Årsredovisning
CMNRE Rocky HoldCo AB

Org.nr 559235-0044

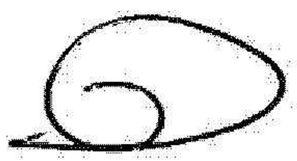
Räkenskapsår 2021-01-01 - 2021-12-31

Fastställelseintyg

Undertecknad styrelseledamot i CMNRE Rocky HoldCo intygar att resultaträkningen och balansräkningen i årsredovisningen har fastställts på årsstämma den 12 maj 2022. Årsstämman beslutade att godkänna styrelsens förslag till hur vinsten ska fördelas.

Jag intygar också att innehållet i årsredovisningen och revisionsberättelsen stämmer överens med originalen.

Helsinki den 31 maj 2022



Juha Salokoski

Noter

Not 1. Redovisnings- och värderingsprinciper

Allmänna upplysningar
Årsredovisningen är upprättad i enlighet med årsredovisningslagen och BFNAR 2016:10, Årsredovisning i mindre aktiebolag (K2).
Fordringar, skulder och avsättningar
Fordringar har värderats till det lägsta av anskaffningsvärde och det belopp varmed de beräknas bli reglerade.

Övriga tillgångar, skulder samt avsättningar har värderats till anskaffningsvärden om annat ej anges.

Not 2. Koncernförhållanden
Företaget är moderföretag men med hänvisning till undantagsreglerna i Årsredovisningslagen 7 kap 2 § upprättas ingen koncernredovisning. Närmast överordnade moderföretag som upprättar koncernredovisning i vilken företaget ingår är Capman Nordic Real Estate III FCP-RAIF (K1810) med säte i Luxemburg.

Building a better working world

Revisionsberättelse

Till bolagsstämman i CMNRE Rocky HoldCo AB, org.nr 559235 - 0044

Rapport om årsredovisningen

Uttalanden

Vi har utfört en revision av årsredovisningen för CMNRE Rocky HoldCo AB för 2021-01-01 –2021-12-31

Enligt vår uppfattning har årsredovisningen upprättats i enlighet med årsredovisningslagen och ger en i alla väsentliga avseenden rättvisande bild av CMNRE Rocky HoldCo ABs finansiella ställning per den 31 december 2021 och av dess finansiella resultat för året enligt årsredovisningslagen. Förvaltningsberättelsen är förenlig med årsredovisningens övriga delar.

Vi tillstyrker därför att bolagsstämman fastställer resultaträkningen och balansräkningen.

Grund för uttalanden

Vi har utfört revisionen enligt International Standards on Auditing (ISA) och god revisionssed i Sverige. Vårt ansvar enligt dessa standarder beskrivs närmare i avsnittet *Revisorns ansvar*. Vi är oberoende i förhållande till CMNRE Rocky HoldCo AB enligt god revisorssed i Sverige och har i övrigt fullgjort vårt yrkesetiska ansvar enligt dessa krav.

Vi anser att de revisionsbevis vi har inhämtat är tillräckliga och ändamålsenliga som grund för våra uttalanden.

Övriga upplysningar

Årsredovisningen för år 2021 är den första som revideras för CMNRE Rocky HoldCo AB.

Styrelsens ansvar

Det är styrelsen som har ansvaret för att årsredovisningen upprättas och att den ger en rättvisande bild enligt årsredovisningslagen. Styrelsen ansvarar även för den interna kontroll som den bedömer är nödvändig för att upprätta en årsredovisning som inte innehåller några väsentliga felaktigheter, vare sig dessa beror på oegentligheter eller misstag.

Vid upprättandet av årsredovisningen ansvarar styrelsen för bedömningen av bolagets förmåga att fortsätta verksamheten. Den upplyser, när så är tillämpligt, om förhållanden som kan påverka förmågan att fortsätta verksamheten och att använda antagandet om fortsatt drift. Antagandet om fortsatt drift tillämpas dock inte om beslut har fattats om att avveckla verksamheten.

Revisorns ansvar

Våra mål är att uppnå en rimlig grad av säkerhet om att årsredovisningen som helhet inte innehåller några väsentliga felaktigheter, vare sig dessa beror på oegentligheter eller misstag, och att lämna en revisionsberättelse som innehåller våra uttalanden. Rimlig säkerhet är en hög grad av säkerhet, men är ingen garanti för att en revision som utförs enligt ISA och god revisionssed i Sverige alltid kommer att upptäcka en väsentlig felaktighet om en sådan finns. Felaktigheter kan uppstå på grund av oegentligheter eller misstag och anses vara väsentliga om de enskilt eller tillsammans rimligen kan förväntas påverka de ekonomiska beslut som användare fattar med grund i årsredovisningen.

Som del av en revision enligt ISA använder vi professionellt omdöme och har en professionellt skeptisk inställning under hela revisionen. Dessutom:

- identifierar och bedömer vi riskerna för väsentliga felaktigheter i årsredovisningen, vare sig dessa beror på oegentligheter eller misstag, utformar och utför granskningsåtgärder bland annat utifrån dessa risker och inhämtar revisionsbevis som är tillräckliga och ändamålsenliga för att utgöra en grund för våra uttalanden. Risken för att inte upptäcka en väsentlig felaktighet till följd av oegentligheter är högre än för en väsentlig felaktighet som beror på misstag, eftersom oegentligheter kan innefatta agerande i maskopi, förfalskning, avsiktliga utelämnanden, felaktig information eller åsidosättande av intern kontroll.
- skaffar vi oss en förståelse av den del av bolagets interna kontroll som har betydelse för vår revision för att utforma granskningsåtgärder som är lämpliga med hänsyn till omständigheterna, men inte för att uttala oss om effektiviteten i den interna kontrollen.
- utvärderar vi lämpligheten i de redovisningsprinciper som används och rimligheten i styrelsens uppskattningar i redovisningen och tillhörande upplysningar.
- drar vi en slutsats om lämpligheten i att styrelsen använder antagandet om fortsatt drift vid upprättandet av årsredovisningen. Vi drar också en slutsats, med grund i de inhämtade revisionsbevisen, om det finns någon väsentlig osäkerhetsfaktor som avser sådana händelser eller förhållanden som kan leda till betydande tvivel om bolagets förmåga att fortsätta verksamheten. Om vi drar slutsatsen att det finns en väsentlig osäkerhetsfaktor, måste vi i revisionsberättelsen fästa uppmärksamheten på upplysningarna i årsredovisningen om den väsentliga osäkerhetsfaktorn eller, om sådana upplysningar är otillräckliga, modifiera uttalandet om årsredovisningen. Våra slutsatser baseras på de revisionsbevis som inhämtas fram till datumet för revisionsberättelsen. Dock kan framtida händelser eller förhållanden göra att ett bolag inte längre kan fortsätta verksamheten.
- utvärderar vi den övergripande presentationen, strukturen och innehållet i årsredovisningen, däribland upplysningarna, och om årsredovisningen återger de underliggande transaktionerna och händelserna på ett sätt som ger en rättvisande bild.

Vi måste informera styrelsen om bland annat revisionens planerade omfattning och inriktning samt tidpunkten för den. Vi måste också informera om betydelsefulla iakttagelser under revisionen, däribland de eventuella betydande brister i den interna kontrollen som vi identifierat.

Penneo dokumentnyckel: P3HC0-ÅKEMI-FVOP8-NC88V-Y8NU5-V8BGE

Building a better working world

Rapport om andra krav enligt lagar och andra författningar

Uttalanden

Utöver vår revision av årsredovisningen har vi även utfört en revision av styrelsens förvaltning av CMNRE Rocky HoldCo AB för år 2021 samt av förslaget till dispositioner beträffande bolagets vinst eller förlust.

Vi tillstyrker att bolagsstämman disponerar vinsten enligt förslaget i förvaltningsberättelsen och beviljar styrelsens ledamöter ansvarsfrihet för räkenskapsåret.

Grund för uttalanden

Vi har utfört revisionen enligt god revisionssed i Sverige. Vårt ansvar enligt denna beskrivs närmare i avsnittet *Revisorns ansvar*. Vi är oberoende i förhållande till CMNRE Rocky HoldCo AB enligt god revisorssed i Sverige och har i övrigt fullgjort vårt yrkesetiska ansvar enligt dessa krav.

Vi anser att de revisionsbevis vi har inhämtat är tillräckliga och ändamålsenliga som grund för våra uttalanden.

Styrelsens ansvar

Det är styrelsen som har ansvaret för förslaget till dispositioner beträffande bolagets vinst eller förlust. Vid förslag till utdelning innefattar detta bland annat en bedömning av om utdelningen är försvarlig med hänsyn till de krav som bolagets verksamhetsart, omfattning och risker ställer på storleken av bolagets egna kapital, konsolideringsbehov, likviditet och ställning i övrigt.

Styrelsen ansvarar för bolagets organisation och förvaltningen av bolagets angelägenheter. Detta innefattar bland annat att fortlöpande bedöma bolagets ekonomiska situation och att tillse att bolagets organisation är utformad så att bokföringen, medelsförvaltningen och bolagets ekonomiska angelägenheter i övrigt kontrolleras på ett betryggande sätt.

Revisorns ansvar

Vårt mål beträffande revisionen av förvaltningen, och därmed vårt uttalande om ansvarsfrihet, är att inhämta revisionsbevis för att med en rimlig grad av säkerhet kunna bedöma om någon styrelseledamot i något väsentligt avseende:

- företagit någon åtgärd eller gjort sig skyldig till någon försummelse som kan föranleda ersättningsskyldighet mot bolaget, eller
- på något annat sätt handlat i strid med aktiebolagslagen, årsredovisningslagen eller bolagsordningen.

Vårt mål beträffande revisionen av förslaget till dispositioner av bolagets vinst eller förlust, och därmed vårt uttalande om detta, är att med rimlig grad av säkerhet bedöma om förslaget är förenligt med aktiebolagslagen.

Rimlig säkerhet är en hög grad av säkerhet, men ingen garanti för att en revision som utförs enligt god revisionssed i Sverige alltid kommer att upptäcka åtgärder eller försummelser som kan föranleda ersättningsskyldighet mot bolaget, eller att ett förslag till dispositioner av bolagets vinst eller förlust inte är förenligt med aktiebolagslagen.

Som en del av en revision enligt god revisionssed i Sverige använder vi professionellt omdöme och har en professionellt skeptisk inställning under hela revisionen. Granskningen av förvaltningen och förslaget till dispositioner av bolagets vinst eller förlust grundar sig främst på revisionen av räkenskaperna. Vilka tillkommande granskningsåtgärder som utförs baseras på vår professionella bedömning med utgångspunkt i risk och väsentlighet. Det innebär att vi fokuserar granskningen på sådana åtgärder, områden och förhållanden som är väsentliga för verksamheten och där avsteg och överträdelser skulle ha särskild betydelse för bolagets situation. Vi går igenom och prövar fattade beslut, beslutsunderlag, vidtagna åtgärder och andra förhållanden som är relevanta för vårt uttalande om ansvarsfrihet. Som underlag för vårt uttalande om styrelsens förslag till dispositioner beträffande bolagets vinst eller förlust har vi granskat om förslaget är förenligt med aktiebolagslagen.

CapMan Nordic Real Estate III FCP-RAIF

Consolidated management report

General

CapMan Nordic Real Estate III FCP-RAIF (hereinafter the 'RAIF'), was established on 13 March 2020. The RAIF and its directly and indirectly owned subsidiaries are together referred to as the "Fund" or "Group".

The RAIF is structured as a closed-ended co-ownership of securities (fonds commun de placement) established under and subject to the Luxembourg Law of 23 July 2016.

The management company of the RAIF is CapMan Real Estate Manager S.A. (the "Management Company"). The Management Company has appointed CapMan AIFM Oy as the alternative investment fund manager (the "AIFM") to the RAIF, to carry out the portfolio management, the risk management, the administration, marketing and asset management function of the RAIF.

Investment strategy

The RAIF is being established to invest in a diversified portfolio of real estate and real estate related opportunities located in Sweden, Finland, Denmark and Norway. The objective of the RAIF is to deliver superior risk-adjusted returns through the active hands-on management of properties. The RAIF will seek to provide a gross internal rate of return of over 15% before management fees and carried interest, although there can be no assurance that this return objective will be achieved. The RAIF has in total EUR 563.7 million capital commitments as of 31 December 2021 (2020: EUR 448.7 million). The RAIF held its final closing in March 2021. As of 31 December 2021, EUR 104.3 million was invested and in total EUR 80.4 million committed (2020: EUR 16.3 million invested and EUR 143.8 million committed).

Economic overview

The economic growth in the Nordic region is being supported by stable institutions, policies and practices that are aligned with the common goal of achieving widespread prosperity and sustainable development. Towards the end of 2021 the volatility in political and economic context increased and the Omicron wave resulted the Nordic countries imposing some restrictions on work and leisure activities. Whereas the Covid peak may have passed, with much lower hospitalisation and death rates, the Russian invasion of Ukraine remains a threat to global political stability and financial markets. Currently the longer term effects of the Ukrainian war to the economic development in the Nordics are hard to foresee.

Supply constraints and rising energy costs have seen inflation rates to increase both in the US and Europe. In the US the central bank has announced preparations to increase interest rates in March. Also the ECB, while keeping the interest rates unchanged in their February meeting, has stated preparedness to use its monetary policy tools to fight the inflation. This could also include interest rate increases in 2022. Given the global forces and geopolitical tensions the expectation is for tighter fiscal and monetary policy in 2022. Danske Bank research suggests that an escalation in Russia-Ukraine tensions, and its impact on energy pricing, could add 0.7-1.5% to their baseline Euro inflation forecast of 3.3% in 2022. Wage growth will be a key data point to monitor this year, with some evidence of labour shortages across wider Europe. Before the start of the Ukrainian war, ECB was forecasting close to 3% growth in 2023 and 2024, which could potentially lead to higher interest rates. Now the war in Ukraine may affect the interest rate development as well but the effect is hard to forecast.

However, in the Nordic countries both business and households are relatively well positioned, having built up cash reserves during the pandemic, and unemployment rates have fallen back to 2019 levels.

Consumption demand is consequently expected to remain robust, particularly with pent up demand from leisure and travel activities once restrictions and risks ease. Economic growth forecasts have been lowered but remain above their long-term trends. The very strong final quarter of 2021 was reflected in SEB's February 2022 report, which increased 2021 GDP growth by 0.7% for the Euro zone (up from 4.6% to 5.3%) and by 0.5% for the Nordics (up from 3.7% to 4.2%). However, the 2022 and 2023 forecasts have been trimmed by c. 50 bps for the Euro zone, whereas the Nordic outlook for 2023 improves by 40 bps. These forecasts were made before the war in Ukraine broke out.

GDP change, %	2020	2021	2022	2023
Euro zone	-6.4	5.3	4.0	2.9
Nordic countries	-2.2	4.2	3.3	2.5
Sweden	-2.8	4.6	3.9	2.3
Norway	-2.5	3.7	3.7	1.4
Denmark	-2.1	3.6	4.1	2.5
Finland	-2.9	3.2	3.0	1.6

Sources: OECD, SEB

Sweden

2022 is an election year in Sweden, with the public going to the polls in September. The government has proposed generous compensation to households for high energy cost, and the budget surplus can be used to maintain the recovery. However, the recovery faces headwinds in the form of both increased commodity prices and lower production due to Omicron absence and restrictions. Assuming these are temporary forces, the slowdown is expected to ease after the summer.

After employment fell by 3% in the first wave of the pandemic, the labour market recovered during the second half of 2020. After peaking at 9.4% in June last year unemployment at the end of 2021 stands at 8.8% (down from 9.1% in May). Looking forward, forecasts from SEB indicate unemployment is set to fall to around 7.2% in 2023, and wage growth is forecast to be 2.5% in 2022 and 3.5% in 2023, when some of the long-term collective agreements made in 2020 are due to expire.

House prices increased significantly during the pandemic, as people focused on their living environment while working from home and staycations. This trend is expected to be temporary, but increases of c.2% in real disposable income suggest that forecasts of 5% house price growth in 2022 and 2-3% in 2023 are not unreasonable.

Whereas moderate pay hikes, combined with price pressure on imported goods, have controlled inflation in recent years, supply constraints, increasing wage growth, and energy prices have re-set forecasts for CPIF to 2.4% in 2021 and 3.3% in 2022 (versus previous forecasts of c.1.5%). The Riksbank has made very cautious moves to reduce its expansionary policy. The base rate remained at 0% throughout 2021 but a 25bps increase was added to the 2024 repo rate in the November meeting. Base rates are not expected to increase in the short term, and the Board of the Riksbank has indicated that higher inflation will be tolerated for the time being. Nevertheless, as other central banks increase rates there will be pressure to follow suit. SEB are forecasting that this will happen from H2 2023.

This policy has weakened the SEK relative to other currencies, and will increase the competitiveness of Swedish exported goods and services. The SEK traded at 10.24 to the EUR at the end of 2021, but weakened by 3% to 10.55 by the end of January. The longer term forecast is that SEK will strengthen to 9.70 by the end of 2023.

Denmark

Denmark has been hit by the omicron wave, and this has resulted in some restrictions to leisure facilities during January. However, the economy is showing resilience backed by consumption demand, high levels of household savings, and a strong labour market. The restrictions over the winter are not expected to have a significant impact on growth in 2022, and the Government has already announced an easing of controls from February. 2022 GDP is forecast to be 3.3%, with 2021 coming in at 4%.

Beneficial credit conditions are also underpinning growth, with both households and businesses experiencing easing which is encouraging higher demand for borrowing. Meanwhile savings ratios are also at historic high levels (above 10%) and household confidence has been buoyed by considerable house price inflation in 2021. Consequently, consumption demand is expected to increase by 5.6% in 2022. Unemployment levels have seen some small increases during lockdowns, but the overall trend is falling. The current rate is 5% (down from 6.1% at the end of 2020) and is set to reduce further to below 4% in 2023.

The DKK is pegged to the EUR, and there has been continued appreciation pressure following the Nationalbank's 10 bps rate cut. Subsequently the bank intervened in Q4 2021 by offloading c. DKK 50billion. Further intervention can be expected, but this is unlikely to involve any further interest rate cuts in 2022.

Norway

Activity in the Norwegian economy picked up in 2021 after the sharp fall in spring 2020. At the beginning of 2021, higher infection rates and tighter COVID-related restrictions held back the recovery. Through spring, the pace of vaccination accelerated, and the government managed a gradual re-opening of society. Over the year end and start of 2022 a more severe Covid-19 wave resulted in further national restrictions which has slightly dampened growth forecasts. Nevertheless, Norway is set to post a final figure of 3.9% in 2021 and the highest growth of the Nordic nations in 2022 at 3.7%. The rationale is partly because the latest COVID wave is omicron dominant, with reduced hospitalisation rates observed, hence the government already started easing restrictions in mid-January.

Unemployment has fallen but remains relatively high at 4.3%, with an expectation that it will fall back to 3.9% by the end of 2022. Mainland Norway's GDP is expected to be 3.9% in 2021 and 3.7% in 2022. Due to the pace of the recovery, Norges bank is expected to gradually increase its key rate from the current level of 0.5% to 1.75% by the end of 2023.

The overall 2021 CPI forecast is for an increase of 3.5% - with energy price increases causing a spike at the year end. However, consumers are insulated by high annual wage increases of 3.1% in 2021 and further growth of c.3.5% in 2022 and 2023. Private consumption is consequently expected to drive expansion in 2022, with a 6.6% increase in consumption demand. From 2023 higher interest rates are expected to peg back consumption growth to below 4%.

The NOK has been very weak, plunging to 12 to the EUR at the peak of the oil price war in Q1 2020, before recovering to 10.2 in September 2021. It has subsequently strengthened further in Q4 2021, and was 10.0 at the end of December 2021 and also at the end of January 2022.

Finland

The Finnish economic growth is lagging slightly behind the other Nordic countries, despite large gains in household income. Salary growth was 2.4% in 2021 and is expected to return similar expansion in 2022. Consumption growth has been less of a driver than in other Nordic countries: Finland posted 2.8% in 2021 compared to 4.6% in Denmark; 4.3% in Norway and 4.9% in Sweden.

Households have been cautious despite the relatively mild effects of the pandemic, which was effectively controlled until the end of 2021. In January indoor leisure activities have been restricted, but are now re-opening and GDP growth is expected to be 3% in 2022.

The highest salary growth levels experienced for a decade, together with employment levels regaining ground back up to their 2019 peak, suggests that the Finnish economy has significant upside potential.

Capital spending is also increasing: a significant pipeline of new homes is expected to be delivered in 2022 with the construction industry benefitting accordingly. Furthermore, business confidence levels are high and lending levels suggest investment is on the rise. Companies are continuing to take advantage of low interest rates to drive their expansion plans.

Another positive feature of the Finnish economy is that export growth of 5.6% is expected in 2022. Meanwhile, import growth has been controlled. This trend is set to continue with order books at record levels.

Real Estate Market Overview

Of the three major macro-economic themes (shifts in demographics; new technology; and urbanization "DTU") the Fund has focused on the growth of capital cities, which create interesting opportunities in the residential, retail, logistics and office sectors.

The Nordic transaction volume reached EUR 72 billion in 2021, which represents a 67% increase on 2020, according to Pangea. Sweden accounted for the largest component (EUR 35billion) and the highest year-on-year increase (93%). As mentioned in our last report, the largest individual transaction was Heimstaden's acquisition of the Akelius portfolio in September, accounting for EUR 9 billion. International buyers continued to represent a significant proportion of transaction totals, particularly in Denmark (71%) and Finland (53%), whereas in both Sweden and Finland c.80% of capital was from domestic investors.

Stockholm has been a key market for the Fund, but is characterised by very low vacancy rates in the CBD, limited new supply, and robust tenant demand in established submarkets. The volume of capital chasing limited stock has made competing for deals extremely challenging for investors with prudent underwriting assumptions and limited gearing. Attractive borrowing rates, and the prospect of substantial rent reversions in the best submarkets, have driven investment activity. Whereas COVID-19 has brought an end to the cycle, the lower interest rate environment and "flight to quality" has seen prime yields decline further in 2020 and 2021, albeit maintaining an attractive premium to key rates.

In Copenhagen, Helsinki and Oslo the office markets all experienced strong demand and rental growth over the last 3 years, but stock selection is key and efficient modern buildings, which can be configured for multi-tenant occupation (or converted for residential or hotel use) has been the focus of our strategy.

New infrastructure in the Nordic capital cities is creating interesting opportunities around key transport hubs, e.g. flexible multi-purpose work units. Meanwhile, the population demographics, supported by the well-funded public services in the Nordic countries, provided an attractive context for emerging "living" sectors such as senior housing and city-centre micro apartments.

Stockholm

Capital markets – Highest transaction volume ever reaching SEK 350billion in 2021, driven by a very strong second half of the year. Foreign buyers accounted for 21% of the total volume. Sector wise, focus on residential and public properties accounting for over 50% of the total investment volume. Fewer deals in Stockholm and many geographically spread portfolios, particularly in the residential and public property segment.

Office Rents – The pandemic created a slowdown of the economy which, combined with record low take-up, put pressure on net rents lowering them in the Stockholm CBD by an estimated 4%. In 2022 slight pressure on the rental market in the CBD is expected to continue, but due to the low vacancy levels and the rebound of the economy, rents are expected to have now stabilised, and are forecast to increase in 2022 and 2023. Prime office rents in CBD are currently at SEK 7,500 psqm.

Office Vacancy rates – Stockholm office vacancy rates have increased during the pandemic from around 2.3% in early 2020 to 4.4% in Q1 2021. The office vacancy in prime Stockholm suburbs c.6.5%.

Office Yields – The prime office yield estimate is at 3.25% for CBD and has thereby remained stable during the last year. Prime office yields outside the city centre have also remained firm and are currently 4.0%.

Copenhagen

Capital markets – 2021 has been a record year for commercial real estate transaction in Denmark. The full year total of EUR 14 billion represents a 51% increase on the previous record of EUR 9.3 billion recorded in 2018. The residential market has continued to be the most popular real estate segment traded. Copenhagen residential rent levels have been climbing relentlessly for several years, but the rate of increase is starting to slow down, especially for larger apartments (>99 sqm) as these have now reached a high that only a minority of prospective residential tenants can (or are prepared to) pay. Prime market rents for new residential properties in Copenhagen is DKK 2,100 psqm, while market rents in secondary locations are DKK 1,675 psqm.

Office Vacancy rates – despite the increase in numbers of people working from home, COVID-19 has had relatively little effect on the office market. CBD vacancy rates remain tight at c.3.9%.

Office Rents – Copenhagen office rents, unlike other Nordic capital cities, have not registered and dip during the pandemic. However, historically rental levels are lower and less volatile than in other cities. Current prime rents are around DKK 2,200 per sqm and are forecast to increase steadily in 2022 and 2023.

Office Yields – Prime yields in Copenhagen CBD ranges from 3.25% - 3.50%, while other submarkets are trading higher, but also at 10-year lows. The low long-term interest environment is likely to maintain downward pressure on the best properties, whereas secondary stock yield is expected to remain stable during 2022. (source: Pangea, JLL, C&W and Colliers).

Helsinki

Capital markets – Finnish transaction volumes continued to be relatively strong in 2021 with Pangea reporting a total of EUR 7.4billion (2017 has been the record year to-date at EUR 10.2billion). Q4 was the most active quarter in 2021, contributing EUR 3.4 billion to the total. Domestic pension funds, listed property companies, and international investors have continued to actively look for deals.

Office Rents – prime office rents in the CBD stabilised at EUR c.420 - 460 per sqm per annum, as supply of flexible and efficient space has been limited, and the development pipeline has been very low. 200,000 sqm of new development space completed in the HMA in 2018-2020 according to Cushman & Wakefield, but new supply is now expected to decline significantly, with the new construction shifting towards the residential sector. Outside of the CBD prime achievable levels have typically been in the EUR 225-275 per sqm per annum range, with the outlook more stable than in 2020 and 2021.

Office Vacancy rates – in the prime City Centre the vacancy rate fell to 3.8% at the end of 2019 - having been as high as 10% in 2013. Owners have reduced over-supply by undertaking conversions of outdated stock to residential units. In H2 2020 JLL reported vacancy rate of 5.6% in the Helsinki CBD.

Office Yields – after a strong downward trend in office yields in the past 5 years, CBRE reports that prime CBD office yields increased slightly from 3.25% in Q1 2020 to 3.5% in Q4 2020. Pangea are also reporting 3.5% in their January 2022 analysis. For prime office outside CBD, there is a similar trend, from 4.0% in Q1 2020 to 4.20% in Q4 2020. Major provincial prime office yields also backed up slightly in the same time period, from 5.25% to 5.75%.

Oslo

Capital markets – The investment volume for the first 3 quarters of 2021 was registered at almost EUR 10 billion (total investment volume in 2020 amounted to EUR 9.3 billion) according to Pangea and Malling & Co. Q4 increased this figure by EUR 5.8 billion, making 2021 a record year, some 26% above the previous highest total of EUR 12.5 billion recorded in 2015.

Office Rents – The average of signed office rents in Oslo increased by 9% from Q1 to Q2 2021, according to Arealstatistikk. Rents appear to have had a relatively flat development in the first half of 2021 but are now forecast to increase once again in 2022 and 2023. Prime CBD office rents are according to Malling & Co currently at NOK 5,600 psqm, which was in line with the estimated prime rents at the end of 2020.

Office Vacancy rates – Oslo office vacancy rates increased during the Pandemic from around 5% to 7% in March 2021, but has slightly come down in H2 2021 to 6.8%. 180,000 sqm office space was signed in Q2 2021, which is comparable to historical Q2 volumes. The H2 volume indicates that the letting activity is back to normal levels and likely will continue to improve in 2022.

Office Yields – Prime office yields in CBD have been stable at record low 3.25% since Q4 2020, while normal office yields have decreased approximately 15 bps from 4.00% to 3.85%, narrowing the gap between prime and normal even further. Also, in the out of town office areas, prime yields and normal yields have recently compressed 10-15 bps according to Malling & Co. Pangea are forecasting that yields will start to expand from 2022 as Norges Bank has taken the first moves to increase base rates.

Overview of the activity in 2021

During 2021 invested in total EUR 82.8 million in 4 new and 3 existing investments (2020: EUR 11.5 million) The Fund has not yet made any distributions to the investors. Remaining equity as of 31 Dec 2021 was EUR 459.3 million (2020: EUR 432.8 million).

The new investments made in 2021 include:

- Jaguar, acquisition of a mixed-use office and former car showroom in Stockholm, Sweden.
- Rocky, acquisition of a mixed-use portfolio of 3 properties in Stockholm, Sweden
- Städet, acquisition of an office property in Stockholm, Sweden
- Tool, acquisition of an industrial property in Köping, Sweden

In addition to the new investments, one add-on investment was made to the CC Residential JV, a joint venture for residential development scheme with CASA in Denmark. New equity was also invested to Lindevangs Alle to finance the on-going refurbishment works.

During 2021 the revenues amounted to TEUR 5,082 (2020: TEUR 15) and the net rental income was TEUR 2,935 (2020: TEUR 6). The fair value gain of the properties was TEUR 13,586 (2020: TEUR 2,340). Net result attributable to Unitholders after distributions for the year was TEUR 4,474 (2020:

TEUR -1,458). As of December 31, 2021, the Net assets attributable to the unitholders of the Fund was TEUR 107,215 (2020: TEUR 14,958).

Outlook for the Group

The Fund continues to actively seek and execute new investment opportunities in accordance with its strategy.

Sustainable Finance Disclosure Regulation (SFDR)

During the financial period of 2021, the Fund was classified as an Article 6 fund according to the EU's Sustainable Finance Disclosure Regulation, SFDR (EU 2019/2088) meaning that the Fund does not take into account the EU criteria for environmentally sustainable economic activities.

Auditors

The consolidated financial statements of CapMan Nordic Real Estate III FCP-RAIF are audited by Ernst & Young S.A., Luxembourg.

Acquisition of Company units

No Company' units were held by the Company itself or by its subsidiaries or by a person acting in his own name but on behalf of these subsidiaries.

Subsequent events

In January 2022 the MDKK 30 loan in CentrumKontorerne RK 2020 ApS (the subsidiary of CC Residential) has been renewed with Nykredit.

On 21 January 2022 the upstream merger in Städet subgroup went through - CMNRE Städet AB merged into CMNRE Haggvik Holdco AB.

On 1 March 2022 the second closing of Campus was finalised. The Fund repaid the liabilty due to Seller in the amount of TDKK 82,250 (TEUR 11,058) and related stamp duty in the amount of TDKK 509 (TEUR 0,6). The payment was financed partly with additional equity drawdown made on 24 February 2022 from the Fund investors for the amount of TDKK 56,303 (TEUR 7,570) and JV partner for the amount of TDKK 9.935 (TEUR 1,336) and partly with loan drawn from Nykredit for the for TDKK 47,045 (TEUR 6,325). The cash remaing after paying the price to the Seller was kept by the Fund to cover remaing transaction cost and property expenditures.

In April 2022 the Fund has closed one new acquisition of Verdict portfolio, a mixed-use office building in Glostrup, Greater Copenhagen, Denmark.

On 24 February 2022, Russia began a full-scale invasion of Ukraine that is the largest conventional military attack on a sovereign state in Europe since World War II. In response, a large number of countries (including EU, the US and UK) began applying significant further sanctions on Russia with the aim of crippling the Russian economy. The conflict itself and the sanctions imposed in response is estimated to pose a substantial economic risk for the region and internationally. Based on preliminary portfolio analysis, the direct impact to Group's investments is very limited, but the conflict, fluctuations in foreign exchange rates and commodity prices, and the potential to adversely impact global economies, has driven a sharp increase in volatility across markets. The Board of Managers regards these events for the Group as non-adjusting events after the reporting period.

Although neither the Group's performance and going concern nor operations, at the date of the approval of these consolidated financial statements, have been significantly impacted by the above, the Board of Directors of the Management company continues to monitor the evolving situation and its impact on the financial position and operations of the Group.

Independent auditor's report

To the Unitholders of
CapMan Nordic Real Estate III FCP-RAIF
1B, Heienhaff
L-1736 Senningerberg

Opinion

We have audited the consolidated financial statements of CapMan Nordic Real Estate III FCP-RAIF (the "Fund"), which comprise the consolidated statement of financial position as at 31 December 2021, and the consolidated statement of comprehensive income, the consolidated statement of changes in net assets and consolidated statement of cash flows for the year then ended, and the notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements give a true and fair view of the financial position of the Fund as at 31 December 2021, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the consolidated financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the consolidated financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Building a better working world

Other information

The Board of Directors of the CapMan Real Estate Manager S.A. (the "Management Company") is responsible for the other information. The other information comprises the information included in the consolidated management report but does not include the consolidated financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Management Company for the consolidated financial statements

The Board of Directors of the Management Company is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with IFRS as adopted by the European Union, and for such internal control as the Board of Directors of the Management Company determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Board of Directors of the Management Company is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Management Company either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

A member firm of Ernst & Young Global Limited

Building a better working world

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Management Company.
- Conclude on the appropriateness of Board of Directors of the Management Company use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities and business activities within the Fund to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Fund audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

CapMan Nordic Real Estate III FCP-RAIF

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS AT 31 DECEMBER 2021

1. General information

CapMan Nordic Real Estate III FCP-RAIF (hereinafter the "RAIF"), was established on 13 March 2020 by CapMan Real Estate Manager S.A., (hereinafter the "Management Company"). The RAIF is structured as a closed-ended co-ownership of securities (fonds commun de placement, FCP) established under and subject to the Luxembourg Law of 23 July 2016 (hereinafter the "RAIF law").

CapMan Nordic Real Estate III FCP-RAIF is being established to invest in a diversified portfolio of real estate and real estate related opportunities in Sweden, Finland, Denmark and Norway ("Nordic" or the "Nordic Region"). The objective of the RAIF is to deliver superior risk-adjusted returns through the active hands-on management of properties.

The consolidated financial statements for the year ended 31 December 2021 include the RAIF and its directly and indirectly owned subsidiaries (together referred to as the "Fund" or the "Group").

The Fund's financial year starts on 1 January and ends on 31 December of each year. Exceptionally, the first Fund`s financial period started on 13 March 2020 (date of formation) and ended on 31 December 2020.

The Fund's consolidated financial statements are prepared in Euros (EUR) and presented in thousand Euros (TEUR).

The Fund prepares IFRS consolidated NAV on quarterly basis for investors reporting purposes.

The RAIF has been established for a limited period of 7 years, which is counted from the final closing date 5 March 2021, subject to two additional one year extensosions at the option of the Management Company, and subject, in the case of the second one year extension, to obtaining the consent of the Advisory Board to such extension.

These consolidated financial statements have been approved for issue by the Board of Directors of the Management Company on 27 April 2022.

2. Basis of preparation

The consolidated financial statements of the Fund have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board and adopted by the European Union.

The consolidated financial statements have been prepared under the historical cost convention, except for the measurement of investment properties at fair value, derivative financial instruments that have been measured at fair value.

As at 31 December 2021 the value of current liabilities (TEUR 31,345) exceeds 2.5 times the value of current assets (TEUR 12,910). The main positions of current liabilities that creating this disproportion are as follows:

- the loan to Spar Nord Bank A/S relates to subsidiary CC Residentail JV K/S for the nominal amount of MDKK 30 (TEUR 5,431). The loan has been renewed in January 2022 (Note 25);
- the loan to Nordea Bank relates to subsidiary Lindenangs Alle 8-12 for the nominal amount MDKK 40,4 (TEUR 4,034). The management concluded that conditions for refinancing the loan to a long-term period were met;
- due purchase price in the amount of TDKK 82,250 (TEUR 11,061) relates to CC Residential JV's acquisition of Campus and was paid on 1 March 2022 (Note 25).

Taking above into consideration, the management believes that there is no risk for further operation of the Fund. Therefore, the Fund has prepared the financial statements on the basis that it will continue to operate as a going concern.

3. Changes in accounting policies and disclosures

The accounting policies adopted, and methods of computation followed are consistent with those of the previous financial year, except for items disclosed below. There were several new and amendments to standards and interpretations which are applicable for the first time in 2021, but either not relevant or do not have an impact on the consolidated financial statements of the Fund. The Fund has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

The following standards, amendments and interpretations to published standards became effective in 2021, are relevant and has been adopted by the Fund:

Amendments to IFRS 16 Leases: *Covid-19 Related Rent Concessions*

On 28 May 2020, the IASB issued Covid-19-Related Rent Concessions - amendment to IFRS 16 *Leases* The amendments provide relief to lessees from applying IFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the Covid-19 pandemic. As a practical expedient, a lessee may elect not to assess whether a Covid-19 related rent concession from a lessor is a lease modification. A lessee that makes this election accounts for any change in lease payments resulting from the Covid-19 related rent concession the same way it would account for the change under IFRS 16, if the change were not a lease modification.

The amendment was intended to apply until 30 June 2021, but as the impact of the Covid-19 pandemic is continuing, on 31 March 2021, the IASB extended the period of application of the practical expedient to 30 June 2022.The amendment applies to annual reporting periods beginning on or after 1 April 2021. However, the Fund has not received Covid-19-related rent concessions, but plans to apply the practical expedient if it becomes applicable within allowed period of application.

Amendments to IFRS 9, IAS 39, IFRS 7, IFSR 4 and IFRS 16 *Interest Rate Benchmark Reform – Phase 2*

On 27 August 2020, the IASB issued the Phase 2 of the *Interest Rate Benchmark Reform* (Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16) effective 1 January 2021. The objective of the Amendments is to assist entities with providing useful information to users of financial statements and to support preparers in applying IFRS Standards when changes are made to contractual cash flows or hedging relationships, as a result of the transition from an IBOR benchmark rate to alternative benchmark rates, in the context of the ongoing risk-free rate reform.

The Fund assessed that these amendments did not have any significant impact on the consolidated financial statements.

4. Standards issued but not yet effective

New and amended standards and interpretations issued but not effective up to the date of issuance of the Fund's financial statements are disclosed below, if they are expected to have an impact on the Fund's consolidated financial statements.

The Fund intends to adopt these standards, if applicable, when they become effective. The adoption of these revised standards and interpretations are not expected to have a material effect on the financial performance or financial position of the Fund.

Amendments to IAS 1: Classification of Liabilities as Current or Non-current

In January 2020, the IASB issued amendments to paragraphs 69 to 76 of IAS 1 to specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification

The amendments are effective for annual reporting periods beginning on or after 1 January 2023 and must be applied retrospectively. However, in November 2021, the IASB published an exposure draft which included a proposal to defer the effective date to no earlier than 1 January 2024.
The Fund is monitoring the developments and is assessing the impact the amendments will have on its current accounting policies and whether the Fund may wish to re-assess covenants in its existing loan agreements or whether existing loan agreements may require renegotiation.

Amendments to IFRS 3 – Business combinations

In May 2020, the IASB issued Amendments to IFRS 3 Business Combinations - Reference to the Conceptual Framework. The amendments are intended to replace a reference to the Framework for the Preparation and Presentation of Financial Statements, issued in 1989, with a reference to the Conceptual Framework for Financial Reporting issued in March 2018 without significantly changing its requirements.

The Board also added an exception to the recognition principle of IFRS 3 to avoid the issue of potential 'day 2' gains or losses arising for liabilities and contingent liabilities that would be within the scope of IAS 37 or IFRIC 21 Levies, if incurred separately.

At the same time, the Board decided to clarify existing guidance in IFRS 3 for contingent assets that would not be affected by replacing the reference to the Framework for the Preparation and Presentation of Financial Statements. The amendments are effective for annual reporting periods beginning on or after 1 January 2022 and apply prospectively.

Amendments to IAS 37 – Onerous Contracts – Costs of Fulfilling a Contract

In May 2020, the IASB issued amendments to IAS 37 to specify which costs an entity needs to include when assessing whether a contract is onerous or loss-making. The amendments apply a "directly related cost approach". The costs that relate directly to a contract to provide goods or services include both incremental costs and an allocation of costs directly related to contract activities. General and administrative costs do not relate directly to a contract and are excluded unless they are explicitly chargeable to the counterparty under the contract. The amendments are effective for annual reporting periods beginning on or after 1 January 2022.

Annual Improvements to IFRS Standards 2018-2020 Cycle

- IFRS 1 *First-time Adoption of International Financial Reporting Standards* – Subsidiary as a first-time adopter

The amendment permits a subsidiary that elects to apply paragraph D16(a) of IFRS 1 to measure cumulative translation differences using the amounts reported by the parent, based on the parent's date of transition to IFRS.

This amendment is also applied to an associate or joint venture that elects to apply paragraph D16(a) of IFRS 1. The amendment is effective for annual reporting periods beginning on or after 1 January 2022 with earlier adoption permitted.

- IFRS 9 *Financial Instruments* – Fees in the '10 per cent' test for derecognition of financial liabilities

  The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf. An entity applies the amendment to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment.

  The amendment is effective for annual reporting periods beginning on or after 1 January 2022 with earlier adoption permitted. The Fund will apply the amendments to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment. The amendments are not expected to have a material impact on the Fund.

Definition of Accounting Estimates - Amendments to IAS 8

In February 2021, the IASB issued amendments to IAS 8, in which it introduces a definition of 'accounting estimates'. The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. Also, they clarify how entities use measurement techniques and inputs to develop accounting estimates.

The amendments are effective for annual reporting periods beginning on or after 1 January 2023 and apply to changes in accounting policies and changes in accounting estimates that occur on or after the start of that period. Earlier application is permitted as long as this fact is disclosed.

Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement

In February 2021, the IASB issued amendments to IAS 1 and IFRS Practice Statement 2 Making Materiality Judgements, in which it provides guidance and examples to help entities apply materiality judgements to accounting policy disclosures. The amendments aim to help entities provide accounting policy disclosures that are more useful by replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies and adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures.

The amendments to IAS 1 are applicable for annual periods beginning on or after 1 January 2023 with earlier application permitted. Since the amendments to the Practice Statement 2 provide non-mandatory guidance on the application of the definition of material to accounting policy information, an effective date for these amendments is not necessary.

No other new standards, amendments to standards, or interpretations issued but not effective are expected by management to have a material impact on the Fund's consolidated financial statements.

5. Summary of significant accounting policies

The principal accounting policies adopted in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied during the year.

5.A. Basis of consolidation

The consolidated financial statements of the Fund include the accounts of the Fund and its subsidiaries listed in Note 22.

Subsidiaries are all entities (including structured entities) over which the Fund has the control. The Fund controls an entity when it is exposed to or has right to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Specifically, the Fund controls an entity if the Fund has:

- Power over the entity (i.e., existing rights that give it the current ability to direct the relevant activities of the entity)
- Exposure, or rights, to variable returns from its involvement with the entity
- The ability to use its power over the entity to affect its returns

Generally, there is a presumption that a majority of voting rights results in control.

Subsidiaries are fully consolidated from the date on which control is transferred to the Fund. They are deconsolidated from the date that control ceases.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Fund and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

All the Fund entities have December 31 as their year end. Consolidated financial statements are prepared using uniform accounting policies for like transactions. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Fund.

Inter-company transactions, balances and unrealised gains on transactions between Fund companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. When necessary, amounts reported by subsidiaries have been adjusted to conform with the Fund accounting policies.

Transactions with non-controlling interests that do not result in loss of control are accounted for as net assets transactions – that is, as transactions with the owners in their capacity as owners. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in changes in net assets.

Gains or losses on disposals to non-controlling interests are not recorded in the consolidated statement of comprehensive income.

When the Fund ceases to have control, any retained interest in the entity is remeasured to its fair value at the date when control is lost, with the change in carrying amount recognised in the consolidated statement of profit and loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Fund had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

5.B. Property acquisition and business combinations

Where property is acquired, via corporate acquisitions or otherwise, management considers the substance of the assets and activities of the acquired entity in determining whether the acquisition represents the acquisition of a business.

Busines combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, which is measured at acquisition date fair value, and the amount of any non-controlling interests in the acquiree. For each business combination, the Fund elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included in administrative expenses.

For acquisitions of subsidiaries not meeting the definition of a business, the Fund allocates the cost between the individual identifiable assets and liabilities in the Fund based on their relative fair values at the date of acquisition. Such transactions or events do not give rise to goodwill. Acquisition related costs are expensed as incurred.

5.C. Non-current assets held for sale

The Fund classifies non-current assets (principally investment property) and disposal groups as held for ale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Non-current assets and disposal groups classified as held for sale (except for investment property measured at fair value) are measured at the lower of their carrying amount and fair value less costs to sell. Costs to sell are the incremental costs directly attributable to the disposal of an asset (disposal group), excluding finance costs and income tax expense.

The criteria for held for sale classification is regarded as met only when the sale is highly probable, and the asset or disposal group is available for immediate sale in its present condition. Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that the decision to sell will be withdrawn. Management must be committed to the plan to sell the asset and the sale is expected to be completed within one year from the date of the classification.

Investment property held for sale continues to be measured at fair value. Assets and liabilities classified as held for sale are presented separately in the statement of financial position.

5.D. Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of each of the Fund's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in Euros, which is the functional currency of the Fund and the Fund's presentation currency. The Fund uses the direct method of consolidation and on disposal of a foreign operation, the gain or loss that is reclassified to profit or loss reflects the amount that arises from using this method.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated profit or loss.

Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented net in the consolidated statement of profit and loss within finance costs and finance income respectively, unless they are capitalised as explained in Note 5.L. ("Borrowing costs"). All other foreign exchange gains and losses are presented net in the statement of other comprehensive income.

(iii) Translation to presentation currency

The results and financial position of all the Fund entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

a) assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that financial position;
b) income and expenses for each statement of comprehensive income are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions); and
c) all resulting exchange differences are recognised in the other comprehensive income.

On the disposal of a foreign operation (that is, a disposal of the Fund's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation) all of the exchange differences accumulated in unitholder in respect of that operation attributable to the unitholder of the Fund are reclassified to consolidated statement of profit and loss.

In the case of a partial disposal that does not result in the Fund losing control over a subsidiary that includes a foreign operation, the proportionate share of accumulated exchange differences are re-attributed to non-controlling interests and are not recognised in consolidated statement of comprehensive income.

The foreign currency exchange rates used for the purpose of preparation of this consoldiated financial statements were:

2021

Company	Currency	Average	Closing
	DKK	7.437	7.4363
	NOK	10.1631	9.9888
	SEK	10.1463	10.2503

2020

Company	Currency	Average	Closing
	DKK	7.4542	7.4409
	NOK	10.7228	10.4703
	SEK	10.4848	10.5713

5.E. Investment property

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Fund entities, is classified as investment property. Investment property also includes property that is being constructed or developed for future use as investment property.

Investment property comprises residential and office property that are not occupied substantially for use by, or in the operations of, the Fund, nor for sale in the ordinary course of business, but are held primarily to earn rental income and capital appreciation. These buildings are substantially rented to tenants and not intended to be sold in the ordinary course of business.
Investment properties are measured initially at cost, including transaction costs. Transaction costs include only direct acquisition costs linked to due diligence costs such as legal costs, external valuer fees and tax structuring fees.
Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gains or losses arising from changes in the fair values of investment properties are included in profit or loss in the period in which they arise, including the corresponding tax effect.

For the purposes of these financial statements, in order to avoid double counting, the fair value reported in the financial statements in the case of investment property held under a lease is increased by the carrying amount of any liability to the head lessor that has been recognised in the statement of financial position as a finance lease obligation.
Fair value is based on active market prices, adjusted, if necessary, for any difference in the nature, location or condition of the specific asset. If this information is not available, the Fund uses alternative valuation methods, such as recent prices on less active markets or discounted cash flow projections.

Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the item will flow to the Fund and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to the consolidated statement of profit and loss during the financial period in which they are incurred.

Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Fund accounts for such property under property, plant and equipment up to the date of change in use.

Investment properties are derecognised either when they have been disposed of (i.e., at the date the recipient obtains control) or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in profit or loss in the period of derecognition. In determining the amount of consideration from the derecognition of investment property the Fund considers the effects of variable consideration, existence of a significant financing component, non-cash consideration, and consideration payable to the buyer (if any).

5.F. Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

a) Financial Assets

(i) Initial recognition and measurement

Financial assets are classified at initial recognition, and subsequently measured at amortised cost, fair value through other comprehensive income, or fair value through profit or loss (FVPL).

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Fund's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Fund has applied the practical expedient, the Fund initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. As the Fund's rent and other trade receivables do not contain a significant financing component or for which the Fund has applied the practical expedient, they are measured at the transaction price determined under IFRS 15.

In order for a financial asset to be classified and measured at amortised cost or fair value through other comprehensive income (OCI), it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Fund's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows.

(ii) Subsequent measurement

For purposes of subsequent measurement, the Fund's financial assets are classified in two categories:

- Financial assets at fair value through profit or loss (derivative financial instruments)
- Financial assets at amortised cost (rent and other trade receivables, contract assets and cash and short-term deposits)

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

This category includes derivative instruments.

Financial assets at amortised cost

For purposes of subsequent measurement, the Fund measures financial assets at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

Since the Fund's financial assets (rent and other trade receivables, cash and short-term deposits) meet these conditions, they are subsequently measured at amortised cost.

(iii) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Fund of similar financial assets) is primarily derecognised (i.e., removed from the Fund's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired, or
- The Fund has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Fund has transferred substantially all the risks and rewards of the asset, or (b) the Fund has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

When the Fund has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Fund continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Fund also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Fund has retained.
Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Fund could be required to repay.

(iv) Impairment

The Fund recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Fund expects to receive, discounted at an approximation of the original effective interest rate.

The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For rent receivables, the Fund applies a simplified approach in calculating ECLs. Therefore, the Fund does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date(i.e., a loss allowance for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default). The Fund has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the tenants and the economic environment.

The Fund considers a financial asset in default following the rules below:

- 1.5% is considered to be in default for receivables overdue less than 30 days
- 7.5% is considered to be in default for receivables overdue 30 to 90 days
- 15% is considered to be in default for receivables overdue more than 90 days

However, in certain cases, the Fund may also consider a financial asset to be in default when internal or external information indicates that the Fund is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Fund. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

b) Financial liabilities

(i) Initial recognition and measurement

The Fund recognises a financial liability when it first becomes a party to the contractual rights and obligations in the contract.

The Fund's financial liabilities comprise interest-bearing loans and borrowings, lease liabilities, derivative financial instruments and trade and other payables. All financial liabilities are initially recognised at fair value and, with the exception of derivative financial instruments, net of directly attributable transaction costs.

Net assets attributable to unitholders
Net assets attributable to unitholders are classified as financial liability due to finite life of the RAIF and the fact that the RAIF is liable to repay capital contribution to each investor on liquidation or termination of the find. The RAIF, however, has an obligation to distribute of the sale proceeds from realization of investments in the course of the life of the RAIF and therefore does not fulfill all IAS32 criteria to classify its units as equity.

(ii) Subsequent measurement

For the purposes of subsequent measurement, all financial liabilities, except derivative financial instruments, are subsequently measured at amortised cost using the effective interest rate (EIR) method. Gains and losses are recognised in profit or loss when the liabilities are derecognised, as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit or loss.

Derivative financial instruments are classified as financial assets at fair value through profit or loss and are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

(iii) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

c) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognised

amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously

5.G. Current and deferred income tax

The RAIF is domicilied in Luxembourg. Under the current laws of Luxembourg, there is no income tax payable by the RAIF. However, an annual subscription tax, at the rate of 0.01% per annum is levied on the Net assets of the RAIF on the last day of each quarter.

For other Fund companies, the tax expense for the period comprises current and deferred tax. Tax is recognised in the consolidated statement of profit and loss, except to the extent that it relates to items recognised directly in other comprehensive income.

Current income tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the statement of financial position date in the countries where the company's subsidiaries operate and generate taxable income.
Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements, except for:

- When the deferred income tax arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss.
- In respect of temporary differences associated with investments in subsidiaries, branches and associates and interests in joint arrangements, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the consolidated statement of financial position date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised to the extent that it is probable that the future taxable profit will be available against which the temporary differences can be utilised.

The carrying value of the Fund's investment property is assumed to be realised by sale at the end of use. The capital gains tax rate applied is that which would apply on a direct sale of the property recorded in the consolidated statement of financial position regardless of whether the Fund would structure the sale via the disposal of the subsidiary holding the asset, to which a different tax rate may apply. The deferred tax is then calculated based on the respective temporary differences and tax consequences arising from recovery through sale.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Fund and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

5.H. Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash at banks and on hand and short-term highly liquid deposits with an original maturity of three months or less, that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above. Outstanding bank overdrafts are presented in borrowings.

The Fund reports cash flows using the indirect method. Interest received and paid is presented within operating cash flows.

5.I. Rent receivables

Rent receivables are recognised at their original invoiced value except where the time value of money is material, in which case rent receivables are recognised at fair value and subsequently measured at amortised cost.

For the purposes of these financial statements, in order to avoid double counting, rent receivables reported in the financial statements do not include the carrying amount of accrued income resulting from the spreading of lease incentives and/or minimum lease payments. These amounts are included in valuation of investment property.

5.J. Tenant deposits

Companies of the Fund obtain deposits from tenants as a guarantee for returning the property at the end of the lease term in a specified good condition. Tenant deposits are initially recognised at fair value and subsequently measured at amortised cost. Any difference between the initial fair value and the nominal amount is included as a component of operating lease income and recognised on a straight-line basis over the lease term.

5.K. Provisions

Provisions are recognised when:

- The Fund has a present legal or constructive obligation as a result of past events;
- It is probable that an outflow of resources will be required to settle the obligation; and
- The amount can be reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as finance cost.

5.L. Borrowing costs

Borrowing costs are expensed as incurred.

5.M. Revenue recognition

Revenue includes rental income and services to tenants including management charges and other expenses recoverable from tenants.

Rental income

The Fund earns revenue from acting as a lessor in operating leases which do not transfer substantially all of the risks and rewards incidental to ownership of an investment property.

Rental income arising from operating leases on investment property is accounted for on a straight-line basis over the lease terms and is included in revenue in the consolidated statement of comprehensive income due to its operating nature, except for contingent rental income which is recognised when it arises.

Initial direct costs incurred in negotiating and arranging an operating lease are recognised as an expense over the lease term on the same basis as the lease income.

Tenant lease incentives are recognised as a reduction of rental revenue on a straight-line basis over the term of the lease. The lease term is the non-cancellable period of the lease together with any further term for which the tenant has the option to continue the lease, where, at the inception of the lease, the Fund is reasonably certain that the tenant will exercise that option.

Amounts received from tenants to terminate leases or to compensate for dilapidations are recognised in the consolidated statement of comprehensive income when the right to receive them arises.

Revenue from services to tenants

For investment property held primarily to earn rental income, the Fund enters into lease agreements that fall within the scope of IFRS 16 via its partnership interest in local entities. These agreements include certain services offered to tenants (i.e., customers) including common area maintenance services (such as cleaning, security, landscaping and snow removal of common areas), as well as other support services (e.g., reception services, catering and other event related services). The consideration charged to tenants for these services includes fees charged based on a percentage of the rental income and reimbursement of certain expenses incurred. These services are specified in the lease agreements and separately invoiced.

The Fund has determined that these services constitute distinct non-lease components (transferred separately from the right to use the underlying asset) and are within the scope of IFRS 15. The Fund allocates the consideration in the contract to the separate lease and revenue (non-lease) components on a relative stand-alone selling price basis.

In respect of the revenue component, these services represent a series of daily services that are individually satisfied over time because the tenants simultaneously receive and consume the benefits provided by the Fund. The Fund applies the time elapsed method to measure progress.

The consideration charged to tenants for these services is based on a percentage of the rental income. The variable consideration only relates to the non-lease component and is allocated to each distinct period of service (i.e., each day) as it meets the variable consideration allocation exception criteria.

The Fund arranges for third parties to provide certain of these services to its tenants. The Fund concluded that it acts as a principal in relation to these services as it controls the specified services before transferring them to the customer. Therefore, the Fund records revenue on a gross basis.

Income arising from expenses recharged to tenants is recognised in the period in which the compensation becomes receivable.

5.N. Dividend

Dividend distribution to the Funds investors is recognised as a liability in the Fund's consolidated financial statements in the period in which the dividends are approved.

5.O. Current versus non-current classification

The Fund presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in the normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period. The terms of the liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

The Fund classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

5.P. Fair value measurements

The Fund measures financial instruments such as derivatives and investment property at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Fund at the measurement date.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Fund uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities, for which fair value is measured or disclosed in the financial statements, are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:
Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements at fair value on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

5.Q. Lease

Fund is the lessor

Lease income from operating leases where the Fund is a lessor is recognised in income on a straight-line basis over the lease term. Initial direct costs incurred in obtaining an operating lease are added to the carrying amount of the underlying asset and recognised as expense over the lease term on the same basis as lease income. The respective leased assets are included in the balance sheet in accordance with their nature. The Fund elected to recognise lease income for variable payment that depends on an index or a rate on a straight-line basis.

At the commencement date, the Fund assesses whether the lessee is reasonably certain to exercise an option to extend the lease or to purchase the underlying asset, or not to exercise an option to terminate the lease. The Fund considers all relevant facts and circumstances that create an economic incentive for the lessee to exercise, or not to exercise, the option, including any expected changes in facts and circumstances from the commencement date until the exercise date of the option.

The Fund makes payments to agents for services in connection with negotiating lease contracts with the Fund's lessees. The letting fees are capitalised within the carrying amount of the related investment property and are amortised over the lease term.

Fund is the lessee

(i) At initial recognition

The Fund acting as lessee recognises a right-of-use asset and a lease liability for all leases with a term of more than 12 months, unless the underlying asset is of low value.

The right-of-use asset is measured initially at it's cost which includes the amount of the initial measurement of the lease liability, any lease payments made at or before the commencement date (less any lease incentives received), any initial direct costs incurred by the Fund; and an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories. The lease liability is measured at the present value of the lease payments that are not paid at the date of the consolidated statement of financial position.

Lease liabilities include the net present value of the following lease payments:
- fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- variable lease payments that depend on an index or rate, initially measured at the applicable index or rate at the lease commencement date;
- the exercise price of a purchase option if the Fund is reasonably certain to exercise that option, or the penalty payable on the exercise of a termination option unless the Fund is reasonably certain not to exercise the option; and
- any amounts expected to be payable under residual value guarantees.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability. Extension and termination options are included in a number of property leases across the Fund. These are used to maximise operational flexibility in terms of managing the investment properties used in the Fund's leasing activities. The majority of extension and termination options held are exercisable only by the Fund and not by the respective lessor. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Fund is using the lessee's incremental borrowing rate, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

(ii) Subsequent measurement

The Fund leases properties that meet the definition of investment property. These right-of-use assets are presented as part of the line item 'Investment property' in the statement of financial position.

The Fund elects to apply the fair value model to measure an investment property that is held as a right–of–use asset. Further details on the measurement of investment property at fair value are provided in Note 8.

The lease liability is measured as follows:
- increasing the carrying amount to reflect interest on the lease liability;
- reducing the carrying amount to reflect the lease payments made; and
- remeasuring the carrying amount to reflect any reassessment or lease modifications, or to reflect revised in-substance fixed lease payments.

Where the Fund is exposed to potential future increases in variable lease payments based on an index or rate, these are not included in the lease liability until they take effect. When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the right-of-use asset. Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

6. Financial risk management

The risk management of the Fund is structured to ensure that the Fund meets its financial targets and to identify potential key risks that could prevent the Fund meeting these targets. The risk management is an ongoing process that commences from the investment analysis phase, when relevant risks related to individual investments and mitigants to those risks are identified, and continues throughout the Fund's ownership. Risk monitoring and reporting takes place at individual investment, portfolio, and Fund level on a regular basis. The risk management process and levels of risk analysed are described below.

6.A. Risk management process

- *Identification:* Key risks related to investments and mitigants to these risks are identified and documented at the investment analysis phase. During the Fund's ownership potential new risks are identified on an ongoing basis.

- *Establishing risk limits:* For those risks that it is possible a risk limit is established to set the acceptable level of risk that can be taken. For some risks it is not possible to set a quantifiable risk limit. Assessing these risks may require more management judgement.

- *Monitoring and measuring:* Risks are monitored and measured regularly. Investment level risks are reported to the board of directors of relevant Special Purpose Vehicles ("SPVs"). Portfolio and Fund level risks are reported to the Management Company board of directors. Monitoring risks is a continuous process and formal risk reporting takes places on quarterly basis, unless more frequent reporting is required.

- *Mitigation:* If the likelihood of a risk exceeds the risk limit or a risk materializes, appropriate actions are taken to mitigate the risk or minimize the effect of the risk.

Levels of risk

- *Fund level risks:* Fund level risks relate to the operations of the Fund itself and are mainly operational and regulatory risks by nature. Regulatory risks relate to the effects of possible changes in the tax, legal and regulatory environment under which the Fund operates.

- *Portfolio level risks:* Portfolio level risks relate mainly to the market risks inherent in the real estate markets which the Fund invests in, such as changes in yields and rent levels and to the performance of real estate markets in general.

- Investment level risks: Investment level risk are risks that relate directly to the individual investments that the Fund makes and can include operational, legal, financial or market risks.

Types of risk

- *Financial risks:* Financial risks are risks arising from financial instruments to which the Fund is exposed during or at the end of the reporting period. Financial risk comprises market risk which is comprised of three types of risk: foreign exchange risk, interest rate risk, credit risk and liquidity risk.

- *Regulatory and legal risks:* Regulatory and legal risks are risks arising from changes in legislation and regulations in the operating environment of the Fund or its investments.

- *Operational risks:* Operational risks are risks relating to the general private equity real estate Fund and property businesses that are not classified market, financial and regulatory and legal risks. These are risks that relate to the general underlying business that the Fund operates in.

6.B. Financial risk factors

The Fund's principal financial liabilities, other than derivatives, are loans and borrowings. The main purpose of the Fund's loans and borrowings is to finance the acquisition and development of its property portfolio. The Fund has rent and other trade receivables, trade and other payables and cash and short-term deposits that arise directly from its operations.

The Fund is exposed to market risk (currency risk, interest rate risk, price risk), credit risk , liquidity risk.

The Fund's Managing company oversees the management of these risks. The Board of Directors of a Managing Company reviews and agrees policies for managing each of these risks which are summarised below.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises two types of risks: interest rate risk and currency risk. The financial instruments held by the Fund that are affected by market risk are principally loans and borrowings and the derivative financial instruments.
Limit on exposure to currency and interest rate risk is set by management generally at the time of investment decision. However, the use of this approach does not prevent losses outside of these limits in the event of more significant market movements.

The sensitivity analyses have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of debt and derivatives and the proportion of financial instruments in foreign currencies are all constant and on the basis of the hedge designations in place at 31 December 2021. The analyses exclude the impact of movements in market variables on the non-financial assets and liabilities of foreign operation.

The following assumptions have been made in calculating the sensitivity analyses:

- The sensitivity of the relevant statement of profit or loss item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at 31 December 2021.
- The sensitivity of equity is calculated by considering the effect of any associated cash flow hedges and hedges of a net investment in a foreign operation at 31 December 2021 for the effects of the assumed changes of the underlying risk.

Sensitivities to market risks included below in section (i) are based on a change in one factor while holding all other factors constant. In practice, this is unlikely to occur, and changes in some of the factors may be correlated - for example, changes in interest rate and changes in foreign currency rates.

(i) Foreign exchange risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Fund's exposure to the risk of changes in foreign exchange rates relates primarily to the Fund's operating activities (when revenue or expense is denominated in a foreign currency) and the Fund's net investments in foreign subsidiaries.
The Fund operates internationally and is exposed to foreign exchange risk, primarily with respect to the Swedish crowns, Norwegian crowns and to the Danish crowns which are local functional currencies, but applies matching principle whereby it settles liabilities denominated in currency with cash from their own operations in that currency (natural hedge).

The Fund's financial assets and liabilities are included in the table below, categorised by currency, but disclosed at their carrying amount (in TEUR).

Financial assets, TEUR	EUR	DKK	NOK	SEK	Total (TEUR)
Rent receivables	-	-	8	513	521
Derivative financial instruments	-	-	78	289	367
Other financial assets	1,130	0	16	167	1,313
Cash and cash equivalents	764	3,881	1,072	4,131	9,848
Total financial assets	**1,893**	**3,881**	**-1,174**	**-5,100**	**12,049**

Financial liabilities, TEUR	EUR	DKK	NOK	SEK	Total (TEUR)
Borrowings	-	(15,874)	(6,774)	(72,063)	(94,711)
Tenant deposits and lease guarantees	-	-	-	(1,485)	(1,485)
Trade payables	(58)	(757)	(20)	(13)	(848)
Other current liabilities	(486)	(12,886)	(86)	(946)	(14,404)
Total financial liabilities	**(544)**	**(29,517)**	**(6,880)**	**(74,507)**	**(111,448)**

A decline of 50 basis points in the value of the Norwegian krona against Euro, Swedish crowns against Euro, Danish crowns against Euro would have negative effects on:

		Impact on P&L	Impact on net asset
		TEUR	TEUR
NOK	+/- 0.5%	+/- 1	-/+ 37
DKK	+/- 0.5%	-/+ 2	-/+ 109
SEK	+/- 0.5%	-/+ 41	-/+ 399
Total		**-/+ 42**	**-/+ 545**

(ii) Interest rate risk

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund's exposure to the risk of changes in market interest rates relates primarily to its long-term debt obligations with floating interest rates (Note 12).

To manage its interest rate risk, the Fund enters into interest rate swaps in which it agrees to exchange, at specified intervals, the difference between fixed and variable rate interest amounts calculated by reference to an agreed notional principal amount.

The Fund's policy is to fully hedge the interest rate risk arising from its variable interest borrowings. The decision to hedge is made as part of the investment process, also taking into account the requirements of loan agreements.

Post-closing the Fund monitors the hedging ratio, fair value changes of hedging instruments, and remaining maturity of hedging instruments compared to the corresponding loan maturities. As the Fund hedges all of the interest rate, it has no interest rate exposure from the start of the hedging until expiry. An interest rate risk arises, and may be realised, in situations where the Fund exits an investment before the maturity date of the hedging, which usually is the same as the contractual final repayment date of the loan.

In these situations the hedging instruments typically have either positive or negative fair values, which could cause a corresponding break income or cost to terminate the hedging. The Fund takes potential break costs and income into account in its exit analysis.

Trade and other receivables, trade and other payables and tenant deposits are interest free and with a term of less than one year, so it is assumed that there is no interest rate risk associated with these financial assets and liabilities.

As of 31 December 2021, if interest rates had been 100 basis points higher with all other variables held constant, net result after tax for the year would have been TEUR 517 lower . The relevant reference interest rates are currently at low levels (e.g. EURIBOR 3m at -0.572% % and CIBOR 3m at -0.27% as of 31 December 2021). If the interest rates had been 100 basis points lower, the net result after tax would not have been impacted.

Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Credit risk arises from cash and cash equivalents held at banks, trade receivables including rent receivables from lessees and other finaicial assets. The Fund has no significant concentrations of credit risk.

The Fund's maximum exposure to credit risk by class of financial asset is as follows:

	December 31, 2021 TEUR	December 31, 2020 TEUR
Derivative financial instruments	367	-
Rent receivables	521	23
Other current assets and accrued income	1,313	-
Cash and cash equivalents	9,848	8,864

The main source of credit risk for the Fund relates to the rent receivables. Such credit risk is monitored on an ongoing basis for each counterparty as part of the normal rental administration process, and relevant actions to collect rents due are taken in timely manner. Credit risk is also reported to the management on quarterly basis as part of the Fund's standard management reporting process. Diversification of tenant base, selection of tenants with a good credit history and strong financial position, and efficient rent collection, are the key credit risk management tools for the Fund.

Deposits regroupable to tenants may be withheld by the Fund in part or in whole if receivables due from the tenant are not settled, or if there are other breaches of contract.

The Fund applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all rent and other receivables. To measure the expected credit losses using simplified approach rent and other receivables are assessed based on shared credit risk

characteristics and the days past due. An impairment analysis is performed at each reporting date on an individual basis for major tenants.

On that basis, the loss allowance as at 31 December, 2021 was determined as follows for rent receivables:

	As at December 31, 2021	As at December 31, 2020
	TEUR	TEUR
Rent receivables, gross:		
Total neither due nor impaired	**11**	**-**
Past due but not impaired:		
- Less than 30 days overdue	476	23
- 30 to 90 days overdue	13	-
- More than 90 days overdue	34	-
Total past due but not impaired	**523**	**23**
Less: impairment provision	(13)	-
Total Rent receivables, net of provision for impairment	**521**	**23**

Other financial assets are neither past due nor impaired.

The credit risk with respect to cash and cash equivalents is considered immaterial as the Fund holds cash accounts in reputable financial institutions (please refer to the table below):

As at 31 December 2021

Bank	Amount TEUR	Standard & Poor's rating
Societé Generale Bank	747	A-
BN BANK ASA	1,071	A-
Nordea	257	AA-
Danske Bank	452	A+
Spar Nord	3,190	A1
SEB	4,131	A+

Liquidity risk

The focus for the liquidity management of the Fund is efficient cash management. This includes maintaining sufficient cash at both Fund and individual investment levels, together with planning and executing sustainable distribution policies from investments to the Fund and from the Fund back to investors.

Where feasible the Fund also considers using credit lines to finance any short term cash needs of the Fund. When completing acquisitions the Fund plans the timing of the capital calls to investors so that their capital is put to work efficiently.
The Fund monitors its liquidity position at both Fund and individual investment level. At Fund level sufficient working capital reserves are maintained to finance expenses, and upfront deal related costs,

such as due diligence cost before they are re-invoiced to the SPVs. Generally, during the investment period, the Fund intends to maintain cash reserves for three months of estimated Fund level costs.

As of December 31, 2021 the Fund does not have any Fund level credit lines. Any working capital requirements are financed by capital calls to the Fund investors or by cash distributions from investments.

Each investment is managed individually from a cash management perspective. At acquisition an initial working capital injection is made to the property companies if necessary. After that, the properties are assumed to be able to finance expenditure by operative cash flow generated from rental income. Certain properties with more extensive capital expenditure programs and tenant improvement needs may require additional equity or debt financing during the holding period. An appropriate cash reserve is determined for each investment, and a rolling 12 month cash flow forecast is maintained. In general, the Fund intends to distribute all surplus cash in excess of cash requirements from the SPVs to Fund level, and from there to investors. Sometimes the bank loans may contain restrictions (like cash covenants) on upstream cash distributions from the SPVs, which may require that additional cash is held at SPV level. These restrictions are taken into account in the cash management process.

A summary table, with maturity of financial assets and liabilities, is presented below. This is used by key management personnel to manage liquidity risk and is derived from management reports at investment level. The amounts disclosed in the tables below are the contractual undiscounted cash flows. Undiscounted cash flows in respect of balances due within 12 months generally equal their carrying amounts in the statement of financial position, as the impact of discounting is not significant.

The maturity analysis of financial instruments at 31 December 2021 is as follows:

in TEUR	No fixed maturity	On demand	Less than 1 year	From 1 to 5 years	More than 5 years	Total
Assets						
Cash and cash equivalents	-	9,848	-	-	-	9,848
Derivative financial instruments	-	-	-	367	-	367
Rent receivables	-	-	521	-	-	521
Other financial assets	-	-	1,313	-	-	1,313
Total assets	-	**9,848**	**1,834**	**367**	-	**12,049**
Liabilities						
Net assets attributable to unitholders	107,215	-	-	-	-	107,215
Loans from financial institutions	-	-	14,378	78,838	-	93,216
Future interest payable on financial institution loans	-	-	3,112	8,685	-	11,797
Other loans	-	-	-	886	610	1,495
Lease liabilities	-	-	45	148	100	293
Trade payables	-	848	-	-	-	848
Accrued and other liabilities	-	14,404	-	1,485	-	16,293
Total liabilities	**107,215**	**15,252**	**17,535**	**90,041**	**710**	**230,753**

The maturity analysis of financial instruments at 31 December 2020 is as follows:

in TEUR	No fixed maturity	On demand	< 1 year	From 1 to 5 years	> 5 years	Total
Assets						
Cash and cash equivalents	-	8,864	-	-	-	**8,864**
Rent receivables	-	23	-	-	-	**23**
Other financial assets	-	1,379	134	-	-	**1,513**
Total assets	-	**10,266**	-	**134**	-	**10,400**
Liabilities						
Net assets attributable to unitholders	14,958	-	-	-	-	**14,958**
Loans from financial institutions	-	-	5,388	7,074	-	**12,462**
Future interest payable on financial institution loans	-	201	327	91	-	**619**
Other loans	-	3,091	-	-	-	**3,091**
Liabilities from unit holders	-	2,412	-	-	-	**2,412**
Accrued and other liabilities	-	1,518	-	550	-	**2,068**
Trade payables	-	493	-	-	-	**493**
Total liabilities	**14,958**	**7,715**	**5,715**	**7,715**	**-**	**36,103**

The amount of contractual undiscounted cash flows related to loans from financial institutions is based on variable interest rates and other loans based on fixed interest rate. The amount disclosed regarding loans from financial institutions is determined by reference to the conditions existing at the reporting date - that is, the actual spot interest rates effective as of 31 December are used for determining the related undiscounted cash flows.

6.C. Capital risk management

For the purpose of this section, capital means Net assets attributable to unitholders of non-redeemable units as well as investors' loans and their related interest, as these loans are considered invested capital.

The Fund's objectives when managing capital are to safeguard the Fund's ability to continue as a going concern, provide returns for unitholders, and maintain an optimal capital structure to reduce the cost of capital. In order to maintain or manage the capital structure, the Fund may adjust and control the amount of distributions paid to unitholders, draw down new capital from unitholders or change the leverage used to finance its investment in properties.

The actions taken to maintain or adjust the capital structure are done within the limits of remaining commitments of the Fund and taking into account the rules in the management regulations of the Fund.

Capital structure is managed based on the loan-to-value (LTV) ratio. According to the management regulations of the Fund the maximum LTV of investments is 75% at acquisition. Within 12 months from the end of the investment period the Fund shall use reasonable endeavours to reduce the Fund level LTV to 60% of gross asset value in maximum. The Fund monitors its capital structure and LTV ratio on quarterly basis.

The LTV ratio at period-end was as follows:

in TEUR	As at December 31, 2021	As at 31 December 2020
Loans from financial institutions [1]	**89,357**	**15,625**
Fair value of the portfolio [2]	213,086	25,542
Other assets [3]	9,848	9,081
Gross Asset Value (GAV)	**222,934**	**34,623**
LTV (%)	**40%**	**45%**

[1] gross amount, the unamortized transaction costs are not deducted (See Note 12)
[2] includes investment properties (See Note 8)
[3] includes other assets and cash

6.D. Fair value estimation

The fair value of the financial assets and liabilities of the Fund by level of valuation hierarchy as of 31 December 2021 are presented in the table below:

Assets (in TEUR)	Level 1	Level 2	Level 3	Total fair value	Carrying amount
Assets measured at fair value:					
Investment property	-	-	213,086	**213,086**	**213,086**
Derivative financial instruments	-	367	-	**367**	**367**
Assets for which fair values are disclosed:					
Rent receivables	-	-	521	**521**	**521**
Other financial assets [1]	-	-	1,313	**1,313**	**1,313**
Cash and cash equivalents	9,848	-	-	**9,848**	**9,848**

Liabilities (in TEUR)	Level 1	Level 2	Level 3	Total fair value	Carrying amount
Liabilities for which fair values are disclosed:					
Net assets attributable to unitholders	-	-	107,215	**107,215**	**107,215**
Loans from financial institutions	-	-	93,216	**93,216**	**93,216**
Other loans	-	-	1,495	**1,495**	**1,495**
Trade payables	-	-	848	**848**	**848**
Other financial liabilities [2]	-	-	16,293	**16,293**	**16,293**

[1] Does not include VAT receivables and Current income tax receivables.
[2] Does not include Income tax liability and VAT liability.

The fair value of the financial assets and liabilities of the Fund by level of valuation hierarchy as of 31 December 2020 are presented in the table below:

Assets (in TEUR)	Level 1	Level 2	Level 3	Total fair value	Carrying amount
Assets measured at fair value:					
Investment Property	-	-	25,542	**25,542**	**25,542**
Assets for which fair values are disclosed:					
Rent receivables	-	-	23	**23**	**23**
Other receivables	-	-	1,379	**1,379**	1,379
Cash and cash equivalents	8,864	-	-	**8,864**	8,864

Liabilities (in TEUR)	Level 1	Level 2	Level 3	Total fair value	Carrying amount
Liabilities for which fair values are disclosed:					
Net assets attributable to unitholders of the Fund	-	-	14,958	**14,958**	**14,958**
Loans from financial institutions	-	-	12,462	**12,462**	**12,462**
Other loans	-	-	3,091	**3,091**	**3,091**
Trade payables	-	-	493	**493**	**493**
Other current liabilities	-	-	2,570	**2,570**	**2,570**

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. As all significant inputs are observable in order to fair value those instruments, they are included in Level 2.

Derivative financial instruments

The fair value of derivative financial instruments is the estimated amount that the Fund would receive or pay to settle the related agreements. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows based on observable yield curves.

Other financial assets and liabilities

The management assessed that cash, trade and other financial assets and trade and other financial liabilities, approximate their carrying amounts largely due to the short-term maturities of these instruments.

Loans and borrowings

Fair values of the Fund's interest-bearing borrowings and loans are determined by using the DCF method, using a discount rate that reflects the issuer's borrowing rate including its own non-performance risk as at 31 December 2021.

7. Critical accounting estimates and judgements

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenue, expenses and unrealised gains or losses during the year. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the assets or liabilities affected in future periods.

7.A. Judgements

In the process of applying the Fund's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the consolidated financial statements:

Business combination and asset acquisition

The Fund acquires subsidiaries that own real estate. At the time of acquisition, the Fund considers whether each acquisition represents the acquisition of a business or the acquisition of an asset. The Fund accounts for an acquisition as a business combination where an integrated set of activities and assets, including property, is acquired. More specifically, consideration is given to the extent to which substantive processes are acquired and, in particular, the extent of services provided by the subsidiary (e.g., maintenance, cleaning, security, bookkeeping, hotel services, etc.).

When the acquisition of subsidiaries does not represent a business combination, it is accounted for as an acquisition of a group of assets and liabilities. The cost of the acquisition is allocated to the assets and liabilities acquired based upon their relative fair values, and no goodwill or deferred tax is recognised.

During the year the Fund acquired 5 portfolios of investment properties (refer to Note 8 and 22). The Fund assessed if the assets acquired include an input and a substantive process that, together, significantly contribute to the ability to create outputs. The acquired process is not considered substantive as it is not critical to the ability to continue producing outputs, nor includes an organized workforce with the necessary skills, knowledge, or experience to perform that process or is considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs. Therefore, acquisitions of all portfolios were accounted for as the acquisition of properties (refer to Note 8 and 22).

Principal versus agent considerations – services to tenants

The Fund arranges for certain services provided to tenants of investment property included in the contract the Fund enters into as a lessor, to be provided by third parties. The Fund has determined that it controls the services before they are transferred to tenants, because it has the ability to direct the use of these services and obtain the benefits from them. In making this determination, the Fund has considered that it is primarily responsible for fulfilling the promise to provide these specified services because it directly deals with tenants' complaints and it is primarily responsible for the quality or suitability of the services. In addition, the Fund has discretion in establishing the price that it charges to the tenants for the specified services.

Therefore, the Fund has concluded that it is the principal in these contracts. In addition, the Fund has concluded that it transfers control of these services over time, as services are rendered by the third-party service providers, because this is when tenants receive and, at the same time, consume the benefits from these services.

7.B Estimates and assumptions

The key assumptions concerning future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Fund based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Fund. Such changes are reflected in the assumptions when they occur.

Valuation of Investment Properties

The fair value of investment property is determined by real estate valuation experts using recognised valuation techniques and the principles of IFRS 13 Fair Value Measurement. Investment property is measured based on estimates prepared by independent real estate valuation experts, except where such values cannot be reliably determined.

The key assumptions used to determine the fair value of the properties and sensitivity analyses are provided in Note 8.

Principal assumptions for income taxes

The Fund is subject to income taxes currently in Denmark, Sweden, Finland, Norway and Luxembourg. Uncertainties exist with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income. Given the wide range of international business relationships and the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expenses already recorded. The Fund establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it operates. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences in interpretation may arise for a wide variety of issues depending on the conditions prevailing in the respective Fund Company's domicile.

Fair value of derivatives and other financial instruments

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques based on quoted prices in active markets. When the fair values of financial assets and financial liabilities recorded in the statement of financial position cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the discounted cash flow (DCF) model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions relating to these factors could affect the reported fair value of financial instruments.

8. Investment property

During the year, the Fund made several investments in office and residential properties located in the Nordic Region.

On 26 March 2021, the Fund acquired Jaguar portfolio composed of office properties situated in Sweeden, through the acquisition of 100% of the partnership interests in CMNRE Sadelplatsen HoldCo AB, which is the legal owner of the properties and 100% of the shares in CMNRE III Holding GP S.à r.l which is the general partner of the partnership.

Total acquisition cost of portfolio properties was EUR 24.9 million, acquisitions cost capitalised composed EUR 0.17 million.

On 14 April 2021, the Fund acquired CC Residential portfolio composed of residential properties situated in Denmark, through the acquisition of 85% partnership interest in CC Residential JV K/S, which is the legal owner of the properties and 85% of the shares in General Partner CC Residential JV ApS which is the general partner of the partnership.

Total acquisition cost was EUR 8.61 million, acquisitions cost capitalised composed EUR 0.39 million.

On 29 April 2021, the Fund acquired Rocky TopCo portfolio composed of office properties situated in Sweden, through the acquisition of 100% of the partnership interests in Rocky TopCo AB which is the legal owner of the properties and 100% of the shares in VRETEN GP AB which is the general partner of the partnership.

Total acquisition cost was EUR 72.98 million, acquisitions cost capitalised composed EUR 0.5 million.

On 8 June 2021, the Fund acquired Städet portfolio composed of office properties situated in Sweden, through the acquisition of 100% of the partnership interests in Centria Städet Invest AB.

Total acquisition cost was EUR 35.5 million, acquisitions cost capitalised composed EUR 0.24 million.

On 1 September 2021, the Fund acquired Tool AB portfolio composed of office properties situated in Sweden, through the acquisition of 100% of the partnership interests in CMNRE III Tool AB which is the legal owner of the properties and 100% of the shares in CMNRE III Holding GP S.à r.l which is the general partner of the partnership.

Total acquisition cost was EUR 5.6 million, acquisitions cost capitalised composed EUR 0.05 million.

The following table provides information about the fair value breakdown by investment:

Entities	**Location**	**December 31, 2021**	**December 31, 2020**
		TEUR	TEUR
Kristian Augusts gate 10 AS	Norway	13,785	12,951
Lindenangs Alle 8-12	Denmark	20,588	12,432
CC Residential JV K/S	Denmark	24,312	159
CMNRE Sadelplatsen HoldCo AB (Jaguar)	Sweden	24,390	-
Rocky TopCo AB*	Sweden	79,182	-
Centria Städet Invest AB	Sweden	38,048	-
CMNRE III Tool AB	Sweden	12,780	-
Total		**213,086**	**25,542**

*including Right-of-use assets

The Fund's investment property is measured at fair value. Movements during the year were as follows:

	December 31, 2021	December 31, 2020
	TEUR	TEUR
Fair value hierarchy	Level 3	Level 3
Fair value - Opening balance	**25,542**	-
Direct acquisitions of investment property	11,060	22,397
Acquisitions of subsidiaries other than through business combinations	149,060	269
Acquisitions of right-of-use assets*	1,983	-
Capital expenditures	11,138	-
Net gain from fair value adjustments on investment property	13,743	2,340
Fair value change of right-of-use assets	(157)	-
Foreign exchange difference	717	535
Fair value - Closing balance	**213,086**	**25,542**

*During the year 2021, the Fund acquired a portfolio of properties in Sweden including a leasholds of land which is classified as investment property. These leasholds have lease terms ranging from 11 to 43 years.

Valuation processes

In accordance with the Management Regulations fair value of Investment property is defined based on external valuations, performed at acquisition of investment properties and thereafter annually.

The Fund's investment properties are valued by independent professionally qualified valuers who hold a recognised relevant professional qualification and have recent experience in the locations and segments of the investment properties valued. The external valuer is appointed annually by local deal teams. The valuations of Fund's investment properties as at 31 December 2021 were made by Cushman & Wakefield and Nordicals (previously DTZ, Nordicals).

The valuations performed by the independent valuers are reviewed by the Fund's Investment Advisor. Investment Advisor's team reviewing the valuations include the case responsible investment professional, the local deal teams approve the valuation report, the partner responsible for Fund's operations and the Chief Financial Officer. This team reports directly to the Management Company of the Fund.

The process of valuation at acquisition is similar to the annual valuation process.

At each financial year end all major inputs to the independent valuation report are verified, valuation movements are assessed compared to the prior year valuation report and discussions are held with the independent valuers.

For all investment properties, their current use equates to the highest and best use.

The fair value of right-of-use assets is not included in the valuation report prepared by external valuer. The Fund assumed, that the fair value of right–of–use asset corresponds to the fair value of lease liability as at 31 December 2021.

Investment properties fair values are cathegorised at Level 3 fair value hierarchy. There were no transfers between Levels 1, 2 or 3 during 2021 and 2020.

Valuation techniques underlying management's estimation of fair value of investment property

The fair value of investment property is determined using a discounted cash flow (DCF) method.

Under the DCF method, fair value is estimated using assumptions regarding the benefits and liabilities of ownership over the asset's life including an exit or terminal value. This method involves the projection of a series of cash flows on a real property interest. To this projected cash flow series, an appropriate, market-derived discount rate is applied to establish the present value of the income stream associated with the asset. The exit yield is normally separately determined and differs from the discount rate.

The duration of the cash flows and the specific timing of inflows and outflows are determined by events such as rent reviews, lease renewal and related re-letting, redevelopment, and refurbishment. The appropriate durations are typically driven by market behaviour that is a characteristic of the class of real property. Periodic cash flows are typically estimated as gross income less vacancy, non-recoverable expenses, collection losses, lease incentives, maintenance cost, agent and commission costs and other operating and management expenses. The series of periodic net operating income, along with an estimate of the terminal value anticipated at the end of the projection period, is then discounted.

IFRS requires to state the fair values of investments properties net of purchasers' costs. Considering the local market practice in Denmark, Norway and Sweden the independent valuer does not include deductions for purchaser's costs. In management view, it is a prudent assessment which reflects local market practices and the expected market price to be received by the Fund.

The table below presents the following for each class of the investment property:

- The fair value measurements at the end of the reporting period;
- A description of the valuation technique applied;
- The inputs used in the fair value measurement, including the ranges of rent charged to different units within the same building;
- For Level 3 fair value measurements, quantitative information about the significant unobservable inputs used in the fair value measurement.

Class of Property	Fair Value 2021 TEUR	Fair Value 2020 TEUR	Valuation technique	Key unobservable inputs	2021	2020
KA-10 - Office	13,785	12,951	DCF	• Exit yield	4.13%	4,20%
				• Rental income p.a.	225,352	378,881
				• Rental growth p.a.	2.00%	2.00%
				• Discount rate	6.19%	6,20%
				• Structural vacancy	0.00%	2,95%
Lindevangs Allé - Office	20,588	12,431	DCF	• Exit yield	4.25%	4,25%
				• Rental income p.a.	1,283,905	1,134,496
				• Rental growth p.a.	1.50%	1.50%
				• Discount rate	5.75%	5,75%
				• Structural vacancy	5.00%	5,00%
CC Residential	24,312	159	DCF	• Exit yield	3.91%	-
				• Rental income p.a.	4,733,201	-
				• Rental growth p.a.	1.50%	-
				• Discount rate	5.41%	-
				• Structural vacancy	NA*	-

Jaguar - Office	24,390	-	DCF	• Exit yield	4.75%	-
				• Rental income p.a.	2,049,208	-
				• Rental growth p.a.	2.00%	-
				• Discount rate	6.75%	-
				• Structural vacancy	9.50%	-
Rocky – Office**	77,364	-	DCF	• Exit yield	5.11%	-
				• Rental income p.a.	6,962,138	-
				• Rental growth p.a.	2.00%	-
				• Discount rate	7.11%	-
				• Structural vacancy	6.70%/6.90%	-
Städet - Office	38,048	-	DCF	• Exit yield	5.25%	-
				• Rental income p.a.	2,946,645	-
				• Rental growth p.a.	2.00%	-
				• Discount rate	7.25%	-
				• Structural vacancy	6.80%	-
Tool AB - Office	12,780	-	DCF	• Exit yield	6.50%	-
				• Rental income p.a.	1,519,077	-
				• Rental growth p.a.	2.00%	-
				• Discount rate	8.50%	-
				• Structural vacancy	9.80%	-

*The investment properties in CC Residential JV are both development projects that are valued as land value plus cost to complete and thus do not assume vacancy.
**excluding right-of-use assets

The unobservable inputs are inter-related and change in one variable is likely to have an effect on one or more other variables, for example expected vacancy rates may impact the yield with higher vacancy rates resulting in higher yields. An increase in the future rental income may be linked with higher costs like increased tenant improvement expenditure. If the remaining lease term increases the yield may decrease.

Significant increases (decreases) in estimated rental value (ERV) and rent growth per annum in isolation would result in a significantly higher (lower) fair value of the property. Significant increases (decreases) in the long-term vacancy rate, discount rate and exit yield in isolation would result in a significantly lower (higher) fair value.

Generally, a change in the assumption made for the ERV is accompanied by a directionally similar change in the rent growth per annum and discount rate (and exit yield), and an opposite change in the long-term vacancy rate.

A quantitative sensitivity analysis is, as shown below:	Sensitivity on discount rate			Sensitivity on cap rate			Sensitivity on rental growth			Sensitivity on structural vacancy		
Investment	+0.5% higher	Applied rate	-0.5% lower	+0.5% higher	Applied rate	-0.5% lower	+1.0% higher	Applied rate	-1.0% lower	+1.0% higher	Applied rate	-1.0% lower

9. Lease liabilities

During the year 2021, the Fund acquired a portfolio of leasehold properties, throgh the entity Rocky TopCo AB. These leases has lease terms ranging from 11 to 43 years (Note 8). Set out below are the carrying amounts of lease liabilities and the movements during the year:

	2021
	in TEUR
As at 1 January 2021	-
Lease Liability	1,983
Accretion of interest	43
Payments	(131)
Foreign exchange effect	(4)
As at 31 December 2021	**1,891**

10. Derivative financial instruments

The derivative financial instruments of the Fund as at December 31, 2021 include interest rate swaps entered into to hedge the interest rate risk in variable rate loans (please refer to Note 12.A.).

	As at December 31, 2021		As at December 31, 2020	
	Assets	Liabilities	Assets	Liabilities
	TEUR	TEUR	TEUR	TEUR
Interest rate swaps	206	-	-	-
Cap	161	-	-	-
Total	**367**	-	-	-

The Fund does not apply hedge accounting in accordance with IFRS 9, but the financial instruments have been designated to be valued at fair value through profit and loss. Nevertheless, interest rates swaps and caps are part of economic hedge relationships. Interest rate swaps are used to fix the interest payments of variable debt instruments.

The notional amounts of the outstanding interest rate swap contracts at December 31, 2021 were TEUR 19,783 (2020: nil).

The terms and conditions of the derivative instruments as at December 31, 2021 are summarised in the table below:

Entities	Fair value TEUR	Counterpart	Maturity date	Notional amount TEUR	Fixed rate paid, %	Floating rate received, %
Kristian Augusts gate 10 AS	77	SpareBank 1 SMN	15/10/2025	6,808	1.430%	0.680%
Rocky TopCo AB	161	SEB	29/04/2026	12.975	-	-0.089%
Rocky TopCo AB	129	SEB	29/04/2026	12,975	0.398%	-0.089%
	367			**32,758**		

11. Rent and other receivables

	As at December 31, 2021 TEUR	As at December 31, 2020 TEUR
Rent receivables	521	23
Prepayment	70	1,379

Loans from financial institutions*	14,378	-
Other loans	-	3,091
	14,378	**3,091**
Total borrowings	**94,711**	**15,553**

*As at 31 December 2021 the Fund had also the bank overdrafts in total amount of TEUR 4,986.

12.A. Loans from financial institutions

As at 31 December 2021, Fund's loans from financial institutions relate to the bank loans borrowed to finance the acquisition of properties. The loans are denominated in Danish crowns, in Norway crowns or in Sweden crowns depending on the country where the investment is located.

As at 31 December 2020 and 2021, the carrying amount of the loans is as follows in EUR and in original currency.

	In Fund currency				In original currency			
	2021	2020	2021	2020	2021	2020	2021	2020
	TEUR		TDKK		TSEK		TNOK	
Loans from financial institutions	89,357	12,534	70,387	44,939	749,130	-	68,000	68,000
Unamortised transaction costs	(1,127)	(72)	(539)	(295)	(10,461)	-	(334)	(346)
	88,230	**12,462**	**69,848**	**44,644**	**738,669**	-	**67,666**	**67,654**

As at 31 December 2021, terms and condition related to loans from financial institutions are as follows:

Borrower	Lender	Currency	Nominal amount (Original currency)	Nominal amount (EUR)	Final repayment date	Contractual interest rate	Effective interest rate, % p.a.
Lindenangs Alle 8-12	Nordea Bank	DKK	40,387,000	5,431,061	30/09/2022	CIBOR 6 + 0.8 %	2.42%
Kristian Augusts gate 10 AS	BN Bank ASA	NOK	68,000,000	6,807,625	15/12/2025	CIBOR 3M+2.85%	3.66%

CMNRE Städet HoldCo AB	Skandia	SEK	220,000,000	21,462,786	30/06/2024	STIBOR 3M+4%	4.62%
CMNRE Rocky HoldCo AB	Skandinaviska Enskilda Banken AB	SEK	379,130,723	36,987,281	30/04/2026	CIBOR 3M+2.05%	2.26%

*The loan was renewed in January 2022 with Nykredit (please see note 25).

The loans from financial institutions have standard market practice financial covenants, which include loan to value (LTV), interest cover ratio (ICR), solvency ratios and a covenant on net working capital level. The bank loans are collateralized by the pledges of owners' mortgages over the properties and shares and shareholder loans in the relevant SPVs. As at December 31, 2021 and December 31, 2020 the Fund complied with all these covenants.

As at 31 December 2020:

Borrower	Lender	Currency	Nominal amount (Original currency)	Nominal amount (EUR)	Final repayment date	Contractual interest rate	Effective interest rate, % p.a.
Lindenangs Alle 8-12	Nordea Bank	DKK	40,387,000	5,427,703	30/09/2022	CIBOR 6 + 0.8 %	0.66%

12.B. Other loans

As at 31 December 2021, the Fund has non-cash other loans relate to the loans denominated in DKK from the minority shareholder, Casa Projekt.

Borrower	Final repayment date	Interest rate	2021 Nominal amount (TEUR)	2021 Accrued interest (TEUR)	2021 Nominal amount (TDKK)	2020 Nominal amount (TEUR)	2020 Accrued interest (TEUR)	2020 Nominal amount (TDKK)
CC Residential JV K/S	30/06/ 2024	6%	885	44	6,586	262	1	1,953
Lindenangs Alle 8-12	31/12/2030	6%	610	41	4,533	349	7	2,599
			1,495	**85**	**11,119**	**611**	**8**	**4,522**

The Fund agreed on two shareholder loans with Casa Projekt with amounts of TEUR 885 (TDKK 6,586) and TEUR 610 (TDKK 4,533) related to acquisition of investment properties relating to CC Reisidential JV K/S and Lindevangs Allé respectively.

13. Income tax

Total income taxes in the consolidated statement of profit and loss are as follows:

	As at December 31, 2021	As at December 31, 2020
Statement of profit or loss	TEUR	TEUR
Current tax	344	(21)
Deferred tax	2,948	514
Income tax expense	**3,292**	**493**

Income taxes are calculated based on the tax rates in the countries where the Fund and its subsidiaries have operations, taking into account tax-exempt income and tax losses carried forward.

Income tax reconciliation is as follows:

	2021	2020
Profit / (loss) before income tax	**7,835**	**(954)**
Tax expenses calculated at domestic tax rates	**(2,410)**	**(489)**
Tax effect of:		
- Expense not deductible for tax purposes	(882)	(4)
	(3,292)	**(493)**

In 2021, the Fund was subject to income tax in Denmark, Norway and Sweden. The tax rate applied on results generated in Denmark and Norway are 22% (2020: 22%), in Sweden is 20.6% (2020: 21.4%).

In Luxembourg, the income tax rate is 24.94% (2020: 24.94%). The Fund is not subject to an income tax but to an annual subscription tax of 0.01%, calculated and payable quarterly, on the aggregate Net assets value of the outstanding units of the Fund at the end of each quarter.

	Consolidated statement of financial position		Consolidated statement of profit or loss	
(in TEUR)	31 Dec. 2021	31 Dec. 2020	31 Dec. 2021	31 Dec. 2020
Tax loss carried forward	250	25	224	25
Movement of Investment properties	(3,750)	(549)	(3,201)	(549)
Other	10	-	29	10
Deferred tax expense/ (income)	**(3,490)**	**(524)**	**(2,948)**	**(514)**
Net deferred tax liabilities	**(3,490)**	**(524)**	**-**	**-**
Reported as assets	**260**	**25**	**-**	**-**
Reported as liabilities	**(3,750)**	**(549)**	**-**	**-**

The Fund has tax losses that arose in 2021 of TEUR 250 (2020: TEUR 25) that are available indefinitely for offsetting against future taxable profits of the companies in which the losses arose.

At initial recognition, a temporary difference of TEUR 4,134 (2020: TEUR 2,240) exists between the carrying amount of investment property and its tax base, for which no deferred taxation has been provided.

This temporary difference resulted from acquisition of single asset entities that own investment property which were not considered to constitute a business.

14. Trade payables

Trade payables mainly include payable amounts relating to acquisition transaction costs and amounts payable to third parties related to development costs, capital expenditure and utilities.

15. Other liabilities

As at 31 December 2021, other non-current liabilities are mainly composed of the part of purchase price for the acquisition of Stadet portfolio. The purchase price deferred is presented by the guarantee of the seller to cover the lease payments for the key tenant of the property in case of default. The guarantee covers the whole lease term of key tenant and matures on 31 October 2028.

As at 31 December 2021, other current liabilities include:

	As at December 31, 2021 TEUR	As at December 31, 2020 TEUR
Liability to unitholders	-	2,412
Current liabilities to third parties	3,136	1,465
Transaction cost related to the new acquisition	-	177
Accrued interest	207	17
Current income tax	458	51
VAT payable	687	82
Advances received	405	17
Purchase price payable	11,061	-
Total	**15,953**	**4,223**

Purchase price payable in the amount of TDKK 82,250 (TEUR 11,061) relates to CC Residential JV's acquisition of Campus.

16. Net assets attributable to Unitholders

Investors in the Fund hold units (the "Units"). Except for persons engaged in the management of the Fund, only well-informed investors, as defined by the article 2 of the RAIF law may invest in the Units.

Class A Units

The subscription price for each Class A Unit is EUR 100 and up to EUR 5.5 million Class A Units may be issued.

Investors hold Units in the Fund ("Class A Units") in return for advancing their commitments to the Fund in accordance with the Management Regulations. Class A Units may be issued in separate sub-classes but all A Units will entitle the relevant unitholders to receive the distributions to the extent that the Fund has funds available for distribution and otherwise subject to the terms of the Management Regulations.

Class B Units

The subscription price for each Class B is EUR 0.01 and up to 2 million Class B Units may be issued.

The Carried Interest Partners (means CapMan, any of its Associates, any Key Executive, any director, officer, member or employee of CapMan or its Associates and/or any personal or collective holding vehicle of any of the aforementioned persons) will be issued with carried interest units in the Fund ("Class B Units") which may be issued in separate sub-classes but which will entitle the Unitholders, to the extent that the Fund has funds available for distribution and otherwise subject to the terms of the Management Regulations disclosing the criteria, to receive distributions of Carried Interest made by the Fund. During the year ended 31 December 2021 and 31 December 2020, no carried interest has been paid or accrued as the required rate of return (IRR) have not been met.

Class A Units and Class B Units are together referred to herein as "Units". All Units are issued in registered form and fully paid-up.

	December 31, 2021		*December 31, 2020*	
in TEUR	**Commitment**	**NAV**	**Commitment**	**NAV**
Class A units	563,677	107,195	448,687	14,938
Class B units	20	20	20	20
	563,697	107,215	**448,707**	**14,958**

	December 31, 2021		*December 31, 2020*	
in TEUR	**Units outstanding**	**Net assets value per unit**	**Units outstanding**	**Net assets value per unit**
Class A units	1,043,471	102.73	163,068	91.61
Class B units	2,000,000	0.01	2,000,000	0.01

Distributions:

After the Fund have fulfilled its obligation in regard to its liability, meaning all the fees, expenses and liabilities related to the business and operations of the Fund including liabilities related to the loans, hedging and taxes (as the AIFM may reasonably determine), the Fund can distribute to Unitholders pro-rata to each subject to the following order of priority:

(i) to the investor in repayment of its capital contributions which have been drawn down and which remain outstanding;
(ii) to the investor until it has received the preferred return (internal rate of 8% per annum on its drawn down commitment);
(iii) as to 40% to such investor and 60% to the carried interest partners in their respective catchup percentages until the carried interest partners have, in aggregate, received in respect of such investor an amount equal to the carried interest percentage (20%) of the aggregate amount of distributions made under paragraph (ii) and this paragraph (iii); and
(iv) thereafter 80% to the investor and 20% to the carried interest partners in their respective profit sharing percentages.

17. Rental income and revenue from contracts with customers

	2021 TEUR	2020 TEUR
Rental income retail	2,429	-
Rental income office	1,213	15
Rental income-others	1,021	-
Rental income	**4,663**	**15**
Services to tenants	419	-
Revenue from contracts with customers	**419**	**-**
Total rental income and revenue from contracts with customers	**5,082**	**15**

The future aggregate minimum rentals receivable under non-cancellable operating leases are as follows:

	As at December 31, 2021	As at December 31, 2020
Not later than 1 year	6,299	194
Later than 1 year and not later than 5 years	9,759	103
Over 5 years	1,397	-
	17,455	**297**

18. Property operating expenses

Details of the operating expenses are as follows:	2021 TEUR	2020 TEUR
Maintenance	535	-
Property tax	439	-
Asset management fees	426	3
Heating	324	1
Electricity and gas	227	1
Insurance (property full value insurance)	64	2
Water and Waste water	55	-
Other expenses	77	2
Total	**2,147**	**9**

19. Administrative and other expenses

Administrative and other expenses are split by expenses incurred by the Fund and expenses incurred by the property companies.

Expenses incurred by the property companies are as follows:

	2021 TEUR	2020 TEUR
Non-recoverable VAT	122	257
Advisory expenses	28	12
Other expenses	86	5
Total	**236**	**274**

Expenses incurred by the Fund are as follows:

	2021 TEUR	2020 TEUR
Management fee expense (Note 21)	3,490	919
Administrator's fee	480	197
Legal fees	327	12
Other advisory services	176	31
Audit fees	95	91
Fund Formation expenses	-	1,301
Custodian fees	63	20
Other administration expenses	1,050	472
	5,681	**3,043**

20. Finance income and costs

Details of the finance income and costs are as follows:

	2021 TEUR	2020 TEUR
Fair value gains from derivatives	267	-
Other interest income	2	-
Foreign exchange gain	-	64
Finance income	**269**	**64**
Interest expense on bank borrowings	(1,949)	(27)
Foreign exchange losses	(312)	-
Amortization of loan transaction costs	(269)	(9)
Interest expense on other liabilities	(184)	(11)
Loan arrangement fees – agency fees	(130)	-
Other financial expenses	(106)	-
Interests on derivative financial instruments	(88)	-
Finance costs	**(3,038)**	**(47)**
Finance (costs) / income - net	**(2,769)**	**17**

21. Related parties transactions

The Fund's related parties correspond to the subsidiaries shareholders, investors and to the Manager of the Fund (Refer to note 16 for the transactions with Fund's Investors).

Shareholder Loan
On 9 April 2021 and 10 December 2021, two Shareholder Loan Agreements were signed between the Fund and CASA Projekt, the minority shareholder for the project CC Residential, with maturity dates 30 June 2024 and 31 December 2030 respectively (refer to note 12).

Non-controlling interest

	December 31, 2021 TEUR	December 31, 2020 TEUR
Capital contribution	427	263
Increase in net asset	69	11
Total	**496**	**274**

There were no dividends paid to Non-Controlling interest during the year. (2020: 0 TEUR)

On 30 September 2021, CASA Projekt A/S increased its share capital by 1,000 shares.

Management fee
The Management Company is entitled to a management fee in relation to the management of the Fund. The management fee is computed at the level of the Fund and depends on the commitment of each investor of the Fund.

For each of the periods specified below (including, for the avoidance of doubt, the balance of the accounting period in which the relevant date occurs), the management fee shall be:
(A) from the date of the First Closing until the fourth anniversary of such date, the Management Fee will be:
(i) in respect of an Investor whose Commitment is less than €50 million:
- 1.5 per cent. per annum of such Investor's Share of the Invested Capital; plus
- 1 per cent. per annum of such Investor's undrawn Commitment; and

(ii) in respect of an Investor whose Commitment is at least €50 million:
- 1.25 per cent. per annum of such Investor's Share of the Invested Capital; plus
- 0.75 per cent. per annum of such Investor's undrawn Commitment; and

(B) after the fourth anniversary of the date of the First Closing:
(i) in respect of an Investor whose Commitment is less than €50 million:
- 1.5 per cent. per annum of such Investor's Share of the Invested Capital; and

(ii) in respect of an Investor whose Commitment is at least €50 million:
- 1.25 per cent. per annum of such Investor's Share of the Invested Capital

and provided that the rates above shall be reduced by 25 basis points for those Investors who make their Commitment at the first closing or any other closing held prior to 1 September 2020 (the "First Closing Reduction").

The Fund pays an Asset Management fee to CapMan Real Estate Manager S.A. Asset Management fees are based on the committed equity, with a division based on drawn and undrawn equity, held by each party at a prescribed percentage over the financial year multiplied by the percentage of the equity held.

The management fees that were paid by the Fund to the Management Company are further detailed in Note 19.

Carried interest
There is no carried interest paid or accrued for the year 2021 as no required IRR rate has been met (refer to Note 16).

AIFMD reporting feee
The Fund pays an AIFMD reporting fee, amounting to TEUR 1 to CapMan Real Estate Manager S.A. during the year ended December 31, 2021.

22. List of consolidated entities

Tool	0.278	5.722
Pukkila	7.93	0

25. Events after the date of the consolidated statement of financial position

In January 2022 the MDKK 30 loan in CentrumKontorerne RK 2020 ApS (the subsidiary of CC Residential) has been renewed with Nykredit. The matiruty date of the new loan is 31 October 2028.

On 21 January 2022 the upstream merger in Städet subgroup went through - CMNRE Städet AB merged into CMNRE Haggvik Holdco AB.

On 1 March 2022 the second closing of Campus was finalised. The Fund repayed the liabilty due to Seller in the amount of TDKK 82,250 (TEUR 11,058) and related stamp duty in the amount of TDKK 509 (TEUR 0,6). The payment was financed partly with additional equity drawdown made on 24 February 2022 from the Fund investors for the amount of TDKK 56,303 (TEUR 7,570) and JV partner for the amount of TDKK 9.935 (TEUR 1,336) and partly with loan drawn from Nykredit for the for

TDKK 47,045 (TEUR 6,325). The cash remaing after paying the price to the Seller was kept by the Fund to cover remaing transaction cost and property expenditures.

In April 2022 the Fund has closed one new acquisition of Verdict portfolio, a mixed-use office building in Glostrup, Greater Copenhagen, Denmark.

On 24 February 2022, Russia began a full-scale invasion of Ukraine that is the largest conventional military attack on a sovereign state in Europe since World War II. In response, a large number of countries (including EU, the US and UK) began applying significant further sanctions on Russia with the aim of crippling the Russian economy. The conflict itself and the sanctions imposed in response is estimated to pose a substantial economic risk for the region and internationally. Based on preliminary portfolio analysis, the direct impact to Group's investments is very limited, but the conflict, fluctuations in foreign exchange rates and commodity prices, and the potential to adversely impact global economies, has driven a sharp increase in volatility across markets. The Board of Managers regards these events for the Group as non-adjusting events after the reporting period.

Although neither the Group's performance and going concern nor operations, at the date of the approval of these consolidated financial statements, have been significantly impacted by the above, the Board of Directors of the Management company continues to monitor the evolving situation and its impact on the financial position and operations of the Group.
