

ÅRSREGNSKAPET FOR REGNSKAPSÅRET 2020 - GENERELL INFORMASJON

Enheten

Organisasjonsnummer:	914 148 324
Organisasjonsform:	Aksjeselskap
Foretaksnavn:	HURTIGRUTEN GROUP AS
Forretningsadresse:	Langkaia 1 0150 OSLO

Regnskapsår

Årsregnskapets periode:	01.01.2020 - 31.12.2020
-------------------------	-------------------------

Konsern

Mørselskap i konsern:	Ja
Konsernregnskap lagt ved:	Ja

Regnskapsregler

Regler for små foretak benyttet:	Nei
Benyttet ved utarbeidelsen av årsregnskapet til selskapet:	Regnskapslovens alminnelige regler
Benyttet ved utarbeidelsen av årsregnskapet til konsernet:	IFRS

Årsregnskapet fastsatt av kompetent organ

Bekreftet av representant for selskapet:	Torleif Ernsten
Dato for fastsettelse av årsregnskapet:	15.04.2021

Grunnlag for avgivelse

År 2020: Årsregnskapet er elektronisk innlevert
År 2019: Tall er hentet fra elektronisk innlevert årsregnskap fra 2020

Det er ikke krav til at årsregnskapet m.v. som sendes til Regnskapsregisteret er undertegnet. Kontrollen på at dette er utført ligger hos revisor/enhetens øverste organ. Sikkerheten ivaretas ved at innsender har rolle/rettighet for innsending av årsregnskapet via Altinn, og ved at det bekreftes at årsregnskapet er fastsatt av kompetent organ.

Brønnøysundregistrene, 06.07.2022

HURTIGRUTEN AS
Postboks 6144 Langnes
9291 TROMSØ

Tillatelse til å utarbeide årsregnskap og årsberetning på engelsk språk

Vi viser til deres brev av 23. november 2015 der det søkes om dispensasjon fra kravet til å utarbeide årsregnskap og årsberetning på norsk språk for følgende selskaper;

Silk Topco AS	org. nr. 913 811 720
Silk Midco AS	org. nr. 914 172 861
Silk Bidco AS	org. nr. 914 148 324
Hurtigruten AS	org. nr. 914 904 633

Skattedirektoratet gir på bakgrunn av en konkret helhetsvurdering de overnevnte selskaper dispensasjon fra kravet til å utarbeide årsregnskap og årsberetning på norsk språk, jf. regnskapsloven § 3-4 tredje ledd. Dispensasjonen forutsetter at opplysningene som vedtaket baserer seg på ikke endres vesentlig.

Kopi av dette brevet må sendes Regnskapsregisteret i Brønnøysund sammen med årsregnskapet. Det påligger den regnskapspliktige å dokumentere ved dette brev at tillatelsen er gitt.

Bakgrunn

Hurtigruten AS er eid av Silk Bidco AS som eies 100 prosent av Silk Midco AS som igjen er heleid av Silk Topco AS. Silk Topco AS og Silk Midco AS er holdingselskaper uten øvrig drift utover eie av aksjer og Silk Bidco AS eier aksjene i driftsselskapet Hurtigruten AS.

Silk Topco AS eies med 90 prosent gjennom et holding selskap av det engelske private equity selskapet TDR Capital LLP. De øvrige aksjonærene er to norske profesjonelle aktører med en eierandel på 4,9 prosent hver, samt ansatte i Hurtigrutens konsernledelse som eier 1,8 prosent.

Konsernet er finansiert gjennom et obligasjonslån på 455 millioner euro samt en kortsiktig trekkfasilitet på 65 millioner euro, utstedt av Goldman Sachs. Obligasjonslånet er notert på Luxemburg børs og det er et krav at løpende finansiell rapportering til obligasjonseiere og Goldman Sachs skal skje på engelsk. Obligasjonslånet er utstedt av Silk Bidco AS, dette medfører at konsernet må avgi konsernregnskap i underkonsernet Silk Bidco AS i tillegg til konsernregnskap med den norske konsernspissen Silk Topco AS. Hurtigruten AS har også en stor internasjonal

Postadresse Postboks 9200 Grønland 0134 Oslo	Besøksadresse: Se www.skatteetaten.no Org.nr: 996250318 E-post: skatteetaten.no/sendepost	Sentralbord 800 80 000 Telefaks 22 17 08 60
--	--	--

virksomhet i form av datterselskaper (salg og markedsføring) og kunder i utlandet som medfører at en stor del av selskapets kommunikasjon foregår på engelsk. Alle sentrale aktører og samarbeidspartnere innen denne bransjen behersker og benytter engelsk. En norsk oversettelse vil kun ha til formål å oppfylle regnskapslovens språkkrav.

Skattedirektoratets vurdering

Etter regnskapsloven § 3-4 tredje ledd skal *"årsregnskapet og årsberetningen ... være på norsk. Departementet kan ved ... enkeltvedtak bestemme at årsregnskapet og/eller årsberetningen kan være på et annet språk."*

I Ot. prp. nr. 42 (1997-1998) Om lov om årsregnskap m.v., er det uttalt følgende om regnskapslovens formål, jf. pkt. 1.1:

"Regjeringen har som siktemål at regnskapsloven skal bidra til informative regnskaper for ulike grupper av regnskapsbrukere. Regnskapsbrukerne er dels investorer og kreditorer som tilfører kapital til foretakene, og dels andre grupper som har interesse av å vite hvordan foretaket drives, f.eks. de ansatte og lokalsamfunnet. Informasjonen til kapitalmarkedet skal gi grunnlag for riktig prising av finansielle objekter. Riktig prisdannelse på aksjer er en forutsetning for at ressursbruken i samfunnsøkonomien skal bli best mulig. Gode regnskaper vil også gjøre det vanskeligere for markedsdeltakere å ta ut spekulasjonsgevinster med basis i skjevt fordelt informasjon."

Det fremgår således at et av hovedformålene med regnskapsloven er å bidra til *"informative regnskaper for ulike grupper av regnskapsbrukere"*. Regnskapsbrukere vil omfatte, jf. uttalelsen i proposisjonen, blant andre investorer, kreditorer, ansatte og lokalsamfunnet.

Det er etter Skattedirektoratets vurdering derfor avgjørende ved vurdering av om dispensasjon fra kravet til å utarbeide årsregnskap og/eller årsberetning på norsk kan gis, at det ikke foreligger mulige brukere av regnskapsinformasjon som blir vesentlig berørt negativt ved en eventuell dispensasjon.

Det er særlig hensynet til brukerne av regnskapsinformasjon som skal vurderes ved en dispensasjonssøknad. I denne vurderingen har Skattedirektoratet lagt særlig vekt på at hovedaksjonær med 90 % av selskapene er et engelsk selskap. Eierkretsen er begrenset. Konsernet har obligasjonslån notert på utenlandsk børs der det er et krav at regnskapene avlegges på engelsk språk. Videre er det vektlagt at konsernet driver virksomhet i en internasjonal bransje der alle sentrale aktører og samarbeidspartnere behersker og benytter engelsk.

Directors' Report 2020

Hurtigruten Group – The leading global expedition cruise operator

Hurtigruten Group's vision is to be the leading expedition travel company by offering authentic and accessible experiences around the world to travelers who wish to explore and travel in a sustainable way. Hurtigruten Group will continue to be a frontrunner in adventure tourism and expedition cruising, a niche with substantial global growth potential. Hurtigruten Group's goal is to reinforce its global position, differentiated from the rest of the cruise industry by authentic, sustainable and active experiences on both land and sea. Hurtigruten Group has three main business segments, Hurtigruten Norway – branded as Hurtigruten in Scandinavia and Hurtigruten – Norwegian Coastal Express in other markets, Hurtigruten Expeditions branded as Hurtigruten Expeditions in all markets – Hurtigruten Destinations with the Hurtigruten Svalbard brand. Over the last years, the brands, Hurtigruten Expeditions, Hurtigruten Norwegian Coastal Express, and Hurtigruten Svalbard been able to fortify its position as the leading expedition cruise company focusing on sustainable expedition cruising for the global traveler.

With a fleet of 16 custom-built cruise vessels including the world's two first hybrid-powered expedition cruise ships delivered in 2019, Hurtigruten Group is the world's largest expedition cruise company.

Hurtigruten Group's strategy is to generate profitable sustainable growth in all 3 business segments. This will be achieved through increasing capacity through construction of new vessels, operational initiatives to realize its substantial potential, expand and renew its customer base, and strengthen the product range.

Hurtigruten Group believes its product offerings in Hurtigruten Expeditions, Hurtigruten Norway and Hurtigruten Destinations differs significantly from the offering of other Expedition cruise and adventure travel operators. The customer offering has been purposefully designed to reach a wide range of customer segments. Hurtigruten Group offers its guests the opportunity to get closer to nature in beautiful and remote areas in order to experience local wildlife, culture and activities – with a minimal footprint.

Operating smaller, custom-built vessels, Hurtigruten Group's ships can go where others can't and their crew and staff are very familiar with the waters they sail in, which are among the most challenging in the world. In Hurtigruten Expeditions, the day-to-day itineraries and programs are adjusted based on weather and local conditions, ensuring optimal sightings of nature and wildlife, cultural events in several ports of call and other experiences. Hurtigruten Norway voyages lets the guest immerse in the everyday life along the rugged Norwegian coasts visiting small villages experience the wildlife, beautiful landscape and the Norwegian culture through a wide range of excursions. Hurtigruten Destinations brings the guest to the northernmost settlement in the world on the Archipelago of Svalbard to experience the Arctic frontier like no other place on earth. All the Hurtigruten Groups business segments allows the guests to experience being a part of the destination – rather than simply viewing it from the ship.

Hurtigruten Group's brands offers a unique gateway to experiences to the Norwegian coast, Greenland, Svalbard, Iceland, British Isles, Alaska, South America, Arctic, Antarctica, and to other unique destinations to travelers from all over the world. Hurtigruten Group's operation builds on a rich and proud Norwegian Expedition Cruises heritage having offered scheduled voyages along the Norwegian coast since 1893 and offering the first Expedition cruises to Svalbard as early as 1896 and. Today, Hurtigruten Group combines a deeply rooted desire to offer genuine experiences the best local food and beverages while leaving a smaller footprint as it shapes the future of the growing adventure travel and expedition cruise market.

Hurtigruten Expeditions and Hurtigruten Norwegian Coastal Express have a high level of recognition in key travel markets, such as Germany, UK and the Nordic countries. Based on these strong recognized brands and the authenticity of a product tailored for the adventurous. Hurtigruten Group's brands competitive position are supported by substantial barriers to establishment in the market for adventure and nature-based tourism. Substantial investments have been made across its fleet of 16 vessels, custom built to deliver the unique Hurtigruten Expedition and Hurtigruten Norwegian Coastal Express product. Any newcomer wishing to offer

expedition and nature-based travel services in Hurtigruten Group's market will need to invest heavily before it will be able to compete with Hurtigruten Group's business segments.

Hurtigruten Group and its brands have over time been recognized as the leading expedition cruise and adventure travel operator in the industry, through industry awards such as the "Best Expedition Cruise Line" at the 2017, 2018, 2019 and 2020 Travvy awards, "Best Adventure Cruise Line" in Cruise Critic Editor's Picks over a 9 year span from 2012 to 2020. Globe Travel Awards for "Best Specialist Cruise Company" in 2020. Hurtigruten Group has been deemed Germany's "Brand of the year (travel)" for 4 consecutive years (2017-2020). Cruise Critic UK has rated Hurtigruten Group the best Adventure Cruise line of the year over the period of 2012-2020. Recently Hurtigruten Group was voted Best Expedition Cruise line of the year 2019 – Australian Travel awards and Globe Travel awards – Best Specialist Cruise Company 2020.

Hurtigruten Group is experiencing increasing global media attention, across all markets – including outside Norway and the Nordics, where the company has a strong standing.

The Group's global headquarter is located in Oslo, with offices and operations also in Hamburg, Tromsø, London, Paris, Seattle, Melbourne, Tallinn, Hong Kong, Longyearbyen and Kirkenes (where Hurtigruten Norway's crew center is situated) form a global organization serving Hurtigruten Group's most important and emerging markets.

Operations are run through the following business units: Hurtigruten Norway which operates the brand Hurtigruten Norwegian Coastal Express, Hurtigruten Expeditions, and Hurtigruten Destinations which operates the Hurtigruten Svalbard brand.

Hurtigruten Norway

Hurtigruten Norway operates under the brand Hurtigruten Norwegian Coastal Express and offers scheduled voyages along the Norwegian coast with unique and immersive travel experience to its guests. Hurtigruten Norway connects the international traveler with the everyday life and infrastructure along the beautiful and rugged Norwegian coast.

The voyage is described by the New York Times as "one of Norway's treasured national symbols". Having been developed over its 128-year history, it forms part of the country's cultural heritage, strengthening Hurtigruten Norway's legitimacy with international travelers seeking authentic Norwegian experiences.

Hurtigruten Norway has integrated the Norwegian food culture in the voyage through the culinary concept on board which is called Norway's Coastal Kitchen. The concept of locally sourced products – often loaded on board only hours before being served in the restaurants – has been a major success.

Offering a wide range of memorable, and even life changing experiences, along the Norwegian coast, is supported by collaboration with approx. 50 different excursion providers, offering unique seasonally adapted activities and experiences, tailored for the guests. Excursions and experiences have been a prioritized area for Hurtigruten Norway over many years and will continue as an important part of its differentiation strategy.

With Hurtigruten Norway being one of Norway's foremost tourist products, it is a driving force for developing Norwegian tourism and marketing the country internationally. At the same time, the Group has been collaborating with airlines and other industry players to improve flight connections for key departure ports in order to exploit the growth in the short-break market and to make Hurtigruten Norway's products more accessible.

Hurtigruten Norway aims to further develop and strengthen the Hurtigruten Norwegian Coastal Express brand as an iconic adventure travel product. It still has substantial development potential, which will be realized through a continued commitment to:

- Building Hurtigruten Norwegian Coastal Express as an iconic global brand within immersive exploration travel, which offers unique, authentic experiences
- Connecting local communities
- Expanding and continuously improving the portfolio of excursions and ancillary products

- Strong differentiation – Hurtigruten Norway offers the original voyage along the Norwegian coast dating back to 1893
- Being a frontrunner on sustainability
- Structured market development. Based on enhanced customer insights, targeting new segments, improving the brand's market position in key international travel markets like the UK, Germany, US, Australia and EMEA, improving e-commerce and distribution channels, and more
- Continuously improving our onboard experience

During the pandemic Hurtigruten Norway has operated between 2 and 7 ships on the scheduled voyages between Bergen and Kirkenes, primarily serving the local communities along the rugged Norwegian Coast with freight and transport services, which again demonstrates the close connection the service has with the everyday life. As of 1st of January 2021 Hurtigruten was operating 5 of 7 ships. Hurtigruten Norway expects to be back in full operations by 1st of July 2021.

Hurtigruten Expeditions

Hurtigruten Expeditions operates expedition cruises across the globe to over 200 destinations in over 40 countries, including Norway, Antarctica, the Arctic, Alaska, Iceland, Greenland, South America and a variety of other destinations. In 2020 we had 5 ships operating in the Expedition segment MS Fram, MS Midnatsol (January–April), MS Spitsbergen (May–December), MS Roald Amundsen, MS Fridtjof Nansen (March–December). The Covid-19 pandemic reduced the number of ships in operation as the fleet was mainly in warm lay-up from April 2020. In 2021 the 3 largest ships in the Hurtigruten Norway fleet joined the Hurtigruten Expeditions fleet, increasing the capacity significantly. A total of 7 ships will be deployed in Hurtigruten Expeditions.

In 2019, the two new hybrid-powered expedition ships, MS Roald Amundsen and MS Fridtjof Nansen were delivered. The ships are state-of-the-art expedition vessels designed to meet guests' expectations as well as strict environmental and safety standards. MS Roald Amundsen and MS Fridtjof Nansen have an ice-reinforced hull, a total length of 140m and have the ability to carry 530 guests. The hybrid technology engines will reduce fuel consumption substantially and permit periods of emission-free sailing.

MS Roald Amundsen and MS Fridtjof Nansen are a key part of Hurtigruten Expeditions' strategy of further expansion in the expedition cruise segment. The new ships will operate in new Hurtigruten Expeditions destinations, such as the Northwest Passage, Alaska, South America, and the Caribbean, in addition to the current Antarctica and Arctic destinations.

Over the last 4 years Hurtigruten Expeditions has increased capacity from 1 ship in 2015 to now 7 ships in 2021, with the addition of MS Otto Sverdrup, MS Trollfjord and MS Maud (formerly part of the Hurtigruten Norway fleet as MS Finnmarken, MS Trollfjord and MS Midnatsol). This will further cement our global leadership in the Expedition Cruising category.

Hurtigruten Expeditions will continue to further develop the expedition cruises product, characterized by the following focus areas:

- Continued development of Hurtigruten Expeditions as the global leading brand for expedition cruising
- Continued development of the existing product offering, the development of new experiences on board and ashore, and continuous assessment of new destinations
- Constant evaluation of capacity requirements, pricing and competitive developments in the segment.
- Knowledge building and increased commitment along the whole value chain through the development of logistics, destinations and excursions.
- A focused marketing commitment, strategic brand building and a strengthening of the sales organisation.
- A systematic effort to get coverage in global top-tier media

A further growth in capacity in Hurtigruten Expedition will be one of the main sources of growth for Hurtigruten Group business over the next 3 to 5-year period.

Hurtigruten Destinations

Hurtigruten Destination's main operations is through Hurtigruten Svalbard which owns and operates the Radisson Blu Polar Hotel, Funken Lodge and the Coal Miners' Cabins, as well as arctic adventure tourism on Svalbard. The archipelago of Svalbard is the Northernmost settlement in the world and one of the most remote and unique destinations in the world where there are more polar bears than people living.

From a base in Longyearbyen, Hurtigruten Svalbard AS offers active Arctic experiences on snow-covered and snow-free terrain with an extensive portfolio of activities and excursions. These include day trips on skis, dog sledding, snowmobile trips, boat or hiking excursions and longer expeditions in the archipelago. Hurtigruten Svalbard's operations – originating back in 1896 – are the largest and most diversified on Svalbard.

Over the last 3 years Hurtigruten Svalbard has invested heavily in the product and the hotels. In February 2018, Funken Lodge was re-opened with 88 brand-new rooms, new bar and lounge areas, a new reception and a refurbished Funktionærmessen gourmet restaurant. In February 2019 the Radisson Blu opened after a full refurbishment of the public areas including a new restaurant and pub concept.

This investment underlines Hurtigruten Svalbard's ambitions for year-round expedition-based experiences for individual guests, as well as for groups of travelers.

In March 2021 Hurtigruten Group entered into an agreement with Store Norske Spitsbergen Kullkompani AS ("SNSK") to sell the real-estate portfolio. At closing of the transaction Hurtigruten Svalbard AS will enter into a 30-year lease agreement with SNSK for the real estate and will continue to operate them and further develop the product offering on Svalbard.

Extraordinary events

Over the last 5 years Hurtigruten Group has had a steady improvement in financial performance and this continued into the financial year 2020 with achieving all time high financial results for Hurtigruten Group in the twelve months ending February 2020. The period after that after has been severely influenced by the Covid-19 pandemic. This led to a reduction in 2020 revenue of approx. EUR 370m (-61%) compared to 2019. Introduction of travel restrictions to reduce the spread of Covid-19 effectively reduced global leisure travel to close to zero. As a result of this Hurtigruten Group reduced the operations to a bare minimum running only 2 ships in Hurtigruten Norway on a reduced itinerary serving ports in Northern Norway with freight and local transport. During June and July 2020 Hurtigruten Norway and Hurtigruten Expeditions increased the capacity with partly lifting of travel restrictions on the 15th of July between Norway, Sweden and Germany. Operations were gradually resumed, with the first sailing in the Hurtigruten Norway starting 16th of June, gradually increasing to 6 ships in operation during the summer and third quarter. In July, sailings on MS Amundsen, MS Nansen and MS Spitsbergen resumed in Hurtigruten Expeditions. With the increasing level of infections in August and September 2020 operations were reduced back to two ships operating in Hurtigruten Norway until year end 2020. As of 1st of January 2021 Hurtigruten Norway is operating 5 ships under an agreement with the Norwegian Ministry of Transportation.

On the 31st of July 2020, there was an outbreak of Covid-19 on MS Roald Amundsen. The short-term financial effect of the outbreak on MS Roald Amundsen was approx. EUR 3m with limited effect on future bookings or cancellation rates.

On 14th of December 2020, Hurtigruten's global IT infrastructure was attacked by ransomware virus, resulting in several IT systems being unavailable for several days. Hurtigruten managed to restore most systems within few weeks. The costs related to the attack is estimated be approx. EUR 2 million, with the costs mainly associated re installation of servers and systems that was affected by the attack.

Market development

Hurtigruten Group's consolidated revenues mainly derive from international guests seeking unique nature-based and active experiences around the world. The global cruise and travel industry have substantial exposure to fluctuations in the world economy, which also applies to Hurtigruten Group.

From March 2020 the pandemic restricted travel significantly across the globe with Hurtigruten Group reducing operations by warm stacking most of its fleet which has continued through 2020 and into 1H of 2021. Before the

pandemic, adventure tourism was one of – if not the – fastest-growing global tourist trend, and a market in which there is great potential for the unique Hurtigruten Group products. The adventure travel segment does not appear to be age, gender or geography specific. People of all kinds, all over the world, want to explore while traveling.

Hurtigruten Group had experienced a significant growth before the pandemic, and we expect this to continue with the development and roll out of vaccines in the first half of 2021. Hurtigruten Group is of the opinion that this trend will be even stronger post the pandemic as the attractiveness of the remote and off the beaten track destinations will increase. Hurtigruten Group also expects that there is a significant amount of pent up demand for travelling as a result of the pandemic. There is currently a very strong booking development for 2022 compared to earlier periods before the pandemic which shows that the customer is ready to travel as soon as travel restrictions are lifted, and vaccines have been distributed.

Hurtigruten Group will continue its efforts to make real, active and nature-based travel products more easily accessible and on sale earlier, through new channels, to new markets and customer segments. Clearly differentiating Hurtigruten Group's unique and authentic product in the global cruise and tourism market will be essential. Hurtigruten Group are already experiencing results from these efforts through strong growth in brand recognition and future bookings in UK, US and Australia which are markets where Hurtigruten Group brands have historically had lower relative market penetration compared to the Nordics and Germany.

As we restart operations post the Covid-19 pandemic adverse incidents related to, and public perception about, the safety of travel, including customers or crew illness, such as incidents of Covid-19 or other contagious diseases, may adversely affect travel patterns in the short term and demand for the Group's services. Such outbreaks of disease could, among other things, disrupt the Hurtigruten Group's ability to embark and disembark customers and crew from its ships or conduct land-based services, disrupt air travel to and from ports, increase costs for prevention and treatment and adversely affect the Hurtigruten Group's supply chain. This could also adversely impact the Hurtigruten Group's reputation and demand for its offerings in areas unaffected by such an outbreak. Any of the foregoing could have a material adverse effect on the Hurtigruten Group's business, results of operations and financial condition.

Underlying booking patterns for 2022 and beyond show that the underlying travel industry trends continue to show growth in demand for unique destinations and an increasing interest in adventure travel and expedition cruising. With its strong history and clear positioning, Hurtigruten Group is the leading company in this segment. With its strong focus on sustainability and the environment, Hurtigruten Group introduced in 2019 the world's first hybrid expedition cruise ship, MS Roald Amundsen, powered by hybrid battery technology. Her sister ship, MS Fridtjof Nansen, was delivered in Q4 2019. These two vessels will fortify Hurtigruten Expeditions' position as the leading operator in the expedition cruise segment.

Explanation of the accounts

Profit and loss statement

The Group's financial performance in 2020 has been severely impacted by the Covid-19 pandemic. Before the pandemic hit, the financial performance was strong, with substantial growth year over year, and Hurtigruten entered 2020 with good prospects and the last 12 months results as of February 2020 was at all-time high. There was underlying growth in January and February driven both by the inclusion of MS Roald Amundsen to the expedition fleet, giving an increased capacity, as well as a significant growth in yield in both the Hurtigruten Expedition and Hurtigruten Norway segments. However, since operations almost fully stopped in the last weeks of March and this continued throughout the summer and into last half year.

Consolidated operating profit in 2020 ended up at negative EUR 94.8 million, compared to last year's operating profit of positive EUR 67.6 million. Hurtigruten Group's loss for the year before taxes were EUR 163.7 million, compared to a profit before income tax of EUR 49.3 million last year. The net loss for the year was EUR 160.5 million compared to EUR 17.8 million last year. Income tax was increased due mainly due to that 2019 had a tax cost due to changing tax regime. Further- more during 2020 the group expensed prior period interest rate deduction due to loss of probability to utilise. When the Covid-19 pandemic hit Europe in March 2020, Hurtigruten Group rapidly introduced several cost saving initiatives to reduce the loss from the pandemic,

including temporarily lay-offs, limited marketing spending and reduction of consultants. Other initiatives included warm stacking of a large part of the fleet and cancellations of all non-critical capital expenditure projects.

Operating revenues were down from EUR 608.8 million in 2019 to EUR 238.6 million in 2020, which equals a decrease of 61%. Hurtigruten Group has received contractual revenues of EUR 79.2 million (EUR 72.6 million last year) from the existing agreement with the Norwegian government through the Ministry of Transport and Communications. The agreement applies to the Bergen-Kirkenes route for the period 1 January 2012 through 31 December 2020. From 1 January 2021 Hurtigruten Group has entered into a new agreement that applies to 7 ships, a reduction from 11 ships in the current agreement.

The decrease in revenue is driven by the impact from the Covid-19 pandemic on operations, Hurtigruten Group revenue streams is mainly driven by international travel and with the introduction of travel restrictions reduced international travel volume to close to zero. As a result of the decline in the revenues, Hurtigruten Group applied for a cash compensation scheme from the Norwegian Government Business Compensation scheme, where EUR 30.2 million was recognized as other revenue in 2020. The scheme was set up to support enterprises with a significant drop in revenue caused by Covid-19. The scheme will run until at least June 2021 and may be prolonged if seen as necessary by the Norwegian government.

Direct cost of goods and services decreased by 73% in 2020 compared to 2019 (from EUR 158.6 million in 2019 to EUR 42.4 million in 2020), while other operating costs went down from EUR 187.1 million to EUR 136.8 million, both mainly driven by the halt in operations. Total payroll costs were EUR 92.7 million, which is a decrease of 31% compared to last year. The decrease was due to the furloughs caused by the Covid-19 pandemic.

The depreciations, amortization and impairment losses increased with 38% compared to last year, from EUR 55.6 million to EUR 77.0 million. The increase is due to the addition of MS Fridtjof Nansen to the fleet in addition to an impairment on intangible assets in the fourth quarter of 2020. In preparing for the ramp-up in operations in 2021, the Group recognizes that some of its IT software capitalizations will not be utilized in the new organization and future operations, and as such recognized an impairment of EUR 11.6 million in 2020. No further impairment losses were recognized for the trademarks, goodwill and the fleet, as the value in use is assessed higher than the carrying value for these assets.

All internal research is expensed as incurred. Development cost are only capitalized if the criteria are met. In 2020, all development costs have been expensed.

The parent company, Hurtigruten Group AS's net loss in 2020 was EUR 25.1 million (2019: EUR 13.6 million). The loss was mainly driven by interest expenses from the borrowings in both years.

Balance and financial position

Consolidated non-current assets totalled EUR 1,244.8 million at 31 December 2020 (2019: EUR 1,280.8 million), a decrease from 2019 primarily due to decreased loans to group companies of Silk Topco AS. This was slightly offset by the finalization of MS Fridtjof Nansen for cruise activity which increased the value of the Property, plant and equipment.

Total current assets in the Group were EUR 118.8 million (2019: EUR 112.9 million), the increase was due to the added cash and cash-equivalent by the increased loans for the Group. This was offset by the reduction in trade and other receivables which is mostly due to the reduced activity during and not least end of 2020.

Total non-current liabilities were EUR 1.256 million (2019: EUR 997.5 million). The increase is due to debt facility of EUR 105 million in the loan Term Loan C (TLC) and the full utilization of the Rolling Credit Facility of EUR 85 million, also some smaller increase of the issuance of bond for EUR 300 million from the subsidiary Explorer II AS which was used to repay the loan facility connected to the building of MS Roald Amundsen and MS Fridtjof Nansen.

Total current liabilities for the Group ended at EUR 208.3 million compared to EUR 333.5 million in 2019. The main reason for the reduction is the change in trade and other current liabilities that is interconnected with the

reduction in activity due to the halt of cruise operations in Hurtigruten Expedition segment and only 2 ships of 11 in operation in the Hurtigruten Norway segment.

Consolidated equity at 31 December was negative EUR 102.2 million (2019: positive EUR 62.7million). The equity ratio was -7.5% (2019: 4.5%). The year 2020 was severely impacted by the Covid-19 pandemic which led to global travel restrictions being introduced in March 2020. As the pandemic broke out, Hurtigruten Group initiated a company-wide cost and capex cutting program which included: i) postponing all non-critical capex projects ii) temporary lay-off of non-critical personnel iii) reduced spending on marketing cost, non-critical consultants and non-essential travel. This together with securing additional financing enabled Hurtigruten Group to have a financially sound position throughout 2020.

Taking into consideration i) the expected lifting of travel restrictions with the roll out of the vaccines in 2021 ii) the strong development in 2022 bookings which will drive growth in operations and revenues iii) the additional liquidity which has been raised through issuance of new debt iv) the liquidity effect of the sale of the real-estate portfolio in Hurtigruten Destinations in 2021, it is the Board's opinion that the financial position of the Group is sound. The Board is constantly monitoring the liquidity and financial position of Hurtigruten Group and will take appropriate action if additional capital is required.

Based on publicly available information on vaccine roll out programs in key markets, the Board of Directors are of the opinion that normal operations will most likely commence in 2H of 2021. This will be connected to the lifting of the travel restrictions imposed by the Norwegian Government. The majority of the Hurtigruten Norway and Hurtigruten Expeditions passengers who is affected by cancelled sailings are rebooking their voyages to 2021 and 2022 which supports the long-term operations of the company. Bookings for 2022 are, as of 5th of April, 30% higher compared with same time last year. This is very supportive for a rebound in 2022 as travel restrictions are lifted. If travel restrictions are lifted during the summer of 2021, we expect a surge in bookings for 2H 2021 as this will release pent up demand for adventure travel.

The Board of Directors is confident that Hurtigruten Group will have a sound fair-valued equity also in 2021. In the opinion of the Board of Directors, the underlying value of Hurtigruten Group's vessels and brand are significantly higher than the book value. The sale of the Hurtigruten Destinations real estate assets to approximately 2.5 times the book value of the assets also supports the underlying value of Hurtigruten Group's assets.

In the opinion of the Board of Directors, the consolidated financial statements provide a true and fair view of the Group's financial performance during 2020, and financial position at 31 December 2020. The Board confirms that the consolidated financial statements and the financial statements of the parent company have been prepared based on the going concern assumption, and this is supported by strong demand for future sailings and the expected development of the pandemic including vaccine roll out.

The equity ratio for the parent company was 5% at 31 December 2020, compared to 9% at 31 December 2019, mainly explained by the net loss of EUR 25.1 million in 2020. The net loss for the parent company Hurtigruten Group AS is proposed to be transferred to uncovered loss in the equity.

Cash flow

Cash and cash equivalents in the cash flow statement totalled EUR 17.3 million at 31 December 2020 (2019: EUR 35.7 million), not including restricted cash. Including restricted cash, the cash and cash equivalent was EUR 72.0 million compared to 47.0 in 2019.

The net cash flow from operating activities was highly affected by the Covid-19 pandemic and ended with a net cash outflow from operating activities of EUR 58.4 million, vs. a net inflow of EUR 141.4 million in 2019. The decrease for the year is primarily due to lower operating result following the Covid-19 pandemic and negative changes in working capital due to lower level of working capital including prepaid travels.

Net cash outflow used in investment activities was EUR 148.5 million (2019: EUR 396.6 million). The main driver for outflow in 2020 is connected to the last payments connected to the delivery of MS Fridtjof Nansen in 2019

and some capital expenditures on maintenance and refurbishments of the ships. Compared to 2019 the amount was lower, mainly due to no other newbuilding's during 2020.

Net cash inflow from financing activities was EUR 195.5 million (2019: EUR 252.0 million), consisting of the TLC financing with EUR 105 million, the EUR 300 million in issued bond, while the Group also had a repayment of loan connected to the bond issuance. Furthermore, at year-end 2020, the Group had fully drawn on available liquidity through the EUR 85 million Revolving Credit Facility. The reduction compared to 2019 was due to the repayment of borrowings connected to the building of MS Roald Amundsen and MS Fridtjof Nansen, but also increased repayments and interest paid during 2020.

The parent company reported a net cash outflow of EUR 2.5 million, of which an outflow of EUR 1.5 million from operating activities, outflow of EUR 122.3 million from investing activities and an inflow of EUR 121.3 million from financing activities. The outflow from the investing activities is explained by a negative outflow to loans to subsidiaries, and the inflow from the financing activities is mainly explained by an inflow from new financing.

Going concern

As of 31 December 2020, the carrying value of the equity in the Group was negative EUR 102.2 million (2019: positive EUR 62.7 million). The outbreak of Covid-19 and the subsequent suspension of operations have led to a significantly lower short-term profitability which has resulted in a negative net profit in 2020 of EUR 160.5 million. The Board of Directors expects that when travel restrictions are lifted there will be a significant increase in bookings driven by pent up demand which will support a quick rebound in 2H of 2021 and return to profitability.

Future bookings for 2022 are, as of 9th of April 32% higher compared with same time 2 years ago and bookings for the period September-December 2021 are only 20% lower compared to a normal year. This is very supportive for a rebound in 2H of 2021 and into 2022 as travel restrictions are lifted.

In the opinion of the Board of Directors, the underlying value of Hurtigruten Group's vessels and brand are significantly higher than the book value which is supported by the above mentioned future booking numbers and the recovering of the equity value and the enterprise value of stock exchange listed expedition cruise and contemporary cruise companies. As a result of this it is the Board of Directors opinion that the fair value of Hurtigruten Group is significantly higher than the current book equity.

In order to preserve its liquidity position in 2020, Hurtigruten Group initiated a company-wide cost and capex cutting program which includes: i) postponing all non-critical capex projects ii) temporary lay-off of up to 90% of the personnel iii) stopping all spending on marketing cost, non-critical consultants and non-essential travel. Furthermore, Hurtigruten Group has executed two capital market transactions raising a total of EUR 105 million in liquidity in Q2 2020 and EUR 46.5 million in Q1 2021.

As of 1st of March 2021, Hurtigruten Group had approximately EUR 80 million in available liquidity and this together with the sale of the real-estate portfolio in Hurtigruten Destinations, which will generate EUR 47 million in liquidity, with the expected closing in Q2 2021 gives Hurtigruten Group a satisfactory liquidity position based on the expected lifting of travel restrictions in June/July 2021. If the lifting of travel restrictions takes longer than anticipated and additional liquidity is required, the ultimate shareholders of Hurtigruten Group have confirmed that they remain supportive of Hurtigruten Group and have indicated that they would be willing to consider providing additional liquidity if necessary.

In the opinion of the Board of Directors, the consolidated financial statements provide a true and fair view of the Group's financial performance during 2020, and financial position at 31 December 2020. The Board confirms that the consolidated financial statements and the financial statements of the parent company have been prepared based on the going concern assumption, and that it is appropriate to make that assumption.

Financial Risk

The Group has exposure to the following risk from its use of financial instruments: market risk (including currency, bunker price, fair-value interest rate and variable interest rate risk), credit risk and liquidity risk. The Group's overarching risk management goal is to increase predictability for the Group's operations and to minimise the impact of fluctuations in macro conditions on the Group's results and financial position. The Group has defined overarching principles for risk management which encompass guidelines for specific areas such as currency, interest rate, bunker price, credit risk and the use of financial derivatives. The Board of Directors approves the Group's risk management strategy and reviews it annually. The CFO function is responsible, in consultation with the CEO, for conducting ongoing tactical risk management in line with the approved strategy, including exposure analyses and reporting.

The Hurtigruten Groups approach to managing liquidity is to secure that it will always have sufficient liquidity to meet its liabilities, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the group's reputation.

As of 1st of March 2021, Hurtigruten Group had approx. EUR 80m in available liquidity and this together with the sale of the real-estate portfolio in Hurtigruten Destinations, which will generate EUR 47m in liquidity, with the expected closing in Q2 2021 gives Hurtigruten Group a satisfactory liquidity position.

For a detailed assessment of financial risk, see "note 4 - Financial Risk Management".

Responsible operations

Hurtigruten Group is the leading exploration travel company, and the world's largest expedition cruise company. This comes with a responsibility. With a mission focused on innovation, technology and sustainability – we have embedded the UN Sustainable Development Goals into all aspects of Hurtigruten Group's operations.

Being a world leader in exploration travel comes with a responsibility. Sustainability lies at the core of every part of the Hurtigruten Group operation and experience. Hurtigruten Group's environmental policy sets a clear goal of minimising the impact on the natural environment. Like all other transport and tourist activities, several of Hurtigruten Group's operations have a direct influence on the natural environment through its vessels' fuel consumption. Hurtigruten Group is conscious of its responsibility for safe operation and environmental protection and works continuously to enhance its environmental performance through improvements to both technical and operational solutions.

The scope of Hurtigruten Group's business and its consumption of fossil fuels are affected by the substantial production requirements in the public procurement contract for transport services with the Ministry of Transport and Communications for the Bergen–Kirkenes coastal service. Up until YE 2020 Hurtigruten Norway had, under normal operations, daily departures year-round and 11 ships in constant operation generate substantial fuel consumption and the consequent discharge of greenhouse gases such as carbon dioxide (CO₂) and nitrogen oxides (NO_x). The choice of fuel is therefore a critical element in efforts to reduce the risk of emission. Hurtigruten Group has chosen to not use Heavy Fuel Oil (HFO) on any of its ships and is advocating a ban on HFO in the entire Arctic region and along the Norwegian coast. For the coastal route, Hurtigruten Group has opted to use marine gas oil (MGO) south of 62 degrees north because of entering the IMO Emission Control Area, and low-sulphur marine special distillates (MSD 500 ppm) north of 62 degrees north. These are among the most environment-friendly grades of fuel in the business and exceed the requirements set for voyages in the most vulnerable areas served by Hurtigruten Group business unites. The higher price of these environmental fuels is offset by their significant positive environmental properties compared to heavier grades of fuel.

Hurtigruten Group continuously pursues improvement processes to reduce its environmental impact and seeks to apply measures which yield genuine environmental gains. Throughout 2019 and start of 2020, Hurtigruten Group was working on new methods in its maritime activities to further reduce emissions of the greenhouse gases SO₂, CO₂ and NO_x. However due to Covid-19 lockdown and lay-up of ships it was necessary to postpone this for the remainder of 2020. However, most of the fleet that has shore-power availability has used this during

the lay-up after summer.

In 2019 Hurtigruten Group started the preparations for technical upgrades on up to six 90-class vessels to significantly reduce CO2 emissions and increase the use of environmentally friendly biofuel. A key feature has been ensuring that vessels are compatible with climate-neutral biofuel, paving the way for low emissions service. These are ground-breaking projects, demanding significant research and development prior to docking. The conversion will reduce the CO2 emissions from these vessels by above 25 per cent, while the NOx emissions will be reduced by approx. 90 per cent.

Shore power connection is an important environmental initiative, both for Hurtigruten Group and the ports of call. Hurtigruten Group is an active ambassador for shore-based power in Norwegian ports and has been a key voice in calling for a national shore-based power strategy, as part of our collaboration with the environmental organisation Bellona. We were proud to be able to start testing shore-based power in the port of Bergen. This was a major milestone in our long-term goal of increasing the use of renewable energy and making the transition to electric power from traditional fuels when docked at port. As of end of 2020 Hurtigruten Group business units have 9 ships with shore power; MS Kong Harald, MS Spitsbergen, MS Otto Sverdrup (MS Finnmarken), MS Nordlys, MS Nord Norge, MS Vesterålen, MS Midnatsol, MS Maud (MS Trollfjord), MS Roald Amundsen. The rest of the fleet will follow as soon as possible.

In connection to the life below water and Climate action, Hurtigruten Expeditions has developed the Hurtigruten Expeditions Science Program focusing on guest education giving meaningful insight into the areas we sail around the world. Our Science Program focuses on three different areas: investment on science centres for hands-on practical learning, guest investment in data collection for several citizen science projects and using the vessels as platforms of opportunity for partnership with science institutions to collect vital data in difficult to access areas. Furthermore, our collaboration with NIVA has continued from one automatic data sampler on board MS Trollfjord to a new version on board MS Roald Amundsen with microplastic collection capabilities, collecting valuable open source data continuously.

On the 31st of July 2020, there was an outbreak of Covid-19 on MS Roald Amundsen. 42 crew members and 29 passengers were infected. All infected passengers and guests have recovered from the outbreak. Outside the MS Roald Amundsen Covid-19 outbreak maritime operations continued to perform well across the Group and there were no material incidents in 2020.

Organisation

The global pandemic resulted in an extraordinary situation and year for Hurtigruten Group. The very sudden and significant reduction in Hurtigruten Group's operations and activity, had a major impact on our manning. The company saw no alternative other than to temporary furlough a significant number of employees for both our sea and land organization. Throughout the pandemic we have worked close with our employee representatives continually assessing the level of furloughs and whether it was possible to find alternatives.

When the pandemic hit in March, a dramatic 78% of our workforce was furloughed, the numbers have developed throughout the year reflecting both operation and the scale of activity. Coming to end December we see the activity has gradually picked up and the furloughs reduced to 21% of the workforce.

Including our furloughed staff, the company has a headcount of 2,154 as of 31 December 2020. Where 1,776 are permanent employees – including subsidiaries, of which 442 of our employees are located in our offices in Hamburg, London, Seattle, Tallinn, Paris, Hong Kong, Melbourne and Svalbard. Temporary employees accounts for a headcount of 378.

Hurtigruten Group is an expertise-based company and training plays a key role. Unfortunately, the pandemic also affected our apprentices position, but Hurtigruten Norway still had 72 apprentices on its ships at 31 December 2020, still making us one of the largest apprentice companies in the maritime sector of the Confederation of Norwegian Enterprise (NHO).

Hurtigruten Group takes its vital role in the education of Norwegian seafarers seriously. Hurtigruten strongly emphasizes professional expertise in the workforce, but also local knowledge in its recruitment processes. Our crew members are mainly recruited from along the Norwegian coast and the various ports at which the 11 ships call. Through this, Hurtigruten Norway and Hurtigruten Expeditions contribute to maintaining local and regional employment, combined with objectives such as ensuring knowledge, local expertise and flexible shift arrangements for its employees.

The Hurtigruten Expeditions vessels The MS Fram, MS Midnatsol, MS Spitsbergen and MS Roald Amundsen also offer trainee positions in the expedition teams to newly qualified nature guides from selected institutions. Our expedition teams are some of the most experienced in the industry. Their members have formal skills as scientists and are experts about the locations to be visited and the local wildlife. Hurtigruten Expeditions requires all expedition personnel for the Antarctic to take and pass the IAATO field staff online assessment once a year.

Working environment

Hurtigruten Group is an inclusive workplace company, where we actively aim to reduce total sick leave throughout the organization. However, this year has been an extraordinary challenging year, something we also see is reflected in our sick leave statistics, especially on sea where we also have had most furloughs. Average sickness absence in 2020 has increased to 8.3 % for seagoing personnel. The sick leave statistic for land has been fairly stable, where we have seen a slight decrease to 1.3%.

Hurtigruten Group will continue its efforts to keep sick leave as low as possible.

The Board of Directors consider the working environment in the Group to be good and will continue to maintain a sharp focus on working conditions and safety culture. The Group executes frequent employee surveys to monitor changes to employee satisfaction. In order to maintain a good working environment during the Covid-19 pandemic various measures have been introduced depending on physical presence or working from home. Meetings are conducted digitally, using equipment such as Teams, and new forms of collaboration across platforms have been introduced. The increased use of digital tools for information and document sharing has had a positive effect on the working environment in the company.

Equal opportunities and discrimination

Hurtigruten Group aspires to be an attractive employer for people from different backgrounds, regardless of ethnicity, gender, religion or age. Diversity is a desired and positive part of the corporate culture, which strengthens Hurtigruten Group's ability to operate under varying conditions and operating parameters. Any kind of discrimination is incompatible with Hurtigruten Group's code of ethics. Hurtigruten Group was in 2020 part of the Norwegian SHE index, which were launched in 2018 by the gender equality company called SHE Community. It measures how well Norwegian companies perform in gender balance and is carried out in cooperation with the advisory and auditing company EY. Hurtigruten Group ranked as number 48 out of 98 in the survey for 2020. The results showed that Hurtigruten Group has come relatively far regarding gender diversity, but still has work to do and aim to rank higher in 2021.

54 different nationalities are represented in Hurtigruten Group and female employees account for 41% of the workforce.

For our seagoing personnel, female employees account for 37% of Hurtigruten Group's permanent seagoing workforce and are mostly employed in the hotel department. Of the senior officers on board – master, first officer, hotel manager, chief engineer and first engineer – 91 % are male. Hurtigruten Group works continuously to create a better balance in seagoing management posts. As of 31st of December two of the four members of the corporate management team, reporting to the Group CEO, are female. After the reorganisation of the Group management team which was effective from 1st of March 2021, three of the five members of the corporate management team, reporting to the Group CEO, are female.

The goal of Hurtigruten Group is to attract female applicants for positions that have traditionally been held by men, and measures have been put in place to enable this goal to be achieved. There is an increasing share of women applying for historical male dominated positions and active steps are being taken to recruit women through internal promotions in maritime positions.

Corporate social responsibility (CSR)

For 127 years, Hurtigruten Group has explored some of the world's most pristine, vulnerable and awe-inspiring waters. Hurtigruten Group's guests have found themselves immersed in unique experiences with wildlife and nature and have been introduced to communities and cultures at the destinations Hurtigruten Norway and Hurtigruten Expeditions explores. For Hurtigruten Group, it is important that the guests of tomorrow can enjoy the same meaningful travel experiences as the guests of today. Therefore, Hurtigruten Group sees it as essential to both minimise the impact of expedition cruising on the environment and maximise the positive contribution to local communities.

Sustainable and responsible behaviour and operations are vital for Hurtigruten Group. Trust and good relations with partners and stakeholders are crucial for optimum operation and profitability. By virtue of Hurtigruten Group's position in Norwegian tourism, as well as its extensive business activities and social significance, Hurtigruten Group both encourages and requires the same level of commitment from its partners and stakeholders. Hurtigruten Group aims to raise and set standards for the whole industry to follow, as we enter a new era of expedition cruising and adventure travel driven by sustainability.

Our business and operations directly and indirectly touch on many of the 17 UN Sustainable Development Goals. Our sustainability ambitions are directly linked to goals 9, 11, 12, 13 and 14. This is where we believe we can have the most positive impact, for society as a whole and for our business, both now and in the future.

In addition, we have chosen four goals that represent our very foundation, our licence to operate. These are goals 4, 5, 8 and 16. They represent the values that sit at the core of our business and are embedded in our governance systems.

As a result of the strong focus on sustainability we have implemented several measures over the recent years:

- We have the first ever hybrid-powered expedition cruise ships.
- As the first major travel company in the world to do so - have removed single-use plastic from all our ships and hotels.
- We invite our guests to explore the planet on a safer, greener and more advanced expedition fleet.
- We aim to educate guests and create ambassadors for every destination on every voyage through actively engaging guests in the culture, ecosystems and the consequences of climate change - wherever we explore.

Hurtigruten Group is dedicated to enhancing local communities through cooperation and trade. Our guests are explorers and appreciate quality experiences, learning, and understanding as a viable path to all-year activity and sustainable growth. We know that protecting and adding long-term value to the waters we sail in, and to the destinations we visit, is not just the right thing to do—it is necessary.

By participating in excursions and sourcing ingredients from local suppliers, Hurtigruten Group contributes to the livelihoods and welfare of small coastal societies. Hurtigruten Group respects and supports indigenous communities, values culture and traditions, and maintains a very close cooperation with the communities that make an immense effort to welcome our guests—wherever we visit.

Hurtigruten's Expeditions activities in Greenland, Svalbard, Iceland, Arctic Canada and Antarctica are subject to guidelines from the International Association of Antarctica Tour Operators (IAATO) and the Association of Arctic Expedition Cruise Operators (AECO). Hurtigruten Expeditions plays an active role in both these organisations and shares best practice to champion a safe and environmentally conscious tourism industry in these unique and vulnerable areas. Particular working areas are Clean Seas (cleanseas.org) and Community Engagement on the communities terms AECO Community Engagement. Creating awareness on climate change issues and dealing with growth in a sustainable way within the industry is a high priority in both organisations.

From 2014 Hurtigruten Norway has sought out local suppliers to try to make as much of the food as locally produced as possible, and especially along the Norwegian coast, where ingredients and products, all menus are designed from the areas in which the ships sail. Fresh ingredients, such as fish, meat or vegetables are delivered, as far as possible, directly on board each ship when it docks in the nearest port. This reduces transport distance significantly by utilising the Hurtigruten Norway port structure actively and enhances the travel experience for our guests. The initiative has been extremely well received among our guests. Hurtigruten Group will deploy the same strategy with local suppliers as we expand our operations in the Hurtigruten Expedition segment.

Exploring some of the most spectacular destinations on our planet—and observing the unique wildlife—is an important part of every Hurtigruten Norway voyage and Hurtigruten Expeditions cruise. And with that, comes an obligation to explore respectfully. Any impact should be minor and transitory only. Hurtigruten Group and our guests will not leave visible or lasting signs from a visit. Observing wild animals is done at a distance so as not to alter natural behaviour, and with the utmost respect for their welfare and habitat.

Hurtigruten Group is taking the lead in the fight against the exploitation and degradation of sites, nature, and local communities by unsustainable over tourism. We are advocating strict rules and regulations, and we are imposing them on ourselves to prove it can be done.

Hurtigruten Group works continuously to increase the number of guests, both local travellers and tourists. Enhancing capacity utilisation for the ships is an important measure, not only for Hurtigruten Group's profitability but also for the environment.

As part of the effort to raise awareness the Hurtigruten Foundation was established to address the opportunities and challenges in the areas Hurtigruten explores, to financially support locally initiated projects and to encourage people to volunteer for worthwhile causes. Twice a year, the Board of the Hurtigruten Foundation grants funds to local and global projects involving initiatives in the areas in which Hurtigruten Norway and Hurtigruten Expeditions operates. The deadline for applying for funds is 1 November and 1 May each year.

Share capital and shareholders

The parent company Hurtigruten Group AS had one (1) shareholder at 31 December 2020 – Silk Midco AS, and a total paid in equity of NOK 1 826 778 000 spread over 30 shares with a nominal value of NOK 3 000 each and share premium of 1 826 688 000. With the change of functional currency at 1 January 2020, the share capital and premium were EUR 185.2 million and other equity was negative EUR 287.3 million as of 31 December 2020. The shares have equal rights.

Events after balance sheet date

On 1st of March, Hurtigruten Group AS secured a new €46.5 million term loan facility which can be used for its and its subsidiaries' general corporate and working capital requirements. The new facility is priced at E+800bps, matures in June 2023 and ranks pari passu with Hurtigruten Group's existing Senior Term and Revolving Facilities originally dated 9 February 2018 and Senior Term Facility dated 12 June 2020.

On 29th of March Hurtigruten Group announced the signing of an agreement with Store Norske to sell the real-estate portfolio on Svalbard. The real-estate portfolio is c. 40 000 square meters, including three hotels, office facilities, 40 apartments and two large retail premises. The total value of the transaction is NOK 690 million of which NOK 105 million is dependent on Hurtigruten Svalbard's sales performance. The transaction is expected to be closed during Q2 2021 and will have a net liquidity effect of approx. EUR 47 million at closing.

Outlook

Before the Covid-19 pandemic broke out in 2020 Hurtigruten Group experienced a strong growth in demand through 2018 and 2019 and into 2020 and as a result is the leading expedition cruise company in the world. There has been a strong demand for the increased capacity offered by Hurtigruten Expedition. The introduction of the MS Roald Amundsen and the MS Fridtjof Nansen has been a great success.

Over the last 3 years Hurtigruten Group has experienced an increased willingness to pay for Expedition cruises and Hurtigruten Expeditions and Hurtigruten Norway have been able to increase average prices on the capacity sold. We have seen this trend continue into 2022 despite the Covid-19 pandemic. Pre-bookings for 2022 have started out materially higher compared to the same time last year and compared with same time two years ago. This is driven by a strong underlying demand for unique travel experiences. Our core demographics in our main markets as the EU, UK US and APAC have fared well during the pandemic in terms of economic impact. Our core customer groups are ready to travel again with the lifting of travel restrictions as vaccines are rolled out.

As demand picks up, Hurtigruten Group will reap the benefits from the significant investments made in our commercial team, product-improvement initiatives, including refurbishments, and additional capacity in the Hurtigruten Expedition.

In 2020 Hurtigruten Group initiated activities to cut costs and reorganize the corporate governance in order to increase the efficiency in the Group and we are now seeing the benefits of this when we are ramping up operations into Q3 2021.

Hurtigruten Norway is currently running 5 ships in the segment and Hurtigruten Expedition has all 7 ships in warm lay-up. Hurtigruten Norway expects to be back in close to normal operations in Q3 with the current expected roll out of the vaccines and the expected lifting of travel restrictions. Hurtigruten Expeditions expects a gradual ramp up of operations in Q3 2021 with the expectations to be back in normal operations with 7 ships in Q4 2021.

Customer feedback during the pandemic have be very good over the last year and Hurtigruten Group continue to bring home key international travel awards strengthening Hurtigruten Group's brand position and awareness across all key travel markets. The improvement in Hurtigruten Group's brand position and awareness with increased ability to attract new customers has driven a significant increase in 2022 bookings in the UK and US market compared pre-pandemic levels. This supports a v-shaped recovery as the vaccines are rolled out and travel restrictions are lifted.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 GENERAL INFORMATION

The consolidated financial statements of Hurtigruten Group AS (the Group) consists of Hurtigruten Group AS and its subsidiaries. The group is owned by Silk Midco AS with the ultimate parent company being Silk Topco AS, headquartered at Langkaia 1 in Oslo. The main group activities are conducted in the subsidiaries Hurtigruten AS and Hurtigruten Cruise AS, which are private limited liability companies. The Group has offices in Oslo, Tromsø and Kirkenes, wholly owned foreign sales companies in Hamburg, London, Paris, Hong Kong, Melbourne and Seattle, a reservations centre in Tallinn as well as activities in Longyearbyen. The consolidated financial statements can be downloaded from Hurtigruten Groups' website www.hurtigruten.no.

Hurtigruten Group is the world's leading expedition cruise and adventure travel company, with a fleet of 16 expedition cruise vessels. Hurtigruten Group opens a unique gateway to experiences in the Arctic, Antarctica, Greenland and along the Norwegian coast to travellers from all over the world. The Group's operating segments are organised into the following three product areas: Norwegian Norway, Hurtigruten Expeditions and Hurtigruten Destinations.

Hurtigruten Norway (*renamed from Hurtigruten Norwegian Coast in the annual report for 2019*) was in 2020 the largest segment with 11 ships providing expedition cruises along the Norwegian coast between Bergen and Kirkenes making 33 northbound and 32 southbound port calls on an 11-day round trip. The segment's customers are predominantly international leisure travellers. From 2021 Hurtigruten Norway will operate 7 ships in this segment under a new 10-year contract with the Norwegian Ministry of transportation, compared to 11 ships in 2020. The vessel schedule and infrastructure are leveraged to provide a combination of local transport and freight services on top of the unique small-ship cruise offering. For this schedules service Hurtigruten Norway receives an annual fixed fee from the Norwegian government under the coastal service contract.

Hurtigruten Expeditions (*renamed Expedition Cruises in the annual report for 2019*) is the second largest segment, offering unique expedition cruises on board the small-size (250-500 beds) vessels MS Fritjof Nansen, MS Roald Amundsen, MS Fram, MS Spitsbergen and MS Midnatsol (the latter two vessels alternating between the Norwegian Coast and the Expedition cruises segments), as well as MS Nordstjernen which through a charter agreement operates shorter expedition cruises on the archipelago of Svalbard in the summer season. The Expedition cruises segment was strengthened in 2019 with the two new purpose-built 530 passenger polar cruise vessels MS Roald Amundsen and MS Fridtjof Nansen, the latter commercial sailing in June. From 2021 the Hurtigruten Expeditions segment will be Hurtigruten Groups' largest segment when three of the largest vessels from the Hurtigruten Norway segment will be transferred to the Hurtigruten Expeditions segment as mentioned above.

Hurtigruten Destinations (*renamed from Landbased in the annual report for 2019*) comprises year-round hotel and restaurant activities as well as arctic experience tourism in Svalbard and Kirkenes. Hurtigruten Svalbard operates three hotels, one equipment store and one sport-retail store. In addition, the segment also includes the 50% ownership in Hurtigruten Barents which owns real estate in Kirkenes.

Activities that do not naturally fall within these three segments are bundled in Group functions & other. These operating segments are reported in the same way as internal reporting to the Board of Directors and Group management.

The Group's presentation currency for 2020 is Euro.

The consolidated financial statements were approved by the company's Board of Directors on 15 April 2021.

Hurtigruten Group AS

³⁾ Hurtigruten Offshore Excursions AS changed its corporate name from Hurtigruten Ship Holding AS on 2 July 2020

⁴⁾ Gapahuken Drift AS were put under bankruptcy proceedings March 3, 2020

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of the financial statements are described below. Unless otherwise stated in the description, these policies have been consistently applied to all periods presented.

2.1 BASIC POLICIES

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and interpretations issued by the IFRS Interpretation Committee (IFRIC), as endorsed by the European Union. The consolidated financial statements have been prepared under the historical cost convention, modified to include

- revaluation to fair value of certain financial assets and financial derivatives
- revaluation to fair value of defined benefit plan assets
- present value calculation of defined benefit liabilities
- use of the equity method on investments in associated companies

The preparation of financial statements in accordance with IFRS requires the use of estimates. It also requires management to exercise its judgment in the process of applying the company's accounting policies. Areas that involve a high degree of such judgments, or are highly complex, and areas in which assumptions and estimates are of material importance for the consolidated financial statements are described in more detail in note 3.

The Group's consolidated financial statements have been prepared according to uniform accounting policies for similar transactions and events under similar conditions.

GOING CONCERN BASIS OF ACCOUNTING

The Group has recognised a net loss of EUR 160.5 million for the year ended 31 December 2020 and a pre-tax loss of EUR 163.7 million. From the latter part of March and through the rest of the year, the Group's performance was impacted by the global spread of Covid-19, as mobility restrictions and lockdown measures were implemented throughout the world. Thus, the Covid-19 pandemic have created a challenging business environment for the Group, and an unprecedented uncertainty of potential negative impact on the financial performance. In addition to the imposed restrictions affecting the operations, the extent, duration, and magnitude of the Covid-19 pandemic's effect on the economy and consumer demand for cruising and travel is still rapidly fluctuating and difficult to predict. Hurtigruten Group has temporarily suspended the operations of 11 of the 16 vessels, which is expected to continue to at least the end of May 2021 with the risk of a prolonged suspension.

As of 31 December 2020, the carrying value of the equity in the Group was negative EUR 102.2 million (2019: positive EUR 62.7 million). The outbreak of Covid-19 and the subsequent suspension of operations have led to a significantly lower short-term profitability which has resulted in a negative net profit in 2020 of EUR 160.5 million. The Board of Directors expects that when travel restrictions are lifted there will be a significant increase in bookings driven by pent up demand which will support a quick rebound in 2H of 2021 and return to profitability.

Future bookings for 2022 are, as of 9th of April 32% higher compared with same time 2 years ago and bookings for the period September-December 2021 are only 20% lower compared to a normal year. This is very supportive for a rebound in 2H of 2021 and into 2022 as travel restrictions are lifted.

In the opinion of the Board of Directors, the underlying value of Hurtigruten Group's vessels and brand are significantly higher than the book value which is supported by the above mentioned future booking numbers and

Hurtigruten Group AS

Consolidated Financial Statements 2020

the recovering of the equity value and the enterprise value of stock exchange listed expedition cruise and contemporary cruise companies. As a result of this it is the Board of Directors opinion that the fair value of Hurtigruten Group is significantly higher than the current book equity.

In order to preserve its liquidity position in 2020, Hurtigruten Group initiated a company-wide cost and capex cutting program which includes: i) postponing all non-critical capex projects ii) temporary lay-off of up to 90% of the personnel iii) stopping all spending on marketing cost, non-critical consultants and non-essential travel. Furthermore, Hurtigruten Group has executed two capital market transactions raising a total of EUR 105 million in liquidity in Q2 2020 and EUR 46.5 million in Q1 2021.

As of 1st of March 2021, Hurtigruten Group had approximately EUR 80 million in available liquidity and this together with the sale of the real-estate portfolio in Hurtigruten Destinations, which will generate EUR 47 million in liquidity, with the expected closing in Q2 2021 gives Hurtigruten Group a satisfactory liquidity position based on the expected lifting of travel restrictions in June/July 2021. If the lifting of travel restrictions takes longer than anticipated and additional liquidity is required, the ultimate shareholders of Hurtigruten Group have confirmed that they remain supportive of Hurtigruten Group and have indicated that they would be willing to consider providing additional liquidity if necessary.

In the opinion of the Board of Directors, the consolidated financial statements provide a true and fair view of the Group's financial performance during 2020, and financial position at 31 December 2020. The Board confirms that the consolidated financial statements and the financial statements of the parent company have been prepared based on the going concern assumption, and that it is appropriate to make that assumption.

2.2 CONSOLIDATION POLICIES

The consolidated financial statements include the financial statements of the parent company and its subsidiaries from 1 January 2020 to 31 December 2020, including comparable numbers for the previous year. a) Subsidiaries and consolidation

Subsidiaries constitute all companies (including structured companies) over which the Group exercises control. Control over an entity arises when the Group is exposed to variability in the return from the entity and can impact this return by virtue of its influence over the entity. Subsidiaries are consolidated from the time a controlling influence is established and until the controlling influence ceases to exist.

All intra-Group balances, transactions and unrealised gains and losses on transactions between Group companies are eliminated.

A) SUBSIDIARIES AND CONSOLIDATION

Subsidiaries constitute all companies (included structured companies) over which the Group exercises control. Control over an entity arises when the Group is exposed to variability in the return from the entity and has the ability to impact this return by virtue of its influence over the entity. Subsidiaries are consolidated from the time a controlling influence is established and until the controlling influence ceases to exist.

All intra-group balances, transactions and unrealised gains and losses on transactions between Group companies are eliminated.

B) ASSOCIATED COMPANIES

Associates comprise all entities over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting, after initially being recognised at cost.

Hurtigruten Group AS

Consolidated Financial Statements 2020

2.3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A) SEGMENT REPORTING

An operating segment is a component of the business:

- (i) that engages in business activities of which the company receives operating revenues and incurs costs;
- (ii) whose operating results are regularly reviewed by the company's ultimate decision-maker to determine which resources should be allocated to the separate segments.

The Group has three operating segments: Hurtigruten Norway, Hurtigruten Expeditions and Hurtigruten Destinations. Activities that do not naturally fall within these segments are bundled in Group functions & other.

B) TRANSLATION OF FOREIGN CURRENCIES

(I) FUNCTIONAL AND PRESENTATION CURRENCY

On 1 January 2020, Hurtigruten Group changed the presentation currency of the Group from Norwegian kroner (NOK) to euro (EUR), with retrospective application on comparative figures according to IAS 8 and IAS 21 to the extent practicable. The change was made to reflect that EURO is the predominant currency in the Group, accounting for a significant amount of the net cash flow. EURO is also the main financing currency for the Group. The change in presentation currency were applied retrospectively for comparable figures for 2019.

For the parent company and some other subsidiaries in the Group, EURO is the functional currency from 1 January 2020. The change was made to reflect that EURO is the predominant currency in some of the companies, counting for a significant part of the cash flow and financing. The change was implemented with prospective effect. Note that this change was only made for subsidiaries where EURO were the predominant currency. For the other subsidiaries in the Group, the functional currency is their local currencies.

Hence, for 2020 the consolidated financial statements are presented in EURO, which is both the parent company's functional currency and the Group's presentation currency.

(II) TRANSACTIONS AND BALANCE SHEET ITEMS

Foreign currency transactions are translated into the functional currency using the transaction rate. Realised and unrealised foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of exchange rates of monetary assets and liabilities denominated in foreign currencies at the balance sheet date are recognised in the income statement. If the currency position is designated as a cash flow hedge, gains and losses are recognised in other comprehensive income until the hedged transaction occurs. Foreign exchange gains and losses on loans, cash and cash equivalents are presented (net) in the income statement as finance income or expenses.

(III) GROUP COMPANIES

The income statement and balance sheets of Group entities whose functional currency differs from the presentation currency are translated in the following manner:

- The balance sheet is translated at the currency rate in force at the balance sheet date
- The income statement is translated at the transaction date currency rate. Monthly average rates are used as an approximation of the transaction rate.
- Translation differences are recognised in other comprehensive income.

C) REVENUE RECOGNITION

Revenue is recognised in the income statement as follows:

Hurtigruten Group AS

Consolidated Financial Statements 2020

(I) REVENUE FROM SALE OF SERVICES AND TRAVEL

Sales of services are recognised in the accounting period when the service is rendered and/or delivered to the customer. For ship voyages, revenue is recognised over the days the passenger is on board. For voyages currently in route on the reporting date, revenues are accrued based on the number of days the voyage lasts before the end of the accounting period. Revenue recognition is performed based on reports from the booking system, providing detailed information regarding the sailings. Tickets, meals and excursions are primarily pre-sold before the journey commences, but for travellers along the Norwegian coast, it is also possible to purchase tickets in the port right before the ship sails. Onboard sales of food, beverages, shop and excursions accounts for approximately nine percent of the total revenue. Travellers pay their journey up-front, and these payments are accounted for as deposits from customers (liabilities). See note 22 for a reconciliation of changes in this liability.

Revenue from freight of cargo along the Norwegian coast is recognised based on monthly invoicing of available cargo space, as the customer has rented all the cargo space and pays a daily hire regardless of whether the space is used or not.

(II) REVENUE FROM SALE OF GOODS

The Group's sales of goods primarily relate to sales of food, souvenirs and other kiosk products onboard the ships. Sales are recognised in income when the customer has received and paid for the goods. Payment for retail transactions is usually made in the form of cash or by credit card. The revenue is recognised in the income statement including the credit card fees incurred for the transaction. The fees are recorded as costs to sell.

(III) PUBLIC PROCUREMENT

Hurtigruten AS has a State Service Obligation with the Ministry of Transport and Communications to operate the Bergen–Kirkenes coastal route.

Revenues received from public procurement are recognised in the income statement on a continuous basis over the year based on existing contracts. These contracts are primarily based on a public tender, where the company has a fixed contract sum for planned (annual) production. There are specific conditions and calculation methods for the indexation of the contract sum. Any changes beyond the planned production are compensated/deducted utilising agreed-upon rates set out in the agreements and recognised in the periods in the periods in which they occur.

(IV) INCREMENTAL COSTS

Incremental costs of obtaining a contract are those costs incurred to obtain a contract with a customer that would not have been incurred if the contract had not been obtained, for example, a sales commission. The Group incur commissions to several sales commissioners, selling tickets to Hurtigruten Group cruises on our behalf. When the agencies are invoiced, the invoices are net of commissions, and both the revenue and the commission cost is recognised in the income statement at the time of the travel. In other, more rare instances, the Group will have to make a provision for prepaid or accrued commission if the payment is performed at another time than the travel. The expenses are presented as Direct cost of goods and services in the Statement of Income.

(V) CANCELLATIONS, GUARANTEES ETC

Hurtigruten AS has, as a provider of package travels, the same responsibilities as other actors in the business, following the EU Directive 2015/2302 on Package Travel, as set forth in our terms and conditions for travellers: "Subject to these booking conditions, if we or our suppliers perform or arrange your contracted holiday arrangements negligently, taking into consideration all relevant factors, we will pay you reasonable compensation".

Hurtigruten Group AS

Consolidated Financial Statements 2020

No provision for guarantees has been accounted for in the statement of financial position as at 31 December 2020 and 2019.

D) PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment consist primarily of ships (Hurtigruten Group ships), and buildings (offices, hotels and workshops). Property, plant and equipment are recognised at cost less depreciation and any impairments. Cost includes costs directly associated with the acquisition of the asset.

Periodic maintenance is recognised in the balance sheet and expensed over the period until the next periodic maintenance. Ongoing maintenance for all ship types is expensed continuously during the period in which the work is performed.

Other operating assets are depreciated on a straight-line basis, such that the cost is depreciated to residual value over the asset's expected useful life. Expected useful life is determined based on historical data, as well as the standard useful economic lifetimes in the industry. Residual value is calculated based on estimated sales values for operating assets at the end of their expected useful life. Expected useful life is:

Land	Indefinite
Buildings	25 – 40 years
Ships	20 – 40 years
Other	5 – 10 years

The useful life and residual value of operating assets are assessed on every balance sheet date and amended as necessary. When material components of operating assets have different useful lives, these operating assets are recognised as their various components. These components are depreciated separately over each component's useful life. At the end of each accounting period operating assets are assessed for indications of lasting impairment and, in the event of such impairment, the asset's recoverable amount is estimated. When the book value of an operating asset is higher than the estimated recoverable amount, it is written down to the recoverable amount.

One of the Group's subsidiaries, Hurtigruten Svalbard AS, receives a government grant for the buildings on Svalbard. This is booked as a cost reduction against depreciations and the net effect is presented as *Other* in accumulated depreciations in note 7.

Gains and losses on disposals are recognised in the income statement under "Other gains/(losses) – net", as the difference between the sales price and the book value.

The cost of ships under construction include progress payments for the construction of new ships, as well as design and engineering fees, capitalised interest, construction oversight costs and various owner supplied items.

E) INTANGIBLE ASSETS

(I) GOODWILL

Goodwill represents the excess of the cost of an acquisition over the fair value of the Group's share of the net identifiable assets in the acquired subsidiary at the date of acquisition. Goodwill arising on the acquisition of subsidiaries is classified as an intangible asset.

Goodwill is allocated to the cash-generating unit or groups of cash-generating units that are expected to benefit from the acquisition at the time of acquisition (section F).

Goodwill is not amortised but is tested annually for impairment.

Hurtigruten Group AS

Consolidated Financial Statements 2020

(II) TRADEMARK

Trademarks acquired in a business combination are recognised at fair value at the acquisition date. The trademark Hurtigruten Group has an indefinite useful life and is tested annually for impairment.

(III) OTHER INTANGIBLE ASSETS

Intangible assets consist mainly of development costs for computer systems recognised in the balance sheet at cost, if the criteria for recognition in the balance sheet are met. Expenses recognised in the balance sheet as custom developed computer systems largely comprise payroll costs and hired-in consultants in connection with the development.

The criteria for recognising custom developed intangible assets in the balance sheet are:

- It is technically feasible to complete the development of the software so that it will be available for use.
- Management intends to complete the development of the software and use it.
- The intangible asset will in fact be used after its completion.
- It is probable that the intangible asset will create future economic benefits.
- Adequate technical, financial and other resources are available for the Group to be able to complete the development and to use the completed intangible asset.
- Development costs for the asset can be reliably measured

Intangible assets are considered to have a limited life span and are amortised over their expected useful life. Other development expenditures that do not meet the criteria for recognition in the balance sheet are expensed as they are incurred.

F) IMPAIRMENT OF NON-FINANCIAL ASSETS

Intangible assets with indefinite useful life and goodwill are not amortised but are tested annually or more frequently if there are indications of impairment. Depreciated property, plant and equipment and amortised intangible assets are assessed for impairment when there is any indication that the book value may not be recoverable.

An impairment loss is recognised for the amount by which the asset's book value exceeds its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and its value in use. In assessing impairments, non-current assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). At each reporting date the possibility of reversing previous impairment of non-financial assets (except goodwill) is assessed.

G) FINANCIAL ASSETS

(I) CLASSIFICATION

The Group classifies financial assets in the following three categories, depending on the management's object of acquiring the asset, and the characteristics of the asset:

- 1) *Financial assets measured at amortised cost*
Primarily loans and receivables with fixed payments of principal and interest, where the financial instrument is not traded, but held to collect the contractual cashflow. Loans and receivables are carried in successive periods at amortised cost, using the effective interest method. Loans and receivables with maturities less than 12 months are classified as current assets. Instruments with more than 12 months maturity are classified as non-current assets.

Hurtigruten Group AS

Consolidated Financial Statements 2020

2) *Financial assets measured at fair value through other comprehensive income*

Investments in equity instruments, not held for trading, where the management has made an irrevocable election to present subsequent changes in the fair value in other comprehensive income, is classified into this group.

3) *Financial assets measured at fair value through profit or loss*

All other financial assets should be measured at fair value through profit or loss. For the Group, this primarily consist of derivatives that are not designated as hedges. Assets in this category are classified as current assets or liabilities.

(II) RECOGNITION AND MEASUREMENT

Regular purchases and sales of financial assets are recognised and derecognised using trade date accounting, which means using the date the Group commits itself to purchase or sell the asset. Unconditional receivables and payables are recognised as assets or liabilities when the entity becomes a party to the contract and has a legal right to receive or a legal obligation to pay cash. Assets to be acquired and liabilities to be incurred as a result of a firm commitment to purchase or sell goods or services are generally not recognised until at least one of the parties has performed under the agreement. Planned future transactions, no matter how likely, are not assets and liabilities because the entity has not become a party to a contract.

All financial assets that are not recognised at fair value through profit or loss are initially recognised at fair value plus transaction costs. Financial assets recognised at fair value through profit or loss are initially recognised at fair value and transaction costs are expensed in the income statement. Subsequent measurement depends on the classification as referred to under Section F, point I.

Financial assets are derecognised when the rights to receive cash flows from the investment expire or when these rights have been transferred and the Group has substantially transferred all risks and rewards of ownership.

Gains or losses from changes in fair value of assets classified as "financial assets at fair value through profit or loss", including interest income and dividends, are included in the income statement under other (loss) / gains – net in the period in which they arise. Dividends from financial assets at fair value through profit or loss are included in other (loss) / gains – net when the Group's right to receive payments is established.

H) OFFSETTING OF FINANCIAL ASSETS AND LIABILITIES

Financial assets and liabilities are only offset, and the net amount reported in the balance sheet, when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

I) IMPAIRMENT OF FINANCIAL ASSETS

At the end of each reporting period, for all financial assets measured at amortised cost except customer receivables, the Group assesses whether the credit risk on the financial instruments has increased significantly since initial recognition, using available reasonable and supportable forward-looking information. If and when contractual payments are more than 30 days past due, the credit risk is always considered to have increased significantly. For financial instruments where the credit risk is considered to have increased significantly, an amount equal to the lifetime expected credit losses is recognised for loss allowance. For financial instruments where the credit risk has not increased since initial recognition, an amount equal to 12-months expected credit losses is recognised for loss allowance. The change in recognised impairment losses since the last reporting period is recognised in profit or loss

Impairment testing of customer receivables is described in section K) below.

Hurtigruten Group AS

Consolidated Financial Statements 2020

J) DERIVATIVES AND HEDGING

The Group uses derivatives to hedge exposure against foreign currency risk and bunker oil prices. Some of these derivatives are designated as hedging instruments by management. Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at fair value on an ongoing basis. The changes are generally recognised in profit or loss. However, the method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged.

The Group classifies derivatives that are part of a hedging instrument as either:

- (i) hedges of the fair value of recognised assets or liabilities or a firm commitment (fair-value hedge) or
- (ii) hedges of variable cash flows with a particular risk associated with a recognised asset, liability or a highly probable forecast transaction (cash flow hedge).

At the inception of the transaction, the Group documents the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedging transactions. The Group also documents whether the derivatives that are used in hedging transactions are effective in offsetting changes in fair values or cash flows of hedged items. Such assessments are documented both at hedge inception and on an ongoing basis.

The fair value of derivatives used for hedging purposes are presented in note 10C. Changes in the equity item from hedging are presented in the statement of equity.

Cash flow hedging

The effective portion of changes in the fair value of derivatives that are designated and qualify as hedging instruments in cash flow hedges is recognised directly in other comprehensive income in cash flow hedge reserve. Losses and profits on the ineffective portion are recognised in the income statement.

Hedge gains or losses recognised in other comprehensive income and accumulated in equity are recycled over profit and loss in the period during which the hedged item affects the income statement (for example, when the highly forecasted probable sales transaction is taking place).

When the hedged forecast transaction subsequently results in the recognition of a non-financial item such as property, plant and equipment or inventory, the amount accumulated in the cash flow hedge reserve is included directly in the initial cost of the non-financial item when it is recognised, and not recycled from other comprehensive income to profit and loss.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognised when the forecast transaction is recognised in the income statement. When a hedged transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the income statement as a reclassification adjustment.

K) TRADE RECEIVABLES

Trade receivables are amounts due from customers for merchandise or services sold in the ordinary course of business. If settlement is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are classified as non-current assets.

Trade receivables are measured at the invoice amount, as long as there is no significant financing component. For trade receivables, an amount equal to the lifetime expected credit losses is recognised as a loss allowance.

Hurtigruten Group AS

Consolidated Financial Statements 2020

L) CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise cash in hand, bank deposits and other short-term liquid investments with original maturities of three months or less. Bank overdrafts are included within borrowings in current liabilities in the balance sheet. Cash and cash equivalents are defined differently in the balance sheet and cash flow presentation. Restricted cash is included in the balance sheet presentation but not in the cash flow presentation. The difference is reconciled below the cash flow statement.

M) TRADE PAYABLES

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade payables are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are classified as non-current liabilities.

Trade payables are valued at fair value on first-time recognition in the balance sheet. Subsequently, trade payables are measured at amortised cost using the effective interest method. The interest element is disregarded if it is immaterial.

N) BORROWINGS

Borrowings are recognised initially at fair value, net of transaction costs incurred. Subsequently, borrowings are recognised at amortised cost using the effective interest method. The difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings as part of the effective interest.

Borrowings are classified as current liabilities unless there is an unconditional right to defer payment of the liability for at least 12 months after the reporting date. Repayments due within one year are therefore classified as current liabilities.

O) BORROWING COSTS

Borrowing costs directly attributable to the acquisition of operating assets are recognised in the statement of financial position until the asset is ready for its intended use. Other borrowing costs are expensed on an ongoing basis. In the cash flow statement, interest paid is classified as part of the financing activities.

P) CURRENT AND DEFERRED INCOME TAXES

Income tax expense comprises income taxes payable and deferred income tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In such case, the tax is also recognised in other comprehensive income or directly in equity respectively.

Current tax is calculated in accordance with the tax laws and regulations enacted or substantively enacted at the balance sheet date in the countries in which the Group's subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax laws are subject to interpretation. Based on management's assessment, a provision is made for expected tax payments when necessary.

Deferred tax is calculated on all temporary differences between the tax values and financial values of assets and liabilities. Deferred income tax is determined using tax rates and tax laws which have been enacted or substantially enacted by the balance sheet date and which are expected to apply when the deferred income tax asset is realised, or the deferred income tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the tax-reducing temporary differences can be utilised. Deferred income tax is provided

Hurtigruten Group AS

Consolidated Financial Statements 2020

on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary differences is controlled by the Group, and it is probable that the temporary difference will not reverse in the foreseeable future.

Several of the Group's subsidiaries are vessel owning companies, which are subject to taxation under the Norwegian tonnage tax regime pursuant to chapter 8 of the Taxation Act. Under the tonnage tax regime, profit from qualifying operations are exempt from taxes, whilst financial results are not exempt from taxation. Under the tonnage tax regime, taxable profit is calculated on the basis of financial income after deduction of a portion of financial expenses. The portion deducted is calculated as financial assets in percent of total assets. The tax regime allows for financial losses to be carried forward against positive financial income in later years. Tonnage tax is payable based on the net tonnage of vessels and classified as an operating expense.

Taxation under the Tax tonnage regime requires compliance with strict requirements. Voluntary or compulsory exit from the regime will result in ordinary taxation of the operating results.

Deferred income tax assets and deferred income tax liabilities are recognised net to the extent that they relate to income taxes levied by the same taxation authority, and there is a desire and ability to realise the assets and settle the liabilities simultaneously.

Q) PENSION LIABILITIES, BONUS SCHEMES AND OTHER EMPLOYEE REMUNERATION SCHEMES

(I) PENSION LIABILITIES

The Group's companies operate various pension schemes. The schemes are generally funded through payments to life insurance companies. The Group operates both defined contribution and defined benefit plans.

The liability recognised in the balance sheet connected with the defined benefit schemes is the present value of the defined benefits at the balance sheet date less the fair value of the pension assets. The pension liability is calculated annually by an independent actuary using the projected unit credit method. The gross liability is discounted to present value applying the interest rate on high-quality corporate bonds issued in the currency in which the liability will be paid, and with approximately the same terms as the payment horizon of the liability.

The cost of pension entitlements for the period are recognised in payroll costs. This expense includes an increase in the pension liability due to earnings from previous years, changes, curtailments and settlements.

Past service costs arising from the amendments of plan benefits are immediately recognised in the income statement.

The net interest expense is calculated by applying the discount rate to the net pension liability and the fair value of the pension assets. This cost is also recognised in payroll costs in the income statement.

Remeasurement gains and losses arising from changes in actuarial assumptions are recognised in equity through other comprehensive income in the period in which they arise and will not be reclassified to profit or loss in subsequent periods.

For defined contribution plans, the group pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Group has no further payment obligations once the contributions have been paid. The contributions are recognised as payroll costs in the same period as the employees have rendered services entitling them to the contributions. Prepaid contributions are recognised as a financial asset to the extent that a cash refund or a reduction in the future payments are available.

(II) PROFIT-SHARING AND BONUS SCHEMES

Hurtigruten Group AS

Consolidated Financial Statements 2020

The group recognises a liability and an expense for bonuses and profit-sharing plans at the time the specific criteria for performing the payment are fulfilled. The accrual is including social security tax.

(III) SHARE-VALUE-BASED REMUNERATION

The group has share-based remuneration schemes in which the company receives services from employees as consideration for a share-based payment.

The fair value of the amount payable to employees in respect of the bonus shares, which is settled in cash or shares through a private placement of shares, is recognised as an expense with a corresponding increase in liabilities over the period during which the employees become unconditionally entitled to the shares. The liability is remeasured at each reporting date and at settlement date based on the fair value of the bonus shares. Any changes in the liability are recognised in profit or loss.

(IV) TERMINATION BENEFITS

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognises termination benefits when it is demonstrably committed to either terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal or providing termination benefits as a result of an offer made to encourage voluntary redundancy.

R) PROVISIONS

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events and it is probable that the Group will have to make a payment or forfeit an asset in order to settle the obligation and the amount can be reliably estimated. Restructuring provisions comprise lease termination penalties and employee termination benefits. Provisions are not recognised for future operating losses; however, provisions for unprofitable contracts are recognised.

S) LEASES

The Group has rental agreements related to properties and equipment, which represent future obligations for the Group. According to IFRS 16 all material lease obligations are to be recognised in the balance sheet as an interest-bearing debt. This also requires recognition of the corresponding asset as a right of use asset.

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assess whether:

- the contract involves the use of an identified asset
- the Group has the right to obtain substantially all of the economic benefits from the use of the asset throughout the period of use; and
- the Group has the right to direct the use of the asset. The group has the right to direct the use of the asset if either:
 - the Group has the right to operate the asset; or
 - the Group designed the asset in a way that predetermines how and for what purpose it will be used.

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments before commencement date, initial direct costs incurred and, if applicable, an estimate of costs to dismantle the underlying asset.

Hurtigruten Group AS

Consolidated Financial Statements 2020

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of the right-of-use assets are determined on the same basis as those property and equipment, and is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments, discounted using the interest rate implicit in the lease or, if the rate cannot be readily determined, the Group's incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprises:

- fixed payments
- variable lease payments that depend on an index or a rate
- amounts expected to be payable under a residual value guarantee
- the exercise price under a purchase option that the Group is reasonably certain to exercise.

The lease liability is measured at amortised cost using the effective interest method and is remeasured when there is a change in index or rate. When the lease liability is remeasured in this way, a corresponding adjustment is made to the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Group has elected not to recognise right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less, and leases of low-value assets. The Group recognises the lease payments associated with these leases as an expense.

The largest impact for the Group leases related to ships, rental of office space, apartments and office machinery.

In case of a sale and leaseback transaction, the Group must apply the requirements in IFRS 15 for determining when a performance obligation is satisfied to assess whether the transfer of an asset is accounted for as a sale of that asset. Hurtigruten Group leases two vessels that are recognised as property, plant and equipment with a corresponding loan classified as secured borrowings.

T) DIVIDENDS

Dividend distribution to owners of the parent is recognised as a liability in the Group's financial statements when the dividends are approved by the General Meeting.

U) GOVERNMENT GRANTS

Hurtigruten Group has in connection with the Government COVID-19 relief package, received grants to compensate for the reduction in revenues during 2020. The grant is recognized when there is reasonable assurance that 1) the entity will comply with the conditions, and 2) that the grant will be received. The grant is recognized as other revenue over the same periods in which the reduction in operating revenue is occurring.

The Group receives material grants in the form of grants for trainee schemes and net salary subsidies. These grants are recognised net (as a cost reduction) together with the other payroll costs.

2.4 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

In the current year, the Group has consistently applied the accounting policies presented in these consolidated financial statements. There have been no new standards, amendments to standards or approved IFRSs and IFRICs with future effective date that are expected to affect the Group accounts significantly.

Hurtigruten Group AS

Consolidated Financial Statements 2020

NOTE 3 CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

Estimates and judgments are reviewed on an ongoing basis and are based on experience, consultation with experts, trend analyses and several other factors, including forecast future events that are deemed probable under current circumstances.

3.1 KEY ACCOUNTING ESTIMATES AND ASSUMPTIONS

The Group makes estimates and assumptions about the future. Thus, by their very nature, the accounting estimates that are made because of the above processes will rarely fully correspond with the outcome.

Estimates and assumptions that have a significant risk of causing a material adjustment to the book values of assets and liabilities within the next financial year are outlined below.

(A) ESTIMATED IMPAIRMENT OF GOODWILL AND TRADEMARK

The Group performs annual tests to assess potential impairment of goodwill and trademark, cf. section 2.3-point E. The estimated recoverable amount is determined using the present value of budgeted cash flows for the cash-generating units. These calculations require the use of estimates (note 8) for the required rate of return for the period, cash flows and the growth factor of the cash flows.

The Group does not apply a general growth factor beyond expected inflation for cash flows when testing goodwill for impairment. The total required rate of return used to discount cash flows is calculated as a weighted average return on equity and the required rate of return on interest-bearing debt. This calculation utilises an estimate of the risk-free interest rate, risk premium, beta and the liquidity premium.

(B) SHIPS

Useful economic lifetime

The level of depreciation depends on the estimated economic lifetime of the ships. These estimates are based on history and experience relating to the Group's vessels. The estimates are reviewed at regular intervals. A change in the estimate will affect depreciation in future periods.

Estimated impairment of ships

Where there are indications of such, the Group tests whether ships have suffered any impairment, see section 2.3-point d. The book value of the ships is included in the annual impairment test of goodwill and trademark.

(C) DEFERRED INCOME TAX ASSETS

The recognition of deferred income tax assets is based mainly on the utilisation of tax loss carry forwards against future taxable income in the Group. The assessment is made based on management's estimates of future profits in the Group and includes an assessment of the Group's future strategy, economic developments in the markets in which the Group operates, future tax regimes and the Group's ability to deliver forecast synergies. In preparing the financial statements, management has found the future taxable income to be sufficient to utilise the recognised deferred income tax assets. Please refer to note 16 for more information on deferred income tax assets recognised in the balance sheet.

(D) FAIR VALUE OF DERIVATIVES AND OTHER FINANCIAL INSTRUMENTS

The fair value of financial instruments not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques and information from the contract counterparty. The Group uses its

Hurtigruten Group AS

Consolidated Financial Statements 2020

judgment to select a variety of methods and to make assumptions based mainly on market conditions existing at each balance sheet date. Please refer to note 10 for further information.

(E) PENSION ASSUMPTIONS

The Group has both defined contribution and defined benefit pension schemes. Measurement of pension costs and pension obligations for defined benefit plans involves the application of a number of assumptions and estimates, including the discount rate, future salary levels, expected employee turnover rate, the return on plan assets, annual pension increases, expected adjustments to G (the National Insurance Scheme basic amount) and demographic factors.

The Group has pension obligations in Norway and Germany. The discount rate used to calculate pension obligations in Norway is based on 15-year corporate covered bonds, with an additional provision to adjust for applicable risk and maturity relevant for the pension obligations. Covered bonds are primarily issued by credit institutions to listed Norwegian commercial and savings banks and are secured against loans directly owned by the credit institution. The Group has applied economic assumptions in line with the recommendation of the Norwegian Accounting Standards Board. For obligations in Germany, the discount rate is determined based on the interest rates on high quality corporate bonds denominated in the currency in which the benefits will be paid, with terms to maturity approximating to the term of the related pension obligation.

Changes in pension assumptions will affect the pension obligations and pension cost for the period. Pension obligations are significantly affected by changes in the discount rate, life expectancy and expected salary and pension adjustments. Please refer to note 17 for more information about pensions.

(F) INCOME TAX

Income tax is calculated based on results in the individual Group companies. The Group is subject to income taxes in several jurisdictions. Calculation of the period's tax expense and distribution of tax payable and deferred income tax for the period requires a discretionary assessment of complex tax regulations in several countries. Consequently, uncertainty attaches to the final tax liability for many transactions and calculations. Where there is a discrepancy between the final tax outcome and the amounts that were initially recognised, this discrepancy will affect the recognised tax expense and provision for deferred income tax assets and liabilities in the period in which such determination is made. Please refer to note 16 for more information about income tax.

(G) LEASES

The Group need to assess extension options and termination rights when determining the lease term. The assessment is based on whether extension options and termination rights are reasonably certain for which the Group will include these in the accounting for leases. Guidelines for this assessment has been set at Group level to ensure that that the treatment of assumptions are treated in a consistent matter. The discount rate used for calculating the present value of the future lease obligation is also based on judgement. A fixed methodology has been defined in determining this estimate.

NOTE 4 FINANCIAL RISK MANAGEMENT

4.1 FINANCIAL RISK FACTORS

The Group has exposure to the following risk from its use of financial instruments: market risk (including currency, bunker price, fair-value interest rate and variable interest rate risk), credit risk and liquidity risk. The Group's overarching risk management goal is to increase predictability for the Group's operations and to minimise the impact of fluctuations in macro conditions on the Group's results and financial position.

Hurtigruten Group AS

Consolidated Financial Statements 2020

The Group has defined overarching principles for risk management which encompass guidelines for specific areas such as currency, interest rate, bunker price, credit risk and the use of financial derivatives. The Board of Directors approves the Group's risk management strategy and reviews it annually. The CFO function is responsible, in consultation with the CEO, for conducting ongoing tactical risk management in line with the approved strategy, including exposure analyses and reporting.

(A) MARKET RISK

(I) FOREIGN EXCHANGE RISK

The Group changed the presentation currency as of 01.01.2020 from NOK to EUR, to reflect the underlying transactions and foreign exchange exposure for the Group. As the Group operates internationally, it is exposed to currency risk in multiple currencies, in particular USD, GBP and NOK. The subsidiaries in the Group has EUR as its presentation and functional currency in the main Group companies, however some subsidiaries have NOK, USD, GBP as presentation/functional currency for its reporting and consolidation for the Group. Currency risk arises from future ticket sales as well as recognised assets or liabilities. In addition, the bunker oil cost is quoted in USD. Currency risk arises when future commercial transactions or recognised assets or liabilities are denominated in a currency which is not the entity's functional currency.

The price of oil, and thus bunker fuel, is internationally traded in USD, while the Group purchases bunker fuel in NOK and USD. The risk can therefore be split into a currency element and a product element. The currency element is partially aligned with the Group's cash flow exposure in USD, and the product risk is hedged separately.

The Group has some investments in foreign subsidiaries whose net assets are exposed to currency translation risk.

The table below shows the Group's sensitivity to potential changes in the exchange rate for EUR against relevant currencies in relation to the exchange rate as of 31 December 2020, with all other variables held constant. The potential sensitivity effect below will impact the finance income/expense, but not operating profit/loss in the consolidated statement of profit and loss. Changes mainly relate to foreign exchange gains/losses on translation of financial derivatives, borrowings, trade and other receivables, trade and other payables and cash and cash equivalents and other investments.

<i>(in EUR million)</i>	Impact on net	Impact on
	profit/loss after tax	equity
	2020	2020
Change NOK/EUR 5%	0.6	0.6
Change USD/EUR 5%	0.1	0.1
Change GBP/EUR 5%	0.7	0.7

The calculations assume that the EUR depreciates by 5% against the relevant currencies. With an equivalent appreciation of the EUR, the amounts would have an equal and opposite value.

(II) PRICE RISK

The Group is exposed to fluctuations in the price of bunker fuel, which is used to operate the ships. In order to reduce the risk related to the fuel price the Group has implemented a fuel hedging policy that follows the booking curve: the key principle in the bunker hedging policy is based on the company's ability to obtain visibility on earnings, hence the company has established a hedging policy linked to the development in the booking curve (actual vs. budgeted Passenger Cruise Nights (PCN) booked). For example, if at any given time 75% of the volume

Hurtigruten Group AS

Consolidated Financial Statements 2020

for one season is sold, a minimum of 50% of the bunker cost associated with the PCN volume sold are hedged. Additionally, the policy allows for some flexibility if market conditions are viewed as attractive.

The table below shows the Group's sensitivity to potential price increases of bunker fuel, with all other variables held constant.

<i>(in EUR million)</i>	Impact on net profit/loss after tax 2020	Impact on equity 2020
Change bunker price -20% on contracts from 2020, expiring in the period 2020-2022	(2.0)	-
Total impact	(2.0)	-

These calculations are based on the average hedged bunker oil volume and indicate how a decrease of 20 % in bunker oil prices would impact the financial instruments valuation, which is hedging our exposure to bunker oil prices, and ultimately on the 2021 financial statements.

The purchase of physical bunker oil would be affected in the opposite way and accounted for as a variation on operating expense.

(III) CASH FLOW AND FAIR-VALUE INTEREST RATE RISK

The Group's interest rate risk is associated with current and non-current borrowings. Loans subject to a variable interest rate present a risk to the Group's overall cash flow. Fixed interest rates expose the Group to fair-value interest rate risk. Most of the Group's interest-bearing debt has variable interest rate. The Group has no specific hedging strategy to reduce variable interest rate risk. The following impact shows an increase of interest rate of 50bp and the effect for the full year

<i>(in EUR million)</i>	Impact on net profit/loss after tax 2020	Impact on equity 2020
Change in interest rate level with +50 basis points	4.2	4.2

(B) CREDIT RISK

The Group has no significant concentration of credit risk. Sales to end users are settled in cash or with recognised credit cards. Sales to external agents are made either through prepayment/credit cards or through invoicing. The Group has routines to ensure that credit is only extended to agents with a satisfactory credit rating. Individual risk exposure limits are set based on internal and external assessments of credit ratings.

The counterparties to the derivative contracts and cash transactions are limited to financial institutions with high credit ratings. The Group has routines that limit exposure to credit risk relating to individual financial institutions. During 2020 the company had no material losses due to default

(C) LIQUIDITY RISK

Liquidity risk management includes maintaining a sufficient level of liquid assets geared to operational and investment plans and ensuring the availability of sufficient funding from committed credit facilities. The Group has a group cash-pool that ensures that part of the Group's unrestricted liquidity is available to the parent company, and which also optimises availability and flexibility in liquidity management. The Group's finance function has overall responsibility for managing the Group's liquidity risk. Rolling liquidity forecasts are prepared

Hurtigruten Group AS

Consolidated Financial Statements 2020

to ensure that the Group has sufficient liquidity reserves to satisfy the Group's obligations and financial loan covenants.

During Q1 2020 the Group further increased the liquidity with two new facilities. One was connected to the repayment of the loan facility for the purchase of MS Roald Amundsen and MS Fridtjof Nansen of EUR 255 million with issuance of a Bond loan of EUR 300 million, and the second was a sale leaseback of MS Nordlys and MS Richard With of total EUR 60 million in total, divided equally on both ship-owning companies.

As the covid-19 impacted the world and not least the cruise industry, the group managed to secure a further EUR 105 million term loan facility during Q2 2020 to secure more long-term liquidity. As time progressed and the uncertainty of when normal operations would commence, the group secured also a EUR 60 million letter of credit to be able to free the similar amount of restricted cash, and during Q1 2021 managed to secure a EUR 46.5 million term loan facility to even more strengthen the future available liquidity.

The table below provides an indicative debt repayment schedule over the coming 5-year period.

	2021	2022-2023	2024-2025	2026-->
<i>(in EUR 1,000)</i>	Less than one year	Year two and three	Year four and five	More than five years
31. December 2020				
Borrowings	20 082	232 282	728 676	300 642
Estimated interest expenses on Bank loans	26 353	96 189	45 951	9 457
Total impact on liquidity	46 435	328 471	774 627	310 099

4.2 HEDGE ACCOUNTING

In 2018, Group decided to designate a hedging relationship between bunker oil hedging instruments and the forecasted bunker oil purchases. The Group entered into 6 commodity forward swaps with Goldman Sachs and DnB Markets. These contracts have different strike prices (from 556 to 747 \$/MT) and different expiry dates during the years 2019-2022. The contracts hedge forecasted future bunker oil purchase transactions. At the time the contracts were initiated, approximately 100 % of the forecasted oil consumption in 2019 and 50 % of the forecasted consumption in 2020 and 2021 are covered by the contracts. At year-end 2020, a total of 29,000 MT bunker fuel volume is hedged at an average price, of USD 645/MT during 2020-2021.

The forward swaps have monthly settlements, and the Group will be compensated if the market price of bunker oil is above the strike, and similarly must make a payment to the counterparty if the market price is below strike. Hedge effectiveness is the extent to which changes in the cash flows of the hedging instrument offset changes in the cash flows of the hedged item. As there is a one-to-one relationship between the risk of price-fluctuations in bunker oil (hedged item) and the effect from the forward swaps, the forward swaps are effectively locking the purchase price of the bunker oil purchased, provided that the quantity purchased is equal to or larger than the quantity covered by the swap.

Hedge ineffectiveness is the extent to which the changes in the fair value or the cash flows of the hedging instrument are greater or less than those on the hedged item. If the purchased and consumed bunker oil quantities are greater than those included in the forward swaps, the hedge is effective. If the quantities included in the hedge is higher than the purchased and consumed bunker oil, then the excess quantities represent an ineffective hedge, with gains/losses recorded in profit/loss. If an entity expects that all or a portion of a loss recognized in other comprehensive income will not be recovered in one or more future periods, it shall reclassify into profit or loss the amount that is not expected to be recovered. Given the current situation with the Covid19 pandemic affecting the certainty and timing of future profits, the Group does not expect the cumulative loss on bunker derivatives at balance sheet date to be recovered within the future hedging period. Therefore, the Group reclassified EUR 8.7 million from other comprehensive income to profit and loss at 30 September 2020. Realised

Hurtigruten Group AS

Consolidated Financial Statements 2020

gains and losses are recognised in Other gains/(losses). In 2019 a loss of EUR 5.4 million was recognised, while in 2020 a loss of EUR 15 million was recognised in the income statement, including the transfer from other comprehensive income of EUR 8.7 million due to the discontinuing of hedge accounting.

The movement in the cash-flow hedge reserve recognised in other comprehensive income is as follows:

<i>(in EUR 1,000)</i>	2020	2019
Opening balance	(2,483)	(12,756)
Reclassified into profit / loss	(8,471)	1,789
Change in fair value of hedging instruments	10,954	8,608
Currency translation differences	-	(124)
Closing balance	(0)	(2,483)

The carrying value of the derivatives is as follows:

<i>(in EUR 1,000)</i>	2020	2019
Current assets	-	827
Non-current liabilities	-	(768)
Current liabilities	4,564	(2,543)
Net value	4,564	(2,483)

4.3 THE GROUP'S CAPITAL MANAGEMENT

The Group's objective for management of capital is to ensure the ability to continue as a going concern in order to grow the business and to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital, including compliance with covenants in the loan agreements. Due to Covid-19 impact on the cruise industry as a whole and not least the Group, the capital management and liquidity management has been in very large focus. The Group has in 2020 initiated several initiatives and during the year secured several loan facilities to make sure that the Group is well funded and has enough liquidity to continue as a going concern. See 4.1(c) in this note and note 15 Borrowings for details around amounts, terms and conditions.

NOTE 5 CONTINGENCIES AND GUARANTEES

As of 31 December 2020, the Group had contingent liabilities relating to bank guarantees and other guarantees, in addition to other matters in the course of ordinary operations. No significant liabilities are expected to arise with respect to contingencies with the exception of the provisions that have already been provided for in the financial statements (Note 19).

STATE-CONTRACT GUARANTEE

Hurtigruten Group has issued a guarantee to the Ministry of Transportation in the amount of NOK 155 Million in connection with the coastal agreement for purchase of capacity on the coastal voyages in Norway (Kystruten).

TAX BOND

Hurtigruten Group has issued a tax bond for EUR 7,9 million to ensure that the tax authorities have security on claim of payroll tax.

Hurtigruten Group AS

Consolidated Financial Statements 2020

TRAVEL BONDS

Hurtigruten Group has issued travel bonds in connection to travel guarantee schemes in United Kingdom of England, Germany and Norway for approx. EUR 81.7 million. This is to reduce the requirements for restricted cash on group level.

MEMBERSHIP OF THE NOX FUND

Hurtigruten AS is a member of the Confederation of Norwegian Enterprise's (NHO) NOx Fund. The main objective of the Environmental Agreement concerning reductions of NOx and the NHO's NOx Fund is to reduce emissions of nitrogen oxide. The Fund is a joint venture to which affiliated businesses can apply for support for emission-reducing measures. Payment to the Fund replaces the nitrogen oxide tax for affiliated businesses.

The Environmental Agreement for 2011–2017 was signed on 14 December 2010 by 15 industry organisations and the Ministry of the Environment and was approved by EFTA's Monitoring Body (ESA) on 19 May 2011. The Fund has reported that the targets for 2011-2016 were met. On 24 May 2017, an extension to the NOx Agreement for the period 2018-2025 was signed between the business organisations and the Norwegian Authorities. The extension was approved by ESA on 22nd February 2018.

The Norwegian Environment Agency monitors whether individual reduction targets have been achieved. Deviations of more than 3 % of emission targets trigger a collective fine, under which businesses must pay the nitrogen oxide tax for the pro rata share of the target that has not been met. However, businesses will never pay more than the official government rate for nitrogen oxide tax.

EUR 2.0 million in nitrogen dioxide tax was recognised in Hurtigruten Group's consolidated financial statements for 2020 compared to EUR 3.4 million in 2019.

OTHER CONSTRUCTION CONTRACTS

As of the balance date 2020 the Group does not have any material construction contracts that have been signed and agreed. There are one construction contract pending legal matters; however, it is the managements opinion that the outcome will be in the Groups favour, with no material effects on the financial statements of the Group.

OTHER LEGAL ITEMS

The Norwegian authorities' investigation into the Covid-19 outbreak on MS Roald Amundsen is still pending. It is management's assessment that any conclusion on the investigation will not have any material financial effect for the Group.

In December 2020, Hurtigruten Group was exposed to a data security incident. A limited amount of personal data connected to some guests and employees was compromised. The Group has continually informed the Norwegian Data Protection Authority (Norwegian; Datatilsynet) of the progress of the investigation and the data that was compromised. Affected guests and employees have also been notified. No legal proceeding has been initiated against Hurtigruten Group.

NOTE 6 SEGMENT INFORMATION

(A) PRIMARY REPORTING FORMAT – OPERATING SEGMENTS (PRODUCT AREAS)

The operating segments are identified based on the same reporting that Group management and the board apply to their evaluations of performance and profitability at a strategic level. The company's ultimate decision-maker, which are responsible for allocation of resources to and assessment of earnings generated by the operating

Hurtigruten Group AS

Consolidated Financial Statements 2020

segments, is defined as the Board and Group management. The classification is broken down into the product areas Hurtigruten Norway and Hurtigruten Expedition. Activities that do not naturally fall within these three segments as well as group functions are bundled in Group functions, Other and Eliminations.

<i>(in EUR 1,000)</i>	Hurtigruten Norway		Hurtigruten Expedition		Hurtigruten Destinations

Hurtigruten Group AS

Consolidated Financial Statements 2020

¹⁾Other revenues in 2020 consists of the grant from the Norwegian Government Business Compensation Scheme, which were granted to enterprises with a significant drop in revenues due to Covid-19.

The reporting of segment assets and liabilities is not part of the internal management reporting in the Group. Material assets and liabilities are monitored at Group level, and individual key figures (e.g. trade receivables) are valued in the individual legal companies. Segment assets and liabilities are therefore not presented.

Numbers from 2019 has been converted to EUR due to the change of functional currency as of 01.01.2020.

HURTIGRUTEN NORWAY

Hurtigruten Norway operates under the brand Hurtigruten Norwegian Coastal Express and offers scheduled voyages along the Norwegian coast with unique and immersive travel experience to its guests. The Hurtigruten Norwegian Coastal Express connects the international traveler with the everyday life and infrastructure along the beautiful and rugged Norwegian coast.

The voyage is described by the New York Times as “one of Norway’s treasured national symbols”. Having been developed over its 128-year history, it forms part of the country’s cultural heritage, strengthening Hurtigruten Norway’s legitimacy with international travelers seeking authentic Norwegian experiences.

Hurtigruten Norway has integrated the Norwegian food culture in the voyage through the culinary concept on board which is called Norway’s Coastal Kitchen. The concept of locally sourced products – often loaded on board only hours before being served in the restaurants – has been a major success.

Offering a wide range of memorable, and even life changing experiences, along the Norwegian coast, is supported by collaboration with approx. 50 different excursion providers, offering unique seasonally adapted activities and experiences, tailored for our Hurtigruten Norway guests. Excursions and experiences have been a prioritized area for Hurtigruten Norway over many years and will continue as an important part of its differentiation strategy.

With Hurtigruten Norway being one of Norway’s foremost tourist products, it is a driving force for developing Norwegian tourism and marketing the country internationally. At the same time, the Group has been collaborating with airlines and other industry players to improve flight connections for key departure ports in order to exploit the growth in the short-break market and to make Hurtigruten Norway’s products more accessible.

Hurtigruten Norway aims to further develop and strengthen the Hurtigruten Norwegian Coastal Express as an iconic adventure travel product. It still has substantial development potential, which will be realized through a continued commitment to:

- Building Hurtigruten Norwegian Coastal Express as an iconic global brand within immersive exploration travel, which offers unique, authentic experiences
- Connecting local communities
- Expanding and continuously improving the portfolio of excursions and ancillary products
- Strong differentiation – Hurtigruten Norway offers the original voyage along the Norwegian coast dating back to 1893
- Being a frontrunner on sustainability
- Structured market development. Based on enhanced customer insights, targeting new segments, improving the brand’s market position in key international travel markets like the UK, Germany, US, Australia and EMEA, improving e-commerce and distribution channels, and more
- Continuously improving our onboard experience

During the pandemic Hurtigruten Norway has operated between 2 and 7 ships on the scheduled voyages between Bergen and Kirkenes, primarily serving the local communities along the rugged Norwegian Coast with freight and transport services, which again demonstrates the close connection the service has with the everyday

Hurtigruten Group AS

Consolidated Financial Statements 2020

life. As of 1st of January 2021 Hurtigruten was operating 5 of 7 ships. Hurtigruten Norway expects to be back in full operations by 1st of July 2021.

HURTIGRUTEN EXPEDITION

Hurtigruten Expeditions operates expedition cruises across the globe to over 200 destinations in over 40 countries, including Norway, Antarctica, the Arctic, Alaska, Iceland, Greenland, South America and a variety of other destinations. In 2020 we had 5 ships operating in the Expedition segment MS Fram, MS Midnatsol (January–April), MS Spitsbergen (May–December), MS Roald Amundsen, MS Fridtjof Nansen (March–December). The Covid-19 pandemic reduced the number of ships in operation as the fleet was mainly in warm lay-up from April 2020. In 2021 the 3 largest ships in the Hurtigruten Norway fleet joined the Hurtigruten Expeditions fleet, increasing the capacity significantly. A total of 7 ships will be deployed in Hurtigruten Expeditions.

In 2019, the two new hybrid-powered expedition ships, MS Roald Amundsen and MS Fridtjof Nansen were delivered. The ships are state-of-the-art expedition vessels designed to meet guests' expectations as well as strict environmental and safety standards. MS Roald Amundsen and MS Fridtjof Nansen have an ice-reinforced hull, a total length of 140m and have the ability to carry 530 guests. The hybrid technology engines will reduce fuel consumption substantially and permit periods of emission-free sailing.

MS Roald Amundsen and MS Fridtjof Nansen are a key part of Hurtigruten Expeditions' strategy of further expansion in the expedition cruise segment. The new ships will operate in new Hurtigruten Expeditions destinations, such as the Northwest Passage, Alaska, South America, and the Caribbean, in addition to the current Antarctica and Arctic destinations.

Over the last 4 years Hurtigruten Expeditions has increased capacity from 1 ship in 2015 to now 7 ships in 2021, with the addition of MS Otto Sverdrup, MS Trollfjord and MS Maud (formerly part of the Hurtigruten Norway fleet as MS Finnmarken, MS Trollfjord and MS Midnatsol). This will further cement our global leadership in the Expedition Cruising category.

Hurtigruten Expeditions will continue to further develop the expedition cruises product, characterized by the following focus areas:

- Continued development of Hurtigruten Expeditions as the global leading brand for expedition cruising
- Continued development of the existing product offering, the development of new experiences on board and ashore, and continuous assessment of new destinations
- Constant evaluation of capacity requirements, pricing and competitive developments in the segment.
- Knowledge building and increased commitment along the whole value chain through the development of logistics, destinations and excursions.
- A focused marketing commitment, strategic brand building and a strengthening of the sales organisation.
- A systematic effort to get coverage in global top-tier media

A further growth in capacity in Hurtigruten Expedition will be one of the main sources of growth for Hurtigruten Group business over the next 3 to 5 year period.

HURTIGRUTEN DESTINATIONS

Hurtigruten Destination's main operations is through Hurtigruten Svalbard which owns and operates the Radisson Blu Polar Hotel, Funken Lodge and the Coal Miners' Cabins, as well as arctic adventure tourism on Svalbard. The archipelago of Svalbard is the Northernmost settlement in the world and one of the most remote and unique destinations in the world where there are more polar bears than people living.

From a base in Longyearbyen, Hurtigruten Svalbard AS offers active Arctic experiences on snow-covered and snow-free terrain with an extensive portfolio of activities and excursions. These include day trips on skis, dog

Hurtigruten Group AS

Consolidated Financial Statements 2020

sledding, snowmobile trips, boat or hiking excursions and longer expeditions in the archipelago. Hurtigruten Svalbard's operations – originating back in 1896 – are the largest and most diversified on Svalbard.

Over the last 3 years Hurtigruten Svalbard has invested heavily in the product and the hotels. In February 2018, Funken Lodge was re-opened with 88 brand-new rooms, new bar and lounge areas, a new reception and a refurbished Funktionærmessen gourmet restaurant. In February 2019 the Radisson Blu opened after a full refurbishment of the public areas including a new restaurant and pub concept.

This investment underlines Hurtigruten Svalbard's ambitions for year-round expedition-based experiences for individual guests, as well as for groups of travelers.

In March 2021 Hurtigruten Group entered into an agreement with Store Norske Spitsbergen Kullkompani AS ("SNSK") to sell the real-estate portfolio. At closing of the transaction Hurtigruten Svalbard AS will enter into a 30-year lease agreement with SNSK for the real estate and will continue to operate them and further develop the product offering on Svalbard.

GROUP FUNCTIONS, OTHER AND ELIMINATION

This area mainly includes Personnel costs, non-ship and Selling, general and administration expenses as these costs no longer are allocated to the segments Hurtigruten Norway and Hurtigruten Expedition. In addition, we have a minor portfolio of properties and smaller activities that cannot naturally be classified in the other areas.

Hurtigruten Group AS

Consolidated Financial Statements 2020

(B) SECONDARY REPORTING FORMAT – GEOGRAPHICAL SEGMENTS AND REVENUE SPLIT

Operating revenues have been separated into geographical segments by which market the sales office is located. Some markets serve customers situated in other countries. In the table below, onboard sales, cargo freight revenue, contractual revenue and revenue from the Hurtigruten Destination segment have all been allocated to the Nordic market.

2020

<i>(in EUR 1,000)</i>	Ticket revenue	Flights, hotel and trans- portation	Presold food, beverages, shop and excursions	Contractual revenue	Other operating revenue	Total operating revenue
Nordic market / onboard sales / Landbased segment	24,134	3,297	4,166	79,162	34,097	144,857
Germany	17,661	6,097	4,894	-	5,283	33,934
France	2,511	784	758	-	1,070	5,124
United Kingdom	11,318	4,064	5,027	-	1,017	21,426
Rest of Europe	5,752	562	1,657	-	582	8,554
United States and Canada	7,253	1,518	1,412	-	1,052	11,235
Asia / Pacific	11,350	326	1,312	-	494	13,482
Total operating revenue	79,980	16,648	19,225	79,162	43,596	238,611

2019

<i>(in EUR 1,000)</i>	Ticket revenue	Flights, hotel and trans- portation	Presold food, beverages, shop and excursions	Contractual revenue	Other operating revenue	Total operating revenue
Nordic market / onboard sales / Landbased segment	47,155	3,362	12,722	72,576	84,608	220,422
Germany	96,726	30,413	36,909	-	2,298	166,346
France	18,766	3,638	6,575	-	1,859	30,838
United Kingdom	38,933	9,882	15,956	-	1,701	66,472
Rest of Europe	32,559	2,244	9,790	-	628	45,221
United States and Canada	33,743	4,094	9,690	-	1,586	49,113

Useful economic lifetime	25 - 40 years ²⁾ 20 - 40 years		N/A	5 - 10 years		

¹⁾ Reclassification previous years relates to accumulated depreciations from previous years included in the acquisition costs of property plant and equipment.

Hurtigruten Group AS

Consolidated Financial Statements 2020

²⁾ Land has indefinite useful economic lifetime; hence it is not subject to depreciations.

Land and buildings primarily comprise the hotel properties at the Group's operations in Svalbard.

The cost of prepayments ships and assets under construction include design and engineering fees, capitalised interest, construction oversight costs and various owner supplied items. The Group accounts for ship improvement costs by capitalising those costs believed to add value to its ships and which have a useful life greater than one year and depreciate those improvements over its estimated useful life.

Capitalised interest amounted to EUR 2.9 million in 2019. The interest capitalisation rate is based on the weighted average interest rates applicable to borrowings within the Group during each period. During 2019, the average capitalisation rate was 4.23%. There was no capitalization of interest in 2020 as the newbuild vessels were completed and delivered in 2019.

In 2020, the Group operated 16 cruise ships, however, due to the ongoing Covid-19 pandemic, most of the ships have been laid up in warm stack since March 2020. The Group reviews the long-lived assets for impairment whenever events or circumstances indicate potential impairment.

As at year end 2020, the Group has assessed the carrying values of the Groups assets for impairment according to IAS 36. The value in use has been estimated for the Groups ships on a cash generating unit level and has been calculated based on the present value of estimated future cash flows. The projected cash flows represent managements best estimate for future ramp-up in operations after the Covid-19 effects on the travel industry. As of quarter end, the estimated value in use is equal to or higher than the carrying value of the assets, and no impairment has been recognized in the financial statements as per 31 December 2020. See note 8 for further information.

ASSET HELD FOR SALE

In November 2020, Hurtigruten Group announced that it had signed a Letter of Intent to sell the ship MS Lofoten to the Foundation for Maritime High School, Southern Norway. The intended transaction is planned for the summer of 2021. The carrying value of the ship as per 31 December 2020 is reclassified as asset held for sale.

Useful economic lifetime	Indefinite	Indefinite	N/A	3 - 10 years	

¹⁾ Reclassification previous years relates to accumulated depreciations from previous years included in the acquisition costs of intangible assets

In 2014, Hurtigruten Group AS acquired 100 % of the outstanding shares of Hurtigruten AS. As a result of the acquisition, Goodwill of NOK 1 919 million and an excess value of NOK 590 million related to contracts and trademarks were recognised.

Other intangible assets primarily comprise of capitalised development expenses related to ICT systems (booking, inventories, etc.) with a limited lifespan. The assets are amortised on a straight-line basis over 3–10 years. Amortisation is presented under amortisation in the income statements. In preparing for the ramp-up in operations in 2021, the Group recognizes that some of its IT software capitalizations will not be utilized in the new organization and future operations, and as such recognised an impairment of EUR 11.6 million in 2020.

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired.

Hurtigruten Group AS

Consolidated Financial Statements 2020

Goodwill relates to the following cash-generating units:

<i>(In EUR 1,000)</i>	2020	2019
Hurtigruten Norway	71,607	160,092
Hurtigruten Expeditions	119,545	31,090
Hurtigruten Destinations	7,461	7,515
Sum	198,613	198,697

The change in the allocation from the segment Hurtigruten Norway to Hurtigruten Destination is due to the new contract with the Norwegian Ministry of transportation from 1 January 2021, where the Hurtigruten Norway segment will operate 7 ships in this segment compared to 11 ships in 2020. Hence, three of the ships will be moved to the Hurtigruten Expedition segment in 2021, giving a shift in the allocation between these two segments.

The recoverable amount of a cash-generating unit is calculated based on forecasted results and liquidity forecasts for the units approved by management and the Board of Directors.

Assumptions applied when calculating the recoverable amount:

	Hurtigruten Norway	Hurtigruten Expedition	Hurtigruten Destinations
Growth rate	2.0 %	2.0 %	2.0 %
Discount rate after tax	12.0 %	13.0 %	10.0 %

The recoverable amount has been calculated based on the latest updated forecast for EBITDA for 2021 and the next five years. The forecast represents managements best estimate for the ramp up in operations after the Covid-19 pandemic, including estimates for the range of economic conditions that will exist over the period, including expectations regarding occupancy rate, fuel prices and salary development. Expected future cash flows are based on forecasted EBITDA deducted for capex, tax effects of depreciation and changes in net working capital (NWC). Subsequently the terminal value is used. For the period beyond 2025, cash flow is estimated by extrapolating the projections based on the forecasts, using a steady growth rate of 2 % for subsequent years, equal to assumptions in inflation.

The Group does not apply a general growth factor beyond expected inflation for cash flows when testing goodwill for impairment. The total required rate of return used to discount cash flows is calculated as a weighted average return on equity and the required rate of return on interest-bearing debt. This calculation utilises an estimate of the risk-free interest rate, risk premium, beta and the liquidity premium.

Sensitivities

The Group has carried out sensitivity analysis by considering changes in the occupancy rate which affects the revenue and operating profit and the discount rates. These are considered the most important assumptions for the long-term expectations for the cash generating units. The management's present plans and forecasts as well as the market's expectations have also been taken into consideration.

The long long-term assumptions are assessed on an ongoing basis and the assumptions applied in future impairments test may vary from those applied in 2020. The Group has a continuously review process, which includes sensitivity analysis and analysis of actual results achieved compared to long-term assumptions, to assess whether the long-term base case assumptions continue to correctly reflect expectations. In a scenario with a prolonged Covid-19 pandemic and associated travel restrictions which lasts through at least 2021 there is still sufficient headroom to the carrying value of the Group's assets not to lead to an impairment situation.

Hurtigruten Group AS

Consolidated Financial Statements 2020

On the bases of this analysis, management believes that there is no need for impairment of the carrying value of goodwill and trademarks and no impairment has been recognized in the financial statements as per 31 December 2020.

NOTE 9 INVESTMENTS IN ASSOCIATES

This table presents the associates and joint ventures of the Group as at 31 December 2020 and 2019 which are material to the Group. Green Dog Svalbard AS has share capital consisting solely of ordinary shares, which are held directly by the Group and the proportion of ownership interest is the same as the proportion of voting rights held. Associates are accounted for using the equity method.

31 DECEMBER 2020

Hurtigruten Group AS

Consolidated Financial Statements 2020

CLASSIFICATION BY IFRS FAIR VALUE HIERARCHY

The Group uses the following hierarchy to classify assets and liabilities, based on the valuation methods used to measure and disclose their fair value:

- Level 1: Quoted (unadjusted) prices in active markets for identical assets and liabilities.
- Level 2: Other techniques in which all the parameters that have a significant impact on measuring fair value are either directly or indirectly observable. This is primarily relevant for our derivatives, where the price normally is set by the counterpart (a financial institution).
- Level 3: Valuation techniques that use parameters that significantly affect the valuation, but which are not observable.

ASSETS AND LIABILITIES MEASURED AT FAIR VALUE AS PER 31 DECEMBER 2020

<i>(in EUR 1,000)</i>	<i>Note</i>	Level 1	Level 2	Level 3	Total
Assets					
Investments in other companies		-	-	2,505	2,505

Total derivatives (note 10C)	(0)	827

Hurtigruten Group AS
Consolidated Financial Statements 2020
NOTE 10C FAIR VALUE OF DERIVATIVES

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at fair value. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. If the derivative is not classified as a hedging instrument, subsequent re-measurements are recognised in profit or loss.

The Group has one type of derivatives as of 31 December 2020:

- Bunker oil derivatives that previous was used for in cash flow hedge in order to hedge the future market risk of bunker oil purchases.

2020
(in EUR 1,000)

	Assets	Liabilities
Classification of derivatives		
Forward bunker oil contracts	-	4 564
Total fair value of derivatives	-	4 564
Current	-	4 564
Non-current	-	-

2019
(in EUR 1,000)

	Assets	Liabilities
Classification of derivatives		
Forward bunker oil contracts - cash flow hedge	827	3 310
Total fair value of derivatives	827	3 310
Current	827	2 543
Non-current	-	768

A hedging instrument is classified as long term if the major part of the instrument is settled in a period longer than 12 months from the balance sheet date.

FORWARD BUNKER OIL CONTRACTS

The hedged quantum was initiated in 2018, and the purchase transactions of bunker oil was expected to occur at various dates over the period of 36 months, where the unrealized gains/losses were recognised in other comprehensive income. The forward contracts mature monthly. However, if an entity expects that all or a portion of a loss recognized in other comprehensive income will not be recovered in one or more future periods, it shall reclassify into profit or loss the amount that is not expected to be recovered. Given the current situation with the Covid19 pandemic affecting the certainty and timing of future profits, the Group does not expect the cumulative loss on bunker derivatives at balance sheet date to be recovered within the future hedging period. Therefore, the Group reclassified the hedging from other comprehensive income to profit and loss in 2020. Realised gains and losses are recognised in Other gains/(losses). In 2019 a loss of EUR 5.4 million was recognised, while in 2020 a loss of EUR 15 million was recognised in the income statement, including the transfer from other comprehensive income of EUR 8.7 million due to the discontinuing of hedge accounting.

PROVISION FOR IMPAIRMENT OF TRADE RECEIVABLES

<i>(in EUR 1,000)</i>	2020	2019
Provision for impairment of receivables as of 1 January	449	422
Provision for impairment of receivables during the year	619	110
Receivables written off during the year	(414)	(81)
Currency translation effects	(13)	(1)
Provision for impairment of receivables as of 31 December	642	449

The Group has no significant concentration of credit risk. Sales to end users are settled in cash or with recognised credit cards and are paid in full prior to the travel date. Trade receivables primarily comprise sales to external agents through invoicing. The Group has routines to ensure that trade credit and prepayment of expenses are only extended to agents and vendors that have a satisfactory credit rating. Individual risk exposure limits are set based on internal and external assessments of credit ratings.

FAIR VALUE CALCULATIONS

The carrying amounts and the fair values of the borrowings are as follows:

<i>(in EUR 1,000)</i>	Carrying value		Fair value	
	2020	2019	2020	2019
Bond	295,625	-	261,450	-
Term loans and financial lease vessels	848,989	946,650	866,470	968,043
Revolving credit facilities	83,964	40,040	85,000	40,040
Lease liabilities	15,821	16,661	15,821	16,661
Other borrowings	14,298	111	14,391	111
Total	1,258,696	1,003,461	1,243,132	1,024,855

The bond was listed on the Oslo Stock Exchange with ISIN: NO 0010874548 10th July 2020.

For the remainder of the borrowings, the Groups considers the fair value to approximate their carrying value for. The main difference between carrying value and fair value is the capitalised expenses recognised and amortised in accordance with the effective interest method.

PLEDGES

Hurtigruten Group have agreed to pledge the Group's assets in favour of the secured loans. The security package includes the vessels in the Group, as well as land and buildings in Svalbard and Finnmark. Furthermore, the relevant Group entities (subsidiaries) established pledge of shares in subsidiaries and assignment of intercompany loans.

Total assets pledged as security	919,465	1,132,462

Hurtigruten Group AS

Consolidated Financial Statements 2020

The Group's main source of financing is a EUR 655 million Term Loan B with EURIBOR floating interest + margin and a 7-year tenor. The loan was issued in February 2018 (EUR 575 million) and increased in November 2018 (EUR 80 million) to repay an outstanding NOK bond in Coastal Holding AS and for general corporate purposes (incl. further investments in the fleet). The loan is secured against 10 of the Group's vessels.

The Group has a Revolving Credit Facility of EUR 85 million with EURIBOR floating interest + margin and a 6-year tenor. As of 31 December 2020, the facility was fully drawn. The loan is secured against 10 of the Group's vessels and ranks parri passu with the Term Loan B.

The Group has a sale and lease-back agreement with Jiaye International Ship Lease Co. Limited for the vessel MS Spitsbergen, which was entered into in June 2016. The leasing period is 12 years and expires on 30 June 2028. The agreed sale price was EUR 55 million.

On 10 January 2020, the wholly (indirectly) owned subsidiaries of Hurtigruten Group AS, MS Richard With AS and MS Nordlys AS completed a sale and leaseback transaction with Bank of Communications Financial Leasing Co., Ltd for the two vessels MS Nordlys and MS Richard With. The total committed lease amount is EUR 55 million per vessel, of which EUR 30 million on closing and additional EUR 25 million committed upon completion of planned LNG conversions. The leasing period is 10 years.

In February 2020 the EUR 260 million Export Credit Agency facility put in place to finance the Group's two new expedition vessels, MS Roald Amundsen and MS Fridtjof Nansen was refinanced with a EUR 300 million 5-year senior secured bond with a coupon of 3,375%. The bond is secured against the two vessels MS Roald Amundsen and MS Fridtjof Nansen. The bond was listed on Oslo Stock Exchange on 10th July 2020.

In late June 2020, the Group further added a senior secured Term Loan C of EUR 105 million to secure additional liquidity funding. The facility is priced at E+800bps, has a maturity of 3 years and ranks pari passu with the Term Loan B and the Revolving Credit Facility.

In July 2020, the Group also secured a 3-year state guaranteed bank loan of NOK 150 million, as part of the government relief package for Covid-19 affected businesses in Norway.

COVENANTS

Term Loan B and Term loan C

There are no financial maintenance covenants.

Revolving credit facility

In June 2020 certain amendments were made to the Facility Agreement including, among other things, suspension of the Consolidated Senior Secured Leverage Ratio Financial covenant (not greater than 7.7:1) until 31 December 2021. During the suspension period a Minimum liquidity test and a Consolidated EBITDA test will apply. The Available Liquidity (comprising cash, cash equivalents and amounts available to be drawn under the Revolving Facility, any Ancillary Facility and any Incremental Facility) to be at least €25,000,000 (tested monthly or, if Available Liquidity is less than €45,000,000, bi-monthly). Consolidated EBITDA in respect of the Quarter Period ending 30 June 2021 to be not less than €17,040,000, and in respect of the six-month period from 1 April 2021 to 30 September 2021 not less than €68,250,000. Both tests to be subject to equity cure rights and to apply for the benefit of Lenders under the Revolving Facility only.

In February 2021 certain additional amendments were made to the Facility Agreement. The suspension period for the Consolidated Senior Secured Leverage Ratio Financial covenant (not greater than 7.7:1) was extended until 31 December 2022. The minimum liquidity test was adjusted such that for the purposes of determining Available Liquidity cash constituting cash collateral in favor of third parties is excluded. The requirement that

Hurtigruten Group AS

Consolidated Financial Statements 2020

Available Liquidity be at least €25,000,000 continues to apply during the Suspension Period (tested monthly or, if Available Liquidity is less than €45,000,000, bi-monthly) and increases to €30,000,000 on and following 30 September 2021. The minimum Consolidated EBITDA test that applies during the Suspension Period has been adjusted such that Consolidated EBITDA in respect of the Quarter Period ending 31 March 2022 shall be not less than €23,918,000 (or its equivalent); in respect of the Quarter Period ending 30 June 2022 not less than €35,914,000 (or its equivalent) and in respect of the Quarter Period ending 30 September 2022 not less than €59,695,000 (or its equivalent).

EUR 300 million bond

Hurtigruten Group AS must maintain a Minimum Free Liquidity above EUR 15 million and the issuer Explorer II AS must maintain a minimum free liquidity above 50% of the next interest and amortisation instalment.

Limitations on indebtedness

The Group can only incur new debt provided that it (1) meets a Fixed Charge Coverage Ratio (the ratio of Consolidated EBITDA to Consolidated Financial Interest Expense as defined in Term Loan B, RCF and Term Loan C documentation) or (2) fits into a specified exception to the ratio test. Non-Guarantor Restricted Subsidiaries are not permitted to incur indebtedness exceeding EUR 50.0 million. Debt incurrence is only measured at the time debt is incurred. As a result, no violation occurs if, at a date subsequent to the incurrence, the Group or its Restricted Subsidiaries would not meet the incurrence ratios.

In June 2020 as part of the amendments made to the Facility Agreement during the suspension period the amount of Indebtedness maturing inside the maturity of the Revolving Facility that may be incurred under the Ratio Debt basket, Credit Facilities basket or General Debt basket during the Suspension Period was restricted to EUR 120 million. As part of the amendments made to the Facility Agreement in February 2021 the amount of Indebtedness maturing inside the maturity of the Revolving Facility that may be incurred under the Ratio Debt basket, Credit Facilities basket or General Debt basket during the Suspension Period was increased from €120,000,000 to €166,500,000.

Incremental facilities

The Group can establish an Incremental Facility without consent from any Finance Party provided that no Event of Default is continuing and that the Incremental Facility rank pari passu with or junior to the other Facilities under the Finance Documents. If the Incremental Facility is a term loan the amount may not exceed, the Accordion Amount (being an amount equal to 100% of Consolidated EBITDA plus the amount which does not cause (i) in respect of Senior Secured Indebtedness, the Consolidated Senior Secured Leverage Ratio to exceed 5.0:1.0, and (ii) in respect of any indebtedness that is not Senior Subordinated Indebtedness, the Fixed Charge Coverage Ratio to be less than 2.0:1.0.

Hurtigruten Group AS

Consolidated Financial Statements 2020

NOTE 16 INCOME TAX

INCOME TAX EXPENSE

The income tax expense for the year can be broken down as follows:

<i>(in EUR 1,000)</i>	2020	2019
Income tax payable, current year	518	4,023
Income tax payable, adjustments regarding previous years	(286)	211
Change in deferred tax, current year	(2,169)	62,898
Change in deferred tax, tax rate changes and adjustments regarding previous years	(1,187)	(46)
Total income tax expense/(revenue)	(3,123)	67,086

Tonnage tax is calculated based on the ship's tonnage and not income and is therefore classified as an operating expense.

RECONCILIATION OF INCOME TAX EXPENSE TO PROFIT / LOSS BEFORE TAX

The tax on the Group's profit or loss before tax deviates from the amount that would have applied if the statutory tax rate in Norway had been used. The difference can be explained as follows:

<i>(in EUR 1,000)</i>	2020	2019
Profit/(loss) before tax from operations	(163,668)	49,265
Expected income taxes at statutory tax rate in Norway (22 %)	(36,007)	10,698
Shipping company tax schemes - NO Tax Act only (+/-)	16,161	(16,608)
Change in tax regime (to shipping company tax scheme) (+/-)	-	71,322
Non-taxable income (-)	(6,116)	(1,322)
Gifts, representation and other non-deductible expenses (+)	7,382	1,528
Effect from difference in tax rate from nominal tax rate in Norway (+/-)	1,127	677
Effect from change in tax rate and tax provisions from previous years	(283)	165
Effect from change in valuation allowance, tax losses	16,564	518
Other permanent differences (+/-)	(1,950)	108
Total income tax expense/(revenue)	(3,123)	67,086
Weighted average tax rate	N/A	138.0 %

Other permanent differences in 2020 is mainly related to the change in functional currency from NOK to EUR from January 1, 2020 as described in note 2. Mostly all the borrowings in the Group are nominated in EUR, giving no revaluation effect in the separate subsidiaries. However, the tax papers are filed in NOK, which gives high revaluation effects in the P&L in NOK for the borrowings. This in return creates a material difference in profit/(loss) before taxes in EUR vs NOK in the respective companies.

The negative effective tax rate for the Group in 2020 is mainly related to valuation allowances for tax losses carried forward. The high effective tax rate for the Group in 2019 were related to change in tax regime to shipping company tax scheme.

Hurtigruten Group AS

Consolidated Financial Statements 2020

NOTE 17 PENSIONS

The Group operates both defined contribution and defined benefit pension schemes. For the defined contribution plans the cost is equal to the contributions to the employee's pension savings during the period. Future pensions are dependent on the size of the contributions and the return on the pension plans.

The Group has defined benefit plans in Norway and Germany. For the Norwegian defined benefit plans, the employer is responsible for paying an agreed pension to the employee based on his/her final salary. Future defined benefits are mainly dependent on the number of contribution years, salary level upon reaching retirement age and the size of National Insurance benefits. These obligations are covered through an insurance company. The largest scheme, that was in the subsidiary Hurtigruten Sjø AS was closed and discontinued in May 2020. The employees received a paid-up policy (fripolise). In addition to the pension obligations that are covered through insurance schemes, the company has unfunded pension obligations that are funded from operations, primarily for former key management personnel. Pension fund assets managed by insurance companies are regulated by local legislation and practice. The relationship between the company and the insurance company is regulated by applicable legislation. The boards of the insurance companies are responsible for managing the plans, including making investment decisions and determining premium levels. An agreed fixed sum per month is paid as a pension for the German pension plan, from which most beneficiaries receive the same agreed amount, while three former directors receive a considerably higher payment. The German plan is organised as a CTA (contractual trust arrangement), in which the plan assets are earmarked for the pension fund, but the company's management determines how the assets are to be invested.

The new Contractual Early Retirement (AFP) Scheme Act adopted by the Norwegian Parliament in 2010 entailed the derecognition and recognition in the income statement of provisions related to the old contractual early retirement scheme. Provisions were set aside to cover the assumed underfunding of the old contractual early retirement scheme. The new AFP early retirement scheme is based on a tri-parties collaboration between employer, employee organisations and the government. The government covers one-third of the pension expenses for the early retirement scheme, while affiliated enterprises cover the remaining two-thirds. The scheme is recognised as a defined benefit multi-entity plan in the financial statements. This means that each individual company shall account for its proportional share of the scheme's pension obligations, plan assets and pension costs. Until reliable and consistent information is available for allocation, the new contractual early retirement scheme will be accounted for as a defined contribution plan. This is consistent with the Ministry of Finance's conclusion concerning the new AFP early retirement plan published in connection with the presentation of the Norwegian State Budget on 14 October 2013. The only members of the scheme are the Hurtigruten Pluss permanent employees, of whom there were 289 as of 31 December 2020. AFP is earned at the rate of 0.314% of pensionable income up to 7.1 G for every year worked between the ages of 13 and 62. A total of EUR 229 thousand (NOK 2.6 million) was paid into the scheme in 2020. For the other employees in Norway there is also a defined contribution plan where the contribution amount is a fixed percentage of salary, 5 % of salary between 1 and 7.1 G and 10 % of salary between 7.1 and 12 G.

The established pension plans cover 1,747 Group employees and 81 pensioners and 28 former employees. The pension costs for the period illustrate the agreed future pension entitlements earned by employees in the financial year.

RISK

The Group is exposed to several risks through the defined benefit pension schemes, the most significant of which are as follows.

Investment volatility

The pension obligations are calculated using a discount rate based on the interest rate on bonds. If the investment in the pension fund assets provides a lower return than the bond interest rate, this gives rise to a deficit. All the plans comprise shares that are expected to give a higher return than interest on bonds over the long term, but which may, however, result in increased volatility and risk over the short term. As the pension plans' obligations mature, the target will be to reduce the share of risky investments to better match the obligations.

Changes in interest rates on bonds

A reduction in interest rates on bonds would increase the pension plans' obligations. However, this would be partially offset by an increase in the return on the investments in bonds.

Inflation risk

The defined benefit pension plans' obligations are exposed to inflation risk. An increase in inflation could result in higher obligations. The key assets of the pension plans are either unaffected by inflation (fixed-interest bonds) or loosely correlated with inflation (shares). A rise in inflation could therefore increase deficits in the plans.

Life expectancy

The payment obligation only applies to the remaining life expectancy of the plan beneficiaries. A rise in life expectancy would increase the plans' obligations. This is particularly important for the Norwegian plan, in which the adjustment for inflation results in higher sensitivity to changes in life expectancy. A new mortality table, K2013, was introduced in 2013 to reflect the rising average life expectancy of the Norwegian population. The effect of the above is shown in changes in demographic assumptions under recalculations of the change in the pension obligation.

ASSET MANAGEMENT

A basic intention of asset management of plans organised through pension insurance companies is to secure cover of the non-current obligations by delivering a competitive annual return at least equal to the guaranteed interest rate. Asset management is based on a long-term arrangement of investment portfolios, tailored to the company's long-term obligations. Norwegian legislation imposes restrictions on concentration risk in the investment of all plan assets. The investments are made in collective portfolios with cautious, moderate risk. The assets in the German plan are currently invested in a listed fund that is managed by a professional asset manager. The fund follows a multi-asset strategy with a conservative risk profile. The composition of the fund is regularly

Hurtigruten Group AS

Consolidated Financial Statements 2020

changed to accommodate optimal returns and risk management. At the reporting date 50% of the assets were invested in shares in various markets. Consequently, these shares are exposed to risk attaching to the performance of global equity markets. While company management cannot influence the fund's investments, it may at any time elect to exit fund investments.

<i>(in EUR 1,000)</i>	2021	2020
The company's expected contributions to funded plans in the next year	678	6 959

EXPECTED MATURITY DATE OF PENSION SCHEMES AS OF 31 DECEMBER 2019

<i>(in EUR 1,000)</i>	< 1 year	1-2 years	2-5 years	>5 years	Total
Defined benefit pension	687	1 105	2 028	7 301	11 121

The Group has established mandatory occupational pension plans in the companies where this is required. These plans for Norwegian companies satisfy the requirements stipulated in the Norwegian Mandatory Occupational Pension Act.

TABLE OF THE HISTORICAL PRESENT VALUES OF PENSION OBLIGATIONS AND ASSETS AS OF 31 DECEMBER

<i>(in EUR 1,000)</i>	2020	2019	2018

Consolidated Financial Statements 2020

	Change in National Insurance basic amount (G) adjustment	
	+ 1 per cent	- 1 per cent
Increase (+) reduction (-) in the net pension costs for the period	5	-
Increase (+) reduction (-) in the net pension obligations as of 31 December	212	-

The sensitivity analysis above is based on a change in one of the assumptions, with all other assumptions remaining unchanged. In practice this would not happen as more than one assumption could vary simultaneously. The sensitivity calculation is performed applying the same method as the actuarial calculation used to determine the pension obligation in the statement of financial position.

The method and the assumptions in the sensitivity analysis have not been changed compared with the previous year. The Group has only one open defined benefit plan under which beneficiaries have entitlements.

Consequently, this is the only plan affected by changes in annual salary growth and adjustments to G.

BONUSES

A performance-related bonus was introduced for Hurtigruten AS management from 2013. The bonus scheme includes the CEO and certain personnel in Group management. No payment was done during 2019 towards these managers due to Covid-19 result decrease in 2020. See note 24A Remuneration of board of directors and executive management for details on the executive management. There is also bonus scheme for certain level of employees. All bonuses towards other eligible managers for general bonuses were also cancelled for 2019 due to Covid-19.

MANAGEMENT INCENTIVE PLANS

The management in Hurtigruten Group has entered into an incentive plan to purchase shares in the parent company of the Silk Topco Group, Silk Topco AS. For further information regarding the Management incentive plan, see note 20.

Hurtigruten Group AS

Consolidated Financial Statements 2020

DEFERRED GOVERNMENT GRANT

A line-by-line recognition has been carried out with respect to an investment contribution received, including a possible repayment obligation. Revenue recognition of the investment contribution occurs in conjunction with depreciation and amortisation of the associated asset. EUR 23.1 thousand was recognised as a reduction in depreciation during the year 2020 (EUR 25.5 thousand in 2019).

CONTINGENT LIABILITIES

The group recognises a provision if it is probable that an outflow of cash or other economic resources will be required to settle the provision. If an outflow is not probable, the item is treated as a contingent liability. The group has not recognised any provisions for 2020 or 2019, see also note 5 Contingencies for further information.

NOTE 19 SHARE-BASED PAYMENT

The executive management in Hurtigruten Group has entered into an agreement with the ultimate parent company, Silk Topco AS. The executive managers have purchased shares in Silk Topco AS at the same price that Silk Topco AS paid for the shares in Hurtigruten ASA in 2014 through its subsidiary Hurtigruten Group AS. The agreement also contains an incentive scheme that gives management a right to bonus shares in different pre-defined exit scenarios. The beneficiary can choose the settlement in cash or have a private placement.

The incentive scheme has two market-based vesting conditions:

- (i) The internal rate of return at the time of the sale, calculated from the time of the share-purchase, must be more than 8%
- (ii) The exit value must be at least 150% of the aggregated invested amount

The number of bonus shares depends on the aggregated exit value and can give a range of bonus shares from 0.38 per share up to 12 times per share. Management's investment at 31 December 2020 was NOK 41.0 million (NOK 42.5 million at 31 December 2019).

When estimating the fair value of the incentive scheme at grant date, the main factors influencing the fair value that had to be estimated by management were as follows:

- (i) The probability of different exit values that then give different levels of bonus shares,
- (ii) The expected time to exit
- (iii) Discount rate.

The agreement was signed on 23. June 2015.

Expected life of the agreement:	5 years
Fair value at initial recognition:	NOK 17.3 million
Expected time to exit:	5 years*
Annual amortisation:	EUR 0.42 million (NOK 4.5 million)
Accrued amount as of 31.12.2020:	EUR 0.43 million (NOK 4.5 million)
Accrued amount as of 31.12.2019:	EUR 2.39 million (NOK 23.6 million)

As of 31. December 2020, the provision for employer's contribution related to the management incentive programme was EUR 0.24 million (NOK 2.5 million) and EUR 1.43 million (NOK 14.1 million) at 31 December 2019.

* As of 31. December 2020 expected time to exit has been increased to 9 years, to 2024, representing managements best estimate given the current situation with the pandemic affecting the industry.

Total payroll costs	92 690	134 325

Average number of full-time equivalents **1 381** **2 489**

Seamen hired by Hurtigruten Group are included in the "Net Wages" – scheme, where the Norwegian government reimburses to shipping companies an amount corresponding to the sum of the income tax paid, social security contributions and employer's national insurance contributions (payroll tax) for crew within the scheme. The government grant is recorded as a reduction in payroll costs. During 2020, the Group has recognised EUR 1.1 million (NOK 11.6 million) in government grants through this arrangement (EUR 1.5 million or NOK 15.1 million in 2019).

The Norwegian government reimburses parts of the salary to new seamen apprentices. The government grant is recognised as a reduction in payroll costs. During 2020, the Group has recognised EUR 0.9 million (NOK 9.2 million) in government grants through this arrangement (EUR 1.0 million or NOK 9.5 million in 2019).

Hurtigruten Group AS

Consolidated Financial Statements 2020

The Covid-19 effect was high for number of FTEs due to furloughing employees during the warm-stacking of ships and pause of operations of cruises until expected start of normal operations. The group has had similar number of employees in 2020 as 2019.

NOTE 24A REMUNERATION OF THE BOARD OF DIRECTORS AND EXECUTIVE MANAGEMENT

TOTAL COMPENSATION YEAR 2020

BOARD OF DIRECTORS

The board of directors have waived their annual compensation for 2020.

EXECUTIVE MANAGEMENT

<i>(in EUR 1000)</i>	Position	Salary	Pension cost	Other ²⁾	Fees remuneration	Total
Daniel Skjeldam	Chief Executive Officer	541	71	10	-	621
Torleif Ernstsen	Chief Financial Officer	271	26	-	-	296
Asta Lassesen	Chief Commercial Officer	180	25	94	-	299
Bent Martini	Chief Operating Officer (until 9th of October 2020)	358	22	7	-	387
Stine Steffensen Børke	Chief Marketing Officer	180	12	8	-	200
Ole-Marius Moe-Helgesen	CDO, Digital, People and Organizational Development	203	15	-	-	218
Total		1,733	171	118	-	2,022

²⁾Including bonus, car allowance and severance benefits for outgoing managers.

The company's CEO receives an annual fixed salary of NOK 6 million, however for May and June 2020 the executive management decided on a one month cut of 20% during 2020 due to Covid-19 for the executive management group. Other benefits include bonus, fixed car remuneration and ordinary phone expenses, Internet, newspaper and home computer allowance. The CEO has a time-limited agreement on a performance-related bonus linked to the operating result before depreciation, amortisation and impairments, in which performance is indexed against the adjusted budgeted operating result before depreciation, amortisation and impairments. This bonus agreement gives the right to a payment of maximum NOK 4 million. The CEO also has an agreement whereby the Board decides the bonus, factoring all the various activities and circumstances during the year. This bonus agreement gives the right to a maximum bonus payment of up to NOK 1/3 of annual fixed salary.

The CEO is included in the company's ordinary defined contribution pension scheme for salaries up to 12G and the defined contribution scheme that provides a pension basis for salaries over 12G. The CEO's conditions of employment do not include any personal pension obligations.

The company's management are members of the company's defined contribution plan. In addition, a supplementary defined contribution pension plan has been established, which provides a pension for any salary in excess of 12 times the National Insurance basic amount (G). The scheme applies to the entire company and covers all employees with salaries over 12G, including members of the executive management and the CEO. The pension costs for the executive management have been included under pension costs above.

Hurtigruten Group AS

Consolidated Financial Statements 2020

A performance-based bonus scheme was introduced for the company's management from 2013. The bonus payments are established applying pre-determined targets/parameters, some of which relate to the Group's overall performance and others to results within managers' individual spheres of responsibility. The maximum bonus for an individual manager is NOK 2 million. The bonus scheme covers certain members of Group management. The CEO has a separate performance-related bonus scheme as described above.

Due to the COVID-19 pandemic and the needed temporary lay-offs, the company decided to cancel any bonuses achieved in 2019 in 2020.

NOTE 30 EVENTS AFTER THE BALANCE SHEET DATE

NEW LIQUIDITY FINANCING

On 1 March 2021, Hurtigruten Group announced that it has secured a new Euro 46.5 million term loan facility which can be used for its and its subsidiaries' general corporate and working capital requirements. The new facility is priced at E+800bps, matures in June 2023 and ranks pari passu with Hurtigruten Group's existing Senior Term and Revolving Facilities originally dated 9 February 2018 and Senior Term Facility dated 12 June 2020. This transaction together with the expected sale of the real estate portfolio on Svalbard gives Hurtigruten Group a solid liquidity position as we are working towards the start-up of operations. With the new facility Hurtigruten Group has as of 1st of March approximately EUR 80 million in available liquidity and undrawn facilities and approx. Euro 6 million in restricted cash excluding the expected liquidity effect from the sale of the real estate portfolio on Svalbard.

NEW EUR 60 MILLION LETTER OF CREDIT CAPACITY

On 28 December 2020, Hurtigruten Group announced that the company had secured EUR 60 million in letter of credit capacity which would enable the Group to release up to EUR 60 million in restricted cash. In the first week of January 2021, the Group drew on the available letter of credit to release approximately net EUR 47 million in restricted cash to free liquidity.

Hurtigruten Group AS

Consolidated Financial Statements 2020

SALE OF REAL ESTATE PORTFOLIO ON SVALBARD

On 29 March 2021, Hurtigruten Group announced that the Group has signed an agreement with Store Norske to sell the real-estate portfolio on Svalbard. The real-estate portfolio is c. 40 000 square meters, including three hotels, office facilities, 40 apartments and two large retail premises. The total value of the transactions is NOK 690 million of which NOK 105 million is dependent on Hurtigruten Svalbard's sales performance. The transaction is expected to be closed during Q2 2021 and will have a net liquidity effect of approximately EUR 47 million at closing.

At closing, Hurtigruten Svalbard will enter into a 30-year operating lease agreement for the real estate portfolio. The operating lease agreement substantiates Hurtigruten Group's long-term strategic commitment to a land-based Svalbard operation, and Hurtigruten Group will continue to develop Svalbard as a marquee destination for adventure travel in the Arctic.

Carnegie AS acted as financial advisor to Hurtigruten Group in the transaction.

GOVERNMENT GRANT APPLICATION IN GERMANY

In April 2021, Hurtigruten GmbH applied for government grant amounting to EUR 9 million for the period November 2020 to June 2021. The grant will be recognized when, and if, the conditions for reasonable assurance are fulfilled.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

NOTE 1 GENERAL INFORMATION AND ACCOUNTING PRINCIPLES

Hurtigruten Group AS is owned by Silk Midco AS and the ultimate parent company Silk Topco AS, headquartered at Langkaia 1 in Oslo. Hurtigruten Group AS is the parent in the Hurtigruten Group. The consolidated financial statements can be downloaded from the following website: www.hurtigruten.no. The purpose of Hurtigruten Group AS is being the Group's Treasury, and holding the direct ownership of Hurtigruten Explorer AS, and Hurtigruten AS, which operates the main activity of the group.

Refer to the Group's consolidated financial statement for description of the operative activities within the Group. The financial statements of Hurtigruten Group AS for the year ended December 31, 2020 were authorized for issue by the Board of Directors on 15 April 2021.

1.1 BASIS OF PREPARATION

The financial statements of Hurtigruten Group AS have been prepared in accordance with Norwegian Accounting Act and generally accepted accounting principles. The accounting principles set out below have been applied in preparing the financial statements for the year ended 31 December 2020 and the comparative information presented in these financials.

The accounting principles described in this section are as applied to Hurtigruten Group AS company only and do not describe the principles applied to the Hurtigruten Group accounts. The notes for the Hurtigruten Group are presented with the consolidated accounts for the Group.

A) USE OF ESTIMATES

Preparation of the accounts in accordance with generally accepted accounting principles requires that management make estimates and assumptions which have an effect on the value of assets and liabilities on the balance sheet and reported revenues and expenses for the accounting year. The ultimate values realised may deviate from these estimates.

B) FOREIGN CURRENCY TRANSLATION

The financial statements are presented in euro (EUR) which is the functional currency of the parent company since January 1st, 2020. The change was made to reflect that EUR has become the predominant currency in the company, counting for a significant part of the cash flow and financing. The change has been implemented with prospective effect. The change of presentation currency is applied retrospectively for comparative figures for 2018 and 2019. Currency translation effects for the comparative figures from functional currency to presentation currency in EUR in 2018 and 2019 are booked as translation differences towards equity. Comparison figures statement of profit and loss, statement of changes in equity and statement of cash flows have been re-presented to reflect the currency rates of transactions in foreign currencies at average currency rates for the period. The re-presentation of the statement of cash flow impacts the classification between currency translation adjustments and other components of cash flow.

All foreign currency translations are converted to EUR at the date of the transaction. All monetary items denominated in foreign currency are translated at the exchange rate at the balance sheet date. Other non-monetary items in foreign currencies recognised in accordance with the cost method are translated to EUR using the exchange rate applicable on the transaction date. Changes to exchange rates are recognised in the statement of profit and loss as they occur during the accounting period.

Hurtigruten Group AS

Annual Financial Statements 2020

C) INVESTMENT IN SUBSIDIARIES AND ASSOCIATED COMPANIES

In Hurtigruten Group AS, investment in subsidiaries and associated companies are recorded in accordance with the cost method, less any impairment losses. An impairment loss is recognised if the impairment is not considered temporary and reversed if the reason for the impairment loss is no longer present in subsequent periods.

Dividends, group contributions and other distributions from subsidiaries are recognised in the same year as they are recognised in the financial statement of the provider. If dividends / group contribution exceeds withheld profits after the acquisition date, the excess amount represents repayment of invested capital, and the distribution will be deducted from the recorded value of the acquisition in the balance sheet for the parent company.

D) CLASSIFICATION PRINCIPLES

Assets intended for permanent ownership or use and receivables that mature more than one year after the end of the accounting year are classified as non-current assets. Other assets are classified as current assets.

Liabilities that fall due later than one year after the end of the accounting year are classified as non-current liabilities. Other liabilities are classified as current liabilities.

E) INCOME TAX

The tax expense consists of the tax payable and changes to deferred tax. Deferred tax is recognised in respect of all temporary differences and accumulated tax losses carried forward at the balance sheet date which implies increased or decreased tax payable when these differences reverse in future periods.

Current tax is calculated in accordance with the tax laws and regulations enacted or substantively enacted at the balance sheet. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax laws are subject to interpretation. Based on management's assessment, a provision is made for expected tax payments when necessary.

Temporary differences are differences between taxable profit and results that occur in one period and reverse in future periods. Deferred tax is calculated applying the nominal tax rate to temporary differences and accumulated tax losses carried forward. Deferred tax assets are recorded in the balance sheet when it is more likely than not that the tax assets will be utilized. Taxes payable and deferred taxes are recognised directly in equity to the extent that they relate to equity transactions.

Deferred income tax assets and deferred income tax liabilities are recognised net to the extent that there is a desire and ability to realise the assets and settle the liabilities simultaneously.

F) ACCOUNTS RECEIVABLES AND OTHER RECEIVABLES

Accounts receivable and other current receivables are recorded in the balance sheet at nominal value less provisions for doubtful accounts.

G) DERIVATIVES AND HEDGING

The company has entered into derivative contracts for bunker oil to hedge the Groups exposure against bunker oil prices (cash flow hedge). The contract is entered into on behalf of the indirect subsidiary Hurtigruten Cruise AS. Hedges are initially recognised at fair value on the date a derivative contract is entered into, and are subsequently re-measured at fair value on an ongoing basis in the Statement of Financial Position.

Hurtigruten Group AS

Annual Financial Statements 2020

H) CASH FLOW STATEMENT

The cash flow statement is presented using the indirect method. Cash and cash equivalents includes cash and bank deposits.

NOTE 2 FINANCIAL RISK

As a result of ordinary operations expose the company to risk related to fluctuations in exchange and interest rates. The company is covered by the Group hedging strategy. Further information can be found in the consolidated group accounts.

MARKET RISK

a) Currency risk

The Company has significant loans payable in EUR (Term Loan B, Term Loan C and Revolving Credit Facility). Its functional currency is EUR, hence no significant currency risk.

b) Price risk

The company has limited business activities, hence no significant price risk.

c) Interest rate risk

The company's borrowings and draws of the Group bank accounts are made at floating rates. Loans subject to a variable interest rate present a risk to the Group's overall cash flow, while fixed interest rates expose the Company to fair-value interest rate risk. The Company has no specific hedging strategy to reduce variable interest rate risk.

CREDIT AND LIQUIDITY RISK

The Company has no significant concentration of credit risk.

Liquidity risk management includes maintaining a sufficient level of liquid assets geared to operational and investment plans and ensuring the availability of sufficient funding from committed credit facilities. The Company takes part of the Group's group account that ensures that part of the Group's unrestricted liquidity is available to the parent company, and which also optimises availability and flexibility in liquidity management. The Finance function has overall responsibility for managing the Group's liquidity risk. Rolling liquidity forecasts are prepared so as to ensure that the Group has sufficient liquidity reserves to satisfy the Group's obligations and financial loan covenants. See the Group financial statements, note 4 for more detail.

The deferred income tax assets relating to tax loss carry-forwards are recognised in the statement of financial position to the extent that the Company can utilise the tax loss carry-forward against future taxable income. The Company expects to utilize the tax loss carry forwards against future group contributions from the subsidiary Hurtigruten AS, where taxable income is expected based on the future taxable gains related to the transfer of the cruise business to Hurtigruten Cruise AS in 2019.

Total					841,752

The ongoing Covid-19 pandemic has affected all the companies in the Hurtigruten Group. From the latter part of March and through second and fourth quarter this year, we have seen impact from the global spread of Covid-19 on our performance, as mobility restrictions and lockdown measures were implemented throughout the world. Thus, the Covid-19 pandemic has created challenging business environment for the Group, and an unprecedented uncertainty of potential negative impact on the financial performance.

For the Company, these events are impairment triggers, and as such, as of year-end 2020, management has assessed the carrying values of the entire Groups assets for impairment. The value in use has been estimated for the assets on a cash generating unit level and has been calculated based on the present value of estimated future cash flows. The projected cash flows represent managements best estimate for future ramp-up in operations after the COVID-19 effects on the travel industry.

In calculating the estimated future cash flows, the Group does not apply a general growth factor beyond expected inflation. The total required rate of return used to discount cash flows is calculated as a weighted average return on equity and the required rate of return on interest-bearing debt. This calculation utilises an estimate of the risk-free interest rate, risk premium, beta and the liquidity premium.

The Group has carried out sensitivity analysis by considering changes in the occupancy rate which affects the revenue and operating profit and the discount rates. These are considered the most important assumptions for the long-term expectations for the cash generating units. The management's present plans and forecasts as well as the market's expectations have also been taken into consideration.

The long long-term assumptions are assessed on an ongoing basis and the assumptions applied in future impairments test may vary from those applied in 2020. The Group has a continuously review process, which includes sensitivity analysis and analysis of actual results achieved compared to long-term assumptions, to assess whether the long-term base case assumptions continue to correctly reflect expectations. In a scenario with a prolonged Covid-19 pandemic and associated travel restrictions which lasts through at least 2021 there is still sufficient headroom to the carrying value of the Group's assets not to lead to an impairment situation.

As of 31 December 2020, the estimated value in use for the assets in the Company is equal to or higher than the carrying value of the assets, and no impairment of investments in subsidiaries has been recognized in the financial statements of Hurtigruten Group AS as per 31 December 2020.

Total secured borrowings	695,000	(12,266)	682,734
Total borrowings	695,000	(12,266)	682,734

The company's main source of financing is a EUR 655 million Term Loan B with EURIBOR floating interest + margin and a 7-year tenor. The loan was issued in February 2018 (EUR 575 million) as a refinancing of the existing Senior Secured Bond of EUR 455 million and the revolving Credit facility of EUR 85 million which both were terminated. The Term Loan was increased in November 2018 (EUR 80 million) to repay outstanding NOK bond in Coastal Holding AS and for general corporate purposes (incl. further investments in the fleet). The loan is secured against 10 of the Group's vessels.

The company has a Revolving Credit Facility of EUR 85 million with EURIBOR floating interest + margin and a 6-year tenor. As of 31 December 2020, the facility was fully drawn. The loan is secured against 10 of the Group's vessels.

In late June 2020, the company raised a Term Loan C (EUR 105 million) from international investors to secure a longer liquidity runway during the Covid-19 pandemic. The facility is priced at E+800bps and has a maturity of 3 years.

COLLATERALIZED ASSETS

Hurtigruten Group AS as well as its subsidiaries Hurtigruten AS, Hurtigruten Svalbard AS, Hurtigruten Sjø AS, Hurtigruten Cruise AS and Hurtigruten Pluss AS have pledged cash and cash equivalents, intercompany receivables and shares in subsidiaries as security for the above loans.

<i>(in EUR 1 000)</i>	2020	2019

NOTE 13 EVENTS AFTER BALANCE SHEET DATE

On 1 March 2021 Hurtigruten Group announced that it had secured a new EUR 46.5 million term loan facility which can be used for its and its subsidiaries' general corporate and working capital requirements. The new facility is priced at E+800bps, matures in June 2023 and ranks pari passu with Hurtigruten Group's existing Senior Term and Revolving Facilities originally dated 9 February 2018 and Senior Term Facility dated 12 June 2020.

To the General Meeting of Hurtigruten Group AS

Independent Auditor's Report

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Hurtigruten Group AS, which comprise:

- The financial statements of the parent company Hurtigruten Group AS (the Company), which comprise the statement of financial position as at 31 December 2020, the statement of profit and loss and cash flow statement for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and
- The consolidated financial statements of Hurtigruten Group AS and its subsidiaries (the Group), which comprise the statement of financial position as at 31 December 2020, the statement of income, statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion:

- The financial statements are prepared in accordance with the law and regulations.
- The accompanying financial statements give a true and fair view of the financial position of the Company as at 31 December 2020, and its financial performance and its cash flows for the year then ended in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway.
- The accompanying consolidated financial statements give a true and fair view of the financial position of the Group as at 31 December 2020, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the EU.

Basis for Opinion

We conducted our audit in accordance with laws, regulations, and auditing standards and practices generally accepted in Norway, including International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company and the Group as required by laws and regulations, and we have fulfilled our other ethical responsibilities in

PricewaterhouseCoopers AS, Dronning Eufemias gate 71, Postboks 748 Sentrum, NO-0106 Oslo
T: 02316, org. no.: 987 009 713 VAT, www.pwc.no
State authorised public accountants, members of The Norwegian Institute of Public Accountants, and authorised accounting firm

Independent Auditor's Report - Hurtigruten Group AS

accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

Management is responsible for the other information. The other information comprises information in the annual report, except the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors and the Managing Director for the Financial Statements

The Board of Directors and the Managing Director (Management) are responsible for the preparation in accordance with law and regulations, including a true and fair view of the financial statements of the Company in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and for the preparation and true and fair view of the consolidated financial statements of the Group in accordance with International Financial Reporting Standards as adopted by the EU, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's and the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern. The financial statements of the Company use the going concern basis of accounting insofar as it is not likely that the enterprise will cease operations. The consolidated financial statements of the Group use the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with laws, regulations, and auditing standards and practices generally accepted in Norway, including ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Independent Auditor's Report - Hurtigruten Group AS

For further description of Auditor's Responsibilities for the Audit of the Financial Statements reference is made to <https://revisorforeningen.no/revisjonsberetninger>

Report on Other Legal and Regulatory Requirements

Opinion on the Board of Directors' report

Based on our audit of the financial statements as described above, it is our opinion that the information presented in the Board of Directors' report concerning the financial statements and the going concern assumption is consistent with the financial statements and complies with the law and regulations.

Opinion on Registration and Documentation

Based on our audit of the financial statements as described above, and control procedures we have considered necessary in accordance with the International Standard on Assurance Engagements (ISAE) 3000, Assurance Engagements Other than Audits or Reviews of Historical Financial Information, it is our opinion that management has fulfilled its duty to produce a proper and clearly set out registration and documentation of the Company's accounting information in accordance with the law and bookkeeping standards and practices generally accepted in Norway.
