ÅRSREGNSKAP FOR REGNSKAPSÅRET 2022 - GENERELL INFORMASJON

Journalnummer: 2023 542228

Enheten

Organisasjonsnummer: 917 453 527
Organisasjonsform: Aksjeselskap
Foretaksnavn: BERGEN CARBON SOLUTIONS AS
Forretningsadresse: Fleslandsvegen 70E
5258 BLOMSTERDALEN

Regnskapsår

Årsregnskapets periode: 01.01.2022 - 31.12.2022

Konsern

Morselskap i konsern: Ja
Konsernregnskap lagt ved: Ja

Regnskapsregler

Regler for små foretak benyttet: Ja
Benyttet ved utarbeidelsen av
årsregnskapet til selskapet: Forenklet IFRS
Benyttet ved utarbeidelsen av
årsregnskapet til konsernet: Forenklet IFRS

Årsregnskapet fastsatt av kompetent organ

Bekreftet av representant for selskapet: Odd Strømsnes
Dato for fastsettelse av årsregnskapet: 28.03.2023

Revisjon

Årsregnskapet er utarbeidet av ekstern
autorisert regnskapsfører: Ja
Ekstern autorisert regnskapsfører har i
løpet av regnskapsåret bistått ved den
løpende regnskapsføringen eller utført
andre tjenester for selskapet enn å
utarbeide årsregnskapet: Ja

Grunnlag for avgivelse

År 2022: Årsregnskap er elektronisk innlevert.
År 2021: Tall er hentet fra elektronisk innlevert årsregnskap fra 2022.

Det er ikke krav til at årsregnskapet m.v. som sendes til Regnskapsregisteret er undertegnet. Kontrollen på at dette er utført ligger hos revisor/enhetens øverste organ. Sikkerheten ivaretas ved at innsender har rolle/rettighet for innsending av årsregnskapet via Altinn, og ved at det bekreftes at årsregnskapet er fastsatt av kompetent organ.

Tillatelse til å utarbeide årsregnskap og årsberetning på engelsk for Bergen Carbon Solutions AS, org.nr. 917 453 527

Vi viser til deres brev av 14. juni 2021 der det søkes om dispensasjon fra kravet til å utarbeide årsregnskap og årsberetning på norsk for Bergen Carbon Solutions AS.

Skattekontoret gir på bakgrunn av en konkret helhetsvurdering Bergen Carbon Solutions AS dispensasjon fra kravet til å utarbeide årsregnskap og årsberetning på norsk, jf. regnskapsloven § 3-4 tredje ledd. Dispensasjonen gjelder så lenge opplysningene som danner grunnlaget for vedtaket ikke endres vesentlig.

Kopi av dette brevet må sendes til Regnskapsregisteret i Brønnøysund sammen med årsregnskapet. Den regnskapspliktige må selv dokumentere ved dette brev at tillatelse er gitt.

Bakgrunn

Bergen Carbon Solutions AS er notert på Euronext Growth. Blant aksjeeierne er det foreløpig flest norske eiere, men det er også en rekke utenlandske investorer. Det forventes imidlertid at den utenlandske og internasjonale eierandelen vil øke i årene fremover.

Selskapet driver virksomhet innen karbonfangst og renseteknologi. Selskapet satser nå stort internasjonalt og har som mål å være verdensledende innen produksjon og levering av det som benevnes som grønn karbon-nanofibre innen 2022. Den forventede fremtidige kundebasen vil derfor i stor grad være utenlandske og internasjonale selskaper. All kommunikasjon og alle kontrakter med kunder, leverandører, investorer og kreditorer må derfor også utformes på engelsk. Selskapets nettsider er utformet på engelsk, tilpasset det internasjonale og utenlandske markedet. På overordnet nivå benyttes engelsk språk i virksomheten og øvrig rapportering. Rapportering til Euronext Growth vil også være på engelsk.

Skattekontorets vurdering

Etter regnskapsloven § 3-4 tredje ledd skal "årsregnskapet og årsberetningen [...] være på norsk. Departementet kan ved [...] enkeltvedtak bestemme at årsregnskapet og/eller årsberetningen kan være på et annet språk."

I Ot. prp. nr. 42 (1997-1998) Om lov om årsregnskap mv., er det uttalt følgende om regnskapslovens formål, jf. pkt. 1.1:

"Regjeringen har som siktemål at regnskapsloven skal bidra til informative regnskaper for ulike grupper av regnskapsbrukere. Regnskapsbrukerne er dels investorer og kreditorer som tilfører kapital til foretakene, og dels andre grupper som har interesse av å vite hvordan foretaket drives, f.eks. de ansatte og lokalsamfunnet. Informasjonen til kapitalmarkedet skal gi grunnlag for riktig prising av finansielle objekter. Riktig prisdannelse på aksjer er en forutsetning for at ressursbruken i samfunnsøkonomien skal bli best mulig. Gode regnskaper vil også gjøre det vanskeligere for markedsdeltakere å ta ut spekulasjonsgevinster med basis i skjevt fordelt informasjon."

Det fremgår således at et av hovedformålene med regnskapsloven er å bidra til "informative regnskaper for ulike grupper av regnskapsbrukere". Regnskapsbrukere vil omfatte, jf. uttalelsen i proposisjonen, blant andre investorer, kreditorer, ansatte og lokalsamfunnet.

Det er etter skattekontorets vurdering derfor avgjørende ved vurdering av om dispensasjon fra kravet til å utarbeide årsregnskap og/eller årsberetning på norsk kan gis, at det ikke foreligger mulige brukere av regnskapsinformasjon som blir vesentlig berørt negativt ved en eventuell dispensasjon.

Det er særlig hensynet til brukerne av regnskapsinformasjon som skal vurderes ved en dispensasjonssøknad. I denne vurderingen har skattekontoret lagt særlig vekt på at selskapet er notert på Euronext Growth. Videre er det vektlagt at selskapet driver virksomhet i en bransje der alle sentrale aktører behersker og benytter engelsk.

Vennligst oppgi vår referanse ved henvendelse i saken.

Letter from CEO

Dear Shareholders,

Following my start as CEO in Bergen Carbon Solutions January 16th of this year, the activity level of the Company has been high. I am excited to have joined a young, fast-paced, and enthusiastic organization that is committed to its core business ideas and determined to make BCS a success.

BCS' overall equity story is fundamentally very attractive, as we utilise a CCU concept to produce valuable carbon products through the removal of CO₂. Today we consume 2 kg of CO₂ to produce 1 kg of clean carbon, compared to the 5 kg of CO₂ emitted by the commonly used fossil-based technology for similar type products.

The global accelerated push for speeding up the energy transition, as well as the dynamics in the geopolitical landscape makes our business concept even more unique.

Consequently, we will shift our attention towards electrification, with focus towards the battery production industry. Our sustainable production of Graphite and nano carbons can play an essential role in increasing many of the key qualities of batteries. To further strengthen our competitiveness and prepare for a production scale-up, we have introduced several cost-reducing initiatives in our process technology.

These optimization initiatives will enable BCS to enter 2023 on an even stronger value proposition than before.

I very much look forward to the year ahead. Thank you for your continued support and trust in BCS.

Sincerely,

Odd Strømsnes
CEO

Årsregnskap Report

Nature of the enterprise

Bergen Carbon Solutions AS (BCS), located in Bergen, Norway, has since its inception developed and industrialized technologies that utilize renewable power to convert CO₂ into carbon products such as nanofibers (CNF), nanotubes (MWCNT), and graphite. The Company has the ambition to pioneer a new material-technology industry that is both ground-breaking and environmentally friendly.

Future development

BCS announced in July 2022 change of factory location from Møsjoen to Høyanger as the Board considered Høyanger as the best alternative for the Company in terms of risk profile, capital efficiency and flexibility. In Høyanger, BCS will utilize an existing production hall.

In November 2022, the Company announced an extension of the timeline for the construction of a production facility in Høyanger, Norway. The background for this decision was the identification of new opportunities that should reduce risk and improve the overall business case.

During 2022, BCS identified that the technology was able to deliver additional product opportunities which would expand the portfolio to include CNF, MWCNT and graphite.

In 2023, the Company will continue to develop and optimize the technology as well as increase the market understanding and targets to expand the product portfolio further.

The Board emphasizes that the forward-looking statements in this report are based on various assumptions and forecasts that, by their nature, involve risk and uncertainty. Accordingly, actual development may deviate from what is stated here.

Financial statements

The annual financial statements for 2022 have for the first time been prepared in accordance with the rules in the Norwegian Accounting Act § 3-9 and Simplified IFRS.

Prior years the financial statements have been prepared in conformity with the Accounting Act and NRS 8 - Good accounting practice for small companies.

Financial statement parent

The financial statements show a loss of MNOK 54.1 in 2022 compared to a loss of MNOK 30.1 in 2021. The 2022 financial result is according to plan and a direct result of the continued growth and scale-up of the business.

Total assets at the end of 2022 amount to MNOK 336 compared to MNOK 146 at the end of 2021. Total equity was MNOK 309 at the end of 2022 vs. MNOK 119 the year before, resulting in an equity ratio of more than 90%.

The Company's liquidity and cash flow have been improved through the issue of new shares as well as grants received. In addition to current operating costs, investments related to technology development and pre-engineering of a potential factory design have been the key contributors to the operational cost increase.

The operating profit in 2022 shows a loss of MNOK 54.1, while net negative cash flow from operating activities amounts to MNOK 47.3.

Financial statement group

The group's financial statements show a loss of MNOK 54 and a positive equity of MNOK 308.7.

Cash and cash equivalents for the group amounts to MNOK 293 as of 31.12.2022.

Total assets for the group at the end of the year was MNOK 337.

Financial risk

In 2023, BCS will focus on the continued development and optimization of the technology to ensure that potential new market opportunities can be captured. Further the Company wants to verify the technology in a pilot to be able to implement a new enhanced and optimized factory design with reduced risk and improved cost position.

Market risk

The company's performance is affected by the global economic conditions in the market in which it operates.

The invasion of Ukraine and the sanctions imposed on Russia has caused high volatility in global markets. During 2022, the Company still experienced delays in some shipments due to covid-19 and closed ports in addition to increased price of raw materials. However, towards the end of 2022, the Company experienced some reduction in prices.

Travel restrictions also limited the ability to meet potential customers and partners. Still, the Company has been very active with potential customers and strategic partners.

BCS has successfully completed testing and proven its ability to produce carbon directly from fluegas from a waste incineration facility in Bergen, Norway. The results should create added opportunities within the field of CCU value chain.

Document ID:
ED15EFAADAFB4A87B93198F1BC8D6433

The Company has also received approval from Innovation Norway for funding of MNOK 6 for a joint research project with a Chinese partner on Sodium Ion Batteries.

Liquidity and credit risk

The company has budgeted for minimal revenues in 2023, as the focus will be on optimizing the technology.

The Company requires additional capital financing to finance future factories and growth in the long term. The Company's ability to finance working capital and capital expenditures will depend on future operating profit, as well as the ability to generate sufficient cash and to achieve new market funding. This depends to some extent on general economic, financial, competitive, market, legislative, regulatory and other factors, many of which are beyond the company's control. That said, in February 2022 BCS raised MNOK 250 in new equity through a private placement which gives the Company enough liquidity to be able to carry out the first plans that have been put forward. BCS will consider all financing options for future plans, including operating cash flow, loans, government grants and equity.

Working environment, gender equality and discrimination

The working environment in the Company is considered by the Board of Directors to be good, no particular measures have been taken.

Mid-April 2022 the Company had a ventilation fault in the production hall. The fault was a result of incorrect connections in the ventilation system and resulting in dust flowing from the mechanical workshop to the production hall via the ventilation system.

The fault was handled by ventilation expertise and independent third parties and adjusted to work properly.

The ventilation fault did not result in any injuries on personnel, but the Company chose to register the fault as an incident to the Norwegian Labor Inspection Authorities. Based on the amounts of dust, the company had full sanitary cleaning of the production hall and sent all personnel to complete health check.

Total sick leave for the company for 2022 is 5.4%. Mainly due to high percentage of Covid-19 at the first four months of 2022.

Bergen Carbon Solutions AS aims to be a workplace where full equality prevails between genders. The company has incorporated a personnel policy that is considered gender neutral in all areas. By end of the year the company had 32 employees, 7 females and 25 males. The company's Board of Directors consists of 5 people, 3 males and 2 females. There was a change in board members in January and June 2022.

Environmental reporting

In addition to BCS's production method being CO2 negative, BCS otherwise have a strong focus on the environment and does its best to have as energy efficient production as possible. The most important resources used are energy, water, and CO2. Paper, cardboard, plastic, metal, wood and (small) quantities of hazardous waste are delivered to recycling stations. BCS does not have emissions to water, emission to air consists of small amounts of CO2 from the product purification process. We aim to have zero emissions at all levels at our test factory in Flesland, but also our large-scale production. Our climate strategy is closely linked to our business strategy.

Transparency Act

The Company has conducted due diligence assessments on both supply chain and business partners.

The account of the Act will be published on the Company's webpage www.bergencarbonolutions.com

Research and development activities

Throughout 2022 BCS has had several research and development activities, including design of filtration optimisation and cost optimization of raw products. This work will continue through 2023. BCS successfully finalized the development of the pilot to test flue gas at BIR as direct input into the production unit. This work supported by Enova.

In 2022, two development projects continued with grant from SkatteFUNN: "Development of a process for purification of CNF from solid salt", and "Development of a production unit for production of CNF with pure CO2 as input factor". These were both finalized in December 2022.

The subsidiary, Carbon Development Solutions AS, applied for and got approved from Regional Research Fund Nordland a project regarding development of composite alloy with CNF in aluminum. The project is approved for six months.

Board of directors' insurance

BCS has taken Board of Directors liability insurance which also cover CEO liability.

Disposal of profit and loss

This year's loss of MNOK 54.1 for the parent company is proposed transferred from the share premium.

Continued operation

The Board believes that the accounts provide a true and fair view of the development and results of the Company's operations and position.

The Board of Directors has reviewed the Company and Group's ongoing operations, position, and performance development. The Board of Directors believes that there is basis for continued operations and the financial statements for 2022 have been created accordingly.

Outlook statement

There is a global growing demand for graphite, MWCNT and CNF. Especially as an additive in the battery sector. The World and Europe in particular is experiencing scarcity of raw materials.

To meet this market BCS will use 2023 to optimize our technology and further develop our market insight. BCS is confident that the technology is fundamentally more energy efficient and climate positive compared with the current dominating CVD method.

The Company is working with potential business partners and will continue this work in 2023. By extending the factory timeline the possibility of applying for soft funding through various initiatives and organizations opens up, such as EU, EksFin, Innovation Norway, RFF and Enova. The work done in 2023 will ensure an optimal version of our technology, reduced risk and improved cost position when establishing the first factory.

In February 2023 Innovation Norway approved BCS's funding application for MNOK 6 for a joint research project with a Chinese partner on Sodium Ion Batteries.

2023 will be an important year for the Company and it is the Board's assessment that Bergen Carbon Solutions is well positioned and prepared to realize the current plans and its market potential.

Note 1 – Summary of significant accounting policies

General information

Bergen Carbon Solutions AS (BCS or the parent company or the company) is a Norwegian company headquartered in Bergen. Since 2016, the company has been developing technology utilizing CO₂ and Norwegian hydropower to create carbon products such as nanofibers, nanotubes, and graphite. The company aims to pioneer a new Norwegian industry for ground-breaking, environmentally friendly material-technology.

Basis of preparation and accounting principles

The annual financial statements for 2022 have for the first time been prepared in accordance with the rules in the Norwegian Accounting Act § 3-9 and Simplified IFRS adopted by the Norwegian Ministry of Finance on 7 February 2022. This mainly means that measurement and recognition follow international accounting standards as adopted by the EU (IFRS) and presentation and note information are in accordance with the Norwegian Accounting Act and generally accepted accounting practices principles in Norway. The date of transition was 1 January 2021. The change has been implemented by applying the transitional rules in IFRS 1, with the exception of requirements for three balance sheets which are in accordance with the implementation of Simplified IFRS. See note 19 for further information and description of exceptions from measurement and recognition requirements of IFRS.

Consolidation principles

The consolidated financial statements include Bergen Carbon Solutions AS (BCS) and its subsidiaries, which are entities in which BCS has control. Control is normally achieved through ownership, directly or indirectly, of more than 50 % of the voting power. Subsidiaries are included in the consolidated financial statements from the date control commences until the date control ceases.

Investments in subsidiaries

Investments in subsidiaries is accounted for using the cost method in the separate financial statement for the parent company (company accounts).

Operating revenues

Revenue from the sale of products is recognised on the date of delivery. Rendering of services related to development and testing of products are recognized as revenue as they are delivered.

Classification and assessment of current and non-current items

Assets are classified as current when it is expected to be realized or sold, or to be used in the Group's normal operating cycle or falls due or is expected to be realized within 12 months after the end of the reporting date. Assets that do not fall under this definition is classified as noncurrent. Liabilities are classified as current when they are expected to be settled in the normal operating cycle of the Group or are expected to be settled within 12 months after the reporting date, or if the Group does not have an unconditional right to postpone settlement for at least 12 months after the reporting date. Liabilities that do not fall under this definition are classified as non-current.

Fixed assets

Property, plant and equipment are capitalized and depreciated over the asset's expected economic life. Direct maintenance of fixed assets is expensed on an ongoing basis under operating costs, while costs or improvements are added to the fixed asset's cost price and depreciated in line with the fixed asset. If the recoverable amount of the fixed asset is lower than the book value, a write-down is made to the recoverable amount. Recoverable amount is the higher of net sales value and value in use. Value in use is the present value of the future cash flows that the asset will generate.

Inventory

Inventories are measured at the lowest of acquisition cost and net realisation value. Net realisation value is the estimated sales price on ordinary operation, less sales costs. Acquisition cost is allocated using the FIFO method and includes expenses incurred on the acquisition of the items and costs to bring the items to their current state and location.

Research and Development (R&D)

Direct development costs are capitalized to the extent that a future economic benefit related to the development of an identifiable intangible asset can be identified and the cost can be measured reliably. Otherwise, such costs are expensed on an ongoing basis. Capitalized development is depreciated on a straight-line basis over its economic life. Own development of intangible assets is presented on a separate line in the income statement. Received grants associated with the project is booked as a reduction of costs that is capitalized.

Grants

Government grants are recognized when there is reasonable assurance that the grant will be received and when the Company is compliant with all conditions attached. When the grant relates to an expense item, it is recognized as reduction of cost over the period that the costs it is intended to compensate are expensed. When the grant relates to an asset, it is deducted from the carrying amount of the asset - the grant is then recognized in profit or loss over the useful life of a depreciable asset by way of a reduced depreciation charge.

Grants that can not be identified to any related expense or investments is recognized as other operating income.

Income tax

Tax expense consists of tax payable and change in deferred tax. Deferred tax / tax benefit is calculated on all differences between the accounting and tax value of assets and liabilities. Deferred tax is calculated at 22% on the basis of the temporary differences that exist between accounting and tax values, as well as tax losses carried forward at the end of the financial year. Deferred tax asset is recognised for all deductible temporary differences and tax losses carried forward to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised.

Pensions

The company has a defined contribution plan and is a member of the AFP scheme. AFP is also treated as a defined contribution pension as a result of reliable measurement is not considered possible. The pension obligation is therefore not capitalized, see also separate note.

Currency

The company's functional currency is Norwegian kroner (NOK). Transactions in foreign currencies are recognized at the exchange rate at the time of the transaction. Monetary items in foreign currency are measured again at the reporting date at the current exchange rate. Changes are recognized in the income statement as financial items.

Cash flow statement

The company's cash flow statement is presented according to the indirect method. Cash and cash equivalents include bank deposits.

Use of estimates and judgements

In the preparation of the annual financial statements, the management has applied estimates and assumptions that have affected assets, liabilities, income and costs. Estimates and assumptions are based on historical experience and other factors that management considers reliable, but which by their very nature are associated with uncertainty and unpredictability. These assumptions may prove incomplete or incorrect, and unexpected events or circumstances may arise. The estimates and assumptions deemed most significant to the preparation of the consolidated financial statements are addressed below:

- Intangible and tangible assets, note 3 and 4
- Share based option plan, note 7
- IFRS 16 leases, note 8
- Non-recognition of deferred tax assets, note 11

Estimate may change as a consequence of future events. Changes in accounting estimates are recognised in the period in which the changes occur. If the changes also apply to future periods, the effect will be distributed on the current and future periods. Reference is made to the separate note for further details of estimates and assumptions included in this year's consolidated financial statements.

Document ID:
EA4D3D40BD704AD49CACF546B7CA94ED

Impairment

Management reviews long-lived assets for impairment annually, or more frequently, whenever events or changes in circumstances indicate that the carrying value may not be recoverable. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. If an impairment test is required, the estimated future undiscounted cash flows associated with the asset are compared to the asset's carrying value to determine if an adjustment for impairment to such asset is necessary. The effect of any impairment would be to expense the difference between the recoverable amount of such asset and its carrying value. Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period. As of 31 December 2022, and 2021, management did not consider an allowance for impairment necessary for long-lived assets.

Going concern

The Company has adopted the going concern basis in preparing its financial statements.

Leases

Leasing agreements with a duration exceeding 12 months are capitalized. The Group assesses whether a legally enforceable contract is or contains a lease at the inception date of the contract.

The Group recognizes a right-of-use ("ROU") asset and a lease liability at the lease commencement date. The lease liability is calculated based on the present value of the contractual minimum lease payments using the implicit interest rate of the lease. The Group uses the incremental borrowing rate in the case the implicit rate cannot be readily determined from the lease contract. The contractual minimum lease payments consist of fixed or variable payments, including those resulting from options in which management is reasonably certain it will exercise during the lease term. The lease liability is subsequently measured at amortized cost under the effective interest rate during the lease term and may also be adjusted to management's reassessment of future lease payments based on options exercised, renegotiations, or changes of an index rate.

The ROU asset is calculated based on the lease liability, plus initial direct costs towards the lease, and less any incentives granted by the lessor. The ROU asset is subsequently amortized under the straight-line method under the shorter of the lease term or the useful life of the underlying asset and is included as part of depreciation and amortization in the accompanying statements of other comprehensive income.

Leases that fall under the IFRS 16 short-term and/or low value exception are recognized on a straight-line method over the lease term.

Note 3 – Intangible assets

In the period 2019 until 2022, the company has worked on a development project related to the development of an upscale production unit, which will produce carbon based on CO₂ as an input factor. Carbon has superior mechanical and electrical properties that can be transferred to the main material at relatively low admixture as a composite. This can be both of a structural and electrical nature.

The majority of the expenses relating to the project are capitalized own development expenses, on intangible asset in the balance sheet. As of 31.12.2022, capitalized development expenses related to the project are MNOK 23.4. In addition, MNOK 0.646 is expensed in 2022.

The project is supported by ENOVA and was finalized in December 2022. The company has been paid a total of MNOK 10.3 since its inception in 2019. The company receives 45% of reported project costs until they have reached 80% of the granted amount, which was achieved in November 2021. The company received a final payment equal to the last 20% of MNOK 2 in February 2023.

The project's impact for the company's future earnings are expected to exceeds the net total capitalized cost.

As of 31.12.22 the project is reclassified to tangible assets as the project is finalized. This item will be depreciated over its useful life assumed to be 5 years starting as of 31.12.22.

Document ID:
EA4D3D40BD704AD49CACF546B7CA94ED

Note 4 – Tangible assets

Straight-line depreciation is applied over the useful life of property, plant, and equipment based on the asset's historical cost and estimated residual value at disposal. Depreciation is charged to expense when the property, plant or equipment is ready for use or placed in service. As such, assets under construction are not depreciated.

Assets under construction as of 31 December 2022 consisted mainly of capitalized costs related to the Høyanger facility. The company continues to improve the market understanding and the potential of the technology and has identified several opportunities to further optimize the technology to reduce risk and improve the overall business case. Among the improvements are several cost saving improvements that can be implemented into future factory designs. More flexibility on timing will also allow for these improvements to be implemented into the facility in Høyanger. The timeline of completion is not determined.

Write-down for the period consists of purchased assets no longer utilized in the production and/or office.

Additions own development has been capitalized as of 31 December 2022 as these costs are deemed to be part of the ongoing assets under construction and qualify for capitalization in accordance with IAS 16. Capitalization of interest has been deemed immaterial as of 31 December 2022.

In both 2021 and 2022 the company did an assessment of impairment indicators, that shows no indication of a need for write-downs.

Right of use asset is described in further details in Note 8.

Total	32,887	17,022	32,680	17,022

The company employed an average of 26 employees in 2022

Number of employees employed in the Group as of 31.12.2022	2022	2021	2020
	32	26	8

Benefits for senior executives (NOK thousands)	CEO*	CEO**	Board remuneration
Salary	970	1,255	902
Other benefits	5	12	
Pension costs	49	63	
Total	1,024	1,330	902

*CEO in 2022 was until 3rd of May Jan Børge Sagmo. Amounts include severance pay. **(1.1.22–03.05.22)**

CEO in 2022 was from 3rd of May Finn Blydt-Svendsen. Full year amounts. **(03.05.22–31.12.22)

No loans / collateral have been granted to the chairman of the board or related parties in 2022.*

There is no bonus agreement or agreement on severance pay in connection with any termination of the position with the CEO.

The Chairman of the Board and Board member Dag Skansen both have an employment agreement on consultative assignment.

Option agreements key management and employees:

Please see Note 7 for a description of the Share based Option Program for management and key employees.

Options held by CEO and members of the Board are listed in Note 20 (Shareholders).

CEO holds an option agreement of 60.000 options

Options granted in January 2023 are described in Note 23 (Events after the reporting date).

Note 6 – Pensions

The company is liable to maintain an occupational pension scheme under the Mandatory Occupational Pensions Act. The company's pension schemes satisfy the requirements of this Act.

In addition to the defined contribution scheme, the company is part of the AFP scheme (Contractual pension) which gives employees the right to benefits if they retire after the age of 62.

The pension obligation has not been capitalized in the accounts as of 31.12.22. The AFP scheme, which came into force on 1. January 2011 is considered to be a defined benefit multi-company scheme that is to be recognized as a defined benefit plan when reliable measurement is available. If it is not possible to make a reliable measurement, the scheme is recognized as a defined contribution pension. The Ministry of Finance has concluded that the current AFP scheme should not be capitalized. This also applies after the transition in principle from NGAAP to simplified IFRS in 2022.

As of 31.12.22 there was 32 employees covered in the company's pension scheme.

This file is sealed with a digital signature.

of the document.

Document ID:
EA4D3D40BD704AD49CACF546B7CA94ED

Note 7 – Share based option plan

Bergen Carbon Solutions AS has granted share options to selected employees in February and April 2022. The options give the holder the right to acquire shares from the company at an exercise price defined in the individual option agreements. As of 31.12.2022, 15 employees held share options.

Options are granted under the plan for no consideration and carry no dividend or voting rights before exercise of the options.

The value of the options is determined at the grant dates. The expected number of options exercised is estimated using an expected turnover on a yearly basis. The estimated cost is expensed over the vesting period. MNOK 1.9 have been expensed in 2022.

Movements during the year	2022	2022	2021	2021
	Average exercise price per share option	Number of options	Average exercise price per share option	Number of options
As at 1 January	-	-	-	-
Granted in February 2022	17.50	444,000	-	-
Granted April 2022	47.20	486,000	-	-
Exercised during the year	-	-	-	-
Forfeited during the year	37.40	276,000	-	-
Expired during the year	-	-	-	-
As at 31 December	31.10	654,000	-	-

The share options granted in February 2022 can be executed in March-April 2025, and the options granted in April 2022 can be executed in March-April 2026.

Applied assumptions and inputs in the valuation of the options

The value of the options is determined at the grant dates by applying the Black-Scholes option pricing model. The Black-Scholes model considers the share price at the grant date, time until execution, exercise price, risk free interest rate, volatility and dividends. In addition, the value is adjusted with respect to expected turnover, as share options which belongs to employees who resigns will be terminated.

Grant date	10.02.2022	19.04.2022
Dividend yield, 2023-2027 (%)	0.0%	0.0%
Volatility (%)	76.8%	76.0%
Risk free interest rate (%)	1.9%	2.7%
Share price (NOK)	56.3	48.7
Date of exercise	Latest possible	Latest possible
Benefit cap per opsjon	100	100
Estimated fair value per option at grant date	24.3	12.4

Expected turnover ratio (%)	20%	20%
------------------------------------	------------	------------

Dividend yield

The company is assumed to not pay any dividends in the period until the exercise of the options.

Volatility:

The volatility is estimated by annualizing the monthly standard deviation for the stock, from IPO to the grant date of each individual option.

Risk free interest rate:

The risk-free interest rate is set equal to the interest rate on government bonds at with corresponding duration at the grant date.

Date of exercise:

All options are assumed to be exercised at the latest possible date, as this maximizes the expected value.

Share price:

Latest available share price at the grant date.

Personell expenses - Share based remuneration

Amounts in NOK thousands	2022	2021
Share based remuneration (salary)	1,934	-
Share based remuneration (social security tax)	-	-

As of 31.12.22 none of the options are in the money. Due to this there has not been an accrual for social security tax in 2022.

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity
of the document.

Document ID:
EA4D3D40BD704AD49CACF546B7CA94ED

Note 8 – Capitalized lease-agreements

Capitalized lease-agreements

The company's assets under capitalized leases include buildings and other real estate. For the Parent entity this consist of the lease at Fleslandsveien 70. For the Group this consist of both Fleslandsveien 70 and the lease of office space in Mosjøen in the subsidiary Carbon Development Solutions AS.

Fleslandsveien 70 (Bergen Carbon Solutions AS): The rental period is ending in 2029 + option for 5 years.
Mosjøen (Carbon Development Solutions AS): The rental period is ending 2024.

If the lease agreements have an option for extension, it is taken into account when determining the lease period if it is assumed reasonably certain that this will be used. The option for extension is not recognized in the table below.

Assets and liabilities arising from a lease are initially measured on a present value basis. The lease payments are discounted using the lessee's incremental borrowing rate, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security, and conditions.

To determine the incremental borrowing rate, the Group uses a build-up approach that starts with a risk-free interest rate adjusted for estimated credit risk.

The Group is exposed to potential future increases in variable lease payments based on an index regulation, which are not included in the lease liability until they take effect. When adjustments to lease payments based on an index take effect, the lease liability is reassessed and adjusted against the right-of-use asset. Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period in order to produce a constant periodic rate of interest on the remaining balance of the liability for each period

Assets – Capitalized lease-agreements:	Group	Parent Company
Amounts in NOK thousands	Property – lease	Property – lease
Acquisition cost 01.01.22	22,056	22,056
Additions capitalized lease-agreements	265	
Acquisition cost 31.12.22	22,321	22,056

The general meeting has granted the Board authorization to increase the company's share capital by issuing shares in accordance with section 10-14 (1) of the Public Limited Companies Act. The Board is granted authority to increase the company's share capital by up to NOK 25 815.63. The share capital increase may be affected through one or more directed share issues. The authorization entails that the company's Board of Directors is granted authority to set the date, and to stipulate the subscription price for the new subscription.

In addition, the Board is given the authorisation to increase the Company's share capital with a maximum amount of NOK 6 295.521 through option agreement for employees, through one or more issues of new shares.

Note 13 - EPS

Amounts in NOK thousands	Group	
	2022	2021
Loss attributable to the shareholders of the parent	(54,028)	(30,107)
Loss for calculation of diluted earnings per share	(54,028)	(30,107)
Weighted average number of shares outstanding	41,198,535	32,734,550
Dilutive options		
Average number of shares and options used in calculation for diluted EPS	41,198,535	32,734,550
Basic earnings per share (NOK)	(1.31)	(0.92)
Diluted earnings per share (NOK)	(1.31)	(0.92)

Basic earnings per share calculations are based on the weighted average number of common shares outstanding during the period.

Diluted earnings per share calculations are performed using the weighted average number of common shares and dilutive common shares equivalents outstanding during each period. Options are dilutive when they result in the issue of ordinary shares for less than the average market price of ordinary shares during the period. The difference between the number of ordinary shares issued and the number of ordinary shares that would have been issued at the average market price in the period is treated as an issue of ordinary shares for no consideration.

Weighted average number of shares are calculated as follows:

2022: The Company issued 4 629 629 new shares in a capital raise in February 2022. As such, the weighted average number of shares outstanding in 2022 has been calculated by applying a weight of 2/12 of the number of shares before the capital raise in February (37 340 511), 10/12 of the number of shares after the capital raise (41 970 140).

2021: The Company issued 6 808 511 new shares in a capital raise in March 2021 and 4 978 000 new shares in a capital raise July 2021. As such, the weighted average number of shares outstanding in 2021 has been calculated by applying a weight of 3/12 of the number of shares before the capital raise in March (25 554 000), 4/12 of the number of shares after the capital raise in July (32 362 511), and 5/12 of the number of shares after both capital raises (37 340 511).

Note 17 – Government grants

Public subsidy/Tax receivables (SkatteFUNN)

In 2021, two development projects have been applied for and approved through SkatteFUNN: “Development of a process for purification of CNF from solid salt”, and “Development of a production unit for production of CNF with pure CO₂ as input factor”. Both projects are approved for two years. The grants from SkatteFUNN are recognized as reduction of personnel expenses in the P&L.

Total costs in 2021 is NOK 2 928 853, and a total amount of NOK 556 482 (19 %) has been booked as a reduction in personnel expenses and as short-term receivables in the balance sheet, since the company has no tax payable in 2021.

Total costs in 2022 is NOK 2 437 028, and a total amount of NOK 463 035 (19 %) has been booked as a reduction in personnel expenses and as short-term receivables in the balance sheet, since the company has no tax payable in 2022.

ENOVA

The company has worked on a development project supported by ENOVA. The company has been paid a total of MNOK 10.3 since its inception in 2019. The project is described in Note 3.

Note 19 – First time implementation of simplified IFRS

The annual financial statements for 2022 have for the first time been prepared in accordance with the rules in the Norwegian Accounting Act § 3-9 and Simplified IFRS adopted by the Norwegian Ministry of Finance on 7 February 2022. This mainly means that measurement and recognition follow international accounting standards as adopted by the EU (IFRS) and presentation and note information are in accordance with the Norwegian Accounting Act and generally accepted accounting practices principles in Norway. The date of transition was 1 January 2021. The change has been implemented by applying the transitional rules in IFRS 1, with the exception of requirements for three balance sheets which are in accordance with the implementation of Simplified IFRS.

IAS 10 no. 12 and 13 and IFRS 9.5.7.1A are intended deviated, due to dividends and group contributions are recognised in accordance with the provisions of the Norwegian Accountings Act. This has not been relevant as of 31.12.22.

Prior years the financial statements have been prepared in conformity with the Accounting Act and NRS 8 – Good accounting practice for small companies. More comprehensive note information has been provided than is required for small enterprises.

Bergen Carbon Solutions AS and the Group is only considered to have one item with significant impact for adjustment in accordance with IFRS in the 2021 figures. Last year's column in the balance sheet and profit and loss account is consequently changed from 2021 in regard to the Company and the Group's rental agreement for office space in Fleslandsveien 70, Bergen, given the new choice of principles. This applies to leases that are treated in accordance with IFRS16.

There are no other differences in the accounting principles that has a significant effect on measurement and/or recognition in the financial statement between previous GAAP and Simplified IFRS.

The effects on equity illustrated below:

Note 23 – Events after the reporting date

Odd Strømsnes (CEO) officially started in his position January 2023.

Option agreements

In January 2023 Odd Strømsnes (CEO) and Jon Andre Løkke (Chairman of the Board) was granted in total 700.000 options, of which 400.000 was granted to the CEO and 300.000 for the Chairman of the Board. The exercise price is NOK 11,8 per option. The exercise price for the options will have a premium of 5 per cent annually until the options are vested.

For Odd Strømsnes the exercise period is 15th of February to 15th of March 2025 for up to 1/3 of the options granted, and 15th of February to 15th of March 2027 for remaining options.

For Jon Andre Løkke the exercise period is 22nd of November 2024 to 15th of March 2025 for up to 1/3 of the options granted, and 22nd of November 2025 to 15th of March 2026 for remaining options.

The options granted to CEO and Chairman of the Board has not been recognized in the cost for the share-based option plan described in Note 7 as the event is assessed to be an event after the reporting date.

ENOVA-project – Finalization

In February 2023, the ENOVA-project as described in note 3 and 17 was finalized and approved, and final grant received. This amounts to MNOK 2,1.

This amount is not recognized as of 31 December 2022 as it is deemed to be an event with effect on the approval date in 2023.

To the General Meeting of Bergen Carbon Solutions AS

Independent Auditor's Report

Opinion

We have audited the financial statements of Bergen Carbon Solutions AS, which comprise:

- the financial statements of the parent company Bergen Carbon Solutions AS (the Company), which comprise the balance sheet as at 31 December 2022, the statements of profit or loss, comprehensive income and cash flow for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and
- the consolidated financial statements of Bergen Carbon Solutions AS and its subsidiaries (the Group), which comprise the balance sheet as at 31 December 2022, the statements of profit or loss, comprehensive income and cash flow for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion

- the financial statements comply with applicable statutory requirements,
- the financial statements give a true and fair view of the financial position of the Company as at 31 December 2022, and its financial performance and its cash flows for the year then ended in accordance with simplified application of international accounting standards according to section 3-9 of the Norwegian Accounting Act, and
- the consolidated financial statements give a true and fair view of the financial position of the Group as at 31 December 2022, and its financial performance and its cash flows for the year then ended in accordance with simplified application of international accounting standards according to section 3-9 of the Norwegian Accounting Act.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company and the Group as required by relevant laws and regulations in Norway and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The Board of Directors and the Managing Director (management) are responsible for the information in the Board of Directors' report and the other information accompanying the financial statements. The other information comprises information in the annual report, but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the information in the Board of Directors' report nor the other information accompanying the financial statements.

In connection with our audit of the financial statements, our responsibility is to read the Board of Directors' report and the other information accompanying the financial statements. The purpose is to consider if there is material inconsistency between the Board of Directors' report and the other information accompanying the financial statements and the financial statements or our knowledge obtained in the audit, or whether the Board of Directors' report and the other information accompanying the financial statements otherwise appear to be materially misstated. We are required to report if there is a material misstatement in the Board of Directors' report or the other information accompanying the financial statements. We have nothing to report in this regard.

Based on our knowledge obtained in the audit, it is our opinion that the Board of Directors' report

- is consistent with the financial statements and
- contains the information required by applicable statutory requirements.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with simplified application of international accounting standards according to the Norwegian Accounting Act section 3-9, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's and the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error. We design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's and the Group's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's and the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and the Group to cease to continue as a going concern.
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves a true and fair view.
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
