primary governing body for risk management and compliance throughout Telia. GREC committees are also established on a country level and in selected group functions (such as Common Products and Services) and subsidiaries.

On all levels, GREC meetings are held at least quarterly and provide a forum for management updates, discussion, decisions and follow-up on risk and control mitigation activities and initiatives within the different risk areas and sustainability focus areas.

At the Group level, the GREC meeting is chaired by the CEO and attended by the CFO, the Group General Counsel and Head of Corporate Affairs, the COO, the CPO, the Chief Strategy & Commercial Officer, the Head of Communications, Brand and Sustainability, the Country Heads, the Head of TV & Media, the CFO and the Head of Group Internal Audit. The purpose, agenda and participants in local GREC meetings mirror those of the group-level meetings.

### Whistleblowing and Speak-Up Line

2023 was the 9th year of operation for Telia's Speak-Up Line, the whistleblowing tool available in 11 languages. It enables employees and others to anonymously and confidentially report violations of proper accounting, reporting or internal controls, as well as non-compliance with local laws or breaches of Telia's Code of Responsible Business Conduct, group policies and standard instructions. Telia has a group-wide standard for performing internal investigations. The guiding principle is to ensure that investigations are conducted objectively and impartially; are carried out in a way to swiftly establish the facts with minimum disruption to the business or the personal lives of employees; and to make sure that confidentiality and non-retaliation are respected at all times. Consolidated case reports have been presented to the Audit Committee throughout the year. The reports included allegations of certain significance, the progress of investigations and the final results of the investigations.

For more information about whistleblowing reports, internal investigations and disciplinary decisions during 2023, see **Note S16** in the **Sustainability** notes.

To the reader of this Statement: If you believe there are deficiencies in Telia's financial reporting or if you suspect any misconduct within the group, you may report your concerns at: [www.speakupline.ethicspoint.com](http://www.speakupline.ethicspoint.com)

## Internal control over financial reporting

In accordance with the Swedish Companies Act and the Swedish Corporate Governance Code, the Board is responsible for internal controls over financial reporting. The Board continuously reviews the performance of internal controls and initiates activities to foster continuous improvement of internal controls. Telia's Enterprise Risk Management Framework includes internal controls over financial reporting and is in line with the Committee of Sponsoring Organizations of the Treadway Commission (COSO) Internal Control-Integrated Framework. It consists of the following inter-related areas: control environment; risk assessment; control activities; information and communication; and monitoring.

To establish a consistent approach to, and a common group view of, risks related to incorrect financial reporting, group-wide risk catalogs have been implemented in all major entities in which Telia has management responsibility. The internal control function within Group Finance is responsible for developing and maintaining the IT tool used to manage risk catalogs.

Internal control is an integral part of Telia's corporate governance and ERM, which involves the Board, Group Executive Management and employees on all organizational levels. It is a process that includes methods and processes to:

- Safeguard the group's assets
- Ensure the reliability and correctness of financial reporting

- Secure compliance with applicable and guidelines
- Ensure that objectives are met, and operational efficiency is continuous

The objective of Telia's financial reports align with high professional standard full, fair, accurate, punctual and understandable.

### Control environment

The most essential elements of Telia's environment are the group policies, group instructions and detailed group Management at all levels is responsible for ensuring that the organization complies with the Delegation of Obligations and Authority by the CEO, the financial reporting framework, and other group requirements.

Group Finance is responsible for monitoring and, if significant, communicating changes in legislation, listing requirements, financial reporting standards affecting group policies, instructions, or directives.

Management in each entity of group is responsible for ensuring that:

- Monthly and quarterly financial statements comply with Telia's accounting policies
- Financial reports are delivered on time
- Activities to mitigate the risks, as specified in group risk catalogs, have been implemented
- Material business and financial risks identified and reported

Telia's financial shared services unit supports harmonized and standardized financial accounting processes and controls across large, wholly owned business units.

**Risk assessment**

Telia takes a risk-based approach towards internal controls over financial reporting. Risk management related to financial reporting is incorporated in the group-common Enterprise Risk Management Framework as described in the ERM Framework.

As such, assessment and management of risks that may result in inaccurate financial reporting is a natural part of the daily work, where the group risk catalogs are used as a baseline. Risk assessments are performed from both a top-down and a bottom-up perspective. The results of the risk assessments are documented in the group risk catalogs.

**Control activities**

All business processes across Telia include controls regarding the initiation, approval, recording and accounting of financial transactions. Major processes, including related risks and key controls, are described and documented in a common and structured way, based on the requirements set in the group risk catalogs. Controls are either automated or manual and designed to ensure that necessary actions are taken to either prevent or detect material misstatements and to safeguard the assets of the company. Controls for the recognition, measurement and disclosure of financial information are included in the financial closing and reporting process, including controls for IT applications used for accounting and reporting.

**Information and communication**

Group policies, instructions and directives, the reporting framework guidelines and other requirements regarding accounting and reporting as well as performing internal controls are made accessible to all employees concerned, using Telia's regular internal communication channels. Employees at group level continuously engage in internal training activities to ensure harmonization within important areas such as revenue recognition and the distinction between capital and operating expenditure.

Telia promotes an open, honest and transparent flow of information, especially regarding the performance of internal controls. Control performers are encouraged to disclose any issues concerning their controls in the reporting, so that a problem can be taken care of before it leads to misstatements.

**Monitoring**

Telia has implemented a structured process for performance monitoring of internal controls over financial reporting. This process includes countries and group functions and consists of self-assessments of the risk-mitigating activities. The internal controls function within Group Finance monitors the process on a monthly basis.

On behalf of Group Executive Management, the internal control function carries out an annual risk-based compliance review of key risks to evaluate the quality of self-assessments, risk mitigation and the overall internal control environment.

The results of the self-assessments and the compliance review are communicated to the

management of all relevant entities and to the Audit Committee. The committee also receives reports directly from both external and internal auditors. The reports are discussed, and follow-up observations are made by the committee. Both the external and internal auditors are present at the committee meetings.

At least once a year, the entire Board meets with the external auditors, in part without the presence of management.

## Group internal audit

The Group Internal Audit function provides independent and objective assurance and advisory services designed to add value and improve Telia Company's operations. Internal Audit assists Telia Company in accomplishing its objectives by taking a systematic, disciplined and agile approach to evaluating and improving the effectiveness of the organization's governance, risk management and internal control.

The direction of the work of the internal audit function is stated in the audit plan. In order to reflect the overall business objectives and risks, the audit plan is aligned with the group strategy and business plans. The audit plan determines priorities and resource allocation. It is approved by the Audit Committee and presented to the external auditors on a regular basis. The audit assignments are discussed with the external auditors periodically, in order to share risk assessments and audit findings.

In 2023, audits were performed in group functions, as well as in the countries. The important audit areas were:

- Transformation
- IT
- Information security
- Finance
- Service assurance
- Risk management and compliance

The Head of Group Internal Audit reports functionally to the Audit Committee and administratively to the Telia Company Chief

Financial Officer. The results from each specific audit assignment are reported to the line manager responsible for the audited area or unit, the CEO, the CFO, relevant GEM members and the external auditors. A summary of audit findings is reported to the Audit Committee periodically.

## Auditors

### Number of auditors and duties

According to its Articles of Association, Telia Company AB shall have no less than two and no more than three auditors and no more than the same number of deputy auditors. The AGM can also appoint only one auditor if the auditor in question is a public accounting firm. The auditors report to the shareholders at General Meetings.

The task of the external auditor is to examine Telia Company's annual accounts and consolidated accounts, as well as to review the administration of the company by the Board and the CEO. The duties of the auditors include, among others:

- Presenting the audit plan, scope and content of the annual audit to the Audit Committee
- Reviewing the interim report for the third quarter
- Auditing the financial statements in accordance with international standards on auditing and generally accepted auditing standards in Sweden
- Conducting a statutory examination of the Corporate Governance Statement
- Conducting an examination of the statutory Sustainability Report. The auditors also perform an annual limited assurance of the Telia Company Sustainability Report.

The auditors present the results of their audit and provide an opinion on whether the guidelines for remuneration to senior executives have been complied with at the AGM. Furthermore, the auditors report to the Audit Committee, including the CEO and the CFO, on a quarterly basis.

For further information on interactions between the Board and the auditors, see the sections on the Board of Directors and Internal controls over financial reporting, respectively.

### Current auditors and fees

At AGM 2023, Deloitte AB was elected as auditor until the end of AGM 2024. Deloitte AB has appointed Peter Ekberg (born 1971), authorized public accountant, to serve as auditor in charge. Deloitte AB is often engaged by Telia Company's largest shareholder, the Swedish state, for both audit and advisory services. Peter Ekberg does not hold any shares in Telia Company.

For information on fees paid for audit-related and other services, see **Note C33** to the consolidated financial statements.

## Board of Directors

Chair of the Board

### Lars-Johan Jarnheimer

First elected at the EGM on November 26, 2019

**Born:** 1960  
**Nationality:** Swedish  
**Board Chair:** Ingka Holding BV (IKEA), Arvid Nordquist HAB and Elite Hotels of Sweden AB  
**Board Member:** SAS AB, Point Properties AB and Grimaldi Industries AB  
**Work experience and other assignments:** Previously Chair of the Board of Directors of Egmont International Holdings AS, Qliro Group, BRIS and Eniro AB, Board Member of Millicom International Cellular SA, Modern Times Group MTG AB, Invik and Apoteket AB, CEO of Tele2 AB (1999-2008), Deputy CEO and CEO of Comviq and various positions within H&M Hennes & Mauritz AB  
**Education:** Bachelor of Science in Business Administration and Economics from Lund and Växjö universities

**Shares in Telia Company:** 120,097

# Sustainability

# Reinventing better connected societies

Telia Company's sustainability agenda and ambitions are thoroughly integrated into the company's business strategy, as described in the beginning of this report (see **Our Strategy**).

Telia's corporate purpose reflects a commitment and willingness to contribute to more resilient and equitable societies. This section presents Telia's most material impact areas, what it has achieved so far and the challenges it faces along the way.

## Overview of content:

- How we prioritize
- Preparing for CSRD
- Trends
- Collaborations
- Governance
- Overview of achievements
- Impact areas
- Sustainability notes
- Sustainability index

# How we prioritize

Telia analyzes which sustainability topics (impact areas) it needs to act and report on, based on the double materiality principle. This means that Telia considers both the impact of its actions on the world around it and the impact of sustainability topics on its financial value.

Telia conducted its first double materiality assessment in 2023, which confirmed the material impact areas previously selected by the company (illustrated to the right). Telia has selected three of these areas as its main focus – Climate and circularity, Digital inclusion, and Privacy and security. These areas are connected to Telia's core business and therefore offer particular leverage. The remaining six areas constitute essential building blocks of an ethical and rights-respecting culture. All impact areas are embedded in **Our Strategy**.

More information about stakeholder engagement and double materiality determination is presented in **Sustainability note S3**, including specific context and trends for 2023 that affected Telia's material impact areas.

## Our material impact areas

### Priority impact areas

Climate and circularity

Digital inclusion

Privacy and security

### Other material impact areas

- Human rights
- Children's rights
- Freedom of expression and government surveillance

- Diversity, equity, inclusion and well-being

- Responsible sourcing
- Anti-bribery and corruption

# Preparing for CSRD

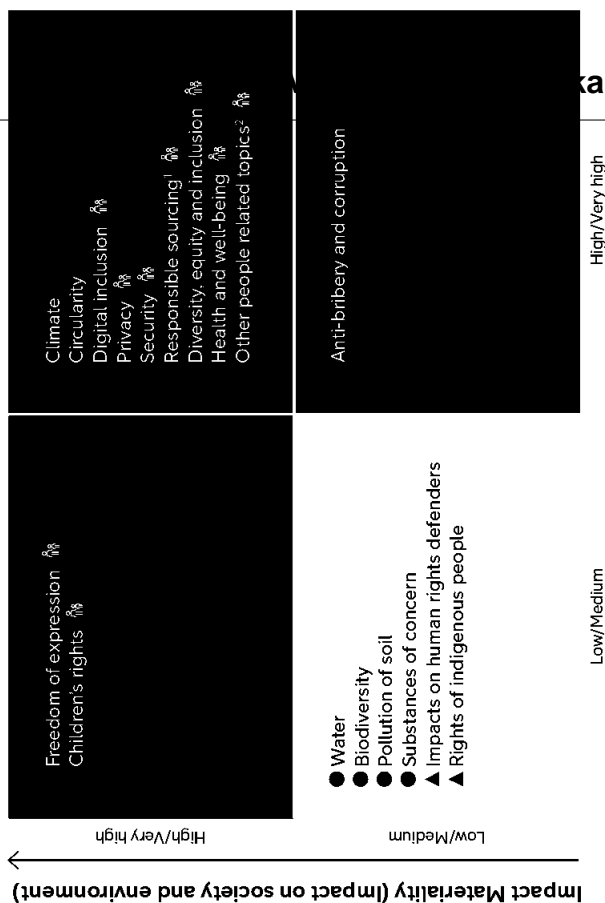

During the year, Telia worked to prepare for the Corporate Sustainability Reporting Directive (CSRD) and the related European Sustainability Reporting Standards (ESRS) that will enter into force in 2024.

In 2023, Telia conducted its first double materiality assessment (DMA) – see the results to the right. In the DMA, each topic was assessed in terms of its impacts, risks and opportunities using two main criteria: likelihood and impact level. The assessment was made from an inherent perspective, meaning that it was based on likelihood from an industry and geographical point of view, but without considering the company's current mitigation activities and controls. The DMA assessed each topic in terms of how the company impacts the outside world (society and environment) and how the world around it impacts the company financially.

Telia decided to consider topics with a "high" or "very high" impact materiality or financial materiality as material, and these topics will therefore be in focus in the company's CSRD reporting next year. Overall, the 2023 assessment confirmed Telia's current focus and priorities.

For detailed information about each material impact area, please refer to the following chapters. More information about stakeholder engagement and the double materiality assessment is presented in **Sustainability note S3**.

## Double materiality

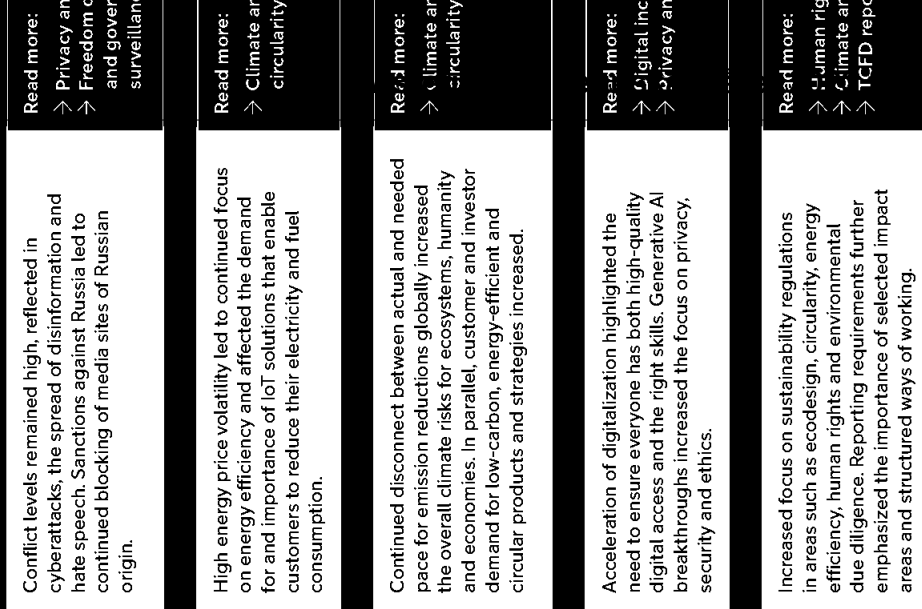

### Financial Materiality (Impact on Telia)

- 1) Child and forced labor, Health and safety, Working hours, Freedom of association
- 2) Freedom of association, Training and skills development, Adequate wages

# Trends affecting sustainability in 2023

Telia's sustainability efforts were affected by certain trends in its business environment during the year, which emphasized the importance of the selected impact areas.

More information about material impact areas and how they are identified is presented in

# Collaborations to scale impact

Collaborative initiatives enable Telia to better understand and act on its impacts, risks, and opportunities. Telia learns by working together with experts and affected parties, and pools resources to maximize outcomes and leverage. Working with partners contributes to Telia's materiality assessments and enables the company to find efficient approaches. Selected examples of Telia's collaborative initiatives are presented here.

**GSMA** – The global industry association for mobile operators is engaged in developing sustainability-related guidance for several areas, most notably human rights and climate. Throughout the year, Telia collaborated in various workstreams, including Circular economy for devices, Biodiversity. Telia also contributed to the GSMAs guidance on scope 3 reporting for telecommunications operators to ensure sector alignment.

**GNI** – The Global Network Initiative is a multi-stakeholder organization that brings together ICT companies, human rights and freedom of press groups, academics, and investors to protect and advance global free expression and privacy in the ICT industry. The core of its work is to share learnings and create leverage when governments risk acting in violation of freedom of expression and privacy. Telia is a member of the board.

**Eco Rating** – Eco Rating is a rating that evaluates the environmental impact of mobile phones throughout their lifecycle. Telia partnered with Deutsche Telekom, Telefonica and Vodafone to launch Eco Rating in 2021. The rating enables consumers to compare the environmental performance of various device models while shopping. Telia provides information to mobile phone manufacturers to improve their environmental impact.

**ETNO** – The European telecommunications industry association, in which Telia is a board member, has taken a forward-leaning position in driving policy development related to the EU Green Deal. This has included work to develop industry guidance related to the EU taxonomy and to shape industry positions on various laws relating to circularity and the environmental impact of telecommunications networks.

**Forum for Social Innovation Sweden (MSI)** – MSI at Malmö University has extensive knowledge about social impact assessments. Telia formed a partnership with MSI in 2022-2023 to develop an impact assessment tool and guide to enable impact assessments of the company's digital skills initiatives. Telia has made the tool available for other companies to use, in order to scale the adoption of impact assessments.

**Exponential Roadmap Initiative** – The initiative is a sector collaboration to help companies set ambitious climate goals by 2030. Telia has been active in the initiative since its launch in 2021, and updated in 2022, which provides a framework for companies committed to halving emissions by 2030.

**CHILDPOD** – The World Childhood Foundation, Save the Children and BRIS – Telia collaborates with child rights expert organizations to properly understand online risks to children and shape support materials and family offerings.

**Joint Alliance for CSR** – The Joint Alliance for CSR (JAC) is an association of telecom operators collaborating to develop and implement sustainability standards in their supply chains. Through JAC, members such as Telia share resources and best practices to further improve sustainability work in the lower tiers of telecom supply chains. In 2023, Telia contributed to JAC's joint call to action and educational webinars to get more suppliers to embark on the journey towards net zero.

**1.5°C Supply Chain Leaders** – The initiative was founded by the Exponential Roadmap Initiative and business partners. Telia, to advance climate work in its supply chains. Telia contributed to the development of practical guidance through the **Engagement Guide**, which supports companies in setting ambitious targets and action. Support for companies with low carbon footprints is channeled via the **Supplier**

# Sustainability governance

Sustainability is integrated into Telia's daily business and via processes including strategy development, risk management and oversight mechanisms.

The ultimate responsibility for sustainability oversight lies with the Board, which also decides on the overall sustainability direction and policy commitments. The Board receives updates on sustainability performance twice a year and more often if needed as part of the CEO's monthly updates to the Board. The Board's Audit Committee receives risk reports from management twice a year, covering Principal Risk areas that incorporate Telia's sustainability impact areas, and decides on acceptable risk levels (see the section on **Telia Company's risk universe**).

Group Executive Management (GEM) and Governance, Risk, Ethics and Compliance (GREC) meetings are the primary decision-making forums at management level for sustainability-related topics. GEM adopts and follows up on Telia's sustainability goals, while GREC monitors sustainability-related risks via Telia's Enterprise Risk Management Model.

Within GEM and GREC, the Head of Communication, Brand and Sustainability has the overall responsibility for sustainability-related topics.

The Head of Group Sustainability reports to the Head of Communication, Brand and Sustainability

and has the overall responsibility for proposing strategic content, goals and required actions and following up work that has been integrated across the organization.

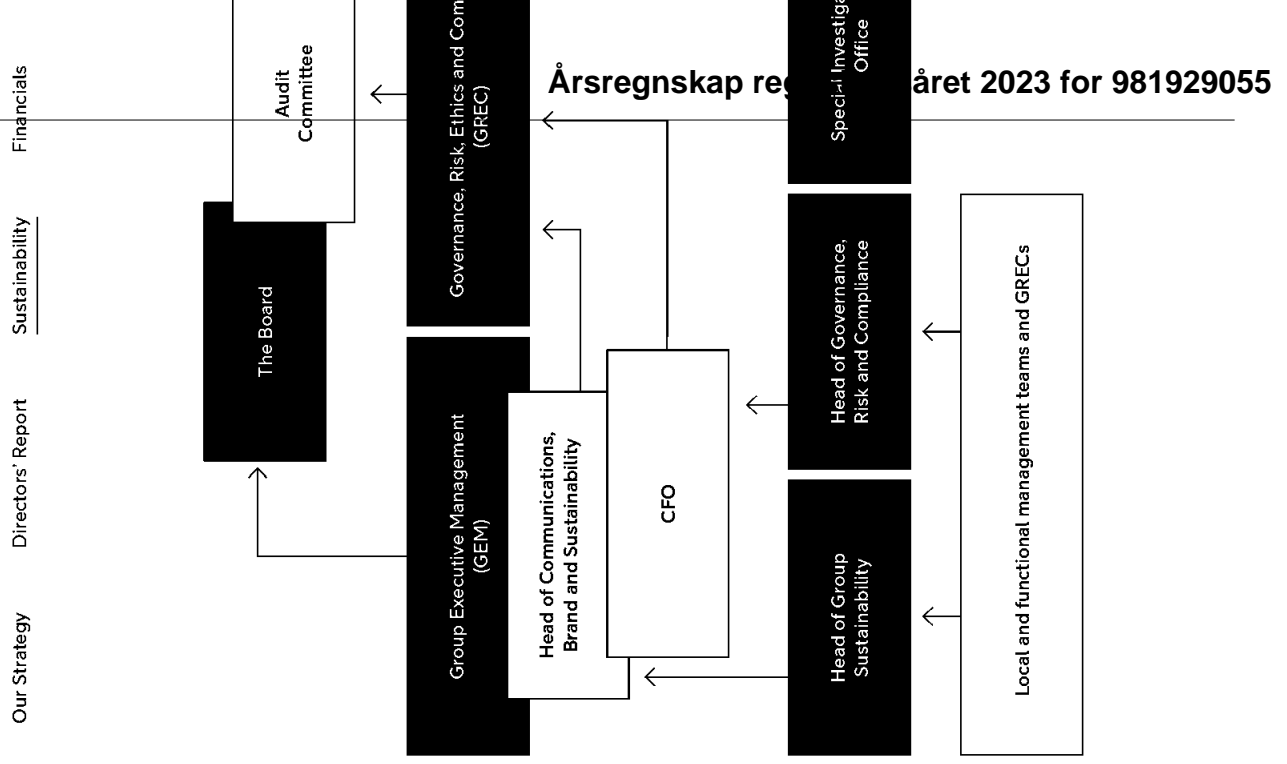

The Head of Governance, Risk and Compliance is in charge of the company's Enterprise Risk Management model, has operational responsibility and oversight over the anti-bribery and corruption program, and reports to the CFO.

The Special Investigations Office manages the company's whistleblowing system (the Speak-Up Line) with a direct reporting line to the Audit Committee of the Board.

At the local level, local management teams and local GRECs have similar responsibilities as the GEM and Group GREC.

There are also specific coordination and decision-making forums related to the respective sustainability impact areas, as reported separately in each impact area chapter.

Read more in the **Enterprise Risk Management (ERM) and Compliance Framework, including Whistleblowing and Speak-Up Line**.

# Code of Conduct

In 2023, Telia's Board launched an updated Code of Conduct. The updated Telia Code of Conduct reflects the changing risks across the company's geographical footprint and is aligned with its purpose and values.

The Code of Conduct serves as an ethical compass, providing high-level guidance on the essence of the company's policies and instructions regarding various topics, many of which relate to Telia's sustainability agenda. It applies to everyone at Telia – employees, members of the Board, contractors, consultants and freelancers, and demonstrates the company's commitment to the highest possible standards. Training in the Code's content is mandatory and various initiatives to enhance the various topics covered by the Code are implemented continuously throughout the year.

Underlying policies are approved by the Board and can be found on Telia's website. Further elaboration of the policies is available through instructions that are approved by the CEO or responsible GEM member.

# Overview of 2023 achievements

The table opposite provides an overview of Telia's main achievements during the year and how its impact areas are contributing to the UN Sustainable Development Goals (SDGs). In addition, stakeholders can track Telia's performance via various external sustainability ratings.

## 2023 External rating results

Sustainability ratings provide Telia's stakeholders with information about its performance and maturity while helping the company to identify opportunities to make improvements. Below are some of the highlights for the year:

- EcoVadis Platinum medal, placing Telia in the top 1%
- A- CDP Climate Change score
- AAA MSCI ESG rating
- B- ISS ESG rating
- Included in the FTSE4Good Index

Strategic pillar	Impact area	SDGs		
		Direct impact	Indirect impact	2023 Achievements
Inspiring customers	Climate and circularity	7	9, 11, 12, 13	- Achieved 87% CO <sub>2</sub> e emissions reductions operations compared to 2018 - Suppliers responsible for 52% of supply chain emissions from purchased goods and services - Capital goods have set science-based targets - 72% of waste in own and network operation or recycled
Connecting everyone	Digital inclusion	5, 9	10	- Reached 1,363,194 individuals with digital initiatives targeting seniors, children, SMEs
Transform to digital	Privacy and security	16		- Achieved top-tier positions (either first or second) in 3 out of 6 markets, according to consumer survey
Delivering sustainably	Human rights	3-5, 8, 10-12, 16		- Updated Telia's human rights guidance analysis
	Children's rights		4, 16	- Ranked No. 1 in the global Tech Industry Human Rights Benchmark by Global Children's Rights Forum
	Freedom of expression and government surveillance	16		- Took measures to respect users' rights in response to several high-risk requests from government authorities
	Employee diversity, equity, inclusion and well-being		5, 8, 10	- 41% women in the Extended Leadership (top leaders) - 79% of employees state that they are able to successfully balance work and personal life
	Responsible sourcing	8, 12	16	- Deep dive into labor rights risks related to and transport in all markets
	Anti-bribery and corruption	16		- Completed anti-bribery and corruption risk and program maturity assessments in all markets

# Climate and circularity

Year	Goals	2023 progress
<b>On climate</b>		
2040	- Net-zero by 2040, aligned with the requirements of the Science Based Target Initiative (SBTi) Net-Zero Standard	- Target validated by SBTi in August 2023
2030	- At least halve emissions by 2030 and offset the rest (base year: 2018) - Science-based target: Reduce CO <sub>2</sub> e emissions in own operations (scope 1 and 2) <sup>1</sup> by 90% (base year: 2018)	- 6% reduction achieved since 2018 - 87% reduction in own operations achieved since 2018
2026	- Achieve an A score in CDP's external climate assessment	- A- achieved
2025	- Science-based targets (base year: 2018) - Halve emissions in own operations <sup>1</sup> - Supply-chain, upstream <sup>2</sup> : Engage with suppliers so that suppliers responsible for 72% of emissions from purchased goods and services and capital goods have set science-based targets - Customer use, downstream <sup>3</sup> : Reduce emissions related to the use of sold and leased products by 29%	- Achieved in 2020 - Suppliers responsible for 52% of emissions have set science-based targets (2022: 35%) - Reduced emissions by 25% (2022: reduced by 4%)
<b>On circularity</b>		
2025	- 84% of materials from Telia's own and network operations to be reused or recycled (100% by 2030)	- 72% was reused or recycled (2022: 76% <sup>4</sup> )
2023	Extend the lifetime of devices through: - a significant increase of sales of pre-owned/ reused mobile phones (B2C) - a significant increase of sales of mobile phones provided as "Device as a Service" (B2B)	- Pre-owned/reused represented 4% of total mobile phone sales in B2C (2022: 3%) - Device as a Service represented 27% of total mobile phone sales in B2B (2022: 27%)
<b>On energy</b>		
2026	- Only use renewable electricity - Limit the electricity consumption increase to 7%, compared to 2022, while mobile data traffic in own networks is expected to double	- Achieved since 2020 - 4% increase in electricity consumption compared to 2022

1) Scopes 1 and 2 (market-based). 2) Scope 3 categories 1, 2, 3) Scope 3 categories 11, 13, 4) Update on historical waste data, see Sustainability note S4.

## Approach

To forcefully address the climate crisis and the unsustainable use of natural resources, Telia is committed to achieving net-zero by 2040 (target in conformance with the new SBTi Net-Zero Standard and approved by SBTi). To achieve net-zero, Telia must reduce emissions by 90% (compared to base year 2018) and neutralize the rest. By 2030 Telia commits to at least halving absolute GHG emissions compared to 2018 and offsetting the rest, while continuing to move towards net-zero.

The work towards zero waste focuses on Telia's operations, including network construction and maintenance done by contractors. The aim is to prevent, reduce, reuse or recycle waste instead of sending it to incineration or landfills.

In addition, Telia is committed to enabling a net-zero and circular economy through Telia's offerings.

Telia's long-term decarbonization journey is broken down into more detailed near-term goals, as well as 2025 science-based targets, aligned with the 1.5° C pathway for the ICT industry (see table to the left).

Telia's approach is proactive and structured. Five out of six markets are covered by ISO 14001 certification and three markets are covered by additional energy management systems (Sustainability note S18). Environmental

screening of energy consumption, where GHG emissions precedes investment which in turn affects, for example, price service development. Telia acknowledges that it cannot achieve its goals alone. Therefore, it extensively collaborates and co-creates with others to accelerate progress. Selected examples are presented in the section on Sustainability collaborations.

This work is governed by the Governance Environment

## Work during the year

### 01. CLIMATE

#### Work to achieve net-zero by 2040

Telia has reduced absolute CO<sub>2</sub>e emissions in its own operations by 87% since 2018 (scope 1 and 2). Part of the achievement relates to Telia's decision to only use renewable electricity in powering its operations, including network and data centers. In the coming years, Telia will continue its efforts, aiming to reduce emissions from its own operations by 90% by 2030. The remaining emissions will be generated by diesel-powered backup generators, district heating and Telia's own fleet, and other examples, and the company is working to adopt alternatives.

As illustrated on the next page, most of Telia's total value chain emissions, including

**Managing energy while digitalizing societies**  
Energy is one of Telia's most significant environmental aspects. Telia's strategy to manage energy impacts and costs consists of several parts, including:

- Increasing energy efficiency through new network hardware and power-saving features
- Managing power consumption by decommissioning legacy networks and modernizing sites – for example, by placing relevant units outdoors to reduce the need for cooling
- Only using renewable electricity when powering its own operations and looking for alternatives to the remaining fossil-based energy sources
- Providing customers with solutions that enable energy reductions (see next section).

During the year, Telia's operations consumed approximately 1,180 GWh of electricity, an increase of 4% compared to 2022. Electricity comprised 95% of the total purchased energy, while the remaining share consisted of district heating and

**Green bonds**

Telia published its green bond framework in 2019 and has successfully issued green bonds on several occasions since then. The current total outstanding volume of green bonds is approximately EUR 1,160 million. The proceeds have mainly been used to finance more energy-efficient networks and the transition from copper to fiber and 5G in Sweden, but also for green digital solutions that enable customers to reduce emissions and save energy. Read more in

district cooling, vehicle fuels, natural gas and diesel used for backup power. Since 2020, Telia only uses electricity from renewable sources, covered by guarantees of origin or secured through long-term power purchasing agreements including wind, solar, hydro and biomass. Energy-efficiency measures have intensified in recent years. Compared to 2022, electricity consumption per subscription increased by 1.8% in 2023. This is mainly due to the 5G network rollout and the closure of the old public switched telephone network. However, electricity consumption per bit of mobile data transferred decreased by 12.2% in 2023.

Additional energy data is provided in **Sustainability note S4**.

**Enabling other sectors to reduce emissions and energy**

Several studies, such as the **Exponential Roadmap report**, reveal that connectivity and digital solutions have the potential to improve resource efficiency and reduce GHG emissions across sectors. Since 2020, Telia has tracked "enablement effects" for products and services such as remote meetings and IoT solutions for buildings, transport and utilities. Based on products and services delivered during 2023, Telia estimates that these categories enabled emission reductions totaling more than 433,000 tons of CO<sub>2</sub>e in 2023, the equivalent of emissions arising from over 3.1 million return trips by air between Stockholm and Helsinki.

Apart from the carbon enablement effect, Telia also measures energy reductions enabled by IoT. Electricity savings from such services are important to limit overall environmental impacts

and enable the full phaseout of fossil energy in the wider energy system. Telia estimates that in 2023 it enabled energy savings of approximately 2,150 GWh through IoT solutions for smart buildings, utilities and transport, equivalent to the annual energy consumption of 228,000 average Swedish households.

Moreover, the underlying connectivity Telia provides enables further indirect reductions that are more difficult to capture. For example, as a connectivity provider, Telia enables various digital solutions offered by other digital players, such as circular economy business models that significantly reduce resource use.

Read more about Telia's enablement methodology and the results in **Sustainability note S4**.

**02. CIRCULARITY**

Shifting from a linear to a circular economy and starting to use natural resources in an efficient way will be critical if we are to tackle climate change and start existing within planetary boundaries that are safe for humanity and ecosystems. Given this reality, Telia has committed to achieving zero waste in its own operations, including network construction and maintenance, by 2030. This means applying the principle of "prevent, reduce, reuse and recycle" (in that order) across all material streams. Telia is equally committed to enabling circularity through its offerings.

**Embedding circularity in our own operations**

Telia is focused on moving up in the waste hierarchy to prevent/reduce waste and increase reuse and recycling. The progress that Telia has made towards achieving its zero-waste goal is

Case:

# Enabling smart transport

Alongside its commitment to achieving net-zero emissions in its own value chain, Telia is equally committed to enabling its customers to reduce CO<sub>2</sub> emissions and use natural resources more wisely with the help of digital solutions. Research shows that digitalization can play a key role in the low-carbon and circular economy. In all of Telia's markets, it is challenging to reduce transport emissions at the pace required to minimize climate change. Transport is therefore one of the sectors in focus for Telia's enablement efforts.

The Nordic and Baltic regions have some of the world's most advanced, well-functioning public transport systems. However, for public transport to reach its full potential, operators need to find ways to increase its utilization, reduce costs and minimize environmental impact. A report from Telia shows that a full deployment of the digital solutions available today could increase the number of public transport passengers by 18 percent. For several years, Telia has developed smart solutions for public transport together with Nobina, the largest public transport company in the Nordics. In 2023, Telia and Nobina expanded sales of solutions such as real-time information from buses for energy-efficient operations and increased safety for drivers and passengers to Norwegian public transport companies in Oslo and the southeastern areas of Nedre Glomma.

In February 2023, Telia and Ericsson the NorthStar program to accelerate 5G, with a particular focus on the development of smart and sustainable transport solutions. With the help of EU funding, NorthStar to develop 5G transport corridors during the year, along selected routes between industrial and technology clusters across the country. The corridors will connect controlled with public roads, with full-scale tests start in the second quarter of 2024. Telia is expected to play a key role in developing connected autonomous vehicles such as driving electric trucks in a safe and secure

Research shows digitalization a key role in the low-carbon and circular economy

# Circularity highlights

**27%**

of mobile phones sold to B2B customers were "as a service" to extend lifetime of the devices and enable reuse and recycling

**17%**

of routers and TV set-top boxes delivered to customers were reused

Telia IoT services enabled customers to save energy equivalent to annual consumption of

**228,000**

Swedish households

highlighted in the graphics on the left-hand side of this page. During 2023, 72% of waste was either reused or recycled, 27% was incinerated (with or without energy recovery), and 1% was directed to landfill. Recycling and reuse opportunities vary across Telia's markets and across different waste types. Incineration with energy recovery is a very common practice in Telia's markets. The decommissioning of telephone poles generates a big share of what is currently incinerated. There is currently no alternative since the poles are impregnated and therefore classified as hazardous waste, but Telia aims to continue gradually dismantling these poles in the future. When excluding the poles, 3% of total waste remains to be addressed to achieve Telia's 2030 zero waste goal. Additional waste data is presented in **Sustainability note S4**.

In 2023, as part of its work on advancing circularity within its own operations and reducing GHG emissions, Telia initiated a supplier engagement project with network equipment vendors to align on the requirements of the European Sustainability Reporting Standard E5 – Resource Use and Circular Economy. The purpose of the project was to limit suppliers' resource use and increase their circularity efforts, as well as to ensure their readiness to meet CSRD requirements in that area, thereby mitigating risks arising from Telia's dependencies on suppliers.

**Offering circular products and services**

Environmental screening – focusing on emissions, energy, waste and hazardous materials – is included in Telia's product development and sourcing process to control which products enter Telia's flows.

Telia also aims to scale circular business models and thereby help extend the lifetime and increase recycling rates. Circular models require shifts in consumer behavior but are becoming increasingly interesting to customers as Telia adds value – for example, providing hardware support, repair at a rather than just delivering a product.

Telia continued to participate in the **EU initiative of mobile phones**, an initiative that was launched in 2021 in partnership with other operators to drive circular principles within the mobile manufacturing industry. The rating, which is based on lifecycle assessments, makes it possible for customers to understand the environmental impacts of a phone, thereby incentivizing manufacturers to apply circular principles in their design through the end-of-life phase, helping Telia to prepare for upcoming requirements.

**Enabling circularity in other sectors**

Digitalization can accelerate the circular economy by enabling various sectors to use less water and other resources in more efficient ways. As a connectivity provider, Telia enables circular business models, such as platform and blockchain technologies for traceability. In many cases, digital solutions also enable dematerialization. These effects are indirect but reflect the importance of business – connectivity.

Circularity highlights and additional information are presented to the left and in **Sustainability**

Case:

# Ensuring hive well-bee-ing with IoT

Although beekeeping dates back 4,000 years, its methods have hardly changed for centuries – until now. In 2023, Telia's IoT solutions enabled beekeepers to remotely monitor their hives and provide researchers and authorities with valuable data that can help protect threatened bee populations.

monitoring of conditions and the opportunity to act swiftly when necessary.

For more information on Telia's work on biodiversity and water, please refer to **Sustainability note S4**.

In collaboration with Telia, BeeLab Technology Sweden AB is connecting beehives across Sweden with Telia Narrowband IoT connectivity (NB-IoT), enabling access to beehives even in the most remote and hard-to-reach places. Most of the world's crops and flowering plants depend on pollination by bees, making them essential for maintaining the biodiversity and ecosystems we rely upon. But entire bee populations are dying worldwide, and more data and research is needed to understand how to save them.

BeeLab installs sensors to measure each hive's weight, humidity and temperature and uses that data to understand each bee colony's condition, honey production, population size and adaptation to external factors such as weather. Sensor data is sent several times an hour from a gateway inside each hive to the cloud, via Telia NB-IoT connectivity. This approach enables remote

Telia's IoT solutions enable access to beehives even in the most remote and hard-to-reach places.

# Digital inclusion

Year	Goals	2023 progress
2026	- Reach 2.2 million individuals with digital inclusion initiatives from 2021 to 2026	- 1,363,194 individuals reached since 2021 (347,280 in 2023)
2024	- 96% 5G population coverage	- 87% coverage (2022: 70%)

## Approach

Telia Company is committed to connecting everyone to the most trusted, reliable and efficient modern networks. Ensuring that everyone has access to reliable connectivity and the right digital skills is the key to making sure that no one is left behind in the digital world. Telia's work in this area focuses on contributing to digital equality and inclusion, to ensure that individuals and societies in the Nordics and Baltics capture the full potential of digitalization.

Digitalization is currently transforming societies – creating both opportunities and risks. Those who are digitally included can make the most of new opportunities. Those who are excluded risk being left behind when services such as health care, banking and education are digitalized, and as other social arenas continue moving online.

## Work during the year

### Providing reliable access

**Quality:** Telia is committed to providing high-quality services to its customers and in 2023

the company continued to make considerable investments to improve connectivity quality for everyone. By the end of 2023, Telia had achieved the following milestones:

- Almost 100% 4G population coverage
- 87% 5G population coverage
- 6.5 million homes across all markets covered by fiber access
- In areas where fiber access is not viable, Telia provides fixed wireless access via its 4G and 5G networks

Stakeholder concerns primarily relate to two main areas: the differences in quality between urban and rural areas, and the effects from the shutdown of the copper network. While acknowledging the differences in quality between urban and rural areas, Telia has committed to improving network coverage across its markets. In four out of six markets, Telia is perceived to have the best 5G network coverage and quality, according to crowdsourced data and field measurements (OpenSignal, Umlaut and others). On overall mobile network quality, Telia is No. 1 in three of its six markets, and the company is improving

# Access + Digital skills = Digital inclusion

## Initiatives to build digital skills – selected examples

### Helping new arrivals to increase their knowledge of digital services

Immigrants in Telia's markets face barriers that could prevent them from being included in society. To help immigrants overcome some of these barriers, Telia launched the "Digital in Sweden" initiative together with municipalities around the country. During the year, Telia and its partners organized 15 events and inspired over 300 new arrivals to use important digital community services. In a summarizing evaluation, it was found that the initiative had a positive impact on the new arrivals' knowledge of digital services in Sweden and that it contributed to the municipalities' ability to support new arrivals so that they become digitally included in Swedish society. More than 80% of the participants who took part in the evaluation wanted to try more digital services after the event, and most also thought that their level of knowledge had increased.

### Supporting the employment of women in the technology sector

In Estonia, only 20% of women work in the technology sector and the sector has a shortage of at least 7,000 people. To address this asymmetry, the "Women in Tech | Telia" initiative was created in cooperation with the Smart Work Association in Estonia. The initiative offers free five-month training programs for women. So far, 50 women have participated in the program and 48 of them successfully completed it. A survey revealed that 20% of the participants went on to start new careers in technology. The most significant benefit of the initiative, according to the participants, is the opportunity it gives them to regularly meet and support each other.

### Improving the digital skills of seniors

Technology enables seniors to be socially active and access vital online services, such as those related to banking and health. However, technology can be challenging. During the year, the "Safely online" initiative in Finland encouraged nearly 6,000 seniors to embrace the online world, through online webinars about digital safety and local workshops. The initiative is the result of a partnership with OP Financial Group. An impact assessment revealed that the participants were able to enhance their every day digital safety skills, for example by learning how to recognize phishing attempts and safely use digital services.

### Making digital skills and careers attractive for children

Encouraging children to consider even pursuing an IT career is essential to a sustainable talent pipeline for the future. In response to the growing demand for digital skills, Telia Lithuania launched the inaugural IT Challenge. This nationwide initiative targets students in grades 7-9, with the goal of increasing their interest in IT and programming. The program aims to bridge the IT knowledge and quality gap between urban and rural areas, emphasizing opportunities for gender equality in learning. In 2023, the National IT Challenge reached 750 schools across the country, with 8,500 registered students and teachers.

# Privacy and security

## 2023 progress

- Achieved

**Annual**  
- Continuous implementation of "privacy and security by design" approach

**On privacy**  
2026 - Top-tier positions on customer privacy in all markets

- Ranked first or second by consumers in three of six markets

**On security**  
2023 - Preferred supplier, responsive to and proactively addressing customers' security needs

- Several contract wins with elevated security requirements during the year

## Approach

Telía is committed to respecting the privacy rights of its customers and employees and keeping their information safe. To that end, the company takes a proactive approach to assessing the impacts of its data processing on data subjects and ensuring that it handles their personal data lawfully, fairly and in a transparent manner.

Today, societies and individuals depend on Telía's network infrastructure to function. The company puts significant effort into securing service continuity and protecting its systems from cyberattacks. Telía also provides customers with knowledge and tools to protect themselves and their businesses against various forms of cyberthreats.

Telía's 2023 goal is to have top-tier positions in privacy in all markets and to be a preferred supplier due to the security measures it implements. Robust processes, the right competencies and interaction

with customers are required to understand their needs and expectations.

 This work is governed by Group policy – Security and Group policy – Privacy and data protection

## 01. SECURITY

### Processes

Geopolitical events are accelerating the risks associated with cyberattacks for Telía's customers, its industry and society at large. These risks need to be managed with a broad spectrum of proactive measures that allow Telía to effectively adapt to rapidly changing security environments. On the human side, the company invests heavily in both broad security awareness throughout all parts of its organization as well as in deep expertise in the various security disciplines. Telía habitually challenges and adjusts its security processes to

ensure that they are fit for purpose – not only from an internal perspective, but also through the lens of independent, external security auditors. The company recognizes that it is important to not only increase its investments in modern and adequate security tools, but also to master their utilization to the fullest extent possible.

Telía's security governance framework is developed and refined in alignment with ISO 27001 and other relevant and renowned best practice guidelines, such as US National Institute of Standards and Technology Cybersecurity Framework and Center for Internet Security Critical Security Controls. The framework specifies requirements for information security and related risk management across all of the company's functions and local organizations. Telía maintains an ISO 27001 certificate and external audits are carried out annually to ensure proper security measures and continuous improvement.

Telía's Global Security Operations Center (GSOC) takes responsibility for the company's reactive capabilities by monitoring and handling cybersecurity incidents around the clock. The GSOC is a member of the Forum of Incident Response and Security Teams (FIRST) and is a Trusted Introducer (TF-CSIRT).

## Work during the year

### Winning contracts with elevated security requirements

Telía's ambition is to stay close to its customers' security needs and to be a preferred supplier. National security legislation is placing increasingly stringent demands on several of the company's most important customers and Telía is in an

advantageous position to continue develop the security solutions that its most demanding customers need. As an example, there are strong security capabilities and credentials in Lithuania was chosen as the sole provider of connectivity services for the NATO headquarters that took place in Vilnius during the year.

## ISO 27001 certification

Telía's ISO 27001 certification plays a central role in the continuous strengthening of the company's practices and in its ability to meet its customers' demands. During the year, the certificate was maintained with an unblemished scope, comprising areas such as the Information Security Governance, Enterprise Information Security Risk Management, Management and Change Management services, contact center services and based communication services. More regarding local certifications is available in **Sustainability note S18**.

## Work to ensure business continuity

As digitalization gains pace, customer society as a whole are increasingly dependent on the services Telía provides. Ongoing developments underline this fact. The company maintains a strong focus on business continuity and performance of the recovery cycle of its services. Telía ensures that recovery plans are in place to build and counteract unexpected disruptions and

Telía's Business Continuity Management framework is applied to critical service processes and resources. It identifies dependencies and risks and ensures response to disruptive events. It also

implementation of continuity measures and solutions. The framework is aligned with the ISO 22301 standard and ensures that Telia complies with regulatory requirements in the markets in which it operates.

To maintain employee awareness about security matters, a continuous nano learning course is mandatory for all employees. By year-end, 60% of employees had completed the trainings.

## 02. PRIVACY

### Telia's processes

Telia has adopted a "privacy by design" approach to ensure GDPR compliance and transparent management of personal data in all new products and services. The key components of its approach are:

- Embedding data protection into its business, including products, processes, and IT systems from the initial design stage and then throughout their life cycle
- Analyzing data protection parameters jointly with privacy experts, from the initial planning stages of a data processing operation
- Conducting a privacy assessment and, when needed, a data protection impact assessment before carrying out data processing where the initiative is likely to result in a high risk to the rights and freedoms of individuals

### Continuous testing of processes, routines and controls

Telia continuously reviews and updates privacy processes based on evolving best practices, applicable legislation, case law and government recommendations. Information on how the company processes personal data is provided

through transparency notices available in all relevant languages.

Responsibility for customer and employee privacy is divided between the Privacy Legal Team and the Data Protection Officer's (DPO) Office, and the Privacy Operations team supports the organization in implementing the privacy requirements. The Privacy Legal Team provides legal advice and proactively supports the business in its "privacy by design" work. The DPO Office has a special role due to GDPR requirements and is independent to avoid conflict of interest. The DPO Office carries out reviews and tests compliance with GDPR and the e-Privacy Directive, responds to requests from individuals in data protection cases and interacts with data protection authorities in matters related to customer privacy. The Group DPO reports regularly to the GREC management forum and the Board of Directors.

### Work during the year

#### Strong privacy position

Consumer studies conducted by SB Insight show that privacy is the top sustainability topic that consumers want Telia to focus on. The company regularly tracks how consumers perceive its privacy work compared to its competitors through an external survey conducted by Telia. By the end of the year, three of six markets were ranked either first or second.

Telia works continuously to strengthen its processes, build competencies and enhance transparency in customer-facing channels. The latter is important to increase customer awareness of their rights and how the company uses their data (examples provided below).

**Protecting user rights**  
Individuals can exercise their GDPR rights by providing or withdrawing consent, objecting to certain processing purposes, or requesting to be forgotten. This can be achieved by contacting customer service, visiting Telia stores or accessing online customer self-service portals that enable individuals to easily access their accounts and make requests.

During 2023, Telia received around 4,100 right of access requests from customers who wanted to obtain a copy of their personal data. This helps customers understand how and why the company is using their data and enables them to verify that Telia is doing so in accordance with the law.

To ensure safe handling of personal data, privacy training is conducted via an e-learning course that is mandatory for all employees. By year-end, 86% of all employees had completed the training. There are also specific courses for employees who handle personal data directly and have direct customer contact, such as customer care and retail staff, and for IT system owners.

**Work to identify and prevent data breaches**  
Telia entities follow a common investigation and reporting process in all suspected personal data breach cases. The company reports all personal data breaches to supervisory authorities and notifies individuals in a timely manner, when applicable. To minimize the risk of breaches, when a mitigating action is applied in one unit it is also shared for implementation across the group.

In 2023, Telia confirmed 664 personal data breaches across its markets. Most cases were related to human errors or technical errors that

caused personal data to be disclosed in an unauthorized way, for example if customer's data was unintentionally se-

During 2023, Telia launched a comprehensive e-learning training on Personal Data. The training aims to further increase awareness about which events are considered personal data breaches, how to quickly prevent breaches from happening.

Definitions for the terms used in this be found in **Sustainability note S6**.

### AI/data ethics

In 2019, Telia developed its Guiding Principles on AI Ethics, a document that has played an instrumental role in the process of developing data-driven services such as Telia Crowd. These principles have been applied in AI assessments in which the ethical use of AI is assessed to develop or use AI functions and tools at Telia. An internal assessment use cases in 2022, based on the upcoming AI Act, showed that the company's overall risk exposure is low, but that certain use cases – such as credit scoring, voice authentication and workplace analytics – are associated with higher risks. As a political agreement has been reached on the AI Act in the EU, Telia is implementing the AI Act and will start preparing new risk areas as they emerge through assessments. Risks often relate to privacy, human rights, security, intellectual property and liability.

# Human rights

## Approach

In line with the UN Guiding Principles for Business and Human Rights, Telia is committed to respecting human rights throughout its value chain by applying human rights due diligence. The company's products and services also enable the realization of certain human rights, for example by facilitating access to health care, education and jobs. Research results from the **GSMAs' 2023 Mobile Industry Impact Report** show that connectivity and digitalization can accelerate progress in relation to the UN Sustainable Development Goals. This chapter outlines Telia's human rights due diligence process and lists the human rights topics that the company has identified as the most salient ones. More specific information on each topic, including goals and outcomes, is provided in the subsequent topic-specific chapters.

This work is governed by the Group policy – Human rights

## Prioritized action areas

Human rights are universal, indivisible and interdependent. Therefore, human rights risks are difficult to rank and compare. Still, it is important for Telia to identify the specific human rights that are most salient in its markets and value chain. In 2022, due to changes in socioeconomic factors in its markets and globally, Telia updated its salience

analysis together with non-profit organization BSR. In 2023, Telia incorporated this work, including updates, into its double materiality assessment presented on page 75. The table provides additional detail on the most salient topics.

In addition to the issues listed above, there are other areas with material human rights implications, such as environmental degradation, corruption and trade sanctions. Moreover, AI is expected to increase risks related to labor and customer rights, such as job insecurity for employees and discrimination in own operations or downstream due to biased algorithms.

For more information on how Telia defines and determines salience, see **Sustainability note S7**.

## Work during the year

### Human rights due diligence

In 2021, Telia consolidated its human rights practices into a human rights due diligence strategy by strengthening its governance and clarifying the division of roles. Today, the Human Rights Core Team, consisting of internal experts in salient human rights topics, has a dedicated role in performing due diligence. During 2022

Salient area	Value chain	Most salient issue within respective area	Telia reference
Privacy	Downstream Own operations	Privacy compliance when using customer data for advanced business insights Use of workplace analytics	See Privacy and Digital Security
Security	Downstream	Human rights affected by large cyberattacks/ disruptions to Telia services (fight to life, safety, indirect effects due to economic losses, etc.)	See Privacy and Digital Security
Digital exclusion	Downstream	Indirect human rights impacts from having no or limited access to societal services due to lack of digital access or insufficient digital skills	See Digital Inclusion and Diversity
Children's rights	Downstream	Availability of child sexual abuse material online Lack of skills on how to avoid or handle harmful situations online	See Digital Inclusion and Diversity
Freedom of expression and government surveillance	Downstream	Government surveillance of individuals through direct access to Telia's networks and systems creates privacy risks and chilling effects on freedom of expression	See Freedom of Expression and Government Surveillance
Media freedoms	Supply chain, Own operations, Downstream	Government restrictions on independent journalism and freedom of expression	See Sustainability Note S7
Labor rights	Own operations Supply chain	Harassment/violence, discriminatory practices, excessive working hours Forced and child labor, absence of the right to organize and bargain collectively, occupational health and safety (incl. excessive working hours) Other human rights due to presence in or sourcing from high-risk/conflict-affected areas	See Digital Inclusion and Diversity See Resources

and 2023, the company strengthened the due diligence capabilities of additional staff groups through face-to-face training, with a particular focus on members of the local risk forums (the GRECs). Key individuals in the investment process, who work with product development and other investments, were also trained, complementing the steps already taken to address privacy and security risks.

Telia conducts human rights impact assessments on topics and areas identified in its continuous due diligence process when additional information and understanding is needed. Assessments vary in scope and depth, depending on the topic and risk level. In 2023, the company deepened its understanding of human rights risks related to workers engaged by suppliers of field services

and transport, including migrant workers who are particularly vulnerable in this context. The steps taken included a maturity assessments of suppliers' human rights standards, audits and engagement activities (see the **Responsible sourcing** chapter). Telia also deepened its understanding of how the digital world impacts vulnerable groups such as seniors, children, immigrants and SMEs through interactions related to its digital skills initiatives and impact assessments of a selection of those initiatives. In addition, impact assessments are included in the company's day-to-day work on privacy and security-related risks (more information is available in the **Privacy and security** chapter). Telia also performs risk analyses of varying depth ahead of mergers, acquisitions and divestments (more information is available in **Sustainability note S17**).

The Board and Group Executive Management are regularly informed of the outcome of due diligence through the Enterprise Risk Management process and related bi-annual risk reports (see the **Risks** section).

**Grievance mechanism**  
Telia's Speak-Up Line, which serves as a grievance and whistleblowing mechanism, enables employees and external stakeholders to raise concerns without fear of retaliation or reprisal facilitating impartial investigation. For more information about cases reported through the Speak-Up Line, see **Sustainability note S16**.

➔ **Support to restore mobile communication in Ukraine**

In the modern world, societies require connectivity to function properly. Severe connectivity disruptions have a negative impact on various human rights, for example by impairing access to health care, banking services or business transactions, all of which play a vital role in daily life. The Russian invasion of Ukraine destroyed critical network infrastructure and caused severe disruptions to energy distribution in many parts of the country. To support connectivity in the country, Telia Finland donated two generators to Ukraine in 2023, under an EU mechanism for equipment that can be reused to support the people on the ground during times of war. In 2022, Telia donated network equipment from Telia Lithuania.

**Case:**

# Smart watches for the elderly

Telia wants to enable a better future for its customers and its high-quality connectivity and impactful digital solutions provide countless opportunities to do just that. Working closely with its customers helps the company identify opportunities for digital solutions to make a real difference – and, potentially, save lives.

One example involves Stockholm-based company Sensorium, a Telia customer that provides user-friendly smart watches for the elderly. These watches are essentially IoT devices that incorporate various smart solutions, such as safety alarms, GPS trackers, activity alarms, voice calls and medication reminders. A specially developed app is designed to be easy for people with limited digital skills to use. Telia Managed IoT Connectivity ensures that Sensorium smart watches always have a stable connection.

# Children's rights

Year	Goals	2023 progress
Annual	<ul style="list-style-type: none"> <li>- Continuous blocking of child sexual abuse material in own networks</li> <li>- Continuous detection of child sexual abuse material in own IT systems</li> <li>- Provide child safeguarding services to customers</li> <li>- Empower children through digital skills initiatives</li> </ul>	<ul style="list-style-type: none"> <li>- Achieved across all networks</li> <li>- Achieved across all markets</li> <li>- Available in four of six markets</li> <li>- 70,634 children reached (more information is available in the Digital inclusion chapter)</li> </ul>

## Approach

Children and young people are active users of Telia's services. The company believes that Internet access enriches children's lives and provides them with opportunities to socialize, play and learn. However, children are particularly vulnerable to online risks such as cyberbullying, online abuse and inappropriate content.

Keeping children healthy and safe online requires collaboration within and beyond the telecom industry. Close collaboration with children's rights organizations enables Telia to better understand how it impacts children – directly or indirectly. Collaborating with World Childhood Foundation and other child rights organizations has helped Telia to develop its efforts to prevent the spread of child sexual abuse material online and equip parents with support material as they try to coach their children about online safety. The GSMA Mobile

Alliance against Child Sexual Abuse Content is an example of the ways in which Telia collaborates to influence legislation and exchange best practices.

Telia has adopted the UN's Children's Rights and Business Principles and aims to integrate children's rights and perspectives into its operations and offerings. The company aims to not only protect children, but also empower and listen to them.

Surveys repeatedly show that climate change and the unsustainable use of natural resources is of great concern to children. These phenomena are already having a major impact on children's safety, health and well-being, and will fundamentally impact future generations. Telia's commitment to achieving net-zero emissions in its full value chain by 2040 is a response to these threats. The company already views the ongoing ecological crisis as one of the greatest threats to human rights, including children's rights.

In 2023, Telia was ranked first in the global Technology & Telecommunications sector and second overall among 1,108 companies assessed in Global Child Forum's Children's Rights Benchmark, which aims to track progress on how businesses address children's rights. Telia scored 9.4 out of 10.

Read more about this in the **Climate and circularity** chapter.

This work is governed by the Group policy – Human rights. Requirements related to child labor in the supply chain are governed by the Supplier Code of Conduct.

### Work during the year

#### Integrating and promoting children's rights in business

In 2022, Telia carried out a holistic children's rights impact assessment of its business, based on UNICEF's (Mo-CRIA) self-assessment framework (available on Telia's website). Overall, the assessment revealed that children's rights had been integrated into Telia's business and operations to a high degree. During 2023, the company continued to close the gaps that had been identified. Examples include incorporating children's rights more clearly in Telia's Code of Conduct, which was re-launched during the year. Children's rights aspects were also added to the compulsory Code of Conduct training and Telia's whistleblowing Speak-Up Line. Moreover, the company appointed child rights leads in all markets in which it operates.

Telia uses a tool developed in partnership with BSR and based on the UN Guiding Principles on Business and Human Rights to assess actual and potential impacts on children's rights during its product development process. During 2023 there were no relevant service launches and the tool was not used. The tool was used in 2022, however, to assess various smart watches for children, addressing, for example, privacy and safety concerns. The tool remains available for any relevant launches.

Children's rights and responsible marketing guidelines are available for all of the company's marketing teams and external partners, and that children's rights are protected in all marketing and advertising activities.

In four out of six markets, Telia's family provides software that enables parents/guardians to set limits on children's screen time and block harmful content. The company's software is equipped with a PIN code functionality that enables parents to restrict access to premium movie rental services that feature adult content.

In the majority of its markets, Telia provides tools that parents can use to support their children online. In some markets, the company enables its employees to engage with parents through school workshops and summer camps, raising awareness about topics such as cyberbullying and online behavior. As an example, Telia's "Auge internete" (Growing up online) program has already run for almost a decade, and employees serve as mentors for school children in face-to-face or online classes where they discuss online safety. An "Auge internete" assessment conducted in late 2023 found that direct interactions with school children on this topic are not only relevant but also of great importance, as similar information is not provided in the school curriculum and parents do not have enough information themselves. However, more are gaining access to smart devices at an increasingly young age, and thus, the company is having a positive impact on children and teachers. To further increase awareness of privacy and security, the Digital Protection Center was established by Telia Lithuania in 2022. Telia's experts share their know-

# Freedom of expression and government surveillance

Year	Goals	2023 progress
Annual	<ul style="list-style-type: none"> <li>- Continuous implementation of Telia's policy and the principles and implementation guidelines of the Global Network Initiative (GNI)</li> <li>- Continuous transparency related to government requests</li> </ul>	<ul style="list-style-type: none"> <li>- Continuous implementation</li> <li>- Law Enforcement Disclosure Report published</li> </ul>
<p><b>Approach</b></p> <p>As a telco, TV and media operator, Telia's networks and services provide access to information and contribute to the exchange of views in a way that supports freedom of expression and democracy. At the same time, policymakers continue to introduce new surveillance measures to fight crime, terrorism, hate speech and other threats. These measures have the potential to limit the freedom of expression and privacy of Telia's customers and reduce their trust in the company's services.</p> <p>Telia is committed to respecting the freedom of expression and right to privacy of its customers while meeting legal requirements in the countries in which it operates. The company has clear policy commitments in place and its implementation processes are based on input from the Global Network Initiative (GNI), a multi-stakeholder organization that unites ICT companies, human</p> <p>rights and press freedom groups, academics and investors to protect and advance global freedom of expression and privacy in the ICT industry.</p> <p>States define the scope of surveillance and limitations to the free flow of information based on legislation and requests from authorities. Telia abides by this legislation but challenges requests that have no or unclear legal grounds. When there is a conflict between internationally recognized human rights and local legislation, the company seeks ways to raise the issue with relevant authorities or inform consumers and other stakeholders about the issue through public communications.</p> <p> This work is governed by the Group policy – Freedom of expression and government surveillance</p>		

**Processes**

In its work, Telia differentiates between two types of requests from governments/authorities:

- *Conventional requests* are day-to-day requests that are typically of lower risk, such as daily secret real-time wiretapping and monitoring by the police based on court orders. Such requests are received and handled by dedicated local teams.
- *Unconventional requests* are requests that may have serious impacts on users' freedom of expression and privacy. Examples include demands to shut down Internet access, blocking of websites or requirements to retain data for surveillance when legislation is unclear.

Telia's Group policy and related instruction set out practical steps regarding assessments and escalation to be performed for unconventional requests. Such requests are to be assessed by the local company and escalated to group level for final joint decisions on how to mitigate human rights risks. While the company's process aims to identify and mitigate potential violations of individuals' rights, the actual outcome depends significantly on local legislation.

**Work during the year**

**Unconventional requests during the year**

During 2023, Telia closed 8 unconventional requests and demands across its markets. Most of the unconventional requests and demands were related to the blocking of Russian content due to EU sanctions imposed on Russia, leading to a cumulative total of 10 requests being blocked by Telia by the end of 2023. Telia continuously encouraged government regulators to provide clear and timely guidance to uphold the principle that government entities, should make decisions to freedom of expression. To ensure a group-level experts facilitated local and escalations. Open cases from previous years were related to either legal or technical developments, and this monitoring continued in almost all cases. Telia took measures to ensure freedom of expression and privacy of its customers in some way, for example by being transparent towards its customers about the requests it had received or by asking to clarify their requests, and the company followed the rule of law. Such actions were jointly by local companies and representatives of Telia's Group Executive Management. Information on the blocking of content origin, which was ongoing at the end of 2023, please visit the company's website.

**Promoting transparency**

By being transparent about government surveillance and actions taken to limit freedom of expression, Telia contributes to the protection of user rights. Making such information more easily accessible has the potential to inform groups whose rights are at risk, including civil society groups that work to protect these rights. The company therefore publishes Law Enforcement Disclosure Reports (LEDR) that include detailed statistics on conventional requests, as well as the approximate number of unconventional requests. The reports also refer to some of the most relevant legislation. Contributions to the **GNI database on Country Legal Frameworks Resource** are one of the main ways in which Telia reports on local laws. Further information about the 2023 LEDR report and the latest statistics are available in **Sustainability note S8**.

**Participation in the GNI**

Telia depends on input from stakeholders and experts in this field to understand its impacts and successfully mitigate risks. Therefore, the company is an active member of the GNI, which aims to share learnings and leverage when governments act in ways that risk violating freedom of expression and privacy. Telia is a member of the GNI board and participates in various committees and task forces. More information about the work carried out during the year is available on the **GNI website**.

**Independent GNI assessment of Telia**  
As a GNI member, Telia is committed to implementing GNI principles by putting measures in place to promote and advance freedom of expression and the right to privacy. GNI member companies undergo independent assessments of their implementation of GNI principles. Results of these assessments are published on the GNI's multi-stakeholder board website. The GNI's multi-stakeholder board makes a final determination of the member companies' progress in implementing GNI principles over time.

Telia's second assessment was conducted in May 2021/2022. Based on the recommendations from these assessments, the company has taken the following actions, amongst others:

- Included freedom of expression and privacy in the company's Enterprise Risk Management setup
- Set up training on human rights for all employees and provided targeted training sessions for most relevant teams
- Initiated work to review how its due diligence efforts can cover third parties other than suppliers

Based on the assessor's report in May 2021/2022, the GNI Board determined that Telia is making progress in implementing the GNI principles and showing improvement over time. The company's assessment report can be found on the **GNI website**.

# Diversity, equity, inclusion and well-being

Year	Goals	2023 progress
<b>On diversity, equity and inclusion</b>		
2025	- 50/50 gender balance in the Extended Leadership Team <sup>1</sup>	- 41% women, 59% men (2022: 41%/59%)
2024	- Conduct a voluntary equality data survey to understand a wider set of workforce diversity aspects and needed interventions	- Planned for 2024
	- All managers trained in unconscious bias and inclusive recruitment practices	- 90% of managers trained (2022: 63%)
Annual	- Continuously decrease the raw gender pay gap <sup>2</sup>	- 12% (2022: 12%)
	- Increase diversity in Telia and in the tech sector through continuous partnerships focusing on digital and tech re- and up-skilling	- Regular interactions with members of diverse communities to showcase job opportunities and offer internships within tech
	- Ensure that diversity and inclusion aspects permeate Telia's TV and Media business, on and off-air	- Awareness-raising seminars and workshops on neurodiversity and racism reached approximately 20% of TV and Media employees
<b>On health and well-being</b>		
2023	- 78% of employees state that they are able to successfully balance work and personal life <sup>3</sup>	- 79% (2022: 78%)

1) The Extended Leadership Team represents the company's ~150 top leaders (members of Group Executive Management, their direct reports and certain additional local/functional management team members when those have roles of particular strategic importance)  
 2) The raw gender pay gap (also known as unadjusted pay gap) is defined as the difference between average earnings of men and women relative to average earnings of men  
 3) Measured through Telia's internal employee engagement survey

Sustainability-related aspects of Telia's people and culture strategy relate to securing the human and labor rights of the company's greatest asset – its people. As Telia operates in a context characterized by strict labor laws and a high degree of unionization, many aspects are secured through legal compliance measures embedded in the company's processes and through collective bargaining agreements. Read more in the **People** section.

strategy and strengthens Telia's commitment to innovation and business success.

The company complies with applicable laws while putting in place active measures to remove barriers to ensure fairness to tolerating no discrimination on account of gender, gender identity or expression, religion, age, disability, sexual orientation, background and/or other characteristics by applicable law.

Telia's approach is built on the following main

- **Employee and leadership engagement**  
Increasing awareness and engagement through training and events for managers, employees, as well as engagement diversity ambassadors

- **Improved awareness and processes**  
bias and discrimination by integrating inclusive and equal opportunity principles into company culture, including processes as recruitment and success on plan

- **Initiatives and partnerships**: Active and contributing to diversity and inclusion communities across Telia's markets

In Telia's double materiality analysis, two human rights areas within its own workforce have been identified as important to develop:

- Diversity, equity and inclusion – to secure the right to fairness and non-discrimination
- Health and well-being – to secure the right to health

## 01. DIVERSITY, EQUITY AND INCLUSION

### Approach

Telia is committed to building a diverse workforce, and an inclusive culture, where every employee, no matter who they are or what their circumstances, feels valued, respected and has a strong sense of belonging. This ambition underpins the company's

The Group Diversity and Inclusion Lead coordinates a network across Telia's geographic footprint that is responsible for local implementation and progress is reported to GEM to ensure continuous realignment and well-monitored progress.

 This work is governed by the Group Policy – People

### Work during the year

#### Diversity

In 2023, Telia continued to monitor diversity dimensions and measure various parameters to understand the barriers that need to be addressed to become an employer of choice to represent the customer base the company serves, including minority representations that go beyond gender. Telia continued to strengthen existing partnerships and explore new ones to address additional dimensions of diversity. Gender and age data is tracked to understand the employee population and design active measures. To a limited extent, Telia works with a sample of employees with foreign background data to assess its workforce diversity in relation to that of society.

#### Equity

As part of Telia's efforts to refine its equal pay framework, with the aim of achieving zero pay inequality, a pay gap and gender parity analysis is carried out once a year in all markets. The 2023 analysis revealed a 12% raw gender pay gap. Differences in the raw gender pay gap can be attributed to gender segregation of professions (for example, there are more men in technology and more women in support functions) and an imbalance in vertical career development between men and women employees. To further reduce the

pay gap, Telia has strengthened its initiatives to achieve gender equality in leadership and ensure correction of any unexplainable pay inequalities for equal roles.

To support immigrants and refugees on their journey to integrate and find employment, Telia broadened the scope of the internship program with "Jobsprånget" to offer foreign-born interns the opportunity to work with managers in any of the 6 countries where Telia has a presence. Consequently, in 2023 the company enabled 34 unemployed immigrants and refugees to enter the job market. In addition, Telia participated in non-profit events to inform and inspire immigrants to overcome barriers and enter the job market.

#### Inclusion

During 2023, to nurture a culture of inclusion and belonging, Telia introduced Employee Resource Groups (ERGs) to address topics such as neurodiversity, faith and culture of minorities, ageism, and inclusion of people with disabilities and diverse identities. By year-end the community had over 3,100 members.

While Telia prepares for a company-wide voluntary survey in 2024 to gather employees' diversity and perception of inclusion, Telia Lithuania conducted a survey to gain insight into awareness on the topic of disabilities. Telia also promoted inclusion of people with disabilities by enhancing awareness through various trainings on functional variations and neurodiversity.

To ensure that managers accelerate Telia's diversity and inclusion ambition, all managers undergo a mandatory leadership training that covers diversity and inclusion modules, addressing inclusive

recruitment practices and unconscious bias. This forms part of Telia's Leadership Framework, which underpins the company's culture.

#### Continuous improvements of HR processes

In 2023, Telia participated in a tech-industry-wide survey to detect gender-based discrimination patterns in HR processes for employees in Sweden. Telia's results were 16 points above the industry mean. The survey enabled Telia to identify key human resources processes such as recruitment, succession planning, performance and rewards, and to reevaluate them in the coming years.

#### Events and engagements

Through various internal and external initiatives, Telia discusses challenges and invites a multitude of voices to share their experiences and propose ways of reaching the end goal of increased diversity at Telia and in the tech sector. During the year, the company reached more than 160,000 people (internal and external) through events and roundtables it hosted, sponsored or collaborated on. Topics included gender equality, women in leadership, religion and culture, ethnic diversity, ageism, neurodiversity, disability, LGBTQIA+ rights and the importance of allyship.

Telia collaborated with various industry peers while hosting the Global Virtual Pride 2023 and Baltic Pride conference. The company also participated in the Diversify Nordics Summit 2023 and its Challenger Fund awarded NOK 1 million to the cause of challenging prejudice against youth. Please note that Telia's digital inclusion work targeting customers and other external stakeholders is covered under the Digital inclusion chapter.

### Training

• By the end of 2023, 90% of managers trained in unconscious bias and in inclusive recruitment practices

• All Telia recruitment specialists are trained in inclusive recruitment practices to support a diverse pipeline of talent for the company

### External recognition in 2023

• Telia Company named EMEA employer of the year by the Gavriella Schuster IAMCP D&I of the Year

• TV4 named most equal pay employer in Sweden by Journalisten

### Discrimination and harassment

Telia works to counter discrimination at work through processes in place to handle breaches. In 2023, around 28 discrimination and/or harassment related reports were filed. By year-end, 17 cases were still under investigation and 11 cases successfully closed, of which 7 resulted in a warning (filed under four different reporting categories) and 4 resulted in a formal warning (filed under four different reporting categories) towards building awareness and prevention of harassment and discrimination. The company launched an annual anti-harassment protocol in 2023.

**Diversity, equity and inclusion in TV and Media**  
TV Media is composed of TV4 and MTV Finland. TV4 conducted several workshops on subjects such as neurodiversity and racism, in order to enhance inclusive behaviour and a sense of belonging for such minorities. Approximately 20% of employees were reached by these efforts. TV4 also launched a new career site that enables anonymity in the recruitment process. In 2023, MTV Finland enhanced diversity in its on-air programs and productions – for example, when choosing performers and participants – and provided a platform for societal discussions by hosting the annual SuomiAreena event.

and sufficient recovery between periods of intense work.

Significant health and safety risks close to Telia's core operations include working at heights or performing electrical work related to network maintenance and construction, which is generally carried out by contractors. To mitigate these risks, suppliers are required to comply with the Supplier Code of Conduct, which includes health and safety requirements, and to report any relevant incidents via Telia's whistleblowing tool. The company also carries out on-site audits to verify health and safety compliance. More information is available in the **Responsible sourcing** chapter.

## 02. HEALTH AND WELL-BEING

### Approach

Health and well-being form the basis for a great employee experience. Telia strives to ensure its employees are healthy and can perform at their best in their everyday work. A healthy workplace, good work-life balance and flexible ways of working help to achieve this aim.

 This work is governed by the Group policy – **People, Health and safety requirements for suppliers are outlined in the Supplier Code of Conduct.**

### Most significant health risks

The company's employees generally work in offices and retail environments where health risks relate mainly to mental well-being and ergonomics. Telia's biggest challenges relate to ensuring employees have a good work-life balance

Results from the annual employee engagement survey showed that 58% of employees primarily worked from the office, 36% primarily from home and 6% from another location.

### Measuring health and well-being

Overall health and well-being are measured as part of the employee engagement survey. The 2023 results indicate an increase of one percentage point in overall personal work-life balance, in comparison to 2022. 79% of respondents were able to successfully achieve a good personal work-life balance and 72% identified their well-being as "good" overall. Telia's main challenges regarding health and well-being are increased stress and workload, as well as respiratory infections as a post-pandemic effect. The company continuously monitors these aspects through the sickness absence rate (SAR). Additional SAR information and statistics are available in **Sustainability note S10**.

### ISO 45001 certification

Telia views the ISO 45001 health and well-being management system standard as a valuable tool to ensure that assessments are conducted systematically and that risks are followed up. During the year, local companies in Finland, Norway, Estonia and Lithuania maintained their ISO 45001 certifications. At year-end, 78% of all employees were covered by a health and safety management system based on the ISO 45001 standard, which had either been audited internally or audited and certified by an external party. In addition, all of Telia's markets are covered by health and safety management systems. Additional information about management systems is available in **Sustainability note S18**.

### Incidents

During the year, no major injuries or fatalities were registered among Telia employees. One reported one fatality and 23 cases of minor injuries that resulted in sick leave.

For more data about health and well-being, see **Sustainability note S10**.

# Responsible sourcing

Year	Goals	2023 progress
Annual	<ul style="list-style-type: none"> <li>- All new and renewed supplier contracts screened according to the due diligence process</li> <li>- Supplier assessments according to risk-based Compliance Verification Program</li> </ul>	<ul style="list-style-type: none"> <li>- Around 89% of total spend was covered</li> <li>- 100% of activities completed</li> </ul>

Please refer to [Sustainability note S19](#) for information about the scope of Telia's goals within this area.

## Approach

Telia relies on a global supply chain to deliver products and services to its customers. The company's sourcing processes consider various aspects – such as price, quality, sustainability standards and ability to innovate – to assess the full value of deliveries before selecting a supplier.

A dedicated due diligence process is in place to evaluate suppliers' sustainability performance. The sourcing function is responsible for supplier sustainability risk assessments, including due diligence, audits and other supplier engagement activities. Local or group-level subject matter experts also lend support in auditing and dialogue meetings.

Supplier requirements are set out in the Supplier Code of Conduct

## Key elements

### Supplier requirements

Telia's suppliers are required to align and comply with its Supplier Code of Conduct. In addition, suppliers handling personal or sensitive data must comply with the security and privacy requirements stated in Telia's Supplier Security Directive. Suppliers are expected to apply these requirements throughout their own supply chains. Both the Supplier Code of Conduct and the Supplier Security Directive are currently being revised, and updated versions will be released in 2024.

### Supplier due diligence

The objective of the due diligence process is to ensure that Telia only engages with suppliers that meet its standards and require the same from their own suppliers. The process has a risk-based approach that allows Telia to focus on those suppliers that could potentially expose individuals, the environment and the company to elevated

risks. The due diligence process consists of the following steps:

1. An up-front risk assessment is carried out to identify high-risk triggers such as companies in high-risk countries from an anti-bribery and corruption perspective, and access to Telia's network or privacy data.

2. If risks are deemed high in the up-front risk assessment, the supplier undergoes an in-depth due diligence assessment consisting of a self-assessment against the Supplier Code of Conduct and other relevant requirements as well as screening covering, for example, ultimate beneficial ownership and sanctions. The in-depth due diligence assessment categorizes supplier risks as high, medium or low. Potential high risks and serious violations identified in the in-depth due diligence assessment could lead to disqualification of the supplier or trigger a supplier audit.

3. High-risk suppliers identified during the in-depth due diligence assessment and suppliers with critical non-conformities identified through audits are reported to the Chief Procurement Officer or sourcing management team depending on criticality for decision-making on supplier selection and monitoring.

### Supplier Compliance Verification Program

Telia verifies compliance with the Supplier Code of Conduct through a combination of dialog and

## Due diligence coverage

- Anti-bribery and corruption
- Conflict minerals
- Environment
- Human rights
- Labor rights
- Management and ownership structure
- Occupational health and safety
- Privacy
- Security
- Trade sanctions

internal and/or external assessments including but not limited to self-assessments, site visits and audits to support sub-contractors. These activities are part of the Supplier Compliance Verification Program is built on a risk-based approach.

The program has been designed with an approach that takes the previous large audit process and breaks it down into more manageable assessment mechanisms.

- Information gathering – initial evaluation benchmark of suppliers
- Evidence of compliance – assessment supporting documentation
- Off-site (remote) audits
- On-site audits

➔ **Work to counter supply disruptions**

The interconnected nature of global supply chains exposes businesses to potential disruptions. This vulnerability was emphasized in 2020 when Telia's sector faced a significant shortage of semiconductors. These shortages posed a risk to the company's 5G deployment and the provision of essential devices for customers. However, by the end of 2022, Telia had successfully mitigated these risks through proactive and intensive engagement with its suppliers. This experience highlighted the critical importance of fostering resilience within the supply chain.

Moving forward, while it acknowledges the existence of various factors such as climate change, pandemics, and geopolitical shifts, Telia believes that its robust supply chain management strategies significantly minimize potential impacts. The company's proactive measures ensure that its supply chain remains resilient and efficient in the face of these challenges.

With the semiconductor shortage now resolved, Telia is focused on enhancing its supply chain resilience by implementing sustainability requirements for its suppliers, diversifying its supplier base, and incorporating assessments of supplier business continuity capabilities into its supplier selection process.

Telia conducts regular cross-company supply risk management processes and prioritizes the improvement of internal planning processes. Over the coming years, Telia will continue to refine these strategies to bolster resilience and prevent supply disruptions, thereby ensuring customer satisfaction and the smooth operation of its business.

**Work during the year**

**Review of process**

The due diligence process is under review with the aim of introducing some automation and expanding coverage to a broader scope of third parties, such as suppliers, distributors, and customers. This will improve Telia's risk approach to third-party management and focus on high-risk and material impacts aligned with legislation such as the CSRD, Sustainability Reporting Directive, the CSRD, and Sustainability Due Diligence Directive 2 Directive.

**Due diligence and audit data**

- Approximately 1,500 suppliers were included in the up-front risk assessment, covering 89% of total supplier spend. This represents a 38% increase in the number of suppliers assessed in-depth due diligence assessments.
- 1% of suppliers that underwent the due diligence assessment were assessed as high risks and therefore subject to a more detailed audit. The procedures (as described in the previous report) were carried out on 153 suppliers as part of the Compliance Program (including surveys, questionnaires, site visits and audits) covering the areas such as human rights (including conditions), environment (including validation), privacy, anti-bribery and security.

These activities help Telia to assess whether suppliers comply with its requirements and, when necessary, implement corrective action plans at an early stage. Decisions about which suppliers to audit are made under a prioritization process that includes Telia's subject matter experts and its Speak-Up Line as sources of input from internal/external parties. Information on selected engagement activities is presented on the next page.

As part of its Compliance Verification Program, and to expand the reach, impact and leverage of its supplier audits, Telia collaborates with other telecom operators through the Joint Alliance for CSR (JAC). This approach also helps to assess sustainability practices in the lower tiers of the supply chain. Members of the JAC share resources and best practices to coordinate supplier audits using common requirements in five areas: labor, health and safety, environment, ethics and management systems.

**Supplier development and engagement**

As part of its supplier management process, Telia maintains a continuous dialogue with suppliers to increase their awareness and understanding of its expectations. All non-conformities are handled through corrective action plans and follow-up activities to evaluate their effectiveness. Results are shared with group sourcing management and business stakeholders and risks and challenges that require a joint approach are raised at supplier executive meetings, where top management from both sides engage to address topical issues and agree on action plans. If the companies do not reach an agreement and a supplier fails to meet an agreed corrective action plan, termination of the supplier is considered.

## 2023 supplier engagement focus

During 2023, as a result of input from due diligence, the Supplier Compliance Verification Program, audit reports, media reports, and observations from stakeholders or suppliers, Telia has engaged on a deeper level with suppliers in key areas.

### Human rights in field services

Supplier labor and human rights are important issues for Telia. To assess and ensure the well-being of key field service suppliers, Telia took a proactive approach by assessing the maturity levels of labor and human rights through a survey evaluation. To address the gaps identified during the survey evaluation, Telia hosted several meetings with tier 1 suppliers to share sustainability expectations and raise awareness of the Speak-Up Line, as outlined in the Supplier Code of Conduct. This initiative resulted in the closure of 85% of the corrective action plans issued after the survey, while the remaining 15% triggered on-site audits that will be conducted in 2024.

### Transport and logistics compliance

In September 2023, as part of its Supplier Compliance Verification Program, Telia launched a Supplier Code of Conduct alignment questionnaire with a target group of 20 suppliers that provide essential transport, warehouse management, construction and logistics services. The questionnaire addressed key risk areas, including human and labor rights, environment, occupational health and safety, and general compliance. This initiative helped the company to assess how suppliers ensure compliance with its requirements, as stated in Telia's Supplier Code of Conduct. It will also allow Telia to benchmark and test compliance with new, relevant legislation as part of its Supplier Code of Conduct update process.

### Climate action

Climate is an integrated part of Telia's evaluations and a key selection criterion awarding new business. By the end of 2023, 52% of supply chain emissions were science-based targets, with an additional 10% of the pipeline awaiting external approval. This year a survey was conducted to ensure supplier engagement and ensure climate action measures as per the requirements outlined in the Supplier Code of Conduct.

# Anti-bribery and corruption

## Year    Goals    2023 progress

- Annual    - Annual Anti-bribery and corruption (ABC) risk assessments performed in all markets    - Achieved
- Maturity assessments of the ABC program performed in all markets along with plans to close maturity gaps    - Achieved

### Approach

Telia conducts business with zero tolerance for corruption. Corruption risk is treated as one of the company's Principal Risk areas and an Anti-bribery and corruption (ABC) program is in place to mitigate this risk. The program provides a systematic means of effectively detecting and preventing corruption and violations of anti-corruption laws. It is implemented and continuously developed using a risk-based approach, via:

- Regular ABC risk assessments to identify and manage key risks
- Annual maturity assessments to follow up on progress and identify areas for improvement
- Training to ensure awareness of ABC risks
- Supply chain risk management by screening, monitoring and auditing suppliers

Telia's exposure to corruption risks decreased significantly in the past few years due to the divestments of its global Telia Carrier operations and all subsidiaries in Eurasia. Today, most of the markets in which the company operates are at the lower end of the risk spectrum, according to the Transparency International Corruption

Perceptions Index (see illustration). However, Telia has a global supply chain, and its suppliers operate in a broader risk spectrum. Telia manages this risk through its Supplier Code of Conduct, due diligence process and the auditing of high-risk suppliers. More information is available in the **Responsible sourcing** chapter.

The ABC program is managed by the Group Governance, Risk and Compliance unit, which is responsible for the program design and coordination of activities. Local Ethics and Compliance Officers are responsible for local implementation.

The Special Investigations Office (SIO), which is part of the Security Office, handles special investigations related to potential corruption, fraud and other significant related risks, such as retaliation. Read more about cases recorded during the year in **Sustainability note S16**.

This work is governed by the Group policy – Anti-bribery and corruption

## Work during the year

### ABC program maturity

In 2019, Telia introduced a maturity assessment methodology to enable a holistic and credible evaluation and to follow-up on key risks. Since then, the methodology has been used to assess the maturity of the ABC program throughout the group and in all markets. The results for 2023 indicate good maturity and minor improvements were identified in internal control and third-party management.

### ABC risk assessments

ABC risk assessments were performed at the group level and in all markets during the year. The 2023 risk assessment results indicate that, overall, the program is functioning well. However, due to the geopolitical situation, the likelihood of overall ABC risk is low to medium, with potential high financial and reputational impact. Furthermore, there is high awareness and attention on ABC on both the country and group level. Some areas for improvement were identified through the risk assessments and plans are being developed to address those areas during 2024.

## Training

During onboarding, all employees are complete an e-learning on the Code of Conduct which includes a specific section on anti-bribery and corruption. During 2023, as a new e-learning produced, it was replaced by a new version to sign the Code of Conduct. The new version will be launched in 2024 and it will be mandatory for all employees to complete it every year. In addition, targeted face-to-face training is performed annually for selected groups of employees. Telia's executive assistants and all main teams in the Common Products and Services organization received face-to-face training on ABC. In addition, all group Compliance Officers are TRACÉ certified in the anti-bribery and corruption area, and the certification is renewed for compliance officers.

## S1 General information

The Sustainability section and Sustainability notes within the Board of Directors' Report constitute Telia Company's statutory sustainability report according to the requirements in the Swedish Annual Accounts Act. They also serve as the Global Compact Communication on Progress (CoP) for Telia and all its subsidiaries. In addition, sustainability content is integrated into other sections of this report – for example, in the description of Telia's business strategy, in the analysis of underlying trends and in the Corporate Governance section.

The report has been prepared according to Telia's Sustainability Reporting Framework, which, to facilitate comparability, is based on frameworks such as the Global Reporting Initiative, the Integrated Reporting Framework, the Global Compact Communication on Progress, the EU Non-Financial Reporting Directive, the UN Guiding Principles Reporting Framework and the Task Force on Climate-related Financial Disclosures (TCFD). **Telia's Sustainability Reporting Framework** contains reporting principles, content guidance, detailed information on the basis for the preparation of information and definitions. It is available at [www.teliacompany.com/sustainability/reporting](http://www.teliacompany.com/sustainability/reporting). To facilitate reading and comparability, please refer to the Sustainability Index on pages 134-135.

Please note:

- This sustainability report shall not be considered prepared strictly in accordance with any of the above listed regional or international frameworks
- The scope of information provided covers

Telia's operations in Denmark, Estonia, Finland, Lithuania, Norway and Sweden. In addition, Telia's associated company LMT in Latvia is included in Telia's environmental reporting to align with the Greenhouse Gas Protocol accounting standard

- Material omissions or limited scope of information are explained in the respective note

Deloitte has been engaged to provide limited assurance of this sustainability report, see the **Auditors' Limited Assurance Report** in the Sustainability section for more information. All disclosures that constitute the sustainability report are covered by the limited assurance engagement. Comments and feedback help Telia develop its work and reporting; you are welcome to contact Group Sustainability at [sustainability-group@teliacompany.com](mailto:sustainability-group@teliacompany.com).

## S2 Sustainability governance

For more information, see **Sustainability Governance** in the Sustainability section. Additional governance information, including information about the company's overall risk management process, is available in the **Corporate governance** and **Risks** sections.

The Code of Conduct and other governing documents can be found on **Telia's website**. Telia adheres to the international frameworks listed in the **Statement of Materiality and Significant Audiences**.

## S3 Materiality determination and stakeholder engagement

Telia has conducted materiality assessments many years, based on internal knowledge, various external sources, including external stakeholders, and the company's most important stakeholders. In 2023, Telia conducted its first double materiality assessment built on key aspects of the EFRAG draft guideline to determine how the company is impacting society and the environment, and how society and the environment are impacting the company. The assessment was developed from an internal perspective meaning that, for each topic, the impact opportunities were assessed based on an industry and geographical perspective but without considering Telia's current activities and controls. Telia assessed risks and opportunities from a 1- to 3-year perspective (2024-2026), which covers the company's upcoming strategy period. A longer time span was considered up to 10 years.

Information on the outcomes is presented in **How Telia prioritizes and Trends affects work in 2023** sections, with additional information in each impact area chapter overview of 2023 materiality findings 109-111.

### Overview of 2023 materiality findings

Impact area	Impact Materiality (Impact on society and environment)	Financial Materiality (Impact on Telia)	Main impacts, risks and opportunities	Location in the value chain	Trends in the year	Stakeholder groups
<b>Climate</b>	●●●●	●●●○	<p><b>I(-):</b> GHG emissions emitted from Telia's value chain, in particular from the supply chain</p> <p><b>I(+):</b> Network, connectivity and IoT solutions enable customers and society to decarbonize</p> <p><b>R:</b> Failure to meet stakeholder expectations on low-carbon, energy-efficient and circular products and services</p> <p><b>R:</b> Risk that Telia does not prepare for extreme weather events, such as storms, heavy rain, floodings and heatwaves</p> <p><b>O:</b> Opportunity to scale IoT solutions that decarbonize customers and society</p>	<ul style="list-style-type: none"> <li>Upstream</li> <li>Own operations</li> <li>Downstream</li> </ul>	<ul style="list-style-type: none"> <li>Upcoming EU regulations on environmental claims and the energy efficiency of certain products</li> <li>A general increase in expectations from consumers and business customers, including demand for data to prove performance and benefits</li> <li>Increasing demands for products and services that enable customers to reduce emissions and energy consumption</li> <li>Increasing expectations from investors on net-zero targets and information about how companies plan to transition into a low-carbon economy</li> <li>Increasing likelihood of extreme weather events, due to the disconnect between the pace needed for climate action and actual emission reductions (globally and in Telia's markets)</li> </ul>	Business Consumers Investors Policy Suppliers
<b>Circularity</b>	●●●●	●●●○	<p><b>I(-):</b> Resource depletion of the materials used in product portfolio, network equipment, network construction and maintenance, and packaging</p> <p><b>I(+):</b> Less resource depletion through Device as a Service and other closed loop device models</p> <p><b>R:</b> Risk that the company's resources are used inefficiently and that the company's products could have a short life span or are difficult to repair, upgrade, or recycle</p> <p><b>O:</b> Opportunity to increase leasing and rental models of Telia's products</p>	<ul style="list-style-type: none"> <li>Upstream</li> <li>Own operations</li> <li>Downstream</li> </ul>	<ul style="list-style-type: none"> <li>Upcoming EU regulations on eco-design, environmental claims and circularity of certain products</li> <li>A general increase in expectations from business customers, including demand for data</li> </ul>	Business Consumers Investors Policy Suppliers
<b>Privacy</b>	●●●●	●●●○	<p><b>I(-):</b> Cyberattacks, technical and human errors increase consumer data breaches, which could potentially harm the affected stakeholder</p> <p><b>I(+):</b> Embedded measures to protect Telia's systems and consumer data</p> <p><b>R:</b> Failure to meet customer's privacy requirements and expectations may lead to an unfavorable perception of how Telia manages these matters. Failure to comply with the law could lead to financial penalties</p>	<ul style="list-style-type: none"> <li>Own operations</li> <li>Downstream</li> </ul>	<ul style="list-style-type: none"> <li>Increased risk of cyberattacks due to Russia's invasion of Ukraine</li> <li>Upcoming EU AI Act shapes expectations on corporate work related to AI ethics</li> </ul>	Business Consumers Employees Investors Policy

Low ● Medium ●● High ●●● Very high ●●●● I(-): Negative impact R: Risk O: Opportunity

## Arsregnskap reggskapsåret 2023 for 981929055

Impact area	Impact Materiality (Impact on society and environment)	Financial Materiality (Impact on Telia)	Main impacts, risks and opportunities	Location in the value chain	Trends in the year	Stakeholder group
<b>Security</b>	●●●○	●●●●	<p>I(-): In case of service disruption, customers and society may be impacted at different levels through the loss of communication services (for example, in the health industry)</p> <p>R: Risk that cyber events originating from an external threat disrupt Telia's services or lead to data breaches</p>	<ul style="list-style-type: none"> <li>Own operations</li> <li>Downstream</li> </ul>	<ul style="list-style-type: none"> <li>Increased requirements on security from B2B customers and through upcoming EU regulation, as well as the expected admission of Sweden to NATO</li> <li>Increased terror threat level in Sweden</li> </ul>	Business Consumers Employment Investment Policy
<b>Digital inclusion</b>	●●●○	●●●○	<p>I(-): Disparity between the service quality in urban and rural areas may result in uneven digital inclusion and a negative perception of digitalization</p> <p>I(+): Access to reliable connectivity for millions of customers and the development of digital inclusion skills to integrate those that are at risk of being digitally excluded</p> <p>R: Risk of disparity in service quality and unaffordability of services could lead to customer dissatisfaction</p> <p>O: Digital inclusion projects enhancing digital skills ensure higher customer activity online and lower the number of calls to customer care centers</p>	<ul style="list-style-type: none"> <li>Own operations</li> <li>Downstream</li> </ul>	<ul style="list-style-type: none"> <li>Continued digitalization of society, including vital services, makes high-quality connectivity and relevant digital skills increasingly important</li> <li>High inflation and the economic downturn raise affordability concerns, which may impact access to services for economically vulnerable groups</li> </ul>	Business Investment Policy
<b>Human rights</b>	Embedded in other impact areas	Embedded in other impact areas	<p>Our services and ways of working impact the rights and well-being of approximately 19,000 employees, millions of customers and thousands of workers in Telia's supply chain. Telia's services also enable the realization of human rights. Violations of human rights in Telia's value chain impact the trust in Telia and Telia's ability to retain and attract employees, customers, and capital. Impacts, risks and opportunities that relate to human rights aspects are covered in the other impact-area-specific rows of this table</p>	<ul style="list-style-type: none"> <li>Upstream</li> <li>Own operations</li> <li>Downstream</li> </ul>	<ul style="list-style-type: none"> <li>Increased attention to human rights through upcoming legislation (EU Corporate Sustainability Due Diligence Directive and local versions)</li> <li>Additional proof points of how digitalization can increase access to societal services, such as health care, and provide safer workplaces when dangerous tasks are automated. In parallel, digitalization is restructuring the labor market with increasing need for up- and re-skilling of individuals</li> <li>Climate change increasingly impacts human rights negatively</li> </ul>	Business Consumers Employment Investment Policy Society Supply
<b>Children's rights</b>	●●●●	●○○○	<p>I(-): As technology evolves and children get more access to it, they are subject to grooming, bullying or exposed to violent content online. This content could be made available via Telia's networks</p> <p>I(+): Active measures internally and through partnerships to block and fight child sexual abuse material (CSAM)</p> <p>R: Failure to apply sufficient technical solutions to block CSAM in own networks</p>	<ul style="list-style-type: none"> <li>Own operations</li> <li>Downstream</li> </ul>	<ul style="list-style-type: none"> <li>Continuous reports on the vulnerability of children in the online world, including spread of CSAM, cyberbullying, misinformation and hate speech</li> <li>Development of upcoming legislation will regulate mandatory requirements on removal and blocking of CSAM</li> </ul>	Consumers (including children) Investment Policy

Low ● Medium ●● High ●●● Very high ●●●● I(-): Negative impact I(+): Positive impact R: Risk O: Opportunity

Impact area	Impact Materiality (Impact on society and environment)		Financial Materiality (Impact on Telia)		Main impacts, risks and opportunities	Location in the value chain	Trends in the year	Stakeholder group
	●●●●	●●●○	●●●○	●●○○				
<b>Freedom of expression and government surveillance</b>	●●●●	●●●○	●●○○	●○○○	<p>I(-): Blocking of content limits the freedom of expression of users</p> <p>I(+): As a provider of the infrastructure for the internet and free media, Telia enables the right to freedom of expression for customers</p> <p>R: Governments mandate limitations to freedom of expression, but this may affect Telia's reputation and consumers' trust in the company</p>	<ul style="list-style-type: none"> <li>Downstream</li> </ul>	<ul style="list-style-type: none"> <li>Unprecedented EU sanctions to limit the spread of disinformation from Russian TV channels and related sites</li> <li>The EU adopted a regulation to address the dissemination of terrorist content online and proposed a regulation to lay down rules to prevent and combat child sexual abuse (see <b>Children's rights</b>)</li> </ul>	Consumers (including Invest Policy)
<b>Diversity, equity and inclusion</b>	●●●○	●●●○	●●●○	●●○○	<p>I(+): Training on inclusive recruitment practices as well as improvement of human resource processes to enable a more diverse workforce</p> <p>R: Lack of diversity could compromise Telia's ability to innovate (new products, services, ways of working, business models) and serve a diverse customer base</p> <p>R: Increased turnover due to unequal pay</p>	<ul style="list-style-type: none"> <li>Own operations</li> </ul>	<ul style="list-style-type: none"> <li>Focus on disclosure of pay gap and salary ranges in job posts through the upcoming EU Pay Transparency Act</li> </ul>	Employment Policy

Årsregnskap regnskapsåret 2023 for 981929055

Some additional topics that affect Telia's industry, such as labor rights, conflict minerals and AI ethics, are embedded in the company's overarching sustainability impact areas listed above. Certain topics that are on the rise but are not seen as highly material by Telia – such as biodiversity and water – are addressed in other sustainability notes in this report.

Description of the 2023 double materiality process:

1. Identification of possible material topics for Telia based on standards (ESRS and SASB), ESG ratings (EcoVadis, MSCI, ISS ESG, Sustainability and FTSE4Good), as well as Telia's previous materiality and industry-specific overview (GSMAs metrics for Mobile). Through the identification of topics from various sources, a long list of topics and subtopics was created.
2. An internal guide was created to assess both the financial materiality and the impact materiality. The guide determined basics for the assessment, including definitions for the different impact levels (low, medium, high and very high) and likelihood. The financial materiality guide was based on Telia's existing Enterprise Risk Management (ERM) Framework, which assesses risks and the effect on Telia if they materialize, through the financial, strategic, reputational, customer experience and regulatory front. The ERM framework was adapted to also assess opportunities in a similar way to risks, for the purpose of the double materiality process. The impact materiality guide was based on the logic of the United Nations Guiding Principles on Business and Human Rights to assess the impacts that Telia generates on society or the

environment. These were assessed by the severity of the impact, which covers scale, scope and irremediability.

3. For each subtopic from the long list, Telia specified potential or actual impact, risk and opportunity statements to proceed with the assessment of each. The assessment consisted of using the internal guide to determine a scoring for each impact, risk and opportunity statement, which was given by two factors: a) the impact (on Telia or on the environment/society) and b) its likelihood of happening. This was assessed by internal matter experts, using inputs from the list provided in the "Primary sources for determining materiality" (shown on this page) as well as continuous stakeholder engagement.

4. Roundtable meetings with the experts were conducted to ensure consistency across all topics.

5. The materiality threshold was defined as those topics with a "high" or "very high" heat map result. This means that topics that had a risk or an opportunity with a "high" or "very high" result are considered material from a financial perspective. Topics that had an impact with a "high" or "very high" result are considered material from an impact perspective. In line with the ESRS requirements on double materiality, a short list of material impact areas was created based on those topics that had high or very high results from either the financial or the impact perspective. A summary of results is found in the section about **How we prioritize**.

6. After findings were determined by the creation of the short list, validation was conducted through engagement with Telia's Board of Directors, Sustainability Committee, local sustainability leads and extended teams.

Primary sources for determining materiality included:

- Telia's own 2020 materiality deep dive based on desktop research validated through internal and external stakeholder dialogues in 2021 and 2022
- Learnings from the GSMAs industry association's project on metrics for the mobile industry in partnership with Yale University, based on stakeholder engagement
- 2022 expert analysis on ongoing climate-related trends among key stakeholders and the business impact those trends could have on Telia in the short, medium and long term, and a deep dive into material transition risks and opportunities for Telia in 2025-2027
- Updated human rights risk mapping and salience analysis with BSR in 2022
- SB Insight's 2023 consumer trend studies, which identify how consumers in Telia's markets think a telco should prioritize
- Topics covered by ESG ratings, including how topics are weighted
- Engagement with collaborative partners (some of which are listed on page 77) to get a deeper understanding of theme-specific impacts and topic boundaries
- Concerns raised by stakeholders in the media and Telia's Speak-Up Line
- Continuous monitoring of policy development and media
- Enterprise Risk Management annual risk assessment
- Supplier audits

Stakeholders are generally selected for engagement either because they represent the opinions of a stakeholder group (as in the case

of a union) or because Telia considers knowledgeable due to their expertise in case of a human rights organization) experience (as in the case of children

Information on determination of salient rights issues, including additional sources to inform Telia's double materiality is provided in **Sustainability note S7**.

## S4 Climate and circularity

See the Climate and circularity chapter for more information. For more details on calculation methods, emission factors and more, see **Telia's Sustainability Reporting Framework**.

### Energy consumption

Telia only uses renewable electricity, which accounts for 95% of its total energy use. The remaining fossil-based energy relates to district heating and cooling, vehicle fuels, natural gas and diesel used for backup power, for which the company has started to implement alternatives. Additional energy data is presented in the table to the right.

MWh	2023	2022	2021
Fuel consumption from coal and coal products	1,419	1,784	2,314
Fuel consumption from crude oil and petroleum products	16,112	19,648	17,408
Fuel consumption from natural gas	1,419	1,784	2,314
Fuel consumption from other non-renewable sources	-	-	-
Consumption from nuclear products	-	-	-
Consumption of purchased or acquired electricity, heat, steam, and cooling from non-renewable sources	38,984	51,367	55,382
<b>Total non-renewable energy consumption</b>	<b>56,515</b>	<b>72,799</b>	<b>75,104</b>
<b>Share of non-renewable sources in total energy consumption (%)</b>	<b>5%</b>	<b>6%</b>	<b>6%</b>
Fuel consumption from renewable sources (including biomass, biogas, non-fossil-fuel waste, renewable hydrogen, etc.)	-	-	-
Consumption of purchased or acquired electricity, heat, steam, and cooling from renewable sources	1,183,387	1,135,608	1,091,435
Consumption of self-generated non-fuel renewable energy	188	201	160
<b>Total renewable energy consumption</b>	<b>1,183,575</b>	<b>1,135,809</b>	<b>1,091,595</b>
<b>Share of renewable sources in total energy consumption (%)</b>	<b>95%</b>	<b>94%</b>	<b>94%</b>
<b>Total energy consumption (MWh)</b>	<b>1,240,090</b>	<b>1,208,608</b>	<b>1,166,699</b>

**Greenhouse gas (GHG) emissions** (Scope 1, 2 and 3) are in the following tables, aligned with the protocol.

During 2022, Telia updated the full value assessment covering all scopes. The Value Chain (Scope 3) Standard was calculate all 15 categories of scope 3. A full update of all categories is provided for 2020 and 2022. Scope 3 emissions are with a one-year delay to be able to include supplier data that was not available at the time of the publication of the previous report. The most material categories are:

- Purchased goods and services (category OPEX, e.g., emissions generated from construction and maintenance (field purchased mobile phones and other capital goods (category CAPE, purchased network equipment

Lower CO<sub>2</sub>e-emissions upstream (category 1) in 2022, compared to base year are mostly due to decreasing carbon emission factors (environmental economic input output factors). Other factors in reductions are potential reductions in Telia, supplier-level reductions and in calculation methodology. Telia aims in the application of industry average calculation methods and increase the share of supplier data and product-level data in overall development is shown in the table on page.

tCO <sub>2</sub> e	Base year					2023	2022	2021	2020	2018	% Change from last year	% Change from base year	2025	2030

1) Categories "Purchased goods and services (category 1)" and "Capital goods (category 2)" are combined for 2018 to 2021.  
2) "Upstream leased asset (category 8)" is combined with scope 1 from 2022 and onwards.  
3) "Downstream transportation and distribution (category 9)" and "Processing of sold products (category 10)" are not applicable.  
4) 2022 total (scopes 1-3) compared to base year.

**% of methodology, Scope 3 Cat 1 and 2\***

Year	Industry average	Product-level	Supplier-level
2018	74%	20%	7%
2019	74%	19%	8%
2020	78%	19%	3%
2021	69%	22%	8%
<b>2022</b>	<b>70%</b>	<b>21%</b>	<b>9%</b>

\*The table covers the majority of emissions from categories 1 and 2, 86%, excluding emission data from TV and Media, LMT Latvia, Cygate Finland and SYV Joint Network in Finland.

**Waste**

Waste is one of Telia's key environmental aspects, and through its zero waste target the company is committed to reducing its total waste footprint from its own operations, including network construction and maintenance. To meet its target, Telia has expanded its waste data collection since 2020. Continuous work is ongoing to improve data collection and quality, as contractors and waste management suppliers are partially providing Telia with estimates on a best-effort basis while adapting to provide the company with Telia-specific data in the coming years.

Waste (ktons)	2023	2022 <sup>1</sup>	2021 <sup>1</sup>
<b>Construction waste</b>	<b>72</b>	<b>89</b>	<b>113</b>

Incineration with and without energy recovery	27	23	19
Sent to landfill	<1	<1	<1

Read more about recycling and reuse in the **Climate and circularity** chapter.

**Water and biodiversity**

**Own operations**  
Water is not regarded as a material environmental aspect for Telia's own operations, based on the company's double materiality assessment and its related materiality threshold. Some data center facilities have water-based cooling, but water is recirculated in closed systems. In addition to the closed-loop water cooling, there are a few cooling

sites where water is sprayed on the outdoor chiller elements (and vaporized) during peak temperatures, thereby increasing the cooling capacity without increasing energy consumption. Since the solution is in operation for only a few hours each year, the impact on total water consumption is minor (<10%). Water consumed in offices and in other locations is used for sanitary purposes and kitchen/canteen activities only. All Telia facilities, including data centers, are located in built areas with connections to municipal water infrastructure.

Telia impacts biodiversity but, based on the double materiality assessment and the related materiality threshold, this is not regarded as a material environmental aspect for its own operations. Telia provides significant network infrastructures in the countries where it operates, but the inherent risk is reduced due to local environmental legislation when doing construction and maintenance of those sites and the fact that the infrastructure is mostly built in environments that are already built and occupied by human activities. Mitigation activities include avoiding building on non-built land and limiting the land area affected. In sensitive nature areas precautionary measures are taken, often also established by law. Biodiversity risks are also mitigated by Telia's zero waste goal, meaning that, from 2030 onwards, the company aims to send no waste to incinerators or landfills.

**Value chain**

Water and biodiversity aspects are important in parts of Telia's supply chain – for example, in certain electronics manufacturing processes and in mineral extraction activities. Suppliers are required to identify and manage all significant

environmental aspects associated with operations, apply the precautionary principle and impose the same requirements on subcontractors. These requirements also cover water and biodiversity, when relevant. Telia's circularity agenda is another way to reduce negative impacts on ecosystems in the chain by, for example, applying circular models to prolong the lifetime of hardware thereby limiting the extraction of new

Eco Rating, which promotes the durability and recyclability of the materials used in smartphones, is another example of initiatives that aim to limit negative impacts on the environment, including both water and biodiversity. Moreover, Telia's broader change program indirectly limits negative biodiversity risks caused by climate change as well as pollution from transport, as an

As mentioned under Sustainability no Materiality determination, biodiversity watch list of topics where the aim is to understand these impacts in the company 2023, the industry association GSMA joint working group in which Telia is a

**Carbon and energy enablement**

The methodology for Telia's carbon calculations was developed together with Carbon Trust consultancy firm. The study for the model's development was the **Enablement Effect Report 2023**, which is on calculating the enablement effect of meetings and IoT offerings. The company captures the broader sets of enablement such as, for example, working from home

shopping and accommodation sharing – for which its underlying connectivity services provide opportunities. Moreover, no eventual rebound effects are captured in the company's calculations. Additional information about the methodology, including underlying assumptions, is available in the methodology paper on **Telia's website**.

Regarding the results, please note:

- Reporting of enablement effects is still in its infancy and the methods are under development as research on the impacts of digitalization continues to advance. Hence, reported data are estimates based on available research and data
- Carbon enablement factor calculations are generally based on both data from the use of Telia's services as well as assumptions from market reports or other studies
- Currently, no standards exist for enablement calculations. Telia participates in the work of the **European Green Digital Coalition**, launched by the European Commission in 2021 to advance enablement calculation and reporting methodologies for ICT technologies, aiming for a common methodology. No common methodology has yet been adopted by the industry and research on a common approach to calculate the enablement effect of connectivity – Telia's core business – is still pending. For its reporting methodology, Telia engages with the Carbon Trust, which was appointed by the European Commission as an expert organization. Telia follows methodology developments closely and reviews its model when needed. The company also regularly revises its model as more granular primary data becomes available
- Due to the limited scope of Telia's model and the conditions in its markets (e.g., national electricity grid emission factors based on a high share of

renewable energy sources), the results should not be considered directly comparable to the results based on other telcos' similar models

- Data presented in previous Annual and Sustainability Reports is not fully comparable to the 2023 numbers since data capture was improved and certain calculation methods changed during the year

Carbon and energy enablement data	Carbon (ktons CO <sub>2</sub> e)	Energy (GWh)
Smart buildings	261	1,219

Smart transport	9	3
Remote meetings	123	-
<b>Total</b>	<b>433</b>	<b>2,146</b>

## Taxonomy reporting

The aim of the EU Taxonomy, as part of the European Green Deal, is to direct financial flows towards sustainable economic activities by providing a common classification system of what is considered sustainable. In 2023, in addition to continuing the reporting of the same activities under the climate change mitigation and adaptation environmental objectives, Telia is also, for the first time, reporting on the eligibility of activities under the remaining environmental objectives.

The EU Taxonomy is still under development. As illustrated below, Telia reports a limited percentage of Taxonomy-eligible and aligned activities since telecommunications networks are not included in the Taxonomy (see Financial key performance indicators on pages 119-122). The telecommunications industry has highlighted this deficiency to the European Commission, advocating for networks to be covered in future Taxonomy delegated acts with dedicated, fit-for-purpose alignment criteria.

Please note that complete environmental data for Telia is provided in the **Climate and circularity** chapter and previous parts of this note, including the company's total carbon and energy footprint, the energy sources used and circularity initiatives.

### Assessment of eligibility

Telia has assessed all of its economic activities to determine which ones should be reported under the Taxonomy definitions. The following activities have been deemed eligible for Telia in 2023:

Under the climate change mitigation environmental objective:

**8.1 Data processing, hosting and related services**  
Telia reports data centers – facilities centralized storage, management or processing of data together with all the infrastructure equipment necessary to do so. The data centers reported are used by external customers for the company's internal purposes. Telia reports to focus on data centers specified energy consumption thresholds critical for core network operation in market or across the company's operations. Telia intends to apply the thresholds of power demand for installed information technology of at least 500kW introduced recently adopted Energy Efficiency Directive. The company does not expect the thresholds to change to the list of data centers it reports.

**8.2 Data-driven solutions for GHG emissions reductions**  
Under this activity, Telia reports products and services with significant effects but excludes the data transmission technologies required for data transfer processes. The company currently provides following solutions with significant effects for customers:  
 • Remote meeting services  
 • IoT solutions for smart buildings, transport and utilities

Under the transition to a circular economy environmental objective:

**4.1 Provision of IT/OT data-driven solutions**  
Under this activity, Telia reports Internet of Things solutions used for remote monitoring and predictive maintenance, together with solutions reported under climate change mitigation activity 8.2.

**5.1 Repair, refurbishment and remanufacturing:** Under this activity, the company reports repair services – primarily of mobile phones, but also of some customer premises equipment – provided to individual customers or businesses through its own service workshops or those of its service partners.

**5.4 Sale of second-hand goods:** Under this activity, Telia reports sales of pre-owned and refurbished mobile phones in all of its markets, as well as sales of office equipment in Estonia.

**5.5 Product-as-a-service and other circular use- and result-oriented service models:** Under this activity, the company reports the provision of mobile phones to business customers through its Device as a Service offering.

Telia provides Internet of Things solutions that can be used to control and reduce water leakage (activity 4.1 under the protection of water and marine resources environmental objective). These services are not standardized and do not represent a strategically prioritized vertical in Telia's IoT offering. The financial scope of these services is extremely limited. Due to these factors, activity 4.1 has been deemed immaterial and excluded from the reporting scope.

TV and Media-related activities (8.3 and 13.3 under the climate change adaptation environmental objective) have been deemed insignificant, given that only CAPEX and OPEX related to implemented adaptation solutions can be reported. There is uncertainty about reporting under the climate change adaptation environmental objective, despite guidance from the European Commission.

The company has also assessed several additional economic activities that constitute purchase of Taxonomy-aligned outputs under the climate change mitigation objective, namely:

- 4.1 *Electricity generation using solar photovoltaic technology*
- 4.3 *Electricity generation from wind power*
- 4.4 *Storage of thermal energy*
- 6.5 *Transport by motorbikes, passenger cars and light commercial vehicles*

No turnover can be reported for these activities and the related financial KPIs would constitute OPEX under Taxonomy definitions, which is not material for Telia's business model. Therefore, these economic activities have been excluded from the reporting scope.

Telia will continue to monitor future guidance and adjust its reporting in light of emerging best practices.

**Assessment of alignment**

For activities reported under the transition to circular economy environmental objective (4.1, 5.1, 5.4 and 5.5), only an eligibility check is required in 2023. No alignment assessment was performed for these activities. In the financial KPI tables, they are listed as eligible and not aligned. In line with the legal requirements, Telia intends to perform the necessary assessments in the next reporting cycle.

**8.1 Data processing, hosting, and related activities**  
There are three technical screening criteria for substantial contribution that need to be fulfilled under 8.1:

- Implementation of the EU Code of Conduct for Data Centre Energy Efficiency, verified by an

independent third party and audited at least every three years

- Where a specific Code of Conduct practice is not relevant, explanation is provided, including the use of alternative best practices
- Global warming potential of the refrigerant used in the cooling system does not exceed 675

No data center reported under 8.1 is deemed aligned. To date, one of Telia's reported data centers has implemented the EU Code of Conduct – however, the implementation has not been verified by an independent third party. This same data center also meets the requirement on refrigerants due to its use of water cooling in its operational cooling system. Over the course of 2023, Telia evaluated the possibility of implementing the EU Code of Conduct in its other data centers. No changes in the use of refrigerants are currently foreseen.

**8.2 Data-driven solutions for GHG emission reductions**

There are two alignment criteria that need to be fulfilled for an activity to be Taxonomy-aligned under 8.2:

- ICT solution to be predominantly used for enabling GHG emission reductions
- Substantial life cycle GHG emission savings compared to the best-performing alternative solution/technology

As no alternative solutions/technologies exist for the services reported under this activity, Telia considers that, based on the criterion text, a life cycle assessment is not necessary. Nonetheless, in its analysis, the company demonstrated the net benefits of the digital component of the reported remote meetings and Internet of Things solutions

for buildings and utilities, leading to savings in greenhouse gas emissions and, in some cases, electricity or energy savings from the Internet of Things solutions for transport aligned with the technical screening criteria. They are only partially included in the 2023 enablement calculations. These are used as one of the inputs to Telia's assessment used for Taxonomy alignment

**Do no significant harm**

For activities reported under the transition to circular economy environmental objective (5.4 and 5.5), only an eligibility check is required in 2023. No "do no significant harm" assessment was performed for these activities during the year. In the financial KPI tables, they are listed as eligible and not aligned. In line with the legal requirements, Telia intends to perform the necessary assessment in the next reporting cycle.

A "do no significant harm" assessment was performed for the two activities (8.1 and 8.2)

Under "climate change adaptation", the assessment consisted of Telia's physical risk analysis at a company level, which is aligned with Telia's transition plan and TCF. For the purposes of activity 8.1, during the year, the company performed detailed analyses. Telia considers that the company's data-driven solutions reported under 8.1, as digital services are not site-specific

For activity 8.1, an assessment was carried out to ensure the requirements are met and

also detailed under S4 Climate and circularity. Telia is not substantially dependent on water in its operations, and where data centers use water-based cooling, it is re-circulated in a closed system. All Telia facilities, including data centers, are located in areas with connections to municipal water infrastructure. When planning its data centers, the company follows all relevant laws and regulations, including with regard to environmental impact assessments and requirements included therein on assessment of impacts on water.

For both activities 8.1 and 8.2, an additional assessment was carried out to ensure the requirements are met under "circular economy":

- Telia does not manufacture any servers or data storage equipment but purchases it from suppliers which operate within the EU. These suppliers mark their products with the CE label, as required under Directive 2009/125/EC. Compliance is also ensured through supplier requirements based on the Supplier Code of Conduct

- Telia has specific requirements in place for its suppliers in regard to restricted and banned substances covered by the EU Directives on restriction of the use of certain hazardous substances (RoHS) and waste from electrical and electronic equipment (WEEE)
- Telia is compliant with local waste management regulations and requirements, as well as with EU WEEE legislation. In addition, the company purchases waste management services from suppliers with relevant licenses in their markets. All electronic waste is separated and reused or recycled (for more information, see the **Climate and circularity** chapter)

**Minimum social safeguards**

Minimum social safeguards are in place through the implementation of company-level policies and instructions related to, for example, human rights, anti-bribery and corruption, taxation and fair competition. These policies and instructions adhere to relevant international standards and guidelines (see the **Group-wide Governance Framework** section for a brief description).

Furthermore, these areas are fully reflected in Telia's risk management process, which is an integrated part of the business planning process and monitoring of business performance. More information about the risk management practices and Principal Risk areas can be found in the **Enterprise Risk Management and Compliance Framework** section. Telia's approach to assessing non-compliance with any of its policies and instructions involves continuous due diligence and various follow-up procedures, including grievance mechanisms, audits and controversy screenings of suppliers.

**Accounting principles**

The Taxonomy KPI definitions of turnover, operating expenditure (OPEX) and capital expenditure (CAPEX) are not fully aligned with similar measures used in Telia's consolidated financial statements. For Taxonomy reporting purposes, some adjustments have therefore been made to Telia's financial measures. Telia's interpretations of the Taxonomy KPI definitions are based on guidance from the Taxonomy publications, guidance from FAR (Institute for the Accountancy Profession in Sweden – FAQ on the EU Taxonomy), and consultations with external sustainability experts. The interpretations of the KPI definitions might change in the future as the

Taxonomy reporting guidance is clarified, and/or the Taxonomy reporting practices are developed. To fully align with the Taxonomy reporting requirements, further efforts will be needed to improve Telia's internal reporting systems and processes. In 2023, Telia took additional steps to expand guidance for reporting units and increase data control checks.

The three Taxonomy KPI denominators were defined as follows by Telia in 2023:

- Turnover is defined as external revenue under the International Financial Reporting Standards (IFRS), which corresponds to external revenue in Telia's consolidated statements of comprehensive income, e.g., including only continuing operations
- CAPEX is defined as additions to property, plant and equipment, intangible assets and right-of-use assets during the financial year before depreciation, amortization and impairments. Additions to goodwill and film and program rights are not included in CAPEX. Additions are defined as investments during the financial year (net of any government grants received) and include additions resulting from business combinations as well as gross increases of asset retirement obligations (costs of dismantling and restoration). The Taxonomy CAPEX measure includes both continuing and discontinued operations (Denmark). Telia's CAPEX measure used in the consolidated financial statements excludes additions resulting from business combinations and asset retirement obligations but includes advances and pre-payments
- OPEX is defined as direct non-capitalized costs that relate to research and development, building renovation measures, short-term leases,

Since Telia's reporting structures and have not yet been fully adjusted to mirror economic activity definitions of the Taxonomy, some assumptions have been made to the numerator for certain parts of the some of the data center activities, estimated to calculate the share of CAPEX related to external customers of Things platforms and technical solutions developed for a specific vertical use, of OPEX and CAPEX to the reported mirrors the share of these services in of total Internet of Things revenues. The figures covered in the report. As a Telia has applied a conservative approach identifying eligible activities and CAPEX and OPEX associated with such

maintenance and repair, and any other expenditures relating to the day-to-day of assets of property, plants and equipment the undertaking or third party to whom are outsourced that are necessary to the continued and effective functioning of assets. The Taxonomy OPEX measure only continuing operations

- Direct non-capitalized costs related and development corresponds to the research and development expenses consolidated statements of comprehensive income, excluding amortization, depreciation and impairment expenses in that full servicing expenditures and has, for included costs if required to maintain or servicing property plants and equipment

Since Telia's reporting structures and have not yet been fully adjusted to mirror economic activity definitions of the Taxonomy, some assumptions have been made to the numerator for certain parts of the some of the data center activities, estimated to calculate the share of CAPEX related to external customers of Things platforms and technical solutions developed for a specific vertical use, of OPEX and CAPEX to the reported mirrors the share of these services in of total Internet of Things revenues. The figures covered in the report. As a Telia has applied a conservative approach identifying eligible activities and CAPEX and OPEX associated with such

### Financial key performance indicators

Based on the assessment performed, Telia reported the following Taxonomy-eligible and aligned turnover, CAPEX and OPEX:

#### Turnover

Substantial contribution criteria	2023		Substantial contribution criteria						DNSH criteria (Does Not Significantly Harm)						Proportion of Taxonomy aligned (A.1.) or eligible (A.2.) turnover, year 2022	Category enabling activity

**Disclosure regarding nuclear and fossil gas related activities**

Nuclear related activities		
1.	The undertaking carries out funds or has exposures to research, development, demonstration and deployment of innovative electricity generation facilities that produce energy from nuclear processes with minimal waste from the fuel cycle.	No
2.	The undertaking carries out, funds or has exposures to construction and safe operation of new nuclear installations to produce electricity or process heat, including for the purposes of district heating or industrial processes such as hydrogen production, as well as their safety upgrades, using best available technologies.	No
3.	The undertaking carries out, funds or has exposures to safe operation of existing nuclear installations that produce electricity or process heat, including for the purposes of district heating or industrial processes such as hydrogen production from nuclear energy, as well as their safety upgrades.	No
Fossil gas related activities		
4.	The undertaking carries out, funds or has exposures to construction or operation of electricity generation facilities that produce electricity using fossil gaseous fuels.	No
5.	The undertaking carries out, funds or has exposures to construction, refurbishment, and operation of combined heat/cool and power generation facilities using fossil gaseous fuels.	No
6.	The undertaking carries out, funds or has exposures to construction, refurbishment and operation of heat generation facilities that produce heat/cool using fossil gaseous fuels.	No

## Telia's transition plan and TCFD reporting

Telia sees climate change management as a decisive factor for future business success and acknowledges the importance of providing investors and other stakeholders with information about how it plans to transition into a low-carbon economy and remain resilient. The company takes the Task Force on Climate-related Financial Disclosures (TCFD) recommendations not only as reporting recommendations, but also as useful guidance to continuously structure and improve its work. The reporting below, including references, reflects Telia's current transition plan, which the company will continue to develop in 2024.

### Governance

Board oversight and the role of management in the full sustainability agenda, including climate, is described in the **Sustainability governance** chapter. Additional climate-specific information is provided here.

### Board oversight

In 2019, the Board adopted Telia's 2030 climate targets. In 2021, the Board approved the new Telia purpose and updated business strategy, in which climate and circularity were embedded and selected as one of the three most prioritized impact areas with dedicated short-, medium- and long-term goals. To continuously exercise oversight, the Board receives half-year and full-year updates from management on both progress towards the goals and climate-related risks. The latter is part of the company's **Enterprise Risk**

**Management process**, in which Environment, which embeds Climate and circularity, is one of the Principal Risk areas that the Board is overseeing. Each year, the Board approves the externally assured Annual and Sustainability Report through which Telia's climate performance is reported to external stakeholders.

### The role of management

Group Executive Management (GEM) jointly owns the environmental agenda, and its members are responsible for assessment and management of climate-related matters, including strategic business decisions, goal setting and target execution.

In addition, the sustainability steering committee facilitates continuous strategic work, finds solutions and ways forward related to barriers, risks, and opportunities, and engages the GEM, as needed. The steering committee consists of five members of GEM (the Head of Communication, Brand and Sustainability, the CEO of Telia Sweden, the Group Chief Operating Officer, the Chief Financial Officer and the Chief Strategy and Commercial Officer), as well as the Head of Group Governance, Risk and Compliance and the Head of Group Sustainability.

Members of GEM are evaluated on sustainability goals as part of their annual performance evaluation. Responsibilities for KPIs related to climate and circularity are distributed within local and functional management teams and the same KPIs are integrated into the performance evaluation of key individuals. Moreover, ESG parameters, including Telia's 2025 supply chain climate target, have been included in the Long-Term Incentive program (variable pay) applicable to the Extended Leadership Team since 2022.

### Strategy

Since its first TCFD report in 2019, Telia has continuously developed its reporting and underlying assessments of risks and opportunities. The table on the next page presents key risks and opportunities, with additional information on the following pages, including impacts on strategy and financial planning.

In 2022, Telia identified expected climate-related risks and opportunities in the short, medium and long term. The analysis was reviewed in 2023 and the trends were found to have either remained the same or been accentuated, especially since physical climate effects due to extreme weather events had continued to impact the countries in which Telia operates, with 2023 being yet another record year in terms of global warming. Moreover, market trends increased as CSRD came closer to entering into force.

There are different ways of conducting scenario analyses. For physical climate risks (see further down), Telia has conducted detailed analyses for various temperature levels. For transition risks, the company has based its analysis on the assumption that the world will continue to strive to limit global warming to a maximum of 1.5°C compared to pre-industrial levels and, if warming exceeds that limit, it will make efforts to bend the overshoot. If that scenario is not achieved, Telia expects the drivers described below to be accentuated as a consequence of accelerating physical climate risks.

"Short term" is defined as from now until 2025, "medium term" from 2025-2027 and "long term" from 2027-2030. Due to uncertainties, Telia uses a longer time frame for physical climate risks

– currently, until 2040. In the company of the transition risks listed below, we see an opportunity through successful activities.

### Transition risks

**Identification of risks and opportunities**  
Transition risks and opportunities are assessed as part of Telia's monitoring example, policy and technological developments (legal, policy and technological risks) and development of the energy market and trends (market risks), and stakeholder media discussions (reputational risks). Telia updated its analysis and deeper understanding by inviting a cross-functional group of internal subject matter experts information from various sources and potential shifts (policy/legal/technological and reputation) and the risks and opportunities could pose for the company in the medium and long term, with particular focus on the medium term (2025-2027). The analysis outlined three key shifts, related to (1) expectations on products and services expectations on data center and network (3) expectations related to the company's resilience. The work was overseen by representatives from Sustainability, Finance, Strategy and Risk Management. It to ensure adjustments are made in the respective work.

In short, Telia found:

### Policy/legal

- New policy and legal requirements very much driven by the EU Green Deal and EU Circular Action Plan and related

legislation. Several new and upcoming laws are making previous voluntary work mandatory, loopholes are being closed and transparency requirements aim to make the environmental performance of companies/ products/ services comparable. Telia expects these changes to increase the return on investments in sustainability-related work and make greenwashing and "lighter" sustainability work more difficult and subject to penalization.

In addition to legislation targeting all large companies (such as CSRD and CS3D), ICT/ telcos are targeted specifically in relation to, for example, the energy efficiency of data centers, eco-design and the energy efficiency of mobile phones, the "right to repair" electronics, transparency, and other requirements regarding the environmental impacts of networks. High reputational risks, rather than fines, are expected for laggards and cases of non-compliance.

#### Market

- Telia notes and expects increasing investor expectations and interest in its climate work, both related to the reduction of its negative carbon footprint and its ability to enable customers to reduce emissions through digitalization. The Sustainable Finance Reporting Directive (in force from 2024) aims to redirect capital to sustainable economic activities and will gradually start impacting access to capital. This is already materializing through growing interest in green bonds and sustainability-linked loans, as well as more granular requests from ESG rating agencies, analysts and lenders
- Results from the 2023 SB Insights B2C study highlight climate and circularity among the top three prioritized topics for consumers across

Telia's markets. There are certain differences between the Nordic and Baltic markets, with Nordic customers having the highest expectations on climate performance to date

- Business customers are raising the bar as they move from ambitions to action and increasingly seek advice on how they can lower their footprint through low-carbon, energy-efficient and circular products, as well as digital services that drive efficiencies. Such opportunities are increasing as 5G networks expand. CSRD preparations accentuated the trend within the B2B segment in 2023

#### Reputation

- Telia's customer surveys show high levels of trust in the company and the telecoms sector is connected to relatively low negative associations. The ability to become low-carbon, energy-efficient and circular is expected to determine the future reputations of both individual companies and the industry

#### Technology

- High-quality connectivity and digital solutions are crucial to enable a transition into a net-zero economy. Final impacts will also depend on how technology is deployed, if suppliers manage to transform to low-carbon and circular economies, as well as the sector's ability to handle conflicting goals. As an example, regional autonomy ambitions for security reasons may drive increasing infrastructure needs locally. Moreover, new technologies will be required to, for example, generate greater energy efficiencies and higher recycling rates for hardware

Telia expects these transitional trends to intensify until 2025/2027, prompting it to prioritize the risks and opportunities listed in the table on page

125. Uncertainties relate to the pace of change, which may be affected by the current economic downturn, social tensions, the level of ambition of next years' government policy, and the frequency and severity of extreme weather events.

#### Impact on strategy

The ongoing trends described above confirm the importance of Telia's climate and circularity goals being embedded in the business strategy, which in turn impacts various aspects of the company's business, as well as underlying area-specific strategies and ways of working. Here are a few examples:

- Own operations: Telia's environmental goals have led to an 87% reduction in emissions related to energy and fuel (scope 1 and 2) since 2018. The company is continuing its efforts to reduce emissions further and has mapped which steps to take to achieve a 90% reduction by 2030 at the latest (base year: 2018)
- Supply chain management: Emission reductions in Telia's supply chain play a key role in the company achieving its goals. Hence, climate performance is embedded in Telia's supplier selection and engagement processes, where the company requests that suppliers set science-based targets. In 2023, Telia continued to design more detailed strategies related to two of the biggest emission cluster areas: network equipment and terminals/mobile phones (see page 82). In several areas, Telia works with peers to generate an industry shift (see example of Eco Rating of smartphones and GSMA collaboration related to circular approaches to networks on pages 77 and 85). Telia believes an "all company" approach is the best way of securing top management commitments and substantial reductions, while also increasing the resilience

in its supply chain, rather than zooming in specific product/service deliveries

- Investments and product development

Investment decisions related to product development and other areas are p environmental screening covering t emissions, energy and waste. In addition to the 2021-2023 strategy period, Telia's circular business models and sales products/services. In 2023, the company product developers identified the most impactful products and services to focus on and worked to set reduction plans in various categories. Materiality was based on footprint, upcoming legislation and demand for better low-carbon, energy-efficient and circular products, and associated risks

In 2022, Telia created a modelling tool with Accenture to assess how its current and various external factors such as legal developments and the pace of shift to renewable energy, electrification, digitalization, may impact its ability to achieve its goals. The tool is used to assess the various future scenarios related to supply chain. The 2022 exercise demonstrated that Telia's current assumptions, external conditions and internal factors significantly contribute to emission reduction which adds to the expected effects from company's current climate goals. However, to achieve its goals, Telia needs to accelerate its pace of reductions in its supply chain to a larger net-zero and circular shift in its society. In 2023, the company's integration of circularity into its work conclusion of this exercise is its work business strategy for 2024-2026, with a focus on circularity and more detailed product portfolio.

### Risk and opportunity overview

Telia sees business opportunities in the transition into the low-carbon economy and acknowledges that they could become risks if they are not managed successfully. The inherent risks are managed through mitigation activities, as listed in the table below.

Material* transition and physical risks and opportunities		Telia's response to mitigate risk or manage opportunity	
Risk and opportunity description			
<b>Digital solutions with enablement effect</b>	There is an opportunity to strengthen the relevance of Telia's product portfolio and ability to be a preferred partner of choice within the B2B segment. This involves capturing opportunities to scale impact by enabling customers to decarbonize through some of the company's IoT and smart grid connectivity services and solutions and communicating this increased value to customers	Telia shall scale the digital solutions that enable customers and society to decarbonize, for example: <ul style="list-style-type: none"> <li>• Smart buildings</li> <li>• Smart transport</li> <li>• Telia's Travel Emissions Insights</li> </ul>	Financials
<b>Product portfolio</b>	There is a risk in not having a product portfolio that meets stakeholders' expectations on low-carbon, energy-efficient and circular products and services, including an inability to provide customers with coherent and substantiated environmental information in customer touchpoints	Telia shall ensure that selected material products and services become low-carbon, energy-efficient, and shall communicate its product/service carbon footprint to customers, for example: <ul style="list-style-type: none"> <li>• Device as a Service</li> <li>• Refurbished phones</li> <li>• Circular router</li> <li>• Business messaging</li> <li>• Net-zero requirement on suppliers to have verified science-based targets and a decarbonization plan demonstrating the trajectory to the targets</li> </ul>	Sustainability
<b>Energy strategy</b>	There is a risk in not having a resilient energy strategy, including increasing energy efficiency, securing renewable energy supplies at predictable costs and addressing the remaining CO <sub>2</sub> emissions from energy, with clear communication around Telia's growing energy consumption	Telia shall ensure that it has a robust, resilient energy strategy, including but not limited to: <ul style="list-style-type: none"> <li>• Legacy network dismantling</li> <li>• Modernization of networks</li> <li>• Low-carbon, circular and energy-efficient network equipment</li> <li>• Explore its role in the wider energy system (battery storage, peak shaving, feeding grid, reuse of excess heat, etc.)</li> </ul>	Sustainability
<b>Extreme weather events</b>	There is a risk of increasing costs and loss of assets due to physical climate risks/extreme weather events such as heatwaves, high wind speeds and precipitation	Telia's climate risks are continuously monitored and handled via Telia's service continuity management process: <ul style="list-style-type: none"> <li>• Preventive actions are taken based on experiences from previous extreme weather events</li> </ul>	Sustainability

\* Materiality was assessed using Telia's risk heat map. Risks and opportunities that were categorized as "high" or "very high" are considered material.

*Impact on financial planning*  
Financial planning is affected by Telia's various initiatives – for example, purchasing of renewable electricity and long-term power purchasing agreements, as well as investments in energy-efficiency measures, the development of new products and offerings (continuous development of Telia's IoT platform, cloud and crowd insights offerings, circular business models such as Device as a Service (DaaS) and internal loop for refurbished mobile phones). Some initiatives, such as the purchasing of guarantees of origin, generate extra costs, while others, such as refurbishment and energy-efficiency initiatives, reduce costs or generate increased or new revenue as they generate extra value for Telia's customers. Two examples are DaaS, whereby Telia simplifies the lives of its customers while limiting environmental impact and IoT offerings that strengthen Telia's ambition to be its customer's digital partner of choice.

### Physical risks

*Identification of risks and opportunities*  
During 2021, Telia carried out its first physical climate risk assessments in all its markets, based on analysis provided by the Swedish Meteorological and Hydrological Institute. The analysis involved climate modelling of three representative concentration pathways (RCPs) by the UN Intergovernmental Panel on Climate Change through three reference periods (2011-2040, 2041-2070 and 2071-2100). The selected scenarios (RCP2.6, RCP4.5 and RCP8.5) cover a wide range of variations regarding future atmosphere and greenhouse gases in the atmosphere and their impacts on indicators such as annual average temperature and heatwaves, annual maximum wind speed, annual average precipitation and daily maximum precipitation.

The analysis shows differences among the various reference periods and scenarios for the indicators analyzed. A few conclusions:

- *Heatwaves:* The yearly average temperature is rising globally and will increase across the Nordic and Baltic regions, especially in northern Sweden. Warmer yearly average temperatures will also increase the frequency, duration and intensity of heatwaves in the summer. Generally, the northern regions are projected to warm more than the southern regions, and inland regions are projected to heat up more than coastal regions. The results consistently show a higher temperature increase for the later time periods
- *Wind speed:* Annual maximum wind speed is affected by a complex set of variables that control storm paths, strength and frequency, resulting in greater uncertainty in comparison to other climate indicators
- *Precipitation:* Changes in precipitation are expected to be small in the earlier time frames, with increasing risks in the later period

In 2023, Telia completed this high-level analysis with site-specific assessments related to data centers to better understand risks and add to ongoing continuity work related to the sites.

*Impact on strategy and financial planning*  
Potential implications of the changes outlined above are, in most cases, related to disruptions (power outages and connection losses), which Telia works with systematically within Service Continuity Management, regardless of the cause – see the **Privacy and security** and **Responsible sourcing** chapters for further information (the latter for information about work to prevent disruption of supply). To date, the organization's experiences of extreme weather have shaped

preventive actions in Telia's markets. In 2023, the company further explored the eventual risks related to the network equipment it purchases.

To date, the above-mentioned processes and activities are part of continuous work and are financed as such, without any specific climate-related financing or inclusion in financial planning.

### Risk management

#### Processes for identifying and assessing climate-related risks

Over the past few years, Telia has taken several steps to integrate climate into its risk management processes:

- In 2018/19, Telia conducted a materiality assessment that preceded the adoption of its 2030 climate goals for the value chain
- In 2020, Telia further mapped and calculated its climate and waste impacts, as well as its enablement effect, to better understand the size of the risks and opportunities, which informed more detailed target setting for 2023 and 2025
- In 2021, Environment (Climate and circularity) was selected as one of the Principal Risk areas that are covered in Telia's **Enterprise Risk Management (ERM) Framework**, which is used to regularly identify, analyze, assess and report risks and uncertainties. As part of the ERM process, the overall maturity level of the environmental work is regularly assessed in a structured way using the same model that is applied for all Principal Risk areas at Telia. In 2021, Telia also conducted its first physical risk assessment

• In 2022, Telia set up a cross-functional transition plan working group to regularly assess climate-related risks and opportunities, with a delivered its first report to GEM

• In 2023, Telia incorporated the more outcome into its Enterprise Risk Map setup and the five key risk areas now the structure of the company's reporting to management and the Board takes place twice a year. The double assessment conducted during the year Telia to assess the inherent impacts and opportunities in a more detailed manner the residual risk levels associated with risks are reported to management. Board to support continuous business development and enable decision-making needed. Telia's ERM heat map is used the financial risk level based on assessment regarding financial, strategic, regulatory experience and reputational impact

### Processes for managing climate-related risks

Risks and opportunities that Telia identifies are integrated into its business strategy, company's targets, policies and instruments to climate/environment provide the area as well as further guidance. Execution either through Telia's environmental processes through integration into key processes work areas such as service continuity and product development. Regular progress towards goals enables relevant making forums at Telia to integrate and adapt their strategies.

### Metrics and targets

Telia is aiming for net-zero emissions target that was approved by the Science Targets initiative (SBTi) in 2023. The adopted its 2030 targets in 2019 and science-based targets in 2020, aligning

ICT sector's 1.5°C pathway. In 2023, Telia added a new scope 1 and 2 target: to reduce GHG emissions by 90% by 2030 compared to 2018.

The metrics used to track progress are:

- Scope 1, 2 and 3 emissions according to the GHG protocol (see page 113)
- Enablement reporting developed with the Carbon Trust consultancy (see page 116)
- Taxonomy eligibility and alignment for data centers (8:1) and enablement services (8:2) (see page 116)
- Impact level in Telia's ERM Risk Scoring (very high, high, medium or low) and related maturity assessments (see table on page 109)

A full overview of metrics, targets and progress to date is available in the **Climate and circularity** chapter and in the earlier parts of this note.

## S5 Digital inclusion

See the **Digital inclusion** chapter for more information.

The key pillars of Telia's Digital inclusion strategy are:

- 1) providing reliable access to connectivity and
- 2) building digital skills.

Both are measured via KPIs, where possible.

### Providing reliable access

Progress on efforts to ensure reliable access is measured through KPIs for population coverage and network quality perception — the latter via surveys (OpenSignal, Umlaut and others).

In addition, Telia aims to increase access to its services for individuals with disabilities (no quantifiable KPI available).

### Building digital skills

Reach refers to the number of individuals that Telia has reached via its digital inclusion initiatives. Individuals covered are those who risk being disadvantaged, digitally excluded, or placed in a vulnerable situation. To put the company's goal of reaching 2.2 million people into context, Telia had 18.6 million mobile subscriptions in 2023.

The initiatives in question raise awareness about risks and opportunities in the online world with the aim of building digital skills. The former is essential to build the latter.

Currently, the key target groups are:

- Seniors (to ensure they have access to essential services such as health care and banking)
- Children (to ensure they are well equipped in the online world). Telia also aims to reach children's parents and teachers, who play a key role in skills-building and empowerment
- Immigrants (to remove barriers as they enter highly digital societies)
- Women (to re-skill them and increase equality in the technology sector)
- SMEs (to ensure they do not lag behind in areas such as cybersecurity due to limited digital maturity)

Both physical and digital channels are used. Formats and channels are shaped by target group needs and the potential they offer to reach specific groups of individuals.

The vast majority of Telia's initiatives are conducted in collaboration with important stakeholders or partners such as municipalities (for seniors) or organizations that specialize in specific topics (such as child rights organizations). Initiatives are accounted for if there is an important/substantial contribution from Telia either as an initiator, or through a financial or in-kind contribution.

Reach by digital inclusion initiatives includes direct reach (number of participants in face-to-face training programs, seminars, workshops, or other digital skills-building events) and indirect reach (number of unique viewers of specific websites with digital skills-building guide materials, number of downloads of educational apps, number of receivers of printed digital skill guide materials, number of participants in webinars, etc.). For further details, please refer to Telia's sustainability reporting framework

In 2023, Telia finalized a project in collaboration with Malmö University to develop a model for measuring the impact of a selection of Telia's digital inclusion initiatives. During 2023, Telia evaluated four initiatives with the support of this model: Digital in Sweden (Sweden), Women in Tech (Estonia), Augu Internete/Growing up Online (Lithuania) and Workshops for seniors (Finland). During the year, a researcher from Jönköping University also studied the Mobile Driving Licence initiative for children in Sweden. Telia has previously conducted impact assessments for three initiatives: Digital Senior in Sweden (2018, with a university partner); Greatest Courage in Estonia (2021, with a consultancy specializing in social impact measurement); and Women Go Tech

in Lithuania (2021, by WGT itself). For information about Telia's initiatives, visit [our website](#).

## S6 Privacy and security

See the **Privacy and security** chapter for information.

Personal data and personal data breach defined as per GDPR Article 4. Data breach notification obligations are outlined in Article 33.

Right of access requests are defined in Article 15.

As the processes of some business units (Media) differ from Group processes (for example, right of access requests data breaches), such reporting statistics include cases from these units.

## S7 Human rights

See the Human rights chapter for more information.

### Salient human rights issues

Salient human rights issues – listed in the Human rights chapter of this report – are defined as per the UN Guiding Principles Reporting Framework: “the issue at risk of the most severe negative impact through the company’s activities and business relationships.” Identification of the most salient issues focuses on risk to people based on likelihood and severity. The latter is defined by:

- Scale (gravity of human rights impact)
- Scope (number of people who have or could be impacted)
- Remediability (can the impact be put right or not)

Salience is reviewed as part of Telia’s broader process to determine materiality (see **Sustainability note S3**) and further analysis is conducted by the company’s Human Rights Core Team, which includes internal experts on various human rights areas. These experts regularly consult with and receive input from external partners and networks that Telia participates in. Examples include:

- Children’s rights organizations such as World Childhood Foundation (on topics related to children’s rights, including the spread of child sexual abuse materials)
- The Global Network Initiative (on freedom of expression and privacy)
- Union representatives (on labor rights, including risks of discrimination)
- Internal and external diversity networks (on topics related to diversity and inclusion)

- Audit results through Joint Audit: Cooperation (on labor rights in supply chains, including forced and child labor)
- Continuous interactions with other experts as needed, including authorities such as local data protection boards on privacy matters
- The BSR global non-profit organization for sustainability expertise on a broad range of topics

### Access to remedy

Telia may learn about human rights risks or harm through its Speak-Up Line, but also through other channels such as customer care, audits conducted by its sourcing department, employee complaints processes, etc.

Telia’s Speak-Up Line serves as its operational level grievance mechanism and is available in several languages to both internal and external stakeholders.

Telia provides remedies such as:

- Restitution – as in the case of privacy incidents by, for example, deleting or requiring others to delete unlawfully disclosed personal data or by correcting erroneous personal data
- Satisfaction – as in the case of privacy incidents and customer complaints more broadly by investigating and acknowledging the harm done and providing an apology directly to the customer and/or via the media. All customer complaints are assessed with the purpose of preventing any future harm
- Compensation – as in the case of privacy incidents, in accordance with either agreements or GDPR
- Guarantees of measures and non-repetition – as in the case of privacy and security incidents by,

for example, improving internal guidelines and processes, or in the case of employee issues through, for example, taking disciplinary action

### Media freedoms

For information about Telia’s commitment to media freedoms, please refer to **Group Policy Media Owner Commitments**, which defines Telia’s commitments in relation to the free flow of information, freedom of expression, freedom and independence of mass media and an open and democratic society.

## S8 Freedom of expression and government surveillance

See the **Freedom of expression and government surveillance** chapter for more information. Definitions of the authority request categories are available in **Telia’s Sustainability Reporting Framework**.

In its Law Enforcement Disclosure Reports (LEDRs), Telia publishes detailed statistics on conventional requests, as well as the approximate number of unconventional requests. The 2023 report includes statistics regarding conventional requests from 2021 to 2023. A summary of Telia’s LEDR report is presented on the next page as part of the external assurance.

Figures both on the following page and in the LEDR show the number of day-to-day

conventional requests from authorities and the number of individuals to whom the comparisons between markets should be due to differences in market share and the working methods of both the authority and Telia locally. For more information on definitions, data sources and the material see Appendix 2 in the LEDR. For statistics from 2021, please see **Telia’s resource page** Enforcement Disclosure Reports.

### Authority requests

NB: Direct access is not included in the statistics.

#### Denmark

	2023	2022	2021
Lawful interception	5,902	4,676	4,310
Historical data	1,590	1,442	1,745
Subscription data	9,398	10,275	7,386
Challenged/ rejected requests	38	21	0

#### Estonia

	2023	2022	2021
Lawful interception <sup>1</sup>	No statistics	No statistics	No statistics
Historical data	22,382	7,974	8,835
Subscription data <sup>2</sup>	946,028	670,909	695,335
Challenged/ rejected requests	13	13	20

1) Telia Estonia is not able to provide statistical information on the number of lawful interception requests because intercepted numbers and the log of requests are encrypted as mandated by the Electronic Communication Act.  
 2) The 'subscription data' category includes all requests for subscription data. For other countries, the corresponding figure covers only requests that are handled by authorized personnel, as well as automated requests that refer to criminal cases.

#### Finland

	2023	2022	2021
Lawful interception <sup>1</sup>	12,263	8,178	6,414
Historical data	6,905	4,982	4,885
Subscription data	13,584	11,109	10,023
Challenged/ rejected requests <sup>2</sup>	144	75	64

1) Telia Finland's internal system for the logging of lawful intercept requests has been changed. Until March 2021, one individual lawful interception request was registered as one request, even if it included many types of surveillance measures upon a person. Following the system change, each type of surveillance measure is counted individually. This leads to an increase in the number.  
 2) Note that, in most cases, 'challenged/rejected requests' relate to erroneous target information from the police.

#### Lithuania<sup>1</sup>

	2023	2022
Lawful interception	No permission to publish	No permission to publish
Historical data	81,312	97,926
Subscription data	71,393	78,262
Challenged/ rejected requests	39	24

1) Telia Company and Telia Lithuania have not been granted permission to compile and publish their own statistics regarding many lawful interception requests were received in Lithuania. See page 11 in the full LEDR report for further information.

#### Norway

	2023	2022
Lawful interception	1,327	953
Historical data	4,273	4,638
Subscription data	9,885	796
Challenged/ rejected requests <sup>2</sup>	59	71

1) From the second half of 2021 onwards, Telia Norway has included manual emergency positioning requests in accordance with applicable definition of 'historical data'. The numbers might therefore be slightly higher than before.  
 2) 'Challenged/rejected requests' refer to invalid requests due to administrative form errors.

#### Sweden

	2023	2022
Lawful interception	4,166	3,729
Historical data	9,138	9,908
Subscription data	5,757	6,481
Challenged/ rejected requests	220	197

## S9 Diversity, equity and inclusion

See the **Diversity, equity, inclusion and well-being** chapter for more information. Complementary information is available in the People section of the Board of Directors' Report.

In many of its markets, Telia is not allowed to track the region of birth of its employees. However, in Sweden Telia can get aggregated data on the region of birth by providing personal identity numbers to the Central Bureau of Statistics (SCB). The outcome is presented on page 101.

Region of birth, as defined by Sweden's Central Bureau of Statistics (SCB), is determined by the individual's place of birth and the parents' place of birth. This defines Swedish background as an individual born in Sweden with one or two parents born in Sweden and Non-Swedish background as an individual born outside of Sweden or born in Sweden with two foreign-born parents. Data for Telia in Sweden is presented according to the definition provided by SCB. Please note that data for GEM and the Board only considers where the individual was born.

## S10 Health and well-being

See the **Diversity, equity, inclusion and well-being** chapter for more information.

As a result of different HR systems, sickness absence figures are not available for Lithuania. For more information about calculation methods and definitions, see **Telia's Sustainability Reporting Framework**.

### Sickness absence

The sickness absence rate (SAR) represents the percentage ratio of absence days related to sickness per days of total contractual work time.

Sickness absence rate (%)	2023	2022
Denmark	2.9	3.2
Estonia	1.7	2.0
Finland	2.6	2.8
Norway	5.4	5.4
Sweden	2.3	2.7
<b>Weighted average, all countries</b>	<b>2.8</b>	<b>3.0</b>

Telia's target is to maintain lower sickness absence rates than the national industry average. Monitoring of the sickness absence rate is crucial, and actions are taken locally when there is an increase.

## S12 Child, forced and compulsory labor

Supplier requirements regarding child and compulsory labor are included in the Code of Conduct and in the in-depth assessment. Suppliers are expected to verify compliance with Telia's requirements on their own operations and through the chains, and in Telia's audits such process assessed.

Independent human rights impact assessment carried out in 2017 for one of Telia's operations in the Nordics (Telia Sweden) and one in Lithuania indicated that the use of forced and compulsory labor was high in Telia's markets. Telia's conclusion is that it applies.

During the year, no cases of child labor were identified via Telia's audits of its first tier suppliers. Audits conducted by JAC in 2023 identified that child labor firms in general, consistent with the findings of industry audits. These related to suppliers in inadequate company policies on the personnel records or young workers working age but are found to be performed in shifts or hazardous work.

A general statement regarding the UK Modern Slavery Act is available on **Telia's website**. The statement provided on the website is for information only and does not constitute a sustainability report and is not to be taken as an assurance.

**Lost-time injuries**  
The lost-time injury frequency (LTIF) figure represents the number of injuries resulting in absence from work per million theoretical work hours.

Lost-time injury frequency	2023	2022
Denmark	0.00	2.72
Estonia	0.93	0.30
Finland	0.48	0.12
Lithuania	0.16	0.00
Norway	0.22	0.00
Sweden	0.44	0.00
<b>All countries</b>	<b>0.40</b>	<b>0.17</b>

In Telia's industry the overall accident rate is low. To illustrate what the data above represents, Finland's score of 0.48 means that there were four reported accidents resulting in sick leave in that market during 2023. Telia's target is to have an LTIF lower than 0.52. However, the main focus is to monitor activities and take immediate action if the LTIF changes significantly.

## S11 Legal compliance

For information about legal cases and proceedings, see **Note C30** in the Consolidated financial statements. This includes significant legal cases and proceedings relating to, for example, business ethics, environmental and socioeconomic compliance, if such cases exist.

## S13 Responsible tax practices

Transparent, fair and ethical tax practices form part of Teliala's basis for business operations. The company works according to internal control procedures, such as its Group tax instruction, and complies with local legislation and internationally accepted principles to pay the amount of taxes legally due in any territory.

### Total tax contribution

- Net VAT paid 56% <sup>1</sup>
- Employee taxes paid 21%
- Employer taxes paid 11%
- Corporate income taxes paid 6%
- Non-tax-based fees 6% <sup>2</sup>

1) If a Teliala entity was in a recovery position regarding VAT or other indirect taxes, this would reduce the total amount of net VAT paid. The net VAT paid, or the total tax contribution as such, does not capture our irrecoverable VAT.  
 2) Non-tax-based fees are governmental fees that are not defined as taxes, for example spectrum fees.

In addition to corporate income tax payments, Teliala generates billions of SEK in other tax payments and non-tax-based fees such as licenses and spectrum fees throughout its footprint. The total tax contribution in 2023, including both taxes borne and taxes collected, amounted to SEK 20.8 billion (19.1).

Corporate income taxes paid SEK million	2023	2022	2021
Denmark	0	-21	3
Estonia	115	78	49
Finland	93	145	30
Latvia	15	-5	7
Lithuania	120	14	68
Norway	622	676	585
Sweden	336	683	1,188
Turkey	2	11	1
Other countries	1	0	2
<b>Total, continuing operations</b>	<b>1,304</b>	<b>1,581</b>	<b>1,933</b>
Denmark	0	-56	-10
Sweden	0	7	23
<b>Total, discontinuing operations</b>	<b>0</b>	<b>-49</b>	<b>13</b>
<b>Total</b>	<b>1,304</b>	<b>1,532</b>	<b>1,946</b>

## S14 Electromagnetic fields (EMF)

When Teliala builds mobile networks, the health and safety of the public, employees, and contractors come first. The company's work is governed by the Group policy – Electromagnetic fields (EMF). When constructing radio networks and selling mobile devices, Teliala adheres to local norms maintained by authorities, based on guidelines from the World Health Organization (WHO) and the International Commission on Non-Ionizing Radiation Protection (ICNIRP).

In the current 5G deployment across the Nordics and Baltics, Teliala follows the ICNIRP guidelines, which were updated in 2020 to include 5G frequencies (also called "5G spectrum"). 5G technology is, to a large extent, built on the same infrastructure as previous generations of mobile networks, such as 3G and 4G, and the equipment used adheres to the same strict EMF requirements and exposure limits. During network planning, Teliala ensures that equipment is placed in such a way that it complies with applicable regulations on exposure limits. If necessary, the company carries out on-site measurements to verify that regulations are met.

Both independently and through industry organizations, Teliala continuously engages with key stakeholders such as local and national authorities to clarify concerns or questions from the public and to ensure that the authorities have relevant information about how Teliala builds its networks according to EMF guidelines. More information on EMF is provided on local websites and **Teliala Company's website**.

## S15 Sponsorship donations and disaster relief

### Sponsorships

To ensure that sponsorships and donations are conducted in an ethical and compliant manner, they are governed by Teliala's Group Instructions on Sponsorships and Donations. As sponsorships and donations can be used to facilitate practices, the instruction includes strict requirements. All sponsorships and donations must be documented to reflect their purpose and to ensure that they are not used for political purposes. Political donations are strictly prohibited.

The general principle is to sponsor organizations to support long-term digitalization and Teliala's geographic presence.

### Donations and disaster relief

Teliala provides short-term philanthropic support such as financial or in-kind support for relief or other extraordinary circumstances. Substantial financial donations during 2023 included those made to World Childhood Foundation and Bris, a Swedish child organization. Read more in the **Childhood** chapter.

Teliala is always prepared to participate in relief or crisis support, primarily through its networks, products and services. Measures include reduced tariffs or additional network capacity. During 2023, the company continued to provide connectivity in Ukraine at reduced rates in

## S16 Whistleblowing cases

For more information about the whistleblowing process and channel, see the **Whistleblowing and Speak-Up Line** chapter in the Enterprise Risk Management (ERM) and Compliance Framework section.

During the year, 174 (103) reports were recorded in the Speak-Up Line whistleblowing channel, of which 30 (50%) were filed anonymously. The most commonly reported issues related to allegations of poor leadership, harassment and fraud. Reports were received via the Speak-Up Line portal or email address (which are available to both employees and third parties), through direct contact with group or local ethics and compliance officers, and via line managers. In 2023, in conjunction with the rollout of its updated Code of Conduct and reinforcement of the Supplier Code of Conduct, Telia worked on increasing awareness of the Speak-Up Line and making it accessible and easier to use.

Consolidated case reports were presented to the Audit Committee of the Board throughout the year. The reports included significant allegations, progress and the final results of investigations.

A summary of cases is provided to the right. The TV and Media business unit uses a different provider for whistleblowing reports in order to protect the dividing line between editorial work and Telia as a media owner. Reporting and investigations within the TV and Media unit are carried out in line with Telia's defined

whistleblowing process, but Telia does not have any insight into the investigations conducted. All whistleblowing reports from the TV and Media business unit are, however, included in the following statistics.

Number of whistleblowing case reports	2023	2022
Business ethics-related (e.g., fraud, corruption), handled by the Special Investigations Office	29	32
Human resources-related (e.g., harassment, poor leadership), handled by Group or local Human Resources investigators	46	41
Other or incorrectly reported (e.g., customer or supplier complaints), sent to be handled by the relevant function	99	30
<b>Total</b>	<b>174</b>	<b>103</b>
Reporting channel (%)	2023	2022
Speak-Up Line portal	81	88
Sent to the Speak-Up Line email address	16	8
Direct contact with ethics and compliance officers at Group or local level	2	2
Line managers	1	2

Internal investigation KPI (%)	Target	2023	2022
Whistleblowing cases closed within eight weeks*	80	72	79

\* Investigations are considered closed when a final report has been delivered by the case manager or lead investigator, such as local ethics and compliance officers or the Group Special Investigations office, to appropriate management (determined on a case-by-case basis).

## S17 Mergers and acquisitions

Mergers and acquisitions (M&As) are guided by the M&A Instruction and by the M&A handbook, which describes the M&A process in majority transactions, both acquisitions and divestments. It includes general guidance on ethics and compliance as well as sustainability-related topics.

**Significant divestments during the year**  
*Telia Denmark* – announced and signed in 2023.

In September 2023, Telia Company announced that it had entered into a final and binding agreement to sell 100% of its operations and network assets in Denmark to Norlys a.m.b.a. (Norlys) at an enterprise value of DKK 6.25 billion, on a cash and debt-free basis. The transaction, first announced in April 2023, was in line with Telia's strategy to focus on markets in which there is a clear path to securing and defending leading market positions. The transaction is, among other things, subject to customary regulatory approvals, with closing expected in April 2024.

No significant acquisitions were made during 2023.

## S18 Management systems

The Telia Management System is developed in accordance with several international standards, primarily for quality, environment, occupational

health and safety and information security. The management system is certified according to several ISO standards, but certificate scopes vary according to market requirements. By year-end, the following certificates were available for each market. More information is provided on [Telia's website](#).

	ISO9001 (Quality)	ISO14001 (Environment)	ISO45001 (Occupational Health & Safety)	ISO27001 (Information Security)
Telia Company AB	✓	✓		✓
Telia Denmark				
Telia Estonia	✓	✓	✓	✓
Telia Finland	✓	✓	✓	✓
Telia Lithuania	✓	✓	✓	✓
Telia Norway		✓	✓	
Telia Sweden	✓	✓		✓

In addition to the above ISO certificates, local energy management systems are in place for Sweden (STEMFS), Finland (EES+) and Estonia (ISO50001).

## S19 Responsible sourcing

The goals and process described in the **Responsible sourcing** chapter cover parts of Telia's TV and Media unit. Purchases connected to editorial operations are, however, managed by the TV and Media unit, in a separate process, to safeguard the dividing line between editorial work and Telia as a media owner.

For information about how Telia works to prevent the use of conflict minerals, visit [Telia's website](#).

# Telia's sustainability index

To facilitate comparability and robust reporting, communicated information in this report is based on Telia's **Sustainability Reporting Framework**. The index below provides an overview of sustainability reporting areas with references to specific content in the report.

## Standard sustainability information

Topic	Page reference
<b>Organizational profile</b>	
Markets served	108
Information on employees and other workers	34-35, 101
Supply chain	103-105
Significant changes to the organization and its supply chain	132
Precautionary principle or approach	115
External initiatives and memberships	77
<b>Strategy</b>	
Statement from senior decision-maker	4-5
Key impacts, risks, and opportunities	109-111
<b>Ethics and integrity</b>	
Values, principles, standards, and norms of behavior	58-59, 79
Mechanisms for advice and concerns about ethics	63, 78, 93, 132
<b>Stakeholder engagement</b>	
Stakeholder engagement approach and outcome	77, 108-112

Topic	Page refer
<b>Governance</b>	
Governance structure	52-57, 78, 79
Composition of the highest governance body and its role and responsibilities	57-71
Identifying and managing economic, environmental, and social impacts	70, 74-75, 76
Effectiveness of risk management processes	54-62
Review of economic, environmental, and social topics	63-68
Communicating critical concerns	69
Remuneration policies and processes	66-67, 56
<b>Reporting practice</b>	
Entities included in the consolidated financial statements	29-46, 230
Defining report content and topic boundaries	50-58
List of material topics	74-75, 108
Restatements of information	65
Contact point for questions regarding the report	88
External assurance	260

## Specific sustainability information

Topic	Page reference
Anti-corruption	106, 111
Child labor, forced or compulsory labor	130
Children's rights	94-96, 110, 130
Customer health and safety	131
Customer privacy	90-91, 109, 127
Diversity, equal opportunity and non-discrimination	99-102, 111, 130
Effluents and waste	81, 83, 85, 109, 115
Emissions	49, 81-84, 109, 113-115
Employment	34-35
Energy	81-83, 113
EU Taxonomy	116-122
Financial implications and other risks and opportunities due to climate change	123-127
Freedom of association and collective bargaining	34-35
Human rights, due diligence and impact assessments	92-93, 110, 128
Indirect economic impacts	131
Labor/management relations	34-35
Legal compliance	130
Local communities	87-89, 127
Occupational health and safety	102, 111, 130
Procurement practices (environmental, social and governance)	103-105, 111, 130
TCFD	123-127
Water and biodiversity	115

## UN Global Compact

UN Global Compact ten principles	Page
<b>Human rights</b>	
1. Businesses should support and respect the protection of internationally proclaimed human rights in the spheres they can influence	92-93,
2. Businesses should make sure that they are not complicit in human rights abuses	92-93,
<b>Labour</b>	
3. Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining	34-35
4. Businesses should work to eliminate all forms of forced and compulsory labour	103-10
5. Businesses should work to abolish child labour	130
6. Businesses should eliminate discrimination in respect of employment and occupation	99-101
<b>Environment</b>	
7. Businesses should support a precautionary approach to environmental challenges	115
8. Businesses should undertake initiatives to promote greater environmental responsibility	81-86,
9. Businesses should encourage the development and diffusion of environmentally friendly technologies	84, 11
<b>Corruption</b>	
10. Businesses should work against corruption in all its forms, including extortion and bribery	106, 1

## EU Non-Financial Reporting Directive

Matter	Page r
Environmental matters	81-86,
Social matters and treatment of employees	99-102,
Respect for human rights	92-93,
Anti-corruption and bribery	106
Diversity on company boards	101, 13

## C1. Basis of preparation

### General

The annual report and consolidated financial statements have been approved for issue by the Board of Directors on March 13, 2024. The income statement and the balance sheet of the parent company and the statement of comprehensive income and the statement of financial position of the group are subject to adoption by the AGM on April 10, 2024.

Telia Company's consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union (EU). In addition, concerning purely Swedish circumstances, the Swedish Financial Reporting Board has issued standard RFR 1 "Supplementary Accounting Rules for Groups" and other statements. The standard is applied by Telia Company and is applicable to Swedish legal entities whose securities are listed on a Swedish stock exchange or authorized equity marketplace at the end of the reporting period and specifies supplementary rules and disclosures in addition to IFRS requirements, caused by provisions in the Swedish Annual Accounts Act.

### Measurement bases and accounting policies

The consolidated financial statements have been prepared mainly under the historical cost convention. Other measurement bases used, and applied accounting policies are described in Note C3.

### Amounts and dates

Unless otherwise specified, all amounts are in millions of Swedish krona (SEK) or other currency specified and are based on the twelve-month period January 1 to December 31 for items related to comprehensive income and cash flows, and as of December 31 for items related to financial position. Rounding differences may occur. Any restatements of financial or operational data are disclosed if material.

### Restatement of financial and operational data

Disaggregation of revenue has been restated as presented in the following tables to reflect an updated internal product hierarchy as well as updated, and between markets harmonized, product definitions. The main changes performed are reclassification of revenue from Mobile end user revenue to Broadband as well as from Other fixed revenue to Business solutions. Furthermore, as a result of various organizational changes, CAPEX excl. fees for licenses and spectrum and right-of-use assets and number of employees have been restated between segments for comparability.

### Change in accounting principles

#### Classification of expenses by nature in statement of comprehensive income

As of January 1, 2023, Telia Company has changed the presentation of the statement of comprehensive income from a classification of expenses by their function to a classification based on their nature. The new presentation is deemed to provide reliable and more relevant information as a classification of expenses by nature provides more useful information to users of the financial statements about the key components and drivers of Telia Company's profitability, it better represents the way the business is managed and how management reports internally and classification of expenses by nature is more commonly used in the Telco industry. Comparative information has been restated to present classification of expenses by nature.

The new line-item Goods and services purchased includes goods and sub-contracting services purchased, change in inventories, interconnect and roaming expenses as well as other network expenses. The new line-item Other external expenses includes marketing expenses, IT expenses and consultancy fees and other external expenses. Personnel restructuring costs and impairment losses of goodwill previously presented within line-item Other operating expenses have been reclassified to the new line items Personnel expenses and Depreciation, amortization and impairment respectively. The new line-item Depreciation, amortization and impairment relates to property, plant and equipment, intangible assets and right-of-use assets. Amortization and impairment of film and program rights are included in the line-item Goods and services purchased and amortization of costs to obtain a contract is included in the line-item Other external expenses. For definition of the subtotal EBITDA see section Definitions.

### Format and structure of financial instrument note disclosures

The format and structure for note disclosures related to financial instruments have been changed in order to provide more clear and relevant information.

### Recently issued accounting standards and interpretations effective in 2023

As of January 1, 2023, the following standards, amended standards and interpretations became applicable:

- IFRS 17 "Insurance contracts"
- Amendments to IFRS 17 "Initial Application of IFRS 17 and IFRS 9 – comparative information"
- Amendments to IAS 12, "International tax reform-Pillar two model"
- Amendments to IAS 1 and IFRS Practice Statement 2, "Disclosure of accounting policies"
- Amendments to IAS 8, "Definition of accounting estimates"
- Amendments to IAS 12 "Deferred tax related to assets and liabilities arising from a single transaction"

#### IFRS 17 "Insurance contracts"

The new standard IFRS 17 "Insurance contracts" became effective January 1, 2023, and has been implemented by Telia Company. IFRS 17 is applicable for Telia Company's insurance contracts issued to customers via its insurance company Telia Försäkring AB. The insurance contracts refer to property insurance related to equipment sold to customers. The coverage period for these insurance contracts is less than one year and Telia Company accounts for these contracts applying the simplified Premium Allocation Approach (PAA) under which the insurance premiums received are recognized as a liability for remaining coverage

and insurance revenue is recognized over the period when the insurance coverage is provided. Telia Company has also applied the exceptions for insurance contracts with a short coverage period under which the liabilities for remaining coverage and incurred claims are not discounted. The implementation of IFRS 17 has had no material impact on Telia Company's financial statements when the standard was applied for the first time and the insurance operation is limited.

#### Amendments to IAS 12 "International tax reform – Pillar Two model"

Pillar Two legislation has been enacted or substantively enacted in certain jurisdictions where Telia Company operates. The legislation will be effective for the group's financial year beginning January 1, 2024. Telia Company has applied the temporary exception from the accounting requirements for deferred taxes in IAS 12. Accordingly, Telia Company neither recognizes nor discloses information about deferred tax assets and liabilities related to Pillar Two income taxes. See Note C2 and C10 for assessment of Telia Company's Pillar Two income tax exposure.

#### Amendments to IAS 1 and IFRS Practice Statement 2, "Disclosure of accounting policies"

The amendments to IAS 1 and IFRS Practice Statement 2 "Disclosure of Accounting Policies" require disclosure of "material" accounting policies instead of previous "significant" accounting policies. Accounting policy information is considered material if it relates to material transactions, events or conditions and the accounting policy changed during the period, includes an accounting policy choice, is entity specific, relates to areas which requires significant judgments and assumptions or relates to complex accounting. Telia Company has adjusted the disclosures of the group's accounting policies in

note C3 in accordance with these principles. The other amended standards relevant to Telia Company are in certain cases in line with applied interpretations and otherwise or very limited impact on the financial statements.

**New or amended standards and interpretations effective on or after January 1, 2024**  
Telia Company has not pre-adopted any or amended standards effective on or after January 1, 2024. The following amendments will be applicable for Telia Company, are expected to have no or very limited impact on Telia Company's financial statements when they are applied for the first time:

- Amendments to IAS 1, "Classification of current or non-current" effective January 1, 2024
- Amendments to IAS 1, "Classification of current or non-current" effective January 1, 2024
- Amendments to IAS 1, "Non-current liabilities" effective January 1, 2024
- Amendments to IFRS 16, "Lease liabilities and leaseback", effective January 1, 2024
- Amendments to IAS 7 and IFRS 7, "Supplier finance arrangements", effective January 1, 2024

Other issued amendments are deemed to be applicable for Telia Company.

#### EU endorsement status

As of the beginning of March 2024, all standards and interpretations mentioned have been adopted by the EU, except for IAS 7 and IFRS 7, "Supplier Finance Arrangements".

## C2. Judgments and key sources of estimation uncertainty

Management believes that the following areas comprise the most difficult, subjective or complex judgments it has to make in the preparation of the financial statements.

For information on accounting policies applied, see the respective sections of Note C3.

### Revenue recognition

For a telecom operator, if and when revenue should be recognized requires management judgment in a number of areas.

#### Principal or agent – gross versus net presentation

When the group acts as a principal, income and payments to suppliers are reported on a gross basis in revenue and operating costs. If the group sells goods or services as an agent (for example insurance in some countries) revenue and payments to suppliers are recorded in revenue on a net basis, representing the margin/commission earned.

Whether the group is considered to be principal or agent in a transaction depends on analysis by management of both the legal form and substance of the agreement between the group and its business partners; such judgments impact the amount of reported revenue and operating expenses but do not impact net income or cash flows.

Features indicating that the group is acting as a principal include: it has the primary responsibility for fulfilling the promise to provide the goods or

services, it bears the inventory risk, and the group has latitude in establishing prices or provides additional goods and services. If the group does not have control of the goods or services before they are transferred to the customer, it acts as an agent. For insurance services, the key judgement is based on whether Telia Company bears the insurance risk or not. Telia Company is deemed to be acting as an agent if it does not bear the insurance risk. For other types of digital value added services the key judgement is related to assessment of whether Telia Company has the primary responsibility for fulfilling the promise to provide the service. In this assessment the terms of the contract, the way the service is sold, the level of interaction with the customer before, during and after delivering the service and the technical delivery of the service are considered among other things.

#### Bundling of products and services

In bundling of products and services, identifying performance obligations and determining the stand-alone selling prices requires management judgment. Revenue is allocated between the goods and services identified as a separate performance obligation based on their relative stand-alone selling price. The stand-alone selling price determined for goods or services may impact the timing of the recognition of revenue. Determining the stand-alone selling price of each performance obligation can require complex estimates if those are not directly observable. The group's estimation of stand-alone selling prices that are not directly observable are mainly based on expected cost plus a margin.

### Leases

#### Definition of a lease

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Significant management judgment is required in determining whether the contract is a lease or a service agreement. To determine if a contract is a lease an assessment of whether, throughout the period of use, the customer has both the right to obtain substantially all of the economic benefits from use of the identified asset and the right to direct the use of the identified asset. Especially for contracts for network related assets (technical space and technical equipment) where the contract is related to the use of a portion of a larger asset this assessment requires significant judgment and analysis of the contract terms and the facts and circumstances such as for example the technological aspects of the asset.

#### Lease term

Determining the lease term requires management judgment as the estimated lease term includes the non-cancellable period of the lease together with both periods covered by extension options, if the lessee is reasonably certain to exercise that option, and periods covered by termination options if the lessee is reasonable certain not to exercise that option. The threshold for reasonably certain is deemed to be higher than "more likely than not"; but lower than "virtually certain" in IAS 37 "Provisions, contingent liabilities and contingent assets". Extension and termination options are

included in a number of Telia Company contracts throughout all asset classes group. When determining the lease term, the Company considers all facts and circumstances that create an economic incentive to exercise an extension option, or not to exercise an extension option. Example of factors that are considered in determining the lease term are strategic plans, assessment of future changes, the importance of the underlying asset to Telia Company's operations and/or other contracts, and the nature of the underlying asset. Approximately 40% of Telia Company's lease liabilities relate to extension periods.

### Discount rate

The future lease payments are discounted to their present value using either the interest rate implicit in the contract or the rate that the lessee can readily determine. The discount rate is defined as the rate of interest that would have to be paid to borrow over a similar period of time, with a similar security, the funds necessary to obtain an asset of a similar value to the leased asset in a similar economic environment. Telia Company has discontinued lease payments using the incremental borrowing rate. Determining the incremental borrowing rate requires management judgment. The borrowing rate is based on Telia Company's estimated lease term. The rate is a rate for geographical risks and credit risks for subsidiaries. For additional information on carrying values, see Note C28.

### Income taxes

Significant management judgment is required in determining provisions for deferred tax liabilities and assets, in particular as regards valuation of deferred tax assets. As part of this process, income taxes have to be estimated in each of the jurisdictions in which Telia Company operates. The process involves estimating the actual current tax exposure together with assessing temporary differences resulting from the different valuation of certain assets and liabilities in the financial statements and in the tax returns. Management must also assess the probability that the deferred tax assets will be recovered from future taxable income.

Actual results may differ from these estimates due to, among other factors, future changes in business environment, currently unknown changes in income tax legislation, or results from the final review of tax returns by tax authorities or by courts of law. For additional information on deferred tax assets and liabilities and their carrying values as of the end of the reporting period, see Note C10.

### Valuation of intangible and other non-current assets

Intangible assets, property, plant and equipment, right of use assets, film and program rights and cost to obtain a contract represent a significant part of Telia Company's total assets.

#### Useful lives

Determination of the useful lives of asset classes involves taking into account historical trends and making assumptions related to future socio-economic and technological development and expected changes in market behavior.

In 2023 and 2022, amortization, depreciation and impairment losses for intangible assets, property, plant and equipment and right of use assets in continuing operations totaled SEK 23,517 million and SEK 37,445 million, respectively. Amortization and impairment losses in continuing operations for film and program rights and cost to obtain a contract were SEK 5,908 million (5,557) and SEK 1,117 million (1,095), respectively. For additional information on intangible and tangible assets, right of use assets, film and program rights and costs to obtain a contract subject to amortization and depreciation and their carrying values as of the end of the reporting period, see Notes C6, C7, C12, C13, C14 and C28, respectively.

### Currently, the following amortization and depreciation rates are applied.

Trade names	Individual evaluation, minimum 10%, except for trade names with indefinite useful lives
Telecom and frequency licenses, numbering rights	Remaining license period, minimum 5%
Interconnect and roaming agreements	Agreement term, based on the remaining useful life of related license
Customer relationships	Individual evaluation, based on historic and projected cash flows
Capitalized development expenses	20% or individual evaluation
Other intangible assets	20–33% or individual evaluation
Buildings	2–10%
Land improvements	2%
Capitalized improvements on leased premises	Remaining term of corresponding lease
Mobile networks (base stations and other installations)	14.5–20%
Switching systems and transmission systems	10–20%
Transmission media (cable)	5–10%
Equipment for special networks	10%
Usufruct agreements of limited duration	Agreement term or time corresponding to the uncertainty of cash flows
Other installations	2–33%
Customer premises equipment under service arrangements	33%, or agreement term if longer
Film and program rights	20–100%
Cost to obtain a contract	Straight line, based on historic and projected cash flows
Right-of-use assets	Expected lease term, 3–50%

### Impairment testing

A number of significant assumptions and estimates are involved when measuring value in use and fair value less costs of disposal based on the expected future discounted cash flows attributable to an asset, for example with respect to factors such as market growth rates, revenue volumes, market

prices for telecommunication services, maintain and develop communication and working capital requirements. For future cash flows are based on the best estimate of future cash flows and operating expenses, historical trends, general market conditions and industry trends and forecasts and other

information. These assumptions are prepared by management and subject to review by the Audit Committee of the Board of Directors. Potential significant climate related risks (as well as other types of risks in Telia Company's Risk Universe) and the group's ongoing and future mitigating activities are reflected in the forecasts. Climate related risks are considered through, for example, the sales growth forecasts which include offerings based on circular business models (e.g. sales of pre-owned and refurbished phones, Device as a Service, buy back initiatives and repair services to enable reuse and recycling) and products and services that enable our customers to reduce GHG emissions and energy use (e.g. remote meetings, IoT and other data-driven services). Further the EBITDA-margin and CAPEX-to-sales forecasts include impacts of higher energy prices and Telia Company's activities to manage the energy impacts and costs. The CAPEX-to-sales forecasts are considering that investment decisions are preceded by environmental screening of energy consumption, waste and GHG emissions, which in turn affects for example product and service development and network construction. The group-wide re-use and recycling program for network equipment is part of the forecasts.

For more information on climate risks, goals and activities, see Directors' Report section Risks/Environment and Sustainability report section Climate and circularity including the TCFD report in Note S4.

The cash flow forecasts are discounted at the weighted average cost of capital for the relevant cash-generating unit. For Norway and Lithuania the CAPEX-to-sales ratio development in the forecast deviate from historical trends. In the forecast

period the investments levels are lower as the peak of 5G modernization has been passed. For TV and Media the sales growth and the adjusted EBITDA-margin development in the forecast deviate from historical trends. Both the sales growth and the adjusted EBITDA-margin are expected to recover from the large drop in the Swedish advertising market in 2023. For additional information on goodwill and its carrying value as of the end of the reporting period, see Note C12.

### Provisions for pensions and employment contracts

The most significant assumptions that management has to make in connection with the actuarial calculation of pension obligations and pension expenses affects the discount rate, the inflation, and the longevity. Changes in any of these key assumptions may have a significant impact on the projected benefit obligations, funding requirements and periodic pension cost.

For additional information on assumptions made, sensitivity analysis related to change in assumptions and pension obligations and their present values as of the end of the reporting period, see Note C22.

### Provisions for asset retirement obligations and litigation

The provisions for asset retirement obligations (AROs) represent the group's best estimate of the future costs for handling hazardous waste such as worn-out telephone poles impregnated with creosote or arsenic and dismantling and restoration of mobile and fixed network sites. Estimating the ARO provisions requires significant judgment regarding the estimation of future cost for dismantling and restoration as well as the timing for settlement. The dismantling and restoration costs are impacted by

uncertainty relating to future price development and how the dismantling and restoration work will be performed. There is also significant uncertainty related to the timing of the settlement as this is impacted by Telia Company's network strategy and dismantling plans, contract renewal options for site leases, technology changes and other factors.

Determination of the treatment of provisions and contingent liabilities related to litigation is based on management's view of the expected outcome of the applicable case. Litigation provisions and contingent liabilities are uncertain in nature and the assessment of probability and possible outcome includes significant judgment. Management consults with legal counsel, and other experts both within and outside the company on matters related to litigation. The litigation assessment considers the nature and the progress of the case, the claimed amount, outcome in similar cases and other factors. Due to the uncertainties, the actual costs for litigations and AROs and litigations may differ from current provision estimates.

For additional information on ARO provisions including their carrying values as of the end of the reporting period, and on contingencies and litigation, see Notes C23 and C30.

### Accounts payables under vendor financing arrangements

Telia Company has arrangements with several banks under which the banks offer Telia Company's vendors the option to receive earlier payment of Telia Company's accounts payables. Vendors utilizing the financing arrangement pay a credit fee to the bank. From the second quarter 2023 the vendor financing portfolio also includes arrangements

where the supplier issues a trade financing instrument, subsequently assigned to a bank by the supplier, and offers Telia Company the payment terms in exchange for a consideration paid by Telia Company. Telia Company's vendor financing portfolio includes earlier payment for the vendors and earlier payment terms for Telia Company. Telia Company uses all of the arrangements in the vendor financing portfolio as integrated parts of the relationships with the vendors and the part of the working capital in Telia Company's operating cycle. Telia Company do not have any additional collateral or guarantors. Based on Telia Company's assessment of the vendor financing arrangements under the vendor financing agreements closely related to operating purchases and the financing arrangement does not represent any significant change in the nature or the liabilities. These liabilities in the vendor financing portfolio are therefore classified as payables. The credit period does not exceed 30 months and the accounts payable are not discounted. Accounts payable under vendor financing arrangements were SEK 11,500 million as of December 31, 2023 (11,500). See Note S4.

## C3. Material accounting policies

### Consolidated financial statements

#### General – Subsidiaries

The consolidated financial statements comprise the parent company Telia Company AB and all entities over which Telia Company has control. Telia Company is assumed to have control if the group owns the majority of shares and voting rights, and a proportionate entitlement to a share of the returns of the entity and decisions about relevant activities are determined by majority votes. Telia Company is also assumed to have control if Telia Company selects the majority of the board contractually even if not holding the majority of the shares.

Acquisitions are accounted for using the acquisition method which measures goodwill at the acquisition date as: the fair value of the consideration transferred; plus the amount of any non-controlling interest in the acquiree recognized in the transaction; plus if the business combination is achieved in stages, the fair value of the previously held equity interest in the acquiree; less the net fair value of the identifiable assets acquired and liabilities assumed. Costs related to the acquisition are expensed as incurred.

Acquisition of additional shares in a subsidiary after obtaining control as well as a partial disposal of shares in a subsidiary while retaining control are accounted for as equity transactions with owners. See section "Non-controlling interests" below.

Intra-group balances transactions, income and expenses, have been eliminated in the consolidated financial statements.

#### Non-controlling interests

Transactions with non-controlling interests are treated as equity transactions, including any transaction-related costs. Gains or losses on disposals as well as any excess or deficit of consideration paid over the carrying amount of non-controlling interests when acquiring additional shares in a subsidiary are recognized in retained earnings.

For each business combination the group has a choice to measure any non-controlling interest in a subsidiary either at fair value (goodwill recognized on non-controlling interest) or only at the proportionate share of the net assets (goodwill recognized only on acquired interest). In general, Telia Company measures non-controlling interests at the proportionate share of the net assets.

#### Joint arrangements

Joint arrangements are entities over which the group has joint control by virtue of contractual arrangements. Joint arrangements are classified as either joint operations or joint ventures. Joint operations are arrangements whereby Telia Company has the right to the assets and obligation for the liabilities and account for its share of the assets, liabilities, revenue and expenses of the joint operation line by line in the consolidated financial statements. The joint operations are primarily designed for providing output to the shareholders, for Telia Company mainly in form of network-sharing.

Joint ventures are arrangements where Telia Company has right to the net assets of the arrangement and the investment is accounted for under the equity method (similar to associated companies - see section below).

#### Associated companies

Associated companies are entities over which the group has significant influence but not control. If the group holds, directly or indirectly (e.g. through subsidiaries), 20% or more of the voting power of the investee, it is presumed that the group has significant influence, unless it can be clearly demonstrated that this is not the case. Holdings in associated companies are accounted for using the equity method and are initially recognized at cost, including any transaction costs. The group's share of net income in associated companies is included in operating income because the operations of these companies are related to telecommunications and it is the group's strategy to capitalize on industry know-how by means of investing in partly owned operations.

The line item Income from associated companies and joint ventures also includes amortization of fair value adjustments and other consolidation adjustments made upon the acquisition of associated companies as well as any subsequent impairment losses on goodwill and other intangible assets, and capital gains and losses on disposals of stakes in such companies. When selling a subsidiary to an associated company transaction gain or loss is recognized in full without any elimination.

Dividend received reduces the carrying amount of an investment. Negative equity participations in associated companies are recognized only to the extent contractual obligations to contribute additional capital exist and are then recorded as Other provisions.

#### Cash flow reporting

Cash flows from operating activities are using the indirect method and include cash received from associated companies equity instruments, interest paid or received (except for paid interest capitalized as acquisition or construction of non-current assets) and therefore included in cash flows from operating activities, provisions, compensation for contributions to the Swedish pension fund paid or refunded. Changes in non-interest receivables and liabilities are reported in working capital. Cash flows from operating activities also includes cash flows from financing rights and from accounts payable and financing arrangements.

Cash flows from investing activities include payments to acquire or receive from joint ventures, associates, subsidiaries (or losing control) net of cash and cash equivalents or disposed of and other investments. Further, cash flows from investments include payments related to lease receivables as well as other investments with maturity months.

Cash flows from financing activities include dividends paid to owners of the parent and from non-controlling interests, changes in ownership of non-controlling interest and cash flows from settlement of exchange derivative contracts used for hedges of cash-pool balances including payments or receipts from CSA Credit Su-

Proceeds from and repayment of borrowings include cash flows from derivatives hedging such borrowings. Further, cash flow from financing activities also includes repayments of lease liabilities.

Cash and cash equivalents include bank deposits and highly-liquid short-term investments with maturities up to and including 3 months.

### Segment reporting

The group's businesses are managed and reported by the six continuing operating segments: Sweden, Finland, Norway, Lithuania, Estonia, TV and Media and the discontinued operation Denmark. Operating segments that are not individually reportable (Latvia and Telia Finance) and Group functions are combined into Other operations. Segments are consolidated based on the same accounting principles as for the group as a whole except for inter-segment leases which are treated as operating leases. When significant operations are transferred between segments, comparative period figures are restated.

### Foreign currency translation

In preparing the financial statements, foreign currency transactions are translated at the exchange rates prevailing at the date of each transaction. At the end of each reporting period, monetary assets and liabilities denominated in foreign currencies are translated at the closing rates existing at that date. Exchange rate differences arising from operating receivables or liabilities are recognized in operating income, while differences attributable to financial assets or liabilities are recognized in finance items.

The consolidated financial statements are presented in Swedish krona (SEK), which is the functional currency of the parent company. For consolidation

purposes, income and expenses of foreign operations are translated at the average exchange rates for the period, except for material transactions for which foreign exchange rates at the date of the transactions are used. Assets and liabilities, are translated at closing rates at the end of the reporting period except for equity components, which are translated at historical rates. Translation differences are recognized in other comprehensive income and accumulated in equity.

When a foreign operation is disposed, any related cumulative exchange rate difference is recycled to net income as part of the gain or loss on the disposal, except for accumulated exchange rate differences related to non-controlling interests which are derecognized but not recycled to net income. However, if Telia Company would dispose a non-controlling interest in a foreign operation while retaining control, the relevant proportion of the cumulative amount is reattributed to non-controlling interests.

### Revenue recognition

Revenue principally consists of mobile service revenue including subscription, interconnect and roaming and fixed service revenue including telephony, broadband, TV, installation fees, and business solutions, as well as advertising revenue, revenue from equipment sales and leases. There is both revenue from products and services sold separately and from products and services sold as a bundle.

Revenue is allocated to performance obligations (equipment and services) in proportion to standalone selling prices of the individual items. Revenue is recognized when (at a point in time) or as (over a period of time) the performance obligations are satisfied, which is determined by the manner in which control passes to the customer.

Revenue is measured based on the consideration specified in a contract with a customer and excludes amount collected on behalf of third parties.

### Service revenue

Service revenue is recognized over time, in the period in which the service is performed, based on actual traffic or over the contract term, as applicable. Revenue from voice and data services is recognized when the services are used by the customer. Subscription fees are recognized as revenue over the subscription period. Sales relating to prepaid phone cards, primarily mobile, are deferred as a contract liability and recognized as revenue based on the actual usage of the cards.

Revenue from interconnect traffic with other telecom operators is recognized at the time of transit across Telia Company's network.

Installation services are in many cases considered separate performance obligations and revenue is recognized when or as the obligation is satisfied, depending on the type of installation service and how and when the control is transferred to the customer.

For open access fiber installed at customer's premises, non-refundable customer fees and related installation costs, including planning, trenching, cabling, splicing, mounting, connection, cross-connect equipment and media converter, are recognized when the installation is finalized. Connection fees are recognized separately at completion of connection, if the fees do not include any amount for subsequent servicing but only cover the connection costs. Amounts for subsequent servicing are deferred.

To corporate customers, Telia Company provides complex, long-term functional services which could include telecom and data description services, installation services, telecom or datacom and other customer services. Typically, telecom and datacom services are considered separate performance obligations for each separate performance obligation. Revenue is recognized over the period of time that the service is provided, and the performance obligation is satisfied. Since the subscription service is functional, separate performance obligations are performed on a basis over the same period, these services practice accounted for in the same way as had been one performance obligation. Services in functional agreements are considered separate performance obligations. Revenue is recognized when or as the obligation is satisfied, depending on the type of service and how and when control is transferred to the customer. For many of the installation services, control is transferred, and revenue is recognized upon completion of the installation. Functional agreements often also include equipment services. In functional agreements there are also variable usage-based services and services. Each one of these services are considered separate performance obligations. Revenue is recognized over time. Revenue from the service is used as the obligation is satisfied, depending on the type of service and how and when control is transferred to the customer.

Invoices for mobile subscriptions, broadband telephony and other services are normally issued monthly, over the contract period.

### Equipment revenue

Revenue from equipment sales is recognized at the point in time when control is transferred to the customer, which normally is on delivery and when accepted by the customer. If the customer has the right to return the equipment, the amount of revenue recognized is adjusted for expected returns, estimated based on historical data. Equipment is paid for upfront or over time, when Telia Company provides the customer with financing.

Functional agreements with corporate customers often include equipment such as sales or financial leases of for example terminals (phones/tablets/LAN equipment etc.). The equipment is considered separate performance obligations and revenue from sale of equipment is recognized at the point in time when the performance obligation is satisfied, and control has been transferred (when the equipment have been delivered).

### Advertising revenue

The performance obligation for advertising is satisfied when the advertisement is actually shown, published or displayed and the revenue is recognized at that time. The revenue is reduced for rebates.

### Bundled services and products

Telia Company may bundle services and products into one customer offering. Offerings may involve the delivery or performance of multiple products, services, or rights to use assets (multiple deliverables). Telia Company accounts for each individual product and service separately if they are distinct – i.e. if a product or service is separately identifiable from other items in the bundled package and if a customer can benefit from it. When the transaction price is determined for bundles that includes

services (e.g. a mobile subscription), the minimum non-cancellable contract term is considered. When applicable, the transaction price is adjusted for financing components and expected returns. There are usually no or few other variable components in the transaction price. The transaction price is allocated to each equipment and service accounted for as a separate performance obligation, based on their relative stand-alone selling price. For most performance obligations, the stand-alone selling prices are directly observable. If stand-alone selling prices are not directly observable, they are estimated based on expected cost plus margin. In some cases, the offerings include non-refundable upfront fees such as activation fees. Payments for such fees are included in the transaction price, and, if not related to the satisfaction of a performance obligation, allocated to other performance obligations identified in the contract.

Some bundled offerings include lease components, e.g. TV boxes, as well as non-lease components, e.g. subscription. In those arrangements, the transaction price is allocated to both the lease components and non-lease components identified as separate performance obligations. The lease components are then accounted for as either an operating lease or a finance lease depending on the lease classification (see also section "Lease agreements, Telia Company as a lessor" below). Revenue for the non-lease components is recognized when or as the performance obligations are satisfied.

Equipment that can be used only in connection with services provided by Telia Company and that have no other significant function for the customer than delivering the service, e.g. routers, is not accounted for as a separate performance obligation. In such arrangements, the transaction price is allocated to

the performance obligations identified, i.e. no part of the transaction price is allocated to the equipment. Any consideration received upfront, when the equipment is delivered, is recognized as a contract liability and recognized as revenue when or as the identified performance obligations are satisfied.

If a contract with a customer includes a license that is distinct, the promise to grant a license is classified as either a "right to access" or a "right to use" Telia Company's intellectual property. A license is classified as a "right to access" if Telia Company will undertake activities that significantly affects the intellectual property, that do not result in the transfer of a separate performance obligation to the customer, and, the customer is directly exposed to any positive or negative effects of those activities. When the promise to grant a license is classified as a "right to access", revenue are recognized over time. When the promise to grant a license is classified as a "right to use", revenue is recognized at the point in time when control is transferred to the customer.

### Principal or agent

Sometimes a third party is engaged in delivering goods or services to Telia Company's customers, e.g. Telia Company offers several value-added services (VAS) to the customers in bundled offerings.

In arrangements where Telia Company acts as a principal, revenue is recognized on a gross basis. When Telia Company acts as an agent and arranges goods or services to be provided by another party, revenue is recognized as the net amount of consideration that Telia Company retains after paying that other party. When invoicing end-customers for third-party content services, amounts collected on behalf of the principal are

excluded from revenue. For more information see Note C2.

### Other revenue related transactions

Under customer loyalty programs, customers are entitled to certain discounts relating to goods provided by Telia Company. The program provides the customers with a right which is accounted for as a separate performance obligation. The transaction prices are between the services and goods provided, the material right based on relative stand-alone selling prices. The stand-alone selling price is estimated based on the material right is estimated based on the granted and the likelihood of redemption based on past practice. A contract liability is recognized until the material right expires.

Some contracts contain a financing component because the timing of payments provided to customer with a benefit of financing. When determining the transaction price for such contracts, Telia Company adjusts the promised amount for the effects of the time value of money. Telia Company uses the practical expedient to not calculate and account for significant component if the period between the sale of a good or service to a customer and 12 months or less.

Telia Company distinguishes between assets and receivables based on when the consideration is conditional on other than passage of time. Contracts that primarily relate to transactions where Telia satisfies a performance obligation to transfer equipment that is part of a bundle to the customer, but the right to payment for the

is dependent on Telia Company satisfying another performance obligation in the contract, for example a mobile subscription. The contract assets are transferred to receivables when the right becomes unconditional, i.e. when only the passage of time is required before payment of consideration is due. Contract liabilities primarily relate to prepayments received from customers such as prepaid cards and prepaid subscriptions.

If expected to be recovered, costs to obtain a contract such as sales commissions and equipment subsidies granted to dealers for obtaining a specific contract are capitalized and deferred over the period which Telia Company expects to provide services to the customer. The asset (included in balance sheet line item Other non-current assets) is amortized on a straight-line basis. Amortization of costs to obtain a contract is included in the line-item Other external expenses (within EBITDA) in the income statement.

### Operating expenses

Telia Company presents its analysis of expenses using a classification based on nature.

Goods and services purchased includes goods and sub-contracting services purchased, change in inventories, interconnect and roaming expenses as well as other network expenses. Other external expenses includes marketing expenses, IT expenses and consultancy fees and other external expenses. The line-item Depreciation, amortization and impairment relates to property, plant and equipment, intangible assets and right-of-use assets. Amortization and impairment of film and program rights are included in the line-item Goods and services purchased and amortization of costs

to obtain a contract is included in the line-item Other external expenses.

Advertising and other marketing costs are expensed as incurred. All pension benefit costs except for the interest component are recognized as personnel expenses. For equity-settled share-based payments to employees, such as Telia Company's Performance Share Programs, cost, being the fair value at the allotment date of the equity instruments allotted, is recognized as personnel expenses allocated over the vesting period and with a corresponding increase in equity. Cost is based on the best available estimate of the number of equity instruments to vest. If necessary, the estimate is revised during the vesting period and finally revised at the end of the vesting period.

### Other operating income and expenses

Other operating income and other operating expenses include gains and losses, respectively, on disposal of shares or operations in subsidiaries (see section "Associated companies" above) and disposal of intangible assets or property, plant and equipment.

Also included in other operating income and expenses are, government grants, exchange rate differences on operating transactions, results from court-settled disputes with other operators regarding historical interconnect and roaming fees and other similar items. Government grants are initially measured at fair value and recognized as income over the periods necessary to match them with the related costs.

Exchange rate differences from operating transactions also include effects from economic hedges and value changes in derivatives hedging

operational transaction exposure (see section "Derivatives and hedge accounting" below).

### Finance income and finance costs

Interest income and expenses are recognized using the effective interest rate method. Finance income and finance costs include net changes in fair value of derivatives that hedge financial transactions, but for which hedge accounting is not applied. Finance income and finance costs also include ineffectiveness on hedging relationships related to financial transactions. Exchange rate gains and losses on financial transactions are presented net.

### Income taxes

Current and deferred tax are recognised in net income, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

Deferred income taxes are provided in full on temporary differences arising between the tax bases of assets and liabilities and their carrying values in the consolidated financial statements and on unutilized tax deductions or losses. Deferred tax assets are recognized to the extent that the ability of utilizing the tax asset is probable

Deferred tax liabilities for undistributed earnings or temporary differences related to investments in subsidiaries, joint ventures and associated companies are not recognized because such retained earnings can be withdrawn as non-taxable dividends and the companies can be sold without tax consequences. In certain countries such as Latvia and Estonia, income tax is levied on dividends paid or declared. For these countries deferred tax is

recognized on undistributed earnings tax is recognized in the period when dividends are made.

Effects of changes in tax rates are recognized in the period when the change is substantively enacted.

Pillar Two legislation has been enacted in certain jurisdictions within Company operates. The legislation will for the group's financial year beginning 2024. Telia Company has applied the exception from the accounting requirements for deferred taxes related to Pillar Two taxes. Accordingly, Telia Company neither discloses information about assets and liabilities related to Pillar Two taxes.

Deferred tax assets and liabilities are legally enforceable right exists to set assets against current income tax liabilities deferred taxes relate to the same taxation authority.

Interest on current tax payable or refundable by tax authorities is classified as expenses and Other interest income.

### Intangible assets and plant and equipment

#### Measurement

Goodwill is measured at cost less any impairment losses. Goodwill impairment is not reversed.

Other intangible assets are measured including directly attributable borrowing

less accumulated amortization and any impairment losses. Direct external and internal development expenses for new or substantially improved products and processes are capitalized, provided that future economic benefits are probable, costs can be measured reliably and the product and process is technically and commercially feasible. Activities in projects at the feasibility study stage as well as maintenance and training activities are expensed as incurred.

Property, plant and equipment are measured at cost, including directly attributable borrowing costs, less accumulated depreciation and any impairment losses. Software used in the production process is considered to be an integral part of the related hardware and is capitalized as plant and machinery.

Property and plant under construction are valued at the expense already incurred, including interest during the installation period. To the extent a legal or constructive obligation to a third party exists, the acquisition cost includes estimated costs of dismantling and removing the asset and restoring the site. A change in estimated expenditures for dismantling, removal and restoration is added to and/or deducted from the carrying value of the related asset. To the extent that the change would result in a negative carrying value, this effect is recognized in net income. The change in depreciation charge is recognized prospectively.

Capitalized interest is calculated, based on the group's estimated average cost of borrowing.

Government grants received as compensation for the cost of an asset are initially measured at fair value, normally being the consideration received. A

government grant reduces the carrying value of the related asset and the depreciation charge recognized over the asset's useful life.

#### Amortization and depreciation

Amortization of intangible assets (other than goodwill and trade names with indefinite useful lives) and depreciation of property, plant and equipment are based on cost, less residual values, and taking into account the estimated useful lives of various asset classes or individual assets. Land is not depreciated. Amortization and depreciation are recognized on a straight-line basis.

Amortization of network-independent licenses to use specific radio frequencies (spectrum) commences when the related frequency block is available for use. License fees based on future services, i.e. relating to the ongoing performance of the entity are not capitalized but expensed as incurred.

#### Impairment testing

Goodwill and other intangible assets with indefinite useful lives (TV and Media brands) and intangible assets not yet available for use are tested for impairment annually, and whenever there is an indication that the asset may be impaired. Intangible assets with a finite life and tangible assets are tested for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable.

Where it is not possible to estimate the recoverable amount of an individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is tested for impairment. Goodwill is, for impairment testing purposes, allocated to cash generating units in accordance with Telia

Company's business organization. Each country, and TV and Media constitute a separate cash-generating unit (CGU), which represent the lowest level at which goodwill is monitored for internal management purposes.

If an analysis indicates that the carrying value is higher than its recoverable amount, which is the higher of the fair value less costs to sell and value in use, an impairment loss is recognized for the amount by which the carrying amounts exceed the recoverable amount.

Value in use is measured based on the expected future discounted cash flows (DCF model) attributable to the asset.

#### Film and program rights

Film and program right assets and related liabilities are recognized in the statement of financial position when the license period begins, the cost can be measured reliably, the content has been accepted by the group in accordance with the license agreement and the film or program is available for its first showing/broadcasting. The assets are presented in separate line items for non-current and current film and program rights in the consolidated statement of financial position. Film and program rights are recognized at cost less accumulated amortization and any impairments. Future payment commitments for contractual film and program rights not recognized in the statement of financial position are disclosed as contractual commitments. Film and program rights are amortized over the useful life which is based on the license period or number of showings. Amortization of film and program rights is included in the line-item Goods and services purchased in the income statement (within EBITDA). Cash flows relating

to program rights are classified within activities.

## Financial instruments

**Recognition and initial measurement**  
Accounts receivables and debt securities are initially recognized when they are Telia Company. "Regular-way" acquisition assets are recognized on the date the instrument is actually transferred to Telia, i.e. the settlement date. All other financial and financial liabilities are initially recognized when Telia Company becomes a part to the provisions of the instrument.

Financial assets and financial liabilities recognized at fair value plus/less transactions that are directly attributable to the financial asset or liability. However, costs related to instruments of fair value income statement are expensed as incurred.

## Classification and subsequent measurement of financial assets

A financial asset is for measurement purposes initially classified into one of three measurement categories. The classification depends on whether the asset is managed (business model) and characteristics of the asset's contractual cash measurement categories for financial follows:

- Financial assets at fair value through statement (profit or loss)
- Financial assets at fair value through comprehensive income
- Financial assets at amortized cost

### Investments in bonds

Telia Company holds a portfolio of bonds that is managed on the basis of its fair value, which is also how the performance of the portfolio is reported internally within Telia Company. There is a high frequency of sales of assets within the portfolio. Consequently, the portfolio is classified as at fair value through income statement.

In addition, certain Group companies that are under regulatory supervision hold portfolios of bonds in order to meet regulatory liquidity requirements. These portfolios are held within a business model whose objective is achieved by both collecting contractual cash flows and by selling the assets in the portfolio. As the contractual terms of the bonds in the portfolios also give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding, the portfolios are classified as at fair value through other comprehensive income.

### Investments in equity instruments

Telia Company has elected to present changes in fair value of equity instruments in other comprehensive income.

### Short-term investments included as cash equivalents

Short-term investments are measured at fair value through income statement.

### Derivatives that are assets

Derivatives financial instruments with a positive fair value for Telia Company are recognized as assets and classified as financial assets at fair value through income statement unless hedge accounting is applied.

### Other financial assets

All of Telia Company's other financial assets are classified as financial assets at amortized cost.

### Classification and measurement of financial liabilities

After initial recognition, all Telia Company's financial liabilities are measured at amortized cost under the effective interest rate method, except for derivatives that constitute liabilities which are measured at fair value. Financial liabilities that constitute hedged items in hedges of fair value are remeasured at fair value in respect of the hedged risk during the period of the hedging relationship.

### Derecognition of financial assets

In some markets, Telia Company has arrangements in place with a third party under which rights to cash flows from trade receivables are transferred to the third party. The transactions under these arrangements qualify as transfers of the underlying financial assets under the so-called "pass-through" criteria in IFRS 9. The third party also assumes substantially all the credit risk and other financial risks of the underlying assets. Receivables included under such arrangements are therefore derecognized in full when the contractual rights to the cash flows are passed to the third party. An expense is recognized upon derecognition based on the difference between the carrying amount of the financial asset derecognized and the consideration paid by the third party for the rights to the cash flows from the asset.

### Impairment of financial assets

A loss allowance is recognized for financial assets measured at amortized cost, lease receivables, financial assets measured at fair value through other comprehensive income and for contract

assets. The loss allowance is measured at an amount equal to lifetime expected credit losses, except for the following, for which the loss allowance is measured at an amount of twelve months expected credit losses:

- Financial assets that are determined to have low credit risk at the reporting date
- Financial assets for which the credit risk has not increased significantly since initial recognition

### Fair value hierarchy levels

The carrying values of classes of financial and liabilities measured at fair value are determined based on a three-level fair value hierarchy as follows.

The loss allowance for trade receivables and contract assets is always measured at an amount equal to lifetime expected losses applying the simplified

### Level Fair value determination Comprises

1	Quoted (unadjusted) prices in active markets for identical assets or liabilities	Primarily bonds measured at fair value other comprehensive income or at fair income statement
2	Inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly (prices) or indirectly (derived from prices)	Derivatives designated as hedging instruments measured at fair value through other comprehensive income
3	Inputs for the asset or liability that are not based on observable market data (unobservable inputs)	Unquoted equity instruments measured through other comprehensive income

Inputs for fair value measurements disclosed for assets and liabilities that are not carried at fair value are categorized to hierarchy 2.

### Fair value estimation

The fair values of financial instruments traded in active markets are based on quoted market prices at the end of the reporting period. For financial assets, the current bid price is used. The fair values of financial instruments that are not traded in active markets are determined by using valuation techniques. Management uses a variety of methods and makes assumptions that are based on market conditions existing at the end of the reporting period. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows (DCF analyses), are used to determine fair value for the remaining financial instruments. DCF analyses are performed using the applicable yield curve for the duration of the instruments for non-optional derivatives, and option pricing models for any optional derivatives. Forward exchange contracts are measured using quoted forward exchange rates and yield-curves derived from quoted interest rates matching maturities of the contracts. Interest rate swaps are measured at the present value of future cash flows, estimated and discounted based on the applicable yield-curves derived from quoted interest rates.

Telia Company's primary valuation technique for unquoted equity instruments is based on the most recent transaction for the specific company if such transaction has been recently done. Adjustments to the carrying value are made to reflect significant changes in circumstances since the transaction date if Telia Company assess that the changes will have a material impact on the fair value. The estimated fair value for material unquoted equity instruments is verified by applying other valuation models in the form of valuation multiples from

peers on relevant financial and operational metrics. Quoted equity instruments are valued at quoted market price.

### Accounts payable under vendor financing arrangements

Based on Telia Company's assessment the liabilities under vendor financing arrangements are closely related to operating purchase activities and the financing arrangement does not lead to any significant change in the nature or function of the liabilities. The liabilities in the vendor financing portfolio are therefore classified as accounts payable. The credit period does not exceed 12 months and the accounts payables are therefore not discounted.

### Derivatives and hedge accounting

Derivatives with a positive fair value are recognized as non-current or current receivables and derivatives with a negative fair value as non-current or current liabilities. Swaps and forward exchange contracts are classified as non-interest-bearing and interest rate swaps and cross-currency interest rate swaps as interest-bearing items.

### Fair value hedges of interest rate risk in borrowings

Telia Company has identified interest rate swaps as hedging instruments in fair value hedges of interest rate risk in fixed-rate borrowings. The hedging instruments are measured at fair value with changes in fair value recognized in income statement, whereas the hedged items are re-measured to fair value in respect of the hedged risk during the period of the hedging relationship with changes in fair value also reported in income statement. Hedge ineffectiveness is reported as Finance income or Finance costs. The group has in

certain cases also identified interest rate swaps as hedging instrument in hedge relationships where the hedged item is an aggregate exposure consisting of a borrowing and a derivative as is permitted under IFRS 9.

### Cash-flow hedges of foreign currency and interest rate risk in borrowings

When borrowings are made in foreign currencies, Telia Company uses cross-currency interest rate swaps (CCIRS) to hedge the foreign currency exposure from such borrowings. The hedges are identified as cash flow hedges of both foreign currency risk and interest rate risk. Telia Company has chosen to the exclude foreign currency basis spreads in the CCIRSs from the hedging relationship and to account for the currency basis spread as cost of hedging. The change in fair value on the hedging instrument related to the currency basis spread is recognized in other comprehensive income and accumulated in the Cost of hedging reserve in equity.

The effective portion of the change in fair value of the CCIRSs is recognized in other comprehensive income and accumulated in the Hedging reserve in equity and reclassified to income statement in the same periods as the group report interest on the borrowings and spot re-measurement of the hedged borrowings. Any ineffectiveness on the hedges is reported in income statement within Finance income or Finance costs.

### Cash flow hedges of foreign currency risk in purchases of film and program rights

Telia Company frequently pays for film and program rights in foreign currencies. This leads to a currency exposure between the currency in which

Telia Company will pay for the film and rights and the functional currency of the within the group that has the obligation the liability to the supplier of the film rights. The group hedges such exposures as forward contracts. The forwards are as cash flow hedges. Changes in the hedges are reported in other comprehensive income and accumulated in the Hedging reserve in equity. The amount recognized in the reserve is transferred directly from equity film and program right is acquired and in the initial cost of the asset for the film program right.

### Economic hedges

The group uses derivatives to economically hedge exposures, for which hedge accounting is applied. Changes in the fair value of derivatives that economically hedge either the debt or the group's holdings in the bond portfolio are recognized within Finance income and costs. Changes in the fair value of derivatives that economically hedge operating cash flows are recognized within Other operating income and operating expenses.

### Hedges of net investments in foreign operations

Any gain or loss on the hedging instrument to the effective portion of a hedge of net investments in foreign operations is recognized in comprehensive income and accumulated in Foreign currency translation reserve in Other comprehensive income. Gains and losses deferred in the Foreign currency translation reserve are not recycled to the profit or loss until disposal of the foreign operation.

### Power purchase agreements (PPAs)

Telia Company has entered into power purchase agreements to procure renewable electricity. The power purchase agreements require Telia Company to pay for physically delivered electricity that is used for Telia Company's own usage requirements and there are no contractual rights to settle the contracts net in cash. Telia Company therefore considers the power purchase agreements to fall under the so called "own-use exemption" and has consequently not accounted for the agreements as derivative financial instruments. The price paid for the purchased electricity is instead recognized as expenses in the period the electricity is delivered and used.

### Repurchase agreements

Repurchase agreements, means that the parties have agreed on sale and repurchase of a certain security, at a predetermined price and point in time. Since Telia Company remains exposed to the risk and rewards of the asset during the transaction period, securities remain accounted for in the balance sheet as financial assets. Received cash is accounted for as financial liabilities. Sold securities are also disclosed as pledged assets.

### Inventories

Inventories are carried at the lower of cost and net realizable value. Obsolescence is assessed with reference to the age and rate of turnover of the items.

### Assets held for sale and discontinued operations

Non-current assets and disposal groups are classified as held for sale if their carrying value will be recovered principally through a sale transaction rather than through continuing use. A non-current

asset (or disposal group) held for sale is measured at the lower of its previous carrying value and fair value less costs to sell.

One of the conditions that must be satisfied for an asset to be classified as held for sale is that the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. For the sale to qualify as highly probable the appropriate level of management must be committed to a plan to sell the asset or disposal group in its present condition and actions required to complete the plan should indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn. Telia Company's assessment is that in most cases these criteria are not met before final and binding sales agreements have been signed.

In the telecom industry acquisitions often require regulatory approval. If the buyer is a telecom operator in the same market parties often have to agree to a number of remedies to get the approval. If the buyer is expected to be a telecom operator in the same market and significant remedies are expected, a sale is usually not regarded as highly probable and consequently the assets are not classified as held for sale by Telia Company, until the remedies are agreed upon and accepted by management.

### Equity attributable to owners of the parent

Equity attributable to owners of the parent is divided into share capital, other contributed capital, hedging reserve, cost of hedging reserve, fair value reserve, foreign currency translation reserve, equity transaction in associates and retained earnings. Share capital is the legally issued share capital.

Other contributed capital comprises contributions made by shareholders in the form of share premiums in connection with new share issues, specific share holder contributions, etc. This item is reduced by reimbursements to shareholders made in accordance with separately decided and communicated capital repayment programs (e.g. through purchasing own shares or extraordinary dividends). The hedging reserve as well as the cost of hedging reserve and the foreign currency translation reserve are reclassified to net income. The fair value reserve includes both debt instruments at fair value through OCI which are reclassified to net income, and equity instruments at fair value through OCI which are not classified to net income. Cash flow hedges may also adjust the initial cost of a non-financial asset or liability. Equity transactions in associates are the effect on the group from equity transactions such as buy-back of shares from third parties by an associated entity. All other equity is retained earnings.

Dividend payments are proposed by the Board of Directors in accordance with the regulations of the Swedish Companies Act and decided by the general meeting of shareholders. The proposed cash dividend will be recorded as a liability immediately following the final decision by the shareholders.

### Provisions for pensions and employment contracts

Telia Company provides defined contribution or defined benefit pension plans to its employees. Contributions to defined contribution plans are normally set at a certain percentage of the employee's salary. Telia Company pays fixed contributions to separate legal entities and will have no legal or constructive obligation to pay further amounts if the fund does not hold sufficient assets to pay all

employee benefits. Contributions to defined benefit pension plans are expensed when employee services entitling them to the contributions are provided.

Defined benefit pension plans, provided by Telia Company employees in Sweden, Norway, means that the individual is guaranteed a pension equal to a certain percentage of salary. The pension plans mainly include pension, disability pension and family present value of pension obligations. Costs are calculated annually, using the unit credit method, which distributes the employee's service period. The present value of pension obligations is recognized in three components, service interest and remeasurements. Service interest is recognized as personnel expenses and remeasurements are recognized as financial items. Based on discount rate, on defined benefit and plan assets is reported as interest or interest expenses in financial items.

Changes in actuarial assumptions and adjustments of obligations and change of value of plan assets, deviations from results in remeasurements are recorded in Other comprehensive income at the reporting period.

Actuarial assumptions are determined of the reporting period. The assets of the company's pension funds constitute the assets and are valued at fair value at reporting period.

Net provisions or assets for post-employment benefits in the statement of financial position is the present value of obligations at the reporting period less the fair value of

### Other provisions and contingencies

A provision is recognized when Telia Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. If the likelihood of an outflow of resources is less than probable but more than remote, or a reliable estimate is not determinable, the matter is disclosed as a contingency provided that the obligation or the legal claim is material.

Provisions are measured at management's best estimate, at the end of the reporting period, of the expenditure required to settle the obligation, and are discounted to present value where the effect is material.

Provisions for asset retirement obligations (AROs) mainly refer to handling hazardous waste such as worn-out telephone poles impregnated with creosote or arsenic and to dismantling and restoration of mobile and fixed network sites. ARO provisions are initially recognized with a corresponding increase of the related asset within property, plant and equipment, which is subsequently depreciated over the useful life of the asset. Subsequent adjustments of the ARO provision based on changes in estimated dismantling and restoration costs or changes in discount rates are recognized with a corresponding increase/decrease of the carrying value of the related property, plant and equipment asset.

Other provisions comprise restructuring provisions which include termination benefits, onerous

contracts and other expenses related to cost reduction programs, post-acquisition integration programs, closing-down of operations, etc.

Termination benefits are recognized at the earlier of when Telia Company no longer can withdraw the offering of those benefits or when Telia Company has made an appropriate public announcement, specifying the terms of redundancy and the number of employees affected, or after individual employees have been advised of the specific terms.

### Lease agreements

#### Telia Company as lessee

Telia Company recognizes a right-of-use asset and a lease liability on the statement of financial position when the underlying asset is made available for Telia Company, i.e. at the commencement date. Telia Company applies the practical expedients to recognize payments associated with current leases and leases of low value as an expense in the income statement. Telia Company does not apply IFRS 16 to intangible assets.

The lease liability is initially measured at the present value of the lease payments during the estimated lease term that are not paid at the commencement date. Lease payments included in the measurement of the lease liability comprise of fixed lease payments including in-substance fixed payments, variable lease payments that depend on an index or a rate, amounts expected to be payable under a residual value guarantee and payments related to options that Telia Company is reasonably certain to exercise. In all asset classes, payments

related to non-lease components are separated from the lease payments and expensed as incurred.

The estimated lease term includes the non-cancelable period of the lease together with both periods covered by extension options (if Telia Company is reasonable certain to exercise that option) and periods covered by termination options (if Telia Company is reasonable certain not to exercise that option).

The lease liability is remeasured if there are modifications to the lease contract or if there are changes in the cash flow based on the initial contract terms. Changes in cash flows based on the initial term occurs when: Telia Company changes its initial estimation of whether extension and/or termination options will be exercised, there are changes in earlier estimates of whether a purchase option will be exercised, lease payments changes due to changes in index or rate, or if there is a change in estimates regarding amounts expected to be paid under a residual value guarantee.

The lease payments are discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, Telia Company's incremental borrowing rate. For the majority of all lease contracts Telia Company uses its incremental borrowing rate.

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability plus any lease payments made at or before the commencement date and any initial direct costs incurred, less any lease incentives

received. Also, any restoration costs are recognized in accordance with the guidance in IAS 37 in the measurement of the related liability. The related provision is recognized separately from the lease liability.

The right-of-use asset is subsequently measured on a straight-line basis from the commencement date to the earlier of the end of the useful life of the underlying asset or the end of the lease term. Any remeasurement of the right-of-use asset results in most cases in a corresponding adjustment of the right-of-use asset. The right-of-use asset is tested for impairment when circumstances indicate or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Right-of-use assets are presented as non-current liabilities as non-current in the statement of financial position.

In the income statement, depreciation of the right-of-use asset are included in Depreciation, amortization and impairment expense on the lease liability as finance costs.

Repayments on the lease liability are presented as cash flow from financing activities. Finance interest are presented as cash flow from operating activities.

**Telia Company as a lessor**  
In arrangements where Telia Company is a lessor, the determination of whether each lease is

## C4. Group composition, climate related disclosures and events after the reporting period

lease or an operating lease is made at lease inception. If substantially all of the risk and rewards incidental to the ownership are transferred, then the lease is a finance lease. If not, it is an operating lease. If a contract includes both lease and non-lease components, Telia Company allocates the consideration to the components identified on the basis of relative stand-alone selling prices.

### **Telia Company as finance lessor**

Telia Company owns assets that are leased to customers under finance lease agreements. Amounts due from lessees are recognized as receivables at the amount of the net investment in the leases, which equals the net present value. Interest income is recognized over the lease term on an annuity basis.

### **Telia Company as operating lessor**

Rental revenue from operating leases are recognized on a straight-line basis over the term of the relevant lease.

### **Group composition**

#### **Subsidiaries**

Telia Company AB's subsidiaries as of December 31, 2023, are disclosed in Note P11. Subsidiaries with non-controlling interests are disclosed in Note C20. For information regarding discontinued operations and assets held for sale, see Note C34.

#### **Associated companies and joint ventures**

For information regarding associated companies and joint ventures, see Note C15.

#### **Joint operations**

Telia Company owns four joint operations; Svenska UMTS-nät AB (SUNAB) in Sweden, TT-Netværket P/S (TT) in Denmark, Suomen Yhteisverkko Oy in Finland and Haysquare AB (former Springworks International) in Other operations. The following companies are network-sharing operations with Tele2 (SUNAB), Telenor (TT) and DNA (Suomen Yhteisverkko). Haysquare is a technology-sharing operation with autoSense. Telia Company holds 50% of the shares in SUNAB, TT and Haysquare. Telia Company owns 51% of the shares in Suomen Yhteisverkko, but based on the shareholders agreement the company is jointly controlled and equally governed by the consensus principle.

### **Climate-related disclosures**

Potential significant climate related risks (as well as other types of risks in Telia Company's Risk Universe) and the group's ongoing and future mitigating activities are reflected in the approved forecasts used for impairment testing. See Note C2 and C12.

Telia Company has issued green Euro Medium Term Notes Program (EMTN) bonds and green hybrid bonds under its Green Bond Framework. See Note C21.

Most of Telia Company's total value chain Greenhouse Gas (GHG) emissions are generated in its supply chain. During 2023, Telia Company continued to engage with its suppliers, urging them to set science-based climate targets. See Note C25.

Telia Company has entered into power purchase agreements for renewable energy. See Note C27.

To align the performance measures for the long-term incentive programs (LTI) with the group's strategic sustainability priorities, Environmental, Social and Governance (ESG) targets have been included for the 2022 and 2023 LTI programs. See Note C32.

### **Events after the reporting period**

On February 28, 2024, Telia Company announced that the sale of Telia Denmark has received regulatory approval from the Danish Competition Authority. Telia Company now expects the transaction to close in early April 2024. See Note C3.

On March 4, 2024, Telia Company announced an invitation to holders of certain outstanding EUR notes for purchase subject to the terms and the restrictions described in the tender offer memorandum dated March 27, 2024.

On March 12, 2024, Telia Company announced that Markus Messerer, Senior Vice President, Strategy & Commercial Affairs, will leave the company to pursue opportunities outside the company.

On March 12, 2024, Telia Company announced the results of its tender offer for the purchase of outstanding SEK and EUR notes. Settled aggregate principal amount of SEK 1 billion and EUR 350.0 million is expected to close on March 13, 2024.

## C5. Segment information

Telia Company's operating model is based on geographical areas with the exception of the segment TV and Media. The group's operations are managed and reported by the following operating segments: Sweden, Finland, Norway, Lithuania, Estonia and TV and Media. The organizations are country-based, except for the segment TV and Media which is based on its business nature. The heads of Sweden, Finland, Norway as well as TV and Media report directly to the CEO. The heads of Lithuania and Estonia also reports to the CEO, but is not part of GEM. Other operations are collectively reported.

Operations and network assets in Denmark to be sold are classified as held for sale and discontinued operations as of September 15, 2023 and are therefore not included in the segment information. Danish units that will not be sold are included in Other operations within continuing operations. Comparative segment information has been restated except for segment assets and segment liabilities. For information on discontinued operations, see Note C34.

- Sweden comprises Telia Company's mobile, broadband, TV and fixed-line operations in Sweden.
- Finland comprises Telia Company's mobile, broadband, TV and fixed-line operations in Finland.

- Norway comprises Telia Company's mobile, broadband, TV and fixed-line operations in Norway.
- Lithuania comprises Telia Company's mobile, broadband, TV and fixed-line operations in Lithuania.
- Estonia comprises Telia Company's mobile, broadband, TV and fixed-line operations in Estonia.
- TV and Media comprises the broadcasting and content production business mainly consisting of TV4 in Sweden and MTV in Finland.
- Other operations include mainly the operations in Latvia, Telia Finance and Group functions.

Segment information is based on the same accounting principles as for the group as a whole, except for inter-segment leases which are treated as operating leases. Inter-segment transactions are based on commercial terms. Besides Revenue and Operating income, principal segment control and reporting concepts are adjusted EBITDA, Investments in associated companies and joint ventures, Other operating segment assets and Operating segment liabilities, respectively (see Definitions).

Operating segment assets comprise total assets less non-operating interest-bearing receivables, non-current and short-term investments, pension obligation assets, foreign currency derivatives,

accrued interest, tax assets and cash and cash equivalents. Operating segment liabilities contain total liabilities less non-operating interest-bearing liabilities, provisions for pensions and employment contracts, foreign currency derivatives, accrued interest and tax liabilities. For information on distribution of goodwill and other intangible assets with indefinite useful lives by reportable segments, see Note C12.

<b>Total</b>	<b>88,785</b>	<b>100.0</b>	<b>85,580</b>	<b>100.0</b>	<b>157,402</b>	<b>100.0</b>	<b>169,857</b>	<b>100.0</b>

1) Non-current assets relate to intangible assets, property, plant and equipment, costs to obtain a contract, non-current contract assets, right-of-use assets and non-current film and program rights.

### Assets and liabilities related to contracts with customers

#### Costs to obtain a contract

Costs to obtain a contract are incremental costs incurred resulting in obtaining a contract with a customer, which Telia Company would not have incurred if the contract had not been obtained. These costs are typically external commissions paid, internal commission or bonus paid related to obtaining a new contract. Closing balance for

Cost to obtain a contract amounted to SEK 1,308 million (1,522). Amortization in 2023 amounted to SEK 1,117 million (1,095). Other changes during the year were mainly due to new contracts of SEK 1,128 million (1,371). Costs to obtain a contract are included in Other non-current assets. The amortization is included in the line item Other external expenses (within EBITDA) in the income statement, see Note C7.

### Contract assets

Contract assets mainly refer to transactions where Telia Company satisfies a performance obligation to transfer equipment that is part of a bundle to the customer, but the payment for the equipment is dependent on Telia Company satisfying another performance obligation in the contract, for example a mobile subscription. Total contract assets amounted to SEK 512 million (493) of which SEK 139 million (115) are included in Other non-current assets and SEK 372 million (378) are included in Trade and other current receivables and assets.

### Contract liabilities

Contract liabilities primarily relate to deferred revenue such as prepaid subscriptions and other prepaid telecom charges. Total contract liabilities

amounted to SEK 3,356 million (3,337 SEK 12 million (10) are included in Other liabilities and SEK 3,344 million (3,337) are included in Trade payables and other liabilities. The opening balance for contract assets, in all material aspects, been recognized during the year.

For information on revenue from leases see Note C28.

### Unsatisfied performance obligation

The following reflects the amount of transaction price in long-term contracts, which either partially or fully unsatisfied performance obligation as of December 31, 2023.

SEK in millions, Expected revenue recognition of unsatisfied performance obligations	2024	2025	2026	2027 and onwards	Total Dec 2023
Total unsatisfied performance obligations	9,488	3,955	1,285	529	15,267

The disclosures in the table above do not include unsatisfied performance obligations where Company has a right to consideration from a customer based on time incurred.

## C7. Goods and services purchased and Other external expenses

SEK in millions	Jan-Dec 2023	Jan-Dec 2022
<b>Goods and services purchased</b>		
Goods and sub-contracting services purchased and change in inventories	-29,732	-28,150
whereof amortization and impairment losses of film and program rights <sup>1)</sup>	-5,908	-5,557

of which exchange rate gains	75,291
of which exchange rate losses	-75,339
<b>Total finance costs</b>	<b>-5,041</b>
<b>Finance net</b>	<b>-3,876</b>

## C10. Income taxes

Income tax items recognized in comprehensive income and directly in equity were distributed as follows.

SEK in millions	Jan-Dec 2023	Jan-Dec 2022
<b>Income tax items recognized in net income</b>		
Current tax	-1,346	-1,944
Adjustment of current tax related to prior years	-210	-1
Effect on current tax from tax reduction	-	46
Current tax reduction from use of prior period unrecognized tax loss, tax credit or temporary difference	53	2
Deferred tax, temporary differences	369	602
Deferred tax reduction from use of prior period unrecognized tax loss, tax credit or temporary differences	-	8
Adjustment of deferred tax related to prior years	36	-69
<b>Total income tax expense recognized in net income</b>	<b>-1,099</b>	<b>-1,355</b>
<b>Income tax items recognized in other comprehensive income</b>		
Current tax	6	317
Deferred tax	502	-964
<b>Total income tax recognized in other comprehensive income</b>	<b>508</b>	<b>-647</b>
<b>Income tax items recognized directly in equity</b>		
Current tax	-	22
<b>Total income tax recognized directly in equity</b>	<b>-</b>	<b>22</b>

Income before taxes was SEK 1,105 million in 2023 and SEK -12,555 million in 2022. The difference between the nominal Swedish income tax rate and the effective tax rate comprises the following components.

%	Jan-Dec 2023	Jan-Dec 2022
Swedish income tax rate	20.6	20.6
Effect of higher or lower tax rates in subsidiaries	-6.3	-6.3
Withholding tax on earnings in subsidiaries and associated companies	0.2	0.2
Adjustment of current tax related to prior years	19.0	19.0
Adjustment of deferred tax related to prior years	-3.3	-3.3
Effect on tax expense from tax reduction	-	-
Income from associated companies <sup>1</sup>	-2.0	-2.0
Current year losses and change in temporary difference for which no deferred tax asset was recognized	-2.7	-2.7
Non-deductible expenses <sup>1,2</sup>	77.5	77.5
Tax exempt income	-4.6	-4.6
Tax effect of income transferred to discontinued operations	1.0	1.0
<b>Effective tax rate in net income</b>	<b>99.5</b>	<b>99.5</b>
<b>Effective tax rate excluding effects from associated companies</b>	<b>101.5</b>	<b>101.5</b>

1) 2022 restated for comparability related to income from associated companies and non-deductible expenses.

2) Non-deductible expenses in 2023 was mainly related to impairments of goodwill in Finland and TV and Media and in Finland, Norway and Latvia.

Deferred tax assets and liabilities were distributed and changed as follows.

SEK in millions	Dec 31, 2023		Dec 31, 2022		Net
	Deferred tax assets	Deferred tax liabilities	Deferred tax assets	Deferred tax liabilities	
Opening balance	1,071	10,514	1,302	10,185	-8,883
Recognized in income statement	53	-352	977	463	514
Recognized in OCI	131	-371	-964	0	-964
Acquired/disposed operations	-	-	6	-	6
Exchange rate differences	-72	-222	112	228	-116
<b>Subtotal</b>	<b>1,183</b>	<b>9,569</b>	<b>1,433</b>	<b>10,876</b>	<b>-9,443</b>
Reclassifications	-	-	-362	-362	-
Reclassification to assets/liabilities held for sale	-	-556	-	-	-
<b>Closing balance</b>	<b>1,183</b>	<b>9,013</b>	<b>1,071</b>	<b>10,514</b>	<b>-9,443</b>

Deferred tax assets and liabilities are allocated to the following temporary differences and tax loss carry-forward.

SEK in millions	Dec 31, 2023		2023		Dec 31, 2022		2022	
	Deferred tax assets	Deferred tax liabilities	Deferred tax assets	Recognized in income statement	Deferred tax assets	Deferred tax liabilities	Recognized in income statement	
Non-current assets <sup>2,3</sup>	1,961	12,432	631	631	2,265	13,610	848	
Provisions <sup>3</sup>	578	2	-280	-280	395	-	-392	
Liabilities <sup>2,3</sup>	3,570	353	-406	-406	3,287	161	266	
Trade receivables and other current assets <sup>3</sup>	92	13	5	5	103	17	95	
Interest expense	295	-	295	295	0	-	0

<b>Net deferred tax assets/liabilities</b>	<b>1,183</b>	<b>9,013</b>	<b>1,071</b>	<b>1,071</b>	<b>1,071</b>	<b>10,514</b>	<b>-9,443</b>	

1) Including deferred tax liability related to undistributed earnings in Estonia and Latvia.

2) Deferred tax asset 2022 restated for comparability.

3) Deferred tax liability 2022 restated for comparability.

### Unrecognized deferred tax

Deductible temporary differences, unused tax losses and unused tax credits for which no deferred tax asset is recognized were expected to expire as follows.

Expected expiry, SEK in millions	2024	2025	2026	2027	2028	2029-		Total
						2031	Unlimited	
Temporary differences	-	-	-	-	-	-	33	33
Tax losses	-	-	-	-	-	214	2,228	2,441
Tax credits	-	-	115	256	97	-	-	468
<b>Total gross value</b>	<b>-</b>	<b>-</b>	<b>115</b>	<b>256</b>	<b>97</b>	<b>214</b>	<b>2,261</b>	<b>2,942</b>

As of December 31, 2023 and 2022, unrecognized deferred tax liabilities for temporary differences for undistributed earnings in subsidiaries totaled SEK 3 million and SEK 5 million, respectively.

Tax losses carry-forward for which no deferred tax assets are recognized are mainly related to Dutch holding companies referring primarily to impairments of loans connected to formerly owned subsidiaries. Telia Company's accumulated tax loss carry-forward were SEK 2,441 million in 2023 (2,725).

**International tax reform – Pillar Two model**  
Pillar Two legislation has been enacted or substantively enacted in certain jurisdictions where Telia Company operates. The legislation will be effective for the group's financial year beginning January 1, 2024. Telia Company is in scope of the enacted or substantively enacted legislation and has performed an assessment of the potential exposure to Pillar Two income taxes. The assessment of the potential exposure to Pillar Two income taxes is based on the most recent tax filings, country-by-country reporting and financial statements for the constituent entities in the group. Based on the assessment, the Pillar Two effective tax rates in

most of the jurisdictions in which the rates are above 15%. However, there a number of jurisdictions where the transitional relief does not apply, and the effective tax rate is below 15%. Telia Company does not expect a material exposure to income taxes in those jurisdictions.

Telia Company has applied the transition from the accounting requirements in IAS 12. Accordingly, Telia Company recognizes not discloses information related to deferred tax assets and liabilities related to income taxes.

## C11. Other comprehensive income

Other comprehensive income was distributed as follows.

SEK in millions	Equity component	Jan-Dec 2023	Jan-Dec 2022
<b>Other comprehensive income that may be reclassified to net income</b>			
<b>Foreign currency translation differences</b>			
Translation of foreign operations, continuing operations	Foreign currency translation reserve	-1,543	3,918

<i>of which total income tax effects (see also Note C10)</i>		<i>-3</i>
<b>Total other comprehensive income</b>		<b>-3</b>
<i>of which attributable to non-controlling interests, continuing operations</i>		<i>-</i>

See Note C22 for details of remeasurements of defined benefit pension plans.

The hedging reserve comprises gains and losses on derivatives hedging interest rate and foreign currency exposure, with a net effect in equity of SEK -79 million as of December 31, 2023, and SEK 212 million as of December 31, 2022. or losses will affect net income in 2023 and later, when the hedged items mature. "Financial instruments" in Note

## C12. Goodwill and Other intangible assets

The total carrying value was distributed and changed as follows.

SEK in millions	Dec 31, 2023	Dec 31, 2022	Dec 31, 2023	Dec 31, 2022
	Goodwill	Other intangible assets		
Accumulated cost	79,718	87,984	67,323	70,720
Accumulated amortization	-	-	-43,356	-44,922
Accumulated impairment losses	-35,940	-37,402	-1,724	-1,833
<b>Carrying value</b>	<b>43,777</b>	<b>50,583</b>	<b>22,242</b>	<b>23,965</b>
<i>of which work in progress</i>	-	-	2,146	3,136
Carrying value, opening balance	50,583	66,302	23,965	23,641
Investments	-	-	4,834	4,095
<i>of which capitalized interest</i>	-	-	53	41
Discards	-	-	-7	-1
Operations acquired	45	0	8	-
Adjusted purchase price allocation, Santa Monica Networks	-	-121	-	131
Operations divested	-84	-	-1	-19
Reclassifications	-	-	45	247
Amortization for the year	-	-	-4,849	-4,420
Impairment losses for the year	-3,700	-19,100	-75	-329
Exchange rate differences	-1,212	3,501	-333	620
Reclassification to assets classified as held for sale	-1,854	-	-1,344	-
<b>Carrying value, closing balance</b>	<b>43,777</b>	<b>50,583</b>	<b>22,242</b>	<b>23,965</b>

As a result of assessments performed, impairments of SEK 75 million has been recognized in 2023 related to Other intangible assets (capitalized development expenses) in Other operations. Impairments in 2022 mainly related to the C More brand in TV and Media.

The carrying value for intangible assets with indefinite useful lives is SEK 1,815 million (1,815) and is related to brands in TV and Media. These brands serve as umbrella brands under which the various TV and Media businesses are operated. The TV and

The goodwill impairment and the total carrying value of goodwill were distributed by reportable and cash generating units as follows.

SEK in millions	Goodwill impairment		Carrying value
	2023	2022	
Sweden	-	-	2,04
Finland	2,800	9,500	16,15
Norway	-	8,500	17,85
Denmark	-	600	-
Lithuania	-	-	3,12
Estonia	-	-	2,84
TV and Media	900	-	55
Other operations	-	500	1,19
<i>of which Latvia</i>	-	500	96
<i>of which other</i>	-	-	22
<b>Total goodwill</b>	<b>3,700</b>	<b>19,100</b>	<b>43,777</b>

The total carrying value of other intangible assets was distributed by asset type as follows.

SEK in millions	Dec 31, 2023	Dec 31, 2022
Trade names	1,928	1,931
Telecom licenses and spectrum permits	6,937	6,982
Customer and vendor relationships, interconnect and roaming agreements	5,190	6,454
Capitalized development expenses <sup>1</sup>	6,058	5,299
Other	58	158
Work in progress, advances <sup>1</sup>	2,072	3,140
<b>Total other intangible assets</b>	<b>22,242</b>	<b>23,965</b>

<sup>1)</sup> Capitalized development expenses and Work in progress, advances mainly refer to IT systems, supporting selling and marketing and administration.

## Impairment testing

### Goodwill

The impairment testing for continuing operations is described below. For information regarding measurement of discontinued operations, see Note C34. Goodwill is, for impairment testing purposes, allocated to cash generating units in accordance with Telia Company's business organization. Each country, and TV and Media constitutes a separate cash-generating unit (CGU). Carrying values of all cash-generating units are tested annually for impairment, or more frequently if there are indications that goodwill might be impaired.

Based on the impairment tests performed in the fourth quarter 2023 a total goodwill impairment of SEK 3,700 million (19,100) has been recognized in 2023. The impairment tests reflect an updated view of market conditions, the regulatory environment and investment plans. This updated view has resulted in a need for impairment of goodwill relating to Finland and TV and Media. The recoverable amounts for these cash generating units as of December 31, 2023,

amounted to SEK 32,835 million for Finland and SEK 8,892 million for TV and Media. The impairment test for the CGU Norway has not identified any impairment need as of December 31, 2023, however the estimated recoverable amount was in the proximity of the carrying value as of December 31, 2023, and the CGU is sensitive to changes in WACC and the assumptions in the long-term plan.

For impairment testing purposes the carrying value is defined as segment operating capital and allocated common assets from Common Products and Services, less deferred tax on fair value adjustments and notionally adjusted for non-controlling interests in goodwill. The segment operating capital includes Right of use assets, but excludes lease liabilities. For definition of segment operating capital, see Note C5 and "Definitions."

The recoverable amounts (that is, the higher of value in use and fair value less cost to sell) are normally determined on the basis of value in use, applying discounted cash flow calculations. In all of the

recoverable amount calculations, management used assumptions that it believes are reasonable based on the best information available. Management believes that value in use based on own business plan better reflects the value for Telia Company and of the long-term valuation, compared to the current market values that in some cases can be below the recoverable amount derived from Telia Company's own long-term business plans.

The key assumptions in the value in use calculations were sales growth, Adjusted EBITDA margin development, the weighted average cost of capital (WACC), CAPEX-to-sales ratio (CAPEX excluding Right-of-use assets), and the terminal growth rate of free cash flow. CAPEX for Right-of-use assets has been considered in the impairment test model.

The value in use calculations were based on forecasts approved by management, which management believes reflect past experience, forecasts in industry reports, and other externally available information. For Norway and Lithuania the CAPEX-to-sales ratio development in the forecast deviate from historical trends. In the forecast period the investments levels are lower as the peak of 5G modernization has been passed. For TV and Media the sales growth and the adjusted EBITDA-margin development in the forecast deviate from historical trends. Both the sales growth and the adjusted EBITDA-margin are expected to recover from the large drop in the Swedish advertising market in 2023.

Approved forecasts consider potential significant climate related risks (as well as other types of risks in Telia Company's Risk Universe) and the group's ongoing and future mitigating activities. Climate related risks are considered through, for example, the sales growth forecasts which include offerings

based on circular business models (e.g. pre-owned and refurbished phones, Telia Service, buy back initiatives and programs to enable reuse and recycling) and products and services that enable our customers to reduce emissions and energy use (e.g. remote services and other data-driven services).

EBITDA-margin and CAPEX-to-sales figures include impacts of higher energy prices. Company's activities to manage the energy and costs, including:

- increasing energy efficiency through network hardware and power saving
- managing power consumption through decommissioning legacy networks and modernizing sites, for example relocating placed outdoors to reduce the need and
- only using renewable electricity where our operations covered by guarantee of secured through long-term Power Purchase Agreements for solar and wind and alternatives to remaining fossil-based sources.

The CAPEX-to-sales forecasts are consistent with investment decisions are preceded by total screening of energy consumption, GHG emissions, which in turn affects product and service development and construction. The group-wide re-use a program for network equipment is part of our forecasts.

For more information on climate risks, governance, see Directors' Report section 6 and Sustainability report section 6. Circularity including the TCFD support in

The forecasted cash flows were discounted at the weighted average cost of capital (WACC) for the relevant cash-generating unit. The WACC is derived from the risk-free interest rate in local currency, the country risk premium, the business risk represented by the estimated beta, the local equity market risk premium and an estimated reasonable cost of borrowing above the risk-free rate. The pre-tax discount rate typically cannot be directly observed or measured. It is calculated by iteration – by first running DCF calculation using post-tax cash flows and a post-tax discount rate, and then determining what

the pre-tax discount rate would need to be to cause value in use determined using pre-tax cash flows to equal the value in use determined by the post-tax DCF calculation.

The forecast periods, WACC rates and the terminal growth rates of free cash flow used to extrapolate cash flows beyond the forecast period varied by cash generating unit as presented below. In all cases management believes the terminal growth rates do not exceed the average growth rates for markets in which Telia Company operates.

Years/%	2023					TV and Media	
	Sweden	Finland	Norway	Lithuania	Latvia	Estonia	Media
Forecast period (years)	5	5	5	5	5	5	5
Post-tax WACC rate (%)	5.6	5.7	6.5	6.5	6.5	6.4	7.9
Pre-tax WACC rate (%)	7.3	7.3	8.3	7.7	9.0	8.4	9.6
Terminal growth rate of free cash flow (%)	2.0	2.0	2.0	2.5	2.3	2.4	2.0

Years/%	2022							TV and Media

Terminal growth rate of free cash flow (%)	2.0	1.8	2.0	2.0	2.3	2.5	2.4	2.4	2.0

**Sensitivity analysis – goodwill**  
The estimated recoverable amounts for Finland, Norway and TV and Media were in proximity of the carrying values as of December 31, 2023. As of December 31, 2022, the estimated recoverable amounts for Finland, Norway, Denmark, Latvia and TV and Media were in proximity of the carrying values.

The impairment tests assumed, in addition to post-tax WACC rates and the terminal rates stated above, the following sales ranges (CAPEX excluding Right-of-use assets) that are sensitive to reasonable assumptions.

5-year period/%	2023			TV and Media	
	Finland	Norway	Denmark	Latvia	Media
Sales growth, lowest in period (%)	0.9	-0.1	-0.4	-0.4	-0.4
Sales growth, highest in period (%)	2.3	2.2	8.1	8.1	8.1
Adjusted EBITDA margin, lowest in period (%)	30.6	46.2	2.1	2.1	2.1
Adjusted EBITDA margin, highest in period (%)	33.2	47.2	15.8	15.8	15.8
CAPEX <sup>1</sup> -to-sales, lowest in period (%)	13.9	18.0	0.9	0.9	0.9
CAPEX <sup>1</sup> -to-sales, highest in period (%)	15.8	21.1	3.4	3.4	3.4

1) CAPEX excluding right-of-use assets

1) CAPEX excluding right-of-use assets

The upper part of the following table sets out how many percentage points each key assumption must change, all else being equal, in order for the recoverable value to equal carrying value for the respective cash generating unit. The lower part of the table first shows the SEK billion effect on the

recoverable values of the cash generating units, should there be a one percentage point upward shift in WACC. Finally, it sets out the absolute SEK billion change of the recoverable value that would equal carrying value for the respective cash generating unit.

Percentage points, SEK in billions	2023		
	Finland	Norway	TV and Media
Sales growth each year in the 5-year period (%)	0.0	-1.9	0.0
Adjusted EBITDA margin each year in the 5-year period and beyond (%)	0.0	-3.8	0.0
CAPEX <sup>1</sup> -to-sales ratio each year in the 5-year period and beyond (%)	0.0	8.3	0.0
Terminal growth rate (%)	0.0	2.4	0.0
Post-tax WACC rate (%)	0.0	1.0	0.0
Effect of a one percentage-point upward shift in WACC (SEK in billions)	-3.9	-5.5	-0.9
Change in the recoverable value to equal the carrying value (SEK in billions)	0.0	-5.5	0.0

1) CAPEX excluding right-of-use assets

Percentage points, SEK in billions	2022			
	Finland	Norway	Denmark	Latvia TV and Media
Sales growth each year in the 5-year period (%)	0.0	0.0	0.0	0.0
Adjusted EBITDA margin each year in the 5-year period and beyond (%)	0.0	0.0	0.0	0.0
CAPEX <sup>1</sup> -to-sales ratio each year in the 5-year period and beyond (%)	0.0	0.0	0.0	0.0
Terminal growth rate (%)	0.0	0.0	0.0	0.0

Effect of a one percentage-point upward shift in WACC (SEK in billions)	-4.5	-5.6	-0.6	-0.5
Change in the recoverable value to equal the carrying value (SEK in billions)	0.0	0.0	0.0	0.0

1) CAPEX excluding right-of-use assets

**Brands with indefinite useful lives**  
The recoverable amounts for the brands in TV and Media (except for the C More brand which was fully impaired in 2022) have been determined based on fair value less costs to sell. The brands, which have indefinite useful lives, are tested annually for impairment, or more frequently if there are indications that brands might be impaired. The fair value less costs to sell has been estimated based on the Relief of royalty method under the Income approach. Under this method the fair value of the brands is estimated to the present value of the after-tax royalty savings attributable to owning the brands.

The key assumptions in the fair value less costs to sell calculations for the brands were revenue growth, the WACC, the terminal growth rate of

revenue and royalty rates. The revenue rates over the ten-year projected cash flows are based on past performance and market expectations of market development. Projected revenue cash flows were determined at the WACC. The WACC was determined on the same basis as described for goodwill with additional specific risk factors associated with intangible assets as compared to Media business as a whole. The royalty determined based on license agreements for strong brands within the media industry is based on the fair value less costs to sell of the brand. The fair value of the brand is determined based on the fair value less costs to sell of the brand when determining the fair value of the brand. The brands are presented in the table

Years/%	2023
Projected cash flow period (years)	10
Revenue growth (%)	3.6)-1.9
Post-tax WACC rate (%)	11.0
Terminal growth rate of revenue (%)	2.0
Royalty rates (weighted average) (%)	3.6

## C13. Property, plant and equipment

The carrying value was distributed and changed as follows.

SEK in millions	December 31, 2023						
	Property	Whereof leased out property	Plant and machinery	Whereof leased out plant and machinery	Equipment, tools and installations	Whereof leased out equipment, tools and installations	Total

1) Disclosures of leased out assets do not include assets which are mainly used in Telia Company's own operations, and where only a portion of the asset is leased out under an operating lease (mainly network assets).

The copper network in segment Sweden is expected to be dismantled by the end of 2026. In the fourth quarter 2023 the copper dismantling plan has been further reviewed and updated, which resulted in an increase of the related ARO provision of SEK 243 million, with a corresponding increase of the copper network assets. An impairment test has also been performed based on the updated dismantling plan resulting in an impairment of SEK 243 million of the Swedish copper network assets in the fourth quarter 2023. The impairment refers to segment Sweden and after the impairment the carrying value of the Swedish copper network assets amounts to SEK 295 million. The copper network assets are classified as Property and Plant and machinery within Property, plant and equipment in the statement of financial position.

### Property

Telia Company's real estate holdings include approximately 5,000 properties, mainly in Sweden and Finland. The substantial majority is used solely for technical facilities, like network installations, computer installations, research centers and service outlets.

The total carrying value of property was distributed by depreciable/non-depreciable assets as follows.

SEK in millions	Dec 31, 2023	Dec 31, 2022
Depreciable property (buildings, etc.)	2,231	2,190
Non-depreciable property (land)	406	407
<b>Total property</b>	<b>2,638</b>	<b>2,597</b>

## C14. Film and program rights

The total carrying value for Film and program rights was distributed and changed as follows.

SEK in millions	Dec 31, 2023
<b>Film and program rights</b>	
Accumulated cost	13,028
Accumulated amortization	-9,056
Accumulated impairment	-140
Advances (Prepaid)	1,949
<b>Carrying value</b>	<b>5,781</b>
<i>of which non-current</i>	2,931
<i>of which current</i>	2,851
Carrying value, opening balance	5,920
Additions	6,333
Amortization for the year (included in EBITDA)	(6,908)
Exchange rate differences	36
<b>Carrying value, closing balance</b>	<b>5,781</b>

Amortization of film and program rights is included within Goods and services purchased (within EBITDA), see Note C7. Film and program rights are mainly related to segment TV and Media.

Contractual obligations regarding future obligations (or equivalent) of film and program rights which are not included in the consolidated statement of financial position represented expected maturities.

SEK in millions	Dec 31, 2023
<b>Film and program rights</b>	
Within 1-3 years	456
Within 4-10 years	329
<b>Total</b>	<b>785</b>

For other unrecognized contractual obligations, see Note C30.

## C15. Investments in associated companies and joint ventures

The total carrying value was distributed as follows.

SEK in millions	Dec 31, 2023	Dec 31, 2022
Interests in associated companies	1,158	1,012
Interests in joint ventures	32	41
<b>Total carrying value</b>	<b>1,190</b>	<b>1,053</b>

Items recognized in net income and in total comprehensive income were distributed as follows.

SEK in millions	January – December	
	2023	2022
Income from associated companies	104	100
Income from joint ventures	1	-
<b>Recognized in net income from continuing operations</b>	<b>105</b>	<b>100</b>
Recognized in net income from discontinued operations	-1	2
<b>Recognized in total comprehensive income</b>	<b>104</b>	<b>102</b>

Information on non-material associated companies and joint ventures are not disclosed separately. Telia Company has four joint arrangements classified as joint operations, whereof one is included in discontinued operations. For additional information on those, see Note C4.

Statements of financial position, SEK in millions	Dec 31, 2023	Dec 31, 2022
Carrying value of associated companies (group's share)	1,158	1,012
Carrying value of joint ventures (group's share)	32	41
<b>Total carrying value of investments in associated companies and joint ventures</b>	<b>1,190</b>	<b>1,053</b>

### Statements of comprehensive income, SEK in millions

Associated companies	Jan-Dec 2023

<b>Total group</b>			<b>1,190</b>	<b>1,053</b>		

For additional information related to associated companies, see Notes C29.

## C16. Non-current interest-bearing Other non-current assets

The total carrying values were distributed as follows.

Equity instruments	917
Bonds	5,420
Interest rate swaps	86
Cross-currency interest rate swaps	1,565
Loans and receivables	1,757
Finance lease receivables	325
<b>Total financial assets (Note C26)</b>	<b>10,070</b>
Cost to obtain a contract	1,308
Other contract assets	139
Deferred expenses	12
<b>Total Non-current interest-bearing receivables and Other non-current assets</b>	<b>11,529</b>
whereof interest-bearing	8,998
whereof non interest-bearing	2,532

For information on financial instrument categories and fair values see Note C26 and for credit and management see Note C27. For lease information, see Note C28.

## C17. Inventories

SEK in millions	Dec 31, 2023	Dec 31, 2022
Goods for resale	2,198	2,793
Other inventories and expense incurred on construction contracts	109	125
<b>Total</b>	<b>2,307</b>	<b>2,918</b>

Other inventories include purchased supplies that are mainly intended for use in constructing Telia Company's own installations and for repair and maintenance. No material amounts are carried at net realizable value.

## C18. Trade and other current receivables and assets

The carrying values were distributed as follows.

SEK in millions	Dec 31, 2023	Dec 31, 2022
Currency derivatives (swaps and forwards)	43	43
Accounts receivable	8,94	8,94
Loans and receivables	2,24	2,24
<b>Total financial assets (Note C26)</b>	<b>11,62</b>	<b>11,62</b>
Other current receivables	81	81
Current contract assets	37	37
Deferred expenses	1,62	1,62
<b>Total trade and other current receivables and assets</b>	<b>14,43</b>	<b>14,43</b>

Loans and receivables mainly comprise accrued call, interconnect and roaming charges. Telia offers a diversified portfolio of mass-market services and products in a number of highly competitive markets, resulting in a limited credit risk concentration to individual markets and customers.

For Accounts receivable and Loans and receivables, as of the end of the reporting period, concentration of credit risk by geographical area and by customer segment were as follows.

SEK in millions	Dec 31, 2023	Dec 31, 2022
<b>Geographical area</b>		
Nordic countries	8,463	9,220
Baltic countries	2,358	1,889
Other countries	362	501
<b>Total carrying value</b>	<b>11,183</b>	<b>11,610</b>
<b>Customer segment</b>		
Consumers	3,821	3,852
Business customers	6,716	7,100
Other operators	634	647
Distributors	13	11
<b>Total carrying value</b>	<b>11,183</b>	<b>11,610</b>

In most cases, customers are billed in local currency. Receivables from and payables to other operators for international fixed-line traffic and roaming are normally settled net through clearing-houses. Contract assets are mainly related to the Nordic countries and the business customers.

As of the end of the reporting period, ageing of accounts receivable were as follows.

SEK in millions	Dec 31, 2023
Accounts receivable invoiced	9,521
Allowance for expected credit losses for accounts receivable	-580
<b>Total accounts receivable</b>	<b>8,941</b>
Accounts receivable not due, net of allowances for expected credit losses	5,893
Accounts receivable past due, net of allowances for expected credit losses	3,047
of which less than 30 days	2,213
of which 30–180 days	496
of which more than 180 days	338
<b>Total accounts receivable</b>	<b>8,941</b>

As of the end of the reporting period, ageing of loans and receivables were as follows.

SEK in millions	Dec 31, 2023
Loans and receivables not due, net of allowance for expected credit losses	2,240
Loans and receivables past due but not impaired, net of allowance for expected credit losses	2
of which less than 30 days	2
of which 30–180 days	-
<b>Total loans and receivables</b>	<b>2,242</b>

The allowance for expected credit losses for loans and receivables is considered insignificant. There are no material contract assets past due or material allowance for expected credit losses related to contract assets.

The table below presents changes in the allowance for expected credit losses (ECL) for accounts receivable, expenses for credit losses and recovered amounts for accounts receivable.

SEK in millions	Dec 31, 2023	Dec 31, 2022
Opening balance allowance for ECL for accounts receivable	876	968
Net of charges for expected losses in the period and receivables written off	125	-112
Reversals of allowances	-195	-30
Exchange rate differences	7	50
Reclassification to assets classified as held for sale	-235	-
<b>Closing balance allowance for ECL, accounts receivable</b>	<b>580</b>	<b>876</b>
Total expenses for credit losses, accounts receivable	422	410
Recovered accounts receivable (Note C8)	35	44

For information on financial instrument categories and fair values see Note C26 and for credit risk exposure and management see Note C27.

## C19. Current interest-bearing receivables and Cash and cash equivalents

### Current interest-bearing receivables

The carrying value of current interest-bearing receivables was distributed as follows.

SEK in millions	Dec 31, 2023
Interest rate swaps	-
Cross-currency interest rate swaps	1,101
Short-term investments	7,102
Loans and receivables	5,371
Finance lease receivables	323
<b>Total current interest-bearing receivables (Note C26)</b>	<b>143,896</b>

### Cash and cash equivalents

The carrying value of cash and cash equivalents was distributed as follows.

SEK in millions	Dec 31, 2023
Cash equivalent short-term investments	403
Cash and bank	11,244
<b>Total cash and cash equivalents (Note C26)</b>	<b>11,646</b>

Information on blocked funds in bank accounts is presented in Note C30.

For information on financial instrument categories and fair values see Note C26 and for credit and management see Note C27. For lease information, see Note C28.

## C20. Equity and earnings per share

### Share capital

According to the articles of association of Telia Company AB, the authorized share capital shall amount to no less than SEK 8 billion and no more than SEK 32 billion. All issued shares have been paid in full and carry equal rights to vote and participate in the assets of the company. Since December 31, 2005, the issued share capital changed as follows.

	Issued share capital (SEK)	Number of issued shares	Quotient value (SEK/share)
Issued share capital, December 31, 2005	14,960,742,621	4,675,232,069	3.20
Cancellation of shares repurchased in 2005, September 6, 2006	-591,279,539	-184,774,856	3.20
Issued share capital, December 31, 2006, 2007, 2008, 2009 and 2010	14,369,463,082	4,490,457,213	3.20
Cancellation of shares repurchased in 2011, July 19, 2011	-513,191,783	-160,372,432	3.20
Issued share capital, December 31, 2011, 2012, 2013, 2014, 2015, 2016, 2017 and 2018	13,856,271,299	4,330,084,781	3.20
Cancellation of shares repurchased in 2018 and 2019, May 3, 2019	-385,742,099	-120,544,406	
Bonus issue May 3, 2019	385,742,099		
Issued share capital, December 31, 2019	13,856,271,299	4,209,540,375	3.29
Cancellation of shares repurchased in 2019 and 2020, April 15, 2020	-394,695,610	-119,908,673	
Bonus issue April 15, 2020	394,695,610		
Issued share capital, December 31, 2020, 2021 and 2022	13,856,271,299	4,089,631,702	3.39
Cancellation of shares repurchased in 2022, April 20, 2023	-533,709,021	-157,522,416	
Bonus issue April 20, 2023	533,709,021		
<b>Issued share capital, December 31, 2023</b>	<b>13,856,271,299</b>	<b>3,932,109,286</b>	<b>3.52</b>

### Treasury shares

No Treasury shares were repurchased in 2023 (SEK 5,400 million in 2022) and no shares were repurchased under the LTI 2020/2023 program (SEK 14 million in 2022). On April 5, 2023, the Annual General Meeting decided to make a cancellation of all held 157,522,416 treasury shares, reducing the share capital with SEK 533,709,021, and at the same

time make a corresponding bonus issue with SEK 533,709,021. The cancellation and bonus issue was registered April 20, 2023.

The total number of issued and outstanding shares December 31, 2023 was 3,932,109,286 (4,089,631,702) and 3,932,109,286 (3,932,109,286) respectively.

### Earnings per share and dividends

	Jan-Dec 2023
Net income attributable to owners of the parent (SEK million)	303
Average number of outstanding shares, basic and diluted (thousands)	3,932,109
Earnings per outstanding share, basic and diluted (SEK)	0.08
Ordinary cash dividend (for 2023 as proposed by the Board of Directors)	2.00
- Per share (SEK)	7,864
- Total based on outstanding shares (SEK million)	

### Subsidiaries with material non-controlling interests

Summarized financial information on subsidiaries with material non-controlling interests (NCI) is presented below. The amounts disclosed for each subsidiary are based on those included in the consolidated financial statements before inter-company eliminations and only the net asset in which the NCI has a share. Other comprehensive income (OCI) only comprises exchange rate differences arising on translation to SEK.

The NCI in Telia Lietuva, AB, holds 11.8% of the shares in Lietuvos Radijo ir Televizijos Miesto Radijo ir Televizijos AB (LRT). However, according to the shareholders' agreements Telia Company holds a majority in LMT and the company is therefore regarded as a subsidiary. In addition, partly by the associated company SIA AB, which includes the tower business in Sweden, Finland and Norway is 49%.

Dividends paid to NCIs are disclosed in Note C31 "Cash flow information".

Normally, borrowings by Telia Company in foreign currencies are swapped. The exceptions typically include funding finance the group's operations or sale of net investments abroad. See Note 10 on hedging. For information on instrument categories and fair values and for financial risk exposure and management, see Note C27. For lease information, see

As part of its commitment to sustainable Company has developed a Green Bonds work under which Telia Company may Bonds. The framework specifies what projects are eligible for the use of projects are selected, the management ceeds and reporting. A second-party Telia Company's framework has been Sustainability, a provider of environment and governance (ESG) research and December 31, 2023 Telia Company has green EMTN bonds with a carrying value of 723 million (698) and green hybrid bonds carrying value of SEK 11,772 million (11 green bonds are used for financing efficient networks and green digital customers.

Telia Company considers Net debt to tant measure to be able to understand indebtedness and targets a average ing to Net debt/adjusted EBITDA in the 2.0-2.5x. See section Alternative performance measures.

## C22. Provisions for pensions and employment contracts

### Post-employment benefits

Telia Company provides defined benefit pension plans to its employees in Sweden, Finland and Norway. The pension plans mainly include retirement pension, disability pension and family pension.

Employees in Telia Company AB and most of its Swedish subsidiaries are eligible for retirement benefits under the ITP-Telia (ITP 2 plan) defined benefit plan. However, all employees born in 1979 and later are covered by a defined contribution pension plan (the ITP 1 plan). The part of the Swedish ITP 2 multiemployer pension plan that is secured by paying pension premiums to Alecta is accounted for as a defined contribution plan as the plan administrator does not provide sufficient information necessary to account for the plan as a defined benefit plan. Telia Company's portion of total premiums in the Alecta ITP 2 plan is 0.05% (0.05) and the share of total number of active insured in ITP 2 is 0.63% (0.63). Expected contribution to the ITP 2 plan for 2024 is SEK 15 million. At the end of 2023, Alecta's surplus, in the collective funding ratio, is preliminary estimated to 157% (172).

Telia Company's employees in Finland are entitled to statutory pension benefits pursuant to the

Finnish Employees Pensions Act, a defined benefit pension arrangement with retirement, disability, unemployment and death benefits (TyEL pension). In addition, certain employees have additional pension coverage through a supplemental pension plan. In Finland, a part of the pension is funded in advance and the remaining part financed as a pay-as-you-go pension i.e. contributions are set at a level that is expected to be sufficient to pay the required benefits falling due in the same period.

Telia Norway operates a defined benefit pension plan, which was closed for new entrants in 2011. The pension obligations are secured mostly by pension funds, but also by provisions in the statements of financial position combined with pension credit insurance.

Telia Company's defined benefit plans are approximately divided between the following groups: 18% active members, 33% deferred members and 49% retirees.

Telia Company's employees in many other countries are usually covered by defined contribution pension plans. Contributions to the latter are normally set at a certain percentage of the employee's salary and are expensed as incurred.

### Principal actuarial assumptions

The actuarial calculation of pension obligations and pension expenses is based on the following principal assumptions. These assumptions are the most significant ones in terms of the risk for changes in Telia Company's pension obligations. The discount rate reflects the interest rate level at which the pension liabilities could be effectively settled and affects the value of the defined benefit obligations.

As in previous years the discount rate for Sweden is determined by the covered bond market. Since the commitment has a longer duration than most covered bonds, an extrapolation of the yield curve is performed and used with the corresponding duration of Telia Company's pension obligations. The

discount rate for Finland is based on the corporate bonds with long duration. Norway the discount rate on the same basis as

Inflation and increased longevity have on future pension payments and thereon pension obligation. For Sweden management the long-term annual inflation rate based on the target set by the national bank, implied market inflation and for Finland, the inflation assumption is determined by long-term inflation swaps. For Norway is mainly based on estimations from the global Accounting Standards Board. Sensitivity analysis related to a changing significant assumptions used in calculating provision.

### Dec 31, 2023

Percentages, except longevity	Dec 31, 2023			Weighted average		
	Sweden	Finland	Norway	Sweden	Finland	Norway
Discount rate	3.4	3.1	3.4	3.3	3.8	3.7
Inflation	2.0	2.3	2.3	2.1	2.3	2.3
Longevity						
life expectancy 65-year-old male (year)	21	19	22	21	21	19
life expectancy 65-year-old female (year)	23	25	25	24	23	25

Sensitivity of the defined benefit obligations to changes in the assumptions was as follows.

<sup>1)</sup> Inflation change include pension increase and salary growth.

The sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated.

#### Investment strategy

The assets of Telia Company's pension funds constitute pension plan assets and are valued at fair value. These assets are used as prime funding source for the pension obligations and exist primarily in Sweden and Finland. The pension funds invest the assets in such a manner that the liquidity of the funds is ensured. The investment horizons are long-term and aimed to cover Telia Company's pension obligations. The weighted average duration for the pension obligation plans is approximately 16 years. Investment plans are approved by the boards of the pension funds. The investment activities comply with the rules and regulations issued by the authorities governing pension foundations.

For the Swedish pension fund, which represents approximately 76% of the total group plan assets, Telia Company applies a minimum funding requirement. Asset management has been successful, and the portfolio has generated an annual return of 6% since inception. As of December 31, 2023, the strategic asset allocation decided by the Board of the Swedish Fund, was 49% fixed income, 34% equities and 17% alternative investments. The alternative investments include real estate and hedge funds. The actual allocation may deviate from the strategic allocation in a range within specified limits. To achieve long-term financial targets, it is always important to find an appropriate balance between risk and return.

Financial performance has been strong during 2023. Diversification of the assets, and disciplined use of risk are methods used to limit potential negative impact.

#### Total plan-asset allocation

As of the end of the reporting period, plan assets were allocated as follows.

SEK in millions Asset category	December 31, 2023			December 31, 2022		
	Quoted	Unquoted	Total	%	Quoted	Unquoted
Equity instruments	9,738	9,738	9,738	33	9,351	861

<i>of which shares in Telia Company</i>	7	-	7	0.02	10	-

#### Future contributions

For companies in Sweden, pension liabilities are secured also by pension credit insurance. This means that, should the net provision for pension obligation increase, each company can choose if

and when to contribute to the pension

otherwise to recognize a provision. To pe

outside Sweden, Telia Company expe

ute SEK 140 million in 2024.

## C23. Other provisions

Changes in other provisions were as follows.

SEK in millions	December 31, 2023			Total
	Restructuring provisions	Asset retirement obligations	Other provisions	
Opening balance	171	2,595	1,550	4,316
Provisions for the period	663	760	450	1,873
Utilized provisions	-493	-367	-53	-913
Reversals of provisions	-3	-2	-8	-13
Reclassifications	-2	29	-29	-2
Timing and interest-rate effects	-	79	-	79
Exchange rate differences	-2	-21	-39	-62
Reclassification to liabilities directly associated with assets classified as held for sale	-5	-183	0	-188
<b>Closing balance</b>	<b>329</b>	<b>2,890</b>	<b>1,871</b>	<b>5,090</b>
<i>of which non-current portion</i>	<i>98</i>	<i>2,555</i>	<i>1,693</i>	<i>4,346</i>
<i>of which current portion</i>	<i>231</i>	<i>335</i>	<i>178</i>	<i>744</i>

### Restructuring provisions

The restructuring provisions represent the present value of management's best estimate of the amounts required to settle the liabilities. The estimates may vary as a result of changes in the length of notice period before leaving and in the actual outcome of negotiations with, sub-contractors and other external counterparts as well as the timing of such changes. The restructuring provisions are mainly related to workforce reduction as a result of ongoing optimization of the business.

### Asset retirement obligations

Asset retirement obligations mainly refer to handling hazardous waste such as worn-out telephone poles impregnated with creosote or arsenic and to dismantling and restoration of mobile and fixed network sites. Remaining provisions as of December 31, 2023, are expected to be fully utilized in the period 2024–2100, depending on factors such as any contractual renewal options for site leases and dismantling plans decided by management.

### Other provisions

Other provisions include provisions for damages and court cases, future onerous and other loss-making contracts, insurance provisions, payroll taxes on future pension payments, estimated expenses related to fulfilling representations made and warranties, i.e. transaction warranties, and for potential litigation etc. in connection with disposals and winding-up of group entities, associated

companies and other equity holdings provision for buy-back commitments equipment in certain markets. Full utilization of these provisions is expected in the period 2054. The provisions represent the present value of management's best estimate of the amounts required to settle the liabilities. For more information on the increase in 2023, see Note C24.

## C24. Other non-current liabilities

The carrying value of other non-current liabilities were distributed as follows.

SEK in millions	Dec 31, 2023
License fee liabilities	1,469
<i>of which Swedish</i>	<i>789</i>
<i>of which Finnish</i>	<i>12</i>
<i>of which Norwegian</i>	<i>463</i>
<i>of which Danish</i>	<i>-</i>
<i>of which Lithuanian</i>	<i>206</i>
Interest rate swaps	5
Other non-current financial liabilities	196
<b>Total financial liabilities (C26)</b>	<b>1,670</b>
Prepaid operating lease agreements	220
Other liabilities	207
<b>Total other non-current liabilities</b>	<b>2,098</b>

For information on financial instrument categories and fair values see Note C26 and for information on lease liabilities see Note C27. For lease information, see Note C28.

## C25. Trade payables and other current liabilities

The carrying value of trade payables and other current liabilities were distributed as follows.

SEK in millions	Dec 31, 2023	Dec 31, 2022
Interest rate swaps	6	48
Currency derivatives (swaps and forwards)	209	19
Accounts payable	17,681	20,286
of which accounts payable under vendor financing arrangements	11,527	11,413
Other current financial liabilities	5,703	3,779
<b>Total financial liabilities (C26)</b>	<b>23,600</b>	<b>24,132</b>
Other current liabilities	7,319	6,947
Contract liabilities (deferred income)	3,344	3,327
<b>Total trade payables and other current liabilities</b>	<b>34,263</b>	<b>34,406</b>

The main components of other current financial liabilities are accrued payables to suppliers and accrued interconnect and roaming charges, while other current liabilities mainly entail value-added tax liabilities, advances from customers and accruals of payroll expenses and social security contributions. Contract liabilities (deferred income) mainly relate to subscription and other telecom charges.

### Vendor financing arrangements

Telia Company has arrangements with several banks under which the banks offer Telia Company's vendors the option to receive earlier payment of Telia Company's accounts payable. Vendors

utilizing these financing arrangements pay a credit fee to the bank. From the second quarter 2023 the vendor financing portfolio also includes arrangements where the supplier issues a trade finance instrument, subsequently assigned to a bank specified by the supplier, and offers Telia Company to extend the payment terms in exchange for a price increase consideration paid by Telia Company. All arrangements in the vendor financing portfolio provide earlier payment for the vendors and extended payment terms for Telia Company. Due dates for the payables within the vendor financing arrangements are 50-360 days after invoice date, with the majority of the outstanding balance closer

to 360 days. Other accounts payable outside the vendor financing arrangements have payment due dates 30-90 days after invoice date. Telia Company uses all of the arrangements in the vendor financing portfolio as integrated parts of the commercial relationships with the vendors and the liabilities are part of the working capital in Telia Company's normal operating cycle. Telia Company does not provide any additional collateral or guarantees to the banks. Based on Telia Company's assessment the liabilities under the vendor financing arrangements are closely related to operating purchase activities and the financing arrangement does not lead to any significant change in the nature or function of the liabilities. The liabilities in the vendor financing portfolio are therefore classified as accounts payable. The credit period does not exceed 12 months and the accounts payable are therefore not discounted. The total vendor financing balance is divided between five banks, where the bank with the largest balance represents 30%.

### Suppliers' science-based climate targets

Most of Telia Company's total value chain Greenhouse Gas (GHG) (CO<sub>2</sub>) emissions are generated in its supply chain (including purchases of network construction and maintenance, network equipment, mobile phones and other hardware and other goods and services). In the procurement process, Telia Company assesses suppliers' climate management maturity so that it can reward the best performers and influence the others. During 2023, Telia Company continued to engage with its suppliers, urging them to set science-based climate targets. By year-end 2023 suppliers responsible

for 52% (35%) of Telia Company's total chain emissions were covered by such Company's goal is that suppliers responsible for 72% of its total supply chain emissions science-based targets by 2025. See Sustainability report section Climate and circularity.

For information on financial instruments and fair values see Note C26 and for exposure and management see Note

Non-current and current bonds	C16, C19	12,925	12,925	-	-	6,010	6,010	-
Derivatives	C16, C18, C19	3,191	-	3,191	-	2,342	-	2,342
<b>Total financial assets at fair value by level</b>		<b>17,032</b>	<b>12,925</b>	<b>3,191</b>	<b>917</b>	<b>8,971</b>	<b>6,015</b>	<b>614</b>
<b>Financial liabilities at fair value</b>								
Derivatives	C21, C24, C25	6,407	-	6,407	-	7,550	-	7,550
<b>Total financial liabilities at fair value by level</b>		<b>6,407</b>	<b>-</b>	<b>6,407</b>	<b>-</b>	<b>7,550</b>	<b>-</b>	<b>7,550</b>

There were no material transfers between Level 1, 2 or 3 in 2023 or 2022.

### Fair value measurement of Level 3 Financial instruments

Investments classified within Level 3 make use of significant unobservable inputs in deriving fair value, as they trade infrequently. As observable prices are not available for these equity instruments, Telia Company has a market approach to derive the fair value.

Telia Company's primary valuation technique used for estimating the fair value of unlisted equity instruments in Level 3 is based on the most recent transaction for the specific company if such transaction has been recently made. If there have been significant changes in circumstances between the transaction date and the balance sheet date, that in the assessment of Telia Company, would have a material impact on the fair value, the carrying value is adjusted to reflect the changes.

The table below presents the movement in Level 3 instruments during the year.

SEK in millions	Assets Jan-Dec, 2023	Assets Jan-Dec, 2022
	Equity instruments	Equity instruments
<b>Level 3, opening balance</b>	<b>614</b>	<b>594</b>
Changes in fair value	302	-46
<i>of which recognized in income statement</i>	<i>-4</i>	-
<i>of which recognized in other comprehensive income</i>	<i>307</i>	<i>-46</i>
Purchases/share issue	15	77
Reclassifications	-	-10
Disposals	-2	-
Settlements	-13	-3
Exchange rate differences	-	3
<b>Level 3, closing balance</b>	<b>917</b>	<b>614</b>

The fair value change in 2023 recognized in other comprehensive income of SEK 307 million relates to revaluation of Telia Company's 9.56% holding in Marshall Group AB. The investment was revalued to an estimated fair value of SEK 427 million in the fourth quarter 2023 based on the share price of SEK 415 in the most recent larger transaction made for Marshall Group AB finalized in October 2023.

## C27. Financial risk management

### Principles of financing and financial risk management

Telia Company's financing and financial risks are managed under the control and supervision of the Board of Directors of Telia Company. Financial management is centralized within the Group Treasury unit of Telia Company, which operates as Telia Company's internal bank and is responsible for the management of financing, management of capital and cash. Group Treasury is also responsible for Telia Company's financial risk management, financial infrastructure, implementation of group policies and instructions, identification and monitoring of financial risks as well as implementation of hedging strategies thereof. The most noticeable risks under Group Treasury's responsibility are credit risk, liquidity risk, currency risk, interest rate risk and (re-)financing risk. Group Treasury also seeks to manage the cost of financial risk management.

Telia Company finances its operations mainly by borrowing under its open-market financing programs directly in Swedish and international money markets and debt capital markets. The communicated funding strategy is focused on the refinancing risk, other themes have been to have a smooth maturity profile, maintain duration, to diversify funding sources and to keep a prudent liquidity position. Capital markets is the primary source of funding while bank funding is mainly considered as backup support. This increases flexibility and ensures access to markets with attractive pricing. The open-market financing programs typically provide a cost-effective and flexible alternative to bank financing.

### Financing in 2023

In February 2023, Telia Company issued a 9-year bond of EUR 500 million (SEK 5.6 billion) to a yield of 3.799 percent and with a coupon of 3.625 percent, maturing in February 2032.

In March 2023, Telia Company issued bonds with a total amount of SEK 4 billion. Those bonds were separated in two maturities with a fixed and floating tranche on each, SEK 2 billion maturing in March 2026, and SEK 2 billion maturing in September 2028. The coupon of the 3-year bond was set at 4.375 percent per annum for the fixed tranche, corresponding to a yield of 4.39 percent, and Mid-swaps +73 basis points for the floating tranche. The coupon of the 5.5-year bond was set at 4.375 percent per annum for the fixed tranche corresponding to a yield of 4.42 percent, and Mid-swaps +110 basis points for the floating tranche.

In November 2023 Telia Company issued bonds in total of NOK 4 billion (SEK 3.9 billion). The bonds were separated in two maturities, NOK 2 billion maturing in March 2029 with both a fixed and a floating rate tranche, and NOK 2 billion maturing in March 2034 with a fixed rate tranche. The coupon of the 5.25-year bond was set at 4.675 percent per annum for the fixed tranche, corresponding to a yield of 4.67 percent, and 3M Nilbor +105 basis points for the floating tranche. The coupon of the 10.25-year bond was set at 4.790 percent per annum with the same yield. All the bonds issued in 2023 were issued under Telia's existing EUR 12 billion EMTN (Euro Medium Term Note) program. The proceeds from the issues will

partly be used to refinance senior debt.

In April 2023, Telia Company issued commercial papers with a total nominal amount of SEK 1.0 billion under the existing short-term commercial paper program. The commercial papers were repaid in full in December 2023. During the year outstanding bonds with a nominal amount of SEK 3.4 billion, of which hybrid bonds EUR 100 million (SEK 1.2 billion), were repaid.

The banking sector turbulence, present in the first quarter of 2023 that led to strains on the financial markets, has stabilized. Telia Company has good access to capital via European Debt Capital markets and via commercial paper market if any funding need would be identified.

The sustainability linked Revolving Credit Facility of EUR 1,200 million (SEK 13.3 billion) signed in the third quarter of 2022 with a group of twelve relationship banks was extended for another year during the third quarter of 2023, utilizing one of the two extension options of one year each, subject to approval of the lenders. This means that the credit facility still has a tenor of 5 years and is fully eligible under the rating agencies' liquidity models. The loan facility has a clear connection to Telia's sustainability strategy, since the loan margin is linked to Telia's sustainability performance on climate, diversity and digital skills.

### Capital management

Telia Company's capital structure and dividend policy is decided by the Board of Directors with a floor

of SEK 2.00 per share and an ambition to move to mid-single digit percentage growth.

For 2023, the Board of Directors proposed an ordinary dividend of SEK 2.00 (2022: SEK 2.00), totaling SEK 7.9 billion (7.9). The dividend should be split and distributed into SEK 0.50 per share. Telia Company targets a dividend payout ratio of 50% of EBITDA, corresponding to Net debt/adjusted EBITDA of 2.0-2.5x and a solid investment grade level and a credit rating of A- to BBB+. The credit rating of Telia Company remained unchanged during 2023. Market conditions for non-current borrowings is Baa1 with a stable outlook. The Standard & Poor's rating of Telia Company is A-2, BBB+ and the short-term rating is A-2, stable outlook. These ratings represent an investment grade level and are of great importance for Telia Company's access to financial markets. Telia Company is not subject to any externally imposed capital requirements. In respect of capital management, Telia Company defines capital as equity and 60% of debt, which is consistent with the market practice of this type of instrument. As per December 31, 2023, Telia Company's capital amounted to SEK 5.0 billion (77,635), whereof equity SEK 5.0 billion (67,673) and 50% of hybrid bonds SEK 0.5 billion (9,962).

### Credit risk management

Credit risk is the risk of delay or loss of value or income as well as incurred costs due to counterparty default or failure to meet its financial obligations. The carrying amount of Telia Company's instruments with credit risk exposure is as follows.

### Credit risk exposure

SEK in millions	Note	Dec 31, 2023	Dec 31, 2022
Other non-current assets (excluding Equity instruments, Costs to obtain a contract, Other contract assets and Deferred expenses)	C16	9,154	7,824

When entering into financial transactions such as interest rate swaps, cross-currency swaps and other derivative transactions, Telia Company accepts only creditworthy counterparties with a solid investment grade rating. Telia Company requires each counterparty to have an International Swaps and Derivatives, Inc. (ISDA) agreement. The permitted exposure of each counterparty when entering into a financial transaction depends on the rating of that counterparty.

Telia Company may invest surplus cash in bank deposits and securities issued by banks with a rating of at least A- (Standard & Poor's) or A3 (Moody's). In addition, investments can be made in corporate securities with rating of at least BBB+ or Baa1. Cash can also be invested in government bonds and treasury bills issued by the Swedish, German, Finnish, Norwegian or Danish government,

Swedish municipals, investment funds and securitized assets with AAA/Aaa rating. Expected credit losses on cash and cash equivalents measured at amortized cost are considered insignificant due to the high credit quality of the counterparties reflected in the external ratings and the short maturities. Investments in securities are measured at fair value through income statement. The credit risk of the investments is reflected in their fair values.

Telia Company's credit risk exposure related to cash and cash equivalents as well as investments in securities are distributed as in the tables below. The net aggregated exposure in derivatives as of December 31 is distributed by the counterparty long-term rating as in the table below. Received collateral, regulated by the Credit Support Annex of the ISDA agreements, is deducted from the exposure.

### Credit Rating S&P / Moody's

Telia Company's trade receivables and loans and receivables are diversified geographically and among a large number of customers, private individuals as well as companies in various industries.

Solvency information is required for credit sales to minimize the risk of credit losses and is based on group-internal information on payment behavior, if necessary supplemented by credit and business information from external sources. Incurred expenses for credit losses in relation to consolidated revenue was approximately 0.5% in 2023 and 0.5% in 2022. For quantitative information about the loss allowance for expected credit losses

for trade receivables and current loanables, see Note C18. Telia Company is to credit risk in finance lease receivables as lessor, see Note C28.

In some markets, Telia Company has a in place with a third party under which cash flows from trade receivables and all related financial risks are transferred to the third party. These trade receivables are derecognized when the contractual rights to the are passed to the third party. The exposure to derecognition amounted

### Liquidity risk management

Liquidity risk is the risk that Telia Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Telia Company has internal control processes and contingency plans for managing liquidity risk. The short- and mid-term liquidity management takes into account the maturities of financial assets and financial liabilities and estimates of cash flows from operations.

A centralized daily cash pooling process enables Telia Company to manage liquidity surpluses and deficits according to the actual needs on group and subsidiary level.

Telia Company's policy is to have a prudent liquidity position in terms of available cash and/or unutilized committed credit facilities. Telia Company's short-term liquidity risk (payment obligations due within a year, see table "Expected maturities, financial liabilities") is managed with the liquidity reserve described below. For other unrecognized contractual obligations, see Note C30.

### Liquidity reserve

SEK in millions	Note	Dec 31, 2023

<b>Total unutilized committed credit facilities</b>		<b>14,813</b>
<b>Liquidity reserve</b>		<b>38,012</b>

1) Convertible to cash within 2 days, i.e. excluding securities that for regulatory reasons cannot be used to meet current liquidity risk adjusted for comparability. 2) The increase in bank overdraft and short-term credit facilities relates to foreign exchange rates.

Telia Company's committed credit facilities consist of a revolving credit facility and bank overdraft facilities, which are intended for short-term financing and back-up purposes. Telia Company's committed revolving credit facility is sustainability linked, syndicated, denominated in EUR with a maturity date in September 2028 with an option to extend one year to 2029. The committed overdraft facilities are bilateral, multicurrency and are extended annually.

At year end, contractual undiscounted cash flows for the group represented the following expected maturities. The amounts regarding the group's interest-bearing borrowings and derivatives include installments and estimated interest payments. Amounts in foreign currency have been converted into SEK using the exchange rate prevailing as of the end of the reporting period. Future interest payments, related to instruments with floating interest rates, have been estimated using forward rates. Where gross settlements are performed (interest rate swaps, cross-currency interest rate swaps, currency swaps and forward exchange contracts), all amounts are reported on a gross basis. In the table Hybrid bonds are presented at their reset date.

### Currency risk management

Currency risk is the risk that fluctuations in foreign exchange rates will adversely affect the group's results, financial position and/or cash flows. Currency risk can be divided into operational transaction exposure and translation exposure.

Transaction exposure relates to net inflows or outflows of foreign currencies required by operations and financing. Telia Company's general policy is to hedge the majority of known operational transaction exposure up to 12 months into the future. Financial flows are usually hedged until maturity, even if that is longer than 12 months.

Regarding foreign currency transaction exposure, the Telia Company Group CFO has a clearly defined deviation mandate which is capped at the equivalent of SEK 10 million calculated as one day Value at Risk (VaR), expressed as the long/short SEK counter-value amount that may be exposed to currency fluctuations. Since SEK is the functional currency of Telia Company AB, borrowings are either denominated in, or swapped into SEK unless linked to international operations or allocated as hedging of net investments in foreign currency.

The cash flow pertains to foreign exchange rate hedging of receivables, payables and cash balances in foreign currencies. Foreign exchange rate risks are also mitigated through the group's net investments in EUR, see section "Translation exposure".

### Financial transaction exposure

At year end, contractual undiscounted financial cash flows split by currency, for the group's interest-bearing assets, interest-bearing liabilities and derivatives represented the following expected maturities, including installments and estimated interest payments. Assets and liabilities included in the table below are only those denominated in non-functional currencies. Amounts in foreign currency have been converted to SEK using the exchange rate prevailing as of the end of the reporting period. Future interest payments, related to instruments with floating interest rates, have been estimated using forward rates. In the table Hybrid bonds are presented at their reset date.

### Financial transaction exposure

SEK in millions	Jan– Mar 2024	Apr– Jun 2024	Jul– Sep 2024	Oct– Dec 2024	2025	2026	2027	2028
EUR Interest-bearing assets	21	393	-	-	-	-	-	-

<b>Net</b>	<b>70</b>	<b>-</b>	<b>0</b>	<b>1</b>	<b>53</b>	<b>0</b>	<b>0</b>	<b>0</b>
<b>Total, net</b>	<b>-4,447</b>	<b>-783</b>	<b>-599</b>	<b>-3,473</b>	<b>-6,699</b>	<b>-3,391</b>	<b>-12,738</b>	<b>-98,319</b>

### Operational transaction exposure sensitivity

In most cases, Telia Company customers are billed in their respective local currency. The operational transaction exposure is primarily related to purchases in foreign currencies of equipment and supplies as well as program rights. The main foreign transaction currencies are EUR, NOK and USD. Other currencies may have temporary exposures, such as GBP at year end 2023. Receivables from and payables to other operations for international fixed-line traffic and roaming are normally settled net through clearing-houses, which reduces the transaction exposure related to these payments.

### Transaction exposure sensitivity (financial and operational) Currency depreciation by 10%

SEK in millions	Net income impact, continuing operations	
	2023	2022
EUR	-1.9	-0.4
NOK	-0.1	4.7
USD	-0.1	0.4
GBP	2.5	0.1
Other	0.5	-0.3
<b>Total</b>	<b>0.9</b>	<b>4.4</b>

The sensitivity analysis is based on the exposure as of year end and after hedges.

### Translation exposure

Translation exposure relates to net investments in foreign operations. Telia Company Group Company mandate to implement hedging up to a specific ratio limit. Telia Company's net investments in operations were distributed by currency as follows.

### Translation exposure

SEK in millions	Dec 31, 2023				Dec 31, 2022
	Net investments in foreign operations	Hedged amount	Translation exposure	Net investments in foreign operations	Hedged amount
EUR	35,971	-28,993	6,978	38,463	-24,566
NOK	17,194	-	17,194	23,365	-
DKK	4,325	-	4,325	1,818	-

Net investments are hedged through borrowings or derivatives and presented on a post tax basis.

### Translation exposure sensitivity

The positive impact on group equity, on a post tax basis, would be approximately SEK 2.8 billion if the Swedish krona weakened by 10 percentage points against above translation exposure current year end. The calculation is based on the exposure as of year end, including hedges.

### Interest rate risk management

The interest-bearing borrowings and financial investments expose the group to interest rate risk. Interest rate risk is the risk that a change in interest rates will negatively affect the group's net interest expense and/or cash flows. Leasing is not under active interest rate risk management and is therefore not included in the section below.

### Key figures for the debt portfolio

SEK in millions	Note	Dec 31, 2023	Dec 31, 2022
<b>Debt portfolio</b>			
Non-current borrowings excluding leases, carrying value	C21	83,986	80,584
Current borrowings excluding leases, carrying value	C21	10,913	3,746
<b>Debt portfolio, carrying value</b>		<b>94,899</b>	<b>84,330</b>
Average interest rates including hedges (%)		5.0	4.1
Duration (interest rate risk, years)		3.5	3.2
Average maturity (years)		6.2	6.8
Interest rate adjustment within 1 year		38,480	42,081
Interest rate adjustment after 1 year		56,419	42,249

Telia Company's financial policy provides the framework for management of interest rates and the average maturity of borrowings and investments. The group aims to balance the estimated running cost of borrowing and the risk of negative impact on finance net if market interest rates increase. The group's policy is that the duration of the debt portfolio should be between one to five years. If the debt portfolio structure deviates from the desired one, derivative instruments are used to adapt the structure in terms of duration and/or currency, including interest rate swaps and cross-currency interest rate swaps. For exposures in different currencies see "Financial transaction exposure". Rising interest rates have had a significant effect on Telia Company's increasing funding

cost during 2023. As a mitigating action against further interest rate increases from central banks Telia Company has switched towards more fixed rate debt, especially in the beginning of 2023, to reduce the negative impact of potential further interest rate increases.

#### Interest rate risk sensitivity

Telia Company is exposed to interest rate risks both from the debt portfolio and from the group's portfolio of bonds and other interest-bearing assets.

The exact effect on financial net of a change in interest rates on the debt portfolio depends on the timing of maturity of the debt as well as reset dates for floating rate debt. Furthermore, the volume of

loans may vary over time, thereby affecting that estimate. One percentage point higher interest rate than the prevailing rate as per year end would have increased interest expenses by approximately SEK 264 million (334). The estimate is made under the assumption that the interest rates and the structure of the debt portfolio remained unchanged over the coming 12 months and also considers the effects of outstanding interest rate hedges. At the same time, the net effect on equity would be an increase of SEK 286 million (-31) due to the effects of cash flow hedges for which hedge accounting is applied.

Telia Company's portfolio of bonds and other interest-bearing assets is measured at fair value through income statement. Hence, a change in interest rates would have an impact both on interest income and on the fair value of the assets in the portfolio. A one percentage point higher interest rate than the prevailing rate as per year end would have increased interest income with SEK 48 million (50), but also lead to a decrease in the fair value of the portfolio of SEK 137 million (107). Hence, the net effect on the income statement and equity would have been a decrease of SEK 89 million (57).

Considering both the effects from the debt portfolio and the portfolio of interest-bearing assets, the total impact on Telia Company's finance net of an increase in interest rates of one percent would be a decrease of SEK 353 million (391) and a net increase of equity of SEK 197 million (-88).

Carrying value of the debt portfolio excluding derivatives would change by approximately SEK 2.0 billion (1.8), should the level in market interest rates make a parallel shift of one percentage point, and assuming the same volume of loans and similar duration on those loans as per year end.

However, net effect on the debt portfolio value including derivatives would be SEK (0.4).

### Refinancing risk management

In order to reduce refinancing risk, the distribute loan maturity dates over a long period. The group's policy is that the average maturity of borrowings should exceed 4 years and the maximum of 30% of the funding is allowed within 2 years. As of year end the average maturity of Telia Company's borrowings was 6.2 years and 18% of the borrowings due within 2 years.

### Management of insurable risks

The insurance cover is governed by corporate guidelines and includes a comprehensive list of different property and liability insurance policies. Telia Company assesses the risks of its business units and other units, including the risks of assessing the risks of its business units. Corporate Insurance at Telia Company covers common group insurance programs and Telia Company's own insurance programs. Telia Company, as a strategic partner, is a member of the Telia Group Insurance Program. Some of the risks are reinsured in the captive and other reinsurance markets.

### Power purchase agreements

As part of the strategy to secure future renewable electricity and contribute to the reduction of renewable energy, Telia Company entered into power purchase agreements with Estonia and Lithuania to produce renewable solar, hydro and biomass electricity. Under these agreements, Telia Company pays a fixed price for a quantity of physically delivered electricity. The quantity of physically delivered electricity over periods ranging from 3 months to 25 years (starting during 2022-2025). The electricity will be used for Telia Company's operations.

energy consumption for the network, server rooms, control center and offices. Telia Company has also entered into a ten-year power purchase agreement for renewable solar electricity starting in 2024 in Denmark (discontinued operations), which is also physically delivered electricity at fixed price for fixed quantity and for own-use. The price paid for the purchased electricity under the PPAs is recognized as expenses in the period when the electricity is delivered and used.

#### Master netting arrangements and similar agreements

Telia Company has entered into ISDA (International Swaps and Derivatives Association) Master Agreements for its OTC (Over The Counter) derivative

business, ie. interest rate and currency derivatives, with all of its core banks. These ISDA Master Agreements allow the parties to do close-out nettings. For derivatives in the financial operations, CSAs (credit support annex) may be entered into as an annex to the respective master agreement, and are recognized as current receivables/liabilities. Under the CSA, the parties agree to provide each other with collateral, which is calculated based on a weekly or daily exposure under the specific agreement. Funds transferred and interest accrued under a CSA agreement is not considered collateral. Derivatives include interest and cross currency swaps, currency swaps and forward exchange contracts. Changes in CSA levels during 2023 are mostly due to decreasing interest rate levels.

#### Offsetting

SEK in millions	December 31			Net amount
	Gross amount in statement of financial position	Impact of master netting agreements	CSA received/delivered	
<b>2023</b>				
<b>Financial assets</b>

<b>Financial liabilities</b>				
Derivatives	C21, C24, C25	7,550	-1,279	2,128

#### Hedge accounting

Telia Company mainly applies hedge accounting when hedging interest rate and currency risk related to funding activities and when hedging certain future operational cash flows. Telia Company also applies hedge accounting for hedges of net investments in foreign operations. Telia Company's hedge strategy is to mitigate the uncertainty in future payments and to reduce income statement volatility. The uncertainty is due to changes in future interest fixings but due to changes in currency rates against SEK.

A hedge relationship will be perfectly effective if all critical terms match. That means that the critical

terms of the hedged item and the hedging instrument will be identical. The terms that are considered as critical are: nominal amount, maturity date, future coupon payment, coupon fixing dates, and fixing rate in the instrument. To assess that a hedge can be assumed to be perfectly effective going forward the future cash flows are calculated based on the critical terms of the hedged item and the hedging instrument. If the cash flows offset the instrument, it is deemed to be highly effective going forward (prospectively). For more information on hedge accounting principles see Note C3.

#### Fair value hedges of interest rate risk

SEK in millions	Dec 31 2023

Hedging instruments are included within Non-current/Current borrowings in the statement of position.

## C28. Leases

### Telia Company as lessee

The Group leases various types of assets, such as technical space (e.g. technical sites, roof-tops, co-locations, space on towers and data centers), technical equipment (e.g. copper, dark fiber, IRU, ducts, towers, base stations and servers), non-technical space (e.g. office space, stores and parking space) and land. Other leases mainly relate to cars, office equipment and IT equipment. Lease agreements are negotiated on individual basis and contain a wide range of different lease terms and conditions. The lease contracts often include renewal options for various periods of time. The lease liabilities (and the right-of-use assets) include the non-cancellable period of the lease together with both extension periods (if Telia Company is reasonable certain

to exercise the extension option) and termination periods (if Telia Company is reasonable certain not to exercise the termination option). Determination of the lease term therefore requires management judgment, see Note C2. Apart from current leases, estimated lease terms including estimated extension and termination periods range between 2 and 38 years. The average useful life of the right-of-use assets in 2023 ranges between 4 and 15 years. Approximately 40% of the total lease liabilities (and right of use assets) relate to extension periods were Telia Company has made an assessment that it is reasonable certain that the extension options will be exercised. This portion of the lease liabilities (and right-of-use assets) mainly relates to technical space and technical equipment.

### Amounts recognized in the consolidated statement of financial position

The carrying value of Right-of-use assets were distributed as follows.

SEK in millions	Dec 31, 2023	Dec 31, 2022
<b>Right-of-use assets</b>		
Technical space	7,342	7,402
Technical equipment	4,876	4,243
Non-technical space	3,321	3,716
Land	1,053	1,016
Other	232	172
<b>Total<sup>1)</sup></b>	<b>16,823</b>	<b>16,549</b>

1) During 2023 SEK 1,057 million has been reclassified to Assets held for sale.

Additions to the right-of-use assets during 2023 amounted to SEK 5,861 million (4,579), whereof SEK 1,667 million (1,718) related to new contracts, mainly for technical space and technical equipment. SEK 4,194 million (2,861) related to lease modifications mainly due to indexations and reassessed lease terms for existing contracts for technical space and technical equipment.

The carrying value of lease liabilities were distributed as follows.

SEK in millions	Dec 31, 2023
<b>Lease liabilities<sup>1)</sup></b>	
Non-current	14,511
Current	3,155
<b>Total</b>	<b>17,666</b>

1) Included in the line items non-current and current borrowings in the consolidated statements of financial position.

For expected maturities of the lease liabilities, see Note C27.

### Amounts recognized in the consolidated statements of comprehensive income

The consolidated statement of comprehensive income includes the following amounts relating to:

SEK in millions, except for average useful life	Dec 31, 2023
<b>Depreciation of right-of-use assets</b>	
Technical space	9
Technical equipment	7
Non-technical space	8
Land	15

<b>Total expenses</b>	<b>3,786</b>

1) Expenses related to current leases, leases of low-value assets and variable lease payments are included in the line items Other external expenses.

There was no material income related to subleases or sale or lease back transactions during 2023.

### Amounts recognized in the consolidated

#### statements of cash flow

The total cash outflow for leases in 2023 amounted to SEK 3,812 million (3,205). Repayments of lease liabilities have been recognized as cash flow from financing activities and paid interest has been recognized as cash flow from operating activities.

Norway, comprise financing related to Telia Company's product offerings such as devices and customer premises equipment.

The term of the contract stock is approximately 9 quarters (13). The term of new contracts signed in 2023 was 9 quarters (13). Of all contracts, 86 % (76) carry a fixed interest rate and 14% (24) a floating interest rate. Many contracts include renewal options.

### Telia Company as lessor

#### Finance leases

The lease portfolio of Telia Company's customer financing operations in Sweden, Finland, and

### Operating leases

Telia Company as lessor, is leasing out various types of assets to customers such as technical equipment and space (i.e. copper, dark fibre, IRU, ducts and space on towers). Telia Company has operating lease agreements related product offerings to end-customers in Sweden and Finland. Contract periods range between 2 and 5 years, with an average term of approximately 3 years. Telia Company has operating lease contracts in Norway, which include a customer to swap to a new handset by the current handset and entering into contract. Contract periods range between 2 and 5 years, with an average term of approximately 3 years. For information on assets subjecting leases, see Note C13.

SEK in millions	Dec 31, 2023	Dec 31, 2022
Selling profit	45	39
Finance income on the net investment in the lease	87	65

<b>Total undiscounted lease payments receivables</b>	<b>6,376</b>

1) 2022 maturity analysis has been restated.

## C29. Related party transactions

### The Swedish state

At year-end, the Swedish state held 41.1% of total shares in Telia Company. The remaining 58.9% of the total shares are widely held.

Telia Company group's services and products are offered to the Swedish state, their agencies, and state-owned companies in competition with other operators and on conventional commercial terms. Certain state-owned companies run businesses that compete with Telia Company. Likewise, Telia Company buys services from state-owned companies at market prices and on otherwise conventional commercial terms. Neither the Swedish state and their agencies, nor state-owned companies represent a significant share of Telia Company's revenue or earnings.

The Swedish telecommunications market is governed mainly by the Electronic Communications

Act and ordinances, regulations and decisions in accordance with the Act. Notified operators are required to pay a fee to finance measures to prevent serious threats and disruptions to electronic communications during peacetime. The required fee from Telia Company was SEK 41 million in 2023 and SEK 38 million in 2022. In addition, Telia Company, like other operators, pays annual fees to the Swedish National Post and Telecom Agency (PTS) to fund the Agency's activities under the Electronic Communications Act and the Radio and Telecommunications Terminal Equipment Act. Telia Company paid fees of SEK 43 million in 2023 and 39 million in 2022.

### Associated companies and joint ventures

Telia Company sells and buys services and products to and from associated companies. These transactions are based on commercial terms.

Summarized information on transactions and balances with associated companies was as follows:

SEK in millions	January – or December 2023
<b>Sales of goods and services</b>	
Valokuitu Kotiin Holding	6
Operators Clearing House	4
Tet	2
Other	1
<b>Total sales of goods and services</b>	<b>12</b>
<b>Purchases of goods and services</b>	
Mediamätning i Skandinavien	28
Tet	4
Suomen Numerot NUMPAC Oy	1
Other	2
<b>Total purchases of goods and services</b>	<b>35</b>
<b>Total trade and other receivables</b>	<b>4</b>
<b>Total trade and other payables</b>	<b>5</b>

### Pension and personnel funds

As of December 31, 2023, Telia Company's Finnish pension fund held 366,802 shares and its Finnish personnel fund 722,604 shares in the company, respectively, in total representing 0.03% of total shares. For information on transactions and balances, see Note C22.

### Key management

See section "Remuneration of corporate directors" and Note C32 for further details.

## C30. Contingencies, other contractual obligations and litigation

### Contingent assets and contingent liabilities

As of the end of the reporting period, Telia Company had no contingent assets, while financial guarantees reported as contingent liabilities were distributed as follows.

SEK in millions	Dec 31, 2023	Dec 31, 2022
Credit and performance guarantees, etc.	1	1
<b>Subtotal (see Liquidity risk – Note C27)</b>	<b>1</b>	<b>1</b>
Guarantees for pension obligations	346	321
<b>Total contingent liabilities</b>	<b>347</b>	<b>322</b>

As of December 31, 2023, credit and performance guarantees amounted to 1 MSEK, expected to mature in the fourth quarter 2024.

Some loan covenants agreed limit the scope for divesting or pledging certain assets. Some of Telia Company's bond issuances include change-of-control provisions which under certain conditions allow the lenders to call back the bond before scheduled maturity. Conditions stipulated include a new owner taking control of Telia Company, as such also resulting in a lowering of Telia Company's official credit rating to a "non-investment grade" level.

For all financial guarantees issued, stated amounts equal the maximum potential future payments that Telia Company could be required to make under the respective guarantee.

#### Collateral pledged

As of the end of the reporting period, collateral pledged for blocked funds in bank accounts was SEK 0 million (40).

### Other unrecognized contractual obligations

As of December 31, 2023, unrecognized contractual obligations regarding future acquisitions (or equivalent) of non-current assets (excluding film and program rights) represented the following expected maturities.

Expected investment period SEK in millions	Jan-Mar 2024	Apr-Jun 2024	Jul-Sep 2024	Oct-Dec 2024	2025	2026	2027	2028	Later years	Total
Intangible assets	20	10	2	1	0	0	0	0	0	33
Property, plant and equipment	1,613	1,258	656	443	269	3	120	117	223	4,702
Leases	6	6	6	6	24	25	27	26	26	152
<b>Total</b>	<b>1,639</b>	<b>1,274</b>	<b>664</b>	<b>450</b>	<b>293</b>	<b>28</b>	<b>147</b>	<b>143</b>	<b>249</b>	<b>4,887</b>

As of December 31, 2023, contractual obligations totaled SEK 15,672 million (18,479), of which SEK 10,785 million (13,516), related to film and program rights. See Note C14 for further information.

### Legal and administrative proceedings

In its normal course of business, Telia Company is involved in a number of legal proceedings. These proceedings primarily involve claims arising out of commercial contract and commercial law issues and matters relating to telecommunications regulations and copyright laws.

Except for the proceedings described here, Telia Company or its subsidiaries are not involved in any legal, arbitration or regulatory proceedings which management believes could have a material adverse effect on Telia Company's business, financial condition or results of operations.

As disclosed in the Annual and Sustainability Report 2022, the Norwegian Tax Administration (NTA) has performed a VAT audit investigating the

treatment of the supply of electronic news services during the years 2016-2018 in GET AS, which was acquired by Telia Company in 2018. NTA has in the second quarter 2023 issued a decision requesting Telia Company to pay an amount of approximately SEK 0.3 billion, which in the fourth quarter has been appealed by Telia Company. According to transaction warranties Telia Company has a right to reclaim SEK 138 million for tax payments made related to periods before the GET acquisition. NTA has in the fourth quarter 2023 expanded the VAT audit to also cover the years 2019-2022. As a result of Telia Company's updated risk assessment a total provision of SEK 419 million has been recognized per December 31, 2023 (no material provision recognized 2022), whereof SEK 279 million is classified as non-current. New Norwegian VAT legislation has been implemented as of January 1, 2023, which limits the exposure to the years 2016 – 2022. In February 2024 Telia Company paid the amount of SEK 270 million requested by the NTA for the years 2016-2018, whereof SEK 130 millions was recognized as a deposit (asset) and SEK 140 million reduced the provision.

NTA has in the fourth quarter issued a notification to Telia Finance Norwegian Branch (TFN) relating to the tax depreciation period for purchased equipment in TFN during the years 2020-2022. The NTA notification has been appealed but based on Telia Company's risk assessment performed in the fourth quarter 2023, an increase of current tax liabilities of SEK 212 million has been recognized, with a corresponding net income tax expense of SEK 117 million and a deferred tax liability reversal of SEK 95 million.

The Finnish Tax Agency has in 2022 issued a decision requesting Telia Company to pay Real Estate Transfer Tax of approximately SEK 0.2 billion, related to a share transaction in 2019 involving Telia Towers Finland Oy. The Finnish Supreme Administrative Court has in the second quarter 2023 confirmed that Telia Towers Finland Oy is not to be classified as a Real estate company. The Finnish Tax Agency has on July 5, 2023, decided to revoke its entire previous claim on Telia Company.

## C31. Cash flow information

### Non-cash transactions, continuing and discontinued operations

#### Asset retirement obligations (AROs)

In 2023 and 2022, obligations regarding future dismantling and restoration of technical sites entailed non-cash investments of SEK 760 million and SEK 167 million, respectively, see Note C23.

#### Building-infrastructure exchange transactions

Telia Company provides and installs infrastructure in buildings and as compensation is granted an exclusive right to deliver services for 5–10 years through this infrastructure. These activities entailed non-cash exchanges of SEK 9 million in 2023 and SEK 31 million in 2022.

### Dividends, interest and income taxes, continuing and discontinued operations

1) Other changes mainly refer to reclassification between non-current and current borrowings due to maturity.

2) Assets to hedge borrowings are included in cash flow from financing activities.

**Business combinations, other acquisitions and disposals**

Telia Company group is continually restructured by acquiring and divesting equity instruments or operations.

In 2023, total net cash outflow from business combinations and other equity instruments acquired was SEK 181 million. In 2022, total net cash outflow from business combinations and other equity instruments acquired was SEK 58 million. For

information on business combinations, see Note C34.

Total cash inflow from divested operations and other equity instruments in 2023 amounted to

SEK 34 million. Total cash inflow from operations and other equity instruments amounted to SEK 195 million.

## C32. Human resources

**Employees, salaries, and social security expenses** During 2023, the number of employees from continuing operations decreased by 596 to 17,897 at year-end from 18,493 at year-end 2022. The number of employees in discontinued operations increased by 3 to 747 from 744 at year-end 2022.

For both 2022 and 2023, operations were conducted in 8 countries of which continuing operations were in 8 countries.

The average number of full-time employees by country was as follows.

Country	Jan-Dec 2023		Jan-Dec 2022	
	Total (number)	of whom men (%)	Total (number)	of whom men (%)
Sweden	6,996	64.3	7,144	63.9
Finland	3,837	70.5	3,851	68.9
Norway	1,768	71.7	1,840	71.1

<b>Total, discontinued operations</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>100</b>

Total salaries and other remuneration, along with social security expenses and other personnel expenses, were as follows.

SEK in millions	Jan-Dec 2023	Jan-Dec 2022
<b>Salaries and other remuneration</b>	<b>12,595</b>	<b>11,226</b>
<b>Social security expenses</b>		
Employer's social security contributions	2,464	2,140
Pension expenses	1,290	1,540
<b>Total social security expenses</b>	<b>3,754</b>	<b>3,680</b>
Capitalized work by employees	-1,670	-1,595
Other personnel expenses	118	201
<b>Total personnel expenses, continuing operations</b>	<b>14,797</b>	<b>13,512</b>
<b>Total personnel expenses, discontinued operations</b>	<b>816</b>	<b>694</b>

Salaries and other remuneration were divided between senior executives and other employees as follows. Variable pay was expensed in the respective year, but disbursed in the following year.

SEK in millions	Jan-Dec 2023		Jan-Dec 2022	
	Senior executives (of which variable pay)	Other employees	Senior executives (of which variable pay)	Other employees
Salaries and other remuneration, continuing operations <sup>1)</sup>	200 (18)	12,395	243 (23)	10,983
Salaries and other remuneration, discontinued operations	11 (2)	752	8 (2)	662

<sup>1)</sup> 2022 restated for comparability.

Pension expenses for all senior executives totaled SEK 15 million 2023 and SEK 34 million in 2022.

In 2023 and 2022, employee profit-sharing costs in Telia Company's Finnish subsidiaries amounted to SEK 80 million and SEK 32 million, respectively. In addition to this employee profit-sharing system, all Telia Company markets apply performance-based variable compensation for different groups of employees. In Sweden, for example, close to all permanent employees are included in variable compensation schemes, one type for the sales force and one for all other staff.

#### Long-term incentive program (LTI)

The 2010 to 2023 AGMs in Telia Company resolved to implement performance share programs (PSP), to be offered to a selected group of senior executives and key position holders within the group. Members of the Group Executive Management team are excluded. If the pre-defined financial performance conditions are met during the defined performance period, participants in the programs shall receive a number of Telia Company shares (performance shares) at a share price of SEK 0. The financial targets include a minimum level which must be achieved for any allotment of performance shares to occur at all, as well as a maximum level over which no additional allotment of performance shares will occur. Each program shall in total comprise no more than 2,355,802 (PSP 2020), 2,764,502 (PSP 2021), 3,428,025 (PSP 2022) and 4 065 601 (PSP 2023) Telia- Company shares, corresponding to approximately 0.06% of the total number of outstanding shares for PSP 2020, 0.07%

for PSP 2021, 0.09% for PSP 2022 and 0.10% for PSP 2023 respectively.

Recalculation of final allotments of performance shares shall take place in the event of a bonus issue, a split, a rights issue or similar events.

#### Performance share program 2015 to 2020

Financial targets for the 2015 to 2020 program are earnings before interest, tax, depreciation and amortization (EBITDA) and total share repurchase (TSR). The final allotments of performance shares will be based on accumulated EBITDA and TSR during the full performance period of three years. TSR is measured in relation to a group of comparable telecommunications companies by the Board of Directors. The 2021 program target on Return on Capital Employed (ROCE) is a target on EBITDA and TSR. The final allotment of performance shares will be based on ROCE. To align the performance metrics with the Group's strategic priorities, an Operating Cash Flow (OCF) target and an ESG target, Social and Governance (ESG) target, were added to the 2022 program. In addition to the ROCE targets, the 2023 program will be based on 40% weighting on OCF, 25% on OCF and 15% on ESG. The final allotment of performance shares can receive corresponds to 0.06% of the annual base salary.

Participants are not required to invest in Telia Company shares. The final number of performance shares awarded shall be capped at such number where the aggregated market value corresponds to 60% of each participant's base salary.

PSP 2020 vesting in spring 2023 gave zero allotment and no Telia Company shares were transferred

to the participants in the "Long Term Incentive program 2020/2023" (LTI program).

The summarized performance share program activity in 2023 was as follows.

Performance share program	2023/2026	2022/2025	2021/2024	2020/2023
Number of participants, December 31, 2022	-	249	170	146

## Remuneration to corporate officers

**Board of Directors**  
As resolved by the 2023 AGM of shareholders (AGM) in Telia Company, annual remuneration is paid to the members of the Board of Directors in the amount of SEK 2,000,000 (2,000,000) to the Chair, SEK 940,000 (940,000) to the Vice-Chair and SEK 670,000 (670,000) to each of the other directors, elected by the AGM. In addition, annual remuneration is paid to the members of the Board's Audit Committee in the amount of SEK 300,000 (300,000) to the Chair and SEK 170,000 (170,000) to each of the other members. Additional annual remuneration is also paid to the members of the Board's Remuneration Committee in the amount of SEK 75,000 (75,000) to the Chair and SEK 75,000 (75,000) to each of the other members.

1) Board remuneration, remuneration for Audit Committee and remuneration for Remuneration Committee are presented in separate tables. The remuneration is paid monthly. Lars-Johan Jarnheimer, Ingrid Bonde, Johannes Ametsreiter, Luisa Delgado, Tomas Eliasson, Rickard Gustafson, Jeanette Jäger and Jimmy Maymann were re-elected at the AGM 2023. New board member is Sarah Eccleston. Numbers may not add due to rounding.

### Group Executive Management

The Chief Executive Officer (CEO) and the "Other members of the Group Executive Management" referring to the four EVPs and the nine SVPs directly reporting to the CEO in 2023, constituted the Telia Company Group Executive Management.

### Guidelines for remuneration to Group Executive Management

The Annual General Meeting on April 5, 2023, decided on guidelines for remuneration to Group Executive Management which have been applicable during 2023, see section 'Remuneration to executive management' in the Directors' Report. The guidelines shall be in force until new guidelines

are adopted by the general meeting and valid for a maximum of four years. The purpose of the guidelines is to ensure that Telia Company can recruit and retain qualified employees, which is a prerequisite for the successful implementation of the Company's business strategy and safeguarding of its long-term interests, including its sustainability objectives.

The guidelines do not apply to any remuneration decided or approved by the general meeting. The Board of Directors will not propose the guidelines to the Annual General Meeting until April 10, 2024.

Remuneration and other benefits earned as member of Group Executive Management during the year and capital value of pension commitments.

- 1) Other remuneration for CEO and other members of Group Executive Management mainly includes cash allowances introduced to compensate for capped defined contribution schemes and holiday pay.
- 2) Other benefits refer to insurances, company car benefits, relocation benefits and a number of other taxable benefits. Other benefits for Allison Kirkby are mainly company car benefit and insurances.
- 3) See further disclosures concerning the terms and conditions of pension benefits below.
- 4) Capital value of pension commitment includes defined benefit plans for eight former CEOs and EVPs (left Telia Company before 2022) and one SVP who retired from GEM during 2023.
- 5) Other former members of the Group Executive Management includes one member who left Telia Company. Provisions during the notice period for base salary, benefits and pension costs as well as for provisions for severance pay are included in the amount. The salary during notice period and severance pay will be reduced by any other income. The provision will then be reduced.

### Group Executive Management, 2022

SEK in thousands	Base salary	Other remuneration	Other benefits	Pension expense	Total remuneration

<b>Total</b>	<b>104,398</b>	<b>3,108</b>	<b>3,974</b>	<b>29,594</b>	<b>141,073</b>

Comments on the table related to 2022 can be found in the Annual and Sustainability Report. Numbers may not add up due to rounding.

### Pension benefits

Telia Company offers permanent members of the Group Executive Management defined contribution pension schemes. A defined contribution scheme provides premium contributions to the pension scheme as a percentage of the pensionable salary or as a fixed amount. The level of pension benefits at retirement will be determined by the contributions paid and the return on investments and the costs associated to the plan.

For defined benefit plans, the main drivers of the change in capital value for the obligation are the change in discount rate, paid out pension premiums and the fact that one member of group management has a defined benefit pension plan.

### CEO

The CEO is eligible to a defined contribution pension scheme with contributions corresponding to 4.5% of base salary up to 7.5 income base amounts and to 30% of base salary from 7.5 income base amounts and up to 30 income base amounts. These contributions for Allison Kirkby as CEO add up to a total pension contribution of SEK 535,225 (compared to a base salary of SEK 18,360,000 representing 2.9%).

The contributions into the scheme are vested immediately. The income base amount is determined annually by the Swedish Government and was SEK 74,300 for 2023. The retirement age is variable. Contributions to the pension scheme will cease at retirement or earlier if leaving the company for any other reason.

### Other members of Group Executive Management

The EVPs and the SVPs based in Sweden are eligible to defined contribution pension schemes providing contributions corresponding to 4.5% of their base salary up to 7.5 income base amounts and 30% of base salary from 7.5 income base amounts and up to 30 income base amounts. Members of Group Executive Management in Sweden covered by the ITP plan are in addition to the pension contribution covered by all collective agreed benefits. One Group Executive Management member is covered by a defined benefit plan. Group Executive Management members based in other countries are also eligible for defined contributions pension schemes (with the exception of legally required defined benefit pension plans in Finland). One member based in another country received a cash allowance as part of the pension contribution. The contributions to the pension schemes are vested immediately. The retirement age for members of Group Executive Management is 65 or variable.

### Other former members of Group Executive Management

Defined pension benefits earned by former CEOs and EVPs until 2008 are pledged and calculated as capital values (debt) until all their lifelong pensions are fully paid out by Telia Company. Their pensions are paid out from the age of 60. Since 2008, Telia Company does not offer any defined benefit pension schemes to CEOs and Group Executive Management.

## C33. Remuneration to audit firms

Remuneration to elected audit firms for audit and other reviews based on applicable legislation and for advice and other assistance resulting from observations in the reviews was as follows. Remuneration also includes independent advice, using group auditors or other locally elected audit firms, in the fields of Tax/Law and Corporate Finance as well as other consulting services. Deloitte AB was re-elected at the AGM as Telia Company's group auditor. The remuneration to Deloitte AB follows for the total Telia group. For the interim financial statements, no separation has been debited. Remuneration to other audit firms refers to fees not audited by the group auditor.

## C34. Assets held for sale and discontinued operations

### Discontinued operations

On September 15, 2023 Telia Company signed the final and binding sales agreement for the sale of the operations and network assets in Denmark to Norlys a.m.b.a. (Norlys) at an enterprise value of DKK 6.25 billion (approximately SEK 9.5 billion), on a cash and debt-free basis. The valuation is equivalent to 8.9x previous segment Telia Denmark's 2022 reported EBITDA. The transaction is subject to approval from Norlys' owners (which was received in September) and customary regulatory approvals (which was received in February), with closing expected in early April 2024. The transaction is in line with Telia's strategy to focus on markets where there is a clear path to securing and defending leading market positions. Norlys is Denmark's largest integrated energy and telecommunications group. Telia intends to use the transaction proceeds for deleveraging purposes.

### Classification

Based on the signed, final, binding sales agreement the sale is deemed highly probable within one year and the operations and network assets in Denmark to be sold are therefore classified as held for sale and discontinued operations as of September 15, 2023. Danish units that will not be sold are included in Other operations within continuing operations.

### Presentation

The consolidated statements of comprehensive income for current and comparative periods reflect the split into continuing and discontinued operations, i.e. comparative periods have been restated. The consolidated cash flow statements for current and comparative periods present cash flows for the total group, but with additional information on cash flows from discontinued operations. Operational free cash flow for the group includes only cash flow from continuing operations. The consolidated statement of financial position as of December 31, 2023 presents assets and liabilities to be disposed as held for sale, but comparative periods are not restated. The amounts for continuing and discontinued operations in the consolidated financial statements are presented after elimination of intra group transactions and balances.

### Measurement

The sales price in the signed sales agreement exceeds the carrying value of discontinued operations and accordingly no impairment loss have been recognized on the classification as held for sale and discontinued operations or as of December 31, 2023.

### Financial risk management

Telia Company's net investments in the operations and network assets in Denmark are although classified as discontinued operations, still exposed to fluctuations in foreign exchange rates and managed accordingly. Transaction risk on proceeds of the disposal is dealt with as a part of the group's established foreign exchange risk management procedures following the group policy on financial management. Conversion risk in discontinued operations relates to the net investments in foreign operations in DKK.

The liquidity reserve for the discontinued operations as of December 31, 2023 was SEK 118 million, which relates to cash and cash equivalents. Based on the current liquidity reserve and the expected disposal of the operations and network assets in Denmark within one year, Telia Company's liquidity risk relating to discontinued operations is considered limited.

Credit risk related to discontinued operations is dealt with as part of the group's established credit risk management procedures following the group policy, or where applicable, the entity's policy on financial management.

The interest-bearing borrowings in discontinued operations refer mainly to loans with secured and lease liabilities. Considering the disposal within one year the interest rate risk for Telia Company is deemed limited. rate risk relating to cash and cash equivalents is also deemed limited.

## P1. Basis of preparation

### General

The parent company Telia Company AB's financial statements have been prepared in accordance with the Swedish Annual Accounts Act, other Swedish legislation, and standard RFR 2 "Accounting for Legal Entities" and other statements issued by the Swedish Financial Reporting Board. The standard is applicable to Swedish legal entities whose equities at the end of the reporting period are listed on a Swedish stock exchange or authorized equity market place. In their consolidated financial statements such companies have to comply with the EU regulation on international accounting standards, while they still have to comply with the Annual Reports Act in their separate financial statements. RFR 2 states that as a main rule listed parent companies should apply IFRSs and specifies exceptions and additions, caused by legal provisions or by the connection between accounting and taxation in Sweden.

### Measurement bases and material accounting principles

With the few exceptions below, Telia Company applies the same measurement bases and accounting principles as described in Notes to consolidated financial statements, Notes C1 and C3, respectively.

Item	Note	Accounting treatment
Intra company lending and credit rating	P5, P17	Telia Company has an internal model for credit rating of subsidiaries used when pricing internal lending to subsidiaries. The model has two risk categories and, depending on risk rating, the model has a credit spread curve to be applied on top of the benchmark rate when lending money to subsidiaries. The model is based on pricing of inter-company lending at an arms-length basis and if the credit spreads used represent an unbiased pricing of credit risk, this is used for calculating expected credit losses on inter-company receivables.
Group contributions	P6	Under certain conditions, it is possible to transfer profits through group contributions between Swedish companies in a group. A group contribution is normally a deductible expense for the contributor and a taxable income for the recipient. Group contributions are recognized as appropriations in the income statement.
Borrowing costs	P5, P8, P9	Borrowing costs directly attributable to the acquisition, construction or production of an asset are not capitalized as part of the cost of that asset.
Investments in subsidiaries and associated companies	P5, P11	Shares in subsidiaries and associated companies are recognized at cost including related transaction expenses less any impairment. Dividends received are brought to income while repayment of certain contributed capital reduces the carrying value.
Provisions for pensions and employment contracts	P5, P15	Pension obligations and pension expenses are recognized in accordance with the simplification rule for pensions in RFR 2 "Accounting for legal entities."
Untaxed reserves and appropriations	P6	Untaxed reserves and appropriations are reported gross excluding deferred tax liabilities related to the temporary differences.
Capitalized development expenses	P8	The corresponding amount that has been capitalized as development expenses in the balance sheet as intangible assets have been recognized in the reserve for capitalized development expenses in equity.
Lease agreements	P22	All leasing agreements are accounted for as operating leases.

### Amounts and dates

Unless otherwise specified, all amounts are in millions of Swedish krona (SEK million) or SEK and are based on the twelve-month period ended December 31 for income statement items, and as of December 31 for balance sheet items, respectively.

### Recently issued accounting standards

For information relevant to Telia Company, see Note C1.

### Judgments and key sources of estimation uncertainty

For information relevant to Telia Company, see Note C2.

## P2. Revenue

Revenue were mainly related to group common services to subsidiaries and were distributed among indivually material countries as follows.

SEK in millions	Jan-Dec 2023	Jan-Dec 2022
Sweden	1,640	1,368
Finland	211	196
Norway	96	79
Denmark	34	33
Other countries	42	36
<b>Total</b>	<b>2,024</b>	<b>1,713</b>

## P3. Goods and services purchased and Other external expenses

SEK in millions	Jan-Dec 2023
<b>Goods and services purchased</b>	
Goods and sub-contracting services purchased and change in inventories	-1,411
<i>of which amortization and impairment losses of film and program rights<sup>1)</sup></i>	-1,411
Other network expenses	(
<b>Total Goods and services purchased</b>	<b>-1,411</b>
<b>Other external expenses</b>	
Marketing expenses	-5
IT expenses and consultancy fees	-22
Property and energy costs	(
Other	5
<b>Total Other external expenses</b>	<b>-22</b>

1) For changes in Film and program rights, see Note P10.

## P4. Other operating income and expenses

Other operating income and expenses were distributed as follows.

SEK in millions	Jan-Dec 2023	Jan-Dec 2022
<b>Other operating income</b>		
Exchange rate gains	168	139
<b>Total other operating income</b>	<b>168</b>	<b>139</b>
Exchange rate losses	-140	-136
Other operating expenses <sup>1)</sup>	-121	-148
<b>Total other operating expenses</b>	<b>-260</b>	<b>-284</b>
<b>Net effect on income</b>	<b>-93</b>	<b>-145</b>

1) Mainly related to transaction expenses.

## P5. Finance income and Finance costs

Finance income and finance costs were distributed as follows.

SEK in millions	Jan-Dec 2023
<b>Finance income</b>	
Reversal of impairments related to expected credit losses	197
Dividends from subsidiaries	6,641
Capital gains from subsidiaries	-
Dividends from associated companies	-
Net change in fair value on financial instruments not in a designated hedge relationship	167
Interest income	2,948
<i>of which from Interest from subsidiaries</i>	<i>2,359</i>
<i>of which from Other</i>	<i>589</i>
Net Exchange rate gains	289
<i>of which exchange rate gains</i>	<i>76,029</i>
<i>of which exchange rate losses</i>	<i>75,741</i>
<b>Total finance income</b>	<b>10,243</b>
<b>Finance costs</b>	
Impairment losses from subsidiaries	-5,000
Capital losses from subsidiaries	-41
Capital losses from associates	-
Impairment losses from other financial investments	-9
Interest expenses	-4,622
<i>of which from Borrowings and other financial liabilities at amortized cost</i>	<i>-2,849</i>
<i>of which from Derivatives identified as hedging instruments</i>	<i>-1,062</i>
<i>of which from Derivatives at fair value through income statement</i>	<i>-24</i>
<i>of which from Net defined benefit pension asset/liability</i>	<i>-9</i>
<i>of which from Interest expenses from subsidiaries</i>	<i>-635</i>

## P6. Income taxes

Income tax items recognized in comprehensive income were distributed as follows.

SEK in millions	Jan-Dec 2023	Jan-Dec 2022
<b>Income tax items recognized in net income</b>		
Current tax	-305	0
Adjustment of current tax related to prior years	0	291
Deferred tax, temporary differences	291	-14
<b>Total income tax expense recognized in net income</b>	<b>-14</b>	<b>-14</b>
<b>Income tax items recognized in other comprehensive income</b>		
Current tax	0	42
Deferred tax	42	42
<b>Total income tax recognized in other comprehensive income</b>	<b>42</b>	<b>42</b>
<b>Income tax items recognized directly in equity</b>		
Current tax	-	-
<b>Total income tax recognized directly in equity</b>	<b>-</b>	<b>-</b>

Income before tax was SEK 1,762 million in 2023 (-286). The difference between the nominal tax rate and the effective tax rate comprises the following components.

%	Jan-Dec 2023	Jan-Dec 2022
Swedish income tax rate	20.6	0.0
Underprovided or overprovided current tax expense in prior years	0.0	0.0
Interest expense for which no deferred tax asset was recognized	0.0	-2.4
Interest expense, change in deferred taxes prior years	-2.4	60.2
Non-deductible expenses	60.2	77.7
Tax-exempt income	77.7	0.8
<b>Effective tax rate in net income</b>	<b>0.8</b>	<b>0.8</b>

SEK in millions	Jan-Dec 2023	Jan-Dec 2022
<i>of which from Other</i>	-42	-59
Net exchange rate losses	-	-1,926
<i>of which exchange rate losses</i>	-	-66,939
<i>of which exchange rate gains</i>	-	65,013
Ineffectiveness on hedges	-70	-84
Net change in fair value on financial instruments not in a designated hedge relationship	-	-532
Other financial expenses	-21	-41
<b>Total finance costs</b>	<b>-9,763</b>	<b>-20,491</b>
<b>Net effect on income</b>	<b>480</b>	<b>-5,572</b>

1) Restated for comparability.

Impairment losses from subsidiaries include impairments related to the subsidiaries Telia Finland Oyj of SEK -2,450 million (-6,350 million), Telia Norge AS of SEK -2,200 million (-8,600 million) and TV Media Holding AB of SEK -350 million (-).

Non-deductible expenses in 2023 and 2022 were mainly affected by impairments of subsidiaries of SEK 5,000 million (14,950). Tax-exempt income in both 2023 and 2022 consisted of dividends

from subsidiaries. Tax exempt income in 2022 also included a capital gain from the disposal of Telia Towers Sweden AB.

SEK in millions	Dec 31, 2023			Dec 31, 2022		
	Deferred tax assets	Deferred tax liabilities	Net	Deferred tax assets	Deferred tax liabilities	Net
Opening balance	124	142	-18	131	58	73
Recognized in income statement	291	-	291	-7	-	-7
Recognized in OCI	-	-42	42	0	84	-84
<b>Closing balance</b>	<b>415</b>	<b>100</b>	<b>316</b>	<b>124</b>	<b>142</b>	<b>-18</b>
	2023			2022		
<b>SEK in millions</b>	<b>Deferred tax assets</b>	<b>Deferred tax liabilities</b>	<b>Recognized in income statement</b>	<b>Deferred tax assets</b>	<b>Deferred tax liabilities</b>	<b>Recognized in income statement</b>
Non-current assets	1	-	0	1	-	0
Provisions	120	-	-3	124	-	-7
Interest expense carry-forward	295	-	295	0	-	0
Fair value adjustments, cash flow hedges and financial assets at fair value through OCI	-	100	-	-	142	-
<b>Total deferred tax assets/liabilities</b>	<b>416</b>	<b>100</b>	<b>291</b>	<b>124</b>	<b>142</b>	<b>-7</b>
Offset deferred tax assets/liabilities	-100	-100	-	-124	-124	-
<b>Net deferred tax assets/liabilities</b>	<b>316</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>18</b>	<b>-</b>

As of December 31, 2023, there were no accumulated non-expiring tax loss carry-forwards or unrecognized deferred tax assets. As of December 31, 2022, there were unrecognized deferred tax assets of SEK 42 million related to interest expense carry forwards with an expiry date in year 2028.

As of December 31, 2023, the unrecognized deferred tax liability in untaxed reserves amounted to SEK 1,141 million (1,208).

### Untaxed reserves and appropriations

As of December 31, 2023 and 2022, untaxed reserves in the balance sheet consisted of profit equalization reserves totaling SEK 5,539 million and SEK 5,862 million, respectively.

SEK in millions	Jan-Dec 2023	Jan-Dec 2022
Change in profit equalization reserves	323	845
Group contributions received	2,650	5,743
Group contributions paid	-1,179	-509
<b>Net effect on income</b>	<b>1,793</b>	<b>6,079</b>

## P7. Other comprehensive income

Other comprehensive income was distributed as follows.

SEK in millions	Jan-Dec 2023	Equity component
<b>Other comprehensive income that may be reclassified to net income</b>		
<b>Cash flow hedges</b>		
Net changes in fair value	-38	Hedging reserve
Transferred to financial items in net income	-6	Hedging reserve
Income tax effect	2	Hedging reserve
<b>Total cash flow hedges</b>	<b>-75</b>	
<b>Cost of hedging</b>		
Changes in fair value	-5	Cost of hedging reserve
Transferred to financial items in net income	-4	Cost of hedging reserve
Income tax effect	2	Cost of hedging reserve
<b>Total cost of hedging</b>	<b>-8</b>	
<b>Other comprehensive income that will not be reclassified to net income</b>		
<b>Equity instruments at fair value through OCI</b>		
Changes in fair value	31	Fair value reserve
Income tax effect	-	Fair value reserve
<b>Total equity instruments at fair value through OCI</b>	<b>31</b>	
<b>Total other comprehensive income</b>	<b>15</b>	
<i>of which total income tax effects (see also Note P6)</i>	<i>4</i>	

## P8. Intangible assets

The carrying value of intangible assets was distributed as follows.

SEK in millions	Other intangibles <sup>1)</sup>	
	Dec 31, 2023	Dec 31, 2022
Accumulated costs	16	16
Accumulated amortization	-16	-16
<b>Carrying value</b>	<b>0</b>	<b>0</b>
<i>of which work in progress</i>	-	-
<b>Carrying value opening balance</b>	<b>0</b>	<b>2</b>
Amortization for the year	0	-1
<b>Carrying value, closing balance</b>	<b>0</b>	<b>0</b>

<sup>1)</sup> Other intangibles are mainly related to IT-systems. As of December 31, 2023 carrying value of Capitalized development expenses amounted to SEK 0 million (0).

No general changes of useful lives were made during the year. For useful lives applied, see Note C2. Accelerated amortization, to the extent allowed by Swedish tax legislation, is recorded as untaxed

reserves and appropriations, see this section in Note P6.

## P9. Property, plant and equipment

The carrying value was distributed and changed as follows.

SEK in millions	Dec 31, 2023	Dec 31, 2022	Dec 31, 2022
	Plant and machinery	Equipment, tools and installations	
Accumulated cost	6	6	-
Accumulated depreciation	-6	-6	-
<b>Carrying value</b>	<b>0</b>	<b>0</b>	<b>-</b>
Carrying value, opening balance	0	0	0
Depreciation for the year	0	0	0
<b>Carrying value, closing balance</b>	<b>0</b>	<b>0</b>	<b>0</b>

No general changes of useful lives were made in 2023. For useful lives applied, see Note C2. Accelerated depreciation, to the extent allowed

by Swedish tax legislation, is recorded in reserves and appropriations, see this Note P6.

## P10. Film and program rights

The carrying value for Film and program rights was distributed and changed as follows:

SEK in millions	Dec 31, 2023	Dec 31, 2022
Accumulated cost	3,757	2,257
Accumulated amortization	-3,001	-1,591
Advances (Prepaid)	-	-
<b>Carrying value</b>	<b>756</b>	<b>667</b>
<i>of which current</i>	756	667
Carrying value, opening balance	667	609
Additions	1,499	1,161
Amortizations for the year (included in EBITDA)	-1,410	-1,103
<b>Carrying value, closing balance</b>	<b>756</b>	<b>667</b>

Amortization of film and program rights is included within the Income statement line item Goods and services purchased. Contractual obligations regarding future acquisitions (or equivalent) of film and program rights, which are not included in the balance sheet represented the following expected maturities.

SEK in millions

Within 1-3 years

Dec 31,  
2022

Film  
rights

1,07

For other unrecognized contractual obligations, see Note P24.

## P11. Other financial assets

The carrying value changed as follows.

SEK in millions	Dec 31, 2023	Dec 31, 2022	Dec 31, 2023	Dec 31, 2022	Dec 31, 2023	Dec 31, 2022	Dec 31, 2023
	Investments in associated companies and joint operations	Equity instruments	Investments in subsidiaries and other non-current financial assets	Total

<b>SEK in millions</b>		
Equity instruments	869	569
Bonds	5,018	3,496
Cross-currency interest rate swaps	1,565	1,993
Interest rate swaps	85	36
Investments in subsidiaries	87,314	90,802
Receivables from subsidiaries (Note P23)	54,573	55,925
Investments in associated companies and joint operations	206	56
Other	435	439
<b>Total Other financial assets (Note P20)</b>	<b>150,066</b>	<b>153,316</b>
<i>of which interest-bearing</i>	<i>61,677</i>	<i>61,886</i>
<i>of which non-interest-bearing</i>	<i>88,389</i>	<i>91,430</i>

Investments in subsidiaries are specified below, while corresponding information on associated companies and other equity instruments is presented in Notes C15 and C16.

Telia Denmark is a branch of Telia Nättjänster Norden AB. Telia Company's holdings in the network-sharing operations in Sweden and Denmark are held through Telia Sverige AB and Telia Mobile Holding AB, respectively. Another 24.5% of the shares in Latvijas Mobilais Telefons SIA are owned by a subsidiary. Telia Company has a board majority in Latvijas Mobilais Telefons SIA. Remaining shares in TeliaSonera Telekomunikasyon Hizmetleri A.S. is owned by

Telia Finland Oyj which also controls Sonera Holding B.V. and TeliaSonera UTA Holding B.V. Equity participation corresponds to voting rights in all companies. Other operating and dormant companies do not control group assets of significant value. In addition to companies mentioned above, Telia Company indirectly controls a number of operating and dormant subsidiaries of subsidiaries.

## P12. Trade and other receivables

The carrying value of trade and other receivables were distributed as follows.

SEK in millions	Dec 31 2022	43
Currency derivatives (swaps and forwards)	1.10	
Interest rate swaps		
Gross-currency interest rate swaps	2	
Accounts receivable	6	
Loans and receivables	24,511	
Receivables from subsidiaries (Note P23)	20,63	
of which cash-pool balances and current deposits	3,88	
of which trade and other receivables	3,67	
Other current financial receivables	29,82	
<b>Financial assets (Note P20)</b>	3	
Other current receivables and deferred expenses	29,85	
<b>Total trade and other current receivables and assets</b>	25,45	
of which interest-bearing	4,39	
of which non-interest-bearing		

For Accounts receivable and Loans and receivables (including receivables from associated companies and joint ventures), at the end of the reporting period, concentration of credit risk by area and by customer segment was as

As of the end of the reporting period, ageing of Loans and receivables (including receivables ated companies) were as follows.

SEK in millions	Dec 31, 2023
Loans and receivables not due	69
<b>Total loans and receivables</b>	<b>69</b>

There were no expenses for credit losses and no recovered Accounts receivables within accounts or Loans and receivables at amortized cost in 2023 and in 2022.

SEK in millions	Dec 31, 2023	Dec 31, 2022
<b>Geographical area</b>		
Sweden	1	6
Other countries	23	55
<b>Total carrying value</b>	<b>24</b>	<b>62</b>
<b>Customer segment</b>		
Other customers	24	62
<b>Total carrying value</b>	<b>24</b>	<b>62</b>

As of the end of the reporting period, allowance for expected credit losses and ageing of Accounts receivable, respectively, were as follows.

SEK in millions	Dec 31, 2023	Dec 31, 2022
Accounts receivable invoiced	24	62
Allowance for expected credit losses for accounts receivable	-	-
<b>Total accounts receivable</b>	<b>24</b>	<b>62</b>
Accounts receivable not due	0	20
Accounts receivable past due but not impaired	24	42
of which 30–180 days	24	41
of which more than 180 days	0	1
<b>Total accounts receivable</b>	<b>24</b>	<b>62</b>

## P13. Short-term investments, cash and cash equivalents

Short-term investments, cash and cash equivalents were as follows.

SEK in millions	Dec 31, 2023	Dec 31, 2022
Short-term investments with maturities longer than 3 months	6,535	1,678
Short-term investments with maturities up to and including 3 months	403	-
<b>Total short-term investments</b>	<b>6,938</b>	<b>1,678</b>
Cash and bank	9,839	5,581
<b>Total (Note P20)</b>	<b>16,777</b>	<b>7,259</b>
<i>of which cash and cash equivalents</i>	<i>10,242</i>	<i>5,581</i>

Cash and cash equivalents are defined as the sum of Short-term investments with maturities up to and including 3 months and the balance sheet item Cash and bank.

As of December 31, 2023, there were no blocked funds in Telia Company's bank accounts.

## P14. Shareholders' equity

### Share capital, treasury shares, earnings per share and dividends

See Notes to consolidated financial statements (corresponding sections in Note C20).

At the disposal of the AGM:

Non-restricted equity excluding net income	47
Net income	1
<b>Total</b>	<b>49</b>

The Board proposes that this sum be appropriated as follows:

SEK 2.00 per share dividend to the shareholders <sup>1)</sup>	7
To be carried forward	41
<b>Total</b>	<b>49</b>

1) Based on outstanding shares as per December 31, 2023.

The dividend is proposed to be split and distributed into four equal tranches of SEK 0.50 per share in April 2024, August 2024, November 2024 and February 2025. The Board of Directors is of the opinion that the proposed dividend, according to Chapter 18 Section 4 of the Swedish Companies Act, is justifiable. After distribution of the proposed dividend, the equity of the company and the group

will be sufficient with respect to the needs and risks of the operations. Also, the company and the group are deemed to have a sufficient level of liquidity, a consolidated balance sheet and a satisfactory general financial position. A full statement by the Board of Directors included in the AGM documentation.

## P15. Provisions for pensions and employment contracts

**Pension obligations and pension expenses**  
The employees in Telia Company AB are covered by one of the three occupational pension plans ITP1, ITP2 or ITP-Tele due to collective agreement. ITP2 and ITP-Tele are defined benefit pension plans, which means that the individual is guaranteed a pension equal to a certain percentage of his or her salary. All employees born in 1979 or later are covered by ITP1.

Most pension obligations are secured by Telia Pension Fund. Certain commitments, such as certain supplementary individual pension benefits and a right under the employment contracts for certain categories of personnel to retire at age 55, 60, or 63, are provided for by taxed reserves in the balance sheet. Pension obligations are calculated annually, as of the end of the reporting period, based on actuarial principles.

The fair value of plan assets changed as follows.

SEK in millions, except return	Dec 31, 2022	Dec 31, 2023
Opening balance, plan assets	2,85	2,85
Payments from pension fund	-3	-3
Actual return	20	20
<b>Closing balance, plan assets</b>	<b>3,02</b>	<b>3,02</b>
Actual return on plan assets (%)	7	7

Provisions for pension obligations were recognized in the balance sheet as follows.

SEK in millions	Dec 31, 2022	Dec 31, 2023
Present value of pension obligations	2,05	2,05
Fair value of plan assets	-3,02	-3,02
Surplus capital in pension fund	1,28	1,28
<b>Provisions for pension obligations</b>	<b>30</b>	<b>30</b>

SEK in millions	Dec 31, 2023	Dec 31, 2022
Opening balance, pension obligations covered by plan assets	1,643	1,517
Opening balance, pension obligations not covered by plan assets	322	351
<b>Opening balance, total pension obligations</b>	<b>1,965</b>	<b>1,868</b>
Current service cost	7	10
Interest cost, paid-up policy indexation	220	72
Benefits paid	-132	-125
Other changes in valuation of pension obligations and termination benefits	-10	-3
Change in discount rate, consolidation reserve and other assumptions	0	143
<b>Closing balance, pension obligations covered by plan assets</b>	<b>1,746</b>	<b>1,643</b>
Closing balance, pension obligations not covered by plan assets	304	322
<b>Closing balance, total pension obligations</b>	<b>2,050</b>	<b>1,965</b>
<i>of which PRI Pensionsgaranti pensions</i>	<i>1,577</i>	<i>1,469</i>

Total pension expenses (+)/income (-) were distributed as follows.

SEK in millions	Dec 31, 2023	Dec 31, 2022
Current service cost	7	10
Interest cost, paid-up policy indexation	220	72
Less interest expenses recognized as financial expenses	-9	-10
Actual return on plan assets	-177	208
Divested operations, pension obligations	-1	0
Other changes in valuation of pension obligations	-12	-6
Termination benefits	3	1
Payments from pension fund	-30	-
Change in discount rate, consolidation reserve and other assumptions	0	143
<b>Pension expenses (+)/income (-), defined benefit pension plans</b>	<b>0</b>	<b>418</b>
Pension premiums, defined benefit/defined contribution pension plans and other pension costs	68	77
Pension-related social charges and taxes	35	39
Less termination benefits (incl. premiums and pension-related social charges) reported as restructuring cost	-1	-1
<b>Pension expenses (+)/income (-)</b>	<b>102</b>	<b>115</b>
Decrease (-)/increase (+) of surplus capital in pension fund	74	-334
<b>Recognized pension expenses (+)/income (-)</b>	<b>177</b>	<b>199</b>
<i>of which pension premiums paid to the ITP pension plan</i>	5	4

### Principal actuarial assumptions

The actuarial calculation of pension obligations and pension expenses is based on principles set by PRI Pensionsgaranti and the Swedish Financial Supervisory Authority, respectively. The principal calculation assumption is the discount rate which,

as a weighted average for the different plans and, as applicable, net of calculation was 1.0 % in 2023 (2.5). Obligations were calculated based on the salary levels pre December 31, 2023 and 2022, respectively.

### Plan-asset allocation

At the end of the reporting period, plan assets were allocated as follows.

Asset category	Dec 31, 2023	
	SEK in millions	%
Fixed income instruments, liquidity	1,423	47.0
Shares and other investments	1,605	53.0
<b>Total</b>	<b>3,028</b>	<b>100</b>

### Future contributions and pension payments

As of December 31, 2023, the fair value of plan assets exceeded the present value of pension obligations. Unless the fair value of plan assets during

2024 should fall short of the present value of pension obligations, Telia Company has no obligation to make any contribution to the plan.

## P16. Other provisions

Changes in other provisions were as follows.

SEK in millions	December 31, 2023				Total
	Payroll taxes on future pension payments	Restructuring provisions	Other provisions	Insurance provisions	
<b>Opening balance</b>	59	8	21	15	103
Provisions for the period	-	33	43	-	76
Utilized provisions	-3	-24	-11	-2	-40
Exchange rate differences	-	-	-1	-	-1
<b>Closing balance</b>	56	17	52	13	138
<i>of which non-current portion</i>	56	1	8	13	77
<i>of which current portion</i>	-	16	45	-	61

Full utilization of payroll taxes on future pension payments and insurance provisions is expected in the period 2025-2056. The provisions represent the present value of management's best estimate of the amounts required to settle the liabilities. Restructuring provisions mainly refer to staff redundancy costs. The remaining provision as of December 31, 2023, is expected to be fully utilized

in 2024. Other provisions include provisions for estimated expenses related to fulfilling representations made.

## P17. Non-current and current borrowings

### Open-market financing programs

For information on Telia Company's open-market financing programs, see Note C21.

### Borrowings

Non-current and current borrowings were distributed as follows.

SEK in millions	Dec 31, 2023
<b>Non-current borrowings</b>	83,11
Euro Medium Term Notes Program (EMTN)	57,01
Hybrid bonds	18,42
Other bilateral	1,91
Interest rate swaps	5,60
Cross-currency interest rate swaps	15
<b>Total non-current borrowings (Note P20)</b>	83,11
<b>Current borrowings</b>	9,90
Euro Medium Term Notes Program (EMTN)	9,90
Hybrid bonds	43
Interest rate swaps	43
Cross-currency interest rate swaps	27,96
Borrowings from subsidiaries (Note P23)	27,86
<i>of which from cash pool</i>	10
<i>of which other borrowings</i>	17
<b>Total current borrowings (Note P20)</b>	38,29
<b>Total borrowings</b>	121,40

As of December 31, 2023 fully unutilized bank overdraft credit facilities had a total limit of SEK (1,053).

## P18. Other non-current liabilities

The carrying value of other non-current liabilities were SEK 17 million (9), of which SEK 5 million (7) related to financial liabilities. For liabilities to

subsidiaries, see Note P23. For the years 2023 and 2022, no other non-current liabilities fell due more than 5 years after the end of the reporting period.

## P19. Current provisions, trade payables and other current liabilities

Current provisions, trade payables and other current liabilities were distributed as follows.

SEK in millions	Dec 31, 2023
Interest rate swaps	6
Currency derivatives (swaps and forwards)	209
Accounts payable	89
Liabilities to subsidiaries (Note P23)	2,090
Other current financial liabilities	2,628
<b>Total financial liabilities (Note P20)</b>	<b>5,022</b>
Other current liabilities and current provisions	230
<b>Total current provisions, trade payables and other current liabilities</b>	<b>5,251</b>

For Accounts payable and Current liabilities, the carrying value equals fair value as the impact of discounting is insignificant. For additional information on financial instruments classified by category/

fair value hierarchy level, see Note P20 and section "Liquidity risk management" in Note P21.

## P20. Financial assets and liabilities by category and level

### Carrying value by category and fair value

The following tables present carrying values by category and fair values for financial assets and financial liabilities.

#### Carrying value by category - Financial assets

SEK in millions	Note	Hedging instruments at fair value		Fair value through income statement		Fair value through OCI		Amortized cost		Total		Fair value at Dec 31, 2023

There were no material transfers between Level 1, 2 or 3 in 2023 or 2022.

Level 3 financial assets changed as follows.

SEK in millions	Dec 31, 2023	
	Equity instruments	Equi
<b>Level 3, opening balance</b>		<b>564</b>
Changes in fair value		302
of which recognized in income statement		-4
of which recognized in other comprehensive income		307
Purchases / share issue		15
Settlements		-13
Reclassifications		-
<b>Level 3, closing balance</b>		<b>869</b>

The fair value change in 2023 recognized in other comprehensive income of SEK 307 million in revaluation of Telia Company's 9.56% holding in Marshall Group AB. The investment was revalued to an estimated fair value of SEK 427 million in the fourth quarter 2023 based on the share price of the most recent larger transaction made for Marshall Group AB finalized in October 2023.

## P21. Financial risk management

### Principles, capital management and management of financial risks

For information relevant to Telio Company, see Note C27.

### Credit risk management

Telio Company's exposure to credit risk arises from default of counterparties (including price risks as regards investments in equity instruments), with a maximum exposure equal to the carrying amount of these instruments (detailed in the respective Note and excluding receivables from subsidiaries), as follows.

SEK in millions	Note	Dec 31, 2023	Dec 31, 2022
Other financial assets excluding investments and receivables on subsidiaries and associated companies and investments in other equity instruments	P11	7,104	5,965
Derivatives, accounts receivables, loans and receivables and other current financial receivables	P12	5,306	5,533
Short-term investments, cash and cash equivalents	P13	16,777	7,259
<b>Total</b>		<b>29,187</b>	<b>18,757</b>

Telio Company has an internal model for credit rating of subsidiaries used when pricing internal lending to subsidiaries. For information on the model, see Note P1 and for information on credit risk management relevant to Telio Company, see Note C27.

### Liquidity risk management

Liquidity risk is the risk that Telio Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. For

information on liquidity risk management relevant to Telio Company, see Note C27.

As of December 31, 2023, contractual undiscounted cash flows for interest-bearing borrowings and non-interest-bearing currency derivatives (excluding intra-group derivatives) represented the following expected maturities, including instalments and estimated interest payments. The balances due within 12 months equal their carrying values as the impact of discounting is insignificant.

1) For split into Euro Medium Term Notes program, hybrid bonds and other bilateral, see Note C27.

2) For split into cross-currency interest rate swaps and interest rate swaps, see Note C27.

Accounts payable and other current financial liabilities are expected to mature in the next quarter. Additional information on non-interest-bearing liabilities, guarantees and other commitments presented in Notes P16, P19 and P24, respectively.

## P22. Operating lease agreements

Telia Company leases primarily company cars from external parties. The leases are on commercial terms with respect to prices and duration. Future minimum leasing fees under operating lease

agreements in effect as of December 31, 2023 that could not be canceled in advance and were in excess of one year were as follows.

Expected maturity SEK in millions	Jan–		Apr–		Jul–		Oct–		Later years	Total
	Mar	2024	Jun	2024	Sep	2024	Dec	2024		
Future minimum leasing fees	1		1		1		1		2	5

In 2023 total rent and leasing fees paid were SEK 3 million (3).

## P23. Related party transactions

### General

Conventional commercial terms apply for the supply of goods and services to and from subsidiaries, associated companies and joint ventures.

### Subsidiaries

In 2023 sales to subsidiaries totaled SEK 2,006 million (1,641), while purchases from subsidiaries totaled SEK 0 million (110). For information regarding receivables from and liabilities to subsidiaries see Notes P11, P12, P17, P18 and P19.

### Commitments on behalf of related parties

Telia Company has made certain commitments on behalf of group companies and joint ventures. See Note P24 for further details.

### Other transactions

For descriptions of certain other transactions with related parties, see Note C29.

## P24. Contingencies, other contractual obligations and litigation

### Contingent assets and financial guarantees

As of the end of the reporting period, Telia Company had no contingent assets, while financial reported as contingent liabilities were distributed as follows.

SEK in millions	Dec 31, 2023
Guarantees on behalf of subsidiaries	24,082
Guarantees for pension obligations	41
<b>Total financial guarantees</b>	<b>24,123</b>

Some loan covenants agreed limit the scope for divesting or pledging certain assets. For information on change-of-control provisions included in some of Telia Company's more bond issuances, see Notes to consolidated financial statements (corresponding section in Note C30). For all financial guarantees issued, stated amounts equal the maximum potential future payments that Telia Company could be required to make under the respective guarantee. In addition to financial guarantees indicated above, guarantees for fulfillment of contractual undertakings are granted by Telia Company on behalf of subsidiaries, as part of the group's normal course of business. At the end of the reporting period, there was no indication that payment will be required in connection with any such contractual guarantee.

**Collateral pledged and other contractual obligations**  
As of the end of the reporting period, no collateral pledged and no contractual obligations regarding future assets (or equivalent) of non-current assets. Information see Note P10.

**Legal and administrative proceedings**  
For additional information relevant to company, see Note C30.

## P25. Cash flow information

### Non-cash transactions

No non-cash transactions were performed during 2023 or 2022.

### Liabilities and cash flows arising from financing activities

SEK in millions	Jan 1, 2023 Opening Balance	Cash flows	Foreign exchange movements	Fair value changes	Other changes <sup>1</sup>	Dec 31, 2023 Closing Balance	Non-cash changes

## Board of Directors' and President's certification

The Board of Directors and the President and CEO certify that the consolidated financial statements have been prepared in accordance with IFRSs as adopted by the EU and give a true and fair view of the Group's financial position and results of operations. The financial statements of the Parent Company have been prepared in accordance with generally accepted accounting principles in Sweden and give a true and fair view of the Parent Company's financial position and results of operations.

The Board of Directors' Report for the Group and the Parent Company provides a fair review of the development of the Group's and the Parent Company's operations, financial position and results of operations and describes material risks and uncertainties facing the Parent Company and the companies included in the Group.

## Auditors' Report

To the general meeting of the shareholders of Telia Company AB (publ) corporate identity number 556103-4249

### Report on the annual accounts and consolidated accounts

#### Opinions

We have audited the annual accounts and consolidated accounts of Telia Company AB (publ) for the financial year 2023-01-01 - 2023-12-31 except for the corporate governance statement on pages 52-71 and the statutory sustainability report on pages 72-135. The annual accounts and consolidated accounts of the company are included in pages 22-155 in this document.

In our opinion, the annual accounts have been prepared in accordance with the Annual Accounts Act and present fairly, in all material respects, the financial position of the parent company as of 31 December 2023 and its financial performance and cash flow for the year then ended in accordance with the Annual Accounts Act. The consolidated accounts have been prepared in accordance with the Annual Accounts Act and present fairly, in all material respects, the financial position of the group as of 31 December 2023 and their financial performance and cash flow for the year then ended in accordance with International Financial Reporting Standards (IFRS), as adopted by the EU, and the Annual Accounts Act. Our opinions do not cover corporate governance statement on pages 52-71 or the statutory sustainability report on pages 72-135. The statutory administration report is consistent

### Key Audit Matters

Key audit matters of the audit are those matters that, in our professional judgment, were of most significance in our audit of the annual accounts and consolidated accounts of the current period. These matters were addressed in the context of our audit of, and in forming our opinion thereon, the annual accounts and consolidated accounts as a whole, but we do not provide a separate opinion on these matters.

### Revenue recognition

#### Risk description

There is an inherent risk around the accuracy of revenue recorded given the complexity of the systems generating the revenue, the impact of changing pricing models to revenue recognition (tariff structures, incentive arrangements, discounts etc.) and different revenue streams.

Telia Company's revenues comprise several revenue streams such as mobile service revenues, fixed service revenues, advertising revenues and equipment revenues. Telia Company may bundle services and products into one customer offering. Offerings may involve the delivery or performance of multiple products, services, or rights to use assets and as such revenue recognition requires significant judgements and estimates on behalf of management as to when, and to which amount revenues are recognized.

For further information, refer to notes C1 "Basis of preparation", C3 "Material accounting policies", C6 "Revenue" and Not C18 "Trade and other current receivables and assets" of the consolidated accounts.

### Audit procedures

Our audit procedures included, but were not limited to:

- assessing the application of the group's policies with respect to delivery products and advertising and the accounting implications of new business model streams to verify that group accounting for these models were appropriate;
- evaluating the design and testing of internal controls used for revenue recognition;
- with the support of our information systems specialists testing the IT environment's billing, rating and other relevant controls including the change control process in the IT-systems for material revenue;
- analytical and detailed substantive testing on a sample basis for a selection of revenue; and
- evaluating the adequacy and disclosure of the various revenue streams.

### Carrying value of goodwill and non-current assets

#### Risk description

Telia Company's carrying values of goodwill and other non-current assets including film program rights represent a significant part of Company's total assets. Telia Company tests goodwill assets for impairment annually and all assets whenever events or conditions indicate that the carrying value of an asset may be recoverable. The determination of fair value amount, being the higher of fair value less costs of disposal and value in use, requires judgement and assessments on the part of management both identifying and then valuing the

generating units ("CGUs"). Management normally determines recoverable amounts based on value in use. Calculations of value in use are based on management's view of variables such as sales growth, EBITDA margin development, weighted average cost of capital ("WACC"), CAPEX-to-sales ratio and terminal growth rate.

For further information, refer to notes C2 "Judgments and key sources of estimation uncertainty", C12 "Goodwill and other intangible assets", C13 "Property, Plant and Equipment" and C14 "Film and program rights" of the consolidated accounts.

#### Audit procedures

Our audit procedures included, but were not limited to:

- evaluating the appropriateness of management's identification of the Group's CGUs;
- with the support of our valuation specialists, benchmarking and challenging key assumptions in management's valuation models used to determine recoverable amount, including assumptions of sales growth, EBITDA margin, WACC, CAPEX-to-sales ratio, and terminal growth rate;
- comparing historical forecasting to actual results;
- testing mathematical accuracy of the cash flow models and challenging and agreeing key assumptions to the long-term business plans approved by the Board of Directors;
- evaluating the adequacy of disclosures related to those assumptions and CGUs to which the outcome of the impairment tests are most sensitive; and
- evaluating the accounting principles and process for impairment tests for other non-current assets and film and program rights.

**Other information than the annual accounts and consolidated accounts**  
The Board of Directors and the Managing Director are responsible for other information. The other information includes the Remuneration Report and the pages 1-21 and 261-270 in this document but does not include the Annual accounts and the consolidated accounts or our Auditors Report.

Our opinion on the annual accounts and consolidated accounts does not cover this other information and we do not express any form of assurance conclusion regarding this other information.

In connection with our audit of the annual accounts and consolidated accounts, our responsibility is to read the information identified above and consider whether the information is materially inconsistent with the annual accounts and consolidated accounts. In this procedure we also take into account our knowledge otherwise obtained in the audit and assess whether the information otherwise appears to be materially misstated.

If we, based on the work performed concerning this information, conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Responsibilities of the Board of Directors and the Managing Director

The Board of Directors and the Managing Director are responsible for the preparation of the annual accounts and consolidated accounts and that they give a fair presentation in accordance with the Annual Accounts Act and, concerning the consolidated accounts, in accordance with IFRS as

adopted by the EU. The Board of Directors and the Managing Director are also responsible for such internal control as they determine is necessary to enable the preparation of annual accounts and consolidated accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts and consolidated accounts, The Board of Directors and the Managing Director are responsible for the assessment of the company's and the group's ability to continue as a going concern. They disclose, as applicable, matters related to going concern and using the going concern basis of accounting. The going concern basis of accounting is however not applied if the Board of Directors and the Managing Director intends to liquidate the company, to cease operations, or has no realistic alternative but to do so.

The Audit Committee shall, without prejudice to the Board of Director's responsibilities and tasks in general, among other things oversee the company's financial reporting process.

#### Auditor's responsibility

Our objectives are to obtain reasonable assurance about whether the annual accounts and consolidated accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and generally accepted auditing standards in Sweden will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the

economic decisions of users taken on these annual accounts and consolidated accounts. A further description of our responsibility audit of the annual accounts and consolidated accounts is available on Revisorsinspektionens website: [www.revisorsinspektionen.se/sansvar](http://www.revisorsinspektionen.se/sansvar). This description is part of the report.

## Report on other legal and regulatory requirements

### Opinions

In addition to our audit of the annual accounts and consolidated accounts, we have also administered the Board of Directors' Managing Director of Telia Company (for financial year 2023-01-01 - 2023-12-31) proposed appropriations of the company's

We recommend to the general meeting holders that the profit to be appropriated in accordance with the proposal in the administration report and that the Board of Directors and the Managing Director be discharged from liability for the financial

### Basis for Opinions

We conducted the audit in accordance with generally accepted auditing standards in Sweden and the Auditor's Responsibilities under those standards described in the Auditor's Report. We are independent of the parent company and are independent of the group in accordance with the professional requirements for accountants in Sweden and have filled our ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

**Responsibilities of the Board of Directors and the Managing Director**

The Board of Directors is responsible for the proposal for appropriations of the company's profit or loss. At the proposal of a dividend, this includes an assessment of whether the dividend is justifiable considering the requirements which the company's and the group's type of operations, size and risks place on the size of the parent company's and the group's equity, consolidation requirements, liquidity and position in general.

The Board of Directors is responsible for the company's organization and the administration of the company's affairs. This includes among other things continuous assessment of the company's and the group's financial situation and ensuring that the company's organization is designed so that the accounting, management of assets and the company's financial affairs otherwise are controlled in a reassuring manner. The Managing Director shall manage the ongoing administration according to the Board of Directors' guidelines and instructions and among other matters take measures that are necessary to fulfill the company's accounting in accordance with law and handle the management of assets in a reassuring manner.

**Auditor's responsibility**

Our objective concerning the audit of the administration, and thereby our opinion about discharge from liability, is to obtain audit evidence to assess with a reasonable degree of assurance whether any member of the Board of Directors or the Managing

Director in any material respect:

- has undertaken any action or been guilty of any omission which can give rise to liability to the company, or
- in any other way has acted in contravention of the Companies Act, the Annual Accounts Act or the Articles of Association.

Our objective concerning the audit of the proposed appropriations of the company's profit or loss, and thereby our opinion about this, is to assess with reasonable degree of assurance whether the proposal is in accordance with the Companies Act.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with generally accepted auditing standards in Sweden will always detect actions or omissions that can give rise to liability to the company, or that the proposed appropriations of the company's profit or loss are not in accordance with the Companies Act.

A further description of our responsibility for the audit of the administration is available on Revisorsinspektionen's website: [www.revisorsinspektionen.se/revisormansvar](http://www.revisorsinspektionen.se/revisormansvar). This description is part of the auditor's report.

As part of an audit in accordance with generally accepted auditing standards in Sweden, we exercise professional judgment and maintain professional scepticism throughout the audit. The examination of the administration and the proposed appropriations of the company's profit or loss is based primarily on the audit of the accounts. Additional audit procedures performed are based on our professional judgment with starting point in risk and materiality.

This means that we focus the examination on such actions, areas and relationships that are material for the operations and where deviations and violations would have particular importance for the company's situation. We examine and test decisions undertaken, support for decisions, actions taken and other circumstances that are relevant to our opinion concerning discharge from liability. As a basis for our opinion on the Board of Directors' proposed appropriations of the company's profit or loss we examined the Board of Directors' reasoned statement and a selection of supporting evidence in order to be able to assess whether the proposal is in accordance with the Companies Act.

**The auditor's examination of the Esef report**

**Opinion**

In addition to our audit of the annual accounts and consolidated accounts, we have also examined the Board of Directors and the Managing Director have prepared the annual accounts and consolidated accounts in a format that enables uniform electronic reporting (the Esef report) pursuant to Chapter 16, Section 4 a of the Swedish Securities Market Act (2007:528) for Telia Company AB (publ) for the financial year 2023-01-01 – 2023-12-31.

Our examination and our opinion relate only to the statutory requirements.

In our opinion, the Esef report has been prepared in a format that, in all material respects, enables uniform electronic reporting.

**Basis for opinion**

We have performed the examination in accordance with FAR's recommendation RevR 18 Examination

of the Esef report. Our responsibility under the recommendation is described in more detail in the Auditors' responsibility section. We are a member of Telia Company AB (publ) in accordance with professional ethics for accountants in Sweden. We have otherwise fulfilled our ethical requirements in accordance with these requirements.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

**Responsibilities of the Board of Directors and the Managing Director**

The Board of Directors and the Managing Director are responsible for the preparation of the annual accounts and consolidated accounts in accordance with the Swedish Securities Market Act and for such internal control that the Board of Directors and the Managing Director consider necessary to prepare the Esef report without material misstatements, whether due to fraud or error.

**Auditor's responsibility**

Our responsibility is to obtain reasonable assurance whether the Esef reports in all material respects prepared in a format that meets the requirements of Chapter 16, Section 4 a of the Swedish Securities Market Act (2007:528) for Telia Company AB (publ) in accordance with the procedures performed. RevR 18 requires us to plan and execute the audit to achieve reasonable assurance. The Esef report is prepared in a format that meets the requirements.

Reasonable assurance is a high level of assurance, but it is not a guarantee that an audit conducted in accordance with generally accepted auditing standards in Sweden will always detect actions or omissions that can give rise to liability to the company, or that the proposed appropriations of the company's profit or loss are not in accordance with the Companies Act.

accepted auditing standards in Sweden will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Esec report.

The firm applies International Standards on Quality Management, which requires the firm to design, implement and operate a system of quality management, including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

The examination involves obtaining evidence, through various procedures, that the Esec report has been prepared in a format that enables uniform electronic reporting of the annual accounts and consolidated accounts. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement in the report, whether due to fraud or error. In carrying out this risk assessment, and in order to design audit procedures that are appropriate in the circumstances, the auditor considers those elements of internal control that are relevant to the preparation of the Esec report by the Board of Directors and the Managing Director, but not for the purpose of expressing an opinion on the effectiveness of those internal controls. The examination also includes an evaluation of the appropriateness and reasonableness of assumptions made by the Board of Directors and the Managing Director.

The procedures mainly include a validation that the Esec report has been prepared in a valid XHTML format and a reconciliation of the Esec report with

the audited annual accounts and consolidated accounts.

Furthermore, the procedures also include an assessment of whether the consolidated statement of financial performance, financial position, changes in equity, cash flow and disclosures in the Esec report have been marked within XBRL in accordance with what follows from the Esec regulation.

### **Auditor's examination of the corporate governance report**

The Board of Directors is responsible for that the corporate governance statement on pages 53-72 has been prepared in accordance with the Annual Accounts Act.

Our examination of the corporate governance statement is conducted in accordance with FAR's auditing standard RevU 16. The auditor's examination of the corporate governance statement. This means that our examination of the corporate governance statement is different and substantially less in scope than an audit conducted in accordance with International Standards on Auditing and generally accepted auditing standards in Sweden. We believe that the examination has provided us with sufficient basis for our opinions.

A corporate governance statement has been prepared. Disclosures in accordance with chapter 6 section 6 the second paragraph points 2-6 of the Annual Accounts Act and chapter 7 section 31 the second paragraph the same law are consistent with the other parts of the annual accounts and consolidated accounts and are in accordance with the Annual Accounts Act.

### **The auditor's opinion regarding the statutory sustainability report**

The Board of Directors is responsible for the statutory sustainability report on pages 72-135, and that it is prepared in accordance with the Annual Accounts Act.

Our examination has been conducted in accordance with FAR's auditing standard RevR 12. The auditor's opinion regarding the statutory sustainability report. This means that our examination of the statutory sustainability report is different and substantially less in scope than an audit conducted in accordance with International Standards on Auditing and generally accepted auditing standards in Sweden. We believe that the examination has provided us with sufficient basis for our opinion.

A statutory sustainability report has been prepared.

Deloitte AB was appointed auditor of Telia Company by the general meeting of shareholders on the 2023-04-05 and has been the company's auditors since 2015-04-02.

Stockholm March 13th 2024

# Auditor's Limited Assurance Report

on Telia Company ABs (publ) Sustainability Report

This is the translation of the auditor's report in Swedish.

To Telia Company AB (publ), corporate identity number 556103-4249

## Introduction

We have been engaged by the Management of Telia Company AB (publ) to undertake a limited assurance engagement of the Telia Company AB Sustainability Report for the year 2023. The Company has defined the scope of the Sustainability Report on page 72-135 in this report.

## Responsibilities of the Board of Directors and the Executive Management for the Sustainability Report

The Board of Directors and the Executive Management are responsible for the preparation of the Sustainability Report in accordance with the applicable criteria, as explained on page 108 in the Annual and Sustainability Report, and in the Telia Company Sustainability Reporting Framework 2023, available at <https://www.teliacompany.com/en/category>, the accounting and calculation principles that the Company has developed. This responsibility also includes the internal control relevant to the preparation of a Sustainability Report that is free from material misstatements, whether due to fraud or error.

## Responsibilities of the auditor

Our responsibility is to express a conclusion on the Sustainability Report based on the limited assurance procedures we have performed. Our engagement is limited to historical information presented and does therefore not cover future-oriented information.

We conducted our limited assurance engagement in accordance with ISAE 3000 (revised) Assurance Engagements Other than Audits or Reviews of Historical Financial Information. A limited assurance engagement consists of making inquiries, primarily of persons responsible for the preparation of the Sustainability Report, and applying analytical and other limited assurance procedures. The procedures performed in a limited assurance engagement vary in nature from, and are less in extent than for, a reasonable assurance engagement conducted in accordance with International Standards on Auditing and other generally accepted auditing standards in Sweden.

The firm applies International Standard on Quality Management 1, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements. We are independent of

Telia Company AB (publ) in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements.

The procedures performed consequently do not enable us to obtain assurance that we would become aware of all significant matters that might be identified in a reasonable assurance engagement.

Accordingly, the conclusion of the procedures performed do not express a reasonable assurance conclusion.

Our procedures are based on the criteria defined by the Board of Directors and the Executive

Management as described above. We have used these criteria suitable for the preparation of the Sustainability Report.

We believe that the evidence we have obtained is sufficient and appropriate to provide a conclusion below.

## Conclusion

Based on the limited assurance procedures we have performed, nothing has come to our attention that causes us to believe that the Sustainability Report, is not prepared, in all material aspects, in accordance with the criteria defined by the Board of Directors and Executive Management.

Stockholm 13 March 2024

Deloitte AB

Net income per employee (SEK in thousands)	47	neg.	592	neg.	359

1) Human resource data is based on total Telia Company group, i.e. including both continuing and discontinued operations (when applicable).

## Alternative performance measures

**Alternative performance measures**  
In addition to financial performance measures prepared in accordance with IFRS, Telia Company presents non-IFRS financial performance measures. These alternative measures are considered to be important performance indicators for investors and other users of the Annual report. The alternative performance measures should be considered as a complement to, but not a substitute for, the information prepared in accordance with IFRS. Telia Company's definitions of these non-IFRS measures are described here and in the Definitions. These

terms may be defined differently by other companies and are therefore not always comparable to similar measures used by other companies.

### Service revenue

Service revenue like for like excludes exchange rate effects and is based on the current group structure, i.e. including the impact of any acquired operations and excluding the impact of any disposed operations, both in the current and in the comparable period, and was part of Telia Company's Outlook for 2023.

**EBITDA and Adjusted EBITDA**  
Telia Company considers EBITDA as a relevant measure for investors to be able to understand profit generation before investments in tangible, intangible and right-of-use assets.

To assist the understanding of Telia Company's underlying financial performance we believe it is also useful to analyze Adjusted EBITDA. Adjustment items within EBITDA are specified in Board of Director's Report, section "Adjustment items". Adjusted EBITDA like for like excludes exchange

rate effects and is based on the current structure, i.e. including the impact of any acquired operations and the impact of any disposed operations in current and in the comparable period of Telia Company's Outlook for 2023.

SEK in millions	Jan-Dec 2023	Jan-Dec 2022
Revenue	88,785	85,580
Excluded: Equipment revenue	-12,872	-12,533
<b>Service revenue (external)</b>	<b>75,912</b>	<b>73,047</b>
Excluded: Effects from changes in foreign exchange rates <sup>1</sup>	-1,363	-
Excluded: Effects from acquired and disposed operations	-63	-54
<b>Service revenue on a like-for-like basis</b>	<b>74,486</b>	<b>72,993</b>
Change (%) like for like	2.0	
of which Telco operations	66,273	64,167
Change (%) like for like, Telco operations	3.3	
of which TV and Media	8,213	8,826

1) Changes in foreign exchange rates refers to full year average rates prior year.

SEK in millions	Jan-Dec 2023	Jan-Dec 2022

Change (%) like for like	3.6	
of which Telco operations	30,200	
Change (%) like for like, Telco operations	5.3	
of which TV and Media	-221	
Excluded: Impact from energy cost changes <sup>2</sup>	-121	
<b>Adjusted EBITDA on a like-for-like basis excluding impact from energy cost changes<sup>2</sup></b>	<b>39,858</b>	<b>39,858</b>

1) Changes in foreign exchange rates refers to full year average rates prior year. 2) Energy costs changes 2023 compared to 2022.

### Adjusted operating income

Telia Company considers Adjusted operating income as a relevant measure to be able to understand the underlying financial performance of Telia Company. Adjustment items within operating income, continuing operations are specified in the Board of Director's Report, section "Adjustment items."

SEK in millions	Jan-Dec 2023	Jan-Dec 2022
<b>Operating income</b>	<b>4,980</b>	<b>-9,214</b>
Adjustment items within operating income	5,882	20,062
<b>Adjusted operating income</b>	<b>10,862</b>	<b>10,847</b>

### CAPEX and Cash CAPEX and Cash CAPEX to Revenue

Telia Company considers CAPEX and Cash CAPEX measures below as relevant measures to understand the group's investments in intangible, tangible and right-of-use assets (excluding goodwill, assets acquired in business combinations and asset retirement obligations). CAPEX, excluding fees for license and spectrum and right-of-use assets, was part of Telia Company's Outlook for 2023.

SEK in millions	Jan-Dec 2023	Jan-Dec 2022
Investments in intangible assets	4,682	3,810
Investments in property, plant and equipment	10,520	11,867
<b>CAPEX excluding right-of-use assets</b>	<b>15,202</b>	<b>15,677</b>
Investments in right-of-use assets	5,460	4,112
<b>CAPEX</b>	<b>20,662</b>	<b>19,789</b>
Excluded: investments in license and spectrum fees and right-of-use assets	-7,033	-4,522
<b>CAPEX excluding fees for licenses and spectrum and right-of-use assets</b>	<b>13,628</b>	<b>15,266</b>

### SEK in millions

<b>CAPEX</b>	<b>20,662</b>	<b>Jan-Dec 2023</b>
Excluded: investments in right-of-use assets	-5,460	
Net of not paid investments and additional payments from previous periods	-536	
<b>Cash CAPEX</b>	<b>14,666</b>	
Excluded: Cash CAPEX for licenses and spectrum fees	-1,039	
<b>Cash CAPEX, excluding fees for license and spectrum</b>	<b>13,627</b>	
<b>Revenue</b>	<b>88,785</b>	
<b>Cash CAPEX, excluding fees for licenses and spectrum in relation to Revenue (%)</b>	<b>15.3</b>	

### Free cash flow (continuing and discontinued operations)

Telia Company considers free cash flow as a relevant measure to be able to understand the group from operating activities and after CAPEX.

SEK in millions	Jan-Dec 2023
Cash flow from operating activities	44,671
Cash CAPEX (paid intangible and tangible assets)	15,466
<b>Free cash flow, continuing and discontinued operations</b>	<b>29,204</b>

### Operational free cash flow and Structural part of Operational free cash flow (continuing operations)

Telia Company considers Operational free cash flow as a relevant measure to be able to understand the cash flows that Telia Company is in control of. From the reported free cash flow from continuing operations dividends from associated companies are deducted as these are dependent

on the approval of boards and the AGMs of the associated companies. Licenses and spectrum payments are excluded as they generally refer to a longer period than just one year. Telia Company consider the structural part of Operational free cash flow to be Operational free cash flow less contribution from change in working capital and the measure was part of Telia Company's Outlook for 2023.

SEK in millions	Jan-Dec 2023	Jan-Dec 2022
Cash flow from operating activities from continuing operations	23,239	22,478
Cash CAPEX from continuing operations	-14,666	-15,146
<b>Free cash flow, continuing operations</b>	<b>8,573</b>	<b>7,333</b>
Excluded: Cash CAPEX for licenses and spectrum fees from continuing operations	1,039	449
Excluded: Dividends from associates from continuing operations	-134	-136
Repayments of lease liabilities	-2,822	-2,522
<b>Operational free cash flow</b>	<b>6,656</b>	<b>5,124</b>
Excluded: Changes in working capital	598	968
<b>Structural part of Operational free cash flow</b>	<b>7,254</b>	<b>6,092</b>

### Net debt

Telia Company considers Net debt to be an important measure to be able to understand the indebtedness.

SEK in millions	Dec 31, 2023
Non-current borrowings	99,589
of which lease liabilities, non-current	15,264
Less 50% of hybrid capital <sup>1)</sup>	-9,418
Current borrowings	14,286
of which lease liabilities, current	3,372
Less derivatives recognized as financial assets and hedging Non-current and current borrowings and related credit support annex (CSA)	-6,424
Less non-current bonds at fair value through income statement and OCI	-5,416
Less short-term investments	7,095
Less cash and cash equivalents	1,764
<b>Net debt</b>	<b>3,758</b>

1) 50% of hybrid capital is treated as equity, consistent with market practice for the type of instrument, and reduces net debt.

Derivatives recognized as financial assets and hedging non-current and current borrowings and related credit support annex (CSA) are part of the balance sheet line items Non-current interest-bearing receivables and Current interest-bearing receivables. Hybrid capital, calculated as nominal amount, is part of the balance sheet line item Non-current borrowings. Non-current value through OCI are part of the balance sheet line item Non-current interest-bearing receivables and Current interest-bearing receivables. Short-term investments are part of the sheet line item Current interest-bearing

### Net debt/Adjusted EBITDA ratio (continuing and discontinued operations)

Telia Company considers net debt in relation to adjusted EBITDA as a relevant measure to be able to understand the group's financial position.

SEK in millions, except for multiple	Dec 31, 2023	Dec 31, 2022
<b>Net debt</b>	<b>73,758</b>	<b>71,397</b>
Adjusted EBITDA continuing operations	30,254	28,954
Adjusted EBITDA discontinued operations	1,473	1,374
<b>Adjusted EBITDA</b>	<b>31,727</b>	<b>30,328</b>
<b>Net debt/Adjusted EBITDA ratio (multiple)</b>	<b>2.32x</b>	<b>2.35x</b>

### Adjusted EBITDA margin

Telia Company considers Adjusted EBITDA in relation to revenue as a relevant measure to be able to understand the group's profit generation and to be used as a comparative benchmark.

SEK in millions	Jan-Dec 2023	Jan-Dec 2022
Revenue	88,785	85,580
Adjusted EBITDA	30,254	28,954
<b>Adjusted EBITDA margin (%)</b>	<b>34.1</b>	<b>33.8</b>

## Definitions

### Concepts and key ratios

#### Acquisitions and other investments

Investments in goodwill, intangible and tangible non-current assets and right-of-use assets acquired in business combinations, shares and participations, and asset retirement obligations.

#### Adjusted EBITDA

EBITDA adjusted for adjustment items within EBITDA.

#### Adjusted EBITDA margin

Adjusted EBITDA as a percentage of revenue.

#### Adjusted equity

Reported equity attributable to owners of the parent less the (proposed) dividend. For the parent company also including untaxed reserves net of tax.

#### Adjusted operating income

Operating income adjusted for adjustment items within operating income.

#### Adjustment items

Comprise of capital gains and losses, impairment losses, restructuring programs (costs for phasing out operations and personnel redundancy costs and costs for major group wide business transformations) or other costs with the character of not being part of normal daily operations.

#### Advertising revenue

External revenue related to linear and digital/ Advertising Video on Demand (AVoD) media, sponsorships and other types of advertising.

#### ARPU

Average monthly revenue per user.

#### Blended churn

The number of lost subscriptions (postpaid and prepaid) expressed as a percentage of the average number of subscriptions (postpaid and prepaid).

#### Broadband revenue

External revenue related to fixed broadband services.

#### Business solutions revenue

External revenue related to fixed business networking and communication solutions.

#### CAPEX

An abbreviation of "Capital Expenditure". Investments in intangible and tangible non-current assets and right-of-use assets, but excluding goodwill, intangible and tangible non-current assets and right-of-use assets acquired in business combinations, film and program rights and asset retirement obligations.

#### CAPEX excluding license and spectrum fees

CAPEX deducted by license and spectrum fees.

**CAPEX excluding right-of-use assets**  
CAPEX excluding right-of-use assets.

#### Capital employed

Total assets less non-interest-bearing liabilities and non-interest-bearing provisions, and (proposed) dividend.

#### Cash CAPEX

CAPEX with addition/deduction of net of paid investments and additional payments from previous periods.

#### Core Telco business

Total Group less the TV and Media segment.

#### Earnings and equity per share

Earnings per share are based on the weighted average number of shares before and after dilution with potential ordinary shares, while equity per share is based on the number of shares at the end of the period. Earnings equal net income attributable to owners of the parent and equity is equity attributable to owners of the parent.

#### EBITDA

An abbreviation of "Earnings before Interest, Tax, Depreciation and Amortization." Equals operating income before depreciation, amortization and impairment losses and before income from associated companies and joint ventures but including amortization and impairment of film and program rights.

**EBITDA margin**  
EBITDA expressed as a percentage of revenue.

#### Employees

Total headcount excluding hourly paid employees.

#### Equipment revenue

External equipment revenue.

#### Equity/assets ratio

Adjusted equity and equity attributable to owners of the parent expressed as a percentage of total assets.

#### Free cash flow

The total cash flow from operating activities less cash CAPEX.

#### Internal revenue

Group internal revenue.

#### Like for like (%)

The change in revenue, external services revenue and adjusted EBITDA, excluding exchange rate effects and based on the current structure, i.e. including the impact of acquisitions, disposals and excluding the impact of disposed operations, both in the current and comparable period.

#### Mobile end user revenue

External revenue related to voice, messaging, data, value added services and content (machine-to-machine).

### Mobile Interconnect

External revenue related to mobile termination.

### Net debt

Interest-bearing liabilities less derivatives recognized as financial assets (and hedging non-current and current borrowings) and related credit support annex (CSA), less 50% of hybrid capital calculated as 50% of nominal amount (which, consistent with market practice for the type of instrument, is treated as equity), less short-term investments, non-current bonds at fair value through income statement and OCI and cash/cash equivalents.

### Net debt/adjusted EBITDA ratio (leverage)

Net debt divided by adjusted EBITDA rolling 12 months and excluding disposed operations.

### OCI

An abbreviation of "Other Comprehensive Income".

### Operating capital

Non-interest-bearing assets less non-interest-bearing liabilities, including (proposed) dividend, and non-interest-bearing provisions.

### Operational free cash flow

Free cash flow from continuing operations excluding cash CAPEX for licenses and spectrum fees, dividends from associated companies net of taxes and including repayment of lease liabilities.

### Other fixed service revenue

External revenue of fixed services including fiber installation, wholesale and other infrastructure services.

### Other mobile service revenue

External revenue related to visitors' roaming, wholesale and other services.

### Return on capital employed

Operating income, including impairments and gains/losses on disposals, plus financial revenue excluding foreign exchange gains expressed as a percentage of average capital employed.

### Return on equity

Net income attributable to owners of the parent expressed as a percentage of average adjusted equity.

### Segment assets and liabilities (Segment operating capital)

As Operating capital, but assets and liabilities excluding items related to foreign currency derivatives and accrued interest as well as to deferred and current tax, respectively, and liabilities excluding (proposed) dividend.

### Service revenue

External revenue excluding equipment sales.

### Structural part of Operational free cash flow

Operational free cash flow less contribution from change in working capital.

### Telephony revenue

External revenue related to fixed telephony services.

### TV revenue

External revenue related to TV services.

### Total shareholder return

Share price development during the year and dividend, in relation to shareprice at the beginning of the year expressed as a percentage.

## Notation conventions

In conformity with international standards, report applies the following currency

SEK	Swedish krona	JPY	Japan
DKK	Danish krone	NOK	Norway
EUR	European euro	USD	US dollar
GBP	Pound sterling	AUD	Australian dollar

## Annual General Meeting 2024

Telia Company's Annual General Meeting will be held on Wednesday, April 10, 2024, at 2 p.m. CEST at Telia Company's Head Office, Sjöjärntorget 1 in Solna, Sweden. The complete notice was published on Telia Company's website, [www.teliacompany.com](https://www.teliacompany.com), in the beginning of March 2024. As a service to the shareholders, simultaneous interpretation from Swedish to English as well as from English to Swedish will be provided at the Annual General Meeting.

### Participation

Shareholders who wish to participate in the Annual General Meeting must be recorded as a shareholder in the presentation of the share register prepared by the Swedish Central Securities Depository, Euroclear Sweden AB, concerning the circumstances on Tuesday, April 2, 2024, and give notice of participation no later than Thursday, April 4, 2024.

### Participation at the meeting venue

Shareholders who wish to attend the meeting venue in person or by proxy must give notice of participation no later than Thursday, April 4, 2024, on Euroclear Sweden AB's website <https://anmalan.vpc.se/euroclearproxy>, by telephone +46 (0)8 402 90 50, or by post to Telia Company AB, "AGM 2024", c/o Euroclear Sweden AB, P.O. Box 191, SE-101 23 Stockholm, Sweden. Shareholders shall in their notice to participate state their name, personal identification number or company registration number, address, telephone number and

advisors, if applicable. Shareholders represented by a proxy or a representative should send documents of authorization to the address above well in advance of the Annual General Meeting. A template proxy form is available on Telia Company's website [www.teliacompany.com](https://www.teliacompany.com).

### Participation by postal voting

Shareholders who wish to participate in the Annual General Meeting by postal voting in advance must give notice of participation by casting their postal vote so that the postal vote is received by Euroclear Sweden AB (administering the forms on behalf of Telia Company) no later than Thursday, April 4, 2024. A special form shall be used for postal voting. The postal voting form is available on Telia Company's website [www.teliacompany.com](https://www.teliacompany.com). The postal voting form can be submitted either by e-mail to [GeneralMeetingService@euroclear.com](mailto:GeneralMeetingService@euroclear.com), or by post to Telia Company AB, "AGM 2024", c/o Euroclear Sweden AB, P.O. Box 191, SE-101 23 Stockholm, Sweden. Shareholders may also cast their postal votes electronically through BankID verification via Euroclear Sweden AB's website <https://anmalan.vpc.se/euroclearproxy>. If the shareholder postal votes by proxy, a power of attorney shall be enclosed to the postal form. A template proxy form is available on Telia Company's website [www.teliacompany.com](https://www.teliacompany.com). If the shareholder is a legal entity, a certificate of incorporation or a corresponding document shall be enclosed to the postal voting form. Further instructions are

included in the postal voting form and on Euroclear Sweden AB's website <https://anmalan.vpc.se/euroclearproxy>.

### Shareholding in the name of a nominee

To be entitled to participate in the Annual General Meeting, shareholders whose shares are registered in the name of a nominee (including Finnish shareholders that are registered within the Finnish book-entry system at Euroclear Finland Oy) must re-register such shares in their own name so that the shareholder is recorded in the presentation of the share register as of Tuesday, April 2, 2024. Such re-registration may be temporary (voting rights registration) and can be requested from the nominee in accordance with the nominee's procedures in such time in advance as the nominee determines. Voting rights registrations effected by the nominee no later than on Thursday, April 4, 2024, will be considered in the presentation of the share register.

### Decisions to be made by the Annual General Meeting

The Annual General Meeting determines, among other matters, the appropriation of the Company's profits and whether to discharge the Board of Directors and CEO from liability. The Annual General Meeting also appoints the Directors of the Board and makes decisions regarding remuneration to the Board of Directors. The Board of Directors proposes that a dividend of SEK 2.00 per share in total is distributed to the shareholders in

four instalments of SEK 0.50 each. The record dates are Friday April 12, 2024, August 1, 2024, Thursday October 31, day February 7, 2025. If the Annual General Meeting resolves in accordance with the proposal estimated that Euroclear Sweden AB will make the payments on Wednesday April 17, day August 6, 2024, Tuesday November 12, 2024, and Wednesday February 12, 2025, re-

Til beregningen av lønnsforskjeller har vi delt opp fastlønn og ulike tillegg, slik som provisjon, overtidsgodtgjørelse, ubekvem arbeidstid-tillegg, bonuser og andre goder for regnskapsåret 2023. Vi har også vurdert likt arbeid og arbeid av lik verdi i utformingen av stillingsnivåene. Utformingen av stillingsnivåene er basert på eksisterende stillingskategorier i virksomheten og en vurdering av hvilke stillinger som inngår i de ulike nivåene. De tillitsvalgte blir hvert år presentert måten vi evaluerer stillingsnivåene på, og metodikken bak dette.

Vi har kartlagt ufrivillig deltid i bedriften vår basert på tilbakemeldinger fra ansatte i utviklingssamtaler med leder, og resultatene fra kartleggingen viste at kun ca. 5% av våre deltidsansatte kunne tenke seg å jobbe fulltid. En stor andel av våre deltidsansatte er studenter med et primært ønske om å kun jobbe deltid.

### Del 2: Vårt arbeid for likestilling og mot diskriminering

## **Prinsipper, prosedyrer og standarder for likestilling og mot diskriminering**

- Vårt likestillingsarbeid er forankret i virksomhetens ulike strategier, verktøy, retningslinjer og personalpolitikk.
- Vi har en egen likestillingsstrategi.
- Vi startet med eget kjønnsrammeverk med ambisjon om 50/50 på alle nivåer i alle jobbfamilier i selskapet. I 2021 gjennomførte vi på konsern nivå en pilotundersøkelse for å få tall på andre minoriteter som lhbt+, nedsatt funksjonsevne og etnisiteter. Undersøkelsen er planlagt å kjøres i full skala i løpet av 2024. Vi utvider også fokuset på kjønn og mangfold til å gjelde hele vår verdikjede, ved å sette krav til partnere og leverandører om å kontinuerlig jobbe med dette.

## **Slik jobber vi for å sikre likestilling og ikke-diskriminering i praksis:**

### **Rekruttering:**

- Trening av ledere i inkluderende rekrutteringspraksis.
- Våre rekrutterere jobber aktivt med annonsetekster for å forhindre at tekst bidrar til å ekskludere kjønn og minoritetsgrupper.
- Talent Acquisition gjennomfører sourcing og utfordrer ledere med en mer mangfoldig liste av finalekandidater.
- Kontinuerlig utfordrer og lærer opp rekrutterende ledere i diskusjoner om kandidatutvalg. I 2022 hadde vi internship i samarbeid med NAV gjennom Asker og Bærum voksenopplæring og JobbAsker. I 2023 hadde vi en trainee via Idea Kompetanse som jobber på oppdrag fra NAV, samt en ukrainsk flyktning på arbeidstrening.

### **Lønn:**

- Lønn fastsettes i forhold til nivået som stillingen innplasseres i, der jobbens kompleksitet, kompetanse, ansvar og påkrevd erfaring verdsettes og vurderes. Faktorer som ens kjønn, etnisitet, religion med mer er irrelevante i lønnsfastsettelsesprosessen.

### **Tillitsapparat:**

- Vi har hvert år fire møter med arbeidsmiljøutvalget der diskriminering er på agendaen ved hvert møte. Vi har også laget en risikokartlegging på diskriminering, som er en del av års hjulet vårt. Vi har avholdt workshop med verneorganisasjonen rundt diskriminerings, likestillings- og mangfolds risikoer og tiltak i mars 2022.
- Vi har i tillegg lagt diskriminering som et agendapunkt i årshjulet til ansattutvalget som består av alle ledere og nestledere i de fagforeningene som Telia er bundet av.

### **Forfremmelse og utvikling:**

- Som hovedregel utlyses alle ledige stillinger som et minimum internt, da også stillinger som vil innebære forfremmelse, og alle interne kandidater går igjennom vår standardiserte rekrutteringsprosess. Her har vi spesielt fokus på å sikre like muligheter for alle kandidater uavhengig av bakgrunn.
- Alle utviklingsmuligheter er åpne for alle og vi går jevnlig gjennom for å se at vi har en god kjønnsbalanse og mangfold i dette.
- Vi har en fleksibel aktivitetsbasert arbeidsplass, som legger til rette for gode muligheter til å kombinere arbeid og familieliv.

### **Arbeidsplassens utforming**

- Flere tiltak har blitt gjort i forbindelse med etablering av våre kontorlokaler, der hensyn til for eksempel funksjonsnedsettelse er ivaretatt gjennom universell utforming. Eksempler er blindeskrift på trappegelender, tilstrekkelig plass og lave/ingen dørstokker som hindrer fremkommelighet, samt tilrettelagt parkering i byggets kjeller. Hensyn til ulike kjønnsuttrykk er tatt gjennom at 90% av toalettene er kjønnsnøytrale.

## Slik jobber vi for å identifisere risiko for diskriminering og hindre for likestilling

- Ledelse, People Partners, Rekrutterere og Mangfolds- og inkluderingsansvarlig er alle involvert i arbeidet med å identifisere risiko for diskriminering og hindre for likestilling. Vi møtes i hovedsak kvartalsvis for å diskutere status og tiltak. Det blir behandlet i ledergruppen, i divisjonsmøter og i HR-møter.
- Vi har gjennomgått alle våre interne prosesser og prosedyrer for å sikre at de er så nøytrale og inkluderende som mulig. Alt fra UX, HR prosesser, til supplier code of conduct og finansiell investeringsstrategi blir gjennomgått.
- Vi har en tydelig policy på nulltoleranse for diskriminering og vi har flere kanaler der ansatte kan varsle om eventuelle brudd på dette, som for eksempel nærmeste leder, HR-partner verneorganisasjonen, tillitsvalgtapparatet og en egen anonym speak-up linje som er tilgjengelig for alle ansatte, samt eksterne som blant annet underleverandører.

## Vi oppdaget følgende risikoer for diskriminering og hindre for likestilling

Risiko:	Hinder:	Tiltak:
Ubevisste fordommer blant rekrutterende ledere	Lettere å ta det trygge valget enn å bevisst velge annerledes	Alle ledere trenes i inkluderende rekrutteringspraksiser og ubevisste fordommer. Rekrutterere og People Partners utfordrer rekrutterende leder ift. valg av kandidat for å sikre større mangfold
Graden av opplevd fleksibilitet kan variere	Ledere gir ikke nok rom for fleksibilitet der det er mulig	Sikre økt fleksibilitet der det er rom for det, som et viktig tiltak for å romme ulike behov og livssituasjoner. Corona har også økt graden av opplevd fleksibilitet. Blir viktig å beholde denne. Vi har introdusert muligheten for å arbeide i inntil 30 dager pr år innen EU.

Risiko:	Hinder:	Tiltak:
Engelsk som konsernspråk	Lokalt avholdes mange møter på norsk, det kan føles fremmedgjørende for våre engelskspråklige	Majoriteten av alle saker som publiseres på intranett finnes både på norsk og engelsk. Stort sett alle powerpoint-presentasjoner til fellesmøter har engelsk tekst.
Variasjoner i lønn ved andre kontante ytelser	Menn mottar mer kompensasjon i form av salgsprovisjon og fast bilgodtgjørelse. Kvinner jobber mindre ubekvem arbeidstid.	Aktivt jobbe for å rekruttere flere kvinner til salgsstillinger der salgsprovisjon og fast bilgodtgjørelse er utbredt.
Diskriminering og trakassering	Få som rapporterer inn diskriminering og trakassering. Mens det ble innrapportert to saker i 2021, var det ingen saker innrapportert i 2022. I 2023 ble det innrapportert fire saker som omhandlet diskriminering og trakassering.	Konkrete kampanjer for bevisstgjøring av våre rapporteringskanaler. Forsterke et arbeidsmiljø hvor man føler seg trygg nok til å si ifra om adferd som ikke er akseptabel.
Ubalansert utgangspunkt hva gjelder lønn i enkelte stillingskategorier og nivåer	Utilstrekkelig oppfølging ift. fastsetting av grunnlønn.	Gjøre ledere bevisst ift. likestilt lønnsfastsettelse ved ansettelsesprosess, og i forkant av årlig lønnsoppgjør.
Manglende likelønn	Manglende forståelse for viktigheten av å lukke gapene.	Gjennomfører hvert år en likelønnsanalyse på tvers av alle våre 7 land for å kunne sammenligne og lære av hverandre med tiltaksplan for å lukke gapene.
Vi rekrutterer flere menn enn kvinner	Følger ikke etablert policy	Sørge for å attrahere og inkludere flere kvinner i rekrutteringsprosessen. Utfordre ledere til at begge kjønn er representert i finale-etappen av en rekrutteringsprosess.

Risiko:	Hinder:	Tiltak:
Ekskluderende jobbannonser og rekrutteringsprosess	Kompetanse blant ledere og at rekrutterer ikke involveres tidlige nok.	Vi har hatt en gjennomgang av alt fra tekst til bilder i våre jobbannonser, samt jevnlig gjennomgang av vår rekrutteringsprosess for å sikre tilfang av en mer mangfoldig gruppe talenter.
Mangel på kompetanse om mangfold	Ledere og ansatte ønsker kunnskap, men opplever ofte mangel på tid til å delta på relevante læringsarenaer.	Vi har hvert kvartal våre globale «Diversity Talks» der vi setter ulike temaer, som LHBT+, funksjonsevne, kvinner i teknologi, allies osv. på agendaen. Dette er en stor utviklingsarena som treffer opptil 1300 deltakere hver gang. Fortsette å gjennomføre planlagte årlige aktiviteter for kvinnedagen og Pride. I 2023 etablerte vi grupper for ansatte med forskjellige temaer rundt mangfold for å sikre økt grad av inkludering og fellesskap. Eksempler på grupper er «Diverse Faiths & Cultures», «Functional diversity».
Ekskluderende toaletter	At ikke alle er for ny toalettinndeling	I vårt nye kontor har vi 90% unisex toaletter for å sørge for at alle føler seg velkommen. 10% separate mann/kvinne toalett er beholdt for å også inkludere de som ønsker kjønnsdelte toaletter.
Kan ikke identifisere seg med sitt kjønn i Workday, vårt personalsystem	For få kategorier	Vi har tilrettelagt for at alle ansatte kan velge å identifisere seg med flere kjønnskategorier.

Risiko:	Hinder:	Tiltak:
Ikke nok intern kompetanse om mangfold	Sile ut relevante arenaer og allokere tid til kompetanseheving.	Vi er med i en rekke mangfoldsnettverk for å øke vår egen kompetanse, lære av andre og dele av våre erfaringer. Vi har sterk tro på at vi sammen blir best. Gjennom Telia Company er vi også en del av initiativet «Nordic CEOs for a more sustainable future» for å lære av andre selskaper og sammen forplikte oss til mer handling.

## Resultater av arbeidet

- Vi har allerede vunnet en rekke priser for mangfolds arbeidet vårt globalt.
- Vi har lyktes i å trene 92% av våre ledere i inkluderende lederskap.
- Vi har lyktes å oppnå en kvinneandel hos våre ledere på 31% i 2023. Vi har som mål at dette skal være 50% innen 2025. Vi ser på om vi kan sette mer ambisiøse delmål på veien dit.
- Vi har gjennomført en kampanje med fokus på mental helse som fikk stor oppmerksomhet i organisasjonen.
- Sammen med en rekke ildsjeler har vi også i fjor lyktes med å opprette en diversity hub, der en rekke initiativer ansatte i organisasjonen har kommet og blitt løftet opp, blant annet intern bevissthet rundt psykisk helse, Norsk-kurs og tilrettelegging for engelskspråklige.
- Vi har signert en eksternt CEO forpliktelse til å jobbe detaljert med kjønn og etnisk mangfold, i regi av Oda og Mak.
- Vi ser en holdningsendring hos rekrutterende ledere når det kommer til åpenhet rundt kandidatutvalg, men ser fortsatt en tendens mot å gå for det «tryggeste» valget i mange tilfeller.
- I vår medarbeiderundersøkelse fra november 2022 sier 90% at de behandles med respekt og 74% sier at de har en god balanse i arbeid- og privatliv.
- I vår onboarding-undersøkelse som sendes ut til alle nyansatte sier 95% at de føler seg komfortable med å være seg selv.

## Forventninger til arbeidet framover

- I året som kommer vil vi ha fokus på å fortsette kompetanseutviklingsarenaene våre med våre kvartalsvise «Diversity Talks» for å bygge kompetanse og bevissthet både internt og eksternt.
- Vi vil kjøre et internt sponsorprogram to runder i år for å løfte mangfoldige talenter, samt fortsette med en rekke internship initiativ.
- Ledertreningene i Inclusive Recruitment Practices og Unconscious Bias vil fortsette å rulle med mål om 100%. Treningene vil oppdateres i løpet av 2024.

UAVHENGIG REVISORS BERETNING

## Konklusjon

Vi har revidert årsregnskapet for Telia Norge AS som består av balanse per 31. desember 2023, resultatregnskap, utvidet resultatregnskap, kontantstrømoppstilling for regnskapsåret avsluttet per denne datoen og noter til årsregnskapet, herunder et sammendrag av viktige regnskapsprinsipper.

Etter vår mening

- oppfyller årsregnskapet gjeldende lovkrav, og
- gir årsregnskapet et rettviseende bilde av selskapets finansielle stilling per 31. desember 2023 og av dets resultater og kontantstrømmer for regnskapsåret avsluttet per denne datoen i samsvar med forenklet anvendelse av internasjonale regnskapsstandarder etter regnskapsloven § 3-9.

## Grunnlag for konklusjonen

Vi har gjennomført revisjonen i samsvar med International Standards on Auditing (ISA-ene). Våre oppgaver og plikter i henhold til disse standardene er beskrevet nedenfor under *Revisors oppgaver og plikter ved revisjonen av årsregnskapet*. Vi er uavhengige av selskapet i samsvar med kravene i relevante lover og forskrifter i Norge og International Code of Ethics for Professional Accountants (inkludert internasjonale uavhengighetsstandarder) utstedt av International Ethics Standards Board for Accountants (IESBA-reglene), og vi har overholdt våre øvrige etiske forpliktelser i samsvar med disse kravene. Innhentet revisjonsbevis er etter vår vurdering tilstrekkelig og hensiktsmessig som grunnlag for vår konklusjon.

## Øvrig informasjon

Styret og daglig leder (ledelsen) er ansvarlige for informasjonen i årsberetningen og annen øvrig informasjon som er publisert sammen med årsregnskapet. Øvrig informasjon omfatter informasjon i årsrapporten, bortsett fra årsregnskapet og den tilhørende revisjonsberetningen. Vår konklusjon om årsregnskapet ovenfor dekker verken informasjonen i årsberetningen eller annen øvrig informasjon.

I forbindelse med revisjonen av årsregnskapet er det vår oppgave å lese årsberetningen og annen øvrig informasjon. Formålet er å vurdere hvorvidt det foreligger vesentlig inkonsistens mellom årsberetningen, annen øvrig informasjon og årsregnskapet og den kunnskap vi har opparbeidet oss under revisjonen av årsregnskapet, eller hvorvidt informasjon i årsberetningen og annen øvrig informasjon ellers fremstår som vesentlig feil. Vi har plikt til å rapportere dersom årsberetningen eller annen øvrig informasjon fremstår som vesentlig feil. Vi har ingenting å rapportere i så henseende.

Basert på kunnskapen vi har opparbeidet oss i revisjonen, mener vi at årsberetningen

- er konsistent med årsregnskapet og
- inneholder de opplysninger som skal gis i henhold til gjeldende lovkrav.

## Ledelsens ansvar for årsregnskapet

Ledelsen er ansvarlig for å utarbeide årsregnskapet og for at det gir et rettviseende bilde i samsvar med forenklet anvendelse av internasjonale regnskapsstandarder etter regnskapsloven § 3-9. Ledelsen er også ansvarlig for slik internkontroll som den finner nødvendig for å kunne utarbeide et årsregnskap som ikke inneholder vesentlig feilinformasjon, verken som følge av misligheter eller utilsiktede feil.

Deloitte AS and Deloitte Advokatfirma AS are the Norwegian affiliates of Deloitte NSE LLP, a member firm of Deloitte Touche Tohmatsu Limited ("DTTL"), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as "Deloitte Global") does not provide services to clients. ## Deloitte.

side 2  
Uavhengig revisors beretning  
Telia Norge AS

Ved utarbeidelsen av årsregnskapet må ledelsen ta standpunkt til selskapets evne til fortsatt drift og opplyse om forhold av betydning for fortsatt drift. Forutsetningen om fortsatt drift skal legges til grunn for årsregnskapet med mindre ledelsen enten har til hensikt å avvikle selskapet eller legge ned virksomheten, eller ikke har noe realistisk alternativ til dette.

### *Revisors oppgaver og plikter ved revisjonen av årsregnskapet*

Vårt mål er å oppnå betryggende sikkerhet for at årsregnskapet som helhet ikke inneholder vesentlig feilinformasjon, verken som følge av misligheter eller utilsiktede feil, og å avgi en revisjonsberetning som inneholder vår konklusjon. Betryggende sikkerhet er en høy grad av sikkerhet, men ingen garanti for at en revisjon utført i samsvar med ISA-ene, alltid vil avdekke vesentlig feilinformasjon. Feilinformasjon kan oppstå som følge av misligheter eller utilsiktede feil. Feilinformasjon er å anse som vesentlig dersom den enkeltvis eller samlet med rimelighet kan forventes å påvirke de økonomiske beslutningene som brukerne foretar på grunnlag av årsregnskapet.

Som del av en revisjon i samsvar med ISA-ene, utøver vi profesjonelt skjønn og utviser profesjonell skepsis gjennom hele revisjonen. I tillegg:

- identifiserer og vurderer vi risikoen for vesentlig feilinformasjon i årsregnskapet, enten det skyldes misligheter eller utilsiktede feil. Vi utformer og gjennomfører revisjonshandlinger for å håndtere slike risikoer, og innhenter revisjonsbevis som er tilstrekkelig og hensiktsmessig som grunnlag for vår konklusjon. Risikoen for at vesentlig feilinformasjon som følge av misligheter ikke blir avdekket, er høyere enn for feilinformasjon som skyldes utilsiktede feil, siden misligheter kan innebære samarbeid, forfalskning, bevisste utelatelser, uriktige fremstillinger eller overstyring av internkontroll.
- opparbeider vi oss en forståelse av intern kontroll som er relevant for revisjonen, for å utforme revisjonshandlinger som er hensiktsmessige etter omstendighetene, men ikke for å gi uttrykk for en mening om effektiviteten av selskapets interne kontroll.
- evaluerer vi om de anvendte regnskapsprinsippene er hensiktsmessige og om regnskapsestimatene og tilhørende noteopplysninger utarbeidet av ledelsen er rimelige.
- konkluderer vi på om ledelsens bruk av fortsatt drift-forutsetningen er hensiktsmessig, og, basert på innhentede revisjonsbevis, hvorvidt det foreligger vesentlig usikkerhet knyttet til hendelser eller forhold som kan skape tvil av betydning om selskapets evne til fortsatt drift. Dersom vi konkluderer med at det eksisterer vesentlig usikkerhet, kreves det at vi i revisjonsberetningen henleder oppmerksomheten på tilleggsopplysningene i årsregnskapet, eller, dersom slike tilleggsopplysninger ikke er tilstrekkelige, at vi modifierer vår konklusjon. Våre konklusjoner er basert på revisjonsbevis innhentet frem til datoen for revisjonsberetningen. Etterfølgende hendelser eller forhold kan imidlertid medføre at selskapet ikke kan fortsette driften.
- evaluerer vi den samlede presentasjonen, strukturen og innholdet i årsregnskapet, inkludert tilleggsopplysningene, og hvorvidt årsregnskapet gir uttrykk for de underliggende transaksjonene og hendelsene på en måte som gir et rettviseende bilde.

Vi kommuniserer med styret blant annet om det planlagte innholdet i og tidspunkt for revisjonsarbeidet og eventuelle vesentlige funn i revisjonen, herunder vesentlige svakheter i intern kontroll som vi avdekker gjennom revisjonen.

ÅRSRAPPORT 2023 TELIA NORGE

## Årsberetning 2023 for Telia Norge AS

Beløp vises i millioner kr

### Selskapets virksomhet og lokalisering

Telia Norge AS har sin virksomhet innen mobil telekommunikasjon, bredbånd, TV og datakom, samt tjenester knyttet til dette. Selskapet er et heleid datterselskap av Telia Company AB, som er et ledende telekommunikasjonskonsern i Norden og Baltikum.

Telia Norge AS sine inntekter er generert innen det norske markedet, med unntak av internasjonale trafikkinntekter. Selskapet har sitt hovedkontor på Økern i Oslo. Selskapet har totalt 43 butikklokasjoner i Norge. I tillegg har selskapet kundesenterlokasjoner i Trondheim og Oslo.

### Hovedtrekk

Telia leverte et bra år i 2023, med kundevekst og inntektsvekst på 4,2%. Året 2023 bydde på flere utfordringer, med høy inflasjon og makroøkonomisk usikkerhet. Som selskap har vi fortsatt å utfordre markedet i høyt tempo. Nye og viktige milepæler er blitt nådd, og vårt robuste mobil- og fastnett fortsatte å holde stand. Noen viktige høydepunkter i 2023 var den fortsatt offensive 5G-utbyggingen landet over som nå nærmer seg slutfasen hvor vi nådde hele ni av ti nordmenn som fikk tilgang til det nye og raske mobilnettet. For bedriftsmarkedet fortsetter vi å utvide våre leveranser innen både mobil og bredbånd til samfunnskritiske aktører som Forsvaret, Oslo Kommune og Posten.

Telias partnernettverk har fortsatt å vokse i 2023 som følge av flere nye partnere og en organisk vekst i eksisterende base. Vi jobber kontinuerlig for å sikre enda bedre kundeopplevelser og har lansert en rekke nye produkter og tjenester, som nye ubegrenset data-abonnement og private mobilnett for bedrifter, hvor vi var først i Norge. Det er også gledelig å se at salget av brukte mobiltelefoner fortsetter å vokse.

Telia markerer seg fortsatt sterkt innen kundetilfredshet på mobilsiden, med OneCall og Phonero som gikk til topps på EPSI sin måling av kundetilfredshet i mobilmarkedet.

Omsetning i 2023 var på MNOK 14 567 (2022: MNOK 13 928). Driftsresultatet endte på MNOK 2 624 (2022: MNOK 3 045) med en margin på 17,9 % (2022: 21,8 %). Endring i resultat og margin skyldes i hovedsak økte avskrivninger og nedskrivninger knyttet til driftsmidler, samt økte driftskostnader.

### Marked og produkter

Telia Norge AS bruker årlig store ressurser gjennom sine merkevarer Telia, OneCall, MyCall og Phonero på å utvikle og tilby nye innovative tjenester.

I tillegg til kontinuerlig utvikling av produkt- og tjenestetilbudet, er det til enhver tid et sterkt fokus på å bedre kundeopplevelsen. Viktige parametere her er kort svartid til kundene, høy kvalitet på service som ytes med samkjørt multikanalopplevelse både via tradisjonell kundesenterfunksjon, online tjenester, sosiale medier, samt fysisk kundeservice gjennom selskapets butikker. Å kunne tilby kundene interaktiv kundeservice er et viktig bidrag for å nå selskapets målsetninger knyttet til å yte god service.

## Pris og konkurranse

Ved utgangen av 2023 ble antall mobilabonnement i Norge anslått til å være rundt 6,1 millioner, og konkurransen mellom tilbyderne i markedet er stor. Telia Norge AS har i 2023 en nedgang i kundebasen fra 2 254 200 per 01.01.2023 til 2 159 111 per 31.12.2023, drevet av sterk konkurranse i privatmarkedet.

Telia Norge hadde ved utgangen av 2023 en bredbåndskundebase på ca 499 000 bredbåndskunder, litt mindre enn utgangen av 2022. Antall TV kunder var ca 474 000, en nedgang på ca 1 000 fra utgangen av 2022.

Telia Norge har i løpet av 2023 fortsatt med utbygning av 5G, og over 92% av Norges befolkning hadde ved utgangen av 2023 5G dekning fra Telia. Med dette, samt modernisering av 4G nettverk og fastnett, i tillegg til sikring av viktige frekvenser, anser styret at selskapet står godt rustet for å møte konkurransen i markedet i tiden fremover.

Telia Norge AS vil til enhver tid bestrebe seg på å gi kundene kvalitetsprodukter og tjenester til konkurransedyktige priser samtidig som man opprettholder kostnadsfokus. Samtidig har selskapet kontinuerlig fokus på å tilpasse seg konkurranse fra nye typer konkurrenter.

## Forskning og utvikling

Telia Norge sine tjenester bidrar til et mer åpent og digitalt inkluderende samfunn gjennom å gi muligheter for flere mennesker å kommunisere bedre og enklere. Selskapet er derfor opptatt av teknologi og en digital fremtid. I løpet av 2023 har Telia Norge AS jobbet med systemer for å innhente kundeinnsikt på en måte som ivaretar kundens anonymitet, samt forbedre selvbetjeningsløsninger for kundene.

Selskapet ønsker å fremme innovasjon og tilegne seg nye prosesser, kunnskap og ferdigheter for å kunne utvikle nye eller forbedre produkter eller tjenester til sine kunder.

Telia har etablert en 5G-lab der vi utforsker det nyeste innen mobilteknologi og innovative løsninger. Denne laben er utstyrt med privatnett, militære løsninger, robotarmer, avanserte modemer og antennteknologi. I dag fungerer laben som et showcase-rom for kunder og andre interessenter, i tillegg til å være et sted for testing.

Vi er aktive deltakere i ulike forskningsprosjekter, der vi sammen med våre kunder utvikler mobilteknologi for å forbedre eller legge til rette for fremtidsrettede tjenester. Telia er bl.a. involvert i følgende prosjekter: SFI autoships, Hypos, Herøyas test av fremtidensindustri, Forsvarets test av mobilteknologi som framtidens kommunikasjonsbærer, GeoTracks og Oceanlab.

Telia har som mål å gjøre samfunnet bedre ved å støtte smarte ideer gjennom nettverk, 5G og teknologi. Dette gjør vi bl.a. ved å arrangere Telia Startup. Telia Startup er et mentorprogram som retter seg mot gründere med potensial til å skalere opp virksomhetene sine ved hjelp av kommunikasjonsteknologi.

Telia er stolt av å bidra til teknologisk fremgang og samfunnsutvikling gjennom slike initiativer

## Finans

De økonomiske resultatene for 2023 viser at Telia fortsatt gjør det bra. Vi leverer et sterkt økonomisk resultat drevet av fornøyde kunder på både privat og bedriftssiden, og et sterkt kostnadsfokus som bidrar til en fortsatt høy investering i nettverkskvalitet for kundene.

I 2023 hadde Telia Norge AS en omsetning på MNOK 14 567 (2022: MNOK 13 928).

Resultatet før skattekostnad var på MNOK 1 868 (2022: MNOK 2 450). Driftsresultatet var MNOK 2 624 (2022: MNOK 3 045). Avskrivninger og nedskrivninger utgjorde MNOK 2 751 (2022: MNOK 2 582). Ordinært resultat etter skatt ble i 2023 på MNOK 1 482 (2022: MNOK 1 912). Selskapet hadde i 2023 en skattekostnad på ordinært resultat på MNOK 386.

Selskapet hadde per 31.12.2023 en meget solid balanse og positiv kontantstrøm fra driften. Totalkapitalen var ved utgangen av året MNOK 40 910 (2022: 39 237). Tilsvarende var egenkapitalandelen pr 2023 23,5 % (2022: 33,5 %).

Netto kontantstrøm fra operasjonelle aktiviteter var i 2023 MNOK 3 460 (3 758 MNOK i 2022). Kontantstrøm fra finansiell aktivitet var på -872 MNOK (-632 MNOK i 2022), og på -2 579 MNOK fra investeringsaktivitet (-3 130 MNOK i 2022). Avviket mellom driftsresultat i 2023 (2 624 MNOK) og kontantstrøm fra operasjonell aktivitet (3 460 MNOK) skyldes primært årets av- og nedskrivninger.

## Risikoforhold

Virksomheten til Telia Norge AS er gjenstand for en rekke risikoforhold, fremfor alt av regulatorisk, finansiell og juridisk art. Selskapet vil understreke at det normalt er betydelig usikkerhet knyttet til vurderinger av fremtidige forhold.

Valutarisiko: Selskapet har i liten grad transaksjoner i utenlandsk valuta. Transaksjonsvaluta i disse tilfeller er hovedsakelig SEK og EUR, og transaksjonene er da hovedsakelig mot andre selskaper i konsernet, samt mot enkelte større leverandører. Selskapet vurderer i enkelte tilfeller om terminkontrakter i EUR skal benyttes for å redusere selskapets valutarisiko.

Renterisiko: Selskapet er i liten grad eksponert for renterisiko overfor eksterne parter da det ikke foreligger noen løpende eksterne lån. Renterisikoen knytter seg i all hovedsak til konserninterne låneavtaler.

Kredittrisiko: Risikoen for tap på fordringer er vurdert som lav. Fordringsmassen til selskapet består i all hovedsak av mange små fordringer mot enkeltkunder, risikoen er dermed spredd. Faktisk konstaterte tap gjennom året utgjorde MNOK 70 (MNOK 58 i 2022).

Likviditetsrisiko: Ledelsen vurderer likviditeten i selskapet som tilfredsstillende. Det er ikke besluttet å innføre tiltak som endrer risikoen. Forfallstidspunkter for kundefordringer opprettholdes og andre langsiktige fordringer er ikke vurdert reforhandlet eller innløst. Selskapet har tilgang til likviditet gjennom Telia Company ABs konsernkontoordning.

## Organisasjon, ansatte, likestilling, diskriminering og kultur

Telia Norge AS har en organisasjonsstruktur som er inndelt i følgende operasjonelle divisjoner: Consumer, Enterprise, Infrastruktur og Customer Service & Delivery. Hver av divisjonene ledes av en divisjonsdirektør. I tillegg har selskapet stabsfunksjoner som HR, Finans, Kommunikasjon og Juridisk.

Ved utgangen av 2023 hadde selskapet 2032 antall årsverk.

Kvinneandelen var på 29%, og 31% kvinnelige ledere. I den øverste ledergruppen er kvinneandelen 20 %.

Telia Norge AS har lik arbeidstidsordning for kvinner og menn, samt lik ordning for kvinner og menn når det gjelder lønn under foreldrepermisjon.

Telia Norge AS ønsker å stimulere til målrettet og resultatorientert innsats gjennom en bonusordning for alle ansatte. Bonus kommer i tillegg til grunnlønn. Denne er variabel og baserer seg på bedriftens og Telia-konsernets resultat, samt den enkelte ansattes egne prestasjoner.

Telia Norge AS har et godt arbeidsmiljø, og selskapets årsrapporter fra bedriftshelsetjenesten bekrefter dette for alle selskapets kontorlokasjoner. Det avholdes jevnlig møter både med tillitsvalgte og selskapets arbeidsmiljøutvalg.

Telia Norge følger intensjonsavtalen av 1. januar 2019 om et mer inkluderende arbeidsliv. Vi som selskap har et fokus på et inkluderende, forebyggende og godt arbeidsmiljø, med systematiske tiltak for reduksjon i sykefraværet.

Det gjennomføres blant annet årlige helseprofilundersøkelser, hvor ansatte får tilbud om en helsekartlegging samt en rådgivende samtale med tanke på livsstil og helse sammen med representanter fra bedriftshelsetjenesten. Ansatte som ender i risikosone får tilbud om individuell oppfølging. Alle fast ansatte i Telia Norge er omfattet av selskapets helseforsikring og de ansatte har tilgang på HMS rådgiver og fysioterapeut ukentlig på arbeidsplassen, og det arrangeres også ukentlige energipauser med fokus på forebygging av muskelpager. I tillegg til et aktivt bedriftsidrettslag som sponses av bedriften, arrangeres årlige helsefremmende tiltak for å fremme fysisk aktivitet, mental helse og engasjement. Telia Norge innledet i 2023 et samarbeid med NAV for å styrke arbeidet med sykefravær med spesiell fokus på kundesenteret. Både forebyggende og målrettet for å få ansatte tilbake til arbeidet.

Vi har i hovedsak kontoransatte, i tillegg har vi butikkansatte, og i underkant av 20 serviceteknikere som jobber med feilretting av nettet vårt. Våre butikkansatte er lokalisert på Selskapets på 43 butikker i hele Norge. Våre serviceteknikere har til enhver tid nødvendig opplæring og sikkerhetsutstyr med seg. Via egen applikasjon på sin mobil utfører disse sikker jobb analyse (SJA), samt rapporterer inn avvik. Sykefraværet i Telia for 2023 var på 4,1 %.

Telia Norge har siden 2016 vært sertifisert av DNV innen ledelsessystemet og standarden OHSAS 18001. Per november 2019 ble Telia Norge AS sertifisert i ISO 45001 standarden, denne sertifiseringen har en varighet på 3 år, med årlige periodiske revisjoner. I 2022 ble Telia Norge sertifisert i ISO 14001 standarden. Hver høst har vi periodiske revisjoner av begge standardene gjennomført av DNV fysisk på lokasjonene våre.

Det er utarbeidet en redegjørelsesrapport. Denne er lagt ved etter regnskapsnotene.

## Bærekraft og Ytre miljø

Telia Norge AS er underlagt policyer og retningslinjer om bærekraft og ansvarlig virksomhet fra morselskapet Telia Company AB. Selskapets arbeid med, og prestasjoner knyttet til, blant annet arbeidstakerrettigheter, menneskerettigheter, arbeidsforhold i leverandørkjeden, anti-korrupsjon og miljøansvar er rapportert som en del av Telia Companys års- og bærekraftsrapport. Dette er tilgjengelig på <http://annualreports.teliacompany.com> og <https://www.telia.no/om-telia/apenhetsloven/>.

### Våre klima- og miljømål

Telia sitt overordnede mål om klimanøytralitet er å oppnå netto nullutslipp av klimagasser i hele verdikjeden innen 2040. Det nye langsiktige målet ble godkjent av Science Based Targets Initiative i september 2023. Selskapet oppdaterte samtidig sine kortsiktige mål etter å ha nådd ett av dem før tiden: å halvere utslippene fra egen virksomhet (såkalt scope 1 og 2) innen 2025. Telia nådde dette målet ved å bytte til 100 prosent fornybar elektrisitet i 2020.

Vitenskapsbaserte mål gir en klart definert måte for Telia å redusere klimagassutslipp, og bidrar til å fremtidssikre virksomheten og forhindre de verste konsekvensene av klimaendringer. Målene betraktes som "vitenskapsbaserte" hvis de er i tråd med hva den nyeste klimavitenskapen anser som nødvendig for å oppfylle målene i Paris-avtalen: å begrense global oppvarming til 1,5 grader over førindustrielt nivå.

På kort sikt, forplikter Telia seg til å redusere absolutt scope 1 og 2 klimagassutslipp med 90 % innen 2030, med 2018 som basisår. Telia forplikter seg dessuten til å redusere klimagassutslipp fra bruk av våre solgte produkter med 29 % innen 2025, med 2018 som basisår. Telia forplikter seg videre til å 72 % av leverandørene skal ha satt vitenskapsbaserte mål innen 2025.

På lang sikt forplikter Telia Company seg til å opprettholde minst 90 % absolutte scope 1 og 2 utslippsreduksjoner fra 2030 til 2040, med 2018 som basisår. Telia Company forplikter seg også til å redusere absolutt scope 3 klimagassutslipp med 90 % innen 2040, med 2018 som basisår.

Les mer om Telias godkjente vitenskapsbaserte mål og fremdrift her: [Telia Company's net-zero science-based targets approved by SBTi](#).

I tillegg har Telia satt seg mål om null avfall innen 2030 i egen drift, inkludert nettverk, samtidig som vi muliggjør en sirkulær økonomi gjennom våre tilbud.

### Hva gjør vi i egen drift

Vi arbeider målrettet med tiltak for å nå målene våre og begrense vår påvirkning på miljøet. Konkrete eksempler på dette er:

- **Samlokalisering og minimere graving**  
Utbyggingen av telenettet innebærer nødvendigvis visse inngrep i det ytre miljø. Telia Norge AS bestreber en minimering av skadevirkninger av utbyggingen, blant annet ved å samlokalisere vår utbygging med andre operatører. Telia Norge AS sitt utgangspunkt ved etablering av egne basestasjonsanlegg er at terrenget skal skånes mest mulig og at plasseringen er tilpasset omgivelsene. Telia Norge AS sitt arbeid for å minimere skadevirkningene er nedfelt i et eget dokument om miljøprofil for stasjonsutbyggingen.
- **Batterihåndtering**  
Alle Telia Norge AS sine basestasjoner inneholder batterier. Når disse batteriene skiftes ut, har selskapet avtaler som sikrer at de håndteres på en forskriftsmessig måte og leveres inn ved returstasjoner for formålet.
- **Energieffektivisering**  
Telia setter enkelte systemer på basestasjonene i søvnmodus om natten, uten at det påvirker kundeopplevelsen. Strømsparingsprosjektet er gjennomført på alle Telias basestasjoner over hele landet. Målet er å spare 1,5 kWh per stasjon per døgn, og prosjektet er ett av mange steg på veien mot en mer bærekraftig og klimavennlig drift.

Modernisering av utstyr er også et viktig tiltak for å redusere strømforbruk eller øke effekten av den strømmen vi bruker.

På en rekke basestasjoner har vi dessuten tatt i bruk hydrogen som reserveenergikilde. Dette er et viktig steg, som gjør 4G/5G back-up mer miljøvennlig, da CO<sub>2</sub>-utslipp fra dieselaggregat utgjorde omtrent 20

% av våre totale fotavtrykk i egne operasjoner i 2022. Hydrogenløsningen slipper kun ut vanddamp og varme. Vår basestasjon på Trollstigen har i tillegg til hydrogen tatt i bruk sol- og vindkraft for å drifte stasjonen. Dette har gitt mye positiv medieomtale.

- **Sirkularitet**

Telia er markedets beste aktør på brukte telefoner. Med LikeFin fra Telia, Nesten Ny fra OneCall eller Smart Valg fra Phonero selger vi brukte, like fine mobiler til en lavere pris enn helt nye telefoner. Mobilen kommer i en miljøvennlig eske med minimalt av annet innhold. I 2022 nådde vi 100 000 solgte, brukte telefoner og i 2023 er nesten 15 % av alle telefoner solgt en gjenbrukstelefon.

Gjenbruk er også høyt prioritert i bedriftssegmentet. Vi gjenbraker i høy grad utstyr som CPE-er (rutere) hos kunder. Vi får tilbake utstyr fra kunder i både private og offentlige virksomheter. Hvis utstyret er fullt brukbare i henhold til fargekodene angitt i punkt 1-1 gjenbrukes dette i nye kundeinstallasjoner etter at sikker sletting er gjennomført.

Vi deltar i «Cisco Takeback and Reuse Program». Gjennom programmet returnerer vi alt utstyr som har nådd slutten av sin brukstid tilbake til Cisco. Returnert utstyr lagres på et sikkert sted, og alle harddisker slettes for å ivareta datasikkerheten. Cisco gjenbraker og resirkulerer 99,9 % av det som returneres i programmet. Alt utstyr til resirkulering blir håndtert etter EU WEEE-standarden (Waste Electrical and Electronic Equipment).

- **Digitale tjenester som muliggjør karbon- og energisparing hos kundene våre**

Digital teknologi, som 5G, er anslått å redusere de globale utslippene med 15 % innen år 2030. 5G-nettet tilbyr en infrastruktur som gjør at vi fremover kan hente ut teknologiens goder, enda mer presist, på måter som både beskytter miljøet og fremmer langsiktig bærekraft. Eksempelene er mange: Nye metoder som optimaliserer energieffektivitet i ulike kategorier, smartere løsninger som reduserer fysisk forflytning og utslipp knyttet til reise, generelle løsninger mot redusert karbonutslipp, beskytter og forbedrer luft- og vannkvalitet, sensor-teknologi som vil kunne gi svar på tilstanden til enheter på en raskere, bedre og mer omfattende måte, og mye, mye mer. Telia tilbyr Norges beste 5G-dekning og har mange gode eksempler på hvordan vi muliggjør karbon- og energisparing hos kundene våre.

- **Arbeid i hele verdikjeden**

Telia oppdaterer et eget CO2-kompass, et kart med oversikt over hvor utslipp i konsernet genereres og identifiserer områder for betydelige reduksjoner. CO2-kompasset inkluderer Scope 1 og scope 2 som er direkte og indirekte utslipp i Telias egne operasjoner. Kompasset inkluderer også Scope 3 som inkluderer våre underleverandører, og skal Telia nå sine ambisiøse klimamål er arbeidet med leverandørleddet avgjørende ettersom 91 % av våre utslipp kommer herfra.

Telia bruker eksterne leverandører innenfor enkelte områder av den daglige driften, og har retningslinjer for leverandøroppfølging og -styring. Telia gjennomfører due diligence på alle våre leverandører etter OECDs retningslinjer, hvor miljø og bærekraft er integrert i arbeidet. Alle våre leverandører må dessuten signere vår Supplier Code of Conduct (SCoC), der vi stiller de samme kravene til våre leverandører som til oss selv, og følger opp våre leverandører med stedlige kontroller og revisjoner.

- **Miljøsertifisering**

Telia Norge er ISO 14001-sertifisert siden 2022. Vi setter krav til prosesser, eget miljøledelsesteam, intern opplæring i samtlige funksjoner, klima- og miljørapport, partneravtaler og nullutslippsvisjoner på både utslipp og avfall.

## Selskapsstyring og ledelse

Telia Norge AS har fokus på internkontroll, operasjonelt og finansielt. Implementeringen, fokus og oppfølgingen rundt dette sikrer at selskapet er profesjonalisert i håndtering og kontroll av informasjon som påvirker selskapets kritiske styringsprosesser, samt god inntekts- og kostnadskontroll.

Som heleid datterselskap av Telia Company AB legger Telia Norge AS eierens regler, systemer og rutiner for god selskapsstyring til grunn for sin drift.

Styret består av Stein-Erik Vellan (styreleder), Karl Erik Brøten, Henrik Larsen, Hemdan Michael Bezabih, Lars Marcus Bergman og Benedicte Onsøien Dypvik. De tre sistnevnte er ansattrepresentanter.

Alle Telia-ansatte som sitter i styret for Telia Norge AS er dekket av styreforsikring.

## Fremtiden

Økt konkurransepress nødvendiggjør kontinuerlig utvikling av produkt- og tjenestetilbudet for å kunne opprettholde omsetningsvekst og tilstrekkelig lønnsomhet. I tillegg vil det fortsatt være viktig med god kostnadskontroll og selskapet vil til enhver tid ta initiativ til å søke å redusere kostnadene til driften av virksomheten.

## Fortsatt drift

Etter styrets mening gir det fremlagte resultatregnskapet og balanse med tilhørende noter en rettvise oversikt over selskapets økonomiske utvikling og finansielle stilling.

Årsregnskapet for 2023 er satt opp under forutsetning av fortsatt drift. Styret bekrefter at denne forutsetningen er til stede i henhold til Regnskapsloven paragraf 3-3.

## Disponeringer

Årsresultatet for Telia Norge AS var på 1 492 MNOK. Styret vil foreslå for generalforsamlingen følgende disponering av resultatet for 2023 (MNOK):

Disponering	Beløp
Avsatt til annen egenkapital	1 492

Oslo, 18.03.2024

## Regnskapsprinsipper

Årsregnskapet er avlagt i henhold til regnskapsloven § 3-9 og Forskrift om forenklet IFRS fastsatt av Finansdepartementet 3. nov 2014. Dette innebærer i hovedsak at innregning og måling følger internasjonale regnskapsstandarder (IFRS) og presentasjon og noteopplysninger er i henhold til norsk regnskapslov og god regnskapsskikk. Unntak fra måling og innregning etter full IFRS er forklart i note 1.

Årsregnskapet for regnskapsåret 2023 er vedtatt av selskapets styre den 18.03.2024.

### Driftsinntekter fra kontrakter med kunder

Driftsinntekter fra kontrakter med kunder innregnes når kontrollen over en vare eller tjeneste overført til kunden og i henhold til det beløp som reflekterer hva selskapet forventer å motta for varen eller tjenesten. Selskapet har konkludert med at det er prinsippal i de vesentligste av dets inntektsstrømmer, fordi det kontrollerer varene og tjenestene før disse overføres til kunden.

### Inntekter fra salg av varer og tjenester

Inntekter fra salg av varer innregnes på det tidspunkt der kontrollen over eiendelen overføres til kunden. Kontroll over en eiendel innebærer muligheten til å styre bruken av og få så godt som alle gjenværende fordeler ved eiendelen. Kontroll omfatter samtidig muligheten til å hindre andre fra å styre bruken av og få fordelene fra eiendelen. Inntekt innregnes vanligvis ved levering av varen.

Selskapet vurderer hvorvidt det er andre leveranser i kontrakten som anses som separate leveringsforpliktelser hvor deler av transaksjonsprisen bør fordeles.

Selskapet tilbyr tjenester som enten selges separat eller som en pakke sammen med salget av varer.

Selskapet innregner inntekter fra salg av tjenester over tid, da kunden samtidig mottar og forbruker fordeler etter hvert som selskapet tilbyr disse.

Kontrakter for salg av pakker med varer og tjenester som består av to leveringsforpliktelser, der hver av disse forpliktelsene består av enten salg av varer eller tjenester, regnskapsføres med hensyn til prinsippene nevnt over. Transaksjonsprisen fordeles på de to leveringsforpliktelsene basert på de relative frittstående salgsprisene for de underliggende varene og tjenestene.

Inntekter fra salg av varer innregnes vanligvis på tidspunktet for levering av varen, og tjenester innregnes over tid basert på fullføringsgrad.

### Utgifter til kontraktsinngåelse

Konsernet har valgt å benytte seg av den praktiske løsningen for utgifter knyttet til oppnåelse av en kontrakt som tillater at konsernet løpende kostnadsfører slike utgifter, dersom tilhørende inntekt er forventet

innregnet innen ett år. Når inntekten innregnes over flere perioder innregner konsernet de løpende marginale utgiftene knyttet til oppnåelse av en kontrakt som en eiendel, gitt at utgiftene er forventet å bli gjenvunnet i løpet av kontraktsperioden. Innregnede eiendeler amortiseres på en systematisk måte som samsvarer med overføringen av varen eller tjenesten til kunden, og revurderes på slutten av hver rapporteringsperiode.

### Kostnader

Utgifter sammenstilles med og kostnadsføres samtidig med de inntekter utgiftene kan henføres til. Utgifter som ikke kan henføres direkte til inntekter, kostnadsføres når de påløper.

## Salgs- og markedsføringskostnader

Salgs- og markedsføringskostnader i forbindelse med kundetilgang er kostnadsført. Salgs- og distribusjonskostnader inkluderer kostnader i forbindelse med opptak av nye kunder (bl.a. provisjoner), generelle markedsføringskostnader og kostnader i forbindelse med registrering av kundene.

## Klassifisering og vurdering av balanseposter

Omløpsmidler og kortsiktig gjeld omfatter poster som forfaller til betaling innen ett år etter balansedagen, samt poster som knytter seg til varekretsløpet. Øvrige poster er klassifisert som anleggsmiddel/langsiktig gjeld.

Omløpsmidler vurderes til laveste av anskaffelseskost og virkelig verdi. Kortsiktig gjeld balanseføres til nominelt beløp på etableringstidspunktet.

Anleggsmidler vurderes til anskaffelseskost, fratrukket akkumulerte av- og nedskrivninger. Anleggsmidler nedskrives til virkelig verdi ved verdifall som ikke forventes å være forbigående. Anleggsmidler med begrenset økonomisk levetid avskrives planmessig. Langsiktig gjeld balanseføres til nominelt beløp på etableringstidspunktet.

## Varige driftsmidler

Varige driftsmidler balanseføres og avskrives over driftsmidlets forventede økonomiske levetid. Vesentlige driftsmidler som består av betydelige komponenter med ulik levetid er dekomponert med ulik avskrivningstid for de ulike komponentene. Når eiendeler selges eller utrangeres, blir balanseført verdi fraregnet og eventuelt tap eller gevinst resultatføres. Anskaffelseskost for varige driftsmidler er kjøpsprisen og kostnader direkte knyttet til å sette anleggsmiddelet i stand for bruk. Direkte vedlikehold av driftsmidler kostnadsføres løpende under driftskostnader, mens påkostninger eller forbedringer tillegges driftsmidlets kostpris og avskrives i takt med driftsmidlet. Dersom gjenvinnbart beløp av driftsmiddelet er lavere enn balanseført verdi foretas nedskrivning til gjenvinnbart beløp. Gjenvinnbart beløp er det høyeste av netto salgsverdi og verdi i bruk.

Verdi i bruk er nåverdien av de fremtidige kontantstrømmene som eiendelen vil generere.

Alle kostnader relatert til GSM-, LTE- og UMTS-nettene, inkludert teknisk utstyr, kommunikasjonsutstyr og tjenester direkte relatert til utbyggingsprosjektet, er aktivert. Utbyggingskostnader knyttet til egne ansatte aktiveres sammen med driftsmidlet. Rentekostnader i forbindelse med finansieringen av utbyggingen av nettverket aktiveres.

Estimert økonomisk levetid er som følger:

Nettverksinvesteringer 5 - 20 år

Mobil - lisenser over kommersiell nytteid

IT-utstyr/software 3 - 5 år

Inventar 3 - 5 år

Påkostning leide lokaler over levetiden til leiekontrakten

Kjøretøy 5 år

## Fjerningsforpliktelser

Nåverdi av fjerningsutgifter balanseføres som en del av anskaffelseskost av teknisk anlegg og avskrives sammen med dette. Avsetningen tilsvarer nåverdi av forpliktelsen i hele den økonomiske levetiden for driftsmiddelet.

## Offentlige tilskudd

Offentlige tilskudd regnskapsføres når det foreligger rimelig sikkerhet for at selskapet vil oppfylle vilkårene knyttet til tilskuddene, og tilskuddene vil bli mottatt. Offentlige tilskudd nettoføres i regnskapet.

Side 14 av 34

## Immaterielle eiendeler

Immaterielle eiendeler ervervet separat eller ved egenutvikling balanseføres til kost. Kostnaden ved immaterielle eiendeler ervervet ved oppkjøp balanseføres til virkelig verdi i selskapet. Balanseførte immaterielle eiendeler regnskapsføres til kost redusert for eventuell av- og nedskrivning. Beløp betalt for patenter og lisenser er balanseført og avskrevet lineært over forventet brukstid. Goodwill avskrives ikke, men testes for nedskrivning dersom det er indikasjoner på verdifall, og minst hvert år.

## Forskning og utvikling

Utgifter til forskning og utvikling kostnadsføres løpende gjennom året, med mindre intern utvikling tilfredsstillende kriteriene for innregning som eiendel. Dette gjelder eksempelvis intern softwareutvikling som blant annet er dokumentert vil kunne gi positiv kontantstrøm til selskapet i fremtiden. Utgifter som påløper i forprosjekt og forbundet med opplæring kostnadsføres direkte.

Balanseførte utviklingskostnader avskrives lineært over eiendelens estimerte brukstid.

## Datterselskap/tilknyttet selskap

Datterselskaper vurderes etter kostmetoden i selskapsregnskapet. Investeringen er vurdert til anskaffelseskost for aksjene med mindre nedskrivning har vært nødvendig. Det er foretatt nedskrivning til virkelig verdi ved objektive indikasjoner på verdifall. Nedskrivninger er reversert når grunnlaget for nedskrivning ikke lenger er til stede.

Utbytte og andre utdelinger er inntektsført samme år som det er avsatt i datterselskapet. Overstiger utbytte andel av tilbakeholdt resultat etter anskaffelsestidspunktet, representerer den overskytende del tilbakebetaling av investert kapital, og utdelingene er fratrukket investeringens verdi i balansen til morselskapet.

Andre aksjer vurderes etter kostmetoden. Investeringen er vurdert til aksjenes anskaffelseskost. Aksjene nedskrives ved objektive indikasjoner på verdifall. Nedskrivninger reverseres når grunnlaget for nedskrivning ikke lenger er tilstede.

I note 13 er det opplyst om andel egenkapital og resultat ifølge siste årsregnskap, i tråd med regnskapsloven § 7-15.

## Aksjebasert avlønning

Virkelig verdi av aksjebasert avlønning blir bokført som en lønnskost, med tilsvarende økning i egenkapitalen. Totalbeløpet som skal kostnadsføres baseres på virkelig verdi av ytelsesaksjer tildelt.

Den totale kostnaden tas over innvinningsperioden, som vil si perioden alle spesifiserte innvinningsbetingelser kan oppfylles. Ved slutten av hver periode gjøres det en oppdatert vurdering av hvor mange ytelsesaksjer forventes opptjent basert på eventuelle ikke-markedsbaserte betingelser og tjenestekriterier. Eventuelle endringer i opprinnelige estimater føres over resultatet, med en tilsvarende føring over egenkapitalen.

## Kontraktseiendeler

En kontraktseiendel defineres som retten til vederlag i bytte mot varer eller tjenester som selskapet har overført til en kunde. Hvis selskapet overfører varer eller tjenester til en kunde før kunden betaler vederlag eller før betalingsfristen forfaller, innregnes en kontraktseiendel for opptjent vederlag som er betinget.

Levetiden på kontraktseiendelene varierer mellom kundesegment, og strekker seg fra 2 til 5 år.

## Kontraktsforpliktelser

En kontraktsforpliktelse er en plikt til å overføre varer eller tjenester til en kunde som selskapet har mottatt vederlag fra (eller har rett til vederlag som er forfalt). Hvis en kunde betaler vederlag før selskapet overfører varer eller tjenester til kunden, vil en kontraktsforpliktelse innregnes på tidspunktet for betaling.

Kontraktsforpliktelser innregnes som inntekt på det tidspunkt selskapet oppfyller leveringsforpliktelsen slik den er spesifisert i kontrakten.

## Fordringer

Kundefordringer og andre fordringer er oppført i balansen til pålydende etter fradrag for avsetning til forventet tap. Avsetning til tap gjøres på grunnlag av individuelle vurderinger av de enkelte fordringene. I tillegg gjøres det for øvrige kundefordringer en uspesifisert avsetning for å dekke antatt tap på krav.

## Varebeholdninger

Lager av innkjøpte varer er verdsatt til laveste av anskaffelseskost og virkelig verdi. Anskaffelseskost for terminaler tilordnes hver enkelt enhet, mens tilleggsutstyr vurderes etter FIFO-metoden. Det foretas nedskrivning for påregnelig ukurans.

## Valuta

Pengeposter i utenlandsk valuta er vurdert til kursen ved regnskapsårets slutt. Transaksjoner i utenlandsk valuta er bokført til valutakurs på transaksjonstidspunktet. Ikke-pengeposter som måles til historisk kurs uttrykt i utenlandsk valuta, omregnes til norske kroner ved å benytte valutakursen på transaksjonstidspunktet.

Urealisert valutagevinst og -tap ved regnskapsårets slutt er bokført i resultatregnskapet.

## Beste estimat

Ved usikkerhet knyttet til egenskaper ved eiendeler og forpliktelser benyttes beste estimat. Endring av estimat i senere perioder resultatføres i den periode estimatet endres. Hvis endringene også gjelder fremtidige perioder fordeles effekten over inneværende og fremtidige perioder.

## Avsetninger

En avsetning regnskapsføres når selskapet har en forpliktelse (rettslig eller selvpålagt) som en følge av en tidligere hendelse, det er sannsynlig (mer sannsynlig enn ikke) at det vil skje et økonomisk oppgjør som følge av denne forpliktelsen og beløpets størrelse kan måles pålitelig. Hvis effekten er betydelig, beregnes avsetningen ved å neddiskontere forventede fremtidige kontantstrømmer med en diskonteringsrente før skatt som reflekterer markedets prissetting av tidsverdien av penger og, hvis relevant, risikoer spesifikt knyttet til forpliktelsen.

Tapskontrakter: Dersom det foreligger tapskontrakter, innregnes den eksisterende plikten i henhold til kontrakten som en avsetning. Før en separat avsetning for en tapskontrakt fastsettes, innregner konsernet eventuelle tap knyttet til verdifall som har oppstått på eiendeler som omfattes av den konkrete kontrakten.

## Leiekontrakter

Telia Norge AS som leietaker

Telia Norge AS innregner en bruksrett og leieforpliktelse i balansen når underliggende eiendel blir gjort tilgjengelig for Telia Norge AS, dvs. ved startdatoen til leieavtalen. Telia Norge AS benytter seg av unntaket ved å inkludere kortsiktige leieavtaler og leieavtaler med lav verdi som kostnad i resultatregnskapet. Telia Norge AS anvender ikke IFRS 16 for immaterielle eiendeler.

Leieforpliktelsen innregnes til nåverdi av leiebetalingene over den estimerte leieperioden. Leiebetalingen består av faste betalinger, variable leiebetalingen som er avhengig av en indeks eller en kurs, beløp som forventes å bli betalt under en garanti for restverdier og betalinger relatert til opsjoner Telia Norge AS er rimelig sikker på å utøve. Betalinger relatert til ikke-leiekomponenter skilles fra leiebetalingene og kostnadsføres etter hvert som de påløper.

#### Leieperiode

Estimert leieperiode kan bestå av leieperiode inkludert forlengelsesopsjoner dersom Telia Norge AS er rimelig sikker på å benytte seg av denne. Estimert leietid kan også være kortere enn kontraktsperioden dersom det finnes termineringsmuligheter som Telia Norge AS er rimelig sikre på å benytte seg av.

Terskelen for rimelig sikkerhet er ansett som høyere enn "mer sannsynlig enn ikke", men lavere enn "så godt som sikkert" iht IAS 37 "Avsetninger, betingede forpliktelser og betingede eiendeler". Forlengelse- og termineringsopsjoner er inkludert i flere leiekontrakter i Telia Norge AS. Ved estimering av leieperiode vurderer Telia Norge alle fakta og omstendigheter som kan skape et økonomisk insentiv til å benytte seg av en forlengelsesopsjon, eller å ikke benytte seg av en termineringsopsjon. Eksempler på faktorer som tas med i vurderingen er: strategiske planer, vurdering av fremtidige teknologiske endringer, viktigheten av den underliggende eiendelen for Telia Norges drift, og/eller kostnader knyttet til å forlenge eller ikke terminere en leie. Leieforpliktelsen måles på nytt hvis det tilkommer modifikasjoner til leiekontrakten eller kontantstrømmen som følger av leiekontrakten.

Leiebetalingene er neddiskontert med renten implisert av leien, eller hvis denne ikke kan fastsettes, med Telia Companys inkrementelle lånerente. Den inkrementelle lånerenten er benyttet i majoriteten av leieforholdene da renten implisert av leien ofte ikke lar seg fastsette.

Enkelte leieavtaler, f.eks. leie av butikklokaler inneholder en variabel del som baserer seg på en prosentandel av salget generert i butikken. Dette innregnes som kostnad i resultatregnskapet i den perioden salget er generert.

Bruksretten er innregnet til kost, hvilket består av initiaell leieforpliktelse pluss eventuelle leiebetalingen betalt før eller ved starten av leieforholdet. Kostnader forbundet med fjerningsforpliktelser er også innregnet i bruksretten. Den tilhørende forpliktelsen er innregnet separat fra leieforpliktelsen.

Bruksretten avskrives lineært fra startdato til det som kommer først av eiendelens anvendbare levetid eller estimert kontraktslutt.

Justeringer av leieforpliktelse som følge av ny måling vil i de fleste tilfeller føre til en tilsvarende justering av bruksrett. Hvis bokført beløp av bruksretten avskrives til null vil gjenværende justering føres i resultatregnskapet. Bruksretten vurderes for nedskrivning ved situasjoner eller endringer som indikerer at bokført verdi ikke er intakt.

Bruksrett presenteres som separate linje i oppstilling av finansiell stilling og leieforpliktelsen som kortsiktig og langsiktig lån i oppstillingen av finansiell stilling I resultatregnskapet presenteres avskrivning av bruksrett som avskrivninger og rentekostnad fra leieforpliktelsen som annen finanskostnad.

Tilbakebetaling av leieforpliktelse presenteres I kontantstrømmen som kontantstrøm fra finansielle aktiviteter. Rentekostnaden presenteres som kontantstrøm fra operasjonelle aktiviteter.

I leieforhold der Telia Norge AS er utleier, vurderes det ved leieavtalens start hvorvidt utleien er finansiell eller operasjonell. Vurderingene legger vekt på hvorvidt risiko og nytte fra eiendelen overføres til leier eller om den

ÅRSRAPPORT 2023 TELIA NORGE

ligger igjen hos utleier. Eierskapet ved kontraktslutt og hvorvidt eiendelen fortsatt har økonomisk nytte ved utløpet av leietiden er også relevant. Hvis risiko og nytte i all hovedsak er overført til leier anses leien som finansiell. En avtale kan også inneholde elementer av begge typer leie vil Telia Norge AS allokere godtgjørelsen til hhv finansiell og operasjonell leie basert på separate markedspriser.

**Finansiell utleie i Telia Norge AS**

Telia Norge AS hadde ingen utleie i 2023 som kvalifiserer som finansiell utleie.

**Operasjonell utleie i Telia Norge AS**

Utleieinntekter fra operasjonelle leieavtaler innregnes lineært over kontraktens periode. Initiale direkte kostnader i leieforholdet innregnes som del av eiendelen til leieobjektet og innregnes slik som leieinntektene

## Pensjoner

Selskapet har både ytelsesbaserte og innskuddsbaserte pensjonsordninger.

Selskapet fører pensjoner etter regnskapsstandarden IAS19. I henhold til standarden er årets pensjonskostnad kostnadsført under lønn og sosiale kostnader i resultatregnskapet. Netto pensjonsforpliktelse er klassifisert som langsiktig gjeld.

Pensjonskostnader og pensjonsforpliktelser tilknyttet ytelsesbasert pensjon, beregnes etter lineær opptjening basert på forventet sluttlønn. Beregningen er basert på en rekke forutsetninger; herunder diskonteringsrente, fremtidig regulering av lønn, pensjoner og ytelser fra folketrygden, fremtidig avkastning på pensjonsmidler samt aktuariemessige forutsetninger om dødelighet og frivillig avgang. Pensjonsmidler er vurdert til virkelig verdi og fratrukket i netto pensjonsforpliktelser i balansen.

Ved regnskapsføring av ytelsesbasert pensjon er lineær opptjeningsprofil og forventet sluttlønn som opptjeningsgrunnlag lagt til grunn. Estimatavvik føres mot utvidet resultat. Selskapet har således ingen pensjonsforpliktelse som ikke er balanseført.

Rentekostnad på pensjonsforpliktelse og avkastning på pensjonsmidler føres som henholdsvis annen finanskostnad og annen finansinntekt.

Pensjonspremie til innskuddsbasert pensjonsordning kostnadsføres når den påløper. Innskuddene er gitt til pensjonsplanen for heltidsansatte.

## Skatter

Skattekostnad består av betalbar skatt og endring i utsatt skatt. Utsatt skatt/skattefordel er beregnet på alle forskjeller mellom regnskapsmessig og skattemessig verdi på eiendeler og gjeld. Utsatt skattefordel er beregnet med 22,00 % (22,00 % i 2022) på grunnlag av de midlertidige forskjeller som eksisterer mellom regnskapsmessige og skattemessige verdier, samt skattemessig underskudd til fremføring ved utgangen av regnskapsåret.

Netto utsatt skattefordel balanseføres i den grad det er sannsynlig at selskapet vil ha tilstrekkelige skattemessige overskudd i senere perioder til å nyttiggjøre skattefordelen.

Forpliktelser og eiendeler ved utsatt skatt er klassifisert som langsiktig forpliktelse (anleggsmiddel) i balansen.

Signert SV, HL, KEB, HB, MB, BOD

## Betingede forpliktelser

Betingede forpliktelser regnskapsføres i samsvar med regnskapsstandarden for betingede forpliktelser og -eiendeler. Betingede forpliktelser blir regnskapsført dersom det er sannsynlighetsovervekt for at de kommer til oppgjør. Beste estimat benyttes ved beregning av oppgjørsværdi.

## Kontanter og kontantstrømoppstilling

Kontantstrømoppstillingen er utarbeidet etter den indirekte metode. Kontanter og kontantekvivalenter omfatter kontanter, bankinnskudd og andre kortsiktige, likvide plasseringer.

## Hendelser etter balansedagen

Ny informasjon etter balansedagen om selskapets finansielle stilling per 31.12.2023 er hensyntatt i årsregnskapet. Hendelser som ikke påvirker selskapets finansielle stilling på balansedagen, men som vil påvirke selskapets finansielle stilling i fremtiden, er opplyst om dersom dette er vesentlig.

## Note 1 Endring regnskapsprinsipp, nye standarder og fravik fra IFRS

Beløp vises i millioner kr

### Implementerte standarder:

#### Nye eller endrede standarder og tolkninger gjort gjeldende i 2023

IFRS 17 trådte i kraft 1.1.2023 og erstattet IFRS 4, men er vurdert å ikke ha relevans for Telia Norge AS. Følgende endringer var relevante for Telia Norge AS, men har ingen eller liten påvirkning på regnskapet:

- IAS 1 og IFRS Practice Statement 2, effektiv f.o.m 01.01.2023. Endringen medfører at foretak skal opplyse om vesentlig informasjon om regnskapsprinsipper heller enn viktige regnskapsprinsipper.
- IAS 8, effektiv f.o.m 01.01.2023. Endringen klargjør skillet mellom endringer i regnskapsmessige estimater og endringer i regnskapsprinsipper.

Andre endringer i regnskapsstandarder er vurdert som ikke relevante for Telia Norge AS.

#### Nye eller endrede standarder og tolkninger som trer i kraft på eller etter 1.januar 2024

Telia Norge AS har ikke forhåndsimplementert noen av de nye eller reviderte standardene som trer i kraft på eller etter 1 januar 2024.

##### IFRS 16 - Leieforpliktelser ved salg med tilbakeleie

Endringene i IFRS 16 Leieavtaler består av at det er lagt til krav som forklarer hvordan et selskap skal regnskapsføre et salg med tilbakeleie etter transaksjonstidspunktet. Et salg med tilbakeleie er en transaksjon der et selskap selger en eiendel og leier den samme eiendelen tilbake for en periode. IFRS 16 inneholder krav om hvordan man skal regnskapsføre et salg og tilbakeleie på datoen transaksjonen finner sted.

Imidlertid hadde IFRS 16 ikke spesifisert hvordan den etterfølgende målingen er. Disse endringene vil ikke endre hvordan leieavtaler regnskapsføres annet enn de som oppstår i en salg og tilbakeleie-transaksjon.

Andre endringer i regnskapsstandarder er vurdert som ikke relevante for Telia Norge AS.

### Fravik fra IFRS:

IAS 10 nr. 12 og 13 og IFRIC 17 nr. 10 fravikes slik at utbytte og konsernbidrag regnskapsføres i samsvar med regnskapslovens bestemmelser.

## Note 2 Offentlig tilskudd

Selskapet mottar offentlige tilskudd i forbindelse med utbygging av sites. Dette mottas etterskuddsvis når en site er ferdig utbygget og er operativ. Tilskuddene innregnes ved mottak og regnskapsføres som en reduksjon av balanseført eiendel i oppstillingen. På resultatsiden innregnes den som en reduksjon av avskrivningskosten for eiendelen. Tilskuddet har vært i størrelsesorden 20 MNOK i 2022 og 24 MNOK i 2023.

Selskapet har i 2023 jobbet med prosjekt Next Generation Self-service, hvor formålet er å forbedre kundereisen. For dette prosjektet er det for inntektsåret 2023 innvilget SkatteFunn på MNOK 19.

## Note 5 Leiekontrakter

Beløp vises i millioner kr

Telia leier plass til teknisk utstyr, fiber, kontorer, butikklokaler og biler.

Leieperioden benyttet i verdsettelsen av leieforpliktelse følger kontraktslengder inkludert opsjoner som vil benyttes (med 80 % sikkerhet) for biler, kontorer og butikklokaler. For fiber og plass til teknisk utstyr varierer kontraktslengden mellom eiendelsklasser og er i intervallet 3-15 år ut ifra hva som anses som beste estimat for hvor lenge selskapet ønsker å være i leieforholdet.

Telias avtaler er gjenstand for årlig revurdering fra og med regnskapsåret 2020. Årets revurdering førte til at leieperioden benyttet i verdsettelsen økte med 1 år, og tilsvarer leieperioden som ble benyttet ved implementering av IFRS 16 i 2019. Den årlige revurderingen førte til en økning på MNOK 172 og MNOK 170 for henholdsvis bruksrett og leieforpliktelse.

Sensitivitet i estimat av leieperiode: En ett års økning/reduksjon i leieperioden tilsvarer ca MNOK 172 i økt/reduisert leieforpliktelse og bruksrett.

ÅRSRAPPORT 2023 TELIA NORGE

## Telia Norge AS som utleier

Operasjonell utleie

Telia leier ut dekodere og routere til privatkunder og fremleier lokaler i Stålfjæra til bedrifter og andre operatører. Leiekontraktene har i stor grad en varighet mellom 1-5 år for utstyr og 2-5 år for lokaler.

NOK i millioner kroner	2023	2022
Leieinntekt	133	129

Det var ingen variabel leieinntekt i 2023.

Analyse fremtidige leieinntekter	2023
Mindre enn 1 år	28
1-2 år	6
2-3 år	3
3-4 år	1
<b>Totale nominelle forventede leieinntekter</b>	<b>38</b>

## Note 6 Nettverks- og produktkostnader

Beløp vises i millioner kr

	2023	2022
Nettverkskostnader	328	304
Trafikkavgifter til andre operatører	1 892	1 953
Andre nettverks- og produktkostnader	514	507
Varekost terminaler	2 078	1 912
<b>Sum</b>	<b>4 813</b>	<b>4 676</b>

## Note 7 Lønnskostnader og ytelser, godtgjørelser til daglig leder, styret og revisor

Beløp vises i millioner kr

Lønnskostnader	2023	2022
Lønninger	1 476	1 456
Arbeidsgiveravgift	269	241
Pensjonskostnader	65	129
Andre ytelser	128	53*
<b>Brutto lønnskostnad</b>	<b>1 938</b>	<b>1 879</b>
Kapitaliserte lønnskostnader	-376	-380
<b>Sum</b>	<b>1 562</b>	<b>1 499</b>

Antall sysselsatte i selskapet per 31.12.2023 var 2032.

Gjennomsnittlig antall årsverk	2 110	2 175
--------------------------------	-------	-------

Det er i 2023 ikke utbetalt styrehonorar.

\*Restruktureringskostnader revurdert til lønnskostnader fra andre driftskostnader, hvilket gir en økning med 36,7m i 2023.

Ytelser til ledende personer (tall fremkommer i TNOK)	Daglig leder
Lønn og pensjon	8 429
Annen godtgjørelse	180
<b>Sum</b>	<b>8 609</b>

Daglig leder har avtale om lønn i inntil 1 år etter fratreden fra sin stilling. Utvalgte ledende ansatte er deltakere i konsernets insentivprogram. Programmet går ut på at dersom forhåndsdefinerte økonomiske måltørrelser blir oppfylt i programmets definerte resultatperiode, skal deltakerne i programmet motta en nærmere angitt andel aksjer i konsernet kostnadsfritt. Ordningen har i 2023 ikke medført en kostnad for Telia Norge.

Det er ikke stilt garantier for, eller utstedt lån til verken administrerende direktør eller styremedlemmer. Alle transaksjoner mellom selskapet og administrerende direktør eller styremedlemmer er foretatt på armlengdes avstand.

## Pensjonsforpliktelser

Selskapet er pliktig til å ha tjenstepensjonsordning etter lov om obligatorisk tjenstepensjon. Selskapets pensjonsordninger tilfredsstiller kravene i denne lov. Tilskuddet til innskuddspensjon utgjør fra 5,55% - 8% av lønn.

## Revisor

Kostnadsført revisjonshonorar for 2023 utgjør MNOK 4,5 eks mva.

I tillegg kommer honorar for andre tjenester med MNOK 0,2 eks mva.

## Note 8 Ytelsespensjon

Beløp vises i millioner kr

Telia Norge AS har i 2023 besluttet å avslutte selskapets ytelsespensjonsordninger. Ved avslutning av ordningene, vil ansatte overføres til innskuddspensjonsordningen som allerede er etablert i selskapet. Ansatte som på tidspunktet for overføring er sykemeldt eller uføre vil midlertidig bli igjen i ordningen. Som et resultat av oppgjøret har selskapet innregnet en positiv effekt på 71m NOK.

	2023	2022
Nåverdi av årets pensjonsopptjening	16	16
Rentekostnad av pensjonsforpliktelsen	19	12
Avkastning på pensjonsmidler	-16	-11
<b>Netto pensjonskostnad</b>	<b>18</b>	<b>17</b>

Akkumulerte nedskrivninger 31.12.2023	51	48	0	100
<b>Bokført verdi 31.12.2023</b>	<b>19 008</b>	<b>2 864</b>	<b>375</b>	<b>22 247</b>
Årets avskrivninger	0	564	0	564
Årets nedskrivninger	0	24	0	24
Utrangert historisk avskrivninger		169		
Økonomisk levetid	Verditestes	3-20 år		
Avskrivningsplan		Lineær		

\*Akkumulerte avskrivninger av goodwill knytter seg til før overgang til forenklet IFRS fra og med 2015.

Selskapet benytter lineære avskrivninger for alle immaterielle eiendeler med unntak for goodwill. Den økonomiske levetiden for de immaterielle eiendelene er beregnet til:

Patenter	3-5 år
Lisenser	20 år

De største balanseførte frekvensene per 31.12.2023 målt i bokført verdi (MNOK), var følgende:

3,7 GHz-båndet	658
900 MHz-båndet	372
2,6 GHz-båndet	250
800 og 1800 MHz-båndet	191
700 MHz-båndet	172
1800 Hz-båndet	156
2,1 MHz-båndet	9
<b>Sum</b>	<b>1 809</b>

Selskapets goodwill utgjør primært konserngoodwill videreført gjennom konsernkontinuitet etter tidligere gjennomførte fusjon. Det blir foretatt nedskrivningstest for goodwill hvert år og det foretas nedskrivning ved verdifall. Gjenvinnbart beløp er fastsatt gjennom estimater på fremtidige kontantstrømmer fra den enkelte innfusjonerte virksomhet neddiskontert med en rimelig diskonteringsrente.

## Note 10 -Anleggsnote

Beløp vises i millioner kr

	Eiendom	Maskiner og anlegg mm	Under Utførelse	Driftsløsøre, verktøy mm	Sum

<b>Sum</b>			<b>10</b>	<b>28</b>	<b>0</b>

## Note 16 Fordringer

Beløp vises i millioner kr

	2023	2022
<b>Kundefordringer</b>		
Kundefordringer eksterne	1 419	1 344
Kundefordringer konsern	220	366
Avsetning for tap på kundefordringer	-65	-59
<b>Netto kundefordringer</b>	<b>1 574</b>	<b>1 651</b>
Kostnadsførte tap på fordringer	70	58
<b>Langsiktige fordringer - forfaller senere enn ett år etter 31.12.2023</b>	<b>2023</b>	<b>2022</b>
Terminalfinansiering	129	110
Øvrige langsiktige fordringer	1	1
<b>Sum</b>	<b>130</b>	<b>110</b>
<b>Kontraktseiendeler</b>	<b>2023</b>	<b>2022</b>
Åpningsbalanse	525	474
Tilgang	388	498
Nedskrivninger og avsetninger innregnet i perioden	-350	-470
Utkjøp binding	21	23
<b>Sum</b>	<b>584</b>	<b>525</b>

Kontraktseiendeler innregnes ved oppfyllelse av leveringsforpliktelser. Når vederlaget blir ubetinget vil kontraktseiendelene omklassifiseres.

## Note 17 Aksjer og andeler i andre selskaper

Beløp vises i millioner kr

Telia Norge AS eier aksjer i Nasjonal Referansedatabase AS (14,3%).

## Note 18 Varer

Beløp vises i millioner kr

Selskapet innehar varelager av terminaler og tilleggsutstyr med MNOK 89

	2023	2022
Innkjøpte varer for videresalg	89	229
Ukurans	4	5

## Note 19 Bankinnskudd

Beløp vises i millioner kr

Telia Norge AS disponerer en konsernintern kreditfasilitet som underkonto i Telias konsernkontosystem. Se note 4 for mer informasjon.

Selskapet har ingen bundne skattetrekksmidler. Selskapet har en skattetrekksgaranti på 119 MNOK som dekker forpliktelsen.

ÅRSRAPPORT 2023 TELIA NORGE

## Note 20 Aksjonærer

Beløp vises i millioner kr

Aksjekapitalen i Telia Norge AS pr. 31.12 består av:

	Antall	Pålydende	Bokført
Ordinære aksjer	30 000	12 652	380
<b>Sum</b>	<b>30 000</b>		<b>380</b>

### Eierstruktur

De største aksjonærene i % pr. 31.12 var:

	Ordinære	Eierandel	Stemmeandel
TELIA COMPANY AB	30 000	100,0	100,0

Pålydende beløp på ordinære aksjer viser i NOK. Bokført verdi av aksjene vises i MNOK.

Selskapet er heleid datter av Telia Company AB. Alle aksjer gir lik stemme.

Telia Norge AS inngår i Telia Company AB konsernet. Konsernets hovedkontor ligger i Solna, Sverige.

Konsernregnskapet kan lastes ned fra [www.teliacompany.com](http://www.teliacompany.com)

## Note 21 Avsetning for forpliktelser

Beløp vises i millioner kr

	2023	2022
Fjerningsforpliktelser lokaler, siter og basestasjoner	-436	-265
Restruktureringsforpliktelse	-48	-23
Forpliktelse frekvensavgift	-469	-602
<b>Sum</b>	<b>-953</b>	<b>-890</b>

Fjerningsforpliktelse relaterer seg hovedsakelig til frekvenser, samt fjerning av utstyr, og sette området tilbake i opprinnelig stand ved fjerning av utplassert nettverksutstyr. Områdene vedrører hovedsakelig steder hvor Telia har bygget nettverksstasjoner. Beregningen baserer seg på estimert fremtidig fjerningstidspunkt, estimert fjerningskost og diskonteringsrente på 3,10 %.

Forklaring fjerningsforpliktelse
